Comments	I will to object strongly to this application on several grounds. First, the proposed site represents one of the last remaining areas of green belt between Kidlington and Oxford. As such, the application must demonstrate very special circumstances which demonstrably it does not. In particular the claim that the club must vacate the Kassam Stadium is untrue. Public statements made by the stadium owner make this clear. Additionally, the claim that the development will bring environmental benefits is farcical. Needlessly demolishing one stadium and constructing another one on green belt can only have negative environmental outcomes. Second, and linked to this, the location of the proposed development is at the confluence of key routes between Kidlington and Oxford. Matchday traffic, and the accompanying road closures, will increase pollution around the side and cause congestion in Kidlington and north Oxford. Third, the impact on the lives of Kidlington residents on matchdays will certainly be negative, with parking issues arising from the arrival of fans in the village (together with the road closures) likely to make moving around the area very difficult. All of this is unnecessary and avoidable if the Football Club, who we all wish to see succeed, stay in their current stadium and make use of the Cowley branch line when it arrives.
