General residential streets

Predominantly residential, moderate levels of activity, neighbourly interaction, provide access to properties, some through traffic.

Figure 5.4 Indicative layout - general residential street

5

Minor residential streets and lanes

Quieter residential streets, with limited through traffic, with a semi-private feel.

Shared surfaces

The use of a shared surface approach where vehicles, pedestrians and cyclists occupy the same space within the street can create attractive, active streets successfully accommodating children's play, car parking and movement functions together.

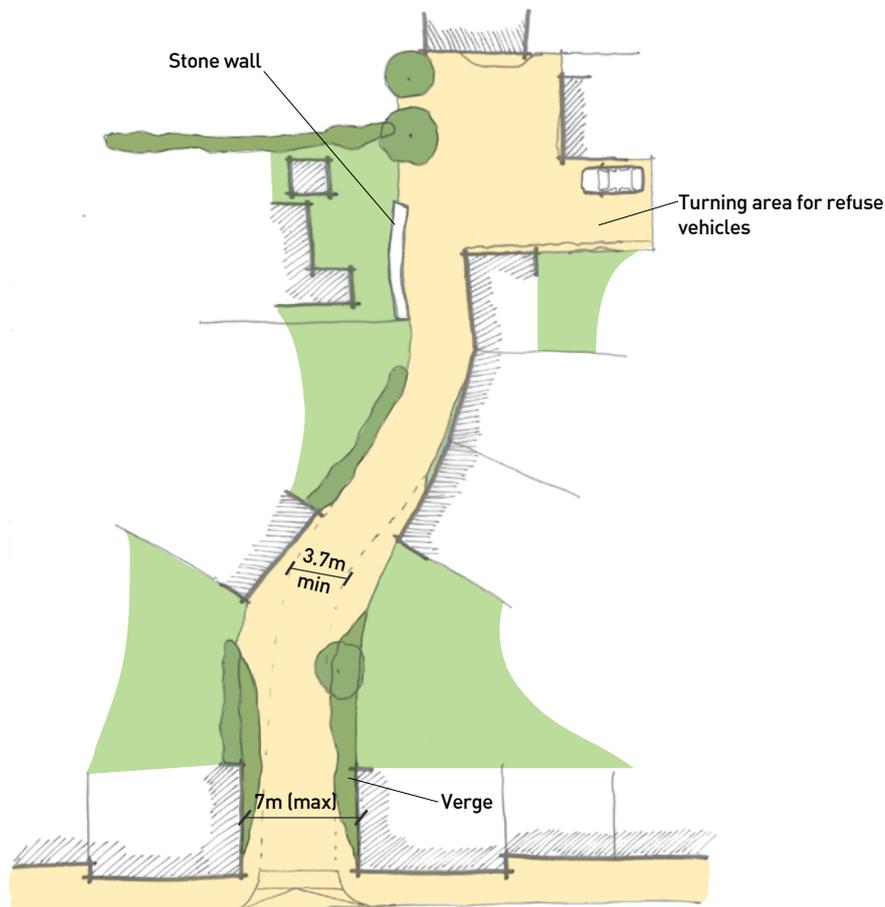

Shared surface treatments can also be used in public spaces such as squares or at junctions where the lack

of demarcation for traffic can assist with traffic calming and placemaking functions.

The use of shared surfaces should be judicious and take into account safety of users especially those with perceptual impediments. In many areas a 25mm kerb will be appropriate, except in very lightly trafficked environments such as the lane typology, in order to aid legibility for those with visual impairments.

To achieve a successful design detailed discussions will be necessary with both CDC and OCC and appropriate safety audits undertaken.

Figure 5.5 Indicative layout - informal Lane

Adoption

All streets performing a public function as part of the movement network should be designed for adoption by OCC. Un-adopted, private routes serving multiple properties should be limited, except where specifically agreed with the Council.

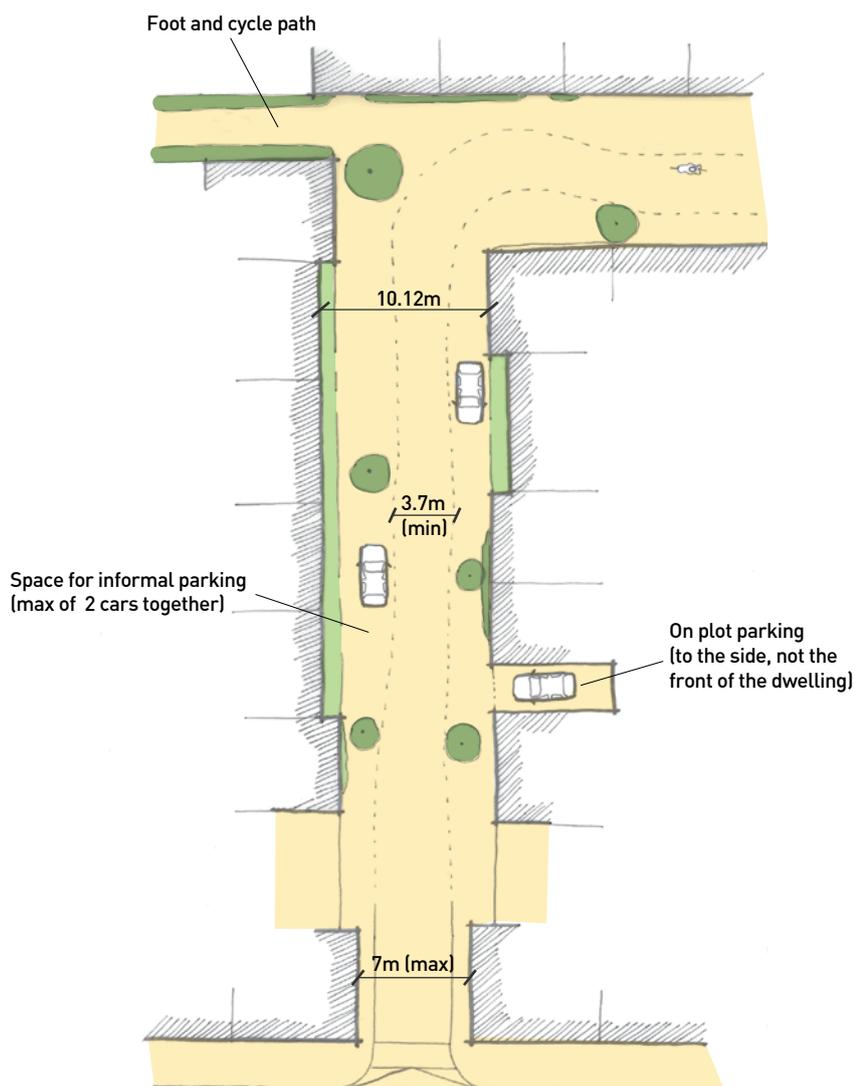

It is important to note that design of streets needs to be coordinated with both OCC and CDC, with street types established in liaison with both authorities.

5

Enclosed street incorporating on-street car parking, Hook Norton

Figure 5.6 Indicative layout - Shared surface street

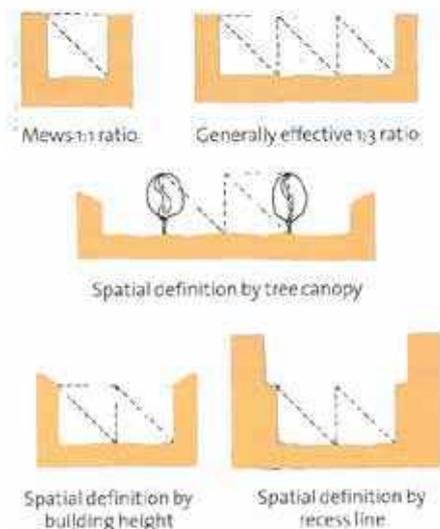

5.3 Street proportions

The overall composition of the street should create a comfortable 'human scale' and level of enclosure in keeping with the character of the District.

Buildings of an appropriate scale and form are critical in establishing well designed streets. Street cross-sections should provide a sense of enclosure through buildings, trees and planting. The Urban Design Compendium (section 5.1.3) recommends a height to width ratio for streets of between 1:1.5 and 1:3 where height is provided by buildings (generally measured to the eaves line) and width is the distance between building frontages across the street. These proportions create streets which are pleasing to the eye, feel comfortably enclosed and are not dominated by the carriageway.

Figure 5.7 Recommended height to width ratios (source: Urban Design Compendium, p88)

Street currently feels too wide in relation to the height of the buildings but enclosure is to be improved by the planting of street trees, Upper Heyford

This ratio range is typical of many of Cherwell's attractive historic streets, in contrast to more recent estate developments where the carriageway is wide and dominant. It follows, that where the street is wider, taller buildings are appropriate to maintain the ratio.

Although buildings are the primary means of providing enclosure, the canopy of street trees, front boundary walls and taller garden planting can also be effective particularly in maintaining the line of enclosure where there are small gaps between buildings.

The sense of enclosure breaks down where there are significant gaps in the built frontage. This is evident on streets which are comprised of multiple detached properties with parking to the side. Here the building frontage is not complete enough to properly frame the street, and the opportunity for boundary walls and trees is also limited by the need to give access to on-plot parking.

Where main streets lie on a bus route, the carriageway will need to be 6.5m wide. These streets would benefit from being framed by buildings of three storeys to balance the increased street width. Where not on a bus route, the width of the carriageway should be reduced. Parking can be formally arranged with bays broken up with street trees, build outs and informal crossing points for pedestrians.

On general residential streets, with predominantly two storey properties, the building to building widths should be reduced in comparison to main streets, to create an appropriate sense of enclosure. Increased ground floor ceiling heights can also improve the sense of scale / status of a building.

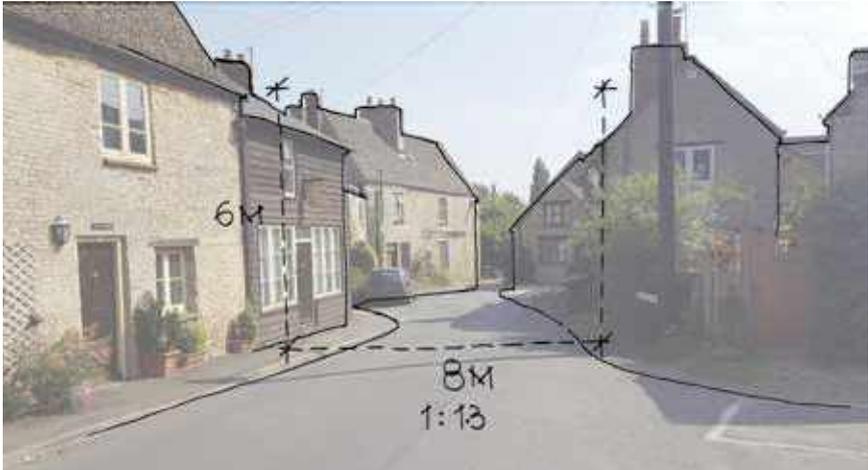

A well proportioned street, Seven Acres, Cambridge

5

Figure 5.8 Appropriate street proportions: examples from Cherwell

a) Whiteland Way, South West Bicester

b) Kings Head Lane, Islip

c) Queens Road, Banbury

5.4 Design for pedestrians and cyclists

Street design should make it as easy as possible to walk and cycle, providing safe, direct and attractive routes.

Routes for pedestrians and cyclists should be safe, direct, attractive and legible. The design criteria for accommodating pedestrians and cyclists on different types of street are detailed in the Oxfordshire County Council's Residential Road Design Guide, Second Edition, 2015, MfS chapter 6 and OCC's recently approved design guidance documents on walking and cycling.

Pedestrians

Pedestrian movement must be considered first and prioritised on all streets. Walkable neighbourhoods should be established by the masterplan creating a legible and permeable street network allowing for easy access on foot to local facilities and public transport stops (see chapter 4).

Pedestrian movement should be accommodated on footways on the street giving access to property fronts. In some instances short stretches of footpath may be appropriate to provide additional pedestrian links between streets.

These should be as short as possible with good inter-visibility between the ends, appropriately lit and be overlooked / open to view.

Footways in Cherwell tend to be fairly narrow. Although the MfS recommends pedestrian footways should generally have an unobstructed minimum width of 2m, it would be in-keeping with the character of Cherwell if they were narrower.

A minimum of 1.5m width should be used which accommodates a couple walking with a buggy. This will be sufficient for general footways, however, it may be appropriate to provide a wider footway on a higher order street of 6.5m or more width; the footway should feel in proportion with the overall street width. Footways could locally widen at particular points outside more important buildings or at corners where people are more likely to stop and chat.

Humber Street, Bloxham

Main Street, North west Bicester

Pedestrian/ cycle cut-through, South West Bicester

Cyclists

In the majority of residential streets cyclists should be accommodated on the carriageways with no dedicated cycling lanes required. Uneven surfaces such as cobbles should be avoided.

On busier streets, dedicated cycle lanes should be provided on-carriageway. Completely segregated lanes are only appropriate on higher speed / volume roads. Guidance has recently been approved by OCC which will provide further advice. The design of cycle lanes and cycling infrastructure at junctions should be discussed with OCC.

Cycle parking provision is required at both ends of the journey in accordance with OCC’s Cycle Parking Standards (see below). Covered cycle parking should be provided within the curtilage of a dwelling or other convenient location for apartments. Security and convenience are two key principles for the location of cycle parking. If cycle parking is included in front gardens it should be visually attractive. If it is placed at the side or rear of a dwelling access to the street should be direct and sufficiently wide. Garages should be designed to allow space for a car and storage of bicycles and be a minimum of 6m x 3m internally.

Bus bypass in Lewes

Hybrid cycle lane, Old Shoreham Road, Bournemouth

Foot/cycle path, South West Bicester

Cycle Parking Standards		Residential
Resident		1 bed - 1 space; 2+ beds - 2 spaces
Visitor		1 stand per 2 units where more than 4 units
Notes		
1	Garages should be designed to allow space for car plus storage of cycles in line with the District Council’s design guides where appropriate (most specify 6m x 3m)	
2	1 stand = 2 spaces: The number of stands to be provided from the calculations to be rounded upwards. The preferred stand is of the ‘Sheffield’ type	
3	All cycle facilities to be secure and located in convenient positions	
4	Residential visitor parking should be provided as communal parking at convenient and appropriate locations throughout the development	

Table 5.1 Cycle Parking Standards for residential development, (extract from Residential Road Design Guide, Second Edition 2015, OCC)

5.5 Design criteria for vehicles

The design criteria for vehicle movements should be established in response to the proposed character of the street and agreed with OCC and CDC.

Design Criteria

The overall approach to street design should be to consider buildings and spaces first, with carriageways, footways and parking designed to fit within the space created. This approach enables buildings to be laid out to provide an attractive frame to the street with carriageways, kerbs and footways helping to define and emphasise spaces.

It is also important that streets are designed with consideration for the types of vehicular movements, speed and volume of traffic. The majority of residential streets should have a design speed of 20mph or less.

MfS section 7.2 provides details of minimum carriageway dimensions to accommodate different street types and functions. Careful thought is needed as to the application of these dimensions to the different street types.

Over engineering streets to accommodate easy access for HGVs and unnecessarily high design speeds leads to wide streets and large junctions which are detrimental to character and can result in an uncomfortable environment for pedestrians and cyclists. Under these circumstances it is difficult to achieve the sense of enclosure and proportion discussed in 5.3.

It is not expected that space for HGVs to pass each other will be provided along the majority of residential streets, as this will be an occasional occurrence. However, passing places should be designed in to accommodate these movements when they do occur.

Critical dimensions

The standard width for residential street carriageways is 4.8m which allows for unimpeded two way movement of cars, or a car plus HGV and this should be viewed as a critical dimension. Main streets accommodating a bus route are required to have a minimum carriageway width of 6.5m to allow unimpeded two way bus movement, though some reduction in width over a short distance, may be permissible in certain circumstances. Reference should be made to OCC's Residential Road Design Guide and MfS for further details.

As part of a traffic calming strategy designers should consider incorporating short sections of reduced width where appropriate. This supports the traffic calming approach outlined in section 5.7.

Swept path analysis and visibility

Swept path analysis is a valuable tool that should be used to determine the space required for different vehicle types as they move along or through a space.

Consideration of forward visibility through use of stopping sight analysis should also be used, particularly in relation to building lines which in themselves can be used as an integral component of traffic calming.

Section 6.8-6.12 of OCC's Residential Street Design Guide provides details of required sightlines at junctions.

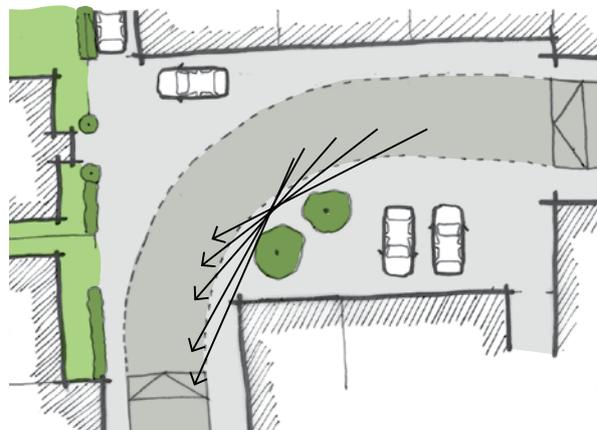

Figure 5.9 Stopping sight distance defining the geometry of the curve and placing of trees/ building lines

5.6 Design for buses

Bus routes should provide direct, convenient journeys for all new houses

All new residential development will be expected to make an appropriate contribution to the development of the countywide bus network, both through the physical infrastructure – e.g. highway measures and bus stop infrastructure – and through service provision.

(Residential Road Design Guide, OCC)

OCC requires all developments of more than 50 dwellings to be served by at least an hourly bus service and for homes to be within a 400m walkable distance of a bus stop. Appropriate provision for buses should be designed in at the outset in discussion with OCC's Public Transport Development Team.

Bus stops should be located in relation to pedestrian desire lines and close to facilities which serve a wider catchment. They should be served by safe and convenient pedestrian crossing places. Consideration should be given to proximity to domestic property and any nuisance issues in relation to the placing of bus stops.

Further advice on the siting and requirements of bus stops can be found on p73 of Manual for Streets and in OCC's residential design guide.

Bus stop, South West Bicester

5.7 Integrated traffic calming

Traffic calming should be designed as part of the street layout in a manner appropriate to the proposed character.

Traffic calming should be inherent within the street layout and can include:

- A sense of enclosure created by building lines or street tree planting which restrict forward visibility
- Changes in direction and tight corner radii
- Change in materials
- Crossing points, either raised or flush with the carriageway with build-outs/narrowings
- A change of character such as widening out into public spaces
- Frequent side road junctions and direct access points to properties

Horizontal and vertical deflection features to reduce speed of vehicles should be designed to read as inherent elements of the street rather than a piece of highways infrastructure e.g. a raised table forms part of a public square or the setting to an important building, a build-out is associated with tree planting or a crossing point.

Informal streets

Variation in carriageway width, footway width and building line is characteristic of traditional informal streets across the District. This creates streets with visual interest, but also enables parking, servicing, small areas of green and trees to be accommodated while maintaining a strong sense of enclosure and appropriate height to width ratio.

These faceted streets have a natural traffic calming effect, as drivers intuitively slow down on the approach to pinch points and junctions or where the street widens into a public space.

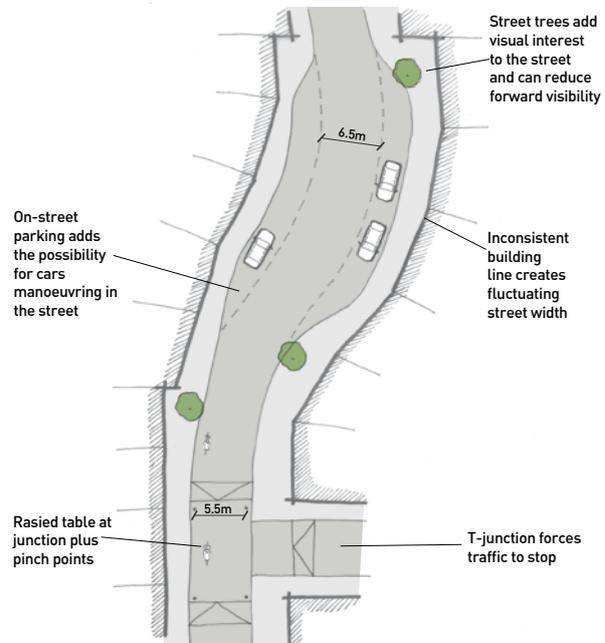

Formal streets

Formal streets, although generally more regular in width than informal streets, can accommodate pinch points at street entrances and widening related to public squares or gardens. The regular junctions of a grid layout have a natural traffic calming effect.

To be avoided

Artificial traffic calming features which have a detrimental impact on legibility and townscape should be avoided, for example: a standard width street with a winding geometry creating an indirect route.

Figure 5.10 Traffic calming measures along a street

Bad example - artificial winding street with no relation to urban form

Good example - deflection of road using landscaping and a pedestrian cut-through, Hook Norton

5.8 Car parking

A range of different parking solutions should be used. The choice of parking solution should be appropriate to the character of the street and the building typology.

Amount of car parking

The Council intends to review parking standards in the forthcoming Local Plan Part 2. In the interim the approach set out in Oxfordshire County Council's Residential Street Design Guide (2015) applies. This includes recommended parking standards (refer to **Appendix F**), which should be used as guidance only for larger developments. Actual parking levels will be expected to be justified, as laid out in supporting documentation with planning applications such as Design and Access Statements, Transport Statements and Transport Assessments.

The parking standards recommend the inclusion of unallocated spaces, alongside allocated spaces to maximise flexibility and economy of land use. In some circumstances, parking can be accommodated entirely without allocated spaces. Work led by Phil Jones Associates for Oxfordshire County Council, reported in 'The Residential Car Parking Research', 2007, DCLG, has shown that the provision of more flexible parking solutions, such as unallocated on street parking supports an overall reduction in parking provision, by supporting flexibility of different householder needs.

Please refer to Section 7 of OCC's document for details on the application of the parking standards.

X

Good example - Informal homezone parking, Hanwell Fields, Banbury

Parking design

Designing an appropriate parking arrangement is critical to the success of any scheme. Where parking has not been well thought through it can be visually detrimental to the character of the street and can be a source of frustration for residents.

The Council will expect to see a range of parking solutions. The number of parked cars in any one area should be limited so that individual streets and spaces do not take on the appearance of a car park. Trees should be accommodated within streets and parking courts to reduce the visual impact of parked cars.

Parking should be functional, convenient and safe. People like to park as close to their house as possible, ideally where they can see their car from inside their house. If parking is placed in a position far away from a dwelling and obstructed from view, people will not park there and instead try to park informally on the street outside their house.

'Car Parking: What Works Where', English Partnerships (2006), provides a comprehensive toolkit for designers highlighting the most appropriate car parking approach according to density of development and housing typology and should be referred to alongside this Guide.

Car parking: golden rules for all locations

- Look to maximise the quality of the street and public realm
- A combination of on plot, off plot and on street should be considered according to the street design, location and housing typology
- On street parking should be promoted as the primary parking option and incorporated in the design – people understand how it works, it's efficient and it increases the activity and safety of the street
- Do not park in the back of the block until on street and frontage parking permutations have been exhausted. Use of the mews or rear courtyards should support on street provision, not replace it
- The proportion of allocated spaces should be limited. Research by Noble and Jenks shows that the more spaces you allocate, the more you have to provide.
- Don't forget Secured by Design principles

(Adapted from 'Car Parking: What Works Where')

Parking typologies

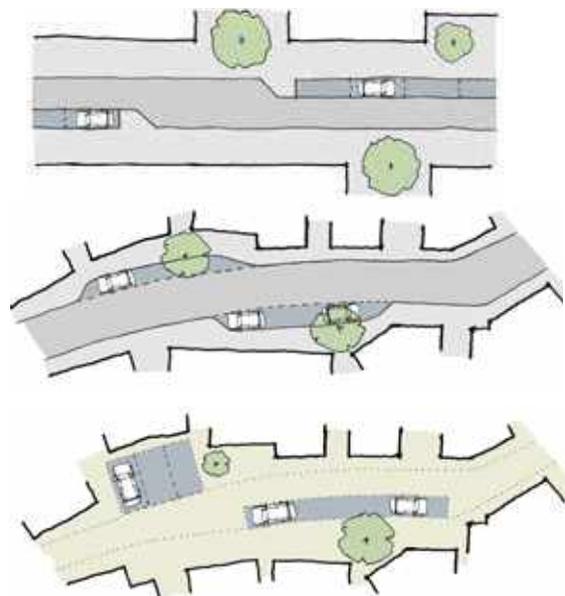

In general, the potential locations for parking are on-street, on-plot and in small parking courtyards. The allocation of car parking spaces (on-plot or in communal areas) reduces flexibility and is less efficient in meeting overall car parking needs.

On-street parking

The Council advocates the use of unallocated on-street parking wherever possible. Maximising the number of unallocated spaces will result in lower numbers of parking spaces overall as it provides an enduring, functional and land efficient arrangement (see Appendix B of OCC's parking standards). It can take a variety of forms including parking around a central reservation, kerbside parking parallel, perpendicular or angled to the pavement. Parking solutions should be an integral part of the street design, with clearly defined or demarcated bays. For both parallel and perpendicular solutions, a maximum of four bays should sit together, before being broken up by street tree planting or a public realm solution.

Terrace buildings work well with on-street parking, as the strong enclosure balances the necessary increase in carriageway width. Street trees should be used to soften the visual impact of parked cars and provide further enclosure to the street. Narrower streets can widen at certain points to accommodate smaller areas of on street parking.

Figure 5.11 On street parking examples from top: formal on-street; informal on-street (off line); parking in shared surface area

On plot parking

On plot parking to the rear or side of homes, on driveways or within garages, is by its nature allocated to a particular home. It limits flexibility and can be detrimental to street character when it is visually dominant. It is generally only appropriate for larger semi-detached or detached homes on larger plots.

Parking on-plot in driveways should, as far as possible, be designed to limit the gaps in the street frontage (for example through the use of shared driveways) and should be configured to ensure that the maximum parking standards are not breached i.e. through excessively long driveways.

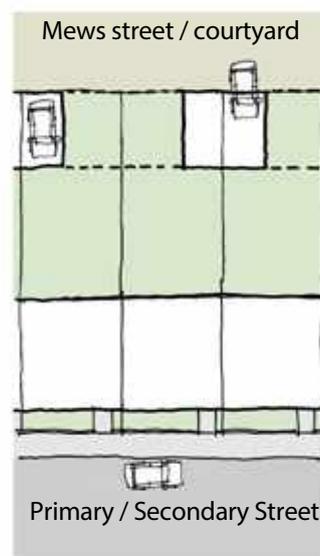

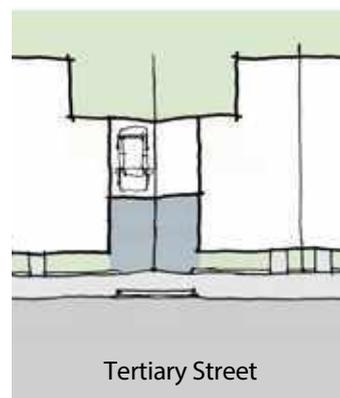

Allocated on plot parking can also be provided to the rear or within gardens accessed from a rear lane. This is an alternative to the communal parking court.

In general, the Council seeks to limit the use of garages as they are often used for storage rather than parking, pushing parking demand elsewhere. Where garages are provided they should have a minimum internal area of 3m by 6m and the use of double garages should be limited.

The architecture and materials of the garage should be in keeping with the main house and have a pitched roof and wherever possible should be attached to the property.

Where two single garages are proposed together they should be attached where their use supports a better design solution. They should only be used on wide fronted properties where a front door and ground floor habitable room can also be provided. Double integral garages are not appropriate.

Figure 5.12 garage and driveway parking examples:
garage to the rear of the property (top)
garages accessed from mews/court to the rear (bottom)

On-plot screened with vegetation, Manor Road, Fringford

Rear courtyard parking

Communal parking areas or parking lanes to the rear of properties are the least preferred solution. Although rear parking reduces the visual impact of cars on the street frontage it also reduces human activity on the street and large rear courtyards can be bleak spaces.

Where used, courts must be well-overlooked by the properties they serve, ideally with direct access to individual dwellings/gardens. They should service no more than six properties and a maximum of 12 parking spaces. Unallocated /visitor parking is not appropriate in these areas and should be provided within the street. Landscape and tree planting should be an integral part of the design.

Access to courts should be by a shared driveway between properties, via a lane to the rear, or through narrow carriage arches, to maintain a continuous frontage at first floor level. Where carriage arches are used these should incorporate first floor accommodation. Lanes may also give access to a number of properties.

Sustainability

The Council supports the use of sustainable technologies and systems designed to reduce the impact of private vehicles including:

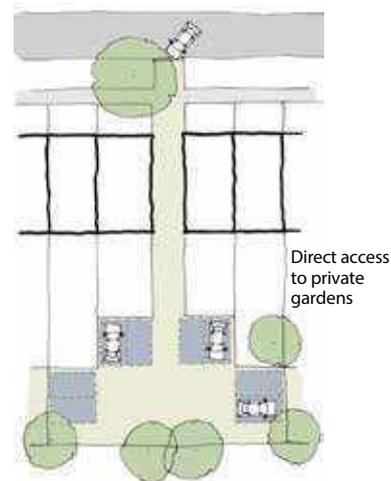

Electric charging points

Every home should have access to at least one electric charging point and 20% of spaces in public car parks should have electric charging points.

Car clubs

The Council supports car clubs particular in low car developments. Car club vehicles are generally made available to residents on a pay as you go basis and are particularly suited to central and higher density areas where car use is only necessary for occasional trips. Discussion with the Council is required to resolve practical issues relating to implementation.

Figure 5.13 Example of private rear parking court

5

Well landscaped rear court parking, Clay Farm, Cambridge

Rear parking accessed through carriage arch, High Street, Adderbury

5.9 Avenue trees, planting, SuDS and landscape

Trees and soft landscape are important to the character of Cherwell's streets and should be incorporated in all street character types.

Many of Cherwell's historic streets have a strong building frontage, softened with by trees and landscape planting. Individual and groups of trees, grass verges and public green spaces contribute to making distinctive and attractive places.

Soft landscape, especially trees, should be incorporated into every street to support the proposed character. For example, a formal street may suit an avenue of trees and small front gardens, whereas an informal lane may be appropriate for soft verges and occasional individual or small groups of trees.

The requirement for Sustainable Drainage Systems (SuDS) is an opportunity to bring character to streets, through integrated landscape and drainage design. By considering SuDs at an early stage they can be incorporated successfully alongside street trees, utilities and car parking. See section 4.7 for further guidance in relation to SuDs.

The choice of tree species and location of trees in relation to built elements should be in accordance with the minimum distances established in BS 5837: 2012, Trees in relation to design, demolition and construction. Further detailed design guidance relating to tree planting including their relationship with utilities corridors and SuDS is contained within the Trees and Design Action Group publication 'Trees in Hard Landscapes, A Guide for Delivery', 2014.

The following principles should be considered:

- Street tree planting should be integral to the public realm design
- Street tree planting should be a minimum of a semi mature standard size in a location of sufficient size for the long term survival / health of the trees
- The species selection should consider their functional and space making qualities and native species are preferred

The maintenance and management responsibilities for landscape areas should be defined within the planning process. The design should avoid small (often narrow) planted areas which are hard to maintain.

Soft landscape reduces the impact of parking, Trumpington Meadows, Cambridge

Built frontage softened by trees and grass verges, Banbury

Incorporating existing trees and hedgerows into a new development

Incorporating SuDS along kerbside, Trumpington Meadows, Cambridge

5.10 Public spaces

Squares and greens provide important breathing space within the street network, should be framed by buildings and be located to encourage community interaction.

The widening out of the street network to accommodate village greens, squares and market places are characteristic of many of Cherwell's settlements. These spaces are framed by buildings, contain significant trees and are often located centrally adjacent to public buildings where they form a 'heart' to the settlement.

Developments should incorporate public spaces which sit with the character of the overall settlement structure and the site masterplan. Public spaces perform a number of important roles:

- They are focal points for the community, often surrounded by civic or community uses
- They create variety in the townscape and are important for wayfinding and legibility
- They can create a positive, usable space in an awkward corner
- They are an intrinsic traffic calming feature and can be of a shared surface design (see section 5.7)

Public spaces can take a variety of forms including formal hard landscaped public squares, village greens and smaller incidental spaces either hard or soft. OCC's residential road guidance includes 'social spaces' which are smaller areas where the footway might widen out to incorporate some benches, perhaps with shade from a tree. In all cases, public spaces should be framed and overlooked by buildings and designed to encourage their use – for example, through the provision of children's play or seating areas.

The size of the space should be appropriate to the scale of buildings which surround and enclose it. This should be tested in three dimensions. Trees should be used to create a sense of enclosure to larger spaces. Spaces which are too small to have any useful public function (i.e. 'leftover space') should be designed out.

Hard-landscaped incidental square with trees and seating, North West Bicester

Informal green space with trees and seating, Bloxham

Central green space, The Triangle, Swindon

5.11 Street materials

The materials of the public realm should coordinate with the palette of materials used for the buildings and should reinforce the proposed character of the street or public space. This will vary depending on the location of the scheme within the District. Details of locally appropriate building materials are provided in section 7.3.

In general:

- Pavements and main street surfaces will be tarmac, with special consideration given to edge areas, gullies and kerb details where natural stone should be used
- Shared surface areas should use block paving with setts used for drainage gulleys and careful use of high quality edge details to help define the space
- Squares and other areas of public realm should use natural stone, dependent on the character of the settlement

Large areas of concrete block paving are generally not acceptable as they are visually intrusive. Where block paving is used, the colour should be in keeping with the wider palette of building materials.

Investment in high quality materials will be expected at sensitive and prominent locations for example: within the setting of heritage assets, to define the entrance of the development, at important crossing places and public spaces and for shared surface treatments.

Tarmac with subtly coloured block paving indicating informal pedestrian crossings, South West Bicester

5.12 Utilities corridors, lighting and signs

Utilities corridors, lighting and signage should be considered early on and grouped to minimise impact on the character of the street.

Utilities

The design of utilities corridors should follow the recommendations of the National Joint Utility Group (NJUG) publications, and include liaison with service providers at an early stage.

The use of shared utility enclosures or grouped service strips should be used to reduce the service corridor width and limit impact on street design including the location of street trees. Protective and preventative measures should be adopted to avoid tree root intrusions into service corridors.

Where routing through the pavement will have a detrimental effect on the character of the street, alternatives include routing down a back street or through communal areas.

Further guidance is provided in section 3.4 of 'Trees in Hard Landscapes', Trees & Design Action Group, 2014 and Sewers for Adoption, 7th edition, WRc plc, 2012.

External lighting

Lighting should be an integral part of the street design process as there is a risk that landscape, parking and other elements are undermined when this is considered retrospectively. In particular the lighting and tree planting strategy should be considered together at an early stage.

OCC must be consulted at an early stage to agree the design brief for street lighting. OCC can provide street light design for a fee which removes the need for approval. Refer to Appendix A2 of their Residential Road Design Guide, 2015 for details.

Signage

Signage is important for wayfinding but should be minimised to avoid visual clutter. Street names and other signs should be fixed to buildings, boundary walls or lamp-posts to avoid additional columns on the street.

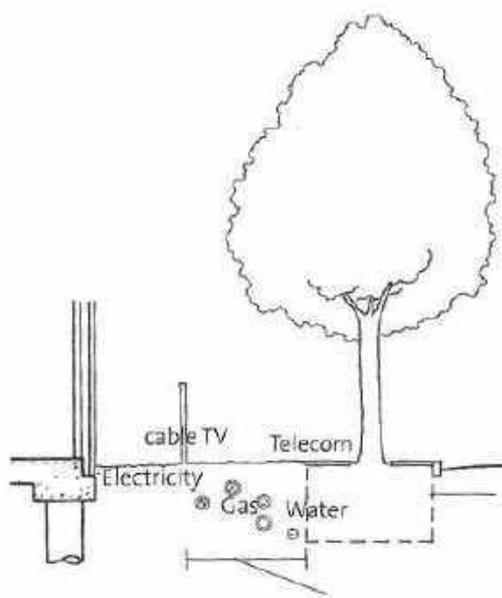

Figure 5.14 Grouped service strips help minimise maintenance disruption and avoid features such as trees (source: Urban Design Compendium, p82)

Road name and signage mounted on boundary wall and lamp-post respectively, Adderbury

5.13 Waste management

Suitable provision for the storage and collection of waste should be integrated into the street layout building and plot design.

Agreement is required on the way waste is to be managed and in particular:

- The method for storing, segregating and collecting waste
- The amount of waste storage required, based on collection frequency, and the volume and nature of the waste generated by the development, and
- The size of anticipated collection vehicles

Collection points must be no further than 20 metres from the refuse vehicle access point. As a result, a connected network of streets will enable easier movement of refuse vehicles, avoiding the need for reversing or multi-point turning manoeuvres. It is expected that the principles outlined in section 5.3 will be followed to minimise the necessary street width. BS 5906:2005 provides guidance and recommendations on good practice.

At the time of writing, the majority of dwellings in Cherwell are allocated three wheelie bins. Bins should be accommodated within the curtilage of buildings, within appropriate ventilated bin stores/enclosures in front gardens, integrated within the building, or at the side or backs of dwellings where there is sufficient access for residents to wheel bins to the front of the property on collection days. If bin stores are visible from the street, these should be of a simple design screened by vegetation or enclosed by walls of the same material as the property.

Example of an attractively designed bin store (source: West Oxfordshire Design Guide)

Side passage to enable bins to be brought out, Bletchington

6 BUILDING AND PLOT ARRANGEMENTS

- 6.1 Layout and urban form
- 6.2 Establishing character
- 6.3 Perimeter blocks and active frontages
- 6.4 Scale
- 6.5 Building typologies
- 6.6 Landmarks, vista stoppers and corner turners
- 6.7 Amenity space
- 6.8 Materials

Chapter 4 explains how the masterplan establishes the overall urban block pattern, street hierarchy and proposed character areas.

This chapter deals with the next level of detail, considering how building forms should be arranged to create a pleasing overall townscape which frames the public realm and reinforces the proposed character areas. The way buildings sit together is one of the most important drivers of character.

Chapter 7 provides further detail on the design of the buildings themselves.

New development in Cherwell should promote:

- An harmonious composition of buildings that contributes to the overall legibility and character of the place and its role within the wider masterplan
- Traditional settlement form and character
- Three dimensional form as a starting point for design
- The use of building types which reflect local traditions and can be successfully grouped together
- The use of bespoke house types to address important, sensitive and tricky conditions including landmark locations and corner plots
- The use of terrace house types, which should be the predominant form in most developments, especially along principles routes, mixed use areas and adjacent to public open space. Limited use of detached and semi-detached houses.
- Design solutions that minimise the opportunities for crime and antisocial behaviours through the clear definition of the public / private boundaries and creation of active frontages

New development should avoid:

- A lack of three dimensional design thinking
- Estates with a homogenous, 'could be anywhere' character
- Architectural focus on individual buildings rather than the overall street composition.
- The use of inflexible, standard house types which cannot be grouped effectively
- The use of detached houses on small plots when a terraced form is more appropriate

Please refer to the following chapters for supporting information:

- **Chapter 2:** For a summary of the District's distinctive characteristics and character areas
- **Chapter 4:** For details of how a scheme's character is established through the vision and structuring principles of the masterplan and block structure
- **Chapter 5:** For details of how the character of individual streets will be established in the public realm
- **Chapter 7:** For detailed guidance on the design of individual buildings
- **Chapter 8:** For guidance on sustainability considerations
- **Appendix A:** List of Conservation Areas within the District

Further reading:

- **Conservation Area Appraisals, CDC:** Provides detailed character analysis and guidance for each of the District's conservation areas
- **Responsive Environments, A Manual For Designers, 1985, Bentley, Alcock, Murrain, McGlynn, Smith:** Provides detail on the composition of the street, contextual clues for built character and external surface design

6.1 Layout and urban form

Detailed layout design should focus on the composition and arrangement of buildings across the street as a whole, rather than the design of individual buildings in isolation.

The way in which buildings are grouped together to create the urban form of the street has a strong influence on character and should be a direct response to the proposed vision for the development (see section 4.3 for details). This should be clearly articulated in the planning application Design and Access Statement.

It is expected that urban form will vary from street to street reflecting its role within the masterplan hierarchy and in response to localised conditions e.g. a change in level or street orientation. This will support the legibility of the settlement.

Individual buildings should be designed to relate well to their neighbours, creating a harmonious overall composition and work with site conditions. The use of inflexible standard house types should be avoided as it severely limits the potential for cohesive and responsive design.

Consistent street frontage, Bicester

New development should:

- Create a pleasing rhythm, variety and articulation to the street, through the use of different building forms, landmark features and the design of the façade and roofscape (see chapter 7)
- Respond to overarching character objectives e.g. informal or formal (see 6.4)
- Create bespoke design solutions for sensitive locations e.g. landmark locations, at corners and where views are terminated (see section 6.8)
- Consider the way buildings relate to other elements eg. car parking arrangements, front gardens, pavement widths
- Design out crime through the creation of active frontages and perimeter blocks (see sections 6.3 and 6.4)
- Make the settlement easy to navigate by creating a series of memorable spaces, landmarks and views
- Encourage natural traffic calming through the careful arrangement of buildings in relation to the carriageway (see section 5.7)

The Council will expect to see evidence of design thinking in three dimensions, including the use of simple physical or computer models, sections and perspective drawings encapsulated within the Design and Access Statement and used as a design tool to assess the form of the layout, including the roofscape.

Strong vertical rhythm with simple variation in design, Banbury

Corner solution, where building addresses both streets, Banbury

Corner of building juts out into the road, creating a natural pinch point forcing cars to give way to oncoming traffic, Islip

6.2 Establishing character

Urban form is an important element in defining the character of a place.

The proposed character of individual streets and blocks will be established in broad terms as part of the site wide masterplan and vision; this is explored in section 4.3.

An important element of character is the degree of formality in the layout and urban form. In historic settlements this is a reflection of the extent to which a settlement was planned (formal) or developed incrementally and organically (informal).

In designing new places, designers should draw from both approaches to establish variety and reinforce the overall hierarchy of streets and spaces within the masterplan.

Formal Streets

Greater formality will be appropriate in some areas of the masterplan, for example to emphasise the civic character of a public space or to front an important movement route. Formal streets should be laid out in a regular, rectilinear pattern.

Characteristics of the urban form of formal streets include:

- Consistency and unity across the majority of elements of the urban form i.e. plot and building size, roof lines, eaves lines, building line, materials and façade design
- Buildings at the middle or ends of the street may be taller, brought forward, or have increased ornamentation to provide emphasis and visual interest
- Classically proportioned building facades (see section 7.2)
- Detached homes should have a wide frontage, narrow plan; semi-detached, in a villa form; and either plan form used for terrace properties (see section 6.5)
- Windows and doors will be regularly spaced, with a repetitive pattern established for the street as a whole. Changes in the pattern can be used to emphasise key buildings or locations
- Formally arranged street trees creating an avenue and regularly sized front gardens

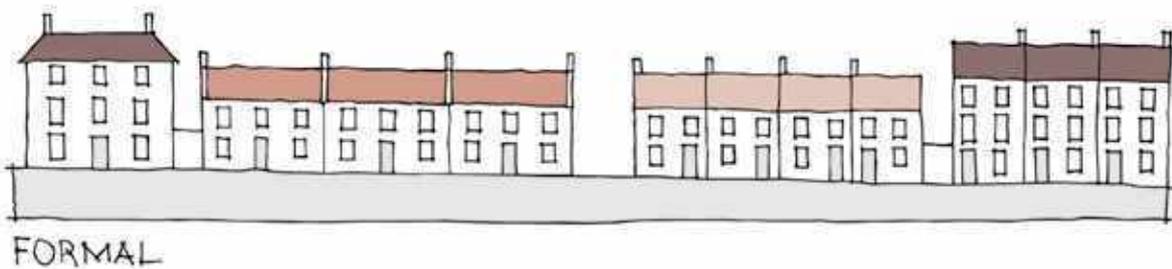

Figure 6.1 Formal street

Formally arranged terrace, Bicester

Formal repetition of semi-detached homes, Banbury

Formal modern terrace - repetition of materials, regularly spaced windows, doors and trees, North West Bicester

Enclosure and openness

In both formal and informal layouts, the majority of buildings should be arranged in a terraced form to create a near continuous built frontage to the street, in line with the principles for perimeter blocks set out in section 6.3.

However, in some character areas a more open arrangement may be appropriate for example to allow views out to the wider landscape or to meet a particular need for larger semi-detached or detached properties. In these locations, the gaps between buildings should be clearly defined by boundary walls, fences or hedges. On plot parking should be arranged so as not to dominate the street frontage (see section 5.8).

Informal Streets

Where an organic, village character is proposed, streets should have an informal layout, with a simple geometry, varying to reflect topographic and natural features. Particular care is required to create overall visual coherence and harmony. The right balance can be achieved by varying one or two elements of the urban form, but not all.

Characteristics of the urban form of informal streets include:

- Groupings of buildings with continuity of building line and materials, which provides coherence in a street scene, while other elements, such as plot width, building height and fenestration vary
- A range of plot and house sizes on a street to reflect traditional patterns
- Variety in the character of individual buildings. Within the street there should be a mix of wide and narrow frontage properties (see section 6.5), typically with consistency in the building line and materials
- Informally arranged windows and doors
- Subtle variation in roofscape reflecting variations between neighbouring building heights
- Street trees located individually or in small groups to form a focal point where the street widens or in public squares and green spaces.
- Front gardens which vary in size reflecting changes in street and plot alignments. Planted and grassed verges may also be present, where development is set back from the street

Figure 6.2 Informal street

Continuous building line but wide variety in heights and sizes, Banbury

Continuous building line but wide variety in design and height, Bicester

Variation in set-back moderated by front garden boundaries, Duns Tew

6.3 Perimeter blocks and active frontages

A general principle for the arrangement of building plots is 'public fronts, private backs' to ensure clarity between public and private spaces.

The elevation of buildings fronting the public realm should be 'active', to encourage human interaction and passive surveillance of the public realm.

This arrangement creates a 'perimeter block' with buildings fronting and providing a frame to streets and open spaces. The perimeter block arrangement is an effective means of designing out crime in that it provides a defensible front boundary with good surveillance from the street and a secure rear property boundary.

Layouts which confuse the relationship between fronts and backs or emphasise property access from the rear should be avoided.

Buildings face the street...

... and form a secure perimeter block

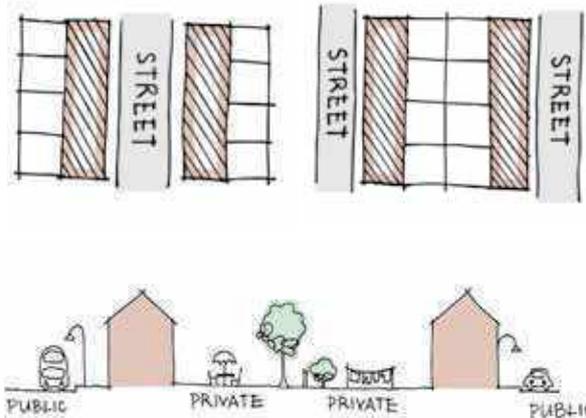

Figure 6.3 Front and back relationships

Mixed use urban square, Poundbury

Principles for perimeter blocks:

- Orientation for solar gain, wind patterns and microclimate must be considered in the form and structure of the block and frontages (see section 4.9)
- The boundary between the public realm and the private realm must be clearly defined by either the building line or garden boundary
- The principal frontage and main entrance to the property must face the main street (not the side street). This applies to all house types including apartment buildings
- The principal frontage must include front doors and larger windows
- Internally, living spaces and habitable rooms must be located on the principal façade overlooking the public realm
- Bathrooms and cloakrooms and the use of obscure glazing must be avoided facing onto the public realm and / or principal elevations. Kitchens are only permissible in this area where windows can be appropriately proportioned and detailed
- Elements which deaden the street such as blank building facades, garages and integral parking, and bin stores are not appropriate in the public realm
- Elements of non-residential uses which help to 'activate' the frontage to the public realm such as cafes or shops should be encouraged to spill out onto the street

Chapter 7 provides further guidance relating to the design of active facades.

Figure 6.4 Active frontage encourages human interaction

6.4 Scale

Building scale should respond to local context and proposed character.

Scale should be considered in relation to the enclosure of the street and the public realm, to give a comfortable height to width relationship and relate to the structure of the masterplan. This is explained in section 5.2. Perception of building scale is not only influenced by the number of storeys, but also by the form of the roof, the eaves height and internal floor to ceiling heights and local architectural character should inform the building height and form.

Principles for scale:

- In the majority of areas, building heights of two or three storeys are appropriate. Additional accommodation may be included in the roof space and/or in a semi-basement. Rooms in the roof space are encouraged
- Taller buildings may be appropriate in town centre locations, but individual buildings should be designed to fit comfortably with the general urban form
- A steeply pitched roof is an important component of the traditional Cherwell form. Shallow pitched and hipped roofs with a suburban character should be avoided (see chapter 7)
- For an informal area the eaves and ridge height can vary (minimum 200mm) from building to building to create an varied roofscape
- In formal streets, the eaves line and roof ridge should be consistent between neighbouring buildings
- Grander buildings, with higher floor-ceiling heights can be a positive addition

Two to three storey buildings, Adderbury

Two storey buildings some with rooms in the roof, Islip

6.5 Building typologies

Building forms should be simple and reflect the character and traditions of the local area.

Simple, traditional building forms based on a rectangular plan should be used. These forms can be easily grouped together to form a continuous street frontage accommodating a range of different building sizes. In most cases buildings should be designed to be in a terrace form.

There are two basic plan forms:

1. Wide frontage, narrow plan

- Simple facade with either symmetrical, classical proportions (up to three storeys) or cottage vernacular proportions (up to two storeys), with occasional half storeys
- Can be linked to form a terrace or be detached or in pairs
- Rectangular rear extensions can be used to create an L-shaped plan, if this is appropriately detailed. This will typically be setback from the building line, but may in prominent building locations form an integral part of the design

2. Narrow frontage, deep plan

- Simple facade with classical proportions (two-three storeys) or occasionally cottage vernacular proportions (up to two storeys), with occasional half storeys
- Should be linked to form a terrace or occasionally 'handed' to form a symmetrical semi-detached pair
- This form is generally not appropriate for detached houses
- Care should be taken to ensure that where wide gables occur, they are not visible from the public realm

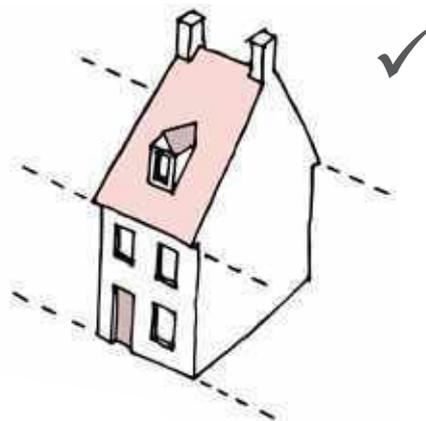

Figure 6.5 Basic typologies

Wide frontage, narrow plan terrace

Wide frontage detached

Narrow frontage, deep plan terrace

In both cases:

- The front façade of the property should be kept flat, apart from simple porches
- Roofs should be a simple pitch with ridgelines aligned parallel to the street and chimneys located on the ridgeline
- On occasion, a narrow frontage property may be arranged with its gable end to the road (see chapter 7 for guidance on building facades, roofs and chimney details). However, care should be taken to ensure that the gable proportions are well balanced
- The frontage of individual buildings or the terrace can be faceted or curved to respond to a change in street alignment, with adjustments to the internal building plan
- Garages and other outbuildings should relate well to the form of the main building
- Projecting bay windows should only be used occasionally
- Dormers can be used occasionally, when arranged in proportion with the property and neighbours, but overuse can disrupt the roofline

Figure 6.6 Examples of typical typologies

Wide fronted terrace, Adderbury

Narrow fronted 3 storey terrace, Banbury

Wide fronted, detached behind a garden, Bloxham

Narrow fronted, semi-detached, Islip

The following should be avoided:

- Projecting front gables (uncommon in Cherwell vernacular)
- Deep or square plan forms
- Hipped or pyramid shaped-roofs (overtly suburban character and difficult to group)
- Exposed wide gable ends (uncommon in Cherwell vernacular)
- Narrow fronted, detached houses (results in a gappy frontage)

Relationship between building size, form and plot

There is no limit on the size of property which can be successful accommodated in a terrace form, with examples ranging from workers cottages to mansion townhouses. A detached form should only be used for larger properties (a net floor area of over 100 sqm).

To avoid the appearance of ‘cramming’, detached properties should only be sited on larger plots which have sufficient generosity to balance internal and external space requirements effectively and accommodate car parking without garages and driveways dominating the street frontage.

