## Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client.

In the attached datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

## Copyright Notice

© Landmark Information Group Limited 2012. The Copyright on the information and data and its format as contained in this Envirocheck® Report ("Report") is the property of Landmark Information Group Limited ("Landmark") and several other Data Providers, including (but not limited to) Ordnance Survey, British Geological Survey, the Environment Agency and Natural England, and must not be reproduced in whole or in part by photocopying or any other method. The Report is supplied under Landmark's Terms and Conditions accepted by the Customer. A copy of Landmark's Terms and Conditions can be found with the Index Map for this report. Additional copies of the Report may be obtained from Landmark, subject to Landmark's charges in force from time to time. The Copyright, design rights and any other intellectual rights shall remain the exclusive property of Landmark and /or other Data providers, whose Copyright material has been included in this Report.

## Natural England Copyright Notice

Site of Special Scientific Interest, National Nature Reserve, Ramsar, Special Protection Area, Special Conservation Area, Marine Nature Reserve data (derived from Ordnance Survey 1:10000 raster) is provided by, and used with the permission of, Natural England who retain the copyright and Intellectual Property Rights for the data.

## Ove Arup Copyright Notice

The Data provided in this report was obtained on Licence from Ove Arup & Partners Limited (for further information, contact [mining.review@arup.com](mailto:mining.review@arup.com)). No reproduction or further use of such Data is to be made without the prior written consent of Ove Arup & Partners Limited. The information and data supplied in the product are derived from publicly available records and other third party sources and neither Ove Arup & Partners nor Landmark warrant the accuracy or completeness of such information or data.

## Peter Brett Associates Copyright Notice

The cavity data presented has been extracted from the PBA enhanced version of the original DEFRA national cavity databases. PBA/DEFRA retain the copyright & intellectual property rights in the data. Whilst all reasonable efforts are made to check that the information contained in the cavity databases is accurate we do not warrant that the data is complete or error free. The information is based upon our own researches and those collated from a number of external sources and is continually being augmented and updated by PBA. In no event shall PBA/DEFRA or Landmark be liable for any loss or damage including, without limitation, indirect or consequential loss or damage arising from the use of this data.

## Radon Potential dataset Copyright Notice

Information supplied from a joint dataset compiled by The British Geological Survey and the Health Protection Agency.

## Northamptonshire

Published 1883 - 1884

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, which were adopted for England, Wales and Scotland in the 1840's. In 1854 the Ordnance Survey began to publish maps of the United Kingdom at a scale of 1:10,560. These maps were used to update the 1:10,560 maps. The published data on these maps are often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties giving rise to significant inaccuracies in cutting areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear 'unfinished' - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

## Historical Aerial Photography Published 1948

Source map scale - 1:10,560

The Historical Aerial Photos were produced by the Ordnance Survey at a scale of 1:1,250 and 1:10,560 from Air Force photography. They were produced by an aerial camera in 1944 and 1945. The original preparation of conventional maps, due to post-war security precautions, meant that every photograph was rechecked for potentially unsafe information with security sites replaced by fields or clouds. The original editions were withdrawn and only later made available after a period of fifty years although, due to the accuracy of the editing, without viewing both revisions it is not easy to spot the edits. Where available Landmark have included both revisions.

## Ordnance Survey Plan Published 1977 - 1978

### Source map scale - 1:10,000

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, Warley and Scotland in the 1940's. In 1854 the 1:2500 maps were published. The 1:10,000 maps were published in 1977 and 1978. The 1:10,000 maps were often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties giving rise to significant inaccuracies in cutting areas. In the late 1940's a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear 'unfinished' - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

## Ordnance Survey Plan Published 1980 - 1983

### Source map scale - 1:10,000

The historical maps shown were reproduced from maps predominantly held at 1:2,500 adopted for England, Wales and Scotland in the 1940's. In 1954 the 1:2,500 maps were updated to 1:10,000 maps. The published data on these maps are often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties giving rise to significant inaccuracies in cutting areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear 'unfinished' - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

## Ordnance Survey Plan Published 1992 - 1995

### Source map scale - 1:10,000

The historical maps shown were reproduced from maps predominantly held at 1:2,500 adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 maps were updated to 1:10,000. The published data on these maps are used to update the 1:10,000 maps. The published data on these maps are often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,000 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

# 10k Raster Mapping Published 2006

Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 scale raster mapping. These maps are produced from data which is colour coded at 1:10,000 scale. The maps are published at 1:20,000 scale and are highly detailed showing buildings, roads and field boundaries as well as all roads, tracks and paths. Road names are also included together with the relevant road number and classification. Boundary information depicted includes county, unitary authority, district, civil parish and constituency.

