Comments	<input type="text" value="With regard to the lighting scheme submitted I am happy that the scheme has taken ecological impacts into account and minimises light spill onto surrounding vegetation and outside the science park. The lighting timings seem reasonable if it is assumed buildings will be used until midnight. My only comments on those is whether roads really need to be constantly lit all night or whether external building lights need to be on during the day even if dimmed? - however I appreciate these may be highway and safety reasons. They mention lighting timings may change through central control as the needs of the park change and I would recommend a specific review after a defined period for lighting to ensure areas are not lit unnecessarily. I am however satisfied with the lighting types chosen and for the condition to be discharged. Kind regards Charlotte"/>