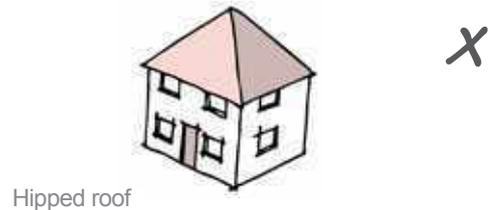

Chapter 4 provides further guidance on the relationship between building typologies and density.

Apartment buildings.

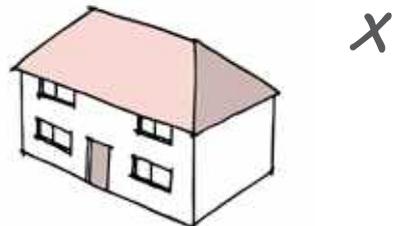

In general, apartment buildings should be designed to be indistinguishable from individual houses and subtly integrated into the street e.g. taking the form of a wide frontage, detached house.

In local centres or at transport hubs, a higher density and greater proportion of apartments may be appropriate. In these locations bespoke solutions for larger apartment buildings should be developed with Cherwell District Council.

Figure 6.6 Typologies to be avoided

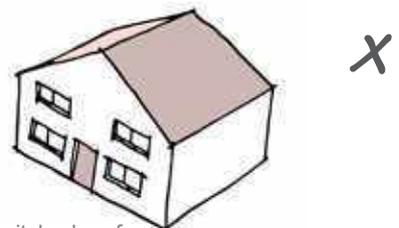

Hipped roof

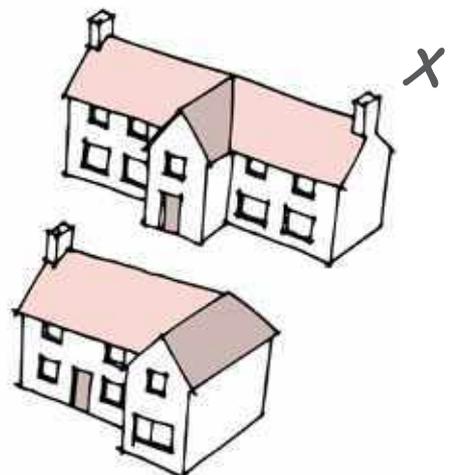

Square plan with pyramid roof

Shallow pitched gable end

Shallow pitched roof

Inappropriate projecting gables

6.6 Landmarks, vista stoppers and corner turners

Bespoke design solutions are required for important and sensitive locations including landmarks, corners and to terminate vistas.

These buildings lead the eye onwards and play an important role in helping people to understand and find their way around the settlement. While focal buildings are important, it is equally important that they work in context with those adjacent. The location of landmark buildings should be considered in the context of the masterplan and hierarchy of streets and places.

Landmarks

Landmarks should be located in prominent positions to help people navigate and remember the organisation of streets and places. They should be designed to draw attention, add interest and focus. They can be an individual building or a group or even a landscape feature. A landmark might include some of the following characteristics:

- Greater scale than its neighbours
- Grander proportions to its facade
- Increased ornamentation
- Distinctive architectural style or form e.g. a detached, classically proportioned house in an otherwise informal, terraced street
- Variation in materials

Vista stoppers

Vista stoppers are required to spatially enclose and frame views e.g. at the end of a street. Vista stoppers are not necessarily landmarks, but should be well proportioned and attractive building frontages or a public space framed by buildings. A vista stopper may also give sense of direction e.g. a curving group of buildings which lead the eye onwards.

- Where a building is used to terminate a formal street vista it should be arranged centrally to the view to give a sense of symmetry
- 'Dead' frontages such as blank facades or fences, garages or parking areas must not be used as vista stoppers

6

House at end of a street, South West Bicester

Landmark view, Bloxham

Prominently positioned house, Lower Heyford

Turning the corner

Corner sites are visually prominent. Where two streets form a junction, a bespoke design solution is required for the corner plot. This should respond to the hierarchy of each street.

- The corner should typically be turned by a group of buildings, especially on principal and high order streets and places
- A single building with two active fronts in (as shown in figure 6.7) may be acceptable along lower order streets
- Both frontages should be 'active'
- Greatest emphasis should be given to the principal street frontage in the overall hierarchy, with front doors and principal windows

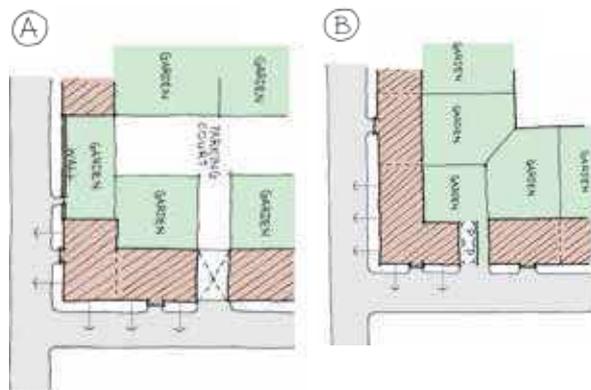

Figure 6.7 Plans of corner buildings

- The continuous frontage of a terrace could curve with the street. The plan of individual properties will need to be splayed to accommodate this
- If the corner is also to form a landmark, additional emphasis can be given to doorways and windows or the height can be raised subtly above the surrounding buildings, or a non-residential use incorporated at the ground floor

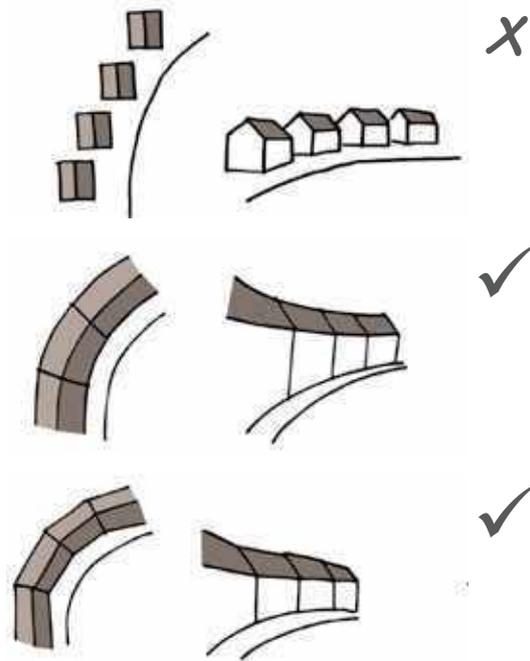

Figure 6.8 Diagram of continuous frontage (adapted from Essex Design Guide, Essex County Council)

Single corner building, Bloxham

Corner terrace in new development, Adderbury

6.7 Amenity space

Outdoor amenity space should be provided in the form of rear private gardens for houses and balconies, roof gardens or shared gardens for flats.

The amount of gardens and outdoor space should be appropriate to the size of the property, with an expectation that larger properties will be located within larger plots with larger garden, reflecting the likely needs of larger families.

Principles for amenity space

- Amenity space must be usable and receive sunlight for the majority of the year. Building heights, orientation and access to light must be considered to prevent overshadowing, particularly in north facing gardens
- Areas must not be overlooked, lack suitable privacy, or have other primary functions e.g. car parking, refuse storage and footpaths are not amenity space
- A minimum distance of 22m back to back, between properties must be maintained
- A minimum of 14m distance is required from rear elevation to two storey side gable
- First floor habitable room windows must not be within 7m of neighbouring property

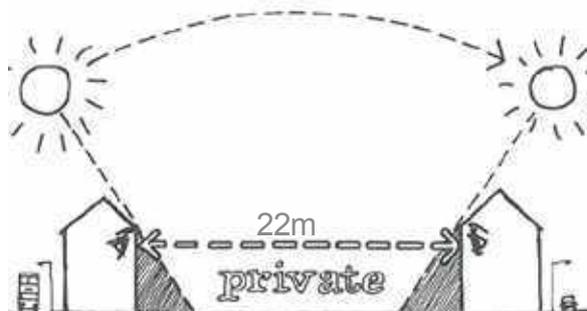

Figure 6.9 Amenity space and sunliting (source: Responsive Environments, Bentley et al. p15)

Existing mature tree incorporated within private garden space, Upper Heyford.

Mews street, approximately 7m wide, Trumpington Meadows, Cambridge

Boundary definition

There should be a clear definition between the public realm and private amenity space, through enclosure by walls, fences, hedges and other threshold features. This is important in establishing a sense of ownership. Boundaries often form important features in the public realm and contribute to the character of an area.

In general the boundaries to front and rear gardens should be as follows:

- Front garden walls (between the public realm and private front gardens) should be approximately 90cm high and in the same material as the front wall of the house, unless this is render, in which case the coping should be brick or stone. Gates in these front garden walls may be in painted metal or wood or stained wood, and should be the same height as the front garden walls.
- Metal railings are also appropriate, either on top of a low wall or as a stand-alone feature, especially on formal streets
- Rear and side garden walls separating the public realm from private spaces and including the boundaries to parking courtyards should be at least 1.5m high and should be in the same material as the front external wall of the relevant house
- Fences should not be used where visible from the public realm
- Gates within these garden walls should be in painted vertical timber boarding and should match the height of the relevant walls

Traditional boundary treatments

6.8 Materials

The choice of materials should vary across the masterplan in response to the proposed local character.

Materials are an integral part of the character of streets and places and should be used to reinforce the character of different places. The majority of the development should have a simple palette of high quality materials. Natural local stone and slate will be expected in key and sensitive locations, for example, on prominent frontages, key entrances into the site and in areas adjacent to public rights of way and the open countryside (see chapter 7).

The choice of material should create visual harmony across the street as a whole, with a limited palette of materials. An indiscriminate pepper potting approach should be avoided.

Section 7.3 provides details of appropriate materials in different parts of the District.

Simple palette of materials, Barford Road Bloxham

Use of local stone, Woodstock

7 BUILDING ELEVATIONS AND DETAILS

7.1 Sustainability considerations

7.2 Façade proportions

7.3 Building materials

7.4 Detailed guidance

7.4.1 Windows

7.4.2 Roofs

7.4.3 Doors and porches

7.4.4 Decoration

7.4.5 External boxes

Building proportions, details and materials contribute to making a home functional and liveable. Of equal importance is the impact that the detailed design of individual buildings has on the character and visual coherence of the street as a whole. This chapter considers how the character and composition of places should be articulated and reinforced through the detailed design of building elevations.

The guidance contained in this chapter is more detailed and prescriptive than earlier chapters, setting out simple rules on proportional relationships, materials and detailing.

The vernacular architecture of Cherwell has a simple form and use of details and it is this simple pared back architecture that gives the area its distinctive character. The detailed design of buildings including the choice of materials is important in reinforcing the character of the scheme which is established through the masterplan.

Buildings should be designed as part of an overall street composition rather than designing individual buildings in isolation. Details are also important in providing living environments which are functional and comfortable. The vernacular architecture of Cherwell is very simple and care should be taken to ensure that a limited palette of materials and details are considered.

CDC promotes innovative and sustainable architecture and are happy to consider modern architectural solutions, where they are of exemplary design and in the right context. Further information is set out in chapter 8.

Where a more traditional approach to building design is being taken, it is important that this does not follow a generic 'traditional' style, which has little relationship with Cherwell. The guidance set out in this chapter promotes an approach to architectural design and materials that reinforces the area's character.

New development in Cherwell should promote:

- Well proportioned, simple facades in keeping with the character of the District
- Details which perform a functional role, protecting the building from water ingress etc. and which are designed to be long lasting and low maintenance
- Details which reinforce the role of each building in creating a visually coherent scheme
- Bespoke house types which integrate locally appropriate details as part of their construction. The Council will expect to see bespoke design solutions reflecting local character for elements including windows, doors, porches, bay windows, dormers, roofs and chimneys. Careful attention should also be paid to the finer details such as eaves, verges, quoins, plinths which must be in keeping with local tradition (see detailed guidance in section 7.4)
- The use of high quality, locally appropriate materials across the scheme
- Affordable housing which is indistinguishable from market sale homes
- Careful location of windows and doors within the facade which:
 - informs the overall organisation of a building and the character of individual rooms. For example: larger windows and greater floor/ceiling heights bring a sense of space and light
 - has an impact on the energy efficiency of the building (see section 7.1) and the need for artificial light and heat

New development should avoid:

- A focus on the design of individual buildings rather than the overall street composition
- A scatter-gun approach to detailing and the use of materials, creating a visually incoherent scheme
- Use of inflexible, standard house types and detailing which are not reflective of local character
- Poorly proportioned facades
- The use of stick-on or skin deep elements to add 'character'
- Poor quality materials and poorly designed details which bring problems of repair and maintenance

Cherwell promotes well detailed simple form, using high quality materials and robust construction techniques. We expect details which are an integral part of the building design and the street composition. The use of 'stick-on' details to add character is not acceptable, neither is a scatter-gun approach to the detailing of individual houses with no consideration of the overall composition of the street.

The use of high quality, locally appropriate materials and details should be factored into the scheme cost analysis from the outset.

Please refer to the following chapters for supporting information:

7.1 Sustainability considerations

Buildings should be designed to provide good, practical and economic natural lighting, ventilation and thermal insulation.

Across the District, new development should seek to increase standards of sustainable design, the principles of which should be established through the masterplan layout and block structure. In particular, the orientation of development blocks has a significant impact on the potential to reduce the need for heating through passive solar gain and the potential for successful PV and solar water heating. Section 4.9 and chapter 8 provide further details on this issue.

CDC is planning to produce a Sustainable Building Supplementary Planning Document which will provide guidance on a range of measures, such as reducing energy and water use in the design of new buildings. This approach should be applied in an integrated way which is complementary to the wider character-led objectives of this Guide i.e. the use of locally appropriate building forms, materials and details.

Opportunities to consider include:

- Window design in response to passive solar gain and building orientation
- High standards of insulation including glazing
- Thermal mass of building materials
- Natural/passive ventilation or efficient mechanical ventilation
- Low temperature heating systems such as underfloor heating
- Solar water heating
- Photovoltaic panels
- Ground sourced heat pumps
- Heat exchangers
- Low embodied carbon materials

Chapter 8 provides further details.

The Local Plan sets out in policy ESD 3 guidance on sustainable construction. In addition, the detailed design of buildings and the public realm should support increased levels of sustainability in broader terms for example:

- The inclusion of bat and bird boxes, and hedgehog fence holes to support biodiversity
- Encouraging recycling through appropriate storage and easy access (see chapter 6)
- Easy access to bicycle storage and provision of electric car charging points to encourage sustainable movement choices (see chapter 5)

Sustainability exemplar

Sustainable building is an integral part of all development. We promote exemplary standards of sustainability and innovation in architecture and further information on this is set out in chapter 8.

Photovoltaic panels, Trumpington Meadows, Cambridge

7.2 Façade proportions

The traditional arrangement of windows, doors and other elements varies from building to building, but can generally be described on a spectrum from the formal, classically arranged facades, to the more informal, with a cottagey character found in less grand properties particularly in the villages.

Formal vs informal

The choice of whether to apply a more formal or informal arrangement should be a response to the proposed character of the building, the street as a whole and its relationship to the wider context.

In determining whether a façade has good proportions the following rules of thumb should be applied (although innovative, modern architecture styles often breaks these rules successfully).

For all buildings:

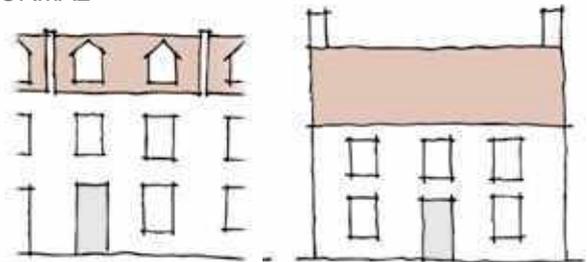

- Window openings should normally diminish in height as the building rises, so ground floor windows should be taller than first or second floor windows
- The arrangement of windows should consider the balance and proportion of the overall street façade
- Horizontal strips of windows should always be avoided

Formal / classical:

- Generally appropriate for townhouse, detached and semi-detached properties
- More symmetrical arrangement of windows often around a central front door, with windows aligned both vertically and horizontally and regularly spaced
- Windows typically have a strong vertical emphasis and may utilise the golden section (1: 1.618) or 1:2 width to height ratio
- Window generally occupy between 25-35% of the principal elevation
- Windows should be sash, with a symmetrical pattern
- Where dormers are used, they should be lined up with the windows below

Figure 7.1 Simple formal and informal facades

FORMAL

INFORMAL

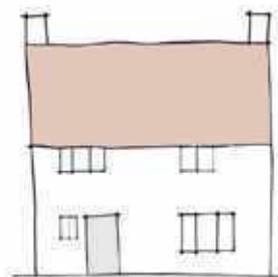

Figure 7.2 Unsuccessful facades

Informal / cottage style:

- Generally appropriate for smaller properties with lower floor to ceiling heights
- Less symmetrical arrangement of windows and front door, with varying window to wall relationships
- Windows generally occupy between 15-25% of the elevation
- Casement windows which are taller than they are wide should be divided by timber or stone mullions to give a horizontal emphasis
- Upper windows are often positioned very close to the eaves
- The use of dormers should be occasional and where used should be small scale
- Single casement windows are not appropriate

Figure 7.1 illustrates simple formal and informal arrangements. Figure 7.2 illustrates for comparison, an unsuccessful arrangement which is not quite symmetrical, has mean windows on the ground floor and an oversized dormer.

Apartment buildings

As discussed in chapter 6, apartment buildings should generally be designed to resemble a larger detached or townhouse property following the formal façade arrangement outline above.

In higher density locations, larger apartment buildings may be appropriate. The Council will expect to see a carefully articulated elevation, which has appropriate proportional arrangements and a level of variation in keeping with the overall character of the street.

Adderbury

↑ Formal

↓ Informal

7.3 Building Materials

A simple palette of locally appropriate materials should be used to bring visual coherence to the scheme as a whole. The palette should co-ordinate materials across buildings, boundary treatments and the public realm.

The use of a simple, consistent palette of walling materials is one of the most distinctive characteristics of Cherwell’s historic towns and villages. The North of the district is dominated by golden-yellow ironstone while paler limestone is used in the South. Red brick is also used, particularly in Banbury and Bicester. Chapter 2 provides further details on the distribution of materials across the District.

New development is expected to continue this tradition, through the use of locally characteristic materials for the construction of all new homes across the District. Tables 7.1 and 7.2 provides details of acceptable building materials and detailing.

Principles for use of building materials:

- Where stone is used it should be natural stone (not reconstituted or artificial stone)
- Brick should match local Banbury or Bicester brick
- The Council expect the proportions of natural stone , slate to be used:
 - 80% conservation areas
 - 60% village locations
 - 40% elsewhere
- Wood cladding, concrete and plastic substitutes for natural materials are not acceptable

- Variation in the use of materials between buildings or groups of buildings may be used as a means of reinforcing the character of key spaces or landmarks, but should generally be minimised so that the building line reads as a single element framing the public realm
- A building must be constructed in one walling material and a mix of materials is not acceptable. For example, ground floor brick and upper floor render. Where stone is used the same material should be used below the damp proof cause level. Exposed brick or other material will not be acceptable
- Garages and out buildings must be constructed in the same material as the main property
- Expansion joints should be avoided onto the public realm. Where required they should be discreetly located behind rainwater goods (i.e. gutters and downpipes)
- Soldier courses or other ornamentation is not normally appropriate
- The materials palette should be discussed and agreed with the Council at an early stage. The palette should include walling, roofing and boundary treatment/threshold materials. The palette should co-ordinate across buildings, thresholds details and elements of the public realm such as paving
- The colours of the palette should be informed by the Roger Evans Associates report ‘Colour Palettes: Banbury, Bicester, Kidlington’ produced for the Council

Table 7.1 Appropriate use of local stone

	Character Area					
	Bicester	Banbury	Ironstone Downs	Cherwell Valley	Ploughley Limestone Plateau	Clay Vale of Otmoor (including Kidlington)

<p>Slate</p>	 <ul style="list-style-type: none"> • Blue / black welsh slate • Stone slate • No imitation slates.
<p>Chimneys</p>	 <ul style="list-style-type: none"> • Chimneys throughout the District should be constructed of brick. • Clay chimney pots • •
<p>Rainwater goods</p>	 <ul style="list-style-type: none"> • Gutters and downpipes should be in painted metal (normally black)

7.4 Detailed guidance

The design of individual elements of the building façade including the windows, doors and the building's roof play a significant part in defining the character of a building and the wider settlement.

This section provides a set of simple rules for the detailed design of windows, dormers, roofs, doors and porches, decoration and external boxes. These apply to all new homes across the District.

7.4.1 Windows

General

Windows make a fundamental contribution to the character and appearance of buildings and settlements more widely. Guidance on the general arrangement and proportions of windows within the façade (solid / void relationships) is contained in section 7.2 and relates to the character of the building, whether formal/classical or informal/cottage style.

- The design of individual windows should be a response to building character
- Window details must match / be consistent on all elevations
- Slim line double glazing should be used
- There should be no frosted glass on any principal elevation
- Glazing bars should be structural and no ornamental plastic strips will be accepted

Casement:

- Casement windows should be side-hung, flush fitting and balanced casement widths
- The height of individual windows should always be the same or greater than their width
- Window openings wider than 450mm should be divided vertically and equally, by stone or timber mullions
- The frame on the hinge side should normally be fixed to a wall or a substantial vertical framing member/ mullion
- Windows frames should be timber or metal in Conservation Areas and other sensitive locations
- Single casement windows should not be used

Consistent window details, Upper Heyford

Casement window flush with wall, Bletchingdon

Sash:

- Sash windows must be vertical sliding with the upper and lower sash equal, and together filling the whole opening height
- Windows heights should be greater than their widths, with proportions in line with the Golden Section i.e. a ratio of approximately 1:1.618
- Windows frames should be painted timber in Conservation Areas and other sensitive locations

Recesses, cills, lintels and arches:

- Window recesses should normally be about 100mm.
- To achieve good visual contact between buildings and streets, window cill heights should not normally be more than:
 - 600mm above floor level in ground floor areas or living/dining areas at first floor level
 - 800mm above floor level in upper floor areas
- Flush cills are required (double cills are not acceptable)
- Stone and timber lintels are preferred (timber for casement windows in vernacular buildings), but brick faced lintels may also be used
- Where timber lintels are used they should be integral to the building (they should be a minimum of 150mm deep and have a 215mm margin at the edge of the window)
- Brick gauged flat arch or stretcher soldier arch are acceptable. On end brick lintels are not acceptable, neither are arched headers unless they are traditionally detailed
- Stone drip moulding may be used on stone lintels, where traditionally detailed

Sash window, Woodstock

Sash window, Bloxham

Dormer windows:

- Well-proportioned slim profile dormers should be used and be of a smaller scale than the lower windows of the elevation. Their construction must be integral with the main roofs
- Dormers should be located in one of three positions on the roofs:
 - at or below half-way up the roof slope (packed off one of the purlins), with the ridge of the dormer well below the main ridge of the house
 - at the eaves, aligned to the internal wall
 - at the eaves, aligned to the external wall face
- Gabled dormer roofs are preferred. Pitched roofs must be at least 40° to the horizontal. The facing material of the pitch should match the main roof of the relevant building. The cheeks and gable (if gabled) should be of roughcast render or lead
- The dormer cheeks should slim
- The windows themselves should be flush fitting, side-hung timber, two-light casements
- Flashing should be minimised and well detailed to ensure water runoff
- No glass reinforced plastic (GRP) to be used

Figure 7.3 Dormer window locations

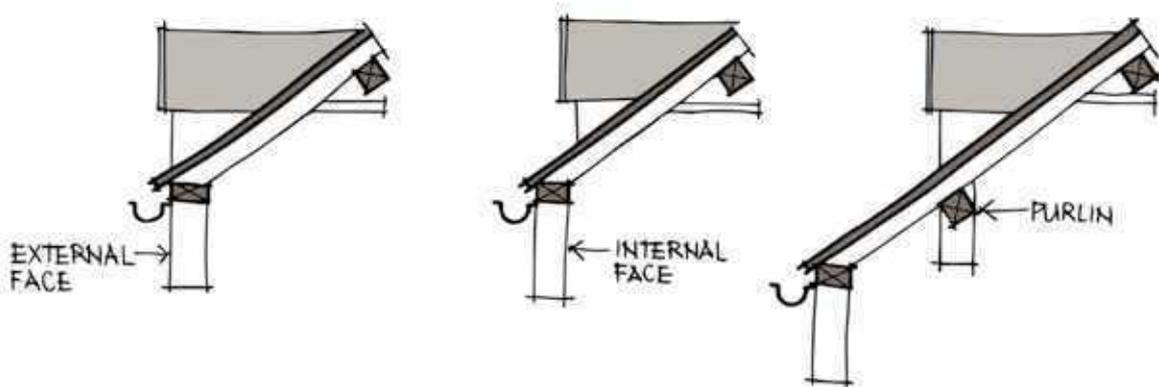

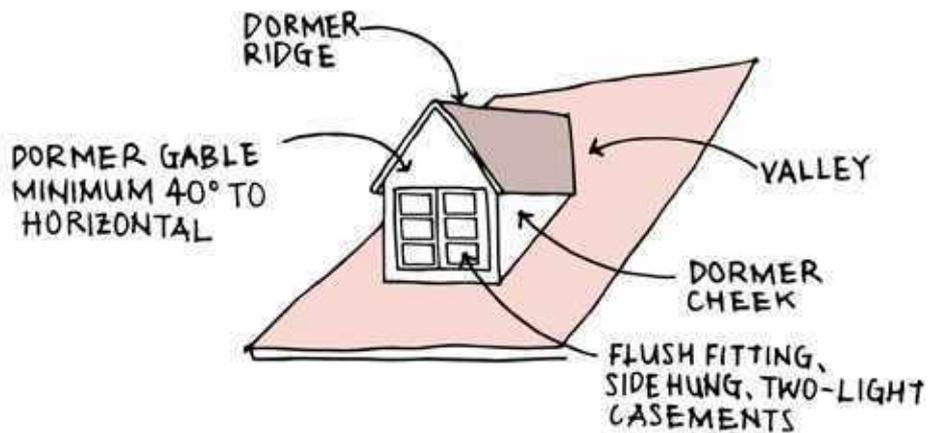

Figure 7.4 Annotated diagram of a dormer window

Rooflights:

- Rooflights are not acceptable on the front or principal elevation
- They should be flush between rafters
- Where used they should be parallel to the roof surface, with a vertical emphasis and modest in size (not normally more than 900mm in either dimension). They should be fully surrounded by roof tiles or slates
- Rooflights should be framed in wood or metal

Good examples of modern dormer windows, pitched roofs, slate tiles and brick chimneys, Woodstock

Small rooflights on rear elevation, South West Bicester

Sustainability exemplar

The size, type and arrangement of windows in relation to the path of the sun and prevailing winds can have a significant impact on the need for heating and lighting. Where appropriate to the character of the building and street, habitable rooms and larger windows should be located on south east, south west or south facing elevations. The northern side of the building is more suitable for service and storage areas, with smaller windows to reduce heat loss.

In sustainability exemplars, to maximise the potential for passive solar gain, the arrangement of rooms and building form may need to shift away from the traditional arrangement.

Chapter 8 provides further information on these aspects.

7.4.2 Roofs

Roof pitch angles and arrangements:

- Roofs must be pitched at least 40° to the horizontal with the ridgeline generally running parallel to the principal elevation
- Gables should have a narrow form where visible from the public realm
- Hipped roofs are generally not acceptable
- In the case of very deep buildings where there is substantial usable accommodation within the roof space, the central part of the roof (at least 4.5m back from the gutters) may be virtually flat – with only enough slope to allow rainwater to drain
- Garages and other outbuildings should have pitched roofs wherever possible
- Projecting gables can be used occasionally. They must be narrow in profile

Roof materials:

- Roofs should be of clay tiles or grey roof slates. Thatch and stone slates are also locally characteristic
- Profiled concrete tiles are not acceptable
- Tile hanging and timber boarding is not appropriate on gables.
- Photovoltaic panels and tiles will be appropriate in many locations. See Chapter 8 for further information

Roof verge and eaves treatments:

- Roof verges should be kept very simple, with a mortared edge and no overhang. No fascias or bargeboards should be used
- Eaves should be 'clipped' i.e. simply pointed with mortar, with minimal or no overhang and no soffits or fascias. Gutters should be as tight as possible to the wall face
- Occasional copings / parapet walls can be found in the district
- Gutters and downpipes should be in painted metal (usually black)
- No upvc clip edges on verges or gables

Steeply pitched roof with no overhang, Bletchington

Inappropriate use of upvc clip edges, and fascias to gable

Guttering, South West Bicester

Chimneys and their locations:

- Chimneys are an important feature because they punctuate the skyline, articulate the roofline and therefore form an important component in the character of streets
- They should be of brick masonry construction and integral to the building (both in terms of construction and location)
- Working chimneys are preferred either providing a route for smoke or effluent from open fires or boilers or for mechanical ventilation, or acting as a termination of soil vent pipes
- They should be rectangular in form, located at the edge of the ridgeline and central to the gable
- They should project a minimum height of 1m above the ridgeline, with proportions relating to the overall scale of the host building and adjacent structures
- Windows or doors should not be located below a chimney
- Clay chimney posts should be used

Rectangular brick chimney at edge of ridgeline and central to gable, Bloxham

Rectangular brick chimney at edge of mid-terrace dwelling, central to gable, Adderbury

7.4.3 Doors and porches

Doors:

- All external doors should be in painted timber with a simple, well-proportioned design appropriate to the type and character of the property. For buildings of a formal character either four or six panelled design is appropriate, while timber ledge, braced or boarded designs are in keeping with a more informal, cottage style
- Large glass panels and mock fan-lights should be avoided
- Doors should be recessed into the wall by at least 50mm
- Door furniture should be simple, functional and in keeping with the character of the building
- Side lights to doors are discouraged

Flat porch, Adderbury

Porches:

- Porches should be in proportion with the building façade. Wide porches which cover an area larger than the front door itself will in most cases be unacceptable
- They should be open to the front and sides so that they are effectively just a canopy
- Simple porches should comprise a hood with a gabled or flat form projecting over the door, supported by timber brackets
- Larger porches should be supported by posts, but be in keeping with the size of building and context
- The height of porch roof eaves should line up with the top of the relevant door frame
- Blind walls to the street with entry to the side are not acceptable
- Pitched porch roof materials must match the main roof material
- No fibreglass, plastic or glass reinforced plastic to be used

Simple gabled porch, Chesterton

Unsuccessful example of plastic faux-tile porch, Banbury

7.4.4 Decoration

- Decoration is generally not acceptable on most buildings and is not characteristic of the simple vernacular architecture of the District
- Where decoration is used it must be traditionally detailed, functional and have a clear purpose
- Where decorative features are used on key buildings to emphasise their importance, these should take their design cues from the surrounding area

7.4.5 Services

- The visual impact of boxes, vents and flues should be considered at a layout stage to ensure these features do not negatively impact on the public realm
- Vents and flues should not be located on the front facade
- Electric and gas meters should, wherever possible, be located as close to the ground as possible on side or secondary elevations where they are not visible from the public realm. For terrace properties where this is not possible, boxes should be installed at a low level, preferably behind a wall or planting
- The choice of box colour should consider the walling material and location. It is not possible to subtly match the colours, black should be the default

Subtle brick decoration

Simple hood mould decoration

Localised brick detail around doorways

8 INNOVATION AND SUSTAINABILITY

- 8.1 Sustainability and urban form**
- 8.2 Layout considerations**
- 8.3 Sustainable design and construction**
- 8.4 Sustainable technology**

CDC is a forward thinking Council which encourages innovations in design and construction to deliver higher levels of sustainability. The district has been leading the field in sustainability through the eco-town exemplar project at North West Bicester and is promoting the UK's largest self-build project at Graven Hill.

'Cherwell – safe, green, clean' is a priority of the Cherwell Business Plan 2017-18. There is a need to cut carbon, and since buildings make up 40% of carbon use, it is essential to use sustainable sources of energy and building technologies. New homes also need to be built to withstand less predictable and more extreme climatic conditions in the future. Other important considerations include water management, ecology, resource consumption and pollution, together with the wider social and economic aspects of sustainability.

Theme Three: Policies for Ensuring for Sustainable Development of the Cherwell Local Plan Part 1 2015 sets out the Council's strategy for ensuring that the impact of development on the District's environment is reduced, including taking steps to progressively reduce reliance on meeting energy needs from fossil fuels. Policies ESD 1 – ESD 17 deal with the Council's response to climate change including renewable energy and decentralised energy provision, sustainable construction, sustainable flood risk management and green infrastructure. Policy ESD 3: Sustainable Construction expects:

'All new residential development...to incorporate sustainable design and construction technology to achieve zero carbon development through a combination of fabric energy efficiency, carbon compliance and allowable solutions in line with Government policy.'

This chapter provides further information on these topics but does not set out specific guidelines as to how you develop homes with higher levels of sustainability; this is a rapidly changing field and the principles vary depending on the type of development. Rather, this chapter provides overarching principles and inspiration, setting out key issues which must be considered by all developments in the District. It forms a precursor to the planned Sustainable Buildings in Cherwell Supplementary Planning Document.

New development in Cherwell should:

- Consider sustainability objectives at the masterplan, plot and building scale
- Incorporate innovation in a manner which reinforces the principles of good urban design
- Create robust places which can adapt to future changes in the way we live and use technology
- Create healthy buildings which provide a safe and comfortable environment for their inhabitants

New development should avoid:

- Incorporating innovations without fully considering the wider impacts on masterplan layout and character of place
- Ostentatious architecture that does not sit comfortably with its context
- Weakening the fundamentals of good urban design for the sake of innovation

Please refer to the following chapter for supporting information:

- **Chapter 2:** For a summary of the District's distinctive characteristics and character areas
- **Chapter 3:** For details of how site analysis should be undertaken to inform the masterplan
- **Chapter 4:** For details of how a robust masterplan structure should be established
- **Chapter 5-6:** For the fundamental urban design principles for street and plot design.

8.1 Sustainability and urban form

Consideration of sustainability is integral to good masterplanning and architectural design. The fundamental principles of sustainability should be embedded in all build programmes in the District.

To deliver Local Plan policy objectives, it is expected that sustainability will be considered at all stages of the design process from masterplanning to detailing. Sections 8.2 – 8.4 summarise the key issues to be considered.

The majority of development schemes will be expected to closely follow the guidance of chapters 4-7 reflecting the vernacular tradition of Cherwell. Sustainable building technologies should be incorporated in a sensitive manner without detriment to the architecture or street scene.

CDC actively promotes schemes which deliver exemplary levels of sustainability as at Bicester Eco-town. CDC recognises that innovative, non-traditional architecture and street typologies may be an appropriate design response in these circumstances.

Where innovation leads to deviation from chapters 4-7 of the Design Guide, CDC will agree bespoke design solutions with scheme promoters which are nonetheless compatible with the wider character of the district and are of an exceptional urban, landscape and architectural design standard. Additional time and investment will be required to develop the design in consultation with the Council.

Non-traditional architecture should have a sense of belonging to Cherwell and should draw on the key characteristics of traditional streets and buildings in the district, such as:

- the use of a simple palette of local building materials
- simple, non-fussy architecture and building typologies
- the arrangement of buildings in a terrace providing a strong frame to the street

Modern architecture does not have to be ostentatious. While it is appropriate for landmark buildings and others which make a significant contribution to the fabric of a place to stand out, the majority of buildings should be polite and sit comfortably together. In all schemes, the core principles of good urban design must still apply. For example, CDC will expect layouts to follow the principles of the perimeter block (see section 6.3) with buildings fronting onto streets and spaces and a clear definition of public/private boundaries, regardless of the architectural character or street orientation.

Sustainable exemplars therefore can be more expensive to deliver both in terms of time spent developing the design in consultation with the council and the use of high quality materials and detailing creating a more expensive build cost. However, there are many long term benefits from this approach including increased fuel efficiency, balancing these costs over the life-cycle of a building.

Zero carbon terrace, Upton, Northampton

8.2 Layout considerations

The masterplan layout has a fundamental impact on the sustainability of the scheme.

Site location

A sustainable approach to site allocation is embodied in the policies of the Local Plan and tested through the Sustainability Appraisal process.

Environmental and climate factors such as flood risk, and the potential impact of development on biodiversity and landscape assets are assessed together with social and economic sustainability considerations.

The location of development has a significant impact on how a place will function in the future and the impact of development on the environment.

- Locating development in proximity to existing community facilities, town centres and employment areas assists in reducing the need to travel by vehicle for day to day activities, as does the creation of new places with sufficient scale and diversity to generate the need for new local centres and services
- Tying into existing public transport routes, walking and cycling networks also supports a shift towards more sustainable modes of travel and reduced energy consumption

Multi-functional green corridor.

Masterplan

Chapter 4 explains how the structuring principles of the masterplan should be established, following robust urban design principles to deliver new places which have long lasting sustainability. These principles should be followed by all new developments.

Where the vision is for a sustainable exemplar with high levels of energy efficiency, it is recognised that this will have an influence on the urban form of the masterplan and the design of individual buildings.

The key considerations for sustainability include:

Land use mix

- Providing a mix of different sizes and tenures of homes, and non-residential uses within walking distance to encourage social interaction and community cohesion, and to reduce the need to travel for daily essentials (see section 4.3)
- Avoiding urban sprawl by making efficient use of the site. Higher density schemes generate demand for public transport and local facilities. Terrace homes and apartments are inherently more energy efficient than detached homes. (see section 4.8)
- Creating flexibility within the masterplan for uses to change and places to adapt over time
- Considering the potential to use modern methods of construction to reduce waste arising from construction and improve the energy performance of homes. Implications should be considered at the masterplan stage, for example: modular construction may limit the available building typologies and their arrangement
- Considering the incorporation of sustainable energy strategies such as Combined Heat and Power and ground source heat pumps and the implications these technologies have on density and land use mix

Movement

- Creating a connected, permeable street layout which encourages walking, cycling and the use of public transport rather than use of private cars (see section 4.4-4.5)
- Connecting new places into the existing movement network of the surrounding area (see section 4.6)
- Providing appropriate levels of cycle parking and safe and convenient cycling routes to encourage cycling for medium length journeys (see section 5.4)

- Incorporating infrastructure for electric vehicles. Every home should have access to at least one electric charging point and 20% of spaces in public car parks should have electric charging points (see section 5.8) unless a car free development is proposed
- Considering the potential for low car or car free developments and the impact of these on street typologies and car parking arrangements including the use of car clubs
- Considering the implications of emerging transport technologies such as autonomous vehicles on street design and the provision of car parking

Electric vehicle charging point.

Green roof

Green infrastructure

- Retaining and incorporating existing hedgerows, trees and other landscape features as part of a connected blue-green infrastructure network across the site (see section 4.7)
- Planning sustainable drainage features early-on, to allow sufficient space within the masterplan and considering the implications for street design and character. For example: street swales will increase the width of the street and may need to be balanced by taller building to create an appropriate sense of enclosure (see section 4.7)
- Using sustainable methods to manage landscape features for example: using greywater collection for irrigation and solar energy for irrigation pumps

Microclimate - wind

- Avoiding exposure to strong north or north westerly winds or the creation of wind tunnels by careful consideration of street alignment and avoiding localised strong winds created by individual buildings which are much taller than their neighbours
- Using existing landscape features such as tree belts and hedges or the planting of street trees, tree belts, shrubs and grassland to provide shelter from strong winds and to moderate extremes of temperature through evaporative cooling

Microclimate - sun

- Considering the impact of street orientation and street proportions on the natural day lighting/shading and temperature of buildings, gardens and public spaces. Streets with a 1:1.5 to 1:3 height to width ratio allow for good natural daylighting and pleasing proportions (see section 5.3)
- Planting deciduous tree species to offer shading to buildings and public spaces in summer and allow sunlight in during the winter
- Considering the impact of street and building orientation on the potential to harness solar energy using photovoltaic panels. Orientating roofs within 15-20 degrees of due south maximises the potential for light and solar gain (see section 4.9). In sustainable exemplars this may be a key driver for the masterplan street layout
- Considering future changes in temperature and the impact this will have on choice of planting and materials within the public realm

8.3 Sustainable design and construction

Policy ESD 2: Energy Hierarchy and Allowable Solutions of the Cherwell Local Plan Part 1, 2015 sets out an ‘energy hierarchy’ to achieve carbon emissions reductions. At the top of the hierarchy is the need to reduce energy use, in particular by the use of sustainable design and construction measures.

Building form

The building typology and layout of homes has a significant impact on their performance, for example:

- Apartment and terrace buildings have a greater thermal mass than detached buildings and have reduced external walls area to floor area, which help to moderate temperatures fluctuations and minimise heat loss
- All homes should be designed to allow natural cross ventilation and cooling in summer, for example: dual aspect apartments with opening windows on front and rear elevations; higher floor to ceiling heights and the use of high level vents to allow hot air to rise and be expelled and cool air to be drawn in at low level
- The arrangement of rooms and windows should consider the path of the sun and prevailing winds to reduce the need for artificial lighting, heating and cooling, for example by locating living rooms

and larger windows on the warmer southern aspects, and minimising windows on cooler/ exposed aspects

- Windows should be double or triple glazed and incorporate shutters or louvres to regulate solar gain and provide additional insulation
- Green roofs and walls should be incorporated where appropriate to provide insulation, water management and biodiversity benefits

Passivhaus

All schemes should consider the potential to deliver Passivhaus buildings. A Passivhaus is a super-insulated and airtight building, which does not need heating other than from solar gains, people using the building and appliances. It is fitted with a Mechanical Ventilation Heat Recovery unit (MVHR), which ensures there is always fresh air at room temperature. The MVHR can be fitted with an electric heater for top-up heat. Passivhaus use only 10% of the heating energy compared to conventional new builds. Windows can be opened and the buildings are known for high room comfort and good air quality.

Further information on Passivhaus specification and certification is available from the Passivhaus Trust at <http://www.passivhaustrust.org.uk/>.

Larch House, Ebbw Vale is the UK's first zero carbon (code 6), low cost, Certified Passivhaus.

Building fabric

The concept of embodied energy (or more specifically embodied carbon) considers the greenhouse gas emissions which are created during the life cycle of a material for example during extraction, manufacturing, transportation, installation and demolition.

In choosing building materials, embodied carbon should be considered (together with pollution impacts) alongside the carbon savings arising from the performance of the material in the home.

Considerations include:

- Re-using and refurbishing existing buildings, rather than demolition and new build
- The use of recycled and reused materials including locally reclaimed bricks, reclaimed roof slates and tiles, and recycling or reusing waste products arising from demolition and construction on site
- The use of locally sourced materials to reduce the energy expended in transporting materials, to support the local economy and to maintain the traditions of building in Cherwell (see section 7.3 for guidance on appropriate local materials)
- The use of cement substitutes in the manufacture of concrete blocks such as ground granulated blast furnace slag (GGBS) and recycled aggregate (RA) and recycled concrete aggregates (RCA) to replace quarried aggregate, or alternatives to concrete such as Ziegler clay blockwork to reduce embodied carbon
- The use of Modern Methods of Construction (MMCR) where elements (panels or 3D volumes) of the building fabric are manufactured off site in controlled factory conditions. The potential benefits include increased build efficiency, high energy performance products and quality assurance, reduced construction waste, construction time and impacts on site. MMCR covers a range of construction types including timber frame and Structural Insulated Panels (SIPS) which are lightweight but deliver high thermal performance
- Ensuring all timber used is from PEFC or FSC certified sources, ensuring responsible management of the world's forests

Modular construction factory, Ashford
(image courtesy of Brooke Homes)

Murray Street, London (source: Andrew Farrar, AJ Buildings Library)

8.4 Sustainable technology

The use of digital apps allowing users to control home heating while out of the home, and smart energy and water meters gives householders greater understanding and control over their daily energy and water consumption.

This smarter use of resources should be combined with the provision of energy in efficient and renewable forms, to deliver comfortable, low cost living environments.

CDC's energy hierarchy promotes the following strategies in the order listed below:

- Supplying energy efficiently and giving priority to decentralised energy supply
- Making use of renewable energy
- Making use of allowable solutions (further details of this are to be set out in the Sustainable Buildings in Cherwell SPD and Local Plan Part 2)

Decentralised energy

Local Plan Policy ESD 4 provides details of the use of decentralised energy systems either District Heating (DH) or combined heat and power (CHP) systems, to increase the efficiency of energy distribution. Scheme promoters should refer to The Renewable Energy and

Local Carbon Map, Local Plan Part 1 Appendix 5 for locations with potential for decentralised heat supply in the district.

Combined Heat and Power (CHP)

CHP systems utilise the waste heat produced when fuel is burnt to generate electricity, to heat homes and water. In conventional power generation large quantities of energy in the form of heat are wasted. By using this technique, the total energy conversion efficiency can reach 90%.

CHP can use renewable fuel sources such as biomass (energy crop or organic waste product) or be gas-fired (non-renewable).

Traditionally CHP has been used at the district or community scale, and most effective in relatively dense, mixed use developments. Micro-CHP serving individual homes is now becoming a commercially viable alternative to the traditional gas central heating boiler, while also providing electricity.

In the longer term fuel cell technology which generates electricity and heat directly through the combining of hydrogen and oxygen, could be used for micro-CHP.

Solar energy capture on homes of traditional and modern design, Villers Road, London (source: Architects Journal)

Renewable energy sources

Alongside biomass CHP, solar, wind and ground source heat pumps should be considered as potential sources of renewable energy.

Solar

Solar energy is captured using PV cells or solar water heating panels and require a south facing, unshaded roof.

- Photovoltaic (PV) cells use light to generate electricity and often directly feed electricity into the building. With the latest PV technology, cells can also be integrated into the roof tiles themselves, minimising visual impact. The cells can be grid connected, off-grid or hybrid and groups of solar PV cells can be added together to provide increasing levels of power
- Solar water heating panels uses the radiation from the sun to heat water which can supply that heat either as hot water or into a central heating system. If the system has been sized correctly, it can provide at least 40-60% of all household hot water requirements throughout the year. Unfortunately the demands on the central heating system are at their highest when the sun is weakest so a solar heating system will only contribute to part of a household's heating energy requirements

Wind

Wind turbines may be appropriate to generate electricity for individual or small numbers of dwellings in rural areas, subject to appropriate siting of the turbine away from dwellings and careful consideration of wider visual impact. In urban areas, they are unlikely to offer a viable form of energy generation.

Ground and Air source heat pumps

Ground source heat pumps utilise the constant below ground temperate and transfer heat from below the frost line into the building. They are effective in combination with low energy heating systems such as underfloor heating.

Air source heat pumps use the same principle but extract the heat from the air, rather than the ground. Their installation is much simpler and cheaper but the available heat is not constant and limited in winter months.

These systems require electricity to drive them, but in an efficient system where the heat gained is significant, one kilowatt of energy can generate three kilowatts of heat. The pumps have fewer mechanical parts than conventional heating systems, making them durable and more reliable. They also do not require external venting as fossil fuel systems do, so they do not pollute the air.

Water management

Use of water in the home from the mains should be minimised in all developments utilising approaches including:

- The fitting of low flow water goods
- Retention of roof water, for example through green roof systems and water butts
- Rainwater harvesting from roofs and grey water recycling which can be used for irrigation and toilet flushing, amongst other things
- Recycling of grey water through dual plumbing systems
- Recycling of black water is also an option through biological solutions

Street and roof orientation optimised for PV effectiveness, NW Bicester.

Appendix B: Local Plan Part 1, Policy ESD 15

Successful design is founded upon an understanding and respect for an area's unique built, natural and cultural context. New development will be expected to complement and enhance the character of its context through sensitive siting, layout and high quality design. All new development will be required to meet high design standards. Where development is in the vicinity of any of the District's distinctive natural or historic assets, delivering high quality design that complements the asset will be essential.

New development proposals should:

- Be designed to deliver high quality safe, attractive, durable and healthy places to live and work in. Development of all scales should be designed to improve the quality and appearance of an area and the way it functions
- Deliver buildings, places and spaces that can adapt to changing social, technological, economic and environmental conditions
- Support the efficient use of land and infrastructure, through appropriate land uses, mix and density/development intensity
- Contribute positively to an area's character and identity by creating or reinforcing local distinctiveness and respecting local topography and landscape features, including skylines, valley floors, significant trees, historic boundaries, landmarks, features or views, in particular within designated landscapes, within the Cherwell Valley and within conservation areas and their setting. Conserve, sustain and enhance designated and non designated 'heritage assets' (as defined in the NPPF) including buildings, features, archaeology, conservation areas and their settings, and ensure new development is sensitively sited and integrated in accordance with advice in the NPPF and NPPG. Proposals for development that affect non-designated heritage assets will be considered taking account of the scale of any harm or loss and the significance of the heritage asset as set out in the NPPF and NPPG. Regeneration proposals that make sensitive use of heritage assets, particularly where these bring redundant or under used buildings or areas, especially any on English Heritage's At Risk Register, into appropriate use will be encouraged (see chapter 3/ Conservation Area Appraisals)
- Include information on heritage assets sufficient to assess the potential impact of the proposal on their significance. Where archaeological potential is identified this should include an appropriate desk based assessment and, where necessary, a field evaluation (see chapter 3/ Conservation Area Appraisals)
- Respect the traditional pattern of routes, spaces, blocks, plots, enclosures and the form, scale and massing of buildings. Development should be designed to integrate with existing streets and public spaces, and buildings configured to create clearly defined active public frontages
- Reflect or, in a contemporary design response, re-interpret local distinctiveness, including elements of construction, elevational detailing, windows and doors, building and surfacing materials, mass, scale and colour palette
- Promote permeable, accessible and easily understandable places by creating spaces that connect with each other, are easy to move through and have recognisable landmark features
- Demonstrate a holistic approach to the design of the public realm to create high quality and multi-functional streets and places that promotes pedestrian movement and integrates different modes of transport, parking and servicing. The principles set out in The Manual for Streets should be followed
- Consider the amenity of both existing and future development, including matters of privacy, outlook, natural lighting, ventilation, and indoor and outdoor space Limit the impact of light pollution from artificial light on local amenity, intrinsically dark landscapes and nature conservation
- Be compatible with up to date urban design principles, including Building for Life, and achieve Secured by Design accreditation
- Consider sustainable design and layout at the masterplanning stage of design, where building orientation and the impact of microclimate can be considered within the layout
- Incorporate energy efficient design and sustainable construction techniques, whilst ensuring that the aesthetic implications of green technology are appropriate to the context

- Integrate and enhance green infrastructure and incorporate biodiversity enhancement features where possible (see Policy ESD 10: Protection and Enhancement of Biodiversity and the Natural Environment and Policy ESD 17 Green Infrastructure). Well designed landscape schemes should be an integral part of development proposals to support improvements to biodiversity, the micro climate, and air pollution and provide attractive places that improve people's health and sense of vitality
- Use locally sourced sustainable materials where possible.
- The Council will provide more detailed design and historic environment policies in the Local Plan Part 2.
- The design of all new development will need to be informed by an analysis of the context, together with an explanation and justification of the principles that have informed the design rationale. This should be demonstrated in the Design and Access Statement that accompanies the planning application. The Council expects all the issues within this policy to be positively addressed through the explanation and justification in the Design & Access Statement. Further guidance can be found on the Council's website.

Appendix C: List of Conservation Areas (2017)

Adderbury	Rousham (includes Lower and Upper Heyford)
Ardley	Shenington with Alkerton
Balscote	Sibford Ferris
Banbury	Sibford Gower and Burdrop
Banbury Grimsbury	Somerton
Barford St John	Souldern
Barford St Michael	South Newington
Begbroke	Steeple Aston
Bicester	Stratton Audley
Bletchinghamdon	Swalcliffe
Bloxham	Tadmarton
Bodicote	Wardington
Charlon-on-Otmoor	Weston on the Green
Chesterton	Wigginton
Cottisford	Williamscot
Cropredy	Wroxton
Deddington	
Drayton	
Duns Tew	
Fewcott	
Fritwell	
Hampton Gay, Shipton on Cherwell & Thrupp	
Hampton Poyle	
Hanwell	
Hethe	
Hook Norton	
Horley	
Hornton	
Islip	
Juniper Hill	
Kidlington: Church Street, High Street, The Rookery, Crown Road, Langford Lane Wharf	
Kirtlington	
Milton	
Mixbury	
Mollington	
North Aston	
North Newington	
Oxford Canal	
RAF Bicester	
RAF Upper Heyford	

Appendix D: Countryside Character Areas, settlement classification

Cherwell Valley

Claydon, Clifton, Cropredy, Great Bourton, Little Bourton, Lower Heyford, Middle Aston, Nethercote, North Aston, Northbrook, Somerton, Steeple Aston, Upper Heyford, Wardington, Willamscot.

