Dear Planning Officers,

**Planning Application 24/00539/F
Proposals for the New Oxford United Stadium**

It saddens me, as an Oxford United supporter and very regular attendee of their home matches and occasional attendee of their away matches to ask you to refuse permission for this application.

I do this for many reasons in spite of the location being much closer for me than their current ground.

Location

“The Triangle” is far too compact to properly cater for an attendance of up to 16,000 people.

It is surrounded too tightly by major roads, which would be seriously affected by increased congestion, in spite of the clubs seriously flawed plans to keep most “football” cars away from the proposed ground. Access into and out of Kidlington could become paralysed for several hours on match days and evenings.
