The need for a new stadium does not outweigh the negative impact this will have on the local area.

Let alone the environmental issues with building an unnecessary new stadium when there's a perfectly good one in use already, this heavily affects local residents and will cause weekly issues with traffic, parking, obstruction.

There is no way most fans will catch trains and public transport to the stadium. They drive and park around local residential areas causing parking issues - this is from first hand experience living in a different city. Fans behaviour won't easily be changed and suggesting otherwise is a false promise. It causes huge disruption on game day and this only serves the benefits of the club shareholders, not the fans.