Ironstone Downs

Adderbury, Alkerton, Balscote, Barford St John, Barford St Michael, Bloxham, Bodicote, Broughton, Burdrop, Deddington, Drayton, Duns Tew, Epwell, Hanwell, Hook Norton, Horley, Hornton, Lower Tadmarton, Milcombe, Milton, Mollington, North Newington, Shenington, Shutford, Sibford Ferris, Sibford Gower, South Newington, Swalcliffe, Upper Tadmarton, Wigginton, Wroxton.#

Ploughley Limestone Plateau

Ardley, Bainton, Bletchingdon, Bucknell, Caulcott, Caversfield, Chesterton, Cottisford, Fewcott, Finmere, Fringford, Fritwell, Godington, Hardwick, Hethe, Juniper Hill, Kirtlington, Little Chesterton, Middleton Stoney, Mixbury, Newton Purcell, Souldern, Stoke Lyne, Stratton Audley.

Clay Vale of Otmoor

Ambrosden, Arncott, Begbroke, Blackthorn, Bunkers Hill, Charlton-on-Otmoor, Enslow, Fencott, Gosford, Hampton Gay, Hampton Poyle, Horton-cum-Studley, Islip, Launton, Merton, Murcott, Noke, Oddington, Piddington, Shipton-on-Cherwell, Thrupp, Wendlebury, Weston-on-the-Green, Yarnton.

Appendix E: Net density calculation

Net density is calculated by including only those site areas which will be developed for housing and directly associated uses.

This would normally include the following uses:

- Access roads within the site
- Private garden space
- Car parking areas
- Incidental open space and landscape
- Children's play areas (where these are to be provided)

Net density normally excludes:

- Major distributor roads
- Primary schools
- Open spaces serving a wider area
- Significant landscape buffer strips

Appendix F: Residential Road Design Guide, OCC, Appendix A6 Parking standards for the City & Districts

A6.B – Cherwell Urban Areas Parking Standards

The parishes, which define the urban areas in Cherwell are:

- i. Banbury,
- ii. Bicester,
- iii. Kidlington,
- iv. Bloxham,
- v. Bodicote,
- vi. Adderbury,
- vii. Yarnton
- viii. Gosford & Water Eaton.

The car parking provision in new developments for the urban areas in Cherwell area are set out in Table A6.B1.

Number of bedrooms per dwelling	Number of allocated spaces	Number of spaces when 2 allocated spaces per dwelling are provided		Number of spaces when 1 allocated spaces per dwelling are provided		Number of unallocated spaces when no allocated spaces are provided
		Allocated spaces	Unallocated spaces	Allocated spaces	Unallocated spaces	
1	1	N/A	N/A	1	0.4	1.2
2	2	2	0.3	1	0.6	1.4
2/3	2	2	0.3	1	0.7	1.5
3	2	2	0.3	1	0.8	1.7
3/4	2	2	0.4	1	1.0	1.9
4+	2	2	0.5	1	1.3	2.2

Note 1: The rows in the table for 2/3 bedrooms and 3/4 bedrooms can be used when there are additional rooms in the dwelling which are not shown as bedrooms but where there is a high chance that they could be used as bedrooms.

Note 2: The Council will consider North West Bicester Ecotown as a special case provided that certain minimum criteria are met. If there is a full range of every day services provided within easy walking or cycling distance of the dwelling and convenient access to an efficient public transport system accessing a wider range of services including employment, one allocated car parking space per dwelling will be required, regardless of dwelling size or tenure. This may be on plot or off plot. Off plot provision may be grouped in a parking court provided the courts are small, close by, secure and conveniently accessed. Additional unallocated off plot car parking may also be provided according to the principles of this document up to a maximum of one space per dwelling. A lower standard of parking may be acceptable dependent upon the layout and accessibility to services and to other modes of transport in agreement with the Highway Authority.

A6.C – Parking Recommendations for all Other Areas in Oxfordshire (Other than Oxford and Cherwell Urban Areas)

Car parking provision recommendations for all other areas of Oxfordshire (other than Oxford and Cherwell Urban Areas) are set out in Table A6.C1.

Table A6.C1 Car parking Provision in New Developments for all Areas of Oxfordshire (Other than Oxford and Cherwell Urban areas)						
Number of bedrooms per dwelling	Number of allocated spaces	Number of spaces when 2 allocated spaces per dwelling are provided		Number of spaces when 1 allocated spaces per dwelling are provided		Number of unallocated spaces when no allocated spaces are provided
		Allocated spaces	Unallocated spaces	Allocated spaces	Unallocated spaces	
1	1	N/A	N/A	1	0.4	1.2
2	2	2	0.3	1	0.6	1.4
2/3	2	2	0.3	1	0.8	1.6
3	2	2	0.4	1	0.9	1.8
3/4	2	2	0.5	1	1.1	2.1
4+	2	2	0.6	1	1.5	2.4

Note: The rows in the table for 2/3 bedrooms and 3/4 bedrooms can be used when there are additional rooms in the dwelling which are not shown as bedrooms but where there is a high chance that they could be used as bedrooms.

Appendix G: Cherwell Design Initiative

The Design Guide is an important document in establishing a positive design agenda across the District. It cannot in isolation secure high quality design across the district, but needs to work in combination with other programmes if good quality design is to be secured. This includes:

- i. Design Training
- ii. Development Audit
- iii. Use of Design Review Panels
- iv. Use of Design Coding
- v. Use of Developers Briefs

i. Design Training of Planners and Elected Members

Equipping planners and members of the planning committee with the skills to confidently comment and negotiate on planning applications in the planning process is critical to the success of the Guide. Regular training will be provided to planners and elected members on key issues to ensure the optimal use of the Design Guide.

ii. Development Audit

The Guide has been written to promote high quality design principles, but also to reflect the development challenges that CDC face as a Local Planning Authority. A development audit will take place every two years to review the quality of development and consider whether changes to the Guide are required.

iii. Design Review

The use of Design Review Panels provides a forum where the design principles, masterplans and design details can be tested with a range of independent experts. Design review can help to achieve high standards, by testing the design principles that are embedded within the scheme, to ensure that these are fit for purpose and that the development is in the right place and responds well to its surroundings. Design review is referred to in paragraph 62 of the National Planning Policy Framework. This says that local authorities should have local design review arrangements and that they should give weight to the findings of design review panels.

Design review:

- Makes it easier to resolve design issues in the planning process
- Can help to improve the design of a project; identifying ways to make it function better and be more user-friendly
- Helps to achieve consensus around design objectives, and offers ways of engaging with interested parties e.g. highways officers, politicians and communities
- Offers a fresh perspective, providing solutions to seemingly intractable design issues
- Can help to address the viability question. In some cases projects can be simplified through more efficient design solutions or improved design can unlock higher sale or rental values

At CDC we have promoted the use of design review Panels on many schemes and the feedback has been positively received by developers, members and planners. One of its main benefits is its independence, supporting a dialogue which is isolated from the on-going negotiation between Officers and Developers. It helps all parties stand back from the development process to take stock. It has been a useful tool to help applicants and planners to promote good design and identify poor design.

There are three design panels that we use:

- BOB MK: small scale local residential schemes
- Design South East: strategic local plan schemes
- CABE: regionally important sites, such as exemplar and town centre regeneration schemes

We are currently investigating the option for a Bicester Design Panel, which will provide specific guidance relevant to the Bicester Garden Town Agenda.

In all cases, panel members are drawn from a variety of fields, including urban designers, town planners, architects, landscape architects, developers, engineers and chaired by an experienced practitioner who ensures that the review remains focused at all times and that everyone is given the appropriate opportunity to participate.

Timing

The point in the design process when design review should be undertaken will vary according to the scale and nature of the project. For the majority of developments this will be part way through the design process, when the strategic design approach has been established, but before the detail has been fully resolved.

This approach provides time for the review to become a constructive part of the design process and allow for any issues raised by the panel to be thoughtfully integrated before a formal planning application is submitted. With the smaller scale projects such as the public buildings and private houses it might be more appropriate to use design review at the later stages of the design process.

Strategic projects - Outline:

- Design workshop as part of pre-app process
- Design review of application when it is validated
- Design review of final scheme, where significant changes were required to proposals

Strategic projects – Full / Reserve Matters:

- Design workshop as part of pre-app process
- Design review of application when it is validated
- Design review of final scheme, where significant changes were required to proposals

Major Sites:

- Design review when application is validated

Other Sites:

- Rural exception sites
- On a case-by case basis

iv. Design Codes

The objective of design codes is to provide a clear framework for development that is supported by all parties. This is particularly important on sites with multiple land holdings or where the site is likely to be constructed by several developers / house builders over the life of the scheme.

Design codes are particularly relevant to strategic development sites (over 300 units) where the requirement for design codes is conditioned in the approval of the Outline Application. For sites identified in the Cherwell Local Plan, this requirement is set out within site specific policies in the Cherwell Local Plan.

The Council see design codes as being important to:

- Establish a long term vision and design led framework for the site
- Build upon the work established by the outline planning application and the design and access statement for the area
- Ensure overall coordination and consistency between development sites
- Provide a level of certainty to the Landowner, Council, Developer and the community
- Provide a clear guide for developers working on individual plots and sets the context for more detailed design work.

It will be important that the codes establish the design principles in five areas:

- Vision and development framework
- Streets / movement network
- Public realm
- Urban form and morphology
- Materials and details.

Establishing the level of prescription for the codes will be important and clear performance criteria should be established for each development area, setting out the level of prescription alongside desired and mandatory requirements.

Design codes need to convey a lot of information and can often be complicated and difficult to understand to a third party. It is important that the format of the codes is clearly thought through at an initial stage and that early pages set out how the codes should be used / navigated. Good design codes make extensive use of plans, sections and 3D illustrations to set out the objectives for each area. Simple illustrations can often explain much more than words and photos.

Stages of design code production:

1) Establishing a Vision and Development Framework

The first stage should build upon the work already undertaken for the site such as the Illustrative Masterplan and Design and Access Statement. Many of the key principles such as the movement network, building heights and density will have already been set out by the Design and Access Statement for the site.

The key aspects to focus on at this stage are:

- Define the character areas
- Define special conditions within character areas
- Define what the features / areas are that provide continuity through the site (e.g. Streets / public realm / landscape)
- Define the character cues which will differentiate the character areas. These should build upon the character of the existing site and it is anticipated that the cues will generally reflect the 20th and 21st century rather than traditional villages.

2) Streets / Movement Network

Streets and public realm form will be important in establishing a broad character for the site. Streets and open spaces will cross different character areas and will be important in providing continuity across the site. Streets should be designed as key aspects of the public space. The nature and form of the streets will vary according to their connectivity. The design of open spaces will vary depending on their location on site and their function.

The key aspects are likely to be:

- Scale and setting of the street
- The movement network should be designed to be pedestrian and cyclist friendly to maximise sustainable forms of transport. This relates both to the overall street hierarchy down to design and detail
- Parking should be carefully considered and is likely to vary depending upon the site location, density and housing typology
- SUDS and drainage
- Materials and details (with emphasis on materials which support a public realm approach)

3) Public Realm

The character of the public realm form will help to establish a broad character for the site that crosses different character areas. The design of open spaces will vary depending on their location on site and their function.

The key aspects are likely to be:

- Scale and character of open space. Some spaces, especially near the school and local centre are likely to be formal in character while other spaces, such as areas dominated by SUDS and ecological features are likely to have a less formal character
- Landscape and planting
- Front threshold detail
- Private gardens.

4) Urban form and morphology

The way that buildings relate to one another is one of the most important aspects that can be used to define an areas character. The proportion, massing, shape and layout of buildings will be important elements of character. Other cues such as defining building lines, eaves heights, ridge heights, alongside the rhythm / spacing between buildings will be important in establishing formal or informal character cues.

The key aspects are likely to be:

- Urban form (relationship of buildings to one another)
- Building typology (terrace, detached etc.)
- Density
- Building lines (consistent or varied)
- Height / enclosure
- Roofscape (Roof form, consistent or varied eaves / ridge heights)
- Scale and proportion and the buildings and its fenestration (important for both urban form and detail).

5) Building Material and Detail

The materials and details are likely to vary in different areas of the site. We would expect a simple palette of materials to be established that will vary according to the character area and condition. The Council would support innovative construction approaches that further a sustainable approach to the development.

- Building detail (window arrangement and proportions, balconies etc)
- Building materials (for roof and main building fabric. This can also include materials that will not be acceptable)
- Scale and proportion and the buildings and its fenestration (important for both urban form and detail).

v. Planning Briefs

Planning briefs aim to assist in the redevelopment of sites by acting as a 'stepping stone' between the matters that will need to be addressed in any application for planning permission and the local policies contained in the Cherwell Local Plan. These documents are used to set out the council's vision and requirements for the development of a site /collection of sites. Planning briefs vary according to factors such as: the nature of the site; the location; the ownership of the site; and the political context.

A planning brief is generally produced for strategic, complicated and sensitive sites which require more detailed planning guidance. It is anticipated that these documents will provide consistent, quality guidance to developers, and thus improve the planning process and the quality of the final development.

Planning briefs are used in Cherwell to:

- Provide site specific guidance for the development of strategically important sites
- Set out the vision for development of an area
- Improving the quality of development.
- Improve the efficiency of the planning and development process; and
- Help promote the development of a difficult site, with complicated constraints and / or land ownership patterns

A planning brief provides more detail of development options and issues than Local Plan Policies, but does not alter policies in the local plan. A good planning brief should help to provide clarity in the development process; making it clear what is likely to be acceptable and what is unacceptable; where there is flexibility and where requirements are firm.

At Cherwell, planning briefs typically contain information on:

Site constraints

- Heritage and archaeology
- Hydrology and flooding
- Existing movement network
- Land ownership
- Landscape
- Services

Context

- Urban form and character
- Landscape structure
- Streetscape and public realm

Urban Design Issues

- Framework plan
- Uses
- Heights and massing
- Landmark features
- Public realm

1. INTRODUCTION

Purpose of this Document

- 1.1. The purpose of this Developer Contributions Supplementary Planning Document (SPD) is to set out Cherwell District Council's approach to seeking Section 106 planning obligations in the absence of a Community Infrastructure Levy (CIL) Charging Schedule within the District.
- 1.2. This guidance does not cover every possible circumstance and/or obligation that may need to be taken into account, but it provides a clear indication of the Council's essential requirements from new development in respect of the provision of infrastructure, community facilities and services. It will enable developers to understand planning obligation requirements and costs from an early stage in the development process and to make appropriate provision when formulating costs and undertaking financial appraisals.
- 1.3. Since the introduction of the Community Infrastructure Levy Regulations 2010 (as amended) ('CIL Regulations'), developers are expected to contribute towards the provision of infrastructure through a combination of mechanisms: paying a levy through CIL (if adopted at local level), S106 obligations, planning conditions and S278 highway contributions.
- 1.4. The CIL Regulations mean that since 6 April 2015 the use of Section 106 obligations has become more restricted, with the Council only able to pool a maximum of five separate obligations (entered into on or after 6 April 2010) for a specific infrastructure project or a type of infrastructure.
- 1.5. The CIL Regulations have recently been the subject of review by Central Government. The CIL Review Group was established by the former Communities Secretary and former Minister for Housing and Planning in November 2015. The purpose of the review was to *'Assess the extent to which CIL does or can provide an effective mechanism for funding infrastructure, and to recommend changes that would improve its operation in support of the Government's wider housing and growth objectives.'* The report was submitted to Government in October 2016 and published in March 2017. It is anticipated that an announcement on the Government's response to this review will be made in 2018.
- 1.6. The timing and scope of the Government's review is outside the control of the Council. The guidance in this document is therefore provided within the parameters of existing regulations and adopted local plan policies. The Council will, however, undertake to

review this guidance should it introduce a CIL Charging Schedule (or other infrastructure tariff in accordance with new government legislation) in the future.

- 1.7. Appendix 16 details the types of infrastructure that will be covered by S106 planning obligations and what will be covered by CIL if a CIL charging schedule is adopted by the Council in the future.

What are Planning Obligations?

- 1.8. A planning obligation is secured by either a deed of agreement or a unilateral undertaking made under planning legislation (Section 106 of the Town and Country Planning Act 1990 (as amended)) in association with a planning permission for new development. It is normally applied to aspects of development that cannot be controlled by imposing a planning condition or by the use of other statutory controls. Planning obligations are legally binding and enforceable if planning permission is granted. They also run with the land. They can cover almost any relevant issue such as types of infrastructure or services and future maintenance.
- 1.9. Planning obligations should only be used where it is not possible to address the unacceptable impact of development through a planning condition (NPPF¹, paragraph. 203).
- 1.10. In addition, CIL Regulation 122 states that the use of planning obligations should only be sought where they meet all of the following three tests:
 - They are necessary to make a development acceptable in planning terms
 - They are directly related to a development
 - They are fairly and reasonably related in scale and kind to the development.

What is CIL?

- 1.11. CIL is a tariff charged on new development that the Council can choose to adopt to support the provision of infrastructure. Once adopted CIL is fixed, non-negotiable and enforceable.
- 1.12. To introduce CIL the Council must set a CIL rate or rates in a Charging Schedule, and follow two stages of consultation and an Examination in Public prior to adoption and implementation of CIL. The Council has consulted on both a Preliminary Draft and Draft CIL Charging Schedule. Work has however since been 'paused' on CIL pending

¹ National Planning Policy Framework

the outcome of the Government's review of CIL. Further guidance from the Government is awaited.

Relationship between CIL and Planning Obligations

- 1.13. The Government currently intends CIL to provide for infrastructure to support development rather than specifically to make individual development proposals acceptable in planning terms. Government guidance indicates that site specific mitigation will still be sought through the use of planning obligations.
- 1.14. CIL Regulations 122 and 123 place limits on the use of planning obligations and makes the planning obligations policy tests (paragraph 1.10 above) a statutory requirement. These two regulations seek to avoid overlaps between CIL and planning obligations and to limit the pooling of planning obligations towards infrastructure provision that could be funded by CIL. The Government's intention is for local authorities to operate CIL and planning obligations in a complementary way.

Planning Conditions

- 1.15. Planning conditions cannot require the transfer of land ownership or the payment of monies. They are attached to a planning permission and set out details or required standards, timeframes, and works which must be carried out at prescribed stages in the development process. They may also require further details to be submitted in order to make a proposal acceptable.
- 1.16. NPPF paragraph 206 states that planning conditions should only be attached to a planning permission where they are necessary, relevant to planning and to the development to be permitted, enforceable, precise and reasonable in all other respects.

Section 278 Agreements

- 1.17. Where a development requires works to be carried out on the existing adopted highway, an Agreement will need to be completed between the developer and Oxfordshire County Council under Section 278 of the Highways Act 1980². Examples of such works could be the construction of new access/junction improvement of the highway/junctions, or safety related works such as traffic calming or improved facilities for pedestrians and cyclists.

² Where works are required on a trunk road, Highways England will be party to the S278 Agreement.

- 1.18. The pooling restriction on planning obligations does not apply to S278 agreements. However, the CIL regulations prohibit CIL being spent on a highway scheme where a S278 agreement has been made.

2. POLICY FRAMEWORK

National Level

- 2.1. The statutory framework for planning obligations is set out in Section 106 of the Town and Country Planning Act 1990 (as amended); Regulations 122 and 123 of the Community Infrastructure Levy Regulations 2010 (as amended). The Council will also have regard to the advice in the National Planning Policy Framework (NPPF), particularly paragraphs 203 to 205; and PPS1 Eco Towns Supplement.

Local Level

- 2.2. The statutory Development Plan for the District currently comprises:
- The adopted Cherwell Local Plan 2011-2031 (Part1)(adopted July 2015 & incorporating Policy Bicester 13 re-adopted in December 2016)
 - The retained saved policies of the adopted Cherwell Local Plan 1996
 - The adopted Minerals and Waste Local Plan (Part 1 – Core Strategy) (adopted September 2017)
 - The saved policies of the Oxfordshire Minerals and Waste Local Plan 1996
 - Hook Norton Neighbourhood Plan 2014-2031
 - Bloxham Neighbourhood Plan 2015-2031
- 2.3. The adopted Cherwell Local Plan Part 1 contains the strategic policies covering the District and includes land allocated for housing and employment development at Bicester, Banbury and the former RAF Upper Heyford.
- 2.4. A Partial Review of the Cherwell Local Plan Part 1 is in preparation which seeks to contribute to addressing the unmet objectively assessed housing need from elsewhere in the Oxfordshire Housing Market Area (HMA), particularly from Oxford City. A proposed submission plan was published for public consultation on 17 July 2017 with comments invited until 10 October 2017. Work has also commenced on the production of Cherwell Local Plan 2011-2031 (Part 2): Development Management Policies and Sites.
- 2.5. Other key planning policy documents include:

- Supplementary Planning Documents (SPDs). SPDs expand upon and provide further detail to policies in Development Plan Documents.
- The Infrastructure Delivery Plan (IDP). The IDP is a live document adjusted over time and contains the infrastructure required to support **Policy INF 1: Infrastructure** of the adopted Cherwell Local Plan Part 1. An IDP was appended to the adopted Local Plan. IDP updates can be found on the Council's website.
- The Oxfordshire Local Transport Plan (LTP). The LTP provides the strategic framework for transport in the County.

2.6. The Council's Local Development Scheme sets out the programme for the preparation of the key planning policy documents.

Bicester Garden Town

2.7. In 2014 the Government announced that Bicester had achieved Garden Town status after the Council had successfully demonstrated plans to meet the necessary criteria of providing affordable homes, schools and jobs while preserving the countryside.

2.8. Since then two grants has been awarded to fund the necessary feasibility studies and provide capacity for the implementation of the Garden Town as set out in the adopted Cherwell Local Plan Part 1.

Healthy New Towns

2.9. In 2015 the Government launched its Healthy New Towns Programme. This programme promotes innovative ways to encourage people to live more healthy lives, and the many opportunities for the built environment to support this objective.

2.10. In 2016 Bicester was successful in being selected as one of the 10 exemplar healthy new towns. The Bicester Healthy New Town Programme aims to enable people who live or work in Bicester to live healthier lives and to prevent ill health in the future. The two key priorities for the programme are:

- To reduce the number of people who are overweight or obese so they are less likely to develop chronic health conditions in the future and;
- To reduce the number of people who feel socially isolated as that will have an important positive impact on peoples' mental and physical health.

- 2.11. The built environment has a role to play in promoting health and well-being of communities in the whole of Cherwell District and it is a Council priority to ensure new developments supports this aim.

3. PROCEDURES

General Approach

- 3.1 The Developer Contributions SPD once adopted will comprise the Council's current approach to planning contributions.

- 3.2 Although the scope for securing S106 planning obligations has been reduced since April 2015 due to the pooling restrictions, it is expected that planning obligations will still be sought for:

- Affordable housing; and
- Infrastructure which is required to mitigate the direct impact of a development. It should, however, be noted that this is a general guide and development proposals will continue to be assessed on a case by case basis with the individual circumstances of each site being taken in to consideration when identifying infrastructure requirements.

Planning Obligations

- 3.3 The Local Planning Authority (LPA) will assess each application to determine if a planning obligation is needed and if so what it should address. It will do this in consultation with other public bodies responsible for infrastructure provision. Oxfordshire County Council, for example, is a major provider of services and infrastructure.

- 3.4 The LPA, and other key agencies, will use planning obligations to:
- Secure general planning requirements that are necessary to allow the development to be permitted and where this cannot be achieved by way of planning conditions;
 - Ensure that there is a satisfactory infrastructure to allow the development to proceed and that the infrastructure provided will be maintained; and
 - Offset relevant adverse impacts, for example, on the environment, education, social, recreational and community facilities and transport that arise from the development where the development might otherwise have been refused because of those adverse impacts.

Pre-Application Discussions

- 3.5 As part of any pre-application discussions the LPA will seek to agree the requirements and Heads of Terms for any planning obligation.
- 3.6 It is the Council's strong preference, where applications and associated planning obligations are more complex, that negotiations occur, and agreement on Heads of Terms is achieved, prior to the submission of a planning application. Pre-application discussions can help to resolve potential problems and issues which may otherwise delay the determination of a planning application.
- 3.7 It is a local validation requirement that draft Heads of Terms accompany any application that requires a planning obligation.
- 3.8 A planning performance agreement can be a useful tool to focus pre-application discussions on the issues that will need to be addressed throughout the course of preparing and determining a planning application, and the timescales and resources that are likely to be required.

Unilateral Undertakings

- 3.9 In cases where a planning obligation is only dealing with financial contributions the LPA will encourage developers to make a unilateral undertaking and to make the relevant contributions on the granting of planning permission and/or at different stages of development.
- 3.10 This approach allows applicants for small schemes to reduce the legal costs and avoid potential delays often associated with legal agreements. The Council provides a standard form for a unilateral undertaking and this can be found on its website.

Cross Boundary Applications

- 3.11 Where an application site falls partly in another local planning authority area the Council will, as far as possible, work to coordinate proportionate planning obligation requirements with that authority. If however, agreement cannot be reached, the Council will seek obligations for the portion of the site that falls within the District.

Viability

- 3.12 A key objective of this SPD is to alert applicants of the likely level of planning obligations that can be expected from proposed developments well in advance of any

planning application being submitted. The developer can then factor these requirements in to any potential land transaction and/or scheme as early as possible in the development process and certainly prior to any grant of planning permission.

- 3.13 The Council will ensure, in accordance with the advice in the National Planning Policy Guidance (NPPG) when seeking contributions that, their combined total impact does not threaten the viability of the sites and scale of development identified in the Development Plan.
- 3.14 The NPPG states that in making decisions, the LPA will need to understand the impact of planning obligations on a proposal. Where an applicant is able to demonstrate to the satisfaction of the LPA that the planning obligation would cause the development to be unviable, the local planning authority should be flexible in seeking planning obligations. This is particularly relevant for affordable housing contributions which are often the largest item sought on housing developments. These contributions should not be sought without regard to individual scheme viability. The financial viability of the individual scheme should be carefully considered prior to a decision being made on the acceptability or otherwise of such a scheme.
- 3.15 The NPPG goes on to state that assessing viability should lead to an understanding of the scale of planning obligations which are appropriate. However, the NPPF is clear that where safeguards are necessary to make a particular development acceptable in planning terms, and these safeguards cannot be secured, planning permission should not be granted for unacceptable development.
- 3.16 The LPA recognises that financial viability is a material consideration. In exceptional circumstances it may be necessary for the Council to prioritise the securing of particular developer contributions having regard to the Development Plan, the needs of the locality and the particular characteristics of the site and its locality. However, there may be circumstances in which the material Development Plan policies and/or the needs arising from proposed development are such that contributions will be sought even if a viability assessment accepted by the Council demonstrates that the development would not be viable with the required contributions.
- 3.17 Where a disagreement arises about financial viability and the planning obligations sought, the applicant will be expected to provide the Council with clear and transparent evidence to support their case. In most instances this will involve the Council reaching an understanding based on a detailed open book financial appraisal, undertaken by an independent assessor. Where there are significant financial issues arising for other public bodies responsible for providing infrastructure (including Oxfordshire County Council), the LPA will expect that body to be actively involved in

this assessment process and conclusions. The Council will require this evidence prior to the granting of planning permission.

3.18 Section 106 Agreements can deal with issues of viability. For example, a developer may set out their 'predicted profitability levels'. In exceptional circumstances and on the basis of an open book appraisal prior to the determination of an application, it can be a requirement of the S106 Agreement for there to be a second viability appraisal at some point during the course of the development. If the results of this second viability appraisal show, for example:

- That the predicted profitability levels have increased then the Council will have a right to an overage, i.e. a further payment/provision of infrastructure or affordable housing to that already secured in the S106 Agreement;
- That the predicted profitability levels have stayed the same, then there will be nothing further to do with the S106 Agreement;
- That the predicted profitability levels have decreased, then the Council will negotiate further with the applicant concerning planning obligations.

3.19 All costs incurred by the Council in financial appraisal and viability assessment are to be met by the applicant.

Security and Timing of Payments

3.20 Financial contributions (apart from legal costs, which are usually paid prior to the completion of the agreement, and standard administration charges) will need to be paid prior to the implementation of planning permission or in accordance with a programme of agreed staged payments.

3.21 Prior to the making of a Planning Obligation, the developer should note the financial contributions payable and the corresponding triggers or payment dates as specified in the agreement.

3.22 Approximately 21 days prior to reaching a trigger or payment date, the developer should notify the Council of their intention to pay the financial contribution. If the developer notifies the Council of their intention to pay the financial contribution after the trigger or payment date has elapsed then late payment interest will be charged at a rate of 4% above the standard base rate or as otherwise stated in the Planning Obligation. In such circumstances, the applicant may also become liable for additional monitoring and enforcement costs.

- 3.23 The Council will then calculate the total financial contribution payable including any interest and/or indexation due and will provide a copy of this calculation to the developer. This calculation will be valid for a period of 14 days from the date of issue unless otherwise agreed in writing. If the calculation has not been agreed within 14 days and is shown to be arithmetically correct following the resolution of any dispute, then late payment interest will be charged as per paragraph 3.22 above.
- 3.24 Once the developer has agreed the calculation, the Council will issue an invoice to the developer for the agreed sum. The invoice issued will be subject to the Council's standard payment terms.
- 3.25 The Council will not accept payment of any financial contribution unless accompanied by a valid invoice.
- 3.26 Upon receipt, financial contributions will be held in a specific account before being transferred to the relevant internal departments or third parties (e.g. other public sector body, parish council etc.) responsible for spending the contribution.
- 3.27 The S106 agreement will include a clause detailing how and when any unspent funds will be refunded. Given that a unilateral undertaking, necessarily, does not have the Council as a party, there cannot be any obligations on the Council to return any unspent monies.
- 3.28 All receipts and spending of financial contributions will be recorded and monitored by the Council's Senior Manager-Development Management.
- 3.29 Please note that financial contributions payable to Oxfordshire County Council (i.e. those relating to highways and education and relevant administrative and monitoring fees) will be subject to a different process and developers are advised to refer to OCC's Developer Guide (available online) or contact the Oxfordshire County Council Infrastructure Funding Team for further information.

Fees

- 3.30 The Council's legal costs of preparing the Planning Obligation will be borne by the developer. These costs will be based on an hourly rate and will depend upon the complexity of the agreement and the length of time taken to settle the draft and proceed to completion. The Council will therefore require developers to provide a 'cost undertaking' to pay for the Council's reasonable fees, prior to it being able to instruct its acting solicitors.

- 3.31 The Council's reasonable legal fees will need to be met even if the planning obligation is not completed.
- 3.32 Standard unilateral undertakings will be subject to an administration charge covering legal costs and if necessary the transfer of money to third parties.

Monitoring and Enforcement

- 3.33 The Council monitors all Planning Obligations and will work with developers to ensure that financial contributions and non-financial obligations are delivered on-time. Monitoring fees may be charged in order to undertake such work, given that S106 Agreements/Unilateral Undertakings are made pursuant not just to section 106 of the Town and Country Planning Act 1990 (as amended) but also to section 111 of the Local Government Act 1972 and section 1 of the Localism Act 2011.
- 3.34 Where there is evidence of non-compliance with a Planning Obligation (such as the non-payment of financial contributions, failure to comply with an obligation, or failure to notify the Council of a due payment or event as required), the Council will seek to recover all reasonable administration costs incurred. This could include, for example, site visits, the recovery of any unpaid monies and/or correspondence.
- 3.35 If it is clear that matters within the planning obligation are not being complied with, the Senior Manager - Development Management will instruct the Council's Legal Team to take appropriate action to secure compliance. This could include for example, seeking a court injunction.

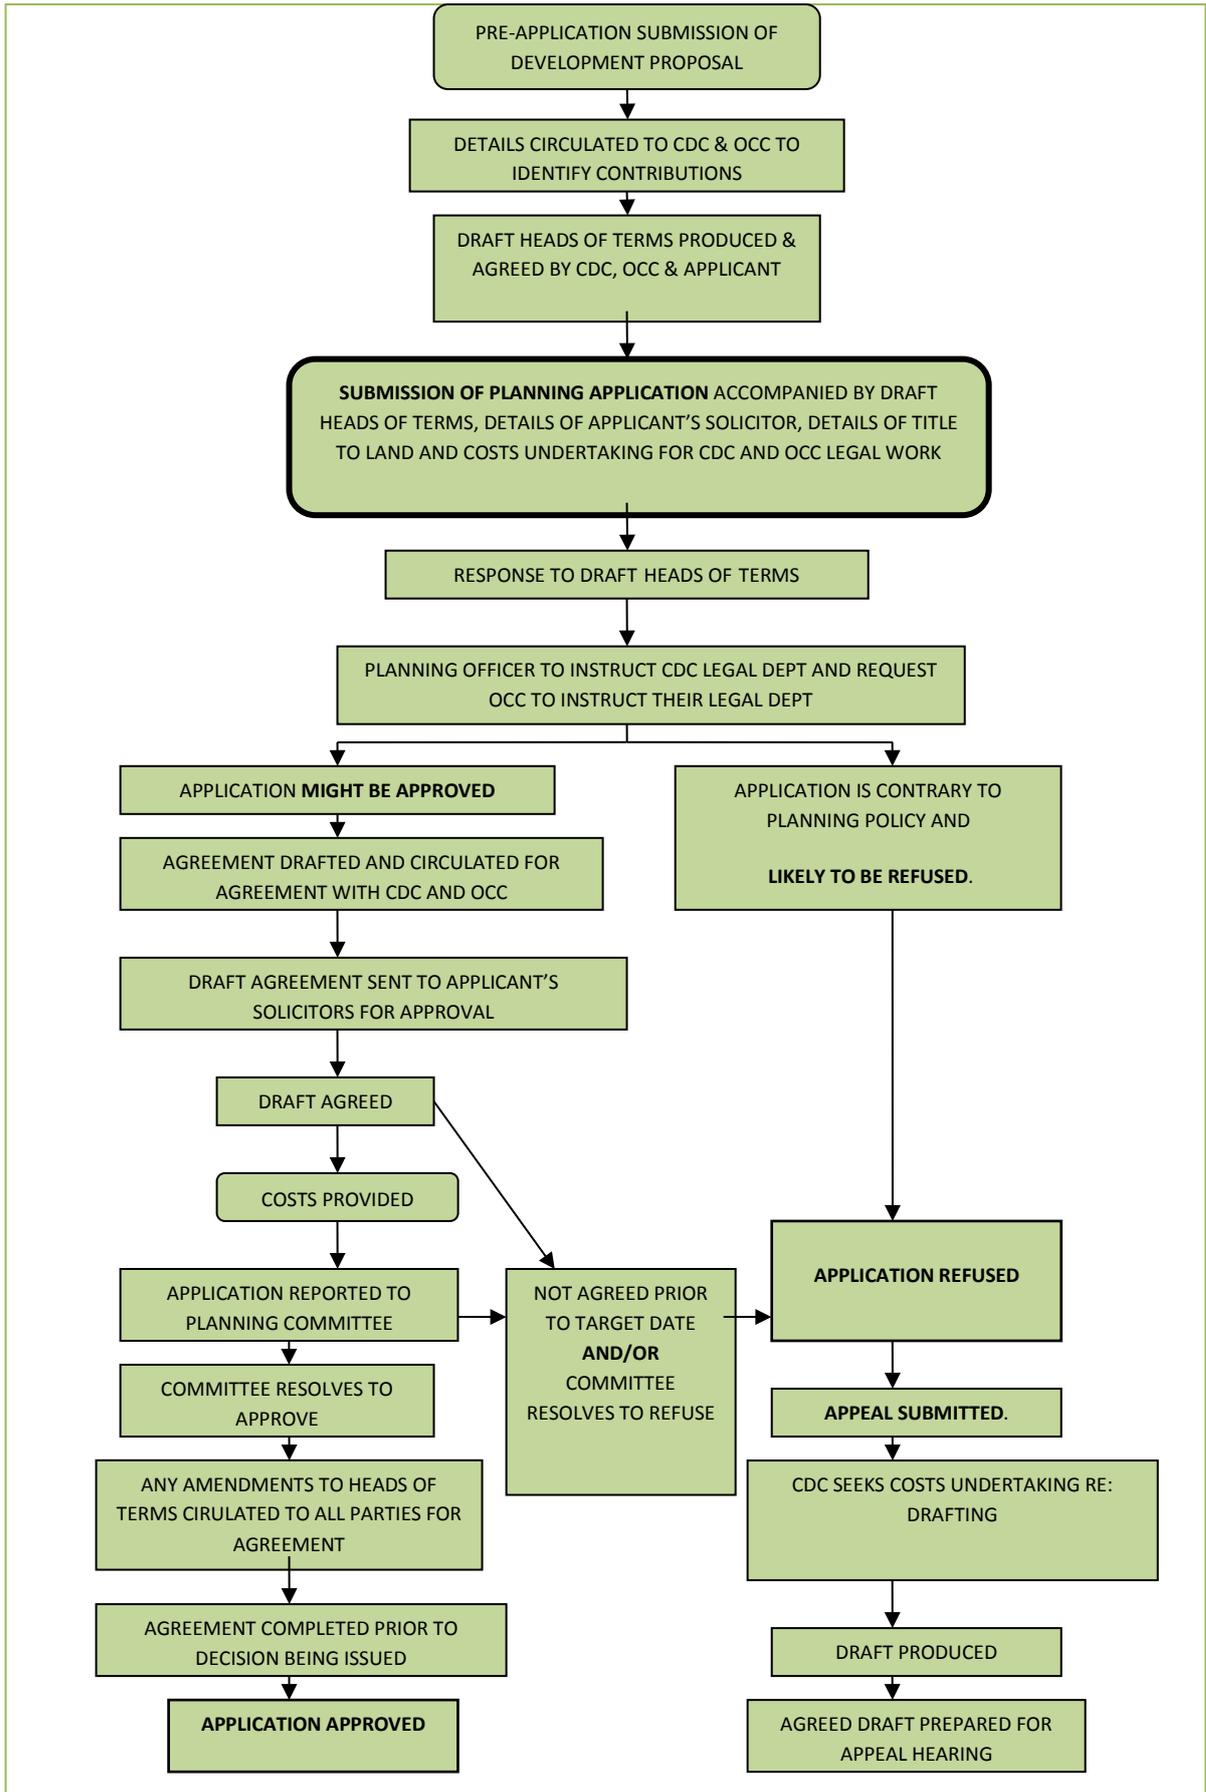

Indexation

- 3.36 Financial contributions are based upon the costs of infrastructure. Financial contributions will therefore be indexed (i.e. index-linked to inflation) to ensure that they retain their original 'real value'. The base date and appropriate index to be applied will be set out in the legal agreement.
- 3.37 Where a formula has been set for the calculation of contribution levels, any cost figures used will be updated regularly to take account of inflation and are the sums required at the time of negotiation.
- 3.38 All payment levels will be subject to an inflation factor (often RPI or CPI) adjusted according to the fluctuations between the date of the obligation and the quarter period in which payment is due to the District Council. The County Council will also adjust payments to it but these might be subject to different measures of inflation.

Dispute Resolution

- 3.39 Changes introduced by the Housing and Planning Act 2016 will amend the Town and Country Planning Act 1990 (as amended) by inserting a new section 106ZA and Schedule 9A which will give the Secretary of State the power to appoint someone to resolve issues that are holding up the completion of a planning obligation. As at the date of the SPD, these provisions are not yet in force.
- 3.40 Figure 1 overleaf provides an overview of the Planning Obligation process

Figure 1: Planning Obligation Process

4. SPECIFIC PLANNING OBLIGATION GUIDANCE BY TYPE

- 4.1. This section gives specific advice for various types of infrastructure commonly required by the Council to support development. However, as stated previously, it does not cover every circumstance and/or obligation that may be needed to make a development acceptable in planning terms. In all cases the LPA will ensure that the infrastructure sought complies with the three tests in CIL Regulation 122.
- 4.2. Appendix 16 offers a guide to the types of infrastructure to be covered by S106 planning obligations and what may be covered by CIL (or a similar replacement infrastructure levy) if it is introduced by the Council in the future.

Affordable Housing

- 4.3. Cherwell District has a high level of need for affordable housing. The Council's Housing Strategy 2012-17 recognises the need for affordable homes, and aims to ensure that Cherwell is well-placed to maximise investment by registered providers and to respond to opportunities as they arise.
- 4.4. The NPPF defines affordable housing as social rented, affordable rented and intermediate housing, provided to eligible households whose needs are not met by the market.
- 4.5. The various types of affordable housing can be described as follows:

Social Rented Housing

- 4.6. Rented housing owned and managed by local authorities and registered social landlords, for which guideline target rents are determined through the national rent regime. It may also include rented housing owned or managed by other persons and provided under equivalent rental arrangements to the above, as agreed with the local authority or with the Homes and Communities Agency as a condition of grant.

Affordable Rented Housing

- 4.7. Rented housing provided by a registered provider of social housing, that has the same characteristics as social rented housing except that it is outside the national rent regime, but is subject to other rent controls that require it to be offered to eligible households at a rent of up to 80% of local market rents.

Intermediate Housing

- 4.8. Housing at prices and rents above those of social rent, but below market price or rents and which meet the criteria set out above but does not include affordable rented housing. These can include shared equity products or other low cost homes for sale such as:
- Shared Equity;
 - Shared Ownership;
 - Discount Sale.

Requirements & Thresholds

- 4.9. Policy BSC 3 of the adopted Cherwell Local Plan Part 1 requires the following provision:
- At Banbury and Bicester all proposed developments that include 11 or more dwellings (gross), will be expected to provide at least 30% of new homes as affordable homes on site.
 - At Kidlington and elsewhere, all proposed developments that include 11 or more dwellings (gross), or which would be provided on sites suitable for 11 or more dwellings (gross), will be expected to provide at least 35% of new housing as affordable homes on site.
 - Where there is a requirement that part of an affordable home should be provided, a financial contribution of equivalent value will be required for that part only. Otherwise, financial contributions in lieu of on-site provision will only be acceptable in exceptional circumstances.
- 4.10. The adopted Cherwell Local Plan requires all qualifying developments (ie those developments comprising 11 or more dwellings (gross)) to provide 70% of the affordable housing as affordable/social rented dwellings and 30% as other forms of intermediate housing. Social rented housing will be particularly supported in the form of extra care or other supported housing. It is expected that these requirements will be met without the use of social housing grant or other grant.
- 4.11. In calculating any affordable housing contribution the Council will apply 'vacant building credit' to qualifying developments. Guidance on qualifying developments will be provided by the Council's Strategic Housing Team.

Housing Mix

- 4.12. Adopted Local Plan policy BSC4 sets out the Council's housing mix requirements. In general there is a need to provide a mix of housing to reflect the needs of an ageing population, a growth in smaller households and the demand for family housing.

- 4.13. In all qualifying developments the mix of housing will be negotiated having regard to the Council's most recent evidence and evidence from developers on local market conditions.
- 4.14. Extra Care Dwellings will be important in meeting the needs of an older population. They comprise self-contained accommodation for older and disabled people which enables independent living by providing a range of support facilities on the premises and 24 hour care services. Housing sites of at least 400 dwellings will be expected to provide a minimum of 45 self-contained extra care dwellings as part of the overall mix. However, if the Council agrees that extra care housing would not be desirable in a particular location an equivalent amount of alternative specialist housing (use class C3) for older people will be required. All proposals will be expected to provide affordable housing in accordance with policy BSC3.
- 4.15. In some cases the Council may also seek to secure a small number of more specialist housing units which will provide accommodation for those with support needs. These will be sought in areas which are deemed to be appropriate and in discussions with applicants at an early stage.

Affordable Housing Standards

- 4.16. At present the Council' adopted local plan does not set out detailed policies on affordable housing standards, however, any registered provider will normally request that 50% of the affordable rented housing required will be built to Building Regulations Requirements M4(2) Category 2: accessible and adaptable dwellings. In addition, 1% of the affordable housing should be built to Building Regulation Requirement M4(2) Category 3: Wheelchair User Dwelling. This requirement will be assessed on a site by site basis in discussion with the developer.
- 4.17. It is expected that all affordable housing provided under a rented tenure will be built to the nationally described space standards. Intermediate housing which is deemed to be low cost home ownership should be built to the same or better space standards including garden sizes as the equivalent market housing on the site.
- 4.18. It is expected that where appropriate affordable housing should not be clustered in any more than 10 units of one tenure and 15 units of multiple affordable tenures with no contiguous boundary of the clusters. This is expected in the first instance and schemes should be developed with this in mind. However the Council will be flexible and pragmatic on this clustering approach when considering certain site constraints or scheme densities.

Viability

- 4.19. The Council will seek the provision of affordable housing on all qualifying developments in accordance with Policy BSC 3. However, if developers consider that the Council's policy requirements on affordable housing give rise to development viability issues they will need to fully justify their reasons. A detail of how the Council will assess viability issues is set out in Section 3 above.

Commuted Sum Calculations

- 4.20. Local Plan policy BSC3 states that only in exceptional circumstances will the Council accept commuted sums in lieu of on-site provision.
- 4.21. In the event that the Council accepts a commuted sum in lieu of on-site provision it will be calculated on the basis of the mix of tenures and sizes that the Council considers would have been appropriate for the site. The sum should be of a 'broadly equivalent value' of the developer/landowner contribution if the affordable housing was provided on site. The commuted payment will be based on a sum equal to the difference between an Open Market Value (OMV) and Affordable Housing Value (AHV).

Cherwell Local Plan 2011-2031: Partial Review – Oxford's Unmet Housing Need

- 4.22. In July 2017 the Council published its Proposed Submission Partial Review Plan. This is a focused Plan to provide Cherwell's share of the unmet housing needs of Oxford to 2031. It identifies a number of development sites with specific affordable housing requirements. Supported by a viability assessment the emerging policies in the Plan seek to meet Oxford City's requirements for 50% of its housing to be provided as affordable homes.
- 4.23. Oxford's Local Plan, its Housing Strategy and the Oxfordshire Housing Market Assessment (2014) describe the city's housing needs in detail. As Oxford's affordable housing need is so high the emerging Partial Review prescribes the mix of housing sizes needed for the defined 'affordable' element of the new housing supply. It also requires a higher level of affordable rent/social rented accommodation (80% of the total affordable housing requirement) than Cherwell's 70% requirement.
- 4.24. The affordable housing standards required by the policies in the Partial Review will be applied to section 106 negotiations once they have been adopted.

Further Advice

- 4.25. Detailed advice on the provision of affordable housing is available by contacting the Council's Strategic Housing Team.

Air Quality

- 4.26. Promoting sustainable development is a key focus of the adopted Cherwell Local Plan. The need to consider the effects of development on air quality, and how it can contribute towards improvements and mitigate against adverse impacts, is identified as a key challenge to ensuring sustainable development. Commuters in Cherwell travel relatively long distances and reducing travel by car and managing traffic congestion is a major challenge. Maximising the opportunity to shift from dependency on cars to sustainable modes of transport is also identified.
- 4.27. Policy SLE 4 includes a requirement for new developments to provide financial and/or in-kind contributions to mitigate the transport impacts of development. All development where reasonable to do so, should facilitate the use of sustainable modes of transport to make the fullest possible use of public transport, walking and cycling. Encouragement will be given to solutions which support reductions in greenhouse gas emissions and reduce congestion.
- 4.28. In March 2017 the Council approved an Air Quality Action Plan (AQAP) as part of its statutory duties required by the Local Air Quality framework. It outlines the actions to be taken to improve air quality in the District between 2017 and 2020.
- 4.29. There are four Air Quality Management Areas (AQMAs) in the District where air quality does not meet national air quality objectives for nitrogen dioxide. These concentrations are largely related to road traffic emissions.

Requirements and Thresholds

- 4.30. All new development within or immediately adjacent to Local AQMAs, or those with traffic routed through an AQMA may be subject to section 106 agreements which require the implementation of measures to offset increases in local pollutant emissions, and /or make an appropriate financial contribution towards improvement measures or air quality monitoring.
- 4.31. The following mitigation measures may be required

- Measures during the construction of new development including dust control,, site monitoring and plant emissions;
- Improved access to public transport;
- The provision of on and off site facilities for cycling and walking;
- The management of car parking;
- Traffic management;
- Road infrastructure;
- Green Travel Plans;
- Monitoring of air pollution.

4.32. The Council will calculate the contribution sought based on the scale of the development and the trip generation for different uses.

4.33. The list of the current Local AQMAs and the actions required are set out in the Council's AQAP which can be viewed on its website.

Apprenticeships and Skills

4.34. Paragraph 19 of the NPPF states the Government's commitment to ensuring that the planning system does everything it can to support sustainable economic growth. Securing the economic future of the District is the main priority of the adopted Cherwell Local Plan Part 1 ('the Plan'). The main focus of the Plan is strengthening the local economy, job creation, inward investment and company growth, as well as building cohesive communities. In particular, the Plan notes that as relatively large numbers of people in Cherwell are without qualifications and basic skills the level of education and training needs to improve. The Plan contains five strategic objectives for developing a sustainable economy. Strategic Objective 3 (SO3) aims, amongst other things, to support an increase in skills and innovation. Furthermore, paragraph B14 of the Plan states that the Council will support proposals to strengthen the skills base of the local economy which will include the promotion of local training providers.

4.35. The need to increase the number of apprenticeships locally is picked up by both the Oxfordshire Local Economic Partnership (OxLEP) and the South East Midlands Economic Partnership (SEMLEP). OxLEP's Strategic Economic Plan 2016 is committed to delivering 1150 more apprenticeships to 2020 within Oxfordshire. The SEMLEP Strategic Economic Plan 2015-2020 is seeking just over 94,000 apprenticeship starts within the SEMLEP area. Of these, it is anticipating that 7017 will be created within the Cherwell District. It notes in particular that there is a shortage of skills and an ageing workforce in the construction sector across the SEMLEP area and that there are significant opportunities for jobs growth in these sectors.

- 4.36. The Council approved an Interim Position Statement on Planning Obligations for Construction Apprenticeships and Skills in April 2016. This document provided detailed advice and guidance on the Council's approach to securing construction apprenticeships and skills through the planning system. This guidance has now been updated and is included at Appendix 13.
- 4.37. It states that the Council will require the provision of a stated minimum number of new construction apprenticeships (or apprenticeship starts) as part of a required Employment, Skills and Training Plan (ESTP) for each proposal for new development. The ESTP will be secured by S106 agreement.
- 4.38. A second key area of employment, skills and training for which S106 agreements will be sought is the 'end user phase' of commercial and mixed use development. S106 agreements will be used by the Council to support/provide the training and skills needed by local people to access the new job opportunities created by the development's end user. The ESTP, referred to above, will therefore also be required to address this end user phase.
- 4.39. Appendix 13 sets out the type of development and the thresholds on development that will trigger this requirement. However, if proposed developments fall below these thresholds and developers still wish to provide new construction apprenticeships, the Council will support them in doing so.

Cemeteries

- 4.40. The adopted Cherwell Local Plan Part 1 highlights a key community challenge for both Banbury and Bicester as being the need to provide additional burial site provision. Policy Bicester 9 and Policy Banbury 13 both make provision for additional burial site provision in their respective settlements. Both policies also state that developer contributions will be sought from new developments in the towns towards the establishment of such a facility.
- 4.41. In terms of need, the Local Plan Inspector appointed to examine the submission Cherwell Local Plan observed in relation to Policy Banbury 13, that: *'This policy confirms the local requirement for new burial site provision in Banbury with contributions from major new housing schemes to provide funding to facilitate an extension to the existing cemetery, subject to suitable ground conditions being demonstrated. The evidence of need is unquestioned and therefore the policy is soundly based and requires no modification.'*

- 4.42. In relation to Policy Bicester 9 the Inspector stated *'This policy confirms the urgent local requirement for a new burial site of around 4has in Bicester. It is consistent with the current expectation that it can be provided as part of the Policy BIC 1 scheme, with funding contributions from other housing developments in the locality to help secure delivery. The evidence of need is clear and unquestioned and therefore policy is soundly based and requires no modifications.'*
- 4.43. At Bicester it is anticipated that a site will be provided within the North West Bicester development area (Policy Bicester 1). At Banbury an extension to the north of the existing cemetery at Southam Road was granted planning permission in 2015 (planning application reference 15/01194/F).
- 4.44. Requirements for additional cemetery space in the rest of the District will be identified in the emerging Partial Review of the adopted Cherwell Local Plan, and the Cherwell Local Plan Part 2.

Thresholds and Contributions

- 4.45. All new residential developments of 10 or more dwellings will be expected to contribute to the provision of new, or the expansion of existing, cemeteries and their maintenance where the need generated by the development cannot be met by existing provision and a scheme has been identified to meet that need.
- 4.46. At Banbury and Bicester the Town Councils in association with the District Council are pursuing schemes for new /extended provision. Specific costs will therefore be available for individual schemes.
- 4.47. Financial contributions will be sought for land acquisition, laying out; and future management and maintenance on a site by site basis where there is an identified need. The contributions sought will be dependent upon site circumstances (eg ground conditions) and commensurate to the need generated by the development.
- 4.48. In those limited cases where a development is of a scale that necessitates a new cemetery, developers will need to carry out consultation with the local population, and consider national guidance and best practice prior to design and implementation of cemeteries.
- 4.49. The methodology to be used in the calculation of contributions is as follows:
a) Number of burial plots required to 2031 divided by the average number of plots per hectare = area of land required.

