Firstly I will state I am a very loyal Oxford United supporter. The club has been supported by my father and grandfather. My 9 year old son has a season ticket to watch Oxford.

As we live in Headington the new stadium would be accessible by bike which fir us is a huge plus. There is also the huge benefit of the train station in walking distance from the stadium.

The local economy around Kidlington and Oxford would benefit greatly not only on match days but 365 days of the year.

Employment opportunities would be fantastic for the area.

The current stadium is environmentally unsustainable stadium that is car-dependent to an all electric eco-friendly built and run stadium at the heart of public transport hub

My son loves football, after every Oxford United match he and his friends go to a local park to recreate what they have seen and enjoyed. What would happen if my son and his friends don't have a team to watch in Oxford? My guess is they wouldn't go to play football and their physical health would suffer.

On reading reports my understanding is that the application is fully consistent with government and local policy on sustainable transport, build and operation.

In my opinion this is a great opportunity to build a world class stadium that would give us a community hub to inspire young people, lead the way in health promotion, provide local jobs and investment, and to provide world class facilities that reflect our county's world renowned image and reputation for innovation.