# 10k Raster Mapping Published 2012

Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 scale maps. These maps are produced from aerial photography which is colour corrected to match the original maps published in 1970. The data is highly detailed showing buildings, trees, fences and field boundaries as well as all roads, tracks and paths. Road names are also included together with the relevant road number and classification. Boundary information depicted includes county, unitary authority, district, civil parish and constituency.

## Oxfordshire

### Published 1882

### Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, which were adopted for England, Wales and Scotland in the 1840s. The 1882 map was published by Ordnance Survey in 1882. It covered the whole of what was considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

## Oxfordshire

### Published 1900

### Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, which were adopted for England, Wales and Scotland in the 1940s. In 1854 the Ordnance Survey published a series of maps of Oxfordshire, which covered the whole of what was considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

## Oxfordshire

Published 1922 - 1923

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey office in Southampton in the 1940s. The maps were digitised at a scale of 1:2,500 and are considered to be the most accurate maps available for the area. The published date given below is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

**Additional SIMs  
Published 1990**

**Source map scale - 1:2,500**

The SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') are their most accurate mapping which were produced and published in 1990. The maps contain details information on buildings, roads and land-use. These maps were produced at both 1:2,500 and 1:1,250 scales.

# Large-Scale National Grid Data

Published 1993

Source map scale - 1:2,500

Large Scale National Grid Data: superseded SIM cards (Ordnance Survey's Simulation on Microfilm) in 1992, and continued to be produced until 1999. The maps are produced by digitising original maps and provide detailed information on buildings, houses and sites, but tend to miss topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

### Published 1900

#### Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey office in Southampton in the 1940s. The 1854 edition of the 1:2,500 scale maps was first published in 1854. It covered the whole of what was considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

## Oxfordshire

Published 1922 - 1923

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, which were adopted for England, Wales and Scotland in the 1840s. The 1854 edition of the 1:2,500 scale maps were published by Ordnance Survey in 1854. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

# Ordnance Survey Plan

Published 1966

Source map scale - 1:1,250

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, which were adopted for England, Wales and Scotland in the 1940s. The maps were first published at a scale of 1:2,500 in 1854 and were subsequently revised and updated by 1866. It is considered that the published date given below is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

## Additional SIMs Published 1966

### Source map scale - 1:1,250

The SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') are further microfilm editions of the mapping which were produced and published between 1966 and 1977 based on the original maps published between 1947 to 1964 and contain details information on buildings, roads and land-use. These maps were produced at both 1:2,500 and 1:1,250 scales.

## Ordnance Survey Plan Published 1973

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey offices in England, Wales and Scotland in the 1940s. The 1:2,500 scale maps were first published in 1854 and were revised and updated by 1938. It is important to note that the maps covered the whole of what was considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

## Large-Scale National Grid Data

Published 1993

Source map scale - 1:2,500

Large Scale National Grid Data: superseded SIM cards (Ordnance Survey's Survey Information on Microfilm) in 1992, and continued to be produced until 1999. These maps are produced by digitising original maps and provide detailed information on houses and roads, but tend to miss topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

## Large-Scale National Grid Data Published 1994

Source map scale - 1:1,250

Large Scale National Grid Data: superseded SIM cards (Ordnance Survey's Simulation on Microfilm) in 1992, and continued to be produced until 1999. The maps are derived from aerial photography and provide detailed information on buildings and roads, but tend to miss topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

## Published 1882

### Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, which were adopted for England, Wales and Scotland in the 1840s. The 1854 edition of the 1:2,500 scale maps were published by Ordnance Survey and covered the whole of what was then considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

## Supply of Unpublished Survey Information

### Published 1976

### Source map scale - 1:1,250

SUSI maps (Supply of Unpublished Survey Information) were produced between 1972 and 1977, mainly for internal use at Ordnance Survey. These were not a 'main progress plan' and therefore do not appear in the usual series of maps published by Ordnance Survey. These maps represent a single moment in time. They were produced at both 1:2,500 and 1:1,250 scales.