- b) Cost (including land purchase cost (unless land given free of charge), drainage, paths, landscaping, fencing and storage facilities) of cemetery provision multiplied by % attributable to population growth.
- c) Divided by population growth = cost per person
- d) Multiplied by the average occupancy per dwelling type (2.49) = per dwelling cost (1 bed, 2 bed, 3 bed, 4+ bed)

Community Hall Facilities

- 4.50. Policy BSC 12 of the adopted Cherwell Local Plan sets out the Council's overall approach to the provision of new or extended community hall facilities.
- 4.51. In 2016/2017 the Council commissioned a 'Cherwell Community Spaces and Development Study (CCSDS) to provide evidence and policy proposals to inform community development and community indoor space provision in relation to new housing developments. An interim CCSDS was published in January 2016 and the study was completed in 2017.
- 4.52. The CCSDS Study recommends a local minimum standard of provision for community hall facilities required to meet the needs of the residents generated by new development. This minimum standard is 0.185m² per person.

Thresholds and Contributions

- 4.53. The local planning authority will expect all residential developments of 10 or more dwellings to contribute towards the provision of new community facilities or the improvement/expansion of existing facilities where there is not enough spare capacity in existing appropriate facilities to meet the needs generated by the development. This may include financial contributions and/or the provision of land and buildings to enable new community facilities to be provided, or for existing facilities to be extended or improved.
- 4.54. Where on site provision is required, the LPA will expect the developer to design and gain the necessary planning consents to a specification agreed by the LPA. The developer will then be expected to build the facility in accordance with the approved scheme. A commuted sum for the future maintenance of the facility will also be sought.
- 4.55. The threshold for provision of community facilities on site is normally a population that supports a minimum community facility of 345m² to include a main hall, kitchen, toilets and adequate storage. (ie approximately 750 dwellings). Where new

development is taking place that demands a larger space then the opportunity should be taken to provide a range of spaces for a wider range of activities.

- 4.56. The Council's accessibility standard is 800m walking distance for facilities in urban areas, and a 15 minute drive time for residents in rural areas. On-site provision may therefore be sought for smaller developments depending upon the proximity of existing community centres. The size of the on-site provision will be commensurate with the scale of the development. This will be assessed on a case by case basis.
- 4.57. Where new development gives rise to a need for additional indoor community provision (but not a new freestanding facility) financial contributions will be sought for either off-site provision or the improvement/upgrading of existing facilities where appropriate schemes have been identified. Those needs will be assessed on a pro-rata basis using the standards set out in Appendix 11
- 4.58. The appropriate contribution is calculated by reference to the expected population in the development and the facilities required to support the population, multiplied by a standardised cost for the provision of the facility. Where contributions are sought for the expansion or improvement of existing facilities then the costs applying to the proposed improvements will apply.

Community Development

- 4.59. Community development is a key objective of the adopted Cherwell Local Plan. Strategic Objective SO10 seeks to provide sufficient accessible, good quality services, facilities and infrastructure, to meet health, education, transport, open space, sport, recreation, cultural, social and other community needs, reducing social exclusion and poverty, addressing inequalities in health, and maximising well-being.
- 4.60. Strategic Objective SO14 seeks to create more sustainable communities by providing high quality, locally distinctive and well-designed environments which increase the attractiveness of Cherwell's towns and villages as places to live and work and which contribute to the well-being of residents.
- 4.61. These objectives are further supported by the statement in paragraph B.86 that the Council wishes to ensure that new development fully integrates with existing settlements to forge one community, rather than separate communities.
- 4.62. Evidence gathered in preparing the 2017 Cherwell Community Spaces Development Study (CCSDS) strongly endorses the value of having a community development worker available at an early stage in a new development to 'kick start' the process of

bringing people together, developing new activities and putting in place the building blocks of a strong community.

- 4.63. The Council will therefore seek financial contributions towards the provision of a community activation fund and community development workers for major residential developments.

Thresholds

- 4.64. The threshold for contributions will generally be where a new community building is required to meet the needs of the new development, where the development is likely to give rise to a large new community, or where there may be issues of integration with existing communities.
- 4.65. Contributions will therefore not be sought from developments of fewer than 100 new dwellings unless they form part of a larger scheme.

Contributions

- 4.66. Contributions will be sought on a case by case basis to fund support from a community development worker. The levels of contributions sought are set out in Appendix 12
- 4.67. In addition to contributions towards a staffing resource, contributions will be sought towards a community development fund to enable community development workers to support the community through the provision of newsletters, events and activities as appropriate.

Community Safety & Policing

- 4.68. The supporting text to the adopted Cherwell Local Plan Part 1 states that the Council will ensure that new developments, area renewal and town centre expansions are safe places to live, work and visit by using tools such as 'secured by design' and by requiring provision of appropriate community safety and police infrastructure where required.
- 4.69. Thames Valley Police (TVP) is the police force that covers the Cherwell area. TVP operate a police model based upon the creation of Local Police Areas. At present the Cherwell Local Police Area has a population of approximately 141,900 made up of 56,700 households (source: 2011 Census). This population generates an annual total of circa 32,500 incidents that require police action. These are not necessarily all 'crimes' but are calls to the 999 handling centre which require a police response.

4.70. TVP have advised that the anticipated planned growth in the District will place a significant extra demand on existing resources. The Council will therefore require all residential (10 dwellings or more) and commercial developments, where required and where appropriate, to contribute towards the delivery of the following items of infrastructure to serve new developments and mitigate against their impact upon existing policing resources.

- Staff Set Up Costs – the cost of equipping and setting up new officers required to police new communities and neighbourhoods (not salary).
- Provision of New Vehicles and Bikes – the purchase of new fleet vehicles and bicycles.
- Premises – contributions towards the adaption/alterations or extension of existing premises for new officers to base themselves or work out of.
- Mobile IT – provision of suitable kit and equipment to enhance the mobility and flexibility of officers when working.
- Radio Capacity – additional demand will lead to an additional impact upon existing capacity of infrastructure.
- ANPR Cameras – Automatic Number Plate Recognition Cameras aid in detection but also prevent crime. Funding for the strategic placement of these cameras either in or close to new housing development will be sought where appropriate.
- Control Room and Police National Database Capacity – At present police control room handling is at capacity at peak times. Contributions towards improving the capacity of the existing infrastructure may be required.

4.71. Requirements and contributions will be assessed on a site by site basis when a specific need or item of infrastructure that is directly related to the development is identified.

4.72. The costs relating to the proposed infrastructure items or area-based initiatives will be applied proportionately to the size or the potential occupancy of the development.

4.73. Further advice on the level of contributions sought for community safety/CCTV provision by development type can be found in Appendix 14.

Education

(Including primary, secondary, pre-school, further education and special needs education)

4.74. The NPPF (paragraph 72) states that the Government attaches great importance to ensuring that a sufficient choice of school places is available to meet the needs of

existing and new communities. This approach is further developed in the adopted Cherwell Local Plan Part 1 (Policy BSC 7) which seeks the provision of educational facilities throughout the District to accommodate population growth.

- 4.75. Oxfordshire County Council (OCC) has a statutory responsibility to ensure there are sufficient school and childcare places available for local children and young people living within the county of school age and whose parents wish their children to be educated by the state. It is important that these places are available within a reasonable travel distance for all those of school age occupying new residential development. OCC produces an annual Pupil Place Plan³ which sets out how school provision is expected to change over the next few years including anticipated requirements for new schools and school extensions linked to planned housing growth.

Planning Obligation Requirements

- 4.76. The LPA will expect all residential developments to contribute towards the provision of education infrastructure where there is not enough spare capacity in existing appropriate schools to meet the needs generated by the development. This may include financial contributions and/or the provision of land and buildings to enable new schools to be provided or for existing schools to be extended. A list of planned projects is set out in the Council's IDP which is updated on a yearly basis.
- 4.77. Developments which are of such a scale as to require the provision of a new school will be expected to fully fund the most appropriate size of school which would be sufficient to accommodate the projected pupil generation. Where a new school is serving the needs of multiple developments, the cost of the school will be shared proportionately across the relevant developments, subject to the constraints of the CIL regulations.
- 4.78. In some cases the most appropriate scale of new school may be less than the projected pupil generation, in which case the development may also be required to fund expansion of existing schools, where this is necessary.
- 4.79. Subject to approval by the Council and OCC the direct delivery of schools by developers may also be considered acceptable.
- 4.80. OCC's consideration of whether developer contributions towards education provision are required will be informed by the projected capacity figures. Empty places at a

³ www.oxfordshire.gov.uk/cms/content/pupil-place-plan

school do not necessarily equate to there being sufficient capacity at that school as it is generally accepted that schools should not operate at 100% of their capacity.

- 4.81. Where a new development is proposed in an area with sufficient projected capacity, no financial contribution will be required; however, where the proposed development would result in insufficient projected capacity, a contribution will be required. If there is insufficient capacity to accommodate the increase in pupils likely to be generated by a development and the development itself cannot enable the necessary provision the County Council will raise objections to the development.
- 4.82. It is in the interests of the developer and to potential residents to ensure that schools are able to accommodate the additional pupils generated by their development. It is recommended that developers contact the County Council's education team at the earliest possible stage in the process to ascertain whether there would be a requirement for additional education provision within the locality of their proposed development.
- 4.83. In circumstances where it is not possible to provide school places within a reasonable walking distance an additional contribution towards the cost of providing transport for children to school may be required. The contribution will reflect the cost of providing the transport for a defined period of time.
- 4.84. This requirement will apply to all urban and rural residential developments which are likely to generate demand for school places. Contributions will not be sought towards educational infrastructure from developments of studio or one bed dwellings, institutional accommodation exclusively for undergraduate students or from sheltered/elderly housing and other specialist housing developments where children will not live.
- 4.85. Further advice on the method of calculations and the expected costs are set out in Appendix 2 and Appendix 3 respectively. Reference should also be made to OCC's Developer Guide which is available on its website.

Flood Risk

- 4.86. There are extensive areas in the District that have been identified as being at risk of flooding. Flood risk arises from rivers, canals, sewers, surface water and ground water.
- 4.87. Policies ESD 6 and ESD 7 of the adopted Cherwell Local Plan Part 1 seek to manage and reduce flood risk by using a sequential approach to development. Developers will therefore need to demonstrate that account has been taken of flood risk from all

sources, and that the proposed development incorporates mitigation and management measures appropriate to the use and location. The Council also requires developers to improve water efficiency and reduce surface water run-off through the use of a range of Sustainable Drainage Systems (SUDs).

- 4.88. Flood defence measures that are deemed necessary to a development to mitigate specific impacts of that development, (including SUDs) will normally be sought through a planning condition. However, in certain circumstances a section 106 agreement may be required.

Health & Wellbeing

- 4.89. Policy BSC 8 of the adopted Cherwell Local Plan Part 1 sets out the Council's approach to securing health and well-being throughout the District. In addition, the Bicester Healthy New Town Programme aims to enable people who live or work in Bicester to live healthier lives and to prevent ill health in the future.
- 4.90. Improving public health, safety and individual wellbeing is also an overarching transport goal of OCC's LTP4. This will be achieved by increasing levels of walking and cycling, reducing transport emissions, reducing casualties, and enabling inclusive access to jobs, education, training and services.
- 4.91. New residential development will be expected to contribute towards the provision of additional health care infrastructure generated by its population growth where there is insufficient existing capacity, well located to serve the development. This may include financial contributions and/or the provision of land and buildings to enable the provision of doctor's surgeries and other health facilities to serve the local population, or the upgrading or extension of existing facilities in some locations.
- 4.92. An on-site new facility would not normally be required unless a need is generated by a patient population of 8,000 or more and only then if other nearby practices lack the capacity to expand. On smaller residential sites and where the new development increases demand on existing facilities, the need for new provision is likely to be replaced by extending existing facilities.

Contributions

- 4.93. The LPA will seek a financial or in kind contribution from developments of more than 10 dwellings towards the improvement and/or extension of existing primary medical care infrastructure where appropriate schemes are identified on a site by site basis.

- 4.94. Primary medical care infrastructure needs may include:
- Land on which to build either a new healthcare facility or an extension to an existing facility;
 - Building – either a new facility or an extension to an existing facility
 - ICT Infrastructure to support primary care expansion.
- 4.95. Contributions at an enhanced rate will be sought from developers of extra care housing, and care/nursing homes. This requirement reflects the much greater input and healthcare support required by the residents of such developments. Such contributions will be negotiated on a case by case basis.
- 4.96. Further detailed advice on the method of calculations and the costs of contributions can be found in Appendix 15.
- 4.97. As primary care practices are run as independent businesses an appropriate mechanism is needed to ensure that any facilities paid by developer contributions remain in community use for at least 15 years. As such any funds secured towards the provision of extensions/improvements or new facilities will be the subject of an agreement with the individual practices.
- 4.98. Any practice that benefits in this manner will be required to repay the funds if the practice does not continue for 15 years after the facilities have been provided.

Heritage

- 4.99. Policy ESD 15 of the adopted Cherwell Local Plan Part 1 seeks to protect, sustain and enhance designated and non-designated 'heritage assets'.
- 4.100. Where appropriate and assessed on a site by site basis the Council may require a S106 agreement which seeks to conserve and enhance the historic environment directly affected by a proposed development. Such projects could include:
- Repair, restoration or maintenance of a heritage asset and its setting;
 - Increased public access and improved signage to and from heritage assets;
 - Interpretation panels/historical information and public open days;
 - Measures for investigation, preservation and display of archaeological remains and sites;
 - Public realm obligations, including enhancement of historic squares and spaces, registered parks and gardens, historic pavement materials, street furniture, and removal of street clutter.

Indoor Sport and Recreation

- 4.101. Policy BSC12 of the adopted Cherwell Local Plan Part 1 sets out the Council's overall approach to provision and enhancement of indoor sport and recreation.
- 4.102. The Council's PPG17 Indoor Sports and Recreational Facilities Assessment 2006 identified the current and future deficiencies in provision and contain recommendations as to how these deficiencies can be met.
- 4.103. The Council is currently undertaking a review of the District's indoor sport and recreation provision. If this additional analysis work results in amendments to the Council's standards, they will be updated in the Cherwell Local Plan Part 2. Once in place, Local Plan Part 2 standards will replace Appendix 9.
- 4.104. The PPG17 Assessment recommended local minimum standards of provision and these are set out in Appendix 9.
- 4.105. New development that generates a need for sport and recreation facilities that cannot be met by existing provision will be expected to contribute towards the provision of new facilities or the improvement/expansion of existing facilities.
- 4.106. Where on site provision is required, the LPA will expect the developer to design and gain the necessary planning consents to a specification, in accordance with Sport England requirements, and agreed by the LPA. The developer will then be expected to build the facility in accordance with the approved scheme. A commuted sum for the future maintenance of the facility will also be sought in the event that the facility is transferred to the Council.

Thresholds

- 4.107. The threshold for provision of indoor sport and recreation facilities on-site is a population that supports a 4 court facility or 683m² of floor space. i.e. 12648 people or 5080 dwellings if the average occupancy is 2.49 per dwelling. (based on the adopted standard of 0.315 badminton courts per 1000 population)

Contributions

- 4.108. If on-site provision is not possible, or appropriate, or where the development falls below the threshold, financial contributions will be sought for either off-site provision

or the improvement/upgrading of existing facilities where appropriate schemes have been identified.

- 4.109. Costs relating to the proposed improvements will be proportionate to the size or potential occupancy of the development. The levels of contributions will be reduced where the developer makes appropriate provision on-site of particular services or facilities.
- 4.110. The appropriate contribution is calculated by reference to the expected population in the development and the facilities required to support the population, multiplied by a standardised cost for the provision of the facility. Where contributions are sought for the expansion or improvement of existing facilities then the costs applying to the proposed improvements will apply.
- 4.111. Further detailed advice can be found in Appendix 9.

Nature Conservation & Biodiversity

- 4.112. Policies ESD10 and ESD11 of the adopted Cherwell Local Plan Part 1 sets out the Council's approach to the protection and enhancement of biodiversity and the natural environment, including Conservation Target Areas.
- 4.113. Relevant habitat and species surveys and their associated reports will be required to measure the biodiversity impact following the locally adopted Defra Offsetting Metrics and submitted to accompany planning applications which may affect a site of known, or potential, biodiversity value or the biodiversity/natural environment of the local area.
- 4.114. In addition to identifying biodiversity impacts, biodiversity surveys and reports should identify opportunities to deliver biodiversity enhancements.
- 4.115. Detailed advice for preparing a biodiversity survey can be found in OCC's guidance entitled 'Biodiversity and Planning in Oxfordshire' which is available on its website.
- 4.116. Where mitigation for the ecological impacts of a development can be achieved on-site, the LPA would normally secure this through a planning condition. Arrangements for the long term management and maintenance of this mitigation will normally be secured by a S106 agreement. In certain circumstances the LPA may seek a Local Ecological Management Plan, or equivalent, through a planning condition.

- 4.117. Thames Valley Environmental Records Centre has identified ten Conservation Target Areas (CTAs) in the District. They have been identified to focus work to restore biodiversity at a landscape scale through the maintenance, restoration and creation of UK Biodiversity Action Plan (BAP) priority habitats.
- 4.118. General targets for maintenance, restoration and creation of habitats have been set for each area. These will be achieved through a combination of biodiversity project work undertaken by a range of organisations, agri-environment schemes and biodiversity enhancements secured in association with development. These targets are in the process of being made more specific in terms of the amount of each habitat type to be secured within each CTA.
- 4.119. Where on-site mitigation or compensation cannot be achieved contributions may be sought towards a scheme that closely offsets the impact of the development, and which also meets the aims of the Council's BAP.
- 4.120. The Council will generally seek to fund biodiversity enhancements via a S106 agreement. This is based on the Council's position that biodiversity offsets should not be classified as infrastructure⁴ because they do not enable the development to function, nor do they provide any facility to those living within or using the new development. This means that the pooling of 5 or more contributions towards one project or plan is possible.

Open Space, Play Facilities, Outdoor Sport & Recreation

- 4.121. Proposals for new development will be expected to contribute to open space, sport and recreation provision in accordance with Policies BSC10, BSC11 and BSC12 of the adopted Cherwell Local Plan Part 1.
- 4.122. The evidence base for these policies is the District's PPG17 - Open Space, Sport and Recreational Facilities Needs Assessment, Audit and Strategy 2006, the subsequent Green Spaces and Playing Pitch Strategies 2008 and the Open Space Update 2011. The Council has now commissioned studies to update this information. Should these studies result in amendments to the open space standards, these standards will be updated in the Cherwell Local Plan Part 2.

Local Standards and Thresholds

- 4.123. The Council's strategies referred to above establish the current and future deficiencies in open space, sport and recreation provision together with recommendations as to how these deficiencies should be met. The Strategies recommend local minimum

⁴ Defra communication to Warwickshire County Council (02/11/2015)

standards of provision and these are embodied in the adopted Cherwell Local Plan Part 1. They are set out in Appendix 4 for ease of reference. The Local Plan also includes qualitative standards of provision.

- 4.124. Obligations will be sought in cases where the proposed development will result in a net increase in demand for recreational facilities. If the development is for a purpose which is unlikely to generate demand then no contribution will be sought. The LPA may, however, seek contributions from applicants for commercial development as working population increases as a result of commercial development can add to demand for facilities. People travelling in to the District for work will often use facilities close to their place of work.
- 4.125. On-site provision will be sought, in the first instance, in accordance with the minimum standards set out in Appendix 4. Detailed guidance on the Council's specification and design requirements for different types of open space/facility can be requested from the Council's Street Scene and Landscape Services Section. Agreement will be sought with the relevant town or parish council on the equipment to be purchased.
- 4.126. If the proposed development results in an increase in demand for recreational facilities, and it is not practical to provide open space as part of the development, and there are identified shortfalls in the area, the LPA will seek a financial contribution towards off-site provision. This may include contributions to the improvement/enhancement of existing areas/facilities where appropriate schemes have been identified.
- 4.127. A list of deficiencies in open space, sport and recreation and priorities by Ward is set out in the Council's PPG17 Assessment – Open Space, Sport and Recreational Facilities Needs Assessment Audit and Strategy 2006, the subsequent Green Spaces and Playing Pitch Strategies 2008, and the Open Space Update 2011. Updated information will be published by the Council as it becomes available.
- 4.128. Commuted sums for maintenance of the open space or play facility will also be sought. This sum will be based on the LPA's actual maintenance costs, to cover the future maintenance of open space, sport, and recreation and play facilities, together with a sum to cover management costs for a 15 year period. A multiplier is used to account for the costs which will vary over the 15 year period and the 'discount effect' of a lump sum up front. In some instances a capital sum contribution for the build out of provision may be deemed necessary. The Council's 2016/2017 commuted sum requirements are set out in Appendix 6. These are subject to annual updates. Further detailed information and specifications can be accessed by contacting the Council's Street Scene and Landscape Services Section.

Local Management Organisations for Open Space Management

- 4.129. It is the Council's strong preference that public open space, outdoor sports pitches and play areas on new developments continue to be adopted by the Council in agreement with the relevant town or parish council with a commuted sum. The Council will only consider a local management organisation proposed by a developer if it meets the list of conditions set out in Appendix 8 and has the agreement of the relevant town or parish council.

Public Realm, Public Art and Cultural Well-Being

- 4.130. The public realm and public art can play an important role in enhancing the character of an area, enriching the environment, improving the overall quality of space and therefore peoples' lives. Public art and the quality of the public realm are important considerations in the design and layout of a development. Public realm relates to all those parts of the built environment, either publicly or privately owned, located between and within buildings that are publicly accessible such as all streets, squares, and other rights of way as well as open spaces and parks, watercourses and canals. High quality design and good management of the public realm is essential in creating successful and vibrant places and help to integrate new development in to the surrounding area. It can help to establish an identity for an area making it memorable and providing useful landmarks, particularly if it draws inspiration from local themes or associations.
- 4.131. One of the core principles of the NPPF is to take account of and support local strategies to improve health, social and cultural wellbeing for all, and deliver sufficient community and cultural facilities and services to meet local needs. It states that it is important to plan positively for the achievement of high quality and inclusive design for all development, including individual buildings, public and private spaces and wider area development schemes. It also advocates planning policies and decisions aimed at achieving places which promote, inter alia, safe and accessible developments, containing clear and legible pedestrian routes, and high quality public space, which encourages the active and continual use of public areas.
- 4.132. The Government's Planning Practice Guidance (PPG) (paragraph 018) states that 'Public art and sculpture can play an important role in making interesting and exciting places that people enjoy using'.
- 4.133. Policy ESD 15 of the adopted Cherwell Local Plan Part 1 states that the conservation of the historic environment and securing high quality urban design are very important

in protecting and enhancing the character of the District and ensuring that Cherwell is an attractive place to live and work.

- 4.134. Other adopted policies seek to support the District's town centres and to maintaining their vitality and viability and their associated infrastructure to create vibrant retail environments. In particular Policy Bicester 5 seeks to strengthen Bicester Town Centre. Similarly Policy Banbury 7 and Policy Kidlington 2 set out similar aims for Banbury and Kidlington respectively.
- 4.135. The adopted Banbury Masterplan SPD establishes a strategic vision for Banbury with a strong economy and vibrant and attractive town centre. It identifies areas for public realm, street, junction, environmental and public art improvements.
- 4.136. The adopted Kidlington Masterplan SPD establishes a strategic vision for the village in line with the adopted Local Plan. Key themes explored include opportunities to improve the public realm within the village centre, improvements to Oxford Road and the village gateways. Work is progressing on the Bicester Masterplan with one of its aims being to improve the character and appearance of the centre of Bicester and the public realm.

Contributions

- 4.137. Contributions will be sought towards the creation and/or enhancement of the public realm in the vicinity of new development where the proposed development will have a direct relationship with a public realm improvement scheme identified in the Council's IDP.
- 4.138. The level of financial contributions will reflect the character and scope of the works required and will be negotiated on a case-by case basis.
- 4.139. Financial contributions will be sought for public realm and public art projects listed in the Council's IDP which is updated on an annual basis.

Transport & Access

- 4.140. OCC is the local highway authority and is responsible for the management and maintenance of the adopted highway network within the District. OCC also produces the Oxfordshire Local Transport Plan, is responsible for traffic management and road safety and has further responsibilities in relation to public transport, school transport and public rights of way.

- 4.141. The Oxfordshire Local Transport Plan provides the strategic framework for transport in the County. It sets out likely transport infrastructure requirements and priorities for Cherwell aimed at tackling congestion, promoting sustainable travel, safer roads, improving public health and wellbeing, and improving the street environment. Specific schemes and projects are set out in the Council's Infrastructure Delivery Plan and the Oxfordshire Infrastructure Strategy (OxIS).
- 4.142. The Council's strategy, as set out in the adopted Local Plan, for managing growth is to locate development in sustainable locations and identify appropriate and deliverable measures to meet the transport needs of the District.

Planning Obligation Requirements

- 4.143. All new developments in the District will be required to provide financial and/or in-kind contributions to mitigate the transport impacts of the development. This will support delivery of the infrastructure and services needed to facilitate travel by sustainable modes. It will also enable improvements to be made to the local and strategic road and rail networks.
- 4.144. Where there is likely to be a transport impact the LPA will require the submission of a Transport Assessment. The type and level of any contributions towards transport infrastructure provision will be considered in the Transport Assessment and negotiated with the Highway Authority.
- 4.145. Detailed technical pre-application discussions with OCC on the transport assessment are essential for major developments.
- 4.146. Direct infrastructure provision, financial and other contributions (including those for bus services) towards mitigating measures will be included in a planning obligation. The implementation of any physical changes to the highway network required to accommodate, or mitigate, the effects of a proposal will be managed through a highways agreement with the Highway Authority. For major schemes it will be necessary to define the highways agreements at the time planning permission is granted. In such cases the highways agreement will be referred to in, and linked to, the planning agreement. This will ensure certainty and transparency of implementation requirements and costs for all parties.
- 4.147. In addition to local transport mitigation, S106 contributions will be required for strategic transport schemes (identified in the IDP) related to cumulative growth using the following formula (subject to the constraints of planning legislation):

X = Cost of Scheme(s)
Y = Held/Committed funding
Z = Alternative Funding
E = Expected Growth

$$\text{S106 Contribution} = (X - Y - Z) \div E$$

- 4.148. As denoted by 'E', where a scheme (to which a strategic transport contribution is requested) serves the needs of multiple developments, the cost of the scheme will be shared proportionately across the relevant developments (subject to any pooling restrictions).
- 4.149. The LPA may also require the preparation, agreement and implementation of a Travel Plan to mitigate the impact of the development on the transport system and environment. This will be a standard requirement for major developments and, depending on the nature of the development, the Plan may be secured by either a condition or planning obligation. Travel Plans for major development will normally include targets for modes of travel to and from the site and monitoring arrangements. There will be a need for financial commitments and incentives and/or penalties for non-compliance.
- 4.150. Further details on the above transport requirements can be found in OCC's Developer Guide.

Waste

Waste Collection Containers and Recycling Banks

- 4.151. The Council is committed to a strategy of minimising domestic waste sent for disposal through the development of recycling services and the reduction and reuse of materials. The Council will seek contributions for the provision of sorting facilities to deal with domestic waste at source. Each new dwelling will be provided with appropriate containers and the collected materials will be taken away to a recycling centre.
- 4.152. The Council's current waste collection service is currently working at full capacity therefore future new development will need capital investment to ensure the service to the customer meets all the requirements set out below.

- 4.153. Building Regulations 2000 (as amended by SI 2001/3335) H6 sets out the following planning requirement:
- Adequate provision shall be made for the storage of solid waste.
 - Adequate means of access shall be provided;
 - For people in the building to the place of storage and from the place of storage to the collection point.

Policy Framework

- 4.154. The NPPF paragraph 7 notes that planning has an environmental role, including the need to minimise waste and pollution and mitigate and adapt to climate change including moving to a low carbon economy.
- 4.155. The Cherwell Low Carbon Environmental Strategy, published in December 2011, seeks to deliver the objectives of the Cherwell Community Plan through the protection and enhancement of the local environment in terms of Waste minimisation, reuse and recycling.
- 4.156. Every residential dwelling requires (2017 prices):
- 1 X blue wheeled bin for the collection of dry recyclable material (£20) at the current size of 240 litre;
 - 1 X green wheeled bin for collection of residual waste (£20) at the current size of 180 litre;
 - 1 X brown wheeled bin for the collection of garden and food waste material (£20) at the current size of 240 litre;
 - 1 X brown kitchen caddy for the collection of food waste (£4) and transferral into the brown garden and food waste bin;
 - Capital investment in waste collection vehicles to service the new development (£42).
- 4.157. Where blocks of flats are proposed, waste collection should be through the use of communal collection containers or through provision of individual bins held in a communal location.
- 4.158. Communal bins stores should not be provided for groups of houses unless they are serviced by a private road. Communal bins should be housed in a covered storage area and the following issues should be taken into account: -
- Bin stores should be built to a specification that ensures they do not detract from the visual aspects of the local environment.
 - Stores should be no more than 5 metres from the kerbside or point where the vehicle would stop (vehicle access has to be proven rather than assumed)

- To provide sufficient space for residents to deposit their waste, a minimum of 1m must be provided in front of the containers
- Where more than one bin is to be placed in a storage area, the bins must be positioned so that they can be easily accessed without users having to move other bins. In short they must not be ranked or more than one deep
- A door or gate of a minimum opening of 1600mm should also be provided. Smaller doors for residents use can be provided in addition to this requirement
- Doors should open outwards, but not over the public highway or parking spaces
- A path leading from the kerbside to the bin store should be provided, with a minimum width of 1.5m. The path should be level or a gentle slope and should not contain steps
- Stores should not be behind gates or security barriers that would prevent them being emptied
- The structure must be robust enough to withstand everyday use
- Stores should not be behind designated parking bays or require the movement of containers past or through legally parked cars
- Communal bin compounds should be far enough away from housing units so as to reduce the impact of noise during bin use and collection but sufficiently close for easy use. Eliminating the need for collection vehicles to reverse will also assist in keeping noise to a minimum
- Dropped kerbs should be provided.

4.159 Bin storage areas should be a minimum 1.8 square metres per dwelling for houses/bungalows and 1.4 square metres per dwelling for flats or multi occupancy properties.

4.160. Local recycling banks or 'bring sites' shall be provided for recyclables not separated in domestic waste collection, such as glass and clothing. Recycling banks must include at least:

- 2 x Green glass banks
- 1 x Brown glass bank
- 2 x Clear glass bank
- 1 x Textile bank

4.161. Recycling banks (bring sites) are required to serve approximately every 500 dwellings. For residential developments a financial contribution towards the capital cost of providing collection banks shall be sought. Recycling banks (bring sites) currently

require the provision of 5 containers at a cost of £500 each. This equates to a cost of £5.00 per dwelling.

Size of Development	Contribution per dwelling
Developments between 1 and 199 dwellings	£106.00 for bin and collection vehicle provision. £5.00 towards recycling banks
Developments over 200 dwellings	£106.00 for bin and collection vehicle provision. £5.00 towards recycling banks. On-site provision of recycling bank including provision of land.

4.162 Where on-site contributions are required if this cannot genuinely be provided, a financial contribution equivalent to the cost of providing and equipping a local bring site shall be paid to the Council.

4.163 Waste and recycling bin contributions will be sought on occupation of new dwellings. The provision of recycling bring sites will be sought as early in the development as possible to serve the residents of the development.

4.164 The Council’s Environmental Services department will be able to provide further advice on the Council’s requirements.

Strategic Waste Management Contributions to Household Waste Recycling Centres

4.165 Oxfordshire County Council (OCC), as Waste Disposal Authority, is required under the Environmental Protection Act 1990 (Section 51) to provide Household Waste Recycling Centres (HWRCs). The Act requires that each HWRC is:

- Situated either within the area of the authority or so as to be reasonably accessible to persons resident in its area;
- Available for the deposit of waste at all reasonable times;
- Available for the deposit of waste free of charge by persons resident in the area.

4.166 Contributions will be required should there be a need to provide additional household waste recycling capacity resulting from new development. Further information on the developer contributions for these capital costs is available from OCC.

APPENDICES

Appendix 1: Population Figures

This appendix sets out the assumed population generation rates per dwelling for Oxfordshire. Based on figures derived from OCC's Survey of New Housing (2008) and the 2014 SHMA mix, the average occupancy rate per dwelling for the whole of Oxfordshire is 2.49. This assumes that an average development would contain 15% one bed dwellings, 30% two bed dwellings, 40% three bed dwellings, and 15% four bed dwellings. (Source: SHMA 2014).

Average Occupancy per Dwelling

Dwelling Type	One Bed	Two Bed	Three Bed	Four Bed
All Ages	1.28	1.85	2.88	3.96

(Source: OCC – based on OCC Survey of New Housing 2008)

It should be noted that these figures are subject to change. The results of an updated survey of new housing are currently being collated and are due to be published in 2018.

The above occupancy rates will be applied to all residential development proposals of 399 dwellings and below. For larger developments an excel based model known as POPCAL 10 will be used to calculate a detailed population profile associated with the proposed development.

Average Pupil Generation per Dwelling

School Category (Years)	One Bed	Two Bed	Three Bed	Four Bed
Nursery (2-3)	0.00	0.05	0.10	0.12
Primary (4-10)	0.00	0.17	0.39	0.51
Secondary (11-15)	0.00	0.09	0.23	0.35
Sixth Form	0.00	0.01	0.03	0.07

(Source: OCC – based on OCC Survey of New Housing 2008)

A reduction of 15% to the pupil generation rates has been applied to take account of pupils who will be educated in the independent sector. The sixth form rates have been discounted further to account for pupils leaving school before the sixth form.

Appendix 2: Indices used for Contributions Sought on behalf of OCC

Contributions sought on behalf of OCC will be index-linked to maintain the real value of the payments.

Indexation will be applied using the formula:

$$\text{Index Linked Contribution} = \text{Revised Index Value}^{**} \div (\text{Principal Amount} \times \text{Base Index Value}^*)$$

* A base date for contributions is established in this Guide and within the planning obligation. Using this base date a precise value within a particular index can be found.

** The date that the contribution is indexed to will be identified within the planning obligation. This will usually be the date of payment. Using this revised date a precise value within a particular index can be identified.

The table below sets out the indices that will be used.

Contribution Type	Index Name	Source	Notes
Transport contributions (excluding Public Transport Services)	Baxter	Made available through the Building Cost Information Service (BCIS) of the Royal Institute of Chartered Surveyors (RCIS)	This index is a composite index comprising the following weighted indices from the Civil Engineering Formula '1990 Series' Index 1: Labour & Supervision (25%) Index 2: Plant & Road Vehicles (25%) Index 3: Aggregates (30%) Index 9: Coated Macadam & Bitumous Products (20%)
Public Transport Services Contributions	RPIX	ONS	RPIX is a measure of inflation in the UK. It is equivalent to the Retail Price Index (RPI) excluding mortgage interest payments.
All Other contributions	Tender Price Index of Public Sector Building (Non-housing) PUBSEC	Made available through the Building Cost Information Service (BCIS) of the Royal Institute of	The PUBSEC index is compiled from bills of quantities of accepted tenders forwarded from

		Chartered Surveyors (RICS)	Government Departments. The Index is an indicator of the trend in accepted tender prices for constructing public sector works in Great Britain. The results are published quarterly.
--	--	----------------------------	--

Appendix 3: Education Infrastructure: Calculation of Contributions

Contributions for educational infrastructure will be calculated by multiplying the net increase in the forecast number of pupils (of the appropriate age) moving in to the new housing by the 'cost per pupil' of the required additional infrastructure.

Average Pupil Generation per Dwelling

School Category (ages)	One Bed	Two Bed	Three Bed	Four Bed
Nursery (2-3)	0.00	0.05	0.10	0.12
Primary (4-10)	0.00	0.17	0.39	0.51
Secondary (11-15)	0.00	0.09	0.23	0.35
Sixth Form	0.00	0.01	0.03	0.07

These rates are derived from the Oxfordshire Survey of New Housing (2008). Please note that survey updates may necessitate revised pupil generation figures.

A reduction of 15% to the pupil generation rates has been applied to take account of pupils who will be educated in the independent sector. The sixth form rates have been discounted further to account for pupils leaving school before the sixth form.

Based on the current percentage of pupils being educated in Special Educational Needs (SEN) schools in Oxfordshire 1.1% of the total pupils generated by the development will need to be educated in a SEN school (the majority of pupils with a statement of special educational needs are educated in 'mainstream' schools).

The table below sets out the standard cost per pupil of providing an extension to an existing facility. These standard costs will be used unless there is a specific scheme cost or where a new school is required. The figures are from the Department for Education (DfE) and have been adjusted for Oxfordshire using the DfE published location factors.

Table 1: Cost per pupil for extensions to existing facilities

	Total Cost per Pupil for Extensions (Cost base for indexation4Q16)
Nursery	£13,901
Primary	£13,901
Secondary	£21,033
Sixth Form	£22,454
SEN	£38,751

To give an indication of the contributions which may be necessary to address the impact of proposals the cost per pupil for extensions to existing facilities is multiplied by the pupil generation rates per dwelling to reach the contributions per dwelling shown below.

Table 2: Contribution per dwelling

	1 Bed	2 bed	3 Bed	4+ bed
Nursery	£0	£695	£1,390	£1,668
Primary	£0	£2,363	£4,948	£6,471
Secondary	£0	£1,893	£4,415	£6,718
Sixth Form	£0	£225	£615	£1,434
SEN	£0	£115	£277	£396

If a development creates all or part of the need for a new school a different level of contribution reflecting the actual estimated cost for the new school or part thereof will be applied. Where the development substantially necessitates a new school, developers will be expected to provide at nil cost to the education provider a suitable site (both in terms of size and location) which is fully serviced, fully decontaminated and remediated.

The Tables below give an indication of the likely costs of new educational infrastructure:

Cost of New Build Primary Schools

Size of School	Number of pupils accommodated		Cost (Excluding Land & Abnormals)	Cost Base
	aged 2-3	Aged 4-10		
1 Form Entry + nursery	60	210	£ 7,212,015	4Q 16
1.5 Form Entry + nursery	75	315	£9,166,019	4Q 16
2 Form Entry + nursery	90	420	£ 10,952,913	4Q 16

Cost of New Build Secondary Schools

Type of School	Number of Pupils accommodated	Cost (Excluding Land & Abnormals)	Cost Base
Secondary (11-16)	600	£ 17,847,000	4Q 16
Secondary (11-16)	900	£ 24,338,000	4Q 16
Secondary (11-16)	1200	£30,932,000	4Q 16
Secondary (11-18)	700	£21,438,000	4Q 16
Secondary (11-18)	1100	£30,288,000	4Q 16
Secondary (11-18)	1500	£39,145,000	4Q 16

Appendix 4: Local Standards of Provision – Outdoor Recreation.

Type of Provision	Quantitative Standard	Accessibility Standard	Minimum Size of Provision	Threshold for On-Site Provision
General green space (parks & gardens/natural semi-natural/amenity green space)	2.4ha per 1000 urban dwellers	5 minute walk (amenity open space) (400m)	200sqm	10 urban dwellings
	2.74ha per 1000 rural/urban dwellers	15 minute walk other (1200m)		6 rural/urban edge dwellings
Play space (combining provision for younger and older children including MUGAs)	0.78ha per 1000 people	5 minutes walk (400m) except for NEAPs 15 minute walk (1200m)	LAP – 100sqm activity zone; 400sqm including buffer	10 dwellings (for a LAP)
			LEAP – 400sqm activity zone; 3600sqm including buffer	50 dwellings (for a LEAP and LAP)
			NEAP – 1000sqm activity zone; 8500sqm including buffer	100 dwellings for a NEAP and LEAPs/ LAPs
			NB: In some cases a combined all-age area of play will be preferable to provision of LAPs/LEAPs/NEAPs.	
Outdoor sports provision (combining tennis courts, bowling greens, golf courses and playing pitches) (to be accompanied by changing facilities where appropriate)	1.13ha per 1000 people	Football, rugby, cricket: 10 minute walk (800m) urban areas, 10 minute travel time (8km) rural areas Tennis courts: 15 minute walk (1200m) urban areas, 15 minute	0.12ha	65 dwellings

Type of Provision	Quantitative Standard	Accessibility Standard	Minimum Size of Provision	Threshold for On-Site Provision
		travel time (12km) rural areas Bowling greens, golf courses: 15 minute travel time (12km) Hockey: 20 minute travel time.		
Allotments	0.37ha per 1000 people	10 minute walk (800m)	0.2ha	275 dwellings

Appendix 5: Summary of demand for open space, sport and recreational facilities by development type

Type of Green space	Houses	Flats	Bedsits	Hostels	Sheltered Accom	V. Sheltered accom	Care homes	Student accom
Parks and gardens	yes	yes	yes	yes	yes	no	no	yes
Natural/semi natural green space	yes	yes	yes	yes	yes	no	no	yes
Amenity green space	yes	yes	yes	yes	yes	no	no	yes
Play provision	yes	yes	no	no	no	no	no	no
MUGAs	yes	yes	no	no	no	no	no	yes
Tennis courts	yes	yes	yes	yes	no	no	no	yes
Bowling greens	yes	yes	yes	yes	yes	no	no	yes
Golf courses	yes	yes	yes	yes	no	no	no	yes
Allotments	yes	yes	yes	yes	yes	no	no	yes
Pitches	yes	yes	yes	yes	no	no	no	yes

Appendix 6: Commuted Sums for Children's Play Space, Sports Pitches, Public Open Space

The commuted sums for capital infrastructure are based on current contractor costs. The landscape maintenance rates are taken from the annually updated competitive rates of the Council's landscape maintenance contract. (quoted sums from 2016/2017)

Each provision is multiplied by the current multiplier to commute the payment over a 15 year period

Current Inflation Figure = CPI 0.5%

Current Multiplier - 15

Play Areas – Maintenance Provision	Total Cost (£)
LAP – Equipped (400m ²)	27501.52
LAP – Free Play Zone (400m ²)	12394.26
LEAP (3600m ²)	108761.69
LEAP/LAP Combined (4000m ²)	121492.13
NEAP (9500m ²)	249994.49
NEAP/LEAP Combined (13100m ²)	350435.88

Play Areas – Capital Provision	Total Cost (£)
LAP – Equipped (400m ²) Local Area for Play (fencing, furniture, surfacing & signage)	20779.15
LAP – Free Play Zone (400m ²) Local Area for Play (fencing, furniture, path surfacing & signage)	10882.91
LEAP (3600m ²) Local Equipped Area for Play (play equipment, fencing, furniture, surfacing & signage)	60783.45
LEAP/LAP – Combined (4000m ²) Local Equipped Area for Play (play equipment, fencing, furniture, surfacing & signage)	74723.30
NEAP (8500m ²) Neighbourhood Equipped Area for Play (play equipment, MUGA, fencing, furniture, surfacing & signage)	240326.82

Outdoor Sports Facilities – Maintenance Provision	Total Cost (£)
Tennis/netball/basketball court	27468.25
Bowling Green	173303.86
Cricket Square	53197.08
Football Pitch - Senior	70195.95
Football Pitch - Junior	61589.12
Synthetic Pitch – 400mm 3G (130m x 90m)	111638.94
Pavilions	
2 changing room – Tennis & Bowls	43164.75
2 changing room – Football – 1 pitch	41338.67
4 changing room – Football – 2 pitches	55084.05
6 changing room – Football – 3 pitches	71871.57

Outdoor Sports Facilities – Capital Provision	Total Cost (£)
---	----------------

Tennis/netball/basketball court	40903.50
Bowling Green	122449.20
Cricket square	43267.93
Football pitch - Senior	77647.64
Football pitch - Junior	62670.80
Synthetic pitch – 40mm 3G (130m x 90m)	582900.00
Pavilion	
2 changing room – Tennis & Bowls	431648.51
2 changing room – Football – 1 pitch	413392.68
4 changing room – Football – 2 pitches	550840.50
6 changing room – Football – 3 pitches	718715.70

Green Infrastructure – Maintenance Provision	Total Cost (£)
Public Open Space (cost per hectare)	93222.18 (per m ² – 9.32)
Hedge Maintenance (cost per 1000 Lnm)	14354.42 (per m ² – 14.35)
New Woodland Area Maintenance (cost per 1000m ²)	23233.59 (per m ² – 23.23)
Mature Woodland Area Maintenance (cost per 1000m ²)	4629.23 (per m ² – 4.63)
Mature Tree Management (cost per 10 trees)	3348.23

Green Infrastructure – Capital Provision	Total Cost (£)
Public Open Space (cost per hectare)	110829.85
Hedge Planting (cost per 1000Lnm)	6051.91
New woodland planting (cost per 1000m ²)	6545.57

Water Feature – Maintenance Provision	Total Cost (£)
Pond maintenance (per 500m ²)	21904.28 (per m ² – 43.81)
Ditch maintenance (per 500 m ²)	16290.05 (per m ² – 32.58)
Stream Maintenance (per 500m ²)	8969.63 (per m ² – 17.94)
Balancing Pond maintenance (per 500m ²)	5812.92 (per m ² – 11.63)

Allotments – Maintenance Provision	Total Cost (£)
Allotment Areas (cost per hectare)	42190.84 (per m ² – 4.22)
Allotments – Capital Provision	
Allotment Areas (cost per hectare)	255713.11

Off- Site Contributions	Total Cost (£)
In lieu of Children’s Play Facilities – Developments (10+ dwellings)	23068.62 (per dwelling – 2306.86)

In lieu of Sports Pitch provision- Developments (10+ dwellings)	20170.30 (per dwelling- 2017.03)
In lieu of Open Space Provision- Developments (10+ dwellings)	14262.65 (per dwelling- 1426.27)

Appendix 7: Open Space, Sport and Recreation: Process and Procedures for Applications where On-Site Provision is Required.

Pre-application

The LPA will identify the on-site open space, sport (indoor/outdoor), recreation and play provision required, and the planning obligation (including commuted sums/rates) that is required.

The LPA will identify requirements in consultation with the appropriate Parish and Town Councils. Normally Town and Parish Councils are the preferred custodians and providers of open space, play, sport and recreation facilities and they will be expected to take ownership or adopt the facilities. In exceptional cases Town and Parish Councils may not be willing or able to take ownership or adoption and in these cases the LPA will proceed on the basis that the District Council will be generally be responsible for the long term ownership, management and maintenance after transfer.

Where possible any options for off-site provision will be identified at this stage.

Application

The same procedure for Pre-application applies. At this stage the LPA will seek the agreement of Parish and Town Councils to the concept and layout, and /or landscaping being undertaken, of the open space, sport (indoor/outdoor), recreation and play provision prior to the granting of planning permission. Their commitment to future ownership or adoption will also be expected.

At application stage specific proposals must be identified and defined to support preparation of planning obligation documents.

Approval of Submitted Open Space, Sport, Recreation and Play Proposals (Construction Details)

Conditions and planning obligations will require the developer to submit detailed proposals to the LPA for approval. These proposals must include detailed drawings, specifications, guarantees (transferable) and maintenance specifications to BS/EN standards. The LPA will provide formal approval to the developer once internal consultations are completed, or seek amendments to the open space, sport, recreation and play proposals, as necessary.

Approvals will be managed as follows:

- The LPA will discharge the conditions/obligations when open space, sport, recreation and play provision details are deemed acceptable by the Council.
- It is important to note that the development must not commence until there has been submitted to and approved by the LPA a scheme (including a phased programme [on large developments]) for the laying out, hard and soft landscaping and equipping of the open space, sport, recreation and play provision including, supporting changing accommodation.
- The planting, turfing and seeding to the open space, sport, recreation and play provision is to take place during the first planting season following the commencement of development [or phase of development]. The setting out of the landscaping and equipping of the open space, sport, recreation and play provision is to be in accordance with the approved scheme to the satisfaction of the LPA.

- The Developer is required to notify the LPA on the commencement and completion of the open space, sport, recreation and play provision, and must maintain the provision to its original standard for a period of twelve months following its completion, as certified by the LPA, replacing items (including surfaces) which are defective in the opinion of the LPA in accordance with the approved details contained in the scheme, and replacing any trees or shrubs which may die, are removed or become seriously damaged or diseased with others of similar size and species to the satisfaction of the LPA, The Developer is to carry on maintaining the open space, sport, recreation and play provision and supporting changing accommodation until these facilities are transferred, and to give access to the LPA's officers to enter to the area/s to carry out inspections.
- The LPA is to be notified by the developer on the commencement and completion of the open space, sport, recreation and play provision and supporting changing accommodation and the LPA will inspect the development at the following stages:
 - a) setting out,
 - b) drainage,
 - c) equipment installation,
 - d) surfacing; and
 - e) planting (including grass / wildflower seeding)

The developer is to ensure that a report is to be provided by a recognised body certifying that the construction is adequate for the intended use and submitted to the LPA.

Monitoring Development

The Developer is to provide an indicative timetable of on-site operations including indicative dates for the stages of construction and completion of the open space, sport, recreation and play provision to the LPA for the Council's coordinated monitoring of the open space, sport, recreation and play provision and supporting changing accommodation. It is necessary for the Developer to advise the LPA when the laying out of the open space, sport, recreation and play provision is taking place.

The LPA will monitor the commencement of development, compliance with conditions and planning obligations.

The LPA will endeavour to carry out inspections within 5 working days of notification by the developer at the stages listed above with the aim of ensuring that works are satisfactory, to identify remedial works when necessary and areas completed in accordance with the approved plan. Records will be kept on monitoring sheets of all inspections, and minutes of site meetings.

Enforcement (before practical completion)

The LPA will take enforcement action on conditions and obligations, should it be necessary, and will ensure good record keeping as evidence and provide expert witness statements, if required.

Practical Completion

The Developer must arrange for satisfactory Royal Society for the Prevention of Accidents (RoSPA) inspections and the subsequent reports to be forwarded to the LPA. They must also obtain transferable

guarantees for equipment which must also be sent to the LPA. For natural sports pitches or courts a satisfactory post completion 'fit for purpose' report from a recognised body, such as the Sports Turf Research Institute (STRI) or a member of the Sports and Play Construction Association (SAPCA), will be required. The Developer is to provide two sets of as-built drawings for the LPA. The LPA will carry out inspections of the completed open space, sport, recreation and play provision and inform the Developer of any defects in writing. The Developer must correct the defects as soon as possible and inform the LPA's planning department when the defects have been remedied, as early as possible. The LPA will then issue certificates of practical completion, detailing outstanding items of work, copies of which to be provided to the Developer and contractor.

The Developer is to confirm to the LPA that remedial works to defects are complete. Once the LPA has inspected the remedial works and found them to be satisfactory the LPA will then confirm that all works are complete in accordance with the approved plans and the open space, sport, recreation and play provision is acceptable for adoption.

The LPA will check and revise commuted sum calculations, if required (in cases where a schedule of rates was given by the District Council and shown in the planning obligation).

The Developer must ensure that the play areas/MUGAs are opened for use once practical completion is granted. Insurance cover must be provided by developer until formal transfer by the District. The developer should provide signs at each facility providing contact details for the public to report any defects. Joint monitoring of the open space, sport, recreation and play provision by the Developer and the Council is necessary to ensure the sites are safe for use. The LPA will consider any proposed change to the twelve month liability period by the Developer and agree to any changes in writing, if appropriate.

A twelve month maintenance period is required for open space and play provision to ensure that landscape features become established prior to the areas being transferred.

On sports pitches a minimum of two years is required before transfer from the date of seeding and completion to allow for establishment of the pitches.

Final Completion

The LPA will undertake an inspection of the open space, sport, recreation and play provision one month before the expiry of the twelve month defects period. The developer is to bring the space, sport, recreation and play provision up to the adoptable standard. The developer shall also provide the LPA with a post installation inspection and safety audit from a RoSPA -approved expert for play areas and informal open space. For sports pitches or courts a satisfactory post completion report from a recognised body such as STRI or SAPCA member will be required.

If all areas are satisfactory the LPA will issue certificates of final completion to the Developer.

Transfer

The Developer will start the legal transfer to the LPA, accompanied by an appropriate contribution towards its maintenance after adoption. This contribution will normally be in the form of a commuted sum, to cover 15 years maintenance, secured through a planning obligation document.

The LPA's finance section is to set up a new accounting code for each commuted sum. This will be specifically linked to the planning application reference number. All payments are to be made to the

LPA (by cheque or BACS) under the designated code with details of the application reference number and accompanied by a breakdown of capital and maintenance contributions.

The receiving LPA's Legal Team will complete the transfer of the open space, sport, recreation and play provision to the LPA on receipt of the commuted sum. On completion of the legal transfer the LPA will take over the maintenance responsibility. The LPA will then proceed to transfer or lease the provision to the relevant town or parish council along with any commuted sum balances.

Developer Responsibilities for maintenance of open space, sport, recreation and play facilities.

The long term maintenance of open space, sport, recreation and play facilities is critical to ensure that they achieve and maintain their maximum potential benefit and value. In the case of new housing developments, the developer will be required to make provision for the appropriate amount and type of open space, sport, recreation and play provision, plus supporting changing accommodation.

