I wholeheartedly agree with the plans for the construction of Oxford United's new Football Stadium on the Triangle plot of land. This is a project that we should wholeheartedly support. It will benefit not only our community but also the surrounding areas, particularly the younger generation, who will benefit from it for years to come.

The stadium will generate employment opportunities for local businesses and offer excellent transport links, including Park and Ride, train station, and local buses from Oxford, making it easy for football supporters to attend matches. If constructed, it will be the first "all-electric" stadium in the United Kingdom, setting an example for other stadiums to follow. Developers also plan to create a green space around the stadium, enhancing the local natural environment and providing more public spaces for people to enjoy year-round. This stadium will be a beacon of hope for our community, inspiring us to create something that will have a positive impact for generations to come. Let us embrace this opportunity to create a brighter future for our community, and let us remember that it is our children and

grandchildren who will benefit most from this project. We need this stadium, and we need to

support it with all our hearts.
