Comments	The new stadium will act as a community benefit and is at the moment the only viable alternative 9as offered by the Council) to to the extinction of a club with 130 years of history. We (the Oxfordshire residents) are being offered a state of the art, world leading facility on the smallest footprint possible. Transport links are excellent. Obviously matchday traffic would be a concern, but by no means insurmountable with train and bus links already in place and expandable. As for the argument about adding to rush hour traffic, since when have football matches