The developer is to submit to the LPA management plans and maintenance schedules to ensure that the soft/green areas of open space, sport, recreation and play facilities are established successfully for the benefit of the community and biodiversity. The maintenance specification is to be written and implemented in accordance with the relevant EN/BS standards.

Maintenance of Sports Pitches

The Developer's Contractor will be responsible for the maintenance of the grass sward for 2 years from the date of practical completion. A maintenance specification is to be submitted to the LPA. This maintenance specification must comply with industry best practice.

Maintenance of Play Areas and MUGAs

The Developer's Contractor will be responsible for the maintenance of the play areas and MUGAs for 12 months from the date of practical completion. A maintenance specification is to be submitted to the LPA and must comply with industry best practice.

Maintenance of Open Space and Recreation Areas

The Developer's Contractor will be responsible for the maintenance of open space and recreation areas for 12 months from the date of practical completion. A maintenance specification is to be submitted to the LPA and must comply with industry best practice.

Appendix 8: Local Management Organisation Requirements for Public Open Space, Outdoor Sports Pitches and Play Areas

NOTE: It is the Council's strong preference that public open space, outdoor sports pitches and play areas on new developments continue to be adopted by the Council in conjunction with the relevant town or parish council with a commuted sum. The Council will only consider a local management organisation proposed by a developer if it meets the list of conditions set out below and has the agreement of the relevant town or parish council.

- Provide a method statement of how the funding will be provided to the Management Company to cover maintenance costs in perpetuity.
- Provide a method statement of how capital funding for replacement items/unforeseen costs will be generated.
- The Council's twice yearly inspection costs will be paid as a commuted sum for the first fifteen years for monitoring the management company's maintenance standards.
- Confirmation that the standards of maintenance will be identical to the standard set out in the Council's Technical Specifications for Landscape and Cleansing Operations.
- Confirmation that a diminishing bond will be put in place to cover the Council's costs of maintenance and management of the site, to be available for the council to draw upon if standards delivered by the management company do not match those set out in the Council's Technical Specifications.
- Confirmation that the Council has the step in rights if the management company let standards drop below the standards set out in the Council's Technical Specification along with the rights to recover costs.
- Confirmation that at no point will the service charges levied on residents increase the rents for affordable housing above 80% of the open market rents as published by the Home and Communities Agency (HCA), where affordable rents are in place.
- Confirmation that all public open space, outdoor sports pitches and play areas remain accessible and usable by the general public in perpetuity.
- If the management company goes in to administration, confirmation that title deeds of all public open space, outdoor sports or play areas transfer to the Council as the provider of last resort.

Appendix 9: Local Standards of provision – Indoor Recreation

Facility Type	Local Quantity Standard per 1000 Population
Sports Hall	0.315 badminton courts
Swimming Pool	9.31 m ²
Squash Courts	0.059 courts
Health & Fitness	5.28 stations
Indoor Bowls	0.045 rinks
STPs	0.046 pitches
Athletics Tracks	0.0012 8 Lane facility
Community Centre	185m ²

Sports Hall

There is a need for 0.315 badminton courts (sports hall) or 53.78m² per 1000 people (or 0.054m² per person). This figure is based on the area of a four court hall plus circulation, reception and changing space (683m²). The cost of construction is £2251 per m² plus land costs and VAT (at 2016). The cost per person for sports hall provision is therefore £121.56 plus land costs and VAT.

Swimming Pool

There is a need for 9.31m² of swimming pool area per 1000 people or 0.0931m² per person. The cost of construction of a new build swimming pool, using average of Swim 25 commercial product and RICS Building Cost Information Service construction costs, would be £2,296 per m² plus land costs and VAT (at 2010). The cost per person for swimming pool provision is therefore £213.76 plus land costs and VAT.

Appendix 10: On-Site Community Facilities and Indoor Sport Provision: Process and Procedures

The LPA will identify the on-site indoor sport and/or community centre provision required and will provide the developer with a specification for the floor space and the facilities that need to be provided on site. At application stage specific proposals must be identified and defined to support the preparation of planning obligation documents.

Conditions and planning obligations will require the developer to submit detailed proposals to the LPA for approval. These proposals must include detailed drawings, specifications and guarantees (transferable). The LPA will provide formal approval to the developer once internal consultations are completed, or seek amendments to the proposals as necessary.

The developer will construct the building/facility in accordance with the approved details and ownership of the building/facility will be transferred to the Council following a satisfactory final inspection. The Council may subsequently transfer the ownership to the relevant parish authority or a suitable community association. In exceptional circumstances the Council may accept alternative management arrangements for the facility. These circumstances will be assessed on a case by case basis.

The timing of provision of the facility will be negotiated on a case by case basis but the size of the development and proximity to existing facilities will be a determining factor. In the case of the community hall provision of a suitable temporary facility should be available to the residents on completion of the 100th dwelling.

Appendix 11: Community Hall Facilities

In accordance with the recommendation of the 2017 CCDS Study a required community hall facility standard of 0.185m² per person will be applied.

Capital Cost Estimates for Provision of New/Extended Community Hall Facility

	Capital Cost	Capital Cost/m ²	Cost per person
1 storey	£1,600,000	£2,315	£428
2 storey	£1,820,000	£2,633	£488
Hard landscaping	£331,000		£89
Soft landscaping	£10,000		£3
TOTAL			£520 (1-storey)
			£580 (2-storey)
Horizontal extension to existing community hall		£2,920	
Refurbishment of existing community hall		£2,482	

Costs are correct at 2017

Calculations are based on the construction of a 691sqm building.

The cost estimates are inclusive of main contractor preliminaries, overheads and profit, project/design team fees and client contingencies.

Contributions towards the maintenance of the facility will also be sought. This will cover a 15 year period following the transfer of the facility to the LPA (or community association). A list of typical maintenance tasks and costs is set out below:

Annual Costs (Repeated Each Year)	One off costs
Fire alarms and extinguishers	Electrical testing
Intruder alarms	Internal decoration
Boiler service and gas safety	Replacement boiler/water heaters
Water monitoring and legionella	Replacement extract fans
Emergency light maintenance	Replacement external lighting
Lift maintenance	Replacement shower fittings
Miscellaneous repairs	Replacement light fittings
Business rates	
Water rates	
Insurance	
Gas	
Electricity	

Guide Estimate for Commuted Sum for maintenance = £298.88 per m² (2017)

(Cost estimates are based on existing maintenance cost for community hall facilities in the District. However, actual commuted maintenance costs required from the developer will be assessed on a site by site basis).

Appendix 12: Community Development

On development sites in excess of 100 new dwellings, developers are expected to provide the costs of employing a community development worker as follows:

100>250 homes: 0.4 FTE for 1 year

250> 500 homes: 0.4 FTE for 2 years

500> 1000 homes: 0.8 FTE for 2 years

1000+ homes: 0.8 FTE for 2.5 years.

Community Development Workers should be in place once a certain threshold of new homes have been built. This threshold will be established on a case by case basis.

Appendix 13: Apprenticeships & Skills

Draft Cherwell District Council Interim Position Statement on Planning Obligations for Construction Apprenticeships and Skills, April 2016

1.0 Background

- 1.1 The Government has made a commitment to 3 million new apprenticeship starts in England between 2015 and 2020¹. Apprenticeships are full time paid jobs which incorporate on and off the job training. A successful apprentice will receive a nationally recognised qualification on completion of their contract. Public sector bodies will be required to employ apprentices and set targets to increase apprenticeship numbers². There are over 200 different types of apprenticeship currently available in England, through existing apprenticeship frameworks. Apprentices can receive qualifications ranging from that equivalent to 5 GCSE passes to that equivalent to a degree.
- 1.2 Cherwell District Council (CDC) has pledged during 2016-2017 to “continue to support skills development, apprenticeships and job clubs in order to help support local employment and reduce the number of young people not in education, employment or training”³. In particular CDC is keen to increase the number of apprenticeships and related skills that come forward through the construction of new development areas in the District. This aspiration is in line with the latest report from the Construction Skills Network which forecasts that in the south east region alone, 1730 construction jobs are expected to be created every year over the next 5 years, but skill shortages are beginning to emerge⁴.
- 1.3 Oxfordshire in general and the Cherwell District in particular, are experiencing a large increase in construction to provide new homes and jobs for the area. However there is a shortage of skilled construction workers to support this growth. The table below shows the trends over the last four years. Construction apprenticeships are decreasing. They made up 6.6% of the total in 2011/12 and falling to 4.1% in 14/15. Furthermore labour market information gathered by the Oxfordshire Local Enterprise Partnership (OXLEP) has shown that within the local construction sector, it is the elementary construction occupations that are most in demand⁵.

Construction, Planning and the Built Environment	2011/12	2012/13	2013/14	2014/15, Q4 provisional
Count of construction apprenticeship starts	300	250	170	180
% of all apprenticeships	6.6%	5.6%	4.4%	4.1%

Source: Economy and Skills, Oxfordshire County Council.

- 1.4 The need to increase the number of apprenticeships locally is picked up by both the Oxfordshire Local Economic Partnership (OxLEP) and the South East Midlands Economic Partnership (SEMLEP). OxLEP’s Strategic Economic Plan is committed to delivering 1150

³ Cherwell District Council Performance Pledges 2016-2017

⁴ Construction Skills Network South East Report 2016-2020

⁵ Oxfordshire Labour Market Information Summer 2014, Oxfordshire Skills Board Page 39 more apprenticeships

to 2020 within Oxfordshire⁶. The SEMLEP Strategic Economic Plan is seeking just over 94,000 apprenticeship starts within the SEMLEP area between 2015 and 2020. Of these, it is anticipating that 7017 will be created within the Cherwell District⁷. It notes in particular that there is a shortage of skills and an aging workforce in the construction sector across the SEMLEP area and that there are significant opportunities for jobs growth in these sectors across the SEMLEP area⁸.

- 1.5 Cherwell District Council's Economic Development Strategy (CDCEDS) identifies the provision of apprenticeships as one way to help people into employment⁹. In essence, the growth envisaged in the Cherwell District Council Local Plan Part 1 (July 2015) will both benefit from a healthy supply of construction apprentices as well as providing an ideal environment to support the training of new entrants to the construction trades. In respect of North West Bicester, the CDCEDS seeks to implement the NW Bicester Economic Strategy as one of the means to provide, encourage and support skills needed to develop NW Bicester and cites local apprenticeships as an outcome of this initiative¹⁰.
- 1.6 This note will set out the national and local planning policy context before describing the approach to be taken in the negotiation of construction (and related trades) apprenticeships for planning applications for certain categories of new development by Cherwell District Council. It is intended that this note will operate as informal guidance which will eventually help inform a relevant policy within the Cherwell District Council Local Plan Part 2 and the Planning Contributions Supplementary Planning Document, which are currently in the early stages of preparation.

2.0 National Planning Policy Context

2.1 The National Planning Policy Framework March 2012 (NPPF)

The Framework is predicated on ensuring that the planning system promotes sustainable development. The Framework notes that there are 3 dimensions to sustainable development and that the planning system should correspondingly perform an environmental role, a social role and an economic role¹¹. In terms of the economic role, the NPPF notes that pursuing sustainable development involves "making it easier for jobs to be created in cities, towns and villages."¹² It further notes that "plans and decisions need to take local circumstances into account, so that they respond to the different opportunities for achieving sustainable development in different areas."¹³

- 2.2 Under the heading "Building a strong, competitive economy" the NPPF states that "the Government is committed to securing economic growth in order to create jobs and prosperity..."¹⁴ It continues by stating that the Government is committed to ensuring that the planning system does everything it can to support sustainable economic growth and that

⁸ Op cit. paragraph 2.5.19, page 26

⁹ Economic Development Strategy for Cherwell, North Oxfordshire 2011-2016, Cherwell District Council, pages 32, 45

¹⁰ Op Cit. page 47

¹¹ NPPF (March 2012) paragraph 7

¹² NPPF (March 2012) paragraph 9

¹³ NPPF (March 2012) paragraph 10

¹⁴ NPPF (March 2012) paragraph 18

planning should operate to encourage this. It concludes the paragraph by stating that significant weight should be placed on the need to support economic growth through the planning system.¹⁵

2.3 In terms of how apprenticeships can be delivered through the planning system, CDC proposes that this is achieved through planning obligations attached to planning consents, whichever is the most appropriate depending on the individual circumstances of each application and site. In drafting conditions and agreements, CDC will take account of the NPPF and Planning Practice Guidance.

2.4 Eco Towns Supplement to Planning Policy Statement 1 July 2009 (SPPS1)

The SPPS1 specifically applies to the North West Bicester site. In a similar way to the NPPF, there are no explicit references to the provision of apprenticeships in the Supplement. However section ET10 Employment states that an economic strategy should be produced to accompany planning applications *for eco towns that demonstrate how access to work will be achieved. One of the supporting documents accompanying the NW Bicester Masterplan submitted by A2 Dominion is the NW Bicester Economic Strategy (21 March 2014) which contains a commitment to apprenticeships. This will be explored in more detail in the section below which deals with the local planning policy context.*

3.0 Local Planning Policy Context

3.1 The Cherwell Local Plan 2011-2031 Part 1 (adopted July 2015)

Securing the economic future of the District is the main priority of the Local Plan¹⁶. The main focus of the Plan is strengthening the local economy, job creation, inward investment and company growth, as well as building cohesive communities.¹⁷ In particular, the Plan notes that relatively large numbers of people in Cherwell are without qualifications and basic skills, so the level of education and training needs to improve¹⁸. The Plan contains 5 strategic objectives for developing a sustainable local economy including SO5 which aims to “.....support an increase in skills and innovation....¹⁹”. The Plan notes that “there will also need to be promotion of local training providers, an improvement of the relationships between companies and schools, colleges and the universities....²⁰”. However there are no strategic policies that deal with the provision of apprenticeships / increasing skills in the workforce as these are detailed policy areas more appropriately covered in the Cherwell Local Plan Part 2.

3.2 However the supporting text to Policy Bicester 1: North West Bicester Eco-Town states that an economic strategy will be required and there should be local sourcing of labour, including providing apprenticeships during construction²¹. Policy Bicester 1 itself repeats the requirement for an economic strategy to be prepared to support planning applications for the site and amongst other matters, to demonstrate how access to work will be achieved.

¹⁸ Op cit. paragraph A14

¹⁹ Op cit. page 31

²⁰ Op cit. paragraph B14

²¹ Op cit. paragraph C39

3.3 North West Bicester Supplementary Planning Document (adopted February 2016)

The North West Bicester Supplementary Planning Document amplifies Policy Bicester 1 of the Local Plan Part 1. Under Development Requirement 5- Employment, it states that employment proposals for NW Bicester will be required to “support apprenticeship and training initiatives”. In Section 6 Delivery, the SPD states that “employment opportunities and facilities to support job creation providing a mix of uses and access to job opportunities” should be taken into account to deliver the masterplan vision through the submission of planning applications. It further states that contributions towards local employment, training and skills will be required through legal agreements from developers²².

3.4 NW Bicester Masterplan: Economic Strategy (March 2014)

In line with Section ET10 of the PPS1 Supplement and Policy Bicester 1 of the Cherwell Local Plan this Economic Strategy has been prepared by SQW on behalf of the promoters of the NW Bicester site to support the NW Bicester Masterplan. Figure 3-2 sets out the contribution the NW Bicester site will make to local economic objectives. It states that “NW Bicester will support the expansion of education and training opportunities in Bicester by increasing demand and the sponsorship of apprenticeships, for example in eco construction”. It notes that NW Bicester will create a long term (20+ year) demand for local skills relating to eco construction.

3.5 Paragraph 5.6 of the Economic Strategy states that “training programmes, including apprenticeships, will be provided to ensure local residents and firms can acquire the necessary skills for NW Bicester, but that these skills will also be in increasing demand elsewhere as construction standards improve and retrofit programmes are rolled out”.

3.6 Finally, Table 6-1 Economic Development Action Plan consolidates all of the above statements by setting out that OCC and CDC will develop a Bicester wide apprenticeship strategy for all the development in Bicester of which NW Bicester is a part. It further states that apprenticeship schemes will be agreed with developers, the local colleges and other suitable local training providers.

4.0 How this Guidance will be applied

4.1 Approach

Cherwell Council will seek to apply this Guidance across its entire administrative area. It will seek the provision of a stated target number of new construction apprenticeships (or apprenticeship starts) as part of a required Employment, Skills and Training Plan (ESTP) for each proposal for new development, to be secured via S106 agreement as explained in paragraph 2.3 above. CDC is keen that the submission of ESTPs should not be unduly onerous for developers, hence an ESTP framework is provided for information at Appendix A to this Document. This can be reproduced by developers and completed by filling in the relevant numbers.

4.2 This Guidance will apply to the types of new development and subject to the thresholds set out in the table below. However if proposed developments fall below these thresholds but developers would still like to provide new construction apprenticeships, then the Council will

²² North West Bicester Supplementary Planning Document (adopted March 2016), page 54.

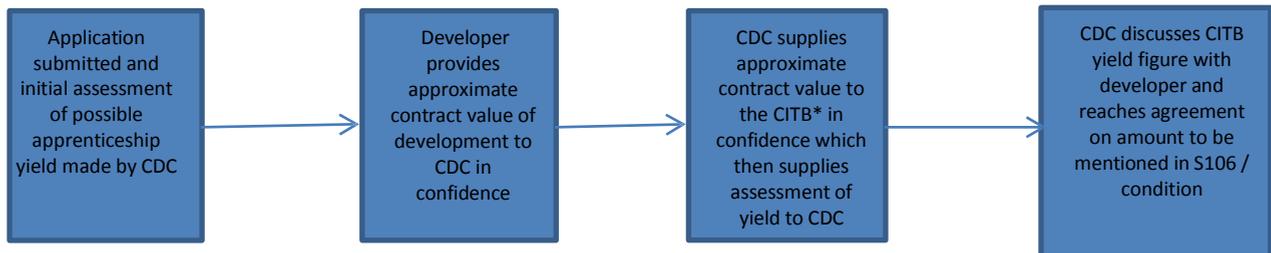

encourage and seek to support them in doing so. As the number of stated new apprenticeships will be expressed in planning obligations as a stated target to be achieved, if developers and / or their contractors are able and willing to exceed these, then the Council will encourage them to do so.

Type of Proposed New Development	Threshold	Indicative number of apprenticeships to be achieved
Housing (Use Class C3)	50 units	2.5 apprenticeships per 50 units
Non-residential uses	1000 sq m of floorspace	3 apprenticeships per 1000 sq m of floorspace
Utilities and highways infrastructure applications	None	Subject to discussion with developers on a case by case basis

4.3 In essence, while Cherwell District Council is keen to achieve an increase in new construction apprenticeship opportunities in the District through the planning system, it also considers that such arrangements need to be arrived at through discussion and agreement with developers, rather than imposed in a top-down fashion. It will be counter-productive if the numbers of construction apprenticeships required by CDC are unrealistic because they are actually unable to be achieved.

4.4 Process

The purpose of the information in the above table is to provide guidance for developers and will be the starting point in discussions with developers about the amount of apprenticeships each application could yield. This is because the Council understands that each site’s circumstances will vary and that apprenticeship yield largely relates to development cost / contract value. CDC envisages the approach to agreeing the apprenticeship yield from each relevant application could follow the process such as the one set out in the diagram below:

* CITB = Construction Industry Training Board

4.5 This process has already been piloted successfully with planning applications which form part of the NW Bicester development.

5.0 Approach to S106 Agreements

5.1 S106 Agreement Clauses

S106 agreements will require applicants (or their successors in title) to submit an Employment Skills and Training Plan in line with the specimen framework attached to the

agreement (and included as Annex A of this document) before implementation of the development. S106 agreements will require this to be approved by CDC in writing prior to implementation and for the applicants (or successors in title) to be guided by the contents.

- 5.2 S106 agreements will also require that the ESTP sets out the arrangements by which the applicants will provide the stated target number of agreed construction (and related trades) apprenticeships and will support the applicant to use The Apprenticeship and Training Company Ltd or other equivalent approach. Apprenticeship Training Agencies (ATAs) are organisations that directly employ apprentices and operate as the apprentice's day-to-day workplace manager. They coordinate the apprentice's training and pay the associated training costs. The host employer (i.e. where the apprentice will have his/her on-site placement) pays a fee which covers the cost of their salary (which will be at least the National Minimum Wage Rate), plus a management fee to cover the ATA's costs (which includes HR and payroll provision and the management of the off-site training provision). Therefore ATAs support businesses who want to take on apprentices by dealing with the administration associated with hiring or employing an apprentice. Appendix B of this Guidance provides further information about The Apprenticeship and Training Company Ltd (to be finalised).
- 5.3 S106 agreements will require that all of the apprenticeship opportunities secured through these means are initially advertised within the administrative area of the District Council and if there are no such suitable persons, to people residing in Oxfordshire and then the surrounding locality (e.g. Milton Keynes, Aylesbury, Northamptonshire).

6.0 Conclusion

- 6.1 Increasing the number of new apprenticeships in England is a high profile Government objective. Cherwell District Council supports this aspiration. The amount of new development taking place in the District over the next 20 years or so, coupled with the evidenced shortage of construction skills provides both an incentive and opportunity to secure the provision of new construction related apprenticeships through the land use planning system. Although the national planning policy guidance does not refer to apprenticeships specifically, it makes it clear that it is the business of the planning system to promote and support economic growth through the provision of jobs and that significant weight should be attached to the need for the planning system to support sustainable economic growth.
- 6.2 The Cherwell District Council Local Plan Part 1 as well as CDC's Economic Strategy contain strategic aspirations relating to the need to support an increase in skills and training within the District. These are expressed in more detail in Local Plan Policy Bicester 1 and the NW Bicester Eco Town SPD which both specifically refer to the need for an economic strategy to support NW Bicester and that it should contain provisions to support apprenticeship and training initiatives - which it does so. This guidance anticipates the further detailed policy approach to be contained in Local Plan Part II which will relate to new development sites across the District.
- 6.3 CDC is anticipating that developers will generally support the approach being promoted in this Guidance as an important and progressive initiative designed both to increase the number of local skilled construction operatives available to support the building industry, as well as promoting the construction trades generally as a valuable future career path for young people.

Appendix 14: Community Safety/ CCTV Provision

Table 1: Levels of Contribution Sought

Priority	Level of Contribution
Priority 1	Seeking on-site provision of an appropriate number of CCTV cameras to monitor areas considered to be of high risk.
Priority 2	Relevant permissions to erect infrastructure, such as aerials, to facilitate transmission of images.
Priority 3	To install ducting to facilitate self-provide fibres
Priority 4	Where predominantly retail to contribute an agreed sum to monitoring and maintenance.
Priority 5	New development will be expected to contribute towards the provision of additional on-site infrastructure for at least a period of 10 years.

Crime impacts all development, however, retail and evening leisure uses usually have the greatest impact. Table 2 illustrates the measures likely to be considered appropriate for the type of development proposed.

Table 2:

Development Type	Priority/ Measure
Large Retail	1,2,3,4,5
Drinking Establishments	1,2
Nightclubs	1,2
Hot Food Takeaway	1,2
Local Retail	1,2,3
Large scale public open space	1,2,3

Table 2 is indicative only. Developments may include all, or only part of these elements. Specific requirements are therefore subject to negotiation following impact assessments by the police and partners.

Table 3: Guidance on Costs

Priority	Level of Contribution	Costs
Priority 1	Seeking on-site provision of an appropriate amount of CCTV cameras sufficient to monitor areas considered by police and partners to be of high risk as part of new development.	Cameras = £3,000 approx. This includes brackets and aerials
Priority 2	Relevant permissions to erect infrastructure such as aerials	Subject to planning permissions

	to facilitate transmission of images.	
Priority 3	To install ducting to facilitate self-provide fibres	Insignificant as ducting can be provided early in the construction process.
Priority 4	Where predominantly retail to contribute an agreed sum to monitoring and maintenance	Monitoring can range from £1,000 to £2000 per camera per annum. Where there are a large number of cameras the fee is negotiable. Maintenance would be approximately £300 per camera per annum.
Priority 5	New development will be expected to contribute towards the provision of additional onsite infrastructure for at least a period of 10 years.	The longevity of the provision is dependent upon the figures in Priority 4 being extended for at least 10 years.

APPENDIX 15: Health & Wellbeing – Calculation of Contributions

The following calculations are based on the formula and approach adopted by Oxfordshire Clinical Commissioning Group in July 2017.

Calculation of cost = occupancy x number of units in the development x £360 (as set out in the table below)

Size of Unit	Occupancy Assumptions based on size of unit	Health need/sum requested per unit
1 bed unit	1.4 persons	£504 per 1 bed unit
2 bed unit	2.0 persons	£720 per 2 bed unit
3 bed unit	2.8 persons	£1,008 per 3 bed unit
4 bed unit	3.5 persons	£1,260 per 4 bed unit
5 bed unit	4.8 persons	£1,728 per 5 bed unit

Where the unit sizes are not specified (ie in outline applications) an average occupancy of 2.4 persons will be used to indicate the initial costs required until such time as the size of units are confirmed.

Indicative square meterage calculations historically used to determine the core General medical Services (GMS) space required for a practice.

No. of patients	2,000	4,000	6,000	8,000	10,000	12,000	14,000	16,000	20,000
Type of Premises	A	A	B	B	B	B	B	B	B
Gross Internal Area Allowance (sqm)	199	333	500	667	833	916	1,000	1,083	1,250

Type A assumes a single storey premises

Type B assumes a two storey premises with one staircase and one lift

Appendix 1: LDS Timetable	10

1. Introduction

The Local Development Scheme (LDS) is a rolling business plan for the preparation of key planning policy documents that will be relevant to future planning decisions. It outlines the programme and resources for completion and adoption of each relevant planning document. It is a requirement of the Planning and Compulsory Purchase Act 2004 (as amended) that the Council prepares and maintains an LDS.

The LDS must specify:

- the local development documents which are to be development plan documents;
- the subject matter and geographical area to which each development plan document is to relate;
- which development plan documents (if any) are to be prepared jointly with one or more other local planning authorities;
- any matter or area in respect of which the authority has agreed (or proposes to agree) to the constitution of a joint committee;
- the timetable for the preparation and revision of the development plan documents; and
- such other matters as are prescribed.

Development Plan Documents must be prepared in accordance with the LDS.

This LDS was approved by the Council's Executive on 2 March 2020 and revises that previously approved on 3 December 2018. It updates the programme for the production of the Council's key planning policy documents.

2. Key changes since the last LDS

Key changes since approval of the last LDS in December 2018 include:

- significant progress on the Partial Review of the Cherwell Local Plan (Oxford's Unmet Housing Needs);
- the Mid Cherwell Neighbourhood Plan was made 14 May 2019;
- work on producing an Oxfordshire wide Joint Statutory Spatial Plan – the Oxfordshire Plan 2050 – has progressed.

These changes have informed preparation of this LDS.

3. Existing Development Plan

As at March 2020, the existing statutory Development Plan comprises:

- the Cherwell Local Plan 2011-2031 (Part 1) adopted in July 2015 (incorporating the re-adopted Policy Bicester 13);
- the saved policies of the adopted Cherwell Local Plan 1996 that have not been replaced (see Appendix 7 of the 2015 adopted Local Plan);
- the Hook Norton Neighbourhood Plan formally 'made' on 19 October 2015;
- the Bloxham Neighbourhood Plan formally 'made' on 19 December 2016;
- the Adderbury Neighbourhood Plan formally 'made' on 16 July 2018;
- the Mid Cherwell Neighbourhood Plan formally 'made' on 14 May 2019;

- the Oxfordshire Minerals and Waste Local Plan (Part 1 – Core Strategy) (adopted by the County Council on 12 September 2017);
- the saved policies of the Oxfordshire Minerals and Waste Local Plan 1996 (adopted by the County Council) that have not been replaced.

The **Cherwell Local Plan 1996** was adopted in November 1996 and policies were saved from 27 September 2007.

The **Cherwell Local Plan 2011-2031 (Part 1)** was completed and adopted by the Council on 20 July 2015. It incorporates Policy Bicester 13 re-adopted on 19 December 2016. The Plan presently comprises the main strategy document containing strategic development sites and policies.

The **adopted Policies Map** – a map of Cherwell which illustrates geographically the application of the policies in the adopted Development Plan (other than Minerals and Waste policies prepared by the County Council). An Interactive Adopted Policies Map is available on-line at www.cherwell.gov.uk.

4. Existing Supplementary Planning Documents

Supplementary Planning Documents (SPDs) provide further detail to Local Plan policies. They are statutory documents but do not form part of the Development Plan. The following SPDs have been completed to add further detail to the adopted Cherwell Local Plan 2011-2031:

- North West Bicester SPD – adopted on 22 February 2016
- Banbury Masterplan SPD – adopted on 19 December 2016
- Kidlington Masterplan SPD – adopted on 19 December 2016
- Developer Contributions SPD – adopted on 26 February 2018
- Cherwell Residential Design Guide SPD - adopted on 16 July 2018

5. Non-Statutory Local Plan

The Council also has a Non-Statutory Cherwell Local Plan 2011 which has not been withdrawn nor fully replaced. Originally produced as a replacement for the adopted Local Plan 1996, the Plan was subject to first and second draft deposit stages and pre-inquiry changes were incorporated. However, the decision was taken by the Council to discontinue work on the plan on the 13 December 2004 and withdraw it from the statutory local plan process before the Public Inquiry. To avoid a policy void the Non-Statutory Cherwell Local Plan 2011 was approved by the Council as interim planning policy for development control purposes on the 13 December 2004. Over time, its policies are being superseded by new planning documents.

6. Statement of Community Involvement

The Council's Statement of Community Involvement (SCI) sets out how communities and stakeholders can expect to be engaged in the preparation of planning documents and in the consideration of planning applications. The SCI was consulted upon from 29 January to 11 March 2016 and adopted by the Council on 18 July 2016.

7. Annual (or Authorities) Monitoring Reports (AMRs)

These are produced each year to monitor progress in producing Local Plans and Supplementary Planning Documents; on the implementation of policies; in meeting the district's housing requirement; and on the making of Neighbourhood Plans. They must include up-to-date information collected for monitoring purposes and, where relevant, include information on any applicable

Community Infrastructure Levy and cooperation with prescribed bodies. AMRs are published on-line and supported by the publication of additional monitoring information as required.

8. Potential Neighbourhood Development Plans

Neighbourhood Plans can be produced by Town or Parish Councils or other relevant bodies to set out policies (however expressed) in relation to the development and use of land in the whole or any part of a particular, specified neighbourhood area. They are not prepared by the District Council but are submitted to it ahead of independent examination and a referendum. They are not legally defined as Development Plan Documents but do become part of the statutory Development Plan once they have successfully passed a referendum.

In addition to the 'made' Hook Norton, Bloxham, Adderbury and Mid Cherwell Neighbourhood Plans (see section 3), the following Parishes presently either have designated Neighbourhood Areas, have made applications for an area to be designated, or are actively preparing plans:

- Deddington
- Shipton on Cherwell and Thrupp
- Weston-on-the-Green
- Bodicote
- Stratton Audley
- Merton.

9. Planning Policy Documents to be prepared by the Council

Planning policy documents that the Council is or will be working on are as follows:

1. **Partial Review of Cherwell Local Plan 2011-2031 (Part 1)** – prepared to meet a commitment in the adopted Local Plan to help Oxford with its unmet housing need. Submitted to Government for examination on 5 March 2018. Consultation took place on an Issues Paper from 29 January 2016 – 11 March 2016, on an Options Paper from 14 November 2016 – 9 January 2017 and on a Proposed Submission Document from 17 July 2017 to 10 October 2017. A preliminary hearing took place on 28 September 2018 and main hearings were held between 5 and 13 February 2019.

The Inspector's Post-Hearing Advice Note was received 13 July 2019. The Inspector advised that one major change was required to make the Plan sound. A Schedule of Proposed Main Modifications to address the concerns of the Inspector were consulted upon between 8 November 2019 and 20 December 2019 with a view to making a formal submission to the Planning Inspectorate

Upon adoption by the Council the Partial Review will become part of the statutory Development Plan.

2. **Oxfordshire Plan 2050** – a new countywide strategic plan being prepared jointly on behalf of the five district local planning authorities, with the support of the County Council, under Section 28 of the Planning and Compulsory Purchase Act 2004. Preparation is overseen by the Oxfordshire Growth Board. In 2018 a Draft Statement of Common Ground was published and a Project Board established. A first stage of public consultation was undertaken during February/March 2019. It is intended that a second stage of public consultation will be held in June/July 2020. Consultation on the proposed submission draft is scheduled for November/December 2020, followed by final submission in March 2021. The Plan is expected to be adopted in March 2022. Upon adoption by the Council it will become part of the statutory Development Plan.

3. **Cherwell Local Plan Review** – a review of the adopted Cherwell Local Plan to ensure key planning policies are kept up to date, to assist implementation of the Oxfordshire Plan and to replace the remaining saved policies of the 1996 Local Plan.
4. **Supplementary Planning Documents (SPDs)** – Banbury Canalside SPD – to be re-commenced supplemented by a delivery plan. This will provide additional detail to assist the implementation of Policy Banbury 1 of the adopted Cherwell Local Plan 2011-2031.
5. **Community Infrastructure Levy (CIL) Charging Schedule** – CIL comprises a schedule of charges for contributions to off-site infrastructure, payable by developers. Consultation on a preliminary charging schedule was undertaken from 12 February to 25 March 2016. A draft charging schedule was consulted upon from 14 November 2016 to 9 January 2017.

Work on a potential CIL was put on hold while a national policy review was undertaken and in anticipation of further Government guidance which has since been published. New work on CIL is now programmed to align with preparation of the Cherwell Local Plan Review.

The programme for preparing these documents is set out in the schedules below. The Council is expected to produce documents in accordance with the schedules. If significant changes in circumstances occur, the LDS will be reviewed.

Schedule 9.1	Partial Review of the Cherwell Local Plan 2011-2031 (Part 1): Oxford's Unmet Housing Needs	
Strategic or Local Policies	Strategic Policies	
Subject Matter	Partial Review of Part 1 of the adopted Cherwell Local Plan 2011-2031 to help meet the identified unmet housing needs from elsewhere in the Oxfordshire Housing Market Area and arising infrastructure requirements. Builds upon countywide joint working and follows the 'Post SHMA Strategic Work Programme' agreed by the [then Shadow] Oxfordshire Growth Board on 20 November 2014. On 26 September 2016, the Oxfordshire Growth Board approved an apportionment of Oxford's unmet housing need (approximately 15,000 homes) to the Oxfordshire District Councils. Cherwell was asked to accommodate an additional 4,400 homes (2011-2031).	
Geographical Area	Cherwell District	
Status	Development Plan Document (DPD)	
Timetable	Agreed Countywide Post-SHMA work programme	20 November 2014
	Formal Commencement (adoption of Local Plan Part 1)	20 July 2015
	District Wide Issues Consultation (Regulation 18)	29 January 2016 – 11 March 2016
	Countywide working on identifying the unmet need and apportionment	Completed 26 September 2016
	District Wide Options Consultation (Regulation 18)	14 November 2016 – 9 January 2017
	Preparation of Proposed Submission DPD	January 2017 to July 2017
	Consultation on Proposed Submission DPD	17 July – 10 October 2017
	Submission (Regulation 22)	5 March 2018
	Examination (Regulation 24)	March 2018 onwards
	Examination Hearings (Regulation 24)	28 September 2018; 5 - 13 February 2019.
	Submission of Main Modifications	25 February 2020 (TBC)
	Receipt and Publication of the Inspector's Report (Regulation 25)	April 2020 (estimate)
	Adoption (Regulation 26)	May 2020 (estimate)
		Notes: Programme following hearings subject to confirmation from the Planning Inspectorate.
Management Arrangements	<ul style="list-style-type: none"> • Planning Policy, Conservation and Design Manager reporting to • Assistant Director - Planning and Development reporting to • Corporate Director - Place & Growth • Reports to Executive and Council 	
Resources Required	Planning Policy team, input from other Council services, neighbouring authorities and consultees; consultancy support as required; Programme Officer and Planning Inspectorate.	
Monitoring and review mechanisms	Annual Monitoring Report	

Schedule 9.2	Oxfordshire Plan 2050 <i>(note: programme reflects the timeline endorsed by the Oxfordshire Growth Board at a meeting on 24 September 2019 available at: http://democratic.southoxon.gov.uk/ieListDocuments.aspx?Cid=330&Mid=2473&Ver=4 - Item 25)</i>	
Strategic or Local Policies	Strategic Policies	
Subject Matter	Countywide spatial plan to manage development to 2050. Will provide strategic planning policies including for housing, employment, transport & infrastructure, biodiversity and responding to climate change.	
Geographical Area	Oxfordshire	
Status	Joint Development Plan Document (DPD)	
Timetable	Formal commencement	31 January 2018
	Initial Consultation (Regulation 18)	February/March 2019
	Consultation on Preferred Strategy (Regulation 18)	June/July 2020 (TBC)
	Consultation on Proposed Submission Draft Plan (Regulation 19)	November/December 2020 (TBC)
	Submission (Regulation 22)	March 2021 (TBC)
	Examination (Regulation 24)	June - September 2021 (estimated)
	Receipt and Publication of Inspector's Report	December 2021 (estimated)
	Adoption (Regulation 26)	March 2022 (subject to examination)
	Notes: Examination dates and subsequent programme subject to confirmation from the Planning Inspectorate and views of Inspector.	
Management Arrangements	A joint Plan by the five district Local Planning Authorities with the support of the County Council. Overseen by the Oxfordshire Growth Board - a joint committee of the six local authorities, together with key strategic partners. CDC Input: <ul style="list-style-type: none"> • Planning Policy, Conservation and Design Manager reporting to • Assistant Director - Planning and Development reporting to • Corporate Director - Place & Growth • Reports to Executive and Council 	
Resources Required	Oxfordshire Growth Board: <ul style="list-style-type: none"> • Central Plan Team: <ul style="list-style-type: none"> • with consultancy support as required • advised by district officer Liaison Group • advised by Members' Advisory Group • reporting to Project Board (Heads of Planning) • reports to Growth Deal Programme Board & Growth Board • Growth Deal capacity funding CDC <ul style="list-style-type: none"> • input from Planning Policy, Conservation and Design service • input from other Council services on internal working group • consultancy support as required 	
Monitoring and review mechanisms	Oxfordshire Plan monitoring report & CDC Annual Monitoring Report	

Schedule 9.3	Cherwell Local Plan Review	
Strategic or Local Policies	Strategic and Local Policies	
Subject Matter	Planning policies to manage development and meet local priorities, to review & keep up-to-date existing planning policies, and to support implementation of the Oxfordshire Plan 2050. Will include the identification and delivery of strategic and non-strategic development sites for housing, employment, open space and recreation, travelling communities and other land uses.	
Geographical Area	Cherwell District	
Status	Development Plan Document (DPD)	
Timetable	Commencement	April 2020
	District Wide Issues Consultation (Regulation 18)	July - August 2020
	District Wide Options Consultation (Regulation 18)	February – March 2021
	Consultation on draft Plan (Regulation 18)	October - November 2021
	Consultation on Proposed Submission Plan (Regulation 19)	July– August 2022
	Submission (Regulation 22)	November 2022
	Examination (Regulation 24)	November 2022 – June 2023 (TBC)
	Examination Hearings (Regulation 24)	February/March 2023 (TBC)
	Receipt and Publication of the Inspector's Report (Regulation 25)	June 2023 (TBC)
	Adoption (Regulation 26)	July 2023 (TBC)
		Notes: Hearing dates and subsequent programme subject to confirmation from the Planning Inspectorate
Management Arrangements	<ul style="list-style-type: none"> • Planning Policy, Conservation and Design Manager reporting to • Assistant Director - Planning and Development reporting to • Corporate Director - Place & Growth • Reports to Executive and Council 	
Resources Required	Planning Policy, Conservation and Design service, input from other Council services, neighbouring authorities and consultees; consultancy support as required. Programme Officer and Planning Inspectorate.	
Monitoring and review mechanisms	Annual Monitoring Report	

Schedule 9.4	Banbury Canalside Supplementary Planning Document (SPD)	
Subject Matter	Expands upon and provides further detail to Local Plan policies for the development area of Canalside, Banbury. To be supported by a delivery plan.	
Geographical Area	Canalside including part of Banbury town centre	
Status	SPD	
	Continued Preparation & Engagement	March – September 2020
	Formal Consultation on draft SPD (Regulation 12/13)	September – October 2020
	Adoption (Regulation 14)	December 2020
Management Arrangements	<ul style="list-style-type: none"> • Planning Policy, Conservation and Design Manager reporting to • Assistant Director - Planning and Development reporting to • Corporate Director - Place & Growth • Reports to Executive and Council 	
Resources Required	Planning Policy, Conservation and Design service; input from other Council services, neighbouring authorities and consultees; consultancy resource.	
Monitoring and review mechanisms	Annual Monitoring Report	

Schedule 9.5	Community Infrastructure Levy Charging Schedule	
Subject Matter	The purpose of CIL is to raise funds to deliver off-site infrastructure that will support the development proposed within Cherwell. This could include open space, leisure centres, cultural and sports facilities, transport schemes, schools among other requirements. The charging schedule providing the basis of the Levy and must be informed by an assessment of an infrastructure funding gap and the viability of different levels of Levy. There will be consultation and a public Examination.	
Geographical Area	Cherwell District	
Status	Levy	
	Re-commencement	March 2021
	Focused consultation on Draft Charging Schedule	October - November 2021
	Formal consultation on Draft Charging Schedule (Regulation 16)	July – August 2022
	Potential Submission of Charging Schedule (Regulation 19)	November 2022 (subject to Council decision)
	Examination (TBC)	November 2022 – June 2023
	Examination Hearings (TBC)	February/March 2023
	Receipt and Publication of the Inspector's Report (Regulation 23) (TBC)	June 2023
	Approval (TBC)	July 2023
	Notes: Examination and Hearing dates yet to be confirmed. Aligned to Local Plan Review.	
Management Arrangements	<ul style="list-style-type: none"> • Planning Policy, Conservation and Design Manager reporting to • Assistant Director - Planning and Development reporting to • Corporate Director - Place & Growth • Reports to Executive and Council 	
Resources Required	Planning Policy team; input from other Council services, neighbouring authorities and consultees; consultancy support as required. Programme Officer and Planning Inspectorate.

Oxfordshire Growth Board Impacts of COVID-19

To: Oxfordshire Growth Board
Title of Report: Impact of the COVID-19 Pandemic on the Oxfordshire Housing and Growth Deal
Date: 2 June 2020
Report of: Bev Hindle, Growth Board Director
Status: Open

Executive Summary and Purpose:
 The purpose of this report is to update the Growth Board on the early impact that the COVID-19 pandemic has had on the delivery of the Oxfordshire Housing and Growth Deal, including a recommendation to revise the Oxfordshire Plan 2050 Timeline. Officers will continue to monitor impact, reporting to future Growth Board meetings any actions necessary to mitigate impact over time. This report will be considered by a virtual online meeting of the Growth Board as a result of the recommended social distancing measures.

Recommendations:
 That the Growth Board:

1. Notes the early impact of the COVID-19 Pandemic on the delivery of the Oxfordshire Housing and Growth Deal, and in considering this;
2. Endorses a revised timeline for the Oxfordshire Plan 2050, as set out in this report, for officers to take forward in discussion with MHCLG.

Introduction

1. As the first deal of its kind, the Oxfordshire Housing and Growth Deal (‘the Deal’) was successful in securing £215m of Central Government investment to advance housing delivery and boost economic productivity in the area. Within the deal are four distinct workstreams.
2. The Homes from Infrastructure Programme (Hfi) within the Deal is a £150m investment in infrastructure to support the acceleration of already planned housing in Oxfordshire over a five-year period from 2018/19 to 2022/23. The Infrastructure projects include road, rail, cycle routes and footpaths, as well as social infrastructure such as schools. Similarly, The Affordable Housing Programme is a £60 Million investment over three years to support the delivery of at least 1322 additional affordable homes, using a range of tenures including social rent, affordable rent, shared ownership by March 2021.

3. Through the Deal, the Oxfordshire authorities agreed to develop a county wide Strategic Development Plan, known as the Oxfordshire Plan 2050, to support a more coordinated approach to long term spatial planning across the County. This is supported by additional time limited planning freedoms and flexibilities for local authorities to protect against unplanned development.
4. The fourth workstream within the Deal is Productivity which sits alongside the other work streams, led by the Oxfordshire Local Enterprise Partnership (OxLEP). At the centre of this work is an ambitious Local Industrial Strategy for Oxfordshire. It is the role of the Oxfordshire Growth Board to oversee and monitor delivery of the Deal and its workstreams.
5. The COVID-19 pandemic has had an unprecedented impact on populations globally, nationally and locally. Each of the Oxfordshire Councils are investing significant resources into managing local response efforts. This report however focusses on the impact that the pandemic is having on local delivery against the Deal programme; specifically, the Housing delivery, Infrastructure, Oxfordshire Plan 2050 and Productivity workstreams.
6. It is critical to note that this report provides an update on the early impacts of the pandemic only, and secondly that the fast-changing nature of the situation may render many comments in this paper out of date soon after publication. Forthcoming quarterly progress reports will reflect on the impact of COVID-19 and the actions taken in response on an ongoing basis as necessary.

Impact of COVID-19 on the Oxfordshire Housing and Growth Deal and the Housing Market

7. Prior to the COVID crisis, a picture was emerging in Oxfordshire of a housing market delivery trajectory that was slipping due to issues such as local plan delays and the beginnings of weakening developer confidence in certain areas of the Oxfordshire housing market. Within that overall picture however those sites that were supported by the Housing and Growth Deal through infrastructure investment were generally maintaining their delivery trajectory, partly because the infrastructure investment supported developer confidence and because these sites are the ones with the most robust demand profile and could withstand market movements more robustly.
8. Nationally, it is estimated that around 75% of housing sites closed due to the COVID crisis.¹ In Oxfordshire, all the major sites halted production because of COVID-19 and are now returning to work (May 2020). However, there will be on-site working practice restrictions in place that are likely to mean full productivity will not be possible whilst staff and contractors adapt to this new working environment. Some of the smaller development sites in Oxfordshire did not close, but capacity was limited as contractors were isolating or ill.

¹ Building.co.uk. 2019: Available at: <https://www.building.co.uk/news/coronavirus-stops-work-at-75-of-uk-housing-schemes/5105579.article>

9. There is also an issue of supply chains drying up and putting workers onto the Furlough Scheme, affecting the ability to develop.² However, there is evidence that these firms are also returning to work. In April for example, a major brickmaker Mickelmersh announced they would be returning to work.
10. Costs of construction will also be an issue affected by COVID-19. The market was already experiencing an increase in labour costs due to the effects of Brexit and this may well be compounded by the crisis. Coupled with the point made above that developers will not be able to run sites at full capacity due to the need for physical distancing, this will therefore impact upon the efficiency of sites and therefore costs.
11. Because of the slowdown, councils can expect housing delivery trajectories, both Deal related and more generally to be impacted. At the time of writing this report however officers have yet to complete the revised delivery trajectories for either Housing from Infrastructure or the Affordable Housing Programme. The former is being completed by partners and is expected to be available from late June, whilst the latter is being completed to an agreed deadline of the end of May.
12. Outside of the market slowdown, an added delay reported is the interruption to the planning process. Developers advise that where schemes are in feasibility stages work is progressing, but where either a consultation or decision point has been reached delays are inevitably occurring, although this is now reducing as an issue.
13. Looking to the longer-term impact on the housing market outside of the Deal timeframe market intelligence from Savills suggests that the housing market could see a 50% dip in activity in this financial year with the sharpest dip being in the second quarter. This is important because of the strong link between market activity (demand) and house prices. Accordingly, Savills suggest that house prices could fall as much as 10%, although they conclude it is too early to say whether the market will then re-adjust, or this will be a longer-term reduction.
14. Council partners will be aware of the government advice to councils to consider allowing SME developers to delay S106 commitments in a bid to support them through the crisis. For affordable housing this could take the form of either re-phasing or perhaps pressure to reduce the obligations, perhaps by remodelling or grant funding from government. This government advice has the potential to materially impact both the Deal and councils own affordable housing delivery trajectories as S106 accounted for 49% of all affordable housing delivered in 2018/19.
15. Developers will be concerned about any trend of slowing market housing activity and in particular shared ownership sales, which is seen as a softer market and more prone to economic cycles. This is because often the shared ownership client is usually on a lower quartile income for home ownership and the concern is that some of the potential purchasers may have had to use their

² Inside Housing, 2020. Available at: <https://www.insidehousing.co.uk/news/news/housing-associations-warn-supply-chain-failures-caused-by-covid-19-could-hurt-development-plans-66156>

deposit savings for other needs, whilst others may not be able to access mortgages now due to a change of employment situation.

16. Developers have advised that the attitudes of banks will be central to their future performance as they rely upon loan funding for their development activities, funded from sale receipts. This is especially true if the sales market does not pick up as loan finance is often secured against built stock. There is for example already some evidence that finance against shared ownership is being temporarily stopped by some lenders
17. In terms of the role of the Housing and Growth Deal, the Board will be aware that current Deal finance restricts expenditure to either infrastructure that accelerates planned housing or grant for additional affordable housing. Post COVID however there is perhaps a wider role for the Deal in enabling sites that have stalled to progress, thus accelerating housing that would otherwise have stalled. A discussion about this wider role for the Deal will be an ask of Government as we discuss how the Deal can aid recovery in the housing market.
18. Within this overall housing development picture, the Housing and Growth Deal Affordable Housing Programme (OAHP) has inevitably slowed. The Board will be aware that the programme was experiencing challenges in the second year and these challenges have been exacerbated by the COVID crisis. The immediate impact was that a proportion of the schemes that were programmed to reach the relevant milestone to qualify for grant at the end of year two failed at the last minute as staff were off sick or contractors were not available. There were also several schemes where the COVID crisis led the Registered Provider of social housing (RP) concerned to reflect upon whether their development contract and the penalties it contained for exceeding costs or timescales is one they could sign up to.
19. These last minute delays could have reduced the grant payment from government; fortunately it was agreed with MHCLG that all the schemes that had been programmed for year two would have the grant paid over to OCC as the accountable body and that grant then passed on to the relevant district council for payment to the RP when the payment milestone was achieved.
20. Looking at the impact of the COVID crisis on the OAHP moving forward, feedback from RPs on the Oxfordshire affordable housing market is that they are typically building a 6-9-month delay into their initial revisions of development business plans (as of April 2020) but sense these could be optimistic assessments. RPs also expect pressure for contracts to be renegotiated to reflect expected increased costs, force majeure claims and a perceived inability to accept compensation clauses for delay.
21. Whilst also being developers, and therefore subject to the pressures other developers face, RPs have a strong financial position due to their asset base and rental income to support that. They recognise that this position and their ability to access government grant means they can play a crucial role in housing market recovery. For example, by land purchase from developers as a recovery tool to ease developer cash flow. This could be just holding an option

on the land for developer buyback or it could be a tool for a greater intervention in the housing market with subsequent development by the RP.

22. There is also a potential role for the OAHP in driving recovery in the final years of the programme, for example by working with RPs and local authority development companies to:
 - Assist with developer cash flow issues caused by slow market sales through the bulk purchase of units. These units would then be converted to affordable rented housing using OAHP grant. This is a proven method of assisting the market that was successful in the last housing market slump in 2009;
 - Converting shared ownership properties to affordable or social rented housing using OAHP grant funding. At present this is not permitted by the OAHP but will be an ask of government as we discuss how the Deal can assist in the housing market recovery.
23. It is important that the potential of the OAHP to assist with housing recovery is maximised in the final year of the programme and officers are discussing with Homes England revised terms for the OAHP to enable that to happen. The OAHP will need to reflect the new Oxfordshire housing market in these discussions, for example by the potential to grant fund social rented housing at lower rents to address issues of affordability for local people that will be brought into sharper focus by any economic downturn.

The impact of COVID 19 on Infrastructure delivery in Oxfordshire

24. The unprecedented circumstances present a challenge at the time of writing to say with any certainty what the overall impact of COVID-19 will be on infrastructure delivery related to the Housing and Growth Deal. This programme is delivered through Oxfordshire County Council's Capital Delivery Programme and much of its infrastructure programme will be impacted in the same way. There is no precedent to help understand what the potential future impacts are, coupled with limited information available on when restrictions may end and the details of future working arrangements (as of May 2020). There are also major questions being asked of the need and demand for particular infrastructure projects planned before COVID-19 e.g. national push for more cycle infrastructure.
25. A more granular understanding of the impacts will be developed over the coming months. However, what is clear now is that staff are continuing to work but in a very different way. Where schemes are in design, work has continued where possible and the impact is not thought to be significant. Site visits are expected to have been impacted, and where surveys are required, it is expected that there will have been an impact on the programme, and some surveys being seasonal this could have a significant impact. Schemes in construction are also expected to be impacted by the pandemic owing to changes to methods of working and travel limitations.
26. Contractors and consultants have measures in place to deal with change, such as project continuity plans, and these are being adapted to tackle COVID-19.

