

Kingsmere Public Art Lighting Proposal

Umbrella Structure

- 1 x warm white CREE LED to be used with silicone lens and Meanwell driver.
- To be mounted at the top of the single pole, illuminating the inside. Exact positioning is to be confirmed during the manufacturing of the structures.
- Lighting will be controlled via the feeder pillar and photocell.
- Illuminance at ground level will not exceed 100 Lux.

Pavilion Structure

- 4 x 3W mini modules with CREE LEDs, running off of a Meanwell Driver.
- To be fixed on the inside of the roof beams, illuminating each side of the structure fascia.
- Lighting will be controlled via the feeder pillar and photocell.
- Illuminance at ground level will not exceed 100 Lux.
