Contents

Non-technical summary

Chapter 1	Introduction
Chapter 2	The site
Chapter 3	The proposals
Chapter 4	Defining the issues
Chapter 5	Cultural heritage
Chapter 6	Hydrology and water quality
Chapter 7	Land use
Chapter 8	Landscape and visual effects
Chapter 9	Noise and vibration
Chapter 10	Social and community effects
Chapter 11	Traffic and transport
Chapter 12	Air quality
Chapter 13	Ground conditions and contamination
Chapter 14	Natural heritage
Chapter 15	Waste

Glossary

Technical appendices (bound separately)

Technical Appendix 1	Scoping consultation exercise
Technical Appendix 2	Cultural heritage
	2a Cultural heritage
Technical Appendix 3	Amended hydrology
	3a Flood Risk Assessment
Technical Appendix 4	Amended landscape and visual effects
Technical Appendix 5	Ground conditions and contamination
	5a Pell Frischmann report
Technical Appendix 6	Amended natural heritage

Figure List

Chapter 1 Introduction

- Figure 1.1 The location of the site
Figure 1.2 The information that must be included in the environmental statement
Figure 1.3 The information that may be included in an environmental statement by way of explanation or amplification
Figure 1.4 Structure of the environmental statement

Chapter 2 The site

- Figure 2.1 Application boundary
Figure 2.2 Site characteristics and context
Figure 2.3 Aerial photograph of the site

Chapter 3 The proposals

- Figure 3.1 Master plan
Figure 3.2 Building heights plan
Figure 3.2a Building density plan
Figure 3.2b Children's play areas
Figure 3.2c Tree removal and retention
Figure 3.3 An extract from the Cherwell District Local Plan South West Bicester Urban Extension Proposals Map
Figure 3.4 Phasing plan
Figure 3.5 Proposed delivery of residential development
Figure 3.6 The likely range of activities to be undertaken during construction
Figure 3.7 The type of plant needed during construction
Figure 3.8 The principal construction materials and approximate quantities likely to be required during construction

Chapter 4 Defining the issues

- Figure 4.1 List of organisations consulted during the scoping exercise
Figure 4.2 Key issues raised during scoping
Figure 4.3 Final ranking of the environmental issues
Figure 4.4 Significance matrix

Chapter 5 Cultural heritage

- Figure 5.1 Data sources consulted
Figure 5.2 List of archaeological sites and features in the vicinity
Figure 5.3 Plan of all the known cultural heritage sites and features in the vicinity of the proposed development areas
Figure 5.4 Results from the geophysical survey (after Stratascan 2006)
Figure 5.5 Map showing the trench locations of the site evaluation undertaken by Wessex Archaeology (after Wessex Archaeology 2006)

- Figure 5.6 Listed buildings in the vicinity of the proposed development areas
- Figure 5.7 Cultural heritage: sensitivity or importance of receptor
- Figure 5.8 Cultural heritage: magnitude of change
- Figure 5.9 Cultural heritage significance matrix
- Figure 5.10 Ordnance Survey first edition county series map of 1885
- Figure 5.11 Map showing the areas of archaeological interest across the site (after Wessex Archaeology 2006)
- Figure 5.12 Map showing the relationship between the development proposals and known archaeology from all investigations to date
- Figure 5.13 Sensitive receptors
- Figure 5.14 Potential impact on cultural heritage issues
- Figure 5.15 Detail of the 50m buffer zone imposed for development around each of the Bronze Age ring barrows
- Figure 5.16 Residual effects

Chapter 6 Hydrology and water quality

- Figure 6.1 Data sources and references
- Figure 6.2 Hydrology and water quality: magnitude of change
- Figure 6.3 Hydrology and water quality: sensitivity or importance of receptor
- Figure 6.4 Hydrology and water quality significance matrix
- Figure 6.5 Water features at or near to the site and flooding potential of existing watercourses

