Comments	Dear team,
	Please find hereby my strong objection to the proposed new stadium.
	Oxford and Cherwell/Oxfordshire are advocating for responsible construction and preserving the natural heritage of the region.
	The proposed plans go against reason. Oxford does not need another stadium when the current stadium is perfectly appropriate, with ample space for access and potential improvements if required.
	In addition the wider area proposed for the new stadium is already under considerable development for the new North Oxford area, with the impact on traffic, local area life etc ye to be understood in practice.
	The construction of a new stadium (and destruction of the old?) would only further contribute to pointless carbon emissions and use if precious raw materials better used for housing development.
	Similarly there is benefit to the area from this stadium which will only add to traffic congestion and road closures (already difficult in North Oxford).
	The location chosen is also a very important nature area for residents, and the impact on

The location chosen is also a very important nature area for residents, and the impact on loss of nature and biodiversity cannot be addressed by the greenwashing proposals of the new development.

Thank you for the opportunity to voice my concerns.

Regards
