1. Green Belt: Failure to demonstrate the 'very special circumstances' needed to build on the Green Belt - a stadium is already in existence so why green belt land needs to be used to build another is not sufficiently demonstrated.
2. Traffic congestion and road closures - North Oxford traffic is yet to suffer from additional traffic from Oxford North development which will undoubtedly congest traffic significantly. Stadium location will further impact this and will worsen traffic congestion to an unworkable degree for local residents.
3. Many people, including children, cycle locally and need to cross main traffic routes on their commute - to impact their safety with increased pollution and vehicle traffic is unjust, given a stadium is already in existence.
4. Nature conservation/impact on trees - preserving and enhancing existing trees and wildlife areas is of more pressing importance and destroying these spaces for a surplus stadium is destructive and unnecessary.
