| Comments | <input type="text" value="I object to the proposed development in the strongest possible terms. The scale of the development as currently proposed seems wildly disproportionate to both the area and the ability of surrounding infrastructure to support it. The plans appear to include details that would permanently disrupt public transport links that are already fragile at peak times and, further, plans to mitigate disruption when the stadium is in operation are nebulous at best. Given the extant pressures on the infrastructure in and around the village, the destruction of such a large area of green space could only ever be reasonably justified by its use for projects that serve to alleviate these issues and serve the many of the community or otherwise improve the area (for example, sustainable and affordable housing, support of local 'green businesses' etc.) rather than projects that serve the interests of only a small section of the local population, such as the current proposal."/> |
