Comments Look after the future by allowing this new sustainable stadium at the Triangle. Having the first electric stadium would be something to be proud of. Lets see everyone pull together and make this work. I work in a school where the Year 7 students learn about the relocation of industry. They have been taught how unsafe the Manor Ground was and the need to relocate to the Kassam Stadium. They have been shown how difficult it was in locating a ground and the long delay in eventually getting it built. There have been some excellent questions like, why are floodlights no longer on pylons and why was the Kassam Stadium built with only 3 sides. Going back a few years ago the students actually had a visit to the education centre at the Kassam to learn more about the club and to have a tour. Imagine the next stage of this incredible journey where there would be so much more to learn. Oxford United are always willing to do work within the community and I know that they will work with the residents of Kidlington. Please, please lets get this done, time is running out and this new facility will benefit so many people. Stratfield Brake will also be restored and maintained by OUFC and will save the council a lot of money.