The supply chain has been impacted, and their operational situation is under constant review as it is changing regularly. This is a similar challenge across other workstreams within the Housing and Growth Deal. There is a risk of supply shortages, interruptions and delays due to closed factories, logistics challenges, and some smaller suppliers may even be closed and no longer in business. There may also be an impact on the cost of materials, but this is still unclear. The need to mitigate health risks for onsite staff may further impact delivery programmes.

27. Officers will continue to review projects to determine what measures can be in place in preparation for a shift in our ways of working. Each scheme will require an updated risk analysis for active projects and ongoing monitoring of the situation. A further impact analysis will need to be undertaken, together with a project resourcing plan to be best placed for future working arrangements. This will also need to factor in compliance with new and changing government guidance on construction work safety standards.
28. The Housing & Growth Deal Infrastructure Programme will play a vital role in Oxfordshire's post COVID recovery, and officers are working with our HM Government partners to explore flexibilities to the terms of the Deal. This also provides an opportunity to reflect on what our priorities are.

The impact of COVID on the Oxfordshire Plan 2050

29. The partner councils are working collectively on a strategic, long term statutory Plan for Oxfordshire. The intention is that the Oxfordshire Plan 2050 will be a strategy-led Plan and an opportunity to be transformative, adding real value to the typical Local Plan approach. The Plan will look beyond current and emerging Local Plans and will identify the number of new homes, the level of economic growth, and related infrastructure that is needed across Oxfordshire to 2050. This will set the scene for a future round of Local Plans where the Local Planning Authorities will subsequently establish detailed planning policies and site allocations at a local level.
30. The recent focus of work by the Oxfordshire Plan team has been on:
 - building up the evidence base
 - stepping up member briefing
 - developing the spatial strategy and options for the Plan
 - planning for the launch of the Oxfordshire Open Thought exercise
31. Since the start of the Covid-19 restrictions, the Team has been working hard to assess the impact on the overall programme. Many of the consultants involved in developing the evidence base have reassured us that much of their work can continue as planned. We are working with them to ensure that work on the evidence base incorporates where appropriate consideration of the changing economic and social circumstances of the Covid-19 situation and any possible longer-term impacts of those.
32. There are some significant challenges with other aspects of the programme. In particular, the required officer and member meetings to approve emerging work

during the Summer, and a series of special Council meetings that were planned for September, will now likely be dominated by the Covid-19 response and recovery, limiting consideration of the Plan.

33. There are also technical limitations when attempting to brief all district and county councillors and answer their questions on the project remotely; these would likely have less success than face-to-face briefings. In some areas, additional duties have been reprioritised in the short term to enable the Oxfordshire Plan and Growth Board Teams to support the Covid-19 response effort.
34. Considering the unprecedented circumstances, it is recommended that the Growth Board requests from MHCLG a minimum seven-month extension to the current timeline we are working towards. This must be considered as a minimum extension as the full effects of COVID-19 are yet to be known. Two key changes in the revised programme for the next year would be to:
 - Move the Regulation 18 (Part 2) consultation approval process through each council back from September 2020 to December 2020, adding 3 months and consequentially:
 - Moving the Regulation 19 (Draft Plan consultation) back to September 2021.
35. As was previously planned, a series of special Council meetings will need to be held in a co-ordinated way (preferably during the same week) which would now be held in December to approve the Regulation 18 (Part 2) consultation plans. This means the 6-week consultation would be launched in January 2021. This would have a knock-on impact on the subsequent Regulation 19 consultation, which would naturally move to after the May 2021 elections.
36. By extending our timeline by the recommended seven months (measured by adoption date), this should ensure that there is still a window for early (through the Summer if restrictions allow, or the Autumn) face-to-face engagement opportunities with councillors. This timeframe would also allow more time for the non-statutory engagement work through the “Oxfordshire Open Thought” concept to gather public feedback to help inform discussions.
37. Oxfordshire Open Thought will be an open online platform for people to have their say on the future of their county as part of the Oxfordshire Plan 2050. It will tap into the wealth of knowledge and expertise within our communities to help find ideas and solutions to some of the big issues that affect our lives and the environment over the coming decades. This is a new initiative that won't replace previous consultations and responses.
38. The extension would allow more time to shape the strategy and consultation document with the Oxfordshire Plan Advisory Sub-group. This group continues to meet virtually every month. A recommended revised timeline for the development of the Oxfordshire Plan 2050 is set out below which incorporates the impact of the circumstances set out in this report.

Oxfordshire Plan Stage	Growth Board Sep 2019 Milestones	Proposed Milestones
Further engagement (Oxfordshire Thought)	Nov/Dec 19	May 20 & Sept 20
Consultation on spatial options (scale and broad locations) (Reg18 part2)	June/July 20	Jan 21
Consultation on Draft Plan (Reg 19)	Nov/Dec 20	Sept 21
Submission	March 21	Jan 22
Examination	June-Sept 21	Apr 22
Inspector's Report	December 21	July 22
Adoption	March 22	Oct 22

39. The extra time granted through the recommended timeline would allow us to take greater account of the long-term spatial framework that is being developed to support strategic planning across the Arc. This is a real opportunity to better align our work with wider sub-regional ambitions and feed into that process, and we will have more time to develop that conversation with Government. Some flexibility in the programme to allow for a greater level of engagement and opportunity for consensus building and briefing will result in a better plan, shaped by a wide variety of voices; and a stronger case to made to the Planning Inspector who will examine it.
40. Production of the Oxfordshire Plan will mean the development of a sound long-term strategy for the future of the county. This will be even more important post Covid-19; a clear strategy with consensus across the partnership can provide clarity and leadership for the community, and greater certainty for the market and service providers which will help with business planning.

Productivity

41. Productivity is an integral component of the Oxfordshire Housing and Growth Deal and sits alongside the other work streams, led by the Oxfordshire Local Enterprise Partnership (OxLEP). The headline commitment under the Productivity workstream invited Oxfordshire to be one of three 'Trailblazer' areas to take forward the ambitions set out by Government in its Industrial Strategy White Paper. This is in the form of an ambitious and transformational, long term *Local Industrial Strategy (LIS)*, and involved close working with Whitehall departments in the development of the Strategy. Following a review meeting during Year One of the Deal with the Government's Cities and Local Growth Unit, officials proposed that the focus for all elements of the productivity stream moving forward needed to be built around the LIS. The productivity workstream does not have a specific funding allocation within the Deal.
42. Between November 2019 and March 2020, work has progressed in translating the ambitions set out in the LIS and across the 25 policy areas detailed in the Strategy, into a coherent programme of delivery which can attract the necessary investment from Government and the public and private sectors to realise the vision for Oxfordshire to be a top three global innovation ecosystem. The Investment Plan is over a medium-term horizon and anticipates a mixture of proposals which can be developed and ready for investment in the first 1-3

years of the LIS strategy. This also includes a mixture of medium to longer term projects which will have a 10-year runway to be fully developed out but will require critical work being undertaken in the first 12-24 months of the Strategy in order to be moved forward at pace. A wider range of engagement activities are being deployed to shape the plan and assess areas of common interest across the Oxford to Cambridge Arc.

43. In light of the pandemic, the LIS Steering Group has considered the potential economic impact of the virus on the emerging investment programme. The past months (up to May 2020) have shown the remarkable world leading capability of the region's innovation ecosystem with Oxfordshire academics, research organisations and businesses consistently being at the vanguard of national and international efforts to respond to the emergency. It is important to recognise that this leadership role in the UK economy will become even more clear as we move from the respond and recover stages, and into rebuild and renew.
44. The guiding principles of the LIS are an important reference point for this process and continue to be highly relevant in a post-COVID environment:
 - a) **Invest in Oxfordshire, deliver for the UK:** As one of three net contributors to the exchequer, Oxfordshire will deliver economic growth and manufacturing and supply chain opportunities for the rest of the UK.
 - b) **Oxfordshire – The UK's Innovation Engine:** Oxfordshire has a world-class innovation ecosystem with a concentration of global assets and strengths unrivalled by anywhere else in the UK. This, along with our strengths in research and talented workforce, make Oxfordshire a great place to invest and drive R&D and innovation in new technologies, markets, products and services.
 - c) **Global Oxfordshire, Global Britain:** Many of Oxfordshire's industries already compete on a global level, and in new emerging markets. Investing in Oxfordshire will support us in our international potential and winning new market share in technologies of the future.
45. Each project sponsor under the Investment Plan is reviewing the current status of their respective business case to consider and adjust their proposals in light of COVID-19 and identify both the economic risks but also the market opportunities which could be harnessed. This is particularly illustrated by projects which are focused around the health and life sciences sectors and energy and zero carbon. OxLEP are also looking at those projects which would be accelerated in their development considering the impact it can have for areas of the economy which have been impacted disproportionately by the pandemic such as the creative and cultural industries.
46. The LIS Investment Plan will sit alongside an expected Oxfordshire Economic Recovery Plan (ERP), whose focus will likely be about short-term measures to stabilise the economy and interventions to stimulate economic activity. These will be necessarily complementing the detailed programme coming through the LIS investment Plan and be prepared through the Joint Oxfordshire Business

Support Group (JOBS), which is a bronze level cell feeding into the established Silver and Gold structures already in place for the County.

47. Based on the market intelligence that has been gathered since the pandemic started, there are reasonably three broad areas of ERP interventions that can be progressed: financial capital support; business support, restructuring and market development; and labour market support to help people back into work. These measures will need to be aligned to, and avoid duplicating, interventions already put in place by Government.

Conclusion

48. This report provides a high-level overview of the early impacts that the Covid-19 pandemic is having on the Housing and Growth Deal. It is expected that the impacts will continue and expand as we start to see what the pace of recovery will look like. We will continue to monitor our programme closely as well as develop actions and strategies to help address the impacts as they emerge and become better understood. We expect to bring forward to the next Growth Board a further assessment of impact and a detailed update on the mitigation strategies we have or would wish to employ. Some of these measures would have been needed pre-COVID-19 to address some of the market and deal issues we were already facing.
49. Notwithstanding the relative short-term shut down of local development sites, and the wider economic restrictions, the impact will be considerable across all workstreams within the Deal. Learning from this pandemic, and adapting our ways of working, will be critical to ensuring that Oxfordshire partners are best positioned to support an effective recovery. Officers supporting the Housing and Growth Deal across the various programmes have adapted their ways of working from the start of this crisis to ensure that where possible, business continues as normal, notwithstanding the market impacts that the pandemic has had on site delivery.
50. Discussions with Homes England over the possibility of adjusting the parameters of the Housing and Growth Deal to use it as a tool for recovery have commenced and officers are working closely with OxLEP to ensure that there is a consistent and robust Recovery Strategy for Oxfordshire, of which the Housing and Growth Deal programme can play a major part. An initial contact has also been made with MHCLG to alert them to the potential impacts on the various workstreams of the Deal.
51. It will be important going forward for the Deal to take account of the new policy landscape and economic context. Delays caused across the various programmes provide an opportunity to re-evaluate priorities and milestones within the Deal, informed by the local and national recovery response. Flexibility to adapt delivery ambitions and working arrangements to match shifts in policy will be crucial in ensuring the Deal can continue to deliver for local people.
52. The Growth Board is asked to note the current impact the pandemic has had on the Housing and Growth Deal workstreams, and to endorse the revised timeline for the Oxfordshire Plan 2050, as set out in this report, for officers to take forward in discussion with MHCLG.

Telford and Wrekin BC v Secretary of State Communities and Local Government

Borough of Telford and Wrekin v (1) Secretary of State for Communities and Local Government (2) Gladman Developments Limited

No Substantial Judicial Treatment

Court

Queen's Bench Division (Administrative Court)

Judgment Date

1 December 2016

Case No: CO/2639/2016

High Court of Justice Queen's Bench Division Planning Court

[2016] EWHC 3073 (Admin), 2016 WL 06989200

Before : MRS JUSTICE LANG DBE

Date: 1 December 2016

Hearing date: 17 November 2016

Representation

Timothy Jones (instructed by Telford & Wrekin Council) for the Claimant.
Tim Buley (instructed by the Government Legal Department) for the First Defendant.
Jonathan Easton (instructed by Irwin Mitchell) for the Second Defendant.

Approved Judgment

Mrs Justice Lang :

1. The Claimant applies under [section 288 of the Town and Country Planning Act 1990](#) ("TCPA 1990") to quash the decision of the First Defendant, made on his behalf by an Inspector on 15 April 2016, in which he allowed the Second Defendant's appeal against the Claimant's refusal of planning permission for a housing development at land north of Haygate Road, Wellington, Shropshire ("the Site").

2. The Site comprises some 15.2 ha of gently undulating agricultural land, principally in arable use, with some trees and hedgerows. It lies adjacent to the settlement edge of the market town of Wellington, which has become part of Telford. There are built-up areas to the east and south of the Site and there is open countryside to the north. Orleton Hall (a Grade II listed mansion) lies to the west of the Site. It is set in 25 ha of park and gardens, which are on Historic England's Register of Historic Parks and Gardens. The Wellington Cricket Club has its ground and pavilion in the park. A public right of way runs across the Site, but there is no public access to the Site beyond that.

3. The Second Defendant (hereinafter "the developer") applied for outline planning permission for a development of up to 330 dwellings, with a new vehicular access, public open space and green infrastructure.

4. The Claimant (hereinafter "the Council"), which is the local planning authority, resolved to grant planning permission in May 2014, at a time when it considered that it did not have a 5 year supply of deliverable housing land. The grant was subject to completion of an agreement under [section 106](#) TCPA 1990, and before it was concluded, the Council decided to re-consider its decision, in the light of a new expert assessment that it could demonstrate a 5 year supply of deliverable housing land. The developer then appealed to the First Defendant on the grounds of non-determination. Shortly after lodging its appeal, the developer submitted a second application for planning permission at the Site for a development limited to 290 dwellings.

5. The Council gave putative reasons for refusing the first application in September 2015, and refused the second application in December 2015. In summary, its reasons for refusal were as follows:

- i) The proposal represented unacceptable encroachment into the open countryside and the loss of an extensive area of high quality agricultural land and would adversely affect the character and appearance of the area which has historic and sensitive value. Accordingly, the proposal was contrary to adopted Core Strategy (CS) Policies CS1, CS3, CS7, CS11, CS12, CS13 and CS14, saved Policies H9, OL6 and HE24 of the Wrekin Local Plan (WLP) and the National Planning Policy Framework (NPPF).
- ii) The proposal would adversely affect the setting of the adjacent listed park at Orleton Hall and the impact upon this heritage asset would adversely affect the character and appearance of the area. Accordingly, the proposal was contrary to adopted CS Policies CS1, CS3, CS7, CS11, CS12 and CS14, saved WLP Policies OL6 and HE24 and the NPPF.

6. The Inspector conducted a site visit and an Inquiry lasting 7 days. He identified the main issues as:

- i) The weight to be given to relevant policies for the supply of housing, and whether the Council could demonstrate a 5 year supply of deliverable housing land.
- ii) The effect of the proposed development on the character and appearance of the surrounding area, and on the setting of Orleton Hall Registered Park and Gardens.
- iii) Whether the appeal proposal should be seen as representing sustainable development, in terms of the NPPF.

7. **Main issue (i)** . The Inspector concluded that certain housing policies, namely, CS1, CS3 and CS7 were not in conformity with the NPPF and were out-of-date. Therefore they should not be given full weight when assessed, applying NPPF 215, and the proposed development fell to be considered under the fourth bullet point in NPPF 14. The Inspector did not reach a final conclusion as to whether the Council could demonstrate a 5 year housing land supply, for the purposes of NPPF 49, although on the evidence before him, he doubted whether it could do so.

8. In **Ground 1** of this application, the Council challenged the Inspector's reliance upon the Council's support for the decision to grant planning permission for a Sustainable Urban Extension ("SUE") outside Telford as a factor supporting his conclusion that the policies on settlement boundaries were out-of-date. Under **Ground 5** of this application, the Council challenged the Inspector's conclusion that policy CS7 was not in conformity with the NPPF.

9. **Main issue (ii)** . Under the heading 'Heritage Issues', the Inspector concluded that the impact of the development upon the setting of the Park would be less than substantial but the harm would be lessened dramatically if the development was limited to the smaller 290 dwellings scheme, and did not extend up to the appeal site's western boundary.

10. Under the heading 'General landscape matters', the Inspector concluded that saved WLP Policy OL6 dealing with Open Land was not applicable to the Site, and so not relevant. The Council challenged this conclusion in **Ground 2** of this application. The Inspector accepted that the policy in NPPF 112 had to be applied as the Site comprised best and most versatile ("BMV") agricultural land, but he rejected the Council's submission that NPPF 112 was a policy which indicated that "*development should be restricted*" within the meaning of NPPF 14. The Council challenged this conclusion in **Ground 3** of this application. After a lengthy analysis of the other policies and the objections raised by the Council and local people, the Inspector concluded that the proposed development would not have an unacceptable impact on the character and appearance of the surrounding area, and would not be at odds with the relevant development plan policies.

11. **Main issue (iii)** . The Inspector concluded that the proposed development was sustainable in terms of its economic and social impacts, but the environmental aspect had to be weighed in the planning balance.

12. Under the heading 'Planning balance and overall conclusions', the Inspector said:

"137. In accordance with guidance contained in the Framework, there are 2 separate balancing exercises which need to be undertaken in this case, both of which have to take account of benefits which would arise from the appeal proposal. The first is the balance relating to paragraph 134 of the Framework, which requires any "less than substantial" harm to the significance of a designated asset to be weighed against the public benefits of the proposal.

...

141. Weighing these benefits against the harm to the designated heritage asset is, in my assessment, a fine balance, with clear and distinct differences between the 2 proposals. Although I am satisfied that the harm to the setting of the Park should be classed as less than substantial in the case of both the 330 dwelling and the 290 dwelling schemes, I consider it very important to retain some open views of the Park from Haygate Road to retain the significance of this aspect of its setting, and this increases the weight I feel I need to ascribe to the harm in the case of the 330 dwelling scheme. Because of this I am drawn to conclude that the harm to the significance of the Park would be outweighed by the public benefits in the case of the 290 dwelling scheme, but not in the case of the scheme for a maximum of 330 dwellings. In other words the proposal passes the "paragraph 134" test in the up to 290 dwelling scheme, but not in the up to 330 dwelling scheme.

142. Referring back to paragraphs 126 and 127 of this decision, I therefore conclude that the scheme for up to 330 dwellings would not satisfy the environmental role of sustainable development, whereas the scheme for up to 290 dwellings would. Accordingly, I further conclude that the proposed development can be considered as representing sustainable development, but only if the maximum number of dwellings is restricted to 290, and the development proceeds in general accordance with Development Framework Plan reference 5644-L-03-Rev N.

143. I now turn to the second balancing exercise which needs to be undertaken, In view of my earlier conclusions that development plan policies referred to in the putative reasons for refusal are out-of-date and should carry less than full weight because of inconsistencies with Framework policies, this is the weighted balance set out in the second bullet point of the decision-taking section of the Framework paragraph 14. This indicates, under its first limb, that planning permission should be granted unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the Framework taken as a whole. The second limb of this bullet point relates to the situation where specific policies in the Framework indicate development should be restricted, such as where designated heritage assets are concerned, and I have already addressed this matter, above.

144. From the conclusions I have already reached on the main issues I consider that the proposed development would result in some adverse impacts, but that these would be limited. My reasoning is set out fully in the appropriate paragraphs, above, but in summary there would firstly be a loss of just over 15 ha of BMV agricultural land. But as much of the agricultural land surrounding Telford is of BMV status, and as it is clear that this has not prevented the Council from recently granting planning permission for a scheme at Priorslee which will result in a much greater loss of BMV land than here, I can only give this impact a modest amount of weight.

145. Insofar as impact on the Registered Park is concerned, by not seeking to provide development on the southernmost part of the site, adjacent to Haygate Road, the scheme for a maximum of 290 dwellings would only result in a low level of "less than substantial" harm to weigh against the proposal.

...

147. Turning then to the benefits of this proposal, I have already detailed, above, that there would be substantial benefits arising from the provision of up to 290 new dwellings, including up to 73 new affordable homes. I give significant weight to this provision of both market and affordable housing. I also accord significant weight to the economic and social benefits which the scheme would give rise to, and which have already been detailed above. In addition, I have concluded that modest weight should be given to the gains arising from increased public access to the appeal site, and to the highway improvements which would arise from the proposal.

Overall conclusion

148. I am required to determine this proposal in accordance with the development plan, unless material considerations (which include the Framework), indicate otherwise. I have identified some conflict with development plan policies under both the first and second main issues, but have concluded that these policies are out-of-date and should carry less than full weight because of inconsistencies with policies in the Framework. Because of this, and having regard to my findings on all 3 main issues, my overall conclusion is that the adverse impacts of the proposal would not significantly and demonstrably outweigh the substantial benefits which would arise from this development."

13. Dove J. granted permission to apply for a statutory review on Ground 3, but refused permission on Grounds 1, 2, 4 and 5. The Council renewed its application for permission on Grounds 1, 2 and 5 which was listed to be heard at the same time as the substantive hearing on Ground 3. Ground 4 was abandoned.

Legal framework

Section 288 Tcpa 1990

14. Under [section 288](#) TCPA 1990, a person aggrieved may apply to quash a decision on the grounds that (a) it is not within the powers of the Act; or (b) any of the relevant requirements have not been complied with and in consequence, the interests of the applicant have been substantially prejudiced.

15. The general principles of judicial review are applicable to a challenge under [section 288](#) TCPA 1990. Thus, the Claimant must establish that the Secretary of State misdirected himself in law or acted irrationally or failed to have regard to relevant considerations or that there was some procedural impropriety.

16. The exercise of planning judgment and the weighing of the various issues are matters for the decision-maker and not for the Court: *Seddon Properties v. Secretary of State for the Environment (1978) 42 P & CR 26* . As Sullivan J. said in *Newsmith v. Secretary of State for the Environment, Transport and the Regions [2001] EWHC Admin 74, at [6]* :

"An application under [section 288](#) is not an opportunity for a review of the planning merits of an Inspector's decision."

17. An Inspector's decision letter must be read (1) fairly and in good faith, and as a whole; (2) in a straightforward down-to-earth manner, without excessive legalism or criticism; (3) as if by a well-informed reader who understands the principal controversial issues in the case: see Lord Bridge in *South Lakeland v. Secretary of State for the Environment [1992] 2 AC 141, at 148G-H* ; Sir Thomas Bingham MR in *Clarke Homes v. Secretary of State for the Environment (1993) 66 P & CR 263, at 271* ; *Seddon Properties v. Secretary of State for the Environment (1981) 42 P & CR 26, at 28* ; and *South Somerset District Council v. Secretary of State for the Environment (1993) 66 P & CR 83* .

Determining an application for planning permission

18. The determination of an application for planning permission is to be made in accordance with the development plan, unless material considerations indicate otherwise: [section 38\(6\) of the Planning and Compulsory Purchase Act 2004](#) , read together with [section 70\(2\) Town and Country Planning Act 1990](#) .

19. In *Tesco Stores Limited v. Dundee City Council [2012] UKSC 13* , the House of Lords held that the proper interpretation of planning policy is ultimately a matter of law for the court, and a failure by a planning authority to understand and apply relevant policy will amount to an error of law. However, as Lord Reed explained at [19]:

"... many of the provisions of development plans are framed in language whose application to a given set of facts requires the exercise of judgment. Such matters fall within the jurisdiction of planning authorities, and their exercise of their judgment can only be challenged on the ground that it is irrational or perverse (*Tesco Stores Ltd v. Secretary of State for the Environment [1995] 1 WLR 659* , 780 per Lord Hoffmann)."

20. Whether or not a particular consideration is material is ultimately a matter for the court to determine: *Tesco Stores Ltd. v. Secretary of State for the Environment [1995] 1 WLR 759* , per Lord Keith at 764A. Subject to *Wednesbury* unreasonableness, however, it is a matter for the decision maker to decide the weight (if any) to be attached to a material consideration: *Tesco Stores*, per Lord Hoffman at 780F-H.

21. In principle, any consideration which relates to the use and development of land is capable of being a planning consideration. Whether a particular consideration which falls within that broad class is material in any given case will depend on the circumstances, and whether it is relevant to the question whether the application for planning permission should be granted or refused.

National Planning Policy Framework (Nppf)

22. The Court of Appeal has recently given guidance on the NPPF in *Suffolk Coastal District Council v. Secretary of State for Communities and Local Government [2016] EWCA Civ 168; [2016] 2 P & CR 1* where Lindblom LJ said as follows:

"9. The Government's commitment to a "plan led" planning system is apparent throughout the NPPF. Paragraph 2 in the "Introduction" acknowledges the statutory presumption in favour of the

development plan in [s.38\(6\) of the Planning and Compulsory Purchase Act 2004](#) , and the status of the NPPF as another material consideration:

"Planning law requires that applications for planning permission must be determined in accordance with the development plan, unless material considerations indicate otherwise. The [NPPF] must be taken into account in the preparation of local and neighbourhood plans, and is a material consideration in planning decisions. . . ."

There are several other references to the "plan-led" system: for example, in para.17, which sets out 12 "core land-use planning principles" that "should underpin both plan-making and decision-taking". The first of these "core" principles is that planning should be "... genuinely plan-led, empowering local people to shape their surroundings, with succinct local and neighbourhood plans setting out a positive vision for the future of the area". It adds that "[plans] should be kept up-to-date ..." and "should provide a practical framework within which decisions on planning applications can be made with a high degree of predictability and efficiency."

12. Under the heading "The presumption in favour of sustainable development", para.12 acknowledges that the NPPF "does not change the statutory status of the development plan as the starting point for decision making". It says that "[proposed] development that accords with an up-to-date Local Plan should be approved, and proposed development that conflicts should be refused unless other material considerations indicate otherwise". It adds that "[it] is highly desirable that local planning authorities should have an up-to-date plan in place". Paragraph 13 confirms that the NPPF "constitutes guidance for local planning authorities and decision-takers both in drawing up plans and as a material consideration in determining applications". Paragraph 14 explains how the "presumption in favour of sustainable development" is to be applied:

"At the heart of [the NPPF] is a presumption in favour of sustainable development, which should be seen as a golden thread running through both plan-making and decision-taking.

For plan-making this means that:

- local planning authorities should positively seek opportunities to meet the development needs of their area;
- Local Plans should meet objectively assessed needs, with sufficient flexibility to adapt to rapid change, unless:
 - any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in [the NPPF] taken as a whole; or
 - specific policies in [the NPPF] indicate development should be restricted. [Here there is a footnote, footnote 9, which states: "For example, those policies relating to sites protected under the Birds and Habitats Directives ... and/or designated as Sites of Special Scientific Interest; land designated as Green Belt, Local Green Space, an Area of

Outstanding Natural Beauty, Heritage Coast or within a National Park (or the Broads Authority); designated heritage assets; and locations at risk of flooding or coastal erosion."]

For decision-taking this means [Here there is a footnote, fn.10, which says: "Unless material considerations indicate otherwise"]:

- approving development proposals that accord with the development plan without delay; and
- where the development plan is absent, silent or relevant policies are out-of-date, granting permission unless:
 - any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in [the NPPF] taken as a whole; or
 - specific policies in [the NPPF] indicate development should be restricted. [Here footnote 9 is repeated.]"

39.Footnote 9 explains the concept of specific policies in the NPPF indicating that development should be restricted. The NPPF policies it gives as examples relate to protected birds and habitats, Sites of Special Scientific Interest, the Green Belt, Local Green Space, Areas of Outstanding Natural Beauty, Heritage Coasts, National Parks, the Broads, heritage assets and locations at risk of flooding or coastal erosion (see [12] above). For all of these interests of acknowledged importance—some of them also subject to statutory protection—the NPPF has specific policies. The purpose of the footnote, we believe, is to underscore the continuing relevance and importance of these NPPF policies where they apply. In the context of decision-taking, such policies will continue to be relevant even "where the development plan is absent, silent or relevant policies are out-of-date". This does not mean that development plan policies that are out-of-date are rendered up-to-date by the continuing relevance of the restrictive policies to which the footnote refers. Both the restrictive policies of the NPPF, where they are relevant to a development control decision, and out-of-date policies in the development plan will continue to command such weight as the decision-maker reasonably finds they should have in the making of the decision. There is nothing illogical or difficult about this, as a matter of principle.

40.Paragraph 215 is one of a series of paragraphs in Annex 1 to the NPPF dealing with the implementation of the policies it contains. These are, essentially, transitional provisions. They do not affect the substance of the policies themselves. Under para.214 there was a period of 12 months from the publication of the NPPF—until 27 March 2013—within which decision-takers "may" continue to give full weight to policies adopted since 2004 even if they conflicted with the policies in the NPPF. After that, under para.215, "due weight" was to be given to relevant plan policies, "according to their degree of consistency" with the policies in the NPPF. These provisions for the implementation of NPPF policy do not touch the interpretation of such policy, including the policies for the delivery of housing in Paras 47 To 55 and the policy explaining the "presumption in favour of sustainable development" in para.14...."

42. The NPPF is a policy document. It ought not to be treated as if it had the force of statute. It does not, and could not, displace the statutory "presumption in favour of the development plan", as Lord Hope described it in *Edinburgh City Council v Secretary of State for Scotland* [1997] 1 W.L.R. 1447 (at 1450B–G). Under s.70(2) of the 1990 Act and s.38(6) of the 2004 Act, government policy in the NPPF is a material consideration external to the development plan. Policies in the NPPF, including those relating to the "presumption in favour of sustainable development", do not modify the statutory framework for the making of decisions on applications for planning permission. They

operate within that framework—as the NPPF itself acknowledges, for example, in para.12 (see [12] above). It is for the decision-maker to decide what weight should be given to NPPF policies in so far as they are relevant to the proposal. Because this is government policy, it is likely always to merit significant weight. But the court will not intervene unless the weight given to it by the decision-maker can be said to be unreasonable in the *Wednesbury* sense.

46. We must emphasise here that the policies in paras 14 and 49 of the NPPF do not make "out-of-date" policies for the supply of housing irrelevant in the determination of a planning application or appeal. Nor do they prescribe how much weight should be given to such policies in the decision. Weight is, as ever, a matter for the decision-maker (see the speech of Lord Hoffmann in *Tesco Stores Ltd v Secretary of State for the Environment* [1995] 1 W.L.R. 759 at 780F-H). Neither of those paragraphs of the NPPF says that a development plan policy for the supply of housing that is "out-of-date" should be given no weight, or minimal weight, or, indeed, any specific amount of weight. They do not say that such a policy should simply be ignored or dis-applied. That idea appears to have found favour in some of the first instance judgments where this question has arisen. It is incorrect.

47. One may, of course, infer from para.49 of the NPPF that in the Government's view the weight to be given to out-of-date policies for the supply of housing will normally be less than the weight due to policies that provide fully for the requisite supply. The weight to be given to such policies is not dictated by government policy in the NPPF. Nor is it, nor could it be, fixed by the court. It will vary according to the circumstances, including, for example, the extent to which relevant policies fall short of providing for the five-year supply of housing land, the action being taken by the local planning authority to address it, or the particular purpose of a restrictive policy—such as the protection of a "green wedge" or of a gap between settlements. There will be many cases, no doubt, in which restrictive policies, whether general or specific in nature, are given sufficient weight to justify the refusal of planning permission despite their not being up-to-date under the policy in para.49 in the absence of a five-year supply of housing land. Such an outcome is clearly contemplated by government policy in the NPPF. It will always be for the decision-maker to judge, in the particular circumstances of the case in hand, how much weight should be given to conflict with policies for the supply of housing that are out-of-date. This is not a matter of law; it is a matter of planning judgment (see [70]–[75] of Lindblom J's judgment in *Crane*, at [71] and [74] of Lindblom J's judgment in *Phides*, and [87], [105], [108] and [115] of Holgate J's judgment in *Woodcock Holdings Ltd v Secretary of State for Communities and Local Government and Mid-Sussex DC* [2015] EWHC 1173 (Admin))."

Ground 1

23. The Council submitted that the Inspector erred in law treating the Council's grant of planning permission for a SUE outside Telford (Priorslee) as a material consideration supporting his conclusion that the policies on settlement boundaries were out-of-date. The Inspector treated it as a precedent, whereas each planning application ought to be considered on its individual merits. Moreover, a planned SUE, designed to maximise sustainability, was a very different matter from an *ad hoc* speculative development.

24. The Inspector said:

"25. There is no firm evidence before me to indicate that the settlement boundaries applicable in 2006 are still appropriate today and are consistent with the Framework's objective of boosting significantly the supply of housing. Indeed, as became apparent at the inquiry, the Council's current 5 year housing land supply contains a number of sites which fall outside existing settlement boundaries. Moreover, the Council has recently granted planning permission for a major, mixed-use development which includes the provision of some 1,100 houses on a site outside the existing

boundary of Telford at Priorslee, a matter to which I return shortly. These points indicate to me that the former settlement boundaries cannot be viewed as inviolable and that this policy does not reflect Framework guidance."

"34. The Council clearly recognises that development will have to take place outside existing settlement boundaries, as referred to in paragraph 25 above and as evidenced by its recent grant of planning permission at Priorslee, also referred to above. The Priorslee site lies outside the existing boundary of Telford and this indicates to me that Policy CS3 cannot be considered up-to-date. It is also the case that the Priorslee proposal is in conflict with TWCS Policy CS7, but whilst I understand that this area is being promoted as a Sustainable Urban Extension in the emerging TWLP, I have already noted that only limited weight can be given to this emerging plan at this stage. It appears that the sustainable nature of the development at Priorslee and its good connectivity to the major services at Telford weighed in its favour in that case, and overcame any conflict with Policy CS7. It seems to me that similar circumstances exist in the case of the appeal proposal."

25. In my judgment, the Inspector was entitled to have regard to other grants of planning permission in the recent past in determining the question whether the policies on settlement boundaries were out-of-date. It was plainly a relevant consideration as it supported the contention that current housing needs could not be adequately met within the settlement boundaries identified in the policies. The weight to be given to this consideration was a matter of planning judgment for the Inspector, not this court.

26. The Inspector mistakenly stated that the Council had decided to grant planning permission, whereas in fact at the time of his decision, the Council had only resolved to grant planning permission, and it only granted planning permission at a later date. However, it was accepted by the Council that nothing turned on this mistake.

27. The Council also challenged the Inspector's reliance upon the Priorslee development at Appeal Decision ("AD") 86 and 144, when reaching his decision on the application of NPPF 112 on the use of BMV agricultural land. I deal with this aspect under Ground 3.

Ground 2

28. The Council submitted that the Inspector erred in his approach to the WLP when he concluded that Policy OL6 was not intended to provide protection for large areas of agricultural land in the countryside, such as the appeal Site.

29. The Inspector found:

"65. Saved WLP Policy OL6, dealing with Open Land, is cited in both putative reasons for refusal, although I note that it did not feature at all in the original Officer's Report to Committee of May 2014. This policy seeks to protect from development "locally important incidental open land

within or adjacent to built-up areas" where that land contributes to the character and amenity of the area, has value as a recreational space or importance as a natural habitat. The Council contends that this policy applies in the current case, and would be breached by the appeal proposal.

66. However, whilst there is no specific definition of "locally important incidental open land" within the policy or its supporting text, I find it very difficult to accept that the original purpose of this policy was to provide protection for large areas of agricultural land in the countryside, such as the appeal site. If that had been the case, there would clearly have been no need for WLP Policy OL7, which dealt specifically with Development in the Open Countryside and which, amongst other matters, stated that the Council will protect the open countryside from any development that is likely to have an adverse effect on its character or quality.

...

68. I share the appellant's view that it is unreasonable and unacceptable to seek to reintroduce a blanket protection of open countryside through use of Policy OL6, as appears to be the Council's intention here. With these points in mind, I am not persuaded that WLP Policy OL6 is applicable or relevant in this case. In these circumstances there can be no breach of this policy by the appeal proposal. Albeit for a different site, I note that Inspector Hand reached a similar conclusion in the Muxton appeal."

30. Saved Policy OL6, and its supporting text, provided:

" OL6 OPEN LAND

Throughout the District, the Council will protect from development locally important incidental open land within or adjacent to built-up areas where that land contributes to the character and amenity of the area, has value as a recreational space or importance as a natural habitat.

8.3.21. Open land without any special designation can often make a valuable and important contribution to the character of an area and can help to define the setting of surrounding development and adjacent buildings. It can relieve the sense of congestion and pressure that might be felt, particularly in the older traditional urban areas of the District. These areas can provide green space, visual variety and very local recreational opportunities. The Council considers the retention of these sites to be most important.

8.3.22. Many of the sites to which the above policy will apply are within Newport. Important area of open land within Newport, including those marked on the proposals map, need protecting from inappropriate development. The Council may seek, through negotiation, planning benefits in order to fulfil the potential of open land where that land is an important and integral part of a development.

8.2.23. The character of many of the villages within the District is defined by the open land and spaces between and around individual properties. Playing fields and children's play areas are also important features in a number of villages and once lost to development may be difficult to replace in the locality."

31. Policy OL7 (now expired) and its supporting text provided (so far as it material):

" OL7 DEVELOPMENT IN THE OPEN COUNTRYSIDE

The Council will protect the open countryside from any development that is likely to have an adverse effect on its character or quality and will protect the rural setting of settlements, buildings or features within the open countryside. In particular, the Council will not permit development which would contribute to the amalgamation of settlements.

8.3.24.

8.3.25. National advice, currently set out in PPG7, is that the countryside should be safeguarded for its own sake. Therefore as Telford, and to a lesser extent the other settlements around Telford, continue to develop, it is important that the undeveloped, rural 'gaps' between them are protected. Any development that could result ultimately in the coalescence of settlements will be strenuously resisted in order to help preserve the individual character that they each display.

8.3.26. The land around Telford is generally of good visual and agricultural quality. Some of the surrounding settlements are relatively close, and, although development will be directed towards the reuse of brownfield sites within urban areas, there is still likely to be pressure for development in fringe areas and in the "gaps" between settlements. Any proposals will be considered with great care."

32. In my judgment, the Inspector correctly interpreted Policy OL6, and applied it appropriately to the facts of this case. Policy OL6 protected " *incidental open land* ", in and around built-up areas, which was of importance and value to the local community, even though it had no special designation. Illustrations were provided in the supporting text. Although this Site was adjacent to a built-up area, it did not come within the natural meaning of the words "incidental open land" with no special designation, as it was a large tract of agricultural land, in use for that purpose. Moreover, the nature and character of this Site did not bear any resemblance to the illustrations in the supporting text. The public did not have access to it, other than along the public footpath, though naturally local residents appreciated the view and the sense of openness which it afforded. As part of the interpretative exercise which he had to undertake, I consider that the Inspector was entitled to take into account that the Site fell much more readily within the scope of Policy OL7, since it was " *open countryside* " beyond the settlement boundary of Telford. As the supporting text demonstrated, Policy OL7 was designed to protect the land around Telford which was " *generally of good visual and agricultural quality* ", and to guard against development of fringe areas and gaps between settlements.

33. The Council rightly submitted that the Inspector's observation in AD 66 that, if large areas of agricultural land in the countryside fell within Policy OL6, then there would have been no need for Policy OL7, mistakenly overlooked the fact that OL6 was limited to land within or adjacent to built-up areas. Policy OL7 would still have been required to protect countryside situated away from built-up areas. However, I do not consider that this mistake undermines his interpretation of the policy, which was correct for the reasons I have given.

34. The Council did not argue at the Inquiry that parts of the Site which were situated close to areas used by members of the public, such as the cricket ground or the footpath or the residential roads, could be subject to Policy OL6, and it is not open to the Council to seek to attack the Inspector's decision for failing to consider this point. In any event, it is difficult to see how the policy could be applied in such a manner.

Ground 3

35. The Council submitted that the Inspector erred in law in rejecting the Council's submission that NPPF 112 ought to be treated as a policy which indicated that "*development should be restricted*" within the meaning of the second limb of the second bullet point on "*decision-taking*" in NPPF 14.

36. NPPF 112 provides:

"Local planning authorities should take into account the economic and other benefits of the best and most versatile agricultural land. Where significant development of agricultural land is demonstrated to be necessary, local planning authorities should seek to use areas of poorer quality land in preference to that of a higher quality."

37. The Council relied upon the case of *Forest of Dean District Council v. Secretary of State for Communities and Local Government [2016] EWHC 421 (Admin)*, where Coulson J. held, at [23] – [42], that NPPF 134¹ was a policy which indicated that "*development should be restricted*" within the meaning of the second limb of the second bullet point under 'decision-taking' in NPPF 14. He treated the list of policies in footnote 9 as illustrative rather than exhaustive, but in any event, heritage assets were included in the list. He considered that the term "*restricted*" should be given a "*relatively wide meaning*"; in particular, "*restricted*" should not be interpreted to mean "*refused*", which was not the word used in the policy. The inclusion of NPPF 114² in the list of examples of restrictive policies indicated that "restricted" could encompass a policy, such as NPPF 134, which identified a situation in which the presumption in favour of development did not apply.

38. I agree with Coulson J.'s interpretation of the NPPF, but upon applying it here, I have concluded that NPPF 112 cannot be characterised as a policy which indicates that "*development should be restricted*" within the meaning of NPPF 14. I accept the Defendants' submissions that the policy is simply an instruction (i) to "*take into account*" the economic and other benefits of the best and most versatile agricultural land which does not confer any particular level of protection and (ii) to "*prefer*" the use of poorer quality land if significant development of agricultural land is necessary, which applies to all agricultural land, not just BMV land. It is not a prohibition on the use of BMV agricultural land, nor a restriction on development in principle; it does no more than to encourage the relocation of proposed development onto poorer quality agricultural land if available. The permissive language of NPPF 112 is very different to the language used in the "*specific policies*" of restraint identified in footnote 9, as Mr Buley demonstrated in his helpful table.

39. The Inspector's reasoning was at AD 85 & 86, where he said, inter alia:

"85. there is no internal balancing exercise required by paragraph 112, nor is there any suggestion that planning permission should be refused if BMV land is to be lost. Rather, the loss of agricultural land is just one of the matters which has to be taken into the overall planning balance when a proposal for development is being considered.

86. That is how the Council approached this matter when it recently granted planning permission for the aforementioned major development at Priorslee, involving the loss of over 60 ha of

agricultural land, some 24.5 ha of which is classed as high quality BMV agricultural land. Presumably the Council also adopted this approach insofar as TWCS Policy CS13 is concerned, as the loss of BMV agricultural land did not prevent the grant of planning permission. I have regard to this matter in undertaking the planning balance, later in this decision, but in view of the points detailed above I do not share the Council's view that loss of BMV land is a matter covered by footnote 9 to Framework paragraph 14."

40. Although I agree with Coulson J. that the correct test is "*restricted*" not "*refused*", I consider that the Inspector's ultimate conclusion was correct.

41. In my judgment, the Inspector was entitled to take into account the Council's approach to NPPF 112, when resolving to grant planning permission at Priorslee, in support of his interpretation of NPPF 112 and NPPF 14. The Council's decision to grant planning permission notwithstanding the loss of BMV agricultural land was capable of being a material consideration which the Inspector was entitled to take into account in assessing the planning balance and deciding whether to grant planning permission. Previous decisions raising the same or similar issues were potentially relevant. I refer to my reasoning under Ground 1 above.

42. The Inspector applied NPPF 112 in the overall planning balance, at AD 144, which is set out at paragraph 12 above, and accorded only "*a modest amount of weight*" to the impact of the loss of BMV agricultural land. Much of the agricultural land surrounding Telford was BMV; no alternative site comprising poorer quality land was put forward. So even if the Inspector had treated NPPF 112 as a policy which restricted development under NPPF 14, and applied it without the weighted presumption in favour of the grant of permission, it seems unlikely that, in the exercise of his planning judgment, he would have refused planning permission for that reason. So he would have then gone on to consider NPPF 112, together with the other relevant factors, as part of what he described as "*the second balancing exercise*" in AD 143, applying the weighted presumption in favour of granting permission as the development plan policies were out-of-date, just as he did in the decision under challenge. So, either way, the outcome would likely have been the same.

43. I consider that this two stage approach (which the Inspector adopted in respect of the restrictive policy in NPPF 134) was appropriate, even though somewhat repetitive. In a case such as this, with multiple factors and policies to be considered, it was an effective way of applying the differing requirements in NPPF 14. Support for such an approach was expressed in *R (Watermead Parish Council) v. Aylesbury Vale District Council [2016] EWHC 624 (Admin)*, where HH Judge Waksman QC (sitting as a Judge of the High Court) considered the application of NPPF 14 to development in "*locations at risk of flooding or coastal erosion*", cited in footnote 9 as an example of policies which indicated that development should be restricted. The NPPF policies are at NPPF 100 – 108. The Judge held, at [45] – [48], that the presumption weighted in favour of granting permission for development, set out in the second bullet point, should be initially dis-applied, as it would run contrary to the presumption against development contained in the restrictive policy. However, if after application of the restrictive policy, the outcome was in favour of development, then the weighted presumption in favour of development "*resurfaces and can be applied*".

Ground 5

44. The Council submitted that the Inspector erred in concluding that Policy CS7 on development in rural areas did not conform with the NPPF and so was not up to date. It avoided the absolute restrictions in the policy which preceded it, WLP Policy H9. It adopted a three tier approach, focusing growth in three sustainable villages; allowing limited development in other villages, and imposing strict controls (but not an absolute ban) on development in the open countryside.

45. Policy CS7 provided, so far as material, as follows:

" CS7 Rural Area

Development within the rural area will be limited to that necessary to meet the needs of the area. It will be focused on the settlements of High Ercall, Tibberton and Waters Upton. New housing development will be expected to deliver affordable housing to the level of 40% of all such development. Outside of these settlements development will be limited and within the open countryside will be strictly controlled."

46. The Inspector said:

"32. It is against this backdrop that I have to consider whether TWCS Policies CS1, CS3 and CS7 can be considered up-to-date and, if not, what weight should reasonably be given to them. I agree with the main parties that Policy CS1 is out of date as it refers to housing figures which were based on now-revoked Regional Guidance. The relevance of Policies CS3 and CS7 to the current proposal is that they seek to restrict development to existing urban areas, in particular Telford. Policy CS7 deals explicitly with the rural area, stating that development within that area will be focussed on the same 3 settlements which feature in saved WLP Policy H9, but goes on to say that outside these settlements development will be limited and, within the open countryside, will be strictly controlled.

33. However, this latter point, in itself, demonstrates that this policy is not up-to-date and in conformity with the more recent planning policy context established by the Framework, where there is no blanket protection of the open countryside and where there is a requirement to boost significantly the supply of housing. I consider it also of relevance that although the appeal site does lie outside the current settlement boundary, there was general agreement between the parties that, if allowed, the proposed development would function as an urban extension to Telford, and would not be considered as a rural settlement...

35. In view of all the above points, and notwithstanding the fact that the TWCS remains part of the statutory Development Plan, I have to conclude that Policies CS1, CS3 and CS7 are out-of-date, and should not be given full weight in this appeal, when assessed alongside the guidance in paragraph 215 of the Framework. Insofar as this conclusion differs to that reached by Inspector Hand, I have set out my reasons, above. Overall, these matters lead me to conclude that the appeal proposal should be assessed using the approach set out in the second bullet point of the decision-taking section of paragraph 14 of the Framework, regardless of whether the Council is able to demonstrate a 5 year supply of deliverable housing land."

47. In my judgment, the Inspector did not err in law in concluding that Policy CS7 was not in conformity with the NPPF and so was out-of-date. It is a core planning principle, set out in NPPF 17, that decision-taking should recognise "*the intrinsic character and beauty of the countryside and supporting thriving rural communities within it*". This principle is

reflected throughout the NPPF e.g. policy on the location of rural housing (NPPF 55); designation of Local Green Space (NPPF 76); protection of the Green Belt (NPPF 79 – 92) and Section 11, headed "Conserving and enhancing the natural environment" (NPPF 109- 125). However, NPPF does not include a blanket protection of the countryside for its own sake, such as existed in earlier national guidance (e.g. Planning Policy Guidance 7), and regard must also be had to the other core planning principles favouring sustainable development, as set out in NPPF 17. The Inspector had to exercise his planning judgment to determine whether or not this particular policy was in conformity with the NPPF, and the Council has failed to establish that there was any public law error in his approach, or that his conclusion was irrational.

Conclusions

48. Despite Mr Jones' excellent submissions, permission is refused on Grounds 1, 2 and 5 and the Council's application to quash the decision on Ground 3 is refused.

Footnotes

- 1 "134. Where a development proposal will lead to less than substantial harm to the significance of a designated heritage asset, this harm should be weighed against the public benefits of the proposal, including securing its optimum viable use."
- 2 "114. Local planning authorities should ...maintain the character of the undeveloped coast, protecting and enhancing its distinctive landscapes, particularly in areas defined as Heritage Coast, and improve public access to an enjoyment of the coast."

Anita Colman v Secretary of State for Communities and Local Government, North Devon District Council, RWE Npower Renewables Limited

Positive/Neutral Judicial Consideration

Court

Queen's Bench Division (Administrative Court)

Judgment Date

9 May 2013

Case No: CO/12831/2012

High Court of Justice Queen's Bench Division Administrative Court

[2013] EWHC 1138 (Admin), 2013 WL 1904172

Before: Mr Justice Kenneth Parker

Date: 09/05/2013

Hearing dates: 19 April 2013

Representation

David Cocks QC and Zack Simons (instructed by Richard Buxton) for the Claimant.
Richard Honey (instructed by The Treasury Solicitor) for the First Defendant.
John Litton QC (instructed by Burges Salmon) for the Third Defendant.

Judgment

Mr Justice Kenneth Parker:

Introduction

1. This is a claim under [section 288 of the Town and Country Planning Act 1990](#) . The Claimant, **Anita Colman**, seeks the quashing of the decision of the Inspector, Mr R W N Grantham BSc(Hons) MRSC MCIWEM, appointed by the Secretary of State for Communities and Local Government, the First Defendant, contained in a decision dated 22 October 2012. The Inspector held an inquiry over 15 days from June to September 2012 and undertook both accompanied and unaccompanied site visits.
2. The Inspector granted planning permission for the construction of nine wind turbines of 103m in height to blade tip on land at Batsworthy Cross, Knowstone, North Devon. Planning permission had been refused by the North Devon District Council, the Second Defendant, in July 2011.

The National Planning Policy Framework (March 2012) (“the NPPF”)

3. Prior to the public inquiry, but after the Council had considered and refused the Applications, the Secretary of State published the National Planning Policy Framework (March 2012) (“the NPPF”) setting out the Government’s planning policies for England and guidance as to how it expects those policies to be applied. However, paragraph 2 of the Introduction to the NPPF makes clear that –

“Planning law requires that applications for planning permission must be determined in accordance with the development plan, unless material considerations indicate otherwise. The National Policy Framework must be taken into account in the preparation of local and neighbourhood plans, and is a material consideration in planning decisions... ” (Footnotes omitted)

4. Paragraphs 11, 12 and 196 of the NPPF reiterate the approach required by [s. 38\(6\) of the Planning and Compulsory Purchase Act 2004](#) (“the 2004 Act”), namely that a proposed development which is in accordance with an up-to-date Local Plan should be approved and proposed development that conflicts should be refused “unless other material considerations indicate otherwise”. Paragraph 13 identifies the guidance in the NPPF as a material consideration to be taken into account in determining applications for development.

5. Paragraph 14 of the NPPF refers to a presumption in favour of “sustainable development” as a central feature of the NPPF in relation to both plan-making and decision-taking. In the context of decision-taking, the presumption in favour of sustainable development is given expression in two ways. The first is by approving development proposals that accord with the development plan. The second is to grant permission where the development plan is absent, silent or where relevant policies are “out-of-date” unless any adverse impacts of granting permission for the proposed development “would significantly and demonstrably outweigh the benefits, when assessed against the policies in the [NPPF] taken as a whole”. Paragraph 211 in Annex 1 to the NPPF makes clear that for the purposes of decision-taking, the policies in the Local Plan should not be considered out-of-date simply because they were adopted prior to the publication of the NPPF.

6. Transitional provisions in Annex 1 to the NPPF permit decision-takers, for 12 months from the date of publication of the NPPF, to continue to give full weight to relevant policies in development plan documents adopted since, and in accordance with, the 2004 Act even if there is a limited degree of conflict between those development plan policies and the NPPF (see paragraph 214). However, where relevant policies are contained in development plan documents which have not been adopted in accordance with the 2004 Act (or the policies have been adopted under the 2004 Act but there is more than a limited degree of conflict with the NPPF) the weight to be given to them depends on the consistency of those policies with the NPPF, with greater weight being given to development plan policies which are consistent with the NPPF’s policies (see paragraph 215).

