To whom it may concern POST ROOM

I like many other object to Oxford United's 180-bed hotel being built on the last piece of Green Belt between Kidlington and Oxford Triangle.

Traffic jams & gridlock → hence  
Regular road closures & diversions

Not able to get through  
Ambulances, fire services, Bus to Hospital  
Taxis, cars taking patients for appointments to hospital & else where

- Wide spread parking issues, will be parked throughout Kidlington, yellow lines & Residents parking which they have to pay for is NOT the answer
- So Residents parking schemes is a NO NO
- Air & noise = pollution causing ill health
- Safety issues (people crossing road & a number of other things too)
- Loss of yet more Green Belt
- Closure of Kidlington Gap
- Destruction of wild life habitat
- Will be extra cars, which people will have when New Houses are built around this area
- Could be trouble in our local Pubs due to ~~a few drunk fans~~
- To close the Road before & after matches is not the answer
- No safety put in place for fans to access the stadium

Plus the fact that Oxford United misled the public for roughly the last 2 years saying that they had no where to go & being forced to leave Kassam by 2026.  
 Firokha Ltd has stated it is prepared to negotiate a New Lease (subject to terms) when the current one finishes in 2026

Yours Sincerely
