Comments	<input type="text" value="I would like to object to the revised proposal as I still do not believe it t takes into account:
- the significant strain that an increase in cars would have on village infrastructure, traffic and pollution.
- water infrastructure - the current infrastructure is still grossly inadequate given the number of leaks the village has experience over the last 12 months.
- electricity infrastructure - the village has continued to experience power cuts over the past 12 months which suggested the infrastructure would struggle to cope with additional stresses.
- sewage infrastructure - again under continued strain given the village's current size."/>