7. The policies relevant to determination of the appeals considered by the Inspector were not in development plan documents adopted in accordance with the 2004 Act. Any inconsistency between those policies and the NPPF would render them out of date and cause the approach set out in paragraph 14 of the NPPF to be engaged. In that case the decision-taker would be required to consider whether any adverse impacts of granting planning permission for the development would significantly and demonstrably outweigh the benefits when assessed against the policies in the NPPF taken as a whole.

The Inspector’s Decision

8. At paragraph 19, the Inspector set out the planning policy context for the determination of the appeals noting that (a) the NPPF was a material consideration which could be given considerable weight if the relevant policies in the development plan were not adopted in accordance with the 2004 Act; and (b) the weight to be given to the NPPF would increase according to the degree of inconsistency between the relevant development plan policies and the NPPF (see paragraphs 214 and 215 of Annex 1 to the NPPF).

9. At paragraph 20, the Inspector identified the development plan as including RPG10 and the saved policies of the Local Plan (LP) and the Devon Structure Plan (SP) but noted that the development plan policies were not adopted in accordance with the 2004 Act. The Inspector stated that it was therefore necessary to consider the consistency of the individual relevant development plan policies with the policies of the NPPF for the purpose of deciding how much weight to give the development plan policies and those in the NPPF in his assessment of the merits of the development.

10. At paragraph 21, the Inspector noted that the NPPF replaced much of the previously published national planning policy guidance but that certain of the companion guides to those policy statements remained extant. At paragraph 22, he referred to the approach to be adopted in the assessment of on-shore wind farms in the context of the extant Overarching National Policy Statements for Energy (EN-1) and for Renewable Energy Infrastructure (EN-3).

11. At paragraph 23 the Inspector referred to the Government's commitment to reducing greenhouse gas emissions and increasing energy supply from renewable sources, including from on-shore wind farms. The Inspector also mentioned that not all renewable energy developments are sustainable and that the impacts of such developments (e.g. on the landscape) have to be taken into account.

12. At paragraph 26, the Inspector identified the main issues in relation to the wind farm as being the impact of the proposed development on the landscape, cultural heritage, living conditions of local residents, bats and highway safety and whether any impacts would be outweighed by the benefits of the scheme.

13. At paragraphs 30 – 214 the Inspector assessed the impacts of the proposed development against the identified issues in the context of the relevant development plan policies and arrived at his conclusions in relation to each of the relevant issues.

14. In addition to the impacts identified above, the Inspector considered the benefits of the scheme at paragraphs 215 – 229 and concluded that –

- i) On-shore wind was essential to meeting the UK's need for energy security and reducing greenhouse emissions (paragraph 219).
- ii) The savings in CO2 emissions were likely to be substantial and valuable over the lifetime of the scheme (25 years) (paragraph 227).
- iii) There would be economic benefits from employment during construction and operation of the wind farm with possible expenditure of more than £1 million to the local economy (paragraph 228).

15. At paragraphs 230 – 236, the Inspector weighed the harmful impacts against the benefits of the proposed development and concluded as follows –

“234. Some employment would be generated by the development, but this would be mostly during the construction phase. However, the benefits of reduced greenhouse gas emissions would be long lasting and the need for new renewable electricity generating projects is urgent. Whilst the CO2 savings which this wind farm would achieve would not be as great as anticipated, they would nevertheless be valuable and, as such, would outweigh the limited harm which the scheme would cause.

235. Development plan policies which seek to promote renewable energy schemes provide no direct support for these proposals. This is because they only allow for the benefits of the scheme to be balanced against the harm, if the energy generated would contribute towards meeting the county's 2010 target of producing 151MW of electricity from renewable sources. That target no longer applies and the development plan's approach is outdated when considered against the Framework's presumption in favour of sustainable development.

236. This is not a case where the harm caused would significantly and demonstrably outweigh the benefits. Indeed, subject to putting suitable controls in place, the impact of the Batsworthy Cross Wind Farm would be acceptable and, on that basis, permission should be granted for the Appeal A proposals.”

The Grounds of Challenge

16. For reasons that are apparent from the foregoing analysis it was common ground at the inquiry and in this appeal that the Inspector had first to identify and analyse the relevant policies in the development plan and, secondly, to determine the extent, if any, to which a relevant policy was consistent with the NPPF. The central ground of challenge in this appeal is that the Inspector failed properly to analyse a number of relevant policies and also reached conclusions on consistency that were wrong. Also the challenge was presented under two separate heads. The points are closely interlinked, and I shall deal with them together. I shall look in turn at the relevant policies.

A. Landscape Character

17. At paragraph 60 the Inspector stated:

“The impact would also be limited to a period of 25 years, or less. Although this is a matter to be considered in the overall balance, it does not reduce the degree of harm or alter my conclusion that the proposals run contrary to LP Policy ENV1 and SP Policy CO1. However, the Framework requires a judgment to be made as to whether an adverse impact, such as this, would be outweighed by the scheme's benefits. This approach is unlike that set out in Policies ENV1 and CO1; it therefore carries substantial weight.”

18. Given the background and earlier references it was plain that the Inspector was in the above paragraph concluding that relevant policies LP Policy ENV1 and SP Policy CO1 were significantly inconsistent with the NPPF and to that extent the overall “cost/benefit” approach of the NPPF was to be preferred.

19. Mr David Cocks QC, on behalf of the Claimant, submitted that there was no significant inconsistency between the relevant policies. At first sight that is a curious submission, given the express terms of the relevant policies. For example, SP CO1 expressly provides:

“Policy SP CO1

Landscape Character and Local Distinctiveness

The distinctive qualities and features of Devon's Landscape Character Zones, illustrated in Map 5, should be sustained and enhanced ... Policies and proposals within each part of Devon should be informed by and be sympathetic to its landscape character and quality .” (My emphasis)

20. The supporting text to Policy SP CO1 also refers to “conservation” and “maintenance”.

21. LP Policy ENV1 states:

“Policy ENV1 (Development in the Countryside) Development in the countryside will only be permitted where:

A rural location is required.

It provides economic or social benefits to the local community: and

It protects and enhances its beauty, the diversity of its landscape and historic character, the wealth of its natural resources and its ecological, recreational and archaeological value.”

22. These policies are, in my view, on their own express terms very far removed from the “cost/benefit” approach of the NPPF. The policies as such do not permit any countervailing economic or similar benefit to be weighed in the scales. A submission that such benefits may be implicitly taken into account would be immediately rejected as running directly contrary to both the language and rationale of the relevant policies. Mr Cocks QC sought to meet this formidable objection by submitting that such benefits, recognised as central to the NPPF, would always constitute a “material consideration” relevant to the grant of development permission, and should, therefore, be “read into” the relevant policies.

23. I reject that argument on two grounds. First, the NPPF in referring to “relevant policies” is plainly directing the mind of the decision maker to the express terms of the relevant policies and requiring the decision maker to compare, for consistency, the express terms with the “cost/benefit” approach of the NPPF. Secondly, and perhaps more importantly, it is a fundamental and long established principle of planning law that something identified as a “material consideration” (such as the putative economic and environmental benefit in the present context) is conceptually distinct from considerations identified in the development plan and does not *ceteris paribus* carry the same weight as an aim or consideration identified in the development plan itself. It is, therefore, essential, both analytically and in policy terms, to separate objectives or considerations specifically set out in the development plan from something else that can count only as another “material consideration”. Mr Cocks'

argument confounds elements that fall within different relevant categories, and which have a different character for planning purposes, and it cannot rescue the inconsistency that is obvious on its face between the relevant policies and the NPPF.

24. For these reasons I conclude that the Inspector properly directed his mind in the present context to the relevant policies and correctly analysed the inconsistency between those policies and the NPPF.

B. Historic Buildings and Ancient Monuments (Cultural Heritage)

25. SP policy CO7 is as follows:

“Historic Settlements and Buildings

The quality of Devon's historic environment should be conserved and enhanced . In providing for new development particular care should be taken to preserve the historic character of settlements, the character and appearance of conservation areas, the historic character of the landscape, listed or other buildings of historic interest and their settings and parks and gardens of special historic interest and their settings.” (My emphasis)

26. LP policy ENV17 is as follows:

“Policy ENV17 (listed buildings)

Development affecting a listed building will only be permitted where it preserves the architectural or historic interest of the building and its setting.” (My emphasis)

27. The relevant development plan policies are, therefore, expressed in very restrictive terms. Any harm, or anything less than preservation of the status quo, should lead to permission being refused. The policies admit of no express exceptions. They leave no room to accommodate harm without breaching the policy. Any development which did not at the least preserve the status quo would run counter to the relevant development plan policies.

28. On cultural heritage, the NPPF states that planning should “conserve heritage assets in a manner appropriate to their significance ”. (My emphasis; paragraph 17; paragraph 126).

29. The NPPF also applies a threshold of “substantial harm” and provides different tests where the impact of a development is above or below that threshold. Harm or loss can be allowed where there is clear and convincing justification (paragraph 132). Substantial harm should be exceptional (paragraph 132) but can be allowed where it can be demonstrated either that it is “necessary to achieve substantial public benefits that outweigh that harm” or where certain criteria apply (paragraph 133). Where there is less than substantial harm, the “harm should be weighed against the public benefits of the proposal” (paragraph 134).

30. The NPPF also provides that it is necessary to “avoid or minimise conflict between the heritage asset's conservation and any aspect of the proposal” (paragraph 129; my emphasis added).

31. It is clear from the foregoing that, unlike the highly restrictive relevant development plan policies, the NPPF takes a far more balanced approach, allowing an analysis of the significance or, where appropriate, of the substantiality of harm to the identified cultural interests, and a weighing of the identified harm against the actual benefits that could be expected to result from the benefits. Again I reject, for the reasons given above, the argument that the inconsistency that emerges from

an evaluation of the express terms of the relevant development policies, as against the balanced approach of the NPPF, can be rescued by seeking to “read into” the relevant policies a corresponding balance as a “material consideration”.

32. The Inspector summed up the position at paragraph 99 of the decision as follows:

“Development plan policies simply seek to protect the setting of listed buildings, and of scheduled monuments, against harm, whatever the circumstances. There is no suggestion here that such harm would be substantial, in terms set out in the Framework. Considerable weight therefore attaches to the Framework's requirement that any harm should be balanced against the public benefits of the proposals; a matter that I return to later.” (Footnotes omitted)

33. In the light of the matters that I have set out at length above, I endorse that summary as a fair and accurate statement of the position, and entirely reject the Claimant's criticisms of it.

Renewable Energy Developments

34. The main relevant policies of the development plan on renewable energy developments are SP Policy CO12 and LP Policy ECN15.

35. Policy CO12 states:

“Renewable energy development

Provision should be made for renewable energy developments, including offshore developments, in the context of Devon's sub regional target of 151MW of electricity production from land based renewable sources by 2010 , subject to consideration of their impact upon the qualities and special features of the landscape and upon the conditions of those living or working nearby.” (My emphasis)

36. Thus the Policy's support for renewable energy developments had to be assessed against the background of the target referred to which would determine whether permission would be granted.

37. Policy ECN15 states:

“Provision should be made for renewable energy developments to contribute towards Devon's sub regional target of 151MW of electricity production from renewable sources by 2010. In considering proposals for renewable energy, the benefits of the developments in meeting this target will be balanced against the impact on the local environment. A proposal for the generation of energy from a renewable source will be permitted where:—

The proposal, including any associated transmission lines, access roads and other related works does not adversely affect the visual character of its surroundings ; it does not significantly affect

the living conditions of the occupants of residential properties or the amenities of other users of the locality .” (My emphasis)

38. Accordingly, the relevant development plan policies not only supported renewable energy development only against the background of the 2010 target, but also expressly provided that planning permission should be refused where there was significant harm to important identified interests, including visual character, living conditions and landscape character. The central aim of the policies was to avoid such significant harm.

39. By contrast, the NPPF's policy is that the development of renewable energy is to be encouraged (paragraph 17) and supported (paragraph 93). The NPPF states that “this is central to the economic, social and environmental dimensions of sustainable development” (paragraph 93).

40. In particular, the NPPF says that policies should:

“maximise renewable and low carbon energy development while ensuring that adverse impacts are addressed satisfactorily , including cumulative landscape and visual impacts.” (My emphasis)

41. The NPPF states that when determining planning applications a decision-maker should “approve the application if its impacts are (or can be made) acceptable” (paragraph 98).

42. In the same way, the Overarching National Policy Statement for Energy (EN-1), (applied by footnote 17 to paragraph 97 of the NPPF) provides at paragraph 5.9.12 that it is necessary to “judge whether any adverse impact on the landscape would be so damaging that it is not offset by the benefits (including need) of the project ”.

43. As already mentioned, the Inspector noted the approach of the NPPF to renewable energy developments at paragraphs 22-23, including the encouragement for renewable energy, the requirement that the impact need only be “acceptable” and that the delivery of renewable energy infrastructure was central to the presumption in favour of sustainable development.

44. At paragraph 235 the Inspector stated:

“Development plan policies which seek to promote renewable energy schemes [LP Policy ECN15 and SP Policy CO12] provide no direct support for these proposals. This is because they only allow for the benefits of the scheme to be balanced against the harm, if the energy generated would contribute towards meeting the county's 2010 target of producing 151MW of electricity from renewable sources. That target no longer applies and the development plan's approach is outdated when considered against the Framework's presumption in favour of sustainable development.”

45. Given the context, as explained above, the Inspector was in this paragraph making two separate points. First, policies ECN15 and CO12 are drafted so as to relate to the 2010 target of 151MW. As the Inspector noted, that target no longer applies. Secondly, “the development plan's approach is outdated when considered against the Framework's presumption in favour of sustainable development”.

46. Mr Cocks QC submitted that the Inspector in the present context did not have regard to all the relevant policies in the development plan, did not analyse these policies correctly and wrongly concluded that the policies were inconsistent with the NPPF and/or outdated. I reject that submission. It is clear from the foregoing that at a number of points in the decision the Inspector identified the relevant development plan policies. It would have been astounding if he had not done so: they were central to the relatively lengthy inquiry and were referred to, particularly in closing submissions, by the experienced advocates at the enquiry. Furthermore, there is nothing in the Inspector's description or analysis of the relevant policies that points to any misunderstanding by the Inspector. The 2010 target was no longer applicable. The whole thrust of the relevant development policies was restrictive, intended to ensure that any significant harm to important identified interests was avoided, and to that extent they were in substance discouraging; by contrast the NPPF encouraged and supported the development of renewable energy schemes, so long as any adverse impacts could be “addressed satisfactorily” and were “acceptable” – a wholly different framework.

47. The inconsistency that is plain between the relevant development plan policies and the NPPF cannot again be avoided by an appeal to any implicit limitation that could be read into the relevant policies (see paragraphs 22-24 above).

The second principal ground of challenge: the application of paragraph 14 of the NPPF was irrational/unlawful

48. This ground of challenge is closely related to the first principal ground of challenge.

49. Mr Cocks QC submitted that the Inspector:

“failed to observe the presumption in favour of the development plan and failed to give individual policies that conflicted with the proposal their proper weight.”

50. The high point of this submission was that the Inspector did not specifically mention [section 38\(6\)](#) of the 2004 Act. There was no legal requirement for him to do so: see *South Northamptonshire Council v Secretary of State for Communities and Local Government* [2013] EWHC 11 (Admin), paragraph 64. The test is one of substance, namely, whether the Inspector failed to apply the approach that is mandated by [section 38\(6\)](#).

51. In this case the Inspector began, as he was required, with the relevant policies set out in the development plan. As explained above, he assessed the planning application in respect of each of the main issues against the relevant policies. However, as

also explained above, he correctly concluded that in material respects some of the relevant policies were inconsistent, indeed strikingly inconsistent, with the NPPF and were to that extent also out of date.

52. Where relevant policies of the development plan are outdated, paragraph 14 of the NPPF provides that planning permission should be granted unless adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the NPPF as a whole. There is a valuable and recent consideration of paragraph 14 by Males J in *Tewkesbury BC v SSCLG* [2013] EWHC (Admin). The learned judge observed at paragraph 13 that the weight to be given to a development plan would depend upon the extent to which it was up-to-date and at paragraph 19 that paragraph 14 of the NPPF provides for what should be done when an existing plan was out-of-date. The result in practice would be that the relevant policies would be regarded as carrying little weight, and there would be a presumption in favour of granting permission (see paragraphs 20, 29 and 49).

53. Lest it be thought that the approach in paragraph 14 represents some fundamental shift in planning law or policy, it is perhaps worth recalling some general and well established principles. In *City of Edinburgh Council v Secretary of State for Scotland* [1997] 1 WLR 1447, the House of Lords considered the approach to the development plan in equivalent Scottish legislation. Their Lordships contemplated that there could well be a departure from the development plan where that policy had become outdated because of more recent national planning policy.

54. Lord Hope said at 1450B-G that a planning decision-maker:

“is at liberty to depart from the development plan if material considerations indicate otherwise. No doubt the enhanced status of the development plan will ensure that in most cases decisions about the control of development will be taken in accordance with what it has laid down. But some of its provisions may become outdated as national policies change, or circumstances may have occurred which show that they are no longer relevant. In such a case the decision where the balance lies between its provisions on the one hand and other material considerations on the other which favour the development, or which may provide more up-to-date guidance as to the tests which must be satisfied, will continue, as before, to be a matter for the planning authority.”

55. And Lord Clyde said at 1458E-F:

“If the application does not accord with the development plan it will be refused unless there are material considerations indicating that it should be granted. One example of such a case may be where a particular policy in the plan can be seen to be outdated and superseded by more recent guidance. Thus the priority given to the development plan is not a mere mechanical preference for it. There remains a valuable element of flexibility. If there are material considerations indicating that it should not be followed then a decision contrary to its provisions can properly be given.”

56. If the decision is read fairly as a whole, there was no arguable legal flaw in the Inspector's approach. For the reasons already given, he was entitled to conclude that the relevant policies in the development plan were outdated and that the provisions of the NPPF should be given decisive weight.

57. In that context it is also worth recalling that, where the provisions of the development plan become outdated, “the balance between the provisions of the plan and the considerations pulling against it is for the decision-maker to strike”: *Cala Homes v SSCLG* [2011] EWHC 97 (Admin) at paragraph 48, my emphasis. In this case the Inspector followed the appropriate legal approach and his ultimate decision, which it was for him to make as an expert planning judgment, cannot be impugned as irrational.

The Third Principal Ground: the Inspector was wrong to conclude that the proposed development did not conflict with Policy CO2

58. This is a discrete ground of challenge. The Claimant contends that the Inspector was wrong to conclude that the development would not conflict with Policy CO2 in relation to the Exmoor National Park. In essence it is argued that because at paragraph 71 of the decision the Inspector found that “the turbines would have an impact in views from the National Park” there was a clear conflict with Policy CO2.

59. The proposed development lies outside the National Park by more than 7km. Policy CO2 provides that development outside Devon's National Parks should not be permitted if it would “damage the natural beauty, character and special qualities” of the Parks.

60. At paragraph 70 of the decision the Inspector found that the development site was outside the setting of the National Park and also that the ridge on which the turbines would be seen lay “beyond Exmoor's obvious influence”. The question was then whether in these circumstances any impact in views from the National Park would tend significantly to undermine users' enjoyment of the Park's qualities and so cause damage to the Park's “natural beauty, character and special qualities”. That value judgment called for a classical application of planning expertise, which could be impugned only on grounds of legal error or irrationality. In my view, there is nothing to suggest that the Inspector misunderstood the reach of the relevant policy or that he came to a conclusion on its application that was not rationally open to him. It might be conceded that for an individual user the impact on the view from the Park might reduce that user's enjoyment of the Park's qualities, but the Inspector had to consider the matter more broadly and to assess whether, on such a broader consideration, the impact was so significant as to damage the Park's special character.

The Fourth Principal Ground: the Inspector failed to apply section 66 of the Planning (Listed Buildings and Conservation Areas Act) 1990 (“the PLBCA Act 1990”)

61. This is a new ground of challenge, for which permission to amend the grounds of appeal is required. I shall first deal with the substantive merits of this new ground.

62. [Section 66\(1\) of the PLBCA 1990](#) provides:

“In considering whether to grant planning permission for development which affects a listed building or its setting, the Local Planning Authority, or as the case may be, the Secretary of State, shall have special regard to the desirability of preserving the building or its setting or any features of special architectural or historic interest which it possesses.”

63. Section 66(1) was recently considered in *East Northants DC and others v SSCLG and Barnwell Manor* [2013] EWHC 473 (Admin) where Lang J said at paragraph 39:

“In my judgment, in order to give effect to the statutory duty under section 66(1), a decision-maker should accord considerable importance and weight to the “desirability of preserving ... the setting” of listed buildings when weighing this factor in the balance with other ‘material considerations’ which have not been given this special statutory status. Thus, where the section 66(1) duty is in play, it is necessary to qualify Lord Hoffmann’s statement in *Tesco Stores v. Secretary of State for the Environment & Ors* [1995] 1 WLR 759 , at 780F-H, that the weight to be given to a material consideration was a question of planning judgment for the planning authority.”

64. In fact the Inspector gave careful and detailed consideration to the effects of the development on the settings of listed buildings at paragraphs 98-115 of the decision. He noted that the SEI identified significant impact on five such buildings (paragraph 102) and he focussed his attention on these buildings and on three others and a SAM.

65. In respect of five listed farmhouses that are less than 2km from the appeal site, the development would have no material effect on the asset’s significance (paragraph 106). The Inspector found that the development would have “minimal impact” on the landscape in which the grade II* listed farmhouse at Shapcott Barton, 3km from the nearest turbine, was set (paragraph 108). The Inspector then closely examined the setting of the Church of St Michael, a listed grade II building, converted to a dwelling now known as All Angels. At paragraph 113 he concluded as follows:

“... the wind farm would be harmful to the rural valley setting of All Angels and thereby to the historic significance of this heritage asset. This would be contrary to LP Policy ENV17 and SP Policy CO7. Nevertheless that harm would be less than substantial in terms of the Framework’s requirements.”

66. In respect of other buildings he concluded that there would be no harm or that the harm would be minor (paragraphs 114-119).

67. At paragraph 231 under the heading “Balance”, the Inspector stated:

“There would also be some harm to the setting of designated heritage assets and, in particular, to the historic significance of All Angels in Creacombe, but this would be less than substantial.”

68. That conclusion has, of course, to be read against the detailed findings that, apart from All Angels, insofar as there was any harm at all, it was “minimal” or “minor”. It is also notable that the Inspector concluded that the overall harm that would arise from the development was “limited” (paragraph 234). In my view, the Inspector did give in this case “special regard” to the consideration referred to in [section 66\(1\) of the PLBCA](#) . He did so by carrying out a careful and detailed assessment of the impact on the setting of the listed buildings in question. In all instances but one there was no such impact or the impact was such that it could in effect be discounted in the decision making. The Inspector did have real concern about one listed building and found that the impact was significant. However, he was then required, first, to evaluate the extent of that impact and to weigh the negative impact against the substantial benefits of the development in accordance with the NPPF. The impact on the one building was less than substantial, and even if special weight were attached to that impact, the overall negative effects were limited and could not outweigh the benefits of the development.

69. I conclude, therefore, that the proposed ground relying on [section 66\(1\)](#) is without merit, and I refuse permission to amend for that reason. There was, furthermore, no good explanation for not including this proposed further ground in the original claim. Bearing in mind the strict time limit in [section 288](#) and the public interest in having claims of this nature dealt with expeditiously, I would in any event have been reluctant to allow the amendment.

70. For completeness there was an additional ground advanced in respect of alleged inadequacy of reasoning in the Inspector's decision. As is very apparent from this judgment, the Inspector addressed each relevant issue, set out the material considerations in relation to each issue and explained how he reached his assessment in each case. The Claimant can be in no doubt why the issues were resolved adversely to the arguments put by the Claimant, and was in a position to challenge, albeit unsuccessfully, both the reasoning and conclusions in the decision.

71. This claim is accordingly dismissed.

Crown copyright

Appendix 19

19/02341/F Committee Report

Case Officer: Clare Whitehead

Applicant: Churchill Retirement Living

Proposal: Redevelopment to form 30 No apartments for older people (60 years of age and/or partner over 55 years of age), guest apartment, communal facilities, access, car parking and landscaping

Ward: Kidlington East

Councillors: Cllr Maurice Billington; Cllr Carmen Griffiths; Cllr Ian Middleton

Reason for Referral: Major development

Expiry Date: 19 June 2020 **Committee Date:** 4th June 2020

EXECUTIVE SUMMARY OF PROPOSALS AND RECOMMENDATION

RECOMMENDATION: GRANT PERMISSION SUBJECT TO CONDITIONS AND SUBJECT TO A S106 LEGAL AGREEMENT

Proposal

Full planning permission is sought for the redevelopment of the Kidlington Green Social Club site to create 30 apartments for older people (60 years of age and/or partner over 55 years of age) to replace an existing social club building. The proposal of 30 apartments comprises 19 x 1 bedroom units and 11 x 2 bedroom units. The development will also include a guest apartment, communal facilities, access, car parking and landscaping.

Consultations

The following consultees have raised **objections** to the application:

- Kidlington Parish Council

The following consultees have raised **no objections** to the application:

- CDC Arboricultural Officer, CDC Building Control, CDC Ecology, CDC Economic Development, CDC Environmental Protection, CDC Health Protection, CDC Landscape Officer, CDC Legal Rights of Way Officer, CDC Planning Policy, CDC Recreation and Leisure, NATS Safeguarding, OCC Local Lead Flood Authority, OCC Highways, Thames Valley Police, Thames Water

7 letters have been received from third parties. Of these 2 are letters of objection, 1 is a letter of support and 5 offer comments only with no expression of objection or support

Planning Policy and Constraints

The site is not allocated but is an existing community facility within the built-up limits of Kidlington, a Category A village. There is a public right of way running along the full length of the northwest boundary of the site.

The application has also been assessed against the relevant policies in the NPPF, the adopted Local Plan and other relevant guidance as listed in detail at Section 8 of the report.

Conclusion

The key issues arising from the application details are:

- Principle of development and loss of the social club
- Visual amenity, design/layout and impact on the character of the area
- Residential amenity
- Highway safety, access and parking
- Trees and landscaping
- Ecological/biodiversity issues
- Flood risk and drainage
- Crime prevention and security measures
- Sustainability and energy efficiency
- Developer contributions and affordable housing

The report looks into the key planning issues in detail, and Officers conclude that the proposal is acceptable subject to conditions and a satisfactory S106 agreement including recreation and leisure, affordable housing and waste and recycling contributions.

Members are advised that the above is a summary of the proposals and key issues contained in the main report below which provides full details of all consultation responses, planning policies, the Officer's assessment and recommendations, and Members are advised that this summary should be read in conjunction with the detailed report.

MAIN REPORT

1. APPLICATION SITE AND LOCALITY

- 1.1. The application site is located in the centre of Kidlington and is currently occupied by the Kidlington Green Social Club with a small area forming part of the garden to 13 Green Road. The site measures approximately 0.43ha and is surrounded by residential properties on all sides.
- 1.2. It is accessed off Green Road to the south of the site and lies to the east of the busy Oxford Road and main thoroughfare through Kidlington.
- 1.3. To the southwest boundary are a number of mature and well established cypress trees. There are a number of existing trees on or adjacent to the site, some of which provide screening on the boundaries. To the northwest of the site public footpath no. 265/4/10 runs the full length of the boundary. It is separated from the site by fencing and some planting.
- 1.4. The site is largely flat and level with no unusual topographic constraints to development.

2. CONSTRAINTS

- 2.1. The application site is within the confines of Kidlington. A public right of way runs along the northwest boundary for its full length. The site is not located in a conservation area or any specially designated area. None of the trees are covered by preservation orders. There is an electricity sub-station adjacent to the access.

3. DESCRIPTION OF PROPOSED DEVELOPMENT

- 3.1. The application seeks full planning permission for the demolition of the existing social club building and the redevelopment of the site to provide apartments for

older people. The proposal provides 30 apartments for older persons aged 60 years plus (and partners aged 55 years plus). Of these apartments 19 are proposed to be 1 bedroom units and 11 to be 2 bedroom units.

- 3.2. The apartments would be sold by the applicant (Churchill Retirement Living) with a lease containing an age restriction which ensures that only people of 60 years or over (or those with a partner of at least 55 years) can live in the development. The applicant has stated that the average age of purchasers of their apartments is 80 years old and typically 70% of the apartments are single occupancy, more often occupied by a widow.
- 3.3. In addition to the apartments themselves a guest apartment is included, communal facilities including a lounge and outside space, refuse storage facilities, an area for mobility scooters and bicycles to be stored and charged, access off Green Road and parking for 15 vehicles including 1 disabled space.
- 3.4. The apartment building itself is designed to be mostly 2 to 2.5 storeys in height with the third floor accommodated in the roof. A secure gate is proposed to connect to the public right of way to the rear of the site. The existing cypress trees along the boundary of the site are to be retained.

4. RELEVANT PLANNING HISTORY

- 4.1. There is no planning history directly relevant to the proposal.

5. PRE-APPLICATION DISCUSSIONS

- 5.1. A pre-application submission was made by Kidlington Green Social Club for redevelopment of the site to form 9 dwellings and a social club (ref: 17/00301/PREAPP). Officer's considered that the two uses proposed on the site would not be compatible and the scheme was not pursued further.
- 5.2. In July 2019 another pre-application enquiry was submitted (ref: 19/01329/PREAPP) for the redevelopment of the site with apartments for older people. In summary, the officer stated that, subject to addressing the loss of the social club, it was considered that the site was suitable for the use proposed. The pre-application advice did however, raise a number of concerns regarding the scale and design of the building and the impact on visual and residential amenity which required more careful consideration.
- 5.3. In addition, comments were given about the relationship with the public footpath and the need to utilise this to provide links to the village centre and Oxford Road. The applicant was advised to enter discussions with the County Council as to whether any enhancements could be made (such as lighting, CCTV etc). It was also advised that the proposed flats themselves should provide surveillance through orientation and positioning of the building which may result in the building providing an active frontage to the public footpath.
- 5.4. In terms of the design concept, the advice given was that officers would be willing to consider something more contemporary in this location where the local vernacular is less well defined. The applicant wanted to pursue a more traditional approach and officers advised that this can sometimes be difficult to authentically achieve in a more suburban environment. It was commented that the current design (at pre-app stage) appeared a little confused and changes were required to window proportions, roof design, dormer design, more contemporary balconies alongside traditional features and materials. Advice was given during a pre-application meeting on how to refine this and the applicant was advised to consider the design further and provide

an explanation as to its concept within any submission for planning permission. Advice was also given on crime prevention and design.

6. RESPONSE TO PUBLICITY

6.1. This application has been publicised by way of a site notice displayed near the site, by advertisement in the local newspaper, and by letters sent to all properties immediately adjoining the application site that the Council has been able to identify from its records. The final date for comments was **03 December 2019**, although comments received after this date and before finalising this report have also been taken into account.

6.2. The comments raised by third parties are summarised as follows:

- Overall the redevelopment of the site as a retirement complex is positive and would be beneficial to the local community.
- Provision of 15 parking spaces seems inadequate for 30 flats to include residents, visitors, staff and visiting services.
- Green Road has on street parking issues already and any likely additional on-street parking would cause a significant safety concern as well as being inconvenient for blocking driveways of local residents. Additional car park spaces within the complex should be provided.
- Contractors should not park on Green Road or leave mud and mess on the road during the construction phase.
- Working hours during construction should be restricted so as not to affect the neighbours.
- The height of the building is a concern. 2.5 storey high development would be out of character compared to the rest of Green Road.
- Reduction in neighbour amenity in terms of privacy and increased overlooking to gardens and rear facing windows due to the height of the new building.
- Request a reduction in height of the building.
- Additional information requested as to how contractors will minimise noise and disruption during the construction phase.
- Questions about maintenance of fencing and screening plans.
- Request that the conifer trees remain in situ.
- Swift bricks should be incorporated within the structure of the building (approximately 10 as recommended by Cherwell Swifts).

6.3. The comments received can be viewed in full on the Council's website, via the online Planning Register.

7. RESPONSE TO CONSULTATION

- 7.1. Below is a summary of the consultation responses received at the time of writing this report. Responses are available to view in full on the Council's website, via the online Planning Register.

PARISH/TOWN COUNCIL AND NEIGHBOURHOOD FORUMS

- 7.2. KIDLINGTON PARISH COUNCIL: No objection in principle but **object** on the grounds of insufficient car parking spaces on site. The Parish Council also request that any off-site financial contributions should be retained to be used within Kidlington Parish Council.

CONSULTEES

- 7.3. CDC ARBORICULTURE: **Comments.** From Desk based assessment the Arboricultural plans appear to be considerate to trees on site. Removal of T1/T2 will not be detrimental to the sites amenity. Appropriate measures to protect retained trees during development appear to have been considered.
- 7.4. CDC BUILDING CONTROL: **Comments.** A building regulation application with an access statement and fire engineers design will be required.
- 7.5. CDC ECOLOGY: **Comments.** The ecological report is sufficient in scope and depth however it has insufficient detail in terms of any biodiversity enhancements.
- 7.6. Suggestions made for biodiversity enhancements include bat and bird boxes/bricks, invertebrate "hotels", swift bricks and hedgehog highways. A method statement for enhancing biodiversity on site should be submitted and approved prior to the construction reaching slab level. A condition is recommended to secure this.
- 7.7. The suggested landscaping is fine although the inclusion of some species rich/flowering grassland areas would be preferable to amenity grass alone. A full landscaping and management scheme is required to ensure future management is appropriate and this can be secured by condition.
- 7.8. The net gain for biodiversity in terms of habitats is achievable at a reasonable level. An external lighting strategy will be needed.
- 7.9. CDC ECONOMIC DEVELOPMENT: **Comments.** Whilst the fabric of the building is now dated, the Kidlington Green Social Club and Institute Ltd has clearly provided a highly-valued community facility over many decades – supporting events and activities that contribute to society. The impact upon the wider local economy and community is unclear from the documents submitted. However, the content of the letter (Appendix C) from the Club's Agent illustrating the changing membership pattern and reduced viability of the operation/service is generally accepted. The desire to seek alternative premises locally to support the membership and, in so doing, to enhance the viability of this and potentially other such facilities is noted.

In terms of the long-term economic benefits of the proposed sheltered home development, it is expected that the development will - via its residents - generate additional expenditure in nearby shops and facilities as briefly indicated in the Design and Access Statement. It is unclear whether or not a limited number of employment opportunities on site may possibly also arise.

7.10. CDC ENVIRONMENT PROTECTION:

- Noise: **No comments**
- Contaminated Land: **Comments.** Due to the size and sensitive nature of the development (residential) the standard contaminated land conditions are recommended to be applied to any forthcoming consent.
- Air Quality: **Comments.** Measures should be in place to encourage the uptake of low emission transport including the provision of Electric Vehicle (EV) charging infrastructure. Ideally we would like to see EV charging points in place to allow for the uptake of EV's by visitors and residents to maximise opportunities for sustainable transport in accordance with Government guidance contained within the National Planning Policy Framework.
- Odour: **No comments**
- Light: **No comments**

7.11. CDC HEALTH PROTECTION: **Comments.** The plans show a 'coffee bar' on the ground floor and if this is to be operated as a food business then the applicant must ensure compliance with relevant food safety and health and safety legislation.

7.12. CDC LANDSCAPE OFFICER: **Comments.** Landscape visual mitigation of this development is important for surrounding residences. The existing boundary hedges (SW and NW boundaries) will contribute to this goal. These hedges must be retained and protected during the construction period (under BS5837) and incorporated in with the landscape masterplan proposal. A minimum maintenance height of 3 m will provide reassurance that resident's ground floor level/eyeline will be shielded. Obviously the development will be seen from 1st floor windows.

7.13. The building is somewhat out of scale with the surrounding residencies. The building footprint, the 'L'-shape, and orientation means that the northerly elevations will cause an uncomfortable cold, shady experience for residents using the garden. The 'L' should be rotated 180 degrees, and the build footprint reduced, to ensure a sunny aspect courtyard for the retired residents, a reduced visual impact, and an appropriate 'fit' for the site.

7.14. Multifunctional garden spaces are proposed that include fruit, vegetation and herb growing in sunny areas, seating areas, and a water feature. The trees and shrubs proposed on the JBA plan Sept 2019 are generally acceptable. Once the layout is revised hard and soft landscape proposals are required for our consideration.

7.15. CDC LEGAL RIGHTS OF WAY OFFICER: **Comments.** The proposal will not require any diversion to the public footpath (265/4) which extends along the rear of the development site and which is being retained along its current alignment.

7.16. CDC PLANNING POLICY: **No objection** in principle. However, detailed consideration of the impact on surrounding residential properties, affordable housing provision and the loss of the social club is required.

7.17. CDC RECREATION AND LEISURE: **Comments.** As the new residents will not benefit hugely from using off-site outdoor sports provision no contribution for this is being sought. With regards to other contributions please refer to paragraph 9.110 of this report for details.

7.18. NATS SAFEGUARDING: **No objection** to the proposal.

- 7.19. OCC HIGHWAYS: **No objections** subject to standard conditions in respect of width of the access, surfacing, drainage and visibility splays and an obligation to enter into a S278 agreement.
- 7.20. OCC LOCAL LEAD FLOOD AUTHORITY: **Objection.** Insufficient drainage, flood risk, SuDS usage data provided to enable a full technical assessment and audit of the proposal.
- 7.21. On receipt of further information the LLFA confirmed **no objection subject to conditions.**
- 7.22. THAMES VALLEY POLICE DESIGN ADVISOR: **No objection.** Offered advice on designing out crime and requires a standard condition for an application to be made for Secure by Design accreditation.
- 7.23. THAMES WATER: With regards to foul water **no objection.** As the application indicates that surface water will not be discharged to the public network Thames Water has no objection. However approval should be sought from the Lead Local Flood Authority. In regards to the water network and water treatment infrastructure capacity there is no objection.
- 7.24. CDC STRATEGIC HOUSING: **No objection.** Require a financial contribution in lieu of on-site affordable housing provision, recognising the proposed development is not suitable to accommodate affordable housing on site.

8. RELEVANT PLANNING POLICY AND GUIDANCE

- 8.1. Planning law requires that applications for planning permission must be determined in accordance with the development plan unless material considerations indicate otherwise.
- 8.2. The Cherwell Local Plan 2011-2031 - Part 1 was formally adopted by Cherwell District Council on 20th July 2015 and provides the strategic planning policy framework for the District to 2031. The Local Plan 2011-2031 – Part 1 replaced a number of the ‘saved’ policies of the adopted Cherwell Local Plan 1996 though many of its policies are retained and remain part of the development plan. The relevant planning policies of Cherwell District’s statutory Development Plan are set out below:

CHERWELL LOCAL PLAN 2011 - 2031 PART 1 (CLPP1)

- PSD1: Presumption in Favour of Sustainable Development
- BSC1: District Wide Housing Distribution
- BSC3: Affordable Housing
- BSC4: Housing Mix
- BSC10: Open Space, Outdoor Sport and Recreation Provision
- BSC11: Local Standards of Provision – Outdoor Recreation
- BSC12: Indoor Sport, Recreation and Community Facilities
- ESD1-4: Relating to Sustainable Development
- ESD7: Sustainable Drainage System (SuDS)
- ESD13: Local Landscape Protection
- ESD15 - The Character of the Built and Historic Environment
- Policy Villages 1: Village Categorisation
- Policy Villages 2: Distributing Growth Across Rural Areas

CHERWELL LOCAL PLAN 1996 SAVED POLICIES (CLP1996)

- C28 – Layout, design and external appearance of new development
- C30: Design control
- S29: Loss of existing village services

8.3. Other Material Planning Considerations

- Kidlington Masterplan
- Cherwell Residential Design Guide Supplementary Planning Document (SPD) (July 2019)
- Developer Contributions Supplementary Planning Document (SPD) (Feb 2018)
- National Planning Policy Framework (NPPF)
- Planning Practice Guidance (PPG)
- The Planning (Listed Buildings and Conservation Areas) Act 1990
- EU Habitats Directive
- Natural Environment and Rural Communities Act 2006
- Conservation of Habitats and Species Regulations 2017
- Circular 06/2005 (Biodiversity and Geological Conservation)
- Human Rights Act 1998 (“HRA”)
- Equalities Act 2010 (“EA”)

9. APPRAISAL

9.1. The key issues for consideration in this case are:

- Principle of development and loss of the social club
- Visual amenity, design/layout and impact on the character of the area
- Residential amenity
- Highway safety, access and parking
- Trees and landscaping
- Ecological/biodiversity issues
- Flood risk and drainage
- Crime prevention and security measures
- Sustainability and energy efficiency
- Developer contributions and affordable housing

Principle of Development (including loss of the social club)

- 9.2. Section 38(6) of the Planning and Compulsory Purchase Act 2004 requires that any application for planning permission must be determined in accordance with the Development Plan unless material considerations indicate otherwise. Paragraph 2 of the National Planning Policy Framework (NPPF) makes clear that it does not change the statutory status of the development plan as the starting point for decision making. However, the NPPF is a significant material consideration.

Housing - Policy Context

The Development Plan

- 9.3. The development plan comprises the saved policies of the 1996 adopted Cherwell Local Plan (CLP1996) and the 2015 adopted Cherwell Local Plan 2011-2031 – Part 1 (CLPP1). The Cherwell Local Plan was formally adopted by Cherwell District Council on 20th July 2015 and provides the strategic planning policy framework for

the District to 2031. The policies important for determining this application are referenced above.

- 9.4. Policy BSC2 of the CLPP1 encourages the re-use of previously developed land in sustainable locations.
- 9.5. Policy BSC4 of the CLPP1 encourages the provision of extra care, specialist housing for older and/or disabled people and other supported housing for those with specific living needs in suitable locations close to services and facilities. Para B.121 states that there is a need to provide a mix of housing in Cherwell that reflects the needs of an ageing population.
- 9.6. Theme 2 of the Kidlington Adopted Masterplan is 'Creating a sustainable community' with an objective to "build a sustainable community with opportunities for all and access to housing, jobs and high quality community facilities". Opportunities for the provision of extra care, specialist housing for older and/or disabled people and those with mental health needs and other supported housing for those with specific living needs will be encouraged in suitable locations close to services and facilities.
- 9.7. Kidlington is classified as a Category A village in Policy Villages 1 of the CLPP1. The development proposed is within the village's built up limits. Paragraph C. 262 of the CLPP1 assists in gauging whether development can be considered to be minor. Criteria to be considered include the size of the village and level of service provision, the site context and the scale of development. Generally, Policy Villages 1 seeks to manage small-scale developments (usually of fewer than 10 homes). The current proposal does not comply with the type of development identified as being appropriate under this policy as it does not represent minor development being significantly over 10 dwellings.
- 9.8. Policy Villages 2 is therefore also of relevance. Policy Villages 2 identifies the Category A villages as being where planned development to meet District housing requirements to help meet local needs should be directed, subject to a detailed assessment as to the proportionate impact of development proposed upon the settlement in question (given the category A settlements vary in size and sustainability) and an assessment of the suitability of the specific site proposed.
- 9.9. The intention of this approach is to protect and enhance the services, facilities, landscapes and the natural and historic built environments of the villages and rural areas whilst recognising the need for some development. Policy Villages 2 advises that these sites would be identified through the preparation of the Local Plan Part 2, through the preparation of Neighbourhood Plans where applicable and through the determination of applications for planning permission. A number of criteria are listed and particular regard must be had to these criteria when considering sites, whether through plan making or the planning application process.

National Policy

- 9.10. The NPPF confirms that there is a presumption in favour of sustainable development. For decision making this means approving proposals that accord with the development plan without delay. The Framework advises that there are three dimensions to sustainable development; economic, social and environmental. With regard to housing, the NPPF supports the need to boost significantly the supply of housing to meet the full, objectively assessed need for housing.
- 9.11. The Council's 2019 Annual Monitoring Report (AMR), approved by Members at the Executive meeting on the 6 January 2020, confirms that the District can

demonstrate a 4.6 year housing land supply (for the current period 2019-2024) with a 5% buffer and a 4.4 year housing land supply for the next 5 year period (2020-2025).

- 9.12. In the circumstances that a LPA cannot demonstrate a five year supply of deliverable housing sites (with the appropriate buffer), there is a presumption in favour of sustainable development and ordinarily the circumstances at paragraph 11d of the NPPF are engaged – in short development should be granted unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits when assessed against the policies in the Framework as a whole.
- 9.13. However, in respect of the Oxfordshire Authorities including Cherwell there is a Written Ministerial Statement (“WMS”) made in September 2018 concerning the Housing and Growth Deal, which is a significant material consideration. This sets out the requirement for a 3 year supply of deliverable housing sites (with the appropriate buffer) from the date it was made (12/09/2018) until the adoption of the Joint Statutory Spatial Plan in each area, providing the timescales in the Housing and Growth Deal are adhered to.
- 9.14. Therefore in this case, the tilted balance set out by Paragraph 11d is not engaged because the Housing Supply requirement for the District should be taken to be 3 years in accordance with the WMS.

Housing - Monitoring and recent appeal decisions

- 9.15. The Council’s most recent AMR (December 2019) sets out that 953 dwellings have been identified for meeting the Policy Villages 2 requirement which are sites with either planning permission or a resolution to approve and are identified, developable sites. This is made up of 582 dwellings either complete or under construction, 333 dwellings with planning permission and 38 dwellings that are considered developable (this 38 is made up of two sites – one with a resolution for approval and one for which the planning permission has lapsed).
- 9.16. In recognition that not all sites will necessarily be developed or will not necessarily deliver the full number of dwellings granted, a 10% non-implementation rate has been applied to sites with permission but on which development has not yet started. This reduces the 333 dwellings (i.e. those with planning permission but not implemented) reported in paragraph 9.15 to 300 dwellings. This would give the number of dwellings identified under Policy Villages 2 either completed, under construction, with planning permission or developable as 920 dwellings. There was also a further resolution for approval granted for a site at Fritwell at the December 2019 Planning Committee for 28 dwellings, which would be additional to the 920 dwellings.
- 9.17. Five appeal decisions have been received over the past year which have considered the application of Policy Villages 2. These are for sites at Launton, Ambrosden, Bodicote, Sibford Ferris and Weston on the Green. The first four were allowed, and the numbers approved at those four sites are included within the figures. The key conclusions resulting from the Launton, Bodicote, Weston on the Green and Sibford Ferris appeals can be summarised as:
- The Policy Villages 2 number of 750 dwellings has not been ‘delivered’ yet.
 - The number of 750 has development management significance in terms of the Local Plan strategy.

- Not all dwellings approved might be delivered (hence the Council's inclusion of a 10% non-implementation rate in the most recent AMR)
- The number of dwellings proposed must be considered as to whether that number would undermine the strategy of the Local Plan
- There is no spatial strategy to the distribution of the 750 houses allocated in the rural areas under Policy Villages 2 beyond distribution to the Category A villages.
- Assessment of the sustainability of the settlement in question is required, and indeed this has been a primary consideration in a number of appeals relating to major housing development at Category A villages, with appeals at Finmere, Fringford and Weston on the Green having been dismissed, in each case the sustainability of the settlement being a key issue.

9.18. The Government aims to “significantly boost the supply of housing”; with there being a “critical” need to address the housing needs of older people. The recent update to the PPG (June 2019) states “where there is an identified unmet need for specialist housing, local authorities should take a positive approach to schemes that propose to address this need”.

Housing needs

9.19. The Council's Housing Strategy 2019-2024 notes that the life expectancy of people in Cherwell is higher than the national average and that the District is expected to see a substantial increase in the older person population. The age group that will see the greatest increase is people over 85, with an increase of 142%, resulting in a significant increase in the demand for accommodation that is suited to an older population and the need for associated care and support services. Oxfordshire as a whole is expected to see a substantial increase in the population of older people with the total number of people aged 55 and over expected to increase by 49% over 20 years.

9.20. The 2014 Oxfordshire SHMAA suggests that in Cherwell the 55+ population will increase by 58% - the highest of the Oxfordshire districts. Whilst the SHMAA suggests that one of the implications of this demographic change is likely to be a growing need for specialist older persons housing, such as sheltered or extra care provision, it is not specific about the types of specialist housing needed. It also recognises that there may be an option to substitute some of this specialist provision with a mix of one and two bedroomed housing aimed to attract ‘early retired’ older people which could be designated as age specific or not. Such housing could be part of the general mix of one and two bedroomed homes but built to Lifetime Homes standards in order to attract retired older people looking to ‘down size’ but perhaps not wanting to live in specialist retirement housing.

Housing Assessment

9.21. The proposed development falls to be considered in the above context. Kidlington is recognised as a ‘Category A’ village and is the largest settlement in the district after the towns of Banbury and Bicester. The application site is previously developed, surrounded by existing residential development and lies close to the village centre. There is a public right of way immediately to the rear which affords pedestrian access in either direction towards the village centre. This is a relatively short work on flat terrain. There are some local services (including the Parish Council offices and doctor's surgery) within a reasonable distance along Oxford Road. In addition,

there are bus stops nearby on Oxford Road affording travel both locally and further afield into Oxford.

- 9.22. Overall, Kidlington is considered to be the most sustainable of the Category A villages. The acceptability of the proposal therefore needs to be tested against the criteria listed in Policy Villages 2 of the CLP 2015, as well as other material planning considerations.
- 9.23. The position with regards to the Council's Housing Land Supply and progress against Policy Villages 2 is outlined above. The proposal would add to the number of dwellings that have been granted planning permission at Category A villages in exceedance of the 750 specified in Policy Villages 2. However, officers do not consider in this particular instance, given the scale of the development and its specific type of end user (i.e. it provides suitable accommodation for the elderly in the form of retirement apartments), and the sustainability of Kidlington, that the proposal could be regarded as a departure from the Council's housing strategy.
- 9.24. The criteria in Policy Villages 2 include consideration of whether the site is well located to services and facilities and also whether satisfactory pedestrian access/egress can be provided. The application site is located to the south of the village centre but within the existing built up area. It is close to a variety of local services and facilities as well as bus stops. It has good pedestrian connections with a public right of way running to the northern boundary. Improvements are proposed to the public right of way which are discussed in later sections of the report. The site is sustainably located within the built up area for the use proposed and the proposal assists with meeting overall Local Plan housing requirements.

Loss of the social club – Context

- 9.25. The site is occupied by a (currently) active social club and is therefore a brownfield site. The NPPF identifies at Paragraph 118(c) that decision makers should give "substantial weight to the value of using suitable brownfield land within settlements for homes". It is in this context in which it is considered that the proposal complies with Policy Villages 2. The proposal is appropriate in relation to the size of the settlement and the level of service provision.
- 9.26. However, the loss of a community facility is also a consideration. Policy BSC12 of the CLPP1 recognises the importance of community facilities and states that the Council will encourage the provision of community facilities to enhance the sustainability of communities and will seek to protect and enhance existing facilities. Policy S29 of the CLP 1996 states that "Proposals that will involve the loss of existing village services which serve the basic needs of the local community will not normally be permitted". In addition, paragraph 83 of the NPPF seeks to retain accessible local services and community facilities and paragraph 92 seeks to guard against the unnecessary loss of valued services and facilities.
- 9.27. The planning application is supported by a Planning Statement which includes information regarding the social club, its finances and its future. According to the planning statement the social club is facing significant financial difficulty which means it is facing closure. According to the planning statement there are less than 1500 similar clubs across the UK with approximately 2 to 3 closures per month. At its peak the Kidlington Green Social Club had 700 members however in the current age the club has a membership level of approximately 200 members of which 30 are actively regular. This is not sufficient to support the financial demands of running the club from the current premises.

- 9.28. In 2013 the club was forced to close for a short period of time in order to sort out its indebtedness and it has lived “hand to mouth” ever since. The club has recently lost its Brewery Company because it was no longer fulfilling the barrelage commitments it gave in return for financial support and provision of equipment. The club cannot fulfil the barrelage commitments simply because of the drop-off in membership and attendance.
- 9.29. In addition, the premises are in a poor state of repair and are too large for the current membership. The club used to be used for weddings, birthdays and anniversary celebrations which all provided extra income. However, there is no longer such a demand, in part because the premises are no longer considered “fit for purpose” and also because of different venue choices and different aspirations from those who may have historically used such premises. The Planning Statement claims that the club is facing imminent and permanent closure at its current location.
- 9.30. The club aims to continue in premises more appropriate to the size of the current membership. However, no details of alternative premises have been put forward as part of the planning application as the applicants have not yet been able to secure such premises with no funds or a timescale to offer anyone any certainty at this stage. The proposal seeks to facilitate the future of the club by enabling its move to alternative premises by selling its existing asset; the land.

Loss of the social club – Assessment

- 9.31. Kidlington has a thriving town centre with many existing and well-established services and facilities for the community. It also has excellent connections to Oxford with regular bus services, cycle route connections and access via private motor vehicle. There are many more services and facilities in Oxford in addition to those provided in Kidlington. Considering the contents of the planning statement, including the letter from the social club’s representatives at Appendix C, officers are of the opinion that although the loss of the social club is regrettable, the intention to set up elsewhere is relevant and to enable this the applicant requires the land to be sold to be developed. Given the existing services and facilities available locally and the good access to further services and facilities in neighbouring areas, the loss of the social club does not outweigh the benefits the proposed development brings.

