I Am worried about the safety of walkers and cyclists in particular on the Oxford road both in relation to this development and surrounding housing sites. Although paths on either side of the bridges over the A34 and railway should be brought up to a safer standard when all sites are completed at present they are narrow and without regular maintenance encroached by vegetation. The bridges though are a pinch point at the most dangerous point with a blind summit. A bridge over the road for this site is needed but a separate pedestrian, cycle path

over the A34 and railway is needed too. This is a important route for all users in both Oxford

and Kidlington closures at match time will be very disruptive to ordinary local life.
