This new stadium development will be a great benefit for Kidlington and Oxfordshire in general. This design has been well thought through and will bring many benefits for the local community both for local residents and local businesses. The coordination with public transport connections is a great way to encourage visitors to be environmentally sensible when travelling to and from the stadium. I also understand many new trees are to be planted to further improve the environment impact. Although I no longer live locally, I visit regularly and look forward to seeing this development progressing.
