As many OUFC supporters have already mentioned, having a sustainable home for all OUFC teams is key to the City and wider community.

Oxford has a proud history when it comes to football and from what i can see, a state of the art, sustainable, community stadium is essential for the future of the club. With change comes the unknown and i fully appreciate any resistance to anything this scale being built in any community.

Hopefully the club are doing a good job in allying any fears with regards to impact and disturbance in the Triangle - and demonstrating the many benefits a new stadium would bring to those immediately impacted and those who would come into the area and experience the positives that a stadium of this stature would naturally bring.

The future of the club really does depend on this new stadium.

Many thanks for processing this application and i hope the decision is a positive one for all concerned.
