Comments	<input type="text" value="The current infrastructure of the village is insufficient to support the number of properties proposed which would change the whole nature of this quiet picturesque village. Sewage is already a current concern and this should be addressed first. There is inadequate schooling facilities available for increased numbers for primary and secondary schools. Healthcare facility would also be overstretched. Traffic and parking in the village will become an increased danger, especially as most households travel to work and for shopping. Smaller affordable dwellings are required in the village - one and two bedroomed houses and flats, to enable local people or people with family ties in the village to remain here."/>