## Additional SIMs

Published 1981 - 1989

Source map scale - 1:1,250

The SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') are line drawings of aerial photography which were produced and published in 1981. They are the same as the original aerial photographs taken between 1947 to 1984 and contain details of buildings, roads and land-use. These maps were produced at both 1:2,500 and 1:1,250 scales.

## Large-Scale National Grid Data

Published 1996

Source map scale - 1:1,250

Large Scale National Grid Data: superseded SIM cards (Ordnance Survey's information on microfilm) in 1992, and continued to be produced until 1999. These maps are derived from original mapping and provide detailed information on houses and lots, but tend to miss topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

# Large-Scale National Grid Data

Published 1993

Source map scale - 1:2,500

Large Scale National Grid Data: superseded SIM cards (Ordnance Survey's Survey Information on Microfilm) in 1992, and continued to be produced until 1999. These maps are the result of digital mapping and provide detailed information on houses and roads, but tend to miss topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

## Ordnance Survey Plan Published 1967 - 1973

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at 1:2,500 scale for England, Wales and Scotland in the 1940s, 1854-1864 and 1867-1896. The maps were scanned and georeferenced to the current datum. The published date given below is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

## Supply of Unpublished Survey Information

Published 1976

Source map scale - 1:1,250

SUSI maps (Supply of Unpublished Survey Information) were produced between 1972 and 1977, mainly for internal use at Ordnance Survey. These were more a work-in-progress planning tool, rather than a published product. These maps are unpublished and the date represent a single moment in time. They were produced at both 1:2,500 and 1:1,250 scales.

## Ordnance Survey Plan Published 1984

### Source map scale - 1:1,250

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, which were adopted for England, Wales and Scotland in the 1940s. The 1:1,250 scale maps were first published in 1854 and covered the whole of what was then considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

### Additional SIMs

Published 1990

Source map scale - 1:2,500

The SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') are the original source of the data used in the mapping which were produced and published by the Ordnance Survey in 1990. The maps were produced at scales of 1:2,500 to 1:10,000 and contain details of information on buildings, roads and land-use. These maps were produced at both 1:2,500 and 1:1,250 scales.

**Additional SIMs  
Published 1990**

**Source map scale - 1:1,250**

The SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') are line-drawing maps which were produced and published in 1990. They are based on the 1984 Ordnance Survey map data for the area from 1947 to 1984, and contain details of information on buildings, roads and land-use. These maps were produced at both 1:2,500 and 1:1,250 scales.

## Large-Scale National Grid Data

Published 1993

Source map scale - 1:2,500

Large Scale National Grid Data: superseded SIM cards (Ordnance Survey's information on MicroSIM) in 1992, and continued to be produced until 1999. The maps are produced by digitising original maps and provide detailed information on houses and roads, but tend to miss topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

## Large-Scale National Grid Data Published 1993 - 1994

### Source map scale - 1:1,250

Large Scale National Grid Data: superseded SIM cards (Ordnance Survey's Simulation on Microfilm) in 1992, and continued to be produced until 1999. The maps are the original digital data at the source scale, but have been reprojected to the current map projection. The maps provide detailed information on houses and sites, but tend to miss topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

## Oxfordshire

### Published 1882

### Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, London and Scotland in the 1940s. It was at 1:2,500 scale. The maps were scanned and published by 1882. It covered the whole of what was considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

## Oxfordshire

### Published 1900

### Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, which were adopted for England, Wales and Scotland in the 1940s. The first OS map of Oxfordshire was published in 1854 at a scale of 1:25,000. The maps were updated and reissued by 1896. It covered the whole of what was considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

## Northamptonshire

Published 1923

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey offices in England, Wales and Scotland in the 1940s. 1854-1864 maps were reproduced from the original maps held by the Ordnance Survey. The published date given below is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

## Ordnance Survey Plan Published 1966

Source map scale - 1:1,250

The historical maps shown were reproduced from maps predominantly held at 1:2,500 scale for England, Wales and Scotland in the 1940s. In 1966, the Ordnance Survey made a major contribution to the history of Great Britain by publishing the first 1:1,250 scale maps. The published date given below is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

### Additional SIMs

Published 1966 - 1989

Source map scale - 1:1,250

The SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') are line drawings or redlinings which were produced and published in 1947 to 1989. They contain information on buildings, roads and land-use. These maps were produced at both 1:2,500 and 1:1,250 scales.

