# Housing Land Supply Statement

Published February 2023

**Cherwell**

DISTRICT COUNCIL  
NORTH OXFORDSHIRE

# Cherwell District Council

## Housing Land Supply Statement

### February 2023

#### Introduction

1. This Housing Land Supply Statement has been prepared in February 2023. The housing completion and permission data it relies up is that verified at 31 March 2022.
2. The review of the projections for future delivery was undertaken in December 2022 informed by consultations with the development industry, development management colleagues, infrastructure providers and historic information.
3. This statement assesses the housing land supply position for Cherwell for the five-year period 1 April 2022 to 31 March 2027.
4. Previously the five-year housing land supply was presented as part of the Annual Monitoring Report.
5. Separate Housing Land Supply Statements will be published from hereon to provide more flexibility in when the Council produces its statement in response to significant changes of circumstance and to enable reporting earlier in the calendar year following the verification of housing completion and permission data (usually May/June).
6. The next 'annual' update will be published following completion of the annual completion and permission monitoring following the end of the monitoring year 2022/23.

#### National Policy Context

7. The five-year housing land supply (or '5YHLS') is an important 'test'. Where authorities fall below 5 years the 'tilted balance' in the National Planning Policy Framework (NPPF) applies with the presumption in favour of sustainable development.
8. The NPPF (paragraph 74) requires local planning authorities to:  
*"identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old<sup>39</sup>."*

9. Footnote 39 to paragraph 74 explains that the housing requirement in adopted strategic policies may continue to be used if the policies have been reviewed and found not to require updating. This is known as a regulation 10A review (under regulation 10A of the Town and Country Planning (Local Planning) (England) Regulations 2012). Footnote 39 states:

*“Unless these strategic policies have been reviewed and found not to require updating. Where local housing need is used as the basis for assessing whether a five-year supply of specific deliverable sites exist, it should be calculated using the standard method set out in national planning guidance”.*

10. Accordingly, where adopted strategic policies are five years old and in the absence of a review finding them to be up to date, LPAs should use their Standard Method figure for monitoring purposes.
11. The Cherwell Local Plan 2011-2031 was adopted in 2015 and hence is over five years old. A review of the Plan’s policies was presented to the Executive in January 2021. The review concluded that the majority of the Plan’s policies were generally up to date. This included the Local Plan requirement of 1,142 homes per annum (22,840) which then remained the default starting point for the purposes of calculating the 5-year supply.
12. In January 2022, the 2021 Annual Monitoring Report was presented to the Council’s Executive. The Executive resolved (1.2):

*‘To note the district’s housing delivery and five-year housing land supply positions (for conventional housing and for Gypsies and Travellers) at Section 5 of the AMR and the need for updating of the land supply positions should these materially change, including consideration of the Vale of White Horse Council’s 3 December 2021 Cabinet decision relating to the Regulation 10A review of its Part 1 Plan’.*
13. The Local Plan for Vale of White Horse District Council is based on the 2014 Strategic Housing Market Assessment (SHMA). This is the same evidence which underpins the Cherwell Local Plan 2011-2031.
14. Vale of White Horse District Council had presented its ‘Regulation 10A’ review of policies to its Cabinet, concluded that it’s housing requirement required updating and proposed using the national ‘standard methodology’ for the purposes of monitoring and housing land supply, plus an annual requirement from Part 2 of its Local Plan for contributing to Oxford’s unmet housing need. Vale of White Horse Councils approved its Regulation 10A review
15. The Cherwell 2021 AMR published in January 2022, noted:

*'5.37 In finalising this AMR we are aware the Vale of White Horse DC, one of the 5 district councils within Oxfordshire, has suggested that their plan requirement cannot be considered to be up-to-date and that they propose reverting to Local Housing Need (LHN) also known as the 'standard method' for the calculation of the five-year land supply. Furthermore, a new housing need assessment is emerging to support the Oxfordshire Plan process and this will also inform the Cherwell Local Plan review. A draft was published alongside the Summer 2021 consultation on the Oxfordshire Plan and finalisation is pending. The Secretary of State has also indicated that the means by which housing need is calculated is under review (Housing, Communities and Local Government select committee, 8 November 2021)', and*

*'5.38 There may therefore be a need in the near future to consider the basis from which the five-year land supply calculations for Cherwell are derived including whether or not LHN is appropriate.'*

### **Current Circumstances**

#### *Cherwell Local Plan 2011-2031*

16. Since the publication of the 2021 AMR, there has been a material change in circumstances to warrant a change to the standard method for the purpose of assessing housing land supply for Cherwell.
17. In December 2022 the Council published a Housing and Economic Needs Assessment (HENA) produced jointly with Oxford City Council to inform their respective Local Plan processes. THE HENA considers the Oxfordshire's Functional Economic Market Area (FEMA) and the Oxfordshire Housing Market Area (HMA).
18. The HENA is new up to date evidence of housing need, which provides an assessment of housing need which is materially different to that in the 2014 SHMA. It indicates that the 2014 SHMA is now out of date. This is the conclusion of a new 'Regulation 10A' review of the strategic policies in the Cherwell Local Plan 2011-2031 presented to the Council's Executive on 6 February 2022. As the housing requirement in the adopted strategic policies in the 2015 Local Plan is based on the 2014 SHMA, it further indicates that these strategic policies do, in the words of NPPF para 74 and footnote 39, require updating.
19. In view of these circumstances, it is appropriate to apply the standard methodology for the assessment of local housing need for Cherwell for the purpose of calculating the five-year housing land supply.

