Comments	Oxford United are the only full time professional team in Oxfordshire, but they are not just a football. They have been for many years involved in all sorts of community based activities, they are a community asset which must not be allowed to 'fade' away. The new ground proposal will ensure their existence for many years to come. They must find a new home asap and the site at The Triangle, appears to the only viable location, although personally Stratford Break would have given more land opportunities. The owners of the club have given assurances that the proposed new ground will be the first all electric ground in the country and they plan to be carbon neutral asap. The ground will be a great asset to the local community and the concerns of some people against the proposed ground, should know that games at the ground, would only be a small use of the ground and therefore any issues regarding traffic, public order concerns etc, would be very infrequent. The proposed site is of course close to the A34 and M40, the station is also very close, as is the park and ride car park. We must not let the football club dissappear.