Chapter 7 Land use

- Figure 7.1 Data sources and references
- Figure 7.2 Land use: magnitude of change
- Figure 7.3 Land use: sensitivity or importance of receptor
- Figure 7.4 Land use significance matrix
- Figure 7.5 Key land uses at and surrounding the site
- Figure 7.6 General agricultural land survey data
- Figure 7.7 Detailed agricultural land survey data
- Figure 7.8 Public rights of way at the site
- Figure 7.9 Land use residual effects

Chapter 8 Landscape and visual effects

- Figure 8.1 Data sources and references
- Figure 8.2 Visual envelope
- Figure 8.3 Landscape: sensitivity or importance of receptor
- Figure 8.4 Landscape: magnitude of change
- Figure 8.5 Landscape significance matrix
- Figure 8.6 Visual: magnitude of change
- Figure 8.7 Visual: sensitivity or importance of receptor
- Figure 8.8 Visual significance matrix
- Figure 8.9 Topography and drainage
- Figure 8.10 Vegetation
- Figure 8.11 Public rights of way
- Figure 8.12 Landscape character areas and types
- Figure 8.13 Site context: landscape character areas and types

- Figure 8.14 Representative viewpoints: local
- Figure 8.15 Representative viewpoints: intermediate / distant
- Figure 8.16 Viewpoint 1 (summer and winter)
- Figure 8.17 Viewpoint 6 (summer and winter)
- Figure 8.18 Viewpoint 18 (summer and winter)
- Figure 8.19 Zone of Visual Influence
- Figure 8.20 Summary of the significance of landscape resource impacts
- Figure 8.21 Summary of the significance of visual impacts
- Figure 8.22 Residual effects
- Figure 8.23 Tree removal and retention
- Figure 8.24 Sections A-A and B-B

Chapter 9 Noise and vibration

- Figure 9.1 Typical noise levels
- Figure 9.2 Data sources and references
- Figure 9.3 Noise and vibration: sensitivity or importance of receptor
- Figure 9.4 Noise and vibration: magnitude of change
- Figure 9.5 Noise and vibration significance matrix
- Figure 9.6 Sensitive receptors
- Figure 9.7 Noise monitoring locations
- Figure 9.8 Noise sensitive receptors and noise survey locations
- Figure 9.9 Noise measurements taken on 11th April 2005
- Figure 9.10 Best Practical Means to control noise from construction activities
- Figure 9.11 Road construction noise levels
- Figure 9.12 Comparison of measured and calculated levels
- Figure 9.13 NoiseMap 2000 noise level prediction locations
- Figure 9.14 2014 with development minus 2014 without development
- Figure 9.15 Significant noise impacts
- Figure 9.16 Percentage of population bothered very much or quite a lot by road traffic noise
- Figure 9.17 Percentage of population bothered very much or quite a lot by road traffic induced vibration
- Figure 9.18 Significance of noise effects
- Figure 9.19 Noise and vibration residual effects

Chapter 10 Social and community effects

- Figure 10.1 Data sources and references
- Figure 10.2 Social and community effects: magnitude of change
- Figure 10.3 Social and community effects: sensitivity or importance of receptor
- Figure 10.4 Social and community effects significance matrix
- Figure 10.5 Tenure: percentage of households, April 2001
- Figure 10.6 Occupational group of all people aged between 16 and 74 in employment
- Figure 10.7 Crime statistics for Cherwell District (quarterly average figures for April 2003 to March 2004)
- Figure 10.8 Index of deprivation; rankings for local authorities within Oxfordshire
- Figure 10.9 Local school forecasts of surplus or insufficient capacities, School Organisation Plan 2004-2009
- Figure 10.10 Forecast population change 2001 – 2011

- Figure 10.11 Population and households for districts and major towns
- Figure 10.12 Cherwell District – Ward percentage growth in population, 2001 to 2011
- Figure 10.13 Population change by broad age band, 2001 to 2011.
- Figure 10.14 Social and community residual effects

