I was born in Oxford but my career took me away from the area. I live some 160 miles away. Iam a season ticket holder at Oxford United and have been for a number of years. In the last two season my personal circumstances have meant I've been going to every home game and a good proportion of away games. I love my club and what they do in the wider community of Oxford. hence why I've been a season ticket holder even though I live some distance away.

Going to home games is not easy. Public transport excess is non existent. (train station in Oxford to stadium is totally in practical.) I therefore have no option but to drive which is very good for the environment. Parking is poor and exiting the area is troublesome and tiresome. This and the poor cavities in and around the stadium make the day to a match more a chore than a great experience. It shouldn't be that way. I decide not to stay over or do more because if this. I just return home. This proposal changes everything. Public transport option for local and distance supporters like myself. No need to drive. World class facilities promising to make any visit to the stadium a great experience.

The proposal represent a huge opportunity to secure a world class facility for the local and wider community as well as secure home for Oxfordshire professional football team. The prospect of jobs being generated during construction and beyond along with the economy boost that this will bring for the local and wider community should not be passed up. As long as the aporopiate protection for the club the local residents and environment are in place this can only be a hugely positive plan that Oxfordshire should be proud off.
