Dear Ms Whitehead,

Please accept this firm objection against the development proposal from Great Lakes UK Ltd which is not in accordance with the local development plan, and there are no material considerations that would warrant planning permission being granted.

The existing road infrastructure (and that of surrounding villages) can not cope with the extra 1000+ daily increase in traffic volume, plus the construction traffic. Chesterton is already used as a 'rat-run', and experiences major traffic congestion as it is used as an escape route during the many traffic issues on the M40 and A34.

These are unacceptable routing plans via already stressed routes through Middleton Stoney, Weston on the Green and Wendlebury. This proposal would also direct traffic off of the A34 through Little Chesterton, which already encounters significant traffic problems.

This proposal adds to numerous other significant proposals that have been approved in Bicester recently (Kingsmere, Bicester Gateway, Bicester Heritage), so the road networks can not cope with this additional traffic, and I insist that this proposal is for a completely inappropriate location.

Your sincerely,
