This is a crossroads in the history of OUFC.

The Club has nearly ceased to exist on to many occasions over the years.

This stadium application is paramount to the continuation of the Club.

It's not only paramount to the Club's existence but also to the thousands of fans that have followed the Club for many years.

This is a massive part of our lives following the Club that we love.

The stadium is to be sustainable and probably the most eco friendly one in the country.

It's a facility for all of Oxfordshire particularly the residents within the Cherwell area.

It will bring exciting new facilities to the local community as well as creating many new jobs within the community.

It will boost the local economy which can only be good for the area.

Travel to and from the stadium is being encouraged to use public transport, this will reduce the majority of extra traffic coming in to the area.

I think the Club have been very complying in finding solutions to the vast amount of criteria laid out by OCC.

I desperately hope that this planning application is approved for the long term existence of OUFC and for all of the Club's thousands of supporters.
