Objection

neighbour

This application is based on a false proposition that Oxford United have to leave their current ground, something the owner has refuted in current months. This proposal will destroy a thriving eclogically sound business as well as closing the Kidlington Gap for good. It will cause an increase in rail and road users both of which are over-stretched beyond capacity at present. Oxford Parkway is a small station ill-suited to handling the numbers who will attend on match days. Trains are already over-crowded and it can be hard to get a seat which means they are essentially inaccessible for elderly users such as myself. The traffic between Kidlington and Oxford is being constrained by the County Council's green transport measures which means those of us who cannot walk or cycle are effectively trapped in our houses for large parts of the day. The new stadium will just make this all much worse besides the noise and light pollution and litter which will inevitably follow in its wake.