#### *Cherwell Local Plan 2011-2031 Partial Review – Oxford's Unmet Housing Needs*

20. A partial review of the Local Plan to meet Oxford's unmet needs was adopted in September 2020. The Partial Review makes provision for 4,400 homes over the plan

period of which 1,700 are to be delivered 2021-2026 and the remaining homes by 2031 (i.e. over a 10-year period). This results in a stepped housing requirement as follows:

Year	2021/22 – 2025/26	2026/27 – 2030/31	Total
Housing requirement	340 x 5 years	540 x 5 years	4400

21. Policy 12a of the Partial Review states:

*“The Council will manage the supply of housing land for the purpose of constructing 4,400 homes to meet Oxford’s needs. A separate five-year housing land supply will be maintained for meeting Oxford’s needs” (emphasis added).*

22. As the Partial Review Plan is not yet five years old (adopted in 2020), there is no justification to change the approach to monitoring land supply associated with this plan. Furthermore, the unmet need figure is fixed, following agreement through a duty-to-cooperate process, and has recently been found sound and adopted after examination of Oxford City’s Local Plan and Cherwell’s Partial Review Plan (amongst others), and so the reliance on the 2014 SHMA is less important. As the adopted strategic policies (which contain the unmet need component of the housing requirement) in the Partial Review Plan are less than five years old, the Standard Method does not apply for the purposes of calculating unmet need for Oxford.

23. The evidence provided by the 2022 HENA will update the quantum of unmet need to be planned for in Cherwell, but this will not apply until the emerging Cherwell 2040 Local Plan Review has been subject to Examination and is adopted.

24. In view of these circumstances, the housing requirements of the Partial Review of the Local Plan will be applied for the purpose of calculating the five-year housing land supply for Cherwell’s contribution to Oxford’s unmet housing need.

### Five Year Housing Land Supply Assessments

25. The standard method local housing need figure for Cherwell District of is presently 742 dwellings per annum (dpa). This figure has been calculated using the Government’s Planning Practice Guidance<sup>1</sup>, in accordance with NPPF paragraph 74 footnote 39. A requirement of 742 homes per annum will therefore be applied to assessing the five-year supply of **deliverable** housing sites for Cherwell.

26. The NPPF defines the word ‘deliverable’:

*“**Deliverable:** To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:*

<sup>1</sup> <https://www.gov.uk/guidance/housing-and-economic-development-needs-assessments>

*a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).*

*b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.”*

Paragraph 74 also states that: *“The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:*

*a) 5% to ensure choice and competition in the market for land; or*

*b) 10% where the local planning authority wishes to demonstrate a five year supply of deliverable sites through an annual position statement or recently adopted plan<sup>40</sup>, to account for any fluctuations in the market during that year; or*

*c) 20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply<sup>41</sup>.”*

27. Footnote 40 does not apply as the Local Plan Part 1 is not recently adopted. It should also be noted that at the present time the Council has not decided to submit an annual position statement on its five-year supply to the Planning Inspectorate for consideration for the Partial Review.
28. Footnote 41 cross-refers to the Government’s Housing Delivery Test results whereby if delivery is under 85% then the Council needs to apply a 20% buffer to the deliverable supply. The most recent Housing Delivery Test<sup>2</sup> result for Cherwell is 153% therefore the 5% buffer under paragraph 74 a) should be applied to the five-year supply calculation.

### **Cherwell’s Five Year Housing Land Supply**

29. A Housing Delivery Monitor is appended to this statement setting out the district’s position in relation to housing completions, permissions, and housing supply from deliverable and other sites.
30. The AMR contains the details of housing completions since the base date of the Local Plan (1 April 2011).