## Ordnance Survey Plan Published 1967 - 1973

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at 1:2,500 scale for England, Wales and Scotland in the 1940s. In 1854 the Ordnance Survey introduced the first metric scale maps by 1866. It covered the whole of what was considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

## Supply of Unpublished Survey Information

Published 1976

Source map scale - 1:1,250

SUSI maps (Supply of Unpublished Survey Information) were produced between 1972 and 1977, mainly for internal use at Ordnance Survey. These were not a 'main progress plan' and therefore do not represent a single moment in time. They were produced at both 1:2,500 and 1:1,250 scales.

### Additional SIMs

Published 1981 - 1987

Source map scale - 1:1,250

The SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') are line drawings or rediffusions which were produced and published from 1947 to 1987. They contain details of information on buildings, roads and land-use. These maps were produced at both 1:2,500 and 1:1,250 scales.

## Ordnance Survey Plan Published 1983

Source map scale - 1:1,250

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey, Southampton in the 1940s. The maps were adopted for England, Wales and Scotland in the 1940s, 1954 and 1960 respectively. The maps were published by Ordnance Survey in 1983. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

# Large-Scale National Grid Data Published 1994

Source map scale - 1:1,250

Large Scale National Grid Data: superseded SIM cards (Ordnance Survey's Simulation on Microfilm) in 1992, and continued to be produced until 1999. They provide the original mapping data and provide detailed information on houses and sites, but lack topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

## Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client.

In the attached datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

## Northamptonshire

Published 1883 - 1884

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at 1:2500 adopted for England, Wales and Scotland in the 1840's. In 1854 the Ordnance Survey published a series of maps which were used to update the 1:10,560 maps. The published data on these maps are often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear 'unfinished' - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

## Historical Aerial Photography Published 1948

Source map scale - 1:10,560

The Historical Aerial Photos were produced by the Ordnance Survey at a scale of 1:1,250 and 1:10,560 from Air Force photography. They were prepared by the Ordnance Survey in 1944 and 1951 as a result of the preparation of conventional maps. Due to post-war security concerns, new security measures in the 1950's meant that every photograph was checked for potentially unsafe information with security sites replaced by fields or clouds. The original editions were withdrawn and only later made available after a period of fifty years although, due to the accuracy of the editing, without viewing both revisions it is not easy to spot the edits. Where available Landmark have included both revisions.

## Ordnance Survey Plan Published 1977 - 1978

### Source map scale - 1:10,000

The historical maps shown were reproduced from maps predominantly held at 1:2500 adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2500 maps were updated to 1:10,000. The published data on these maps are often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent inaccuracies in cutting county or group of counties, giving rise to significant inaccuracies in cutting areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,000 mapping from a number of sources. The maps appear 'unfinished' - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

## Ordnance Survey Plan Published 1993 - 1994

### Source map scale - 1:10,000

The historical maps shown were reproduced from maps predominantly held at 1:2500 scale for England, Wales and Scotland in the 1940's. In 1954 a further 2,500 maps were published at 1:10,000 scale. These maps are used to update the 1:10,000 maps. The published data on these maps are often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,000 mapping from a number of sources. The maps appear 'unfinished' - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

# 10k Raster Mapping

Published 2006

Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 colour raster mapping. These maps are published from data which is highly detailed showing buildings, roads and field boundaries as well as all roads, tracks and paths. Road names are also included together with the relevant road number and classification. Boundary information depicted includes county, unitary authority, district, civil parish and constituency.

## Index Map

For ease of identification, your site and buffer have been split into Slices, Segments and Quadrants. These are illustrated on the Index Map opposite and explained further below.

### Slice

Each slice represents a 1:10,000 plot area (2.7km x 2.7km) for your site and buffer. A large site and buffer may be made up of several slices (represented by a red outline) that are referenced by letters of the alphabet, starting from the bottom left corner of the slice "grid". This grid does not relate to National Grid lines but is designed to give best fit over the site and buffer.

### Segment

A segment represents a 1:2,500 plot area. Segments that have plot files associated with them are shown in dark green, others in light blue. These are numbered from the bottom left hand corner within each slice.

### Quadrant

A quadrant is a quarter of a segment. These are labelled as NW, NE, SW, SE and are referenced in the datasheet to allow features to be quickly located on plots. Therefore a feature that has a quadrant reference of A7NW will be in Slice A, Segment 7 and the NW Quadrant.

A selection of organisations who provide data within this report:

Envirocheck reports are compiled from 136 different sources of data.
