

will be a football stadium and a lot of traffic, with absolutely nothing else to benefit residents who are not interested in football.

Perhaps the greatest objection to these plans is that there is absolutely no necessity for this development to take place on this site, thereby destroying one of the few remaining sections of the Oxford green belt, when there is a perfectly adequate facility available to OUFC in Greater Leys. The irreversible damage the proposed development would inflict upon air quality, residents' quality of life, and biodiversity in this area of Oxfordshire is as unjustifiable as it is unnecessary.
