Support neighbour

I support the application. The new stadium will bring much needed energy back into Oxford and Oxfordshire, and return the club to the community. It will be so much easier to access by public transport and the existing significant transport infrastructure serving this area. Any consent given should clearly address all reasonable environmental concerns, with renewable energy solutions implemented at source. In my opinion the limited amount of periodic disruption caused by any sporting events held at the new facility is substantially outweighed by the social, economic and community benefits. Thank you.
