

Steve,

As requested

Regards
Alistair

Jack,

Further to our conversation please find attached the Micro Drainage calculations showing the attenuation pond for storm events up to and including the 100 year + climate change event together with the peak discharge assessment

I trust this information can then remove your objection

Many thanks
Alistair

Dear Alistair,

Unfortunately, we will not be able to have a meeting before 03 October. I suggest you call my flood risk colleague Stephen Dunthorne on 01491 828449 to request any clarification you have to the points raised in our letter. However, please note that even if you submitted information today we would be unable to review it before 03 October due to lack of resource. If you wish to organise a meeting for after the 03rd then please don't hesitate to contact me.

Thanks,

Jack Moeran
Planning Advisor

Jack,

I'm mostly free for the next few weeks so I can work around your dates. The site is due to go to planning committee on the 3rd October so sooner the better for a meeting

Regards
Alistair

Yes Alistair,

That's fine although I'm very busy over next couple of weeks.

If you could send through a list of possible dates I can look at my calendar to get something in.

Thanks,

Jack Moeran
Planning Advisor

Jack,

I've just received your response regarding the above. Can I request a meeting to go through this to speed up matters.

Many thanks

Regards

Alistair McShane