---

<sup>2</sup> <https://www.gov.uk/government/publications/housing-delivery-test-2021-measurement>

31. Under the Government’s standard method there is no need to take any shortfall prior to the base date of the five-year housing land supply calculation into account.
32. Cherwell has a range of small and strategic sites which are being built out. As reported in the AMR there were 1,175 completions in the 2021/22 monitoring year from a range of sites including small rural sites and large, strategic allocations.
33. The Housing Delivery Monitor details the sources of supply for the period from April 2022 to align with the monitoring year and historic monitoring data.
34. A further review will be undertaken once housing completions have been confirmed for the period 2022/23.
35. Evidence on the deliverability of sites including information on anticipated buildout has been recorded as of December 2022. This is reflected in the commentary that accompanies all deliverable and developable supply included within the Housing Delivery Monitor to provide an accurate picture of available supply. Sources of evidence include:
  - Questionnaires sent to all known agents/developers requesting updates on projected buildout
  - Discussions with Development Management Officers and other council departments engaged in the delivery of sites
  - A review of Building Control Records to establish if notices have been received to indicate that developers are aligning the necessary additional consents ahead of construction.
36. A summary of supply from deliverable sites over the five year period is shown below:

	Projection 22/23	Projection 23/24	Projection 24/25	Projection 25/26	Projection 26/27	Projected Supply
Banbury	344	317	335	257	300	1660
Bicester	384	309	209	160	250	1242
Other Areas	295	293	260	207	124	1139
Windfall	0	0	0	100	100	200
<b>CDC Total Supply</b>	<b>1023</b>	<b>919</b>	<b>804</b>	<b>724</b>	<b>774</b>	<b>4244</b>

*Banbury*

37. Strategic allocations in Banbury account for most of the supply in Banbury over the next 5 years (1660 dwellings). These are predominantly from South of Salt Way (Banbury 16

& Banbury 17) and Drayton Lodge Farm (Banbury 18) which together account for 1009 dwellings. The remaining supply is from a mixture of smaller allocated sites in the urban area and unallocated sites with planning permission.

### *Bicester*

38. Delivery at Bicester has been somewhat slower than at Banbury with many of the allocations still only at Outline stage. Whilst the projection for delivery is still significant at some 1,242 homes over 5 years this is substantially below that envisaged in the 2015 plan. There are several reasons for this including the delivery of essential infrastructure to deliver growth. Cherwell District Council is working proactively with partners including Homes England to unlock development. As of January 2023 when updating the Housing Delivery Monitor a cautious approach has been taken in assessing delivery. For example, it is anticipated that delivery from Northwest Bicester will be around 50 dwellings in the proceeding 5 year period with the remainder expected to come forward in years 6-10 and beyond the plan period.

### *Other Areas*

39. The total for Other Areas includes Heyford Park which is expected to deliver 562 homes over the next 5 years. The remaining 577 homes are drawn from a range of smaller sites.

### *Windfalls*

40. No windfall allowance is included within the deliverable supply for the first 3 years. This is to avoid double counting as the known sites are included within the allowance for small sites (sites less than 10 dwellings) or, where they are larger than 10 dwellings are included within the monitor. After year 3 an allowance of 100 dwellings is included. This reflects past trends.

### ***Calculation of Cherwell's five year housing land supply***

41. Using the standard method local housing need figure as the requirement and the projected supply for the period 2022-27, the five-year housing land supply calculation for the district is set out below.

42. The five-year housing land supply position in the district excluding the Partial Review area is **5.4 years**.

Step	Description	Five Year Period 2022-27
a	Requirement (2022 - 2031) (Standard Method)	6678
b	Annual Requirement (a / 5)	742
c	5 Year Requirement (b x years)	3710
d	5 Year Requirement plus 5% buffer (c + 5%)	3895.5
e	Revised Annual Requirement over next 5 years (d / 5)	779.1
f	Deliverable Supply over next 5 Years	4244
g	Total years supply over next 5 years (f/ e)	<b>5.4</b>
h	'Surplus' (f – d)	349

### Partial Review five housing land supply – Oxford's unmet housing needs

43. There has been some progress on the allocated sites within the Partial Review area since the last monitoring update with several of the development briefs now adopted and applications submitted. As such, 80 homes in total is considered to be a reasonable assumption based on discussions with case officers and information received from the development industry and promoters. Nevertheless, this leaves a land supply in the partial review area as 0.2 years or a shortfall of some 2272 dwellings.

Step	Description	Five Year Period 2022-27
a	Partial Review requirement 2021-26	1700
b	Annual Requirement (a / 5)	340
c	Partial Review requirement 2026-31	2700
d	Annual Requirement (c / 5)	540
e	Requirement to date (b x years )	340
f	Completions 2021/22	0
g	Shortfall at 31/3/22 (f - e)	340
h	Base requirement over next 5 years ((b x 4) + (d x 1))	1900
i	Base requirement over next 5 years ((b x 4) + (d x 1)) plus shortfall	2240
j	Base requirement over next 5 years plus 5% buffer (h x 1.05)	2352
k	Revised Annual Requirement over next 5 years (d / 5)	470.4
l	Deliverable Supply over next 5 Years	80
m	Total years supply over next 5 years (f/ e)	<b>0.2</b>
n	'Shortfall' (f – d)	2272