Chapter 11 Traffic and transport

- Figure 11.1 Data sources and references
- Figure 11.2 Traffic and transport: sensitivity or importance of receptor
- Figure 11.3 Traffic and transport: magnitude of change
- Figure 11.4 Traffic and transport significance matrix
- Figure 11.5 Local highway network
- Figure 11.6 2005 base flows AM peak hour 0800 – 0900
- Figure 11.7 2005 base flows PM peak hour 1700 – 1800
- Figure 11.8 Existing pedestrian and cycle network
- Figure 11.9 Existing public transport network
- Figure 11.10 Existing bus services
- Figure 11.11 Existing rail services
- Figure 11.12 Personal injury accidents
- Figure 11.13 Accident analysis
- Figure 11.14 Access strategy
- Figure 11.15 Forecast base flows 2014 AM peak hour 0800 – 0900
- Figure 11.16 Forecast base flows 2014 PM peak hour 1700 – 1800
- Figure 11.17 With development flows 2014 AM peak hour 0800 – 0900
- Figure 11.18 With development flows 2014 PM peak hour 1700 – 1800
- Figure 11.19 Capacity of the South West Bicester access junctions
- Figure 11.20 New Perimeter Road Two-Way Flows
- Figure 11.21 Capacity of Other New / Improved Junctions
- Figure 11.22 Existing A41 Esso Roundabout
- Figure 11.23 Wider Network Flows – 2014 AM Peak Hour
- Figure 11.24 Wider Network Flows – 2014 PM Peak Hour
- Figure 11.25 Wider Network Flows – 2014 Annual Average Daily Traffic (AADT)
- Figure 11.26 Traffic and transport residual effects

Chapter 12 Air quality

- Figure 12.1 Summary of the objectives of the UK Air Quality Strategy
- Figure 12.2 Data sources and references
- Figure 12.3 Sources of DMRB v1.02 data inputs
- Figure 12.4 Air quality: sensitivity or importance of receptor
- Figure 12.5 Air quality: magnitude of change
- Figure 12.6 Air quality significance matrix
- Figure 12.7 Importance / sensitivity of receptors
- Figure 12.8 Air quality sites of sensitive receptors
- Figure 12.9 Grid squares presenting background concentrations for NO₂/PM₁₀
- Figure 12.10 Annual mean adjusted field sampling results from CDC NO₂ survey for the comparison with AURN sampling data
- Figure 12.11 Baselines without development for all years of assessment as determined by the DMRB v1.02 air quality screening model
- Figure 12.12 NO₂ resulting change between baseline and ‘with development’ scenario for 2014

Figure 12.13 PM₁₀ resulting change between baseline and 'with development' scenario for 2014

Figure 12.14 Construction dust mitigation measures

Chapter 13 Ground conditions and contamination

Figure 13.1 Data sources and references

Figure 13.2 Ground conditions and contamination: magnitude of change

Figure 13.3 Ground conditions and contamination: sensitivity or importance of receptor

Figure 13.4 Ground conditions and contamination significance matrix

Figure 13.5 Areas of made ground and contamination 'hot spots' at the site

Chapter 14 Natural heritage

Figure 14.1 Data sources and references

Figure 14.2 Natural heritage: magnitude of change

Figure 14.3 Natural heritage: sensitivity or importance of receptor

Figure 14.4 Natural heritage significance matrix

Figure 14.5 Phase 1 habitat survey

Figure 14.6 Great crested newt terrestrial habitat survey

Figure 14.7 Trees with the potential for bat roosts

Figure 14.8 Snail survey areas

Figure 14.9 Residual effects table

Chapter 15 Waste

Figure 15.1 Data sources and references

Figure 15.2 Regional estimates for use / disposal of construction, demolition and excavation waste in England in 2003

Figure 15.3 Amount and composition of industrial and commercial waste produced in Oxfordshire between 1998 and 1999

Figure 15.4 Waste management facilities in the south east in 1998 – 1999

Figure 15.5 Location of the waste recycling sites in Cherwell District
