Comments	<input type="text" value="The current stadium is well-situated for access, parking, etc. so a move seems unnecessary. The other facilities listed in the application are also readily available throughout Oxford so more of such facilities are also unnecessary. The siting of the proposed new stadium, on the other hand, is likely to lead to traffic and parking chaos at one of the busiest road junctions in Oxfordshire; new developments in the area are already taking traffic and parking beyond physical capacity.

Please would you also consider how much this area is already being built on, leading to increasing air, light and noise pollution and significant loss of green space and wildlife.

With thanks,
Michele Topham"/>
