Comments	I fully support the proposed plan for a number of reasons: - environmental - although there will be impacts during the build of the new stadium the long term environmental impact will be positive - not least because there will be more publi transport options available than the present site, reducing local pollution - community health and cohesion - the stadium will encourage a focus on health and wellbeing, and will serve as an example for local schools and the community. Having the ground in this site will also bring the community together in support of our local team - opportunity - having the club at this site will deliver economic prosperity to the local area and will encourage more business and jobs for local people
