RECEIVED

Ms. Clare, Whitehead,
I am objecting to the above Development

Inappropriate Site At the Side of a Major Motor-way the M.40
also Between two of it's Busiest Junction's & a canal.

All Roads to this site are in a terrible ^{state} no matter which way
you approach them full of ruts, potholes and broken surfaces.

Carbon Foot Print
The amount of Energy needed to run such a resort will put a
huge strain on the current electricity supply, last year at this time of
month Chesterton suffered a whole day without electricity we were
lucky at least we had a camping stove. I can't even imagine how much
power is needed to keep ~~the~~ those outside chutes warm.

How can the resort keep our villages traffic free when
all electronic devices guide you through the shortest route and one of
the shortest routes from the A41 coming from Jct 9 is left at little
Chesterton, then on through little chesterton, over the cross roads
then down the hale to that really sharp bend at the top road then left
up the road about a mile, left into the resort.

Also they direct you coming the other way at the new road
leading to Howshel, this takes a left through the top of the village
round that sharp bend then up the road to the resort.

the devices will overturn any road signs that are put up.

Traffic will create a dangerous place to live for our children
elderly and wildlife.