Conclusion

- 9.32. Overall, on balance, and having regard to the factors above it is considered that the principle of this scale of growth for retirement apartments could be acceptable in Kidlington in the context of the Council’s housing strategy. Regard also must be had to the proposal being assessed against the other relevant criteria of Policy Villages 2 and the other relevant policies and guidance, which is discussed below.

Visual amenity, design/layout and impact on the character of the area

Policy Context

- 9.33. Policy ESD13 of the Cherwell Local Plan advises that development will be expected to respect and enhance local landscape character and a number of criteria are highlighted including that development is not expected to cause visual intrusion into the open countryside, must be consistent with local character and must not harm the setting of settlements, buildings or structures.
- 9.34. Policy ESD15 provides guidance as to the assessment of development and its impact upon the character of the built and historic environment. It seeks to secure development that would complement and enhance the character of its context

through sensitive siting, layout and high-quality design meeting high design standards and complementing any nearby heritage assets.

- 9.35. Saved Policy C28 of the Cherwell Local Plan 1996 exercises control over all new developments to ensure that the standards of layout, design and external appearance are sympathetic to the character of the context.
- 9.36. The Framework highlights that the protection and enhancement of the natural, built and historic environment is part of the environmental role of sustainable development and one of the core planning principles also refers to recognising the intrinsic character and beauty of the countryside. The Framework also emphasises the importance of development responding to character and history with good design being a key aspect of sustainable development.

Assessment

- 9.37. The building has been designed to be 2-2.5 storeys in height with the second floor accommodated in the roof and the roof height kept as low as possible whilst complying with Building Regulations. The proposed building is at its highest points between 500mm to 800mm higher than the existing dwellings on Green Road. This is detailed on drawing no. 10105KT/PA09. Around the edges of the building the heights have been reduced to single storey in order to successfully reduce the scale, mass and bulk of the building overall. The landscaping officer has commented that the building is out of scale with the surrounding residences. However, it has been demonstrated (as stated above) that the careful design of the building mitigates the overall impact with a considered balance between the footprint and the overall height of the buildings. Reducing the build footprint would likely lead to an increase in height which would increase its impact in the surrounding area overall. The surrounding buildings are of a domestic scale where this is clearly not yet the visual impact from outside the site is not significant due to its positioning, orientation and screening from existing development and boundary trees. In addition, there is a requirement for a minimum number of units to make the scheme work. Considering the need for the communal lounge and spaces, the lodge managers office and back office spaces there needs to be around 30 units for the scheme to be deliverable.
- 9.38. A reasonable amount of screening of the site from Oxford Road is provided by the existing trees on the southern boundary. The trees are in the control of the landowners/developers and are proposed to be retained to ensure continued screening. A condition is recommended to retain the trees and to ensure a management and maintenance plan. This is not necessarily to ensure provision of screening of the building as its impact when viewed from Oxford Road is not considered significant, but more in relation to protection of residential amenity of neighbouring properties which is discussed in greater detail in following sections.
- 9.39. The landscape officer has recommended the building be rotated 180 degrees as the 'L' shape and proposed orientation means that the northerly elevations will cause an uncomfortable cold, shady experience for residents using the garden. The landscape officer comments that the rotation as well as reduction in build footprint, would ensure a sunny aspect courtyard for the retired residents, reduced visual impact and an appropriate fit for the site. Planning officers do not share the same concerns and are satisfied with the proposal as it currently stands. The reorientation of the building would likely cause unacceptable levels of overlooking to the private amenity space of properties on both Green Road and Sterling Road. Furthermore, the provision of shade is also considered a benefit given that residents are most likely to want to utilise the garden in warmer, sunnier weather. The outside space is sufficient for different aspects of sun and shade and the provision of a south facing garden is not considered necessary in this instance.

- 9.40. In terms of the detailed design and style, this is considered appropriate considering the backland site and surrounding development. This is a suburban area with a mix of ages, styles and design of development included more contemporary and more suburban buildings. Since the preapplication proposal the detailed design has been improved by way of a more holistic approach, changes as follows:
- More symmetrical front elevation with centrally positioned main entrance emphasized by a projecting stone portico.
 - Feature gabled bays are now rendered and help to break up the elevation by adding vertical emphasis.
 - Elevation facing towards Oxford Road has also been broken up by projecting bays so it appears as 3 “detached” buildings.
 - The palette of materials has been reduced and the previously proposed boarding has been removed.
 - Flat roof dormers are proposed rather than pitch roof which reduces the size and visual impact.
 - Where possible the dormers have been replaced with roof lights.
 - Matching brick window heads and cills are used throughout.
- 9.41. The scheme as currently presented reflects the local distinctiveness by reflecting detailing, ridge and eaves heights and the existing palette of materials used in the area.
- 9.42. The majority of the proposed building is predominantly brick with render and orange brick accents. Dorset Red Stock is proposed as the main facing brick with Leicester Orange Stock used for the window head, cills and banding to create contrast and emphasise proposed detailing and help break up the elevations between floors. In terms of the roofing, the main roof will be Marley Ashmore Old English Dark Red and Marley Ashmore Smooth Grey to the lower roofs at either end of the development. Windows will be white UPVC throughout. Dormer window cheeks and roofs will be grey and white GRP with white UPVC windows. Render will be ivory. Balconies will be black painted metal with blue grey toughened glazing. The proposed materials throughout are acceptable and compatible with the surrounding development. The materials will be conditioned as per the submitted design and access statement.
- 9.43. The pre-application advice given requested that improvements to the public right of way to the north of the site be investigated and included in the proposal. The proposed building has been orientated as such to provide active surveillance from the majority of the rear elevation of the building from ground floor and upper floor windows and some external balconies. Amended plans were received during the course of the application to include a pedestrian door and a ground floor window facing northwest to improve the active surveillance to the public right of way and its access gate.
- 9.44. In addition, the communal outside space has been designed and laid out so it is on the northern side of the proposed building again to provide some surveillance to the public right of way. A balance needs to be achieved by the proposed landscaping and planting in providing privacy and security to the future occupants of the development whilst not creating an increased sense of enclosure to users of the public footpath. This is discussed further at paragraphs 9.61 and 9.67.

Conclusion

- 9.45. Whilst the proposed building is large and occupies the majority of the site, it has been sensitively designed and orientated to reduce its visual impact on the site and when viewed from the wider area. The detailed design and materials palette is appropriate for the backland suburban location. In summary, officers consider that the proposed development complies with the relevant plan policies as listed above.

Residential amenity

Policy Context

- 9.46. Policy ESD15 advises of the need for new development to consider the amenity of both existing and future development and this reflects the Core Principle of the Framework, which confirms the need for a good standard of amenity for all existing and future occupants of land and buildings to be secured.

Assessment

- 9.47. The building has been orientated and window openings located so as to minimise the impact on the residential amenity of neighbours. The proposed building is large and does cover the majority of the land available to it but where it is closer to shared boundaries with residential properties the building steps down in height to one and two stories with hipped roofs to reduce the impact. Window openings have been arranged so they are set away from boundaries and where elevations are closer to the private rear gardens they do not have clear window openings at the upper levels. In addition, the flat roof dormer windows have been kept away from the boundaries to reduce overlooking and the roof design reduces their size and visual impact. Where possible dormers have been removed and rooflights used instead.
- 9.48. The separation distances between the proposed building and surrounding existing residential properties meet the requirements of the Cherwell Design SPD with a minimum distance of 22 metres provided back to back between properties. There is a separation distance of around 28 metres to 30 metres between the very rear of the properties on Sterling Road to the north and the proposed windows facing them. The north-western side elevation is 16.8 metres away from the rear properties on Sterling Road which is greater than the minimum 14m required by the SPD. In addition, no upper floor windows are within 7 metres of any neighbouring property.
- 9.49. The private gardens to the dwellings on Green Road are all in excess of 28 metres in length. Although there are facing windows at the upper levels it is considered that due to the offset to the boundaries (19.5metres) and the length of the private rear gardens that residential amenity in terms of reduction in privacy and overlooking is not significantly adversely affected. The separation distances are approximately 47 metres or more elevation to elevation. This also applies in terms of the buildings size and scale and it is not considered to be overbearing to neighbouring occupiers due to the separation distances and size of private rear gardens to properties along Green Road. The closest section of the proposed building to a boundary is the north eastern elevation which faces the private rear garden of no. 13 Green Road. The dwelling itself is over 38 metres from the built development but the elevation is 2.6metres from the side boundary to the private rear garden. This elevation has been designed to minimise the impact upon this section of garden by reducing its height to two storey and then one storey in a gradual fashion as it moves closer to the boundary, no upper floor windows facing the direction of the garden and a hipped roof design. As such there is no significant adverse impact on the amenity of no. 13 Green Road as a result of the proposed development.

- 9.50. The properties to the north on Sterling Avenue are orientated so as to be slightly offset to the proposed building and in conjunction with the set back of the development from the boundary there will be no significant adverse impact upon the enjoyment of the private rear gardens or internal living spaces from overlooking.
- 9.51. The properties to the south and southwest are along Oxford Road. These also have reasonably large rear gardens over 25 metres in length. The separation distances between the dwellings and proposed building are around 40 metres which is almost double the requirement of the SPD. More so they are protected from overlooking and other amenity issues by the presence of the existing bank of trees on the site which are proposed to be retained and managed as part of the sites overall landscaping scheme. A planning condition is recommended to ensure the trees are retained and maintained and should they die be replaced with mature or semi mature native species to retain the screening element of the trees. There are no significant issues in terms of overlooking or reduction in privacy to the neighbouring residential properties on Oxford Road.
- 9.52. In respect of noise impact upon existing residents it is considered that the proposed use would have less of an impact than the existing use. Being a social club and having hosted celebrations and gatherings previously there is an increased potential for anti-social noise disturbance than with a residential scheme. There are no concerns about noise impact on residential amenity once the development is operational and the flats occupied.
- 9.53. A condition is recommended for the submission and agreement of a lighting scheme prior to the development being occupied in order to minimise light disruption to neighbours and contribution to further light pollution.
- 9.54. To minimise the impacts during the construction phase a condition is recommended for a construction management plan to include details of dust management during construction and demolition of the existing building, hours of operation, contractor parking and delivery hours. In addition, a standard condition restricting the hours of construction is recommended with no working on Sundays or bank holidays to protect the amenity of existing residents.

Conclusion

- 9.55. Overall it is considered that the proposal complies with policy ESD15 and no significant detrimental harm is caused to neighbour amenity by the proposed development. Furthermore, the amenity of future residents has been considered and is also safeguarded.

Highway safety, access and parking

Policy Context

- 9.56. The National Planning Policy Framework is clear that transport policies have an important role to play in facilitating sustainable development with encouragement provided to sustainable modes of transport to reduce reliance on the private car. It is also clear that applications should be accompanied by a transport statement if the development would generate significant amounts of movement. This is reflected in Policy SLE4 of the Local Plan. Policy SLE4 and Villages 2, both emphasise the need for consideration to be given to whether safe and suitable access can be achieved.

Assessment

- 9.57. The application is accompanied by a Transport Statement which has considered the existing use of the site as a social club. In order to do this the TRICS database has been reviewed for community centre uses in similar locations and when adjusting for the size of the Social Club building estimates vehicle trips as up to 10 two-way movements in the network peak hours and approximately 80 two-way movements daily. In comparison the same methodology has been used to estimate the number of vehicle movements associated with the proposed development which results in estimates of approximately 6 two-way movements in network peak hours and 60 daily movements. The Transport Statement further states that research suggests that Churchill developments have lower trip generation than suggested by the TRICS estimates. The proposed land use could have a different end user and so the future TRICS is considered more appropriate.
- 9.58. The Local Highways Authority (LHA) have assessed the submitted Transport Statement and are content with the conclusion that the proposed land use would generate a similar or slightly lower number of vehicle movements than the existing social club use.
- 9.59. Vehicle and pedestrian access is gained from Green Road. It is proposed for the access to be a shared surface and widened to a total of 6 metres with 1.2 metres provided as a footpath. The LHA has commented that the facilities for pedestrians are considered inadequate given this location. Pedestrians should be prioritised over other modes and a minimum of 1.8m should be provided to allow for wheelchair users. The LHA officer suggests that this could be accommodated with minimal amendments and be secured by planning condition.
- 9.60. As the proposed access is intended to be a shared surface all one level with no kerbing to separate vehicles and pedestrian, planning officers do not consider the widening to be strictly necessary. The use of the access will be lower and this is demonstrated by the submitted TRICS data. The likelihood of both pedestrians/wheelchair users and vehicles using the shared surface at the same time is lower because of the lower amount of hourly and daily movements along the access. In addition, there is a stretch of additional hard surfacing proposed as a passing place should the need arise. The grass verge as currently proposed is 0.9m in width and by widening the shared surface to provide 1.8metres of pedestrian access the grass verge will be reduced to 0.3metres. This is not an amount that is easily manageable for maintenance and would not likely survive or be retained as such the entire width of the access would be hard surfaced. This would have a detrimental impact upon the visual quality of the main entrance to the development which is not supported by officers. As such and on balance it is not deemed appropriate to request the widening of the access via condition and the proposal is satisfactory without causing detriment to highway safety as is currently presented.
- 9.61. A secondary pedestrian access is made from the public right of way to the North West which will be padlocked and opened on request for residents. Pre-application discussions were undertaken between the agent and the County Rights of Way Officer surrounding the public right of way. County Officers were approached by the agent as to potential improvements to the public right of way but no feedback was offered other than the suggestions were positive. These suggestions included designing the building to provide active surveillance and reducing the amount of hedgerow screening the length of the boundary. County Officers have made no other requests via the planning consultation period save for a recommended informative by the Local Highways Officer that the barriers be removed at either end of the public right of way as part of the highways works. This would come under a Section 278 agreement separate from the planning process.

- 9.62. In terms of parking, there are currently no parking standards for this particular type of use and so reference has been made to parking surveys undertaken at a number of other properties run by the developer which indicate a demand of 0.28 spaces per apartment. The proposed provision is higher than this with 15 non-allocated parking spaces (including 1 disabled space) allowing for 0.5 spaces per dwelling and so catering for staff, visitors and carers in addition. There is also a proposal for 6 electric mobility buggies and 2 external cycle spaces. The Local Highways Authority agree with the amount of parking provided given that the nature of this particular development means the level of car ownership is unlikely to be significant. A similar methodology has been used for the number of cycle parking spaces which has found a very low demand. Two spaces are to be provided which allows use by staff and residents. The likelihood of use of the electric buggies is considered higher on a site with this use and end user and so the provision for storage on site is welcomed.
- 9.63. Local residents have expressed concern about the quantity of parking provision on site and that this could lead to an increase in on-street parking which in this location could be problematic for highway safety. However, in the absence of an objection from the Local Highways Authority it is difficult for the planning authority to refuse the application on this basis. The Local Highways Officer comments that there is no evidence to suggest that the parking is likely to impact on local streets. Parking provision has primarily been based on surveys of other sites and the proposed figures fit with similar evidence from elsewhere. Given the location of this particular proposal is close to regular bus services, in walking distance of shops and other services then the requirement for additional onsite parking would be difficult to maintain and moving away from other wider strategies promoting sustainable travel options and reducing the reliance on the private motor vehicle.
- 9.64. In addition, strategies are in place to promote sustainable travel options and reduce the dependency on the private motor vehicle. Residents will be provided with a Travel Information Pack when they move in to the development which outlines the sustainable travel options for residents living in Kidlington. The Travel Plan provides details of local bus stops and routes as well as information on how to apply for a concessionary bus pass. In addition, the pack contains details on local train routes, senior railcards, taxi companies, walking routes as well as community transport options including Oxfordshire Comet, Bus Bartons and the Volunteer Community Connect Transport.
- 9.65. The Local Highways Authority do not object to the planning application on the grounds of parking provision, access arrangements or highway safety. The LHA request conditions for a Construction traffic Management Plan, pedestrian and vehicle visibility splays, provision of cycle parking and vehicle parking to be provided prior to occupation of the new development and that the development be restricted to retirement living only.

Conclusion

- 9.66. In respect of the issues discussed above, officers consider that the proposal as presented is acceptable on balance. The proposed use of the site and the nature and circumstances of the end user mean the requirements in terms of access and parking are slightly adjusted. Whilst the LHA requests the access be widened to better accommodate pedestrians, in this instance due to the low traffic rates, the proposed shared surface of the access and the impact that would have on the visual quality of the main entrance planning officers do not consider this necessary on the basis of highway safety. In terms of parking, the requirements are reduced due to the village centre location, access to services and the likely reduced car ownership rate due to the circumstances of the prospective residents.

- 9.67. The improvements to the public right of way to the rear of the site are welcomed and increase the likelihood of residents using walking as a mode to and from the development.
- 9.68. In summary, the proposed development complies with the relevant planning policies and there are no sustainable reasons for refusal on highway safety, access or parking grounds.

Trees and Landscaping

- 9.69. Policy ESD10 of the Local Plan refers to the protection and enhancement of ecology and the natural environment. It requires the protection of trees amongst other ecological requirements. Policy ESD13 also encourages the protection of trees and retention of landscape features. Policy BSC11 sets out the Council's requirements for local outdoor space provision and play space.
- 9.70. The proposal will result in the loss of two small trees located on the eastern side of the existing access driveway. The arboricultural report advises that all the significant boundary tree cover will remain intact and no moderate quality trees need to be removed. The report outlines the precautions taken to protect retained trees during the construction period. The Arboricultural Officer confirms that the report and plans are considerate of the trees on site and that the removal of the two small trees will not be detrimental to the sites amenity.
- 9.71. For these reasons officers conclude that the proposed development would not cause an unacceptable impact on tree health or the contribution of tree character to the wider setting. Provided the adequate precautions to protect the retained trees as specified in the report are implemented then the development proposed will not cause an unacceptable or adverse impact on the long-term viability of the retained trees and therefore the character and appearance of the area.
- 9.72. Policy BSC11 states that development proposals will be required to contribute to the provision of open space, sport and recreation, together with secure arrangements for its management and maintenance. The amount, type and form of open space will be determined having regard to the nature and the size of development proposed and the community needs likely to be generated by it. The policy guidance requires the provision of open space for a development of the scale proposed (over 10 urban dwellings). The site provides a small area of open space in the form of the private amenity space for the retirement flats. However, given the nature of the proposed use and the potential end user it is considered that the community needs for this publicly accessible open space is not high and so the provision of the private amenity space is sufficient. The development of 30 residential units triggers the requirement for on-site play space however, once again, considering the nature of the proposal and the potential end user it is not deemed appropriate nor necessary to request this. The site does not exceed the threshold for the onsite provision of formal outdoor sports facilities or for allotments.
- 9.73. A Landscape Strategy Plan has been submitted as part of the planning application which is broadly acceptable. Officer's requested that the northern hedgerow bordering the public right of way be reduced in length and height to allow for active surveillance and this can be secured by condition. Details of the planting and maintenance of any shrubs and hedgerow along this boundary will be required by condition to ensure it remains well managed and the public right of way remains visible, open and appealing to potential users.

Ecological/biodiversity issues

Legislative context

- 9.74. The Conservation of Habitats and Species Regulations 2017 consolidate the Conservation of Habitats and Species Regulations 2010 with subsequent amendments. The Regulations transpose European Council Directive 92/43/EEC, on the conservation of natural habitats and of wild fauna and flora (EC Habitats Directive), into national law. They also transpose elements of the EU Wild Birds Directive in England and Wales. The Regulations provide for the designation and protection of 'European sites', the protection of 'European protected species', and the adaptation of planning and other controls for the protection of European Sites.
- 9.75. Under the Regulations, competent authorities i.e. any Minister, government department, public body, or person holding public office, have a general duty, in the exercise of any of their functions, to have regard to the EC Habitats Directive and Wild Birds Directive.
- 9.76. The Regulations provide for the control of potentially damaging operations, whereby consent from the country agency may only be granted once it has been shown through appropriate assessment that the proposed operation will not adversely affect the integrity of the site. In instances where damage could occur, the appropriate Minister may, if necessary, make special nature conservation orders, prohibiting any person from carrying out the operation. However, an operation may proceed where it is or forms part of a plan or project with no alternative solutions, which must be carried out for reasons of overriding public interest.
- 9.77. The Regulations make it an offence (subject to exceptions) to deliberately capture, kill, disturb, or trade in the animals listed in Schedule 2, or pick, collect, cut, uproot, destroy, or trade in the plants listed in Schedule 4. However, these actions can be made lawful through the granting of licenses by the appropriate authorities by meeting the requirements of the 3 strict legal derogation tests:
- (1) Is the development needed to preserve public health or public safety or other imperative reasons of overriding public interest including those of a social or economic nature and beneficial consequences of primary importance for the environment?
 - (2) That there is no satisfactory alternative.
 - (3) That the action authorised will not be detrimental to the maintenance of the population of the species concerned at a favourable conservation status in their natural range.
- 9.78. The Regulations require competent authorities to consider or review planning permission, applied for or granted, affecting a European site, and, subject to certain exceptions, restrict or revoke permission where the integrity of the site would be adversely affected. Equivalent consideration and review provisions are made with respects to highways and roads, electricity, pipe-lines, transport and works, and environmental controls (including discharge consents under water pollution legislation).

Policy Context

- 9.79. Paragraph 170 of the NPPF states that Planning policies and decisions should contribute to and enhance the natural and local environment by (amongst others): a) protecting and enhancing valued landscapes, sites of biodiversity or geological

value and soils; and d) minimising impacts on and providing net gains for biodiversity, including by establishing coherent ecological networks that are more resilient to current and future pressures.

- 9.80. Paragraph 175 states that when determining planning applications, local planning authorities should apply the following principles: a) if significant harm to biodiversity resulting from a development cannot be avoided, adequately mitigated, or, as a last resort, compensated for, then planning permission should be refused; d) development whose primary objective is to conserve or enhance biodiversity should be supported; while opportunities to incorporate biodiversity improvements in and around developments should be encouraged, especially where this can secure measurable net gains for biodiversity.
- 9.81. Paragraph 180 of the NPPF states that planning decisions should also ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on health, living conditions and the natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should (amongst others) limit the impact of light pollution from artificial light on local amenity, intrinsically dark landscapes and nature conservation.
- 9.82. Policy ESD10 of the Cherwell Local Plan 2011-2031 lists measures to ensure the protection and enhancement of biodiversity and the natural environment, including a requirement for relevant habitat and species surveys and associated reports to accompany planning applications which may affect a site, habitat or species of known ecological value.
- 9.83. Policy ESD11 is concerned with Conservation Target Areas (CTAs), and requires all development proposals within or adjacent CTAs to be accompanied by a biodiversity survey and a report identifying constraints and opportunities for biodiversity enhancement.
- 9.84. These policies are both supported by national policy in the NPPF and also, under Regulation 43 of Conservation of Habitats & Species Regulations 2017, it is a criminal offence to damage or destroy a breeding site or resting place, unless a licence is in place.
- 9.85. The Planning Practice Guidance dated 2014 post dates the previous Government Circular on Biodiversity and Geological Conservation (ODPM Circular 06/2005), although this remains extant. The PPG states that Local Planning Authorities should only require ecological surveys where clearly justified, for example if there is a reasonable likelihood of a protected species being present and affected by development. Assessments should be proportionate to the nature and scale of development proposed and the likely impact on biodiversity.

Assessment

- 9.86. In this case the site is brownfield with an existing building in current use. There are a number of trees and hedgerow within and to the boundaries of the site. There are few ecological constraints on site in terms of protected species and habitats. The application was supported by an Ecological Assessment (report no. 12532_R02_SB_MM) prepared by Tyler Grange. The Council's Ecologist has confirmed that the surveys within the assessment that have been carried out to date are satisfactory and permission should be granted.
- 9.87. However, whilst it appears a net gain for biodiversity in terms of habitats is achievable at a reasonable level there is insufficient detail contained within the

report to show where and what type of enhancements will be installed. The Council would expect at least some of the provisions to be integrated into the fabric of the new buildings which assists in their retention. In this location, swift bricks would be an ideal option given local records and the type of building proposed. Cherwell DC currently seek an equivalent of 1 integrated brick or box per residence. This should inform the Biodiversity Enhancement Plan which is required by condition.

- 9.88. In addition, the landscaping is generally acceptable although the Council's ecologist has suggested the inclusion of some species rich/flowering grassland areas would be preferable to amenity grass alone to increase biodiversity rates. A full landscaping and management scheme is required by condition.
- 9.89. The Council's ecologist has recommended conditions to ensure the development is undertaken in line with the recommendations set out in the submitted Ecological Assessment.

Conclusion

- 9.90. Officers are satisfied, on the basis of the advice from the Council's Ecologist that the welfare of any European Protected Species found to be present at the site and surrounding land will continue and be safeguarded notwithstanding the proposed development and that the Council's statutory obligations in relation to protected species and habitats under the Conservation of Habitats & Species Regulations 2017, have been met and discharged. As such, there are no objections to the proposal on the grounds of ecology and biodiversity.

Flood Risk and drainage

- 9.91. A drainage statement is submitted with the application in line with the requirements of Policy ESD6 of the Local Plan and the Framework. Given that the site is less than 1ha in area and is in Flood Zone 1 a Flood Risk Assessment is not required. Policy ESD7 of the Local Plan requires the use of Sustainable Urban Drainage Systems to manage surface water drainage systems. This is all with the aim to manage and reduce flood risk in the District.
- 9.92. Oxfordshire County Council have been consulted and once further information was submitted the LLFA confirmed no objections subject to conditions. On this basis Officers are satisfied that flood risk and drainage will be suitably addressed and there are no sustainable reasons for refusal on this basis.

Crime prevention and security measures

- 9.93. The National Planning Policy Framework 2019, Section 12 'Achieving well-designed places', point 127 (part f), states that; 'Planning policies and decisions should ensure that developments... create places that are safe, inclusive and accessible... and where crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion and resilience'.
- 9.94. HMCLG's Planning Practice Guidance on 'Design', states that; 'Although design is only part of the planning process it can affect a range of objectives... Planning policies and decisions should seek to ensure the physical environment supports these objectives. The following issues should be considered: safe, connected and efficient streets... crime prevention... security measures... cohesive & vibrant neighbourhoods.'
- 9.95. The application is supported by a Design and Access Statement which contains a section headed 'Security, Boundaries' but this does not adequately address all of

the crime prevention and security measures discussed with the applicant at pre-application state. Nor does it provide a commitment to achieving Secured By Design accreditation as recommended previously.

- 9.96. The Crime Prevention Design Advisor has not objected to the application but, to ensure that the opportunity to design out crime is not missed, has offered advice on how to achieve SBD accreditation and a condition requiring evidence of such an application. Conditions are also included which are linked to crime prevention including the requirement for a lighting scheme, details of the bin and buggy store and details of boundary treatments including the security of the rear access gate to the footpath.
- 9.97. In light of the above, and in the absence of an objection from the Crime Prevention Design Advisor, the application proposal is considered to be acceptable subject to conditions in terms of the security and crime prevention design aspects.

Sustainability and energy efficiency

- 9.98. The Cherwell Local Plan includes a number of energy policies in order to seek development which mitigates and adapts to the future predicted climate change. This relates to locating development in sustainable locations as well as seeking to reduce energy use, making use of renewable energy and sustainable construction techniques as well as achieving reductions in water use. Mitigating and adapting to climate change in order to move to a low carbon economy is a key part of the environmental role of sustainable development set out in the Framework.
- 9.99. The application is not accompanied by a Sustainability or Energy Statement but sustainability is important with regard to how development adapts to future climate change. A section of the design and access statement addresses the relevant policies in the local plan and is outlined below.
- 9.100. Policy ESD1 Mitigating and Adapting to Climate Change: The proposed development will reuse a previously developed site rather than an undeveloped greenfield site. Its location is sustainable as defined in the Local Plan. The site is in walking distance to Kidlington village centre and close to shops and other community facilities as well as bus stops. The location of the proposed development is well placed to reduce the need to travel and encourages sustainable travel options including walking, cycling and public transport. A condition is recommended for the installation of electric vehicle charging points; this has been agreed by the applicants.
- 9.101. Policy ESD2 Energy hierarchy and allowable solutions and ESD3 Sustainable Construction: Churchill have confirmed that all their schemes are designed and built beyond the national minimum standards as set within Building Regulations with particular emphasis given to an energy efficient fabric first approach. The scheme will maximise the benefits of service technologies adopted therein. Inclusive of the building's design is the emphasis on reducing exposed external wall areas and consequently improving thermal efficiency.
- 9.102. The development seeks to maximise passive solar lighting and natural ventilation. In terms of water, the proposal seeks to achieve a higher level of water efficiency at 110litre per person per day through the installation of water saving and water restricting appliances in all apartments. All areas of the building internally and externally will be lit using low energy lighting and where applicable utilise appropriate daylight and movement sensor controls. A condition is recommended for an external lighting scheme to ensure the lighting is appropriate for the location and considering climate change issues.

- 9.103. ESD5 Renewable Energy: Ground source heat pump technology is proposed. A high efficiency heat pump can provide up to four times as much heat as an electric heater using the same amount of energy.
- 9.104. In terms of waste and recycling, Cherwell DC require 1.4sqm of bin space per property so for 30 flats 42sqm of space is required.
- 9.105. In the Design and Access Statement Churchill Retirement claims that retirement schemes in general have occupancy rates which are typically 50% lower than open market housing. As such Churchill Retirement propose a waste and recycling scheme which differs from Cherwell DC requirements. The typical waste requirements of the retirement schemes are as follows:
- Total waste generation rate of 100 litres per week for one bed apartments is 19 x 100L = 1900L
 - Total waste generation rate of 170 litres per week for two bed apartments is 11 x 170L = 1870L
 - Total capacity required would be 3770L.
- 9.106. Churchill proposes the provision of 6 x 1100L bins totalling a capacity of 6660L capacity which would be more than sufficient based upon Churchill's understanding of the waste requirements of retirement living. Two bins for mixed recycling, one bin for paper, one bin for glass, one bin for food waste and one bin for residual general waste. These will be stored in a communal refuse store on site. This is to be located externally to the main building, at ground level and close to the car park.
- 9.107. Garden waste will be managed by the management Team who also manage the upkeep of the grounds. The entrance drive has been designed to allow a refuse vehicle to easily enter and exit the site in a forward gear. No comments have been received from the Council's Waste and Recycling Team. As such, and considering the applicants detailed analysis of waste and recycling practices across their schemes, on balance the provision proposed is acceptable.
- 9.108. In summary, the proposed development is considered to comply with the relevant development plan policies in regard to sustainability and energy efficiency.

Developer contributions and affordable housing

- 9.109. Should the application be approved, improvements to local infrastructure will need to be provided in order to mitigate the impact of the development and make it acceptable in planning terms. A S106 Legal agreement would be required to be entered into to secure mitigation resulting from the impact of the development both on and off site. This would ensure that the requirements of Policy INF1 of the Local Plan can be met, which seeks to ensure that the impacts of development upon infrastructure including transport can be mitigated. This also includes the provision of affordable housing. The Authority is also required to ensure that any contributions sought meet the following legislative tests, set out at Regulation 122 of the Community Infrastructure Regulations 2011 (as amended):
- Necessary to make the development acceptable in planning terms;
 - Directly relate to the development; and
 - Fairly and reasonable related in scale and kind to the development

9.110. The following are sought through this application:

- Payment of a financial contribution, towards off site indoor sports and recreation provision in the locality, of £12,876.29. This is based on an occupancy rate of 38.4. This is towards improvements at Kidlington and Gosford Leisure Centre. The sports studies identified a need for increased pool space, fitness provision and additional sports hall space to meet the needs of residents as a result of the increased housing provision.
- Payment of a financial contribution towards community facilities being the refurbishment of Exeter Hall of £17,622.20. This is based on an occupancy rate of 38.4 and the requirement for 0.185metre square of community space required per resident.
- Payment of a financial contribution towards the provision of refuse/recycling bins for the development of £106.00 per dwelling plus £5.00 per dwelling towards recycling banks. This based on an occupancy rate of approximately 38 people would total £4,218.00.

9.111. A contribution to off-side sports provision is not sought as it is considered that the new residents will not benefit from using facilities such as Stratfield Brake Sports Ground.

Affordable Housing

9.112. With regard to affordable housing, policy BSC3 requires development within locations such as at Kidlington to provide 35% affordable housing on site and provides detail on the mix that should be sought between affordable/ social rent and shared ownership. Where this policy would result in a requirement that part of an affordable home should be provided, a financial contribution of equivalent value will be required for that part only. Otherwise, financial contributions in lieu of on-site provision will only be acceptable in exceptional circumstances.

9.113. Officers accept that on-site provision is not suitable due to the management complexities and the potential unaffordability due to service charge costs. Strategic Housing Officers request a financial continuation in lieu of on-site provision of 40% of open market value for 35% of the units. This equates to £1,340,000. An affordable housing statement was submitted to accompany the application and sets out why the applicant supports the principle of the contribution, but in this instance claims the provision of a fully policy compliant affordable housing contribution would make the scheme unviable.

9.114. In terms of the proposed scheme, due to the fact that the affordable housing requirement is not met (on site or a contribution in lieu) the development is not technically policy compliant. A negotiated discussion and a thorough independent 'open book' analysis of the viability of the scheme has been undertaken by Bidwells. It is clear through the analysis of the viability of the scheme that officers are unable to secure a policy compliant scheme due to there not being enough funds to pay the full commuted sum. However, provided some contribution can be secured Officer's consider that the benefits of the scheme are enough to enable officer support. These benefits include redevelopment of a brownfield site, delivering much needed housing and retirement housing in one of the District's most sustainable settlements which is projected as highly relevant for the district and Oxfordshire area over the coming years, reduction in potential neighbour disturbances through a change of use from the social club and biodiversity net gain.

- 9.115. Following extensive negotiation, it has been agreed that a contribution of £348,147 is acceptable. This is based upon the money left available when a viable development is delivered. The agent and applicant are accepting of this requirement.
- 9.116. On this basis, Officers are minded to accept the proposed contribution of £348,147 as reasonable, taking into account the likely margins of viability for the proposed scheme.

Human Rights and Equalities

- 9.117. The Human Rights Act 1998 (“HRA”) sets out fundamental freedoms which have been laid out by the European Convention on Human Rights (“ECHR”). In making any decisions, Cherwell District Council (“the Council”) should have due regard to and take into account any implications that may arise under the HRA. As a public authority, it is unlawful for the Council to act in a manner which is incompatible with the ECHR.
- 9.118. The rights under the ECHR which the Council views as being the most likely to affect planning matters are: Article 6 (the right to a fair trial); Article 8 (right to respect for private and family life); Article 14 (prohibition of discrimination); and Article 1 of the First Protocol (protection of property).

Article 6

- 9.119. Officers have considered these matters and have resolved that, whilst there are potential rights in play, these will not be affected by the application due to the application being publicised by way of neighbour letter, site notice and in the local press giving affected third parties the opportunity to comment on the application and their views taken into account when considering the application. In this case any comments/concerns raised by third parties are listed above and have been taken into account in assessing the application. In addition, third parties will be invited to the public meeting of the Planning Committee and have the opportunity to speak. Furthermore should a third party be concerned about the way the application was decided they could complain to the Local Government Ombudsman or if they question the lawfulness of a decision can appeal to the Courts for Judicial Review of the application.

Article 8 and Article 1 of the First Protocol

- 9.120. Officers have considered the duties under both Article 8 and Article 1 of the First Protocol and have resolved that the application does respect the private and family life of neighbours and does not fail to protect the neighbours’ property.

Duty under The Equalities Act 2010

- 9.121. S149 of the Equalities Act 2010 (“EA”) sets out what is known as the Public Sector Equality Duty (“PSED”). Under the PSED, the Council, as a public authority, must have due regard to the need to, inter alia, advance equality of opportunity between persons who share a relevant protected characteristic and persons who do not share it and has to foster good relations between persons who share a relevant protected characteristic and persons who so not share it. The protected characteristics to which the PSED refers are: (a) age; (b) disability; (c) gender reassignment; (d) pregnancy and maternity; (e) race; (f) religion or belief; (g) sex; (h) sexual orientation.

9.122. Officers have considered the application and resolved that none of the protected characteristics

10. PLANNING BALANCE AND CONCLUSION

10.1. Paragraphs 7 and 8 of the NPPF state that the purpose of the planning system is to contribute to the achievement of sustainable development. This means the planning system has three overarching objectives – economic, social and environmental – which are interdependent and need to be pursued in mutually supportive ways.

10.2. The proposed development will contribute to the economic objective through the creation of jobs and - via its residents - additional expenditure generation in nearby shops and facilities. Whilst the loss of the social club is regrettable, this has been justified and given the availability of other community facilities within the local area, is not considered to cause significant harm to the social objective. The provision of much needed specialist accommodation for older people in one of the District's most sustainable settlements is considered a significant benefit of the scheme and contributes to meeting the social objective. The development will meet the environmental objective as outlined in this report, with limited impacts on the amenity of neighbours. The Local Highways Authority is satisfied that the proposal is acceptable in transport and parking terms, with limited environmental impacts anticipated in this regard.

10.3. All in all, the proposal is considered to be sustainable development and is recommended for approval, subject to the completion of a satisfactory S106 agreement and the conditions detailed below.

11. RECOMMENDATION

RECOMMENDATION – DELEGATE TO THE ASSISTANT DIRECTOR FOR PLANNING AND DEVELOPMENT TO **GRANT PERMISSION, SUBJECT TO THE CONDITIONS SET OUT BELOW** (AND ANY AMENDMENTS TO THOSE CONDITIONS AS DEEMED NECESSARY) **AND THE COMPLETION OF A PLANNING OBLIGATION UNDER SECTION 106** OF THE TOWN AND COUNTRY PLANNING ACT 1990, AS SUBSTITUTED BY THE PLANNING AND COMPENSATION ACT 1991, TO SECURE THE FOLLOWING (AND ANY AMENDMENTS AS DEEMED NECESSARY):

- a) Payment of a financial contribution towards affordable housing of £348,147.
- b) Payment of a financial contribution, towards off site indoor sports and recreation provision in the locality, of £12,876.29 (index linked).
- c) Payment of a financial contribution towards community facilities being the refurbishment of Exeter Hall of £17,622.20
- d) Payment of a financial contribution towards the provision of refuse/recycling bins for the development of £111 per dwelling (index linked)
- e) Payment of the Council's monitoring costs of £3,819.46
- f) Improvements to the access (to be secured via a S278 agreement)

CONDITIONS

TIME LIMITS AND GENERAL IMPLEMENTATION CONDITIONS

1. The development hereby permitted shall be begun before the expiration of three years from the date of this permission.

Reason : To comply with the provisions of Section 91 of the Town and Country Planning Act 1990 as amended by Section 51 of the Planning and Compulsory

Purchase Act 2004.

2. The development shall not be carried out otherwise than in complete accordance with the approved plans being drawing nos. 10105KT/PA10 received by the Local Planning Authority on the 22 October 2019 and drawing nos. 10105KT/PA01, 10105KT/PA02, 10105KT/PA03, 10105KT/PA04, 10105KT/PA05, 10105KT/PA06, 10105KT/PA07, 10105KT/PA08 all received by the Local Planning Authority on 17 February 2020 unless a non-material or minor material amendment is approved by the Local Planning Authority under the Town and Country Planning (Development Management Procedure) (England) Order 2015 (as amended).

Reason : To clarify the permission and for the avoidance of doubt.

3. The development hereby permitted shall be carried out in accordance with the recommendations set out in sections 4.8 and 4.10 of the Ecological Assessment (reference 12532_R02_SB_MM) prepared by Tyler Grange and dated 14th October 2019 unless otherwise agreed in writing by the Local Planning Authority.

Reason : To protect habitats and/or species of importance to nature conservation from significant harm in accordance with the Government's aim to achieve sustainable development as set out in Section 15 of the National Planning Policy Framework.

PRE-COMMENCEMENT CONDITIONS

4. No development shall take place until the existing tree(s) to be retained as identified on the 'Tree Protection Plan' drawing no. 19085-BT5 have been protected in accordance with the approved Tree Protection Plan and Arboricultural Assessment and Method Statement (reference 19085-AA2-PB) prepared by Barrell Tree Consultancy dated 4th October 2019 unless otherwise agreed in writing by the Local Planning Authority. The barriers shall be erected before any equipment, machinery or materials are brought onto the site for the purposes of development and demolition and shall be maintained until all equipment machinery and surplus material has been removed from the site. Nothing shall be stored or placed within the areas protected by the barriers erected in accordance with this condition and the ground levels within those areas shall not be altered, nor shall any excavations be made, without the written consent of the Local Planning Authority.

Reason : To ensure the continued health of retained trees/hedges and to ensure that they are not adversely affected by the construction works, in the interests of the visual amenity of the area, to ensure the integration of the development into the existing landscape and to comply with Policy ESD15 of the Cherwell Local Plan 2011 – 2031 Part 1, Saved Policy C28 of the Cherwell Local Plan 1996 and Government guidance contained within the National Planning Policy Framework. This information is required prior to commencement of the development as it is fundamental to the acceptability of the scheme.

5. No part of the development hereby permitted shall take place until a desk study and site walk over to identify all potential contaminative uses on site, and to inform the conceptual site model has been carried out by a competent person and in accordance with DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11' and has been submitted to and approved in writing by the Local Planning Authority. No development shall take place until the Local Planning Authority has given its written approval that it is satisfied that no potential risk from contamination has been identified.

Reason: To ensure that any ground and water contamination is identified and adequately addressed to ensure the safety of the development, the environment and to ensure the site is suitable for the proposed use to comply with Saved Policy ENV12 of the Cherwell Local Plan 1996 and Section 15 of the National Planning Policy Framework. This information is required prior to commencement of the development as it is fundamental to the acceptability of the scheme.

6. If a potential risk from contamination is identified as a result of the work carried out under condition 5, prior to the commencement of the development hereby permitted, a comprehensive intrusive investigation in order to characterise the type, nature and extent of contamination present, the risks to receptors and to inform the remediation strategy proposals shall be documented as a report undertaken by a competent person and in accordance with DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11' and submitted to and approved in writing by the Local Planning Authority. No development shall take place unless the Local Planning Authority has given its written approval that it is satisfied that the risk from contamination has been adequately characterised as required by this condition.

Reason: To ensure that any ground and water contamination is adequately addressed to ensure the safety of the development, the environment and to ensure the site is suitable for the proposed use, to comply with Saved Policy ENV12 of the Cherwell Local Plan 1996 and Section 15 of the National Planning Policy Framework. This information is required prior to commencement of the development as it is fundamental to the acceptability of the scheme.

7. If contamination is found by undertaking the work carried out under condition 6, prior to the commencement of the development hereby permitted, a scheme of remediation and/or monitoring to ensure the site is suitable for its proposed use shall be prepared by a competent person and in accordance with DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11' and submitted to and approved in writing by the Local Planning Authority. No development shall take place until the Local Planning Authority has given its written approval of the scheme of remediation and/or monitoring required by this condition.

Reason: To ensure that any ground and water contamination is adequately addressed to ensure the safety of the development, the environment and to ensure the site is suitable for the proposed use, to comply with Saved Policy ENV12 of the Cherwell Local Plan 1996 and Section 15 of the National Planning Policy Framework. This information is required prior to commencement of the development as it is fundamental to the acceptability of the scheme.

8. No development shall take place, including any works of demolition until a Construction Method Statement has been submitted to, and approved in writing by the Local Planning Authority. The statement shall provide for at a minimum:
- a) The parking of vehicles of site operatives and visitors;
 - b) The routing of HGVs to and from the site;
 - c) Loading and unloading of plant and materials;
 - d) Storage of plant and materials used in constructing the development;
 - e) The erection and maintenance of security hoarding including decorative displays and facilities for public viewing, where appropriate;
 - f) Wheel washing facilities including type of operation (automated, water recycling etc) and road sweeping;

- g) Measures to control the emission of dust and dirt during construction;
- h) A scheme for recycling/ disposing of waste resulting from demolition and construction works;
- i) Delivery, demolition and construction working hours.

The approved Construction Method Statement shall be adhered to throughout the construction period for the development.

Reason : To ensure the environment is protected during construction in accordance with Saved Policy ENV1 of the Cherwell Local Plan 1996 and Government guidance contained within the National Planning Policy Framework. This information is required prior to commencement of the development as it is fundamental to the acceptability of the scheme.

9. No development shall take place until a detailed design and associated management and maintenance plan of surface water drainage for the site using sustainable drainage methods has been submitted to and approved in writing by the Local Planning Authority. The approved drainage system shall be implemented in accordance with the approved detailed design prior to the use of the building commencing.

Reason: To ensure that the principles of sustainable drainage are incorporated into this proposal in compliance with Policy ENV1 of the adopted Cherwell Local Plan and Government guidance contained within the National Planning Policy Framework.

10. Prior to the first occupation of the development, a scheme for the provision of at least 10 vehicular electric charging points to serve the development shall be submitted to and approved in writing by the Local Planning Authority. The vehicular electric charging points shall be provided in accordance with the approved details prior to the first occupation of the development and retained as such thereafter.

Reason – To comply with policies SLE 4, ESD 1, ESD 3 and ESD 5 of the adopted Cherwell Local Plan 2011-2031 Part 1 and to maximise opportunities for sustainable transport modes in accordance with paragraph 110(e) of the National Planning Policy Framework.

CONDITIONS REQUIRING APPROVAL OR COMPLIANCE BEFORE SPECIFIC CONSTRUCTION WORKS TAKE PLACE

11. The external walls, dormers and roof(s) of the development shall be carried out in accordance with the schedule of materials and finishes referred to in the Design and Access Statement (page 30) prepared by Planning Issues and Churchill Retirement Living dated 12 February 2020 or in accordance with an alternative schedule of materials that have been first submitted to and approved in writing by the Local Planning Authority prior to the commencement of that work.

Reason : To ensure that the materials are appropriate to the appearance of the locality and to ensure the satisfactory appearance of the completed development in accordance with Policy ESD15 of the Cherwell Local Plan 2011 – 2031 Part 1, Saved Policy C28 of the Cherwell Local Plan 1996.

12. A scheme for landscaping the site shall be provided to and approved in writing by the Local Planning Authority which shall include:-

(a) details of the proposed tree and shrub planting including their species, number,

sizes and positions, together with grass seeded/turfed areas and written specifications (including cultivation and other operations associated with plant and grass establishment i.e. depth of topsoil, mulch etc),

(b) details of the existing trees and hedgerows to be retained as well as those to be felled, including existing and proposed soil levels at the base of each tree/hedgerow and the minimum distance between the base of the tree and the nearest edge of any excavation,

(c) details of the hard landscaping including hard surface areas, pavements, pedestrian areas and steps.

Such details shall be provided prior to the commencement of those works or such alternative time frame as agreed in writing by the developer and the Local Planning Authority. The approved scheme shall be implemented by the end of the first planting season following occupation of the development.

Reason : To ensure that a satisfactory landscape scheme is provided in the interest of well planned development and visual amenity and to accord with Policy ESD15 of the Cherwell Local Plan 2011 – 2031 Part 1, Saved Policy C28 of the Cherwell Local Plan 1996 and Government guidance contained within the National Planning Policy Framework.

13. If, during development, contamination not previously identified is found to be present at the site, no further development shall be carried out until full details of a remediation strategy detailing how the unsuspected contamination shall be dealt with has been submitted to and approved in writing by the Local Planning Authority. Thereafter the remediation strategy shall be carried out in accordance with the approved details.

Reason: To ensure that any ground and water contamination is identified and adequately addressed to ensure the safety of the development, the environment and to ensure the site is suitable for the proposed use, to comply with Saved Policy ENV12 of the Cherwell Local Plan 1996 and Section 15 of the National Planning Policy Framework.

14. Details of the external lighting/security lighting including the design, position, orientation and any screening of the lighting shall be submitted to and approved in writing by the Local Planning Authority prior to commencement of those works. The lighting shall be installed and operated in accordance with the approved scheme at all times thereafter.

Reason : To protect the amenities of nearby residents and to comply with Policy ESD15 of the Cherwell Local Plan 2011 – 2031 Part 1, Saved Policies C28 and C30 of the Cherwell Local Plan 1996

15. A method statement for enhancing biodiversity on site, to include features integrated into the fabric of the buildings and to include colonial provision for swifts and features for bats, shall be submitted to and approved in writing by the Local Planning Authority prior to the development reaching slab level. Thereafter, the biodiversity enhancement measures approved shall be carried out prior to occupation and retained in accordance with the approved details.

Reason : To protect habitats of importance to biodiversity conservation from any loss or damage in accordance with Policy ESD10 of the Cherwell Local Plan 2011 – 2031 Part 1 and Government guidance contained within Section 15 of the National Planning Policy Framework.

CONDITIONS REQUIRING APPROVAL OR COMPLIANCE BEFORE OCCUPATION

16. A schedule of landscape maintenance for a minimum period of 5 years shall be submitted to and approved in writing by the Local Planning Authority prior to occupation of the development. The schedule shall include details of the arrangements for its implementation. Development shall be carried out in accordance with the approved schedule unless otherwise approved in writing by the Local Planning Authority.

Reason : To ensure that the agreed landscaping scheme is maintained over a reasonable period that will permit its establishment in the interests of visual amenity and to accord with Policy ESD15 of the Cherwell Local Plan 2011 – 2031 Part 1, Saved Policy C28 of the Cherwell Local Plan 1996 and Government guidance contained within the National Planning Policy Framework.

17. A plan detailing the proposed parking and turning/loading/unloading provision for vehicles to be accommodated within the site (including details of the proposed surfacing and drainage of the provision), shall be submitted to and approved in writing by the Local Planning Authority prior to commencement of those works. The approved parking and turning/loading/unloading facilities shall be laid out and completed in accordance with the approved details before the first occupation of the building. The car parking, turning/loading/unloading spaces shall be retained for the parking, turning/loading/unloading of vehicles at all times thereafter.

Reason : In the interests of highway safety, to ensure the provision of adequate off-street car parking and turning/loading/unloading and to comply with Government guidance in Section 12 of the National Planning Policy Framework.

18. Prior to the first use or occupation of the development hereby permitted, a minimum of 2 covered cycle parking spaces shall be provided on the site in accordance with details to be first submitted to and approved in writing by the Local Planning Authority. The covered cycle parking facilities so provided shall thereafter be permanently retained and maintained for the parking of cycles in connection with the development.

Reason : In the interests of promoting sustainable transport modes in accordance with Government advice in the National Planning Policy Framework.

19. Prior to first occupation of the development hereby permitted, vehicular visibility splays shall be provided in both directions at the point of access from Green Road in accordance with submitted drawing 536.0006.001 E (Appendix F to the Transport Statement by Paul Basham Associates Ltd dated October 2019). Thereafter, the visibility splays shall be kept permanently free from obstruction to vision above 0.6 metres in height over the whole of each visibility splay area.

Reason : To ensure that adequate visibility is retained in the interest of road safety in accordance with Government guidance in Section 12 of the National Planning Policy Framework.

20. Prior to first occupation of the building the bins stores as shown on the approved plans shall be provided in accordance with those approved details and permanently retained as ancillary to the development and used for no other purpose whatsoever.

Reason: In the interest of well planned development and visual amenity of the area in accordance with Policy ESD15 of the Cherwell Local Plan 2011 – 2031 Part 1,

Saved Policy C28 of the Cherwell Local Plan 1996 and Government guidance contained within the National Planning Policy Framework.

21. If remedial works have been identified in condition 6 the development shall not be occupied until the remedial works have been carried out in accordance with the scheme approved under condition 7. A verification report that demonstrates the effectiveness of the remediation carried out must be submitted to and approved in writing by the Local Planning Authority.

Reason: To ensure that any ground and water contamination is adequately addressed to ensure the safety of the development, the environment and to ensure the site is suitable for the proposed use, to comply with Saved Policy ENV12 of the Cherwell Local Plan 1996 and Section 15 of the National Planning Policy Framework.

22. No building or use hereby permitted shall be occupied or the use commenced until the sustainable drainage scheme for this site has been completed in accordance with the submitted details. The sustainable drainage scheme shall be managed and maintained thereafter in perpetuity in accordance with the agreed management and maintenance plan. A stand-alone Management and Maintenance document to be submitted

Reason: To ensure that the principles of sustainable drainage are incorporated into this proposal and maintained thereafter and to comply with Policy ENV1 of the adopted Cherwell Local Plan and Government guidance contained within the National Planning Policy Framework.

ONGOING REGULATORY CONDITIONS TO BE COMPLIED WITH AT ALL TIMES

23. No construction work including site clearance and delivery of materials shall be carried out except between the hours of 07.30 to 18.00 Monday to Friday and 08.00 to 13.00 on Saturdays and at no times on Sundays, Bank and Public Holidays.

Reason : In order to protect the amenities of occupiers of nearby properties from noise outside normal working hours and to comply with Saved Policy ENV1 of the Cherwell Local Plan 1996

24. None of the residential units hereby approved shall be occupied other than by a person of an age of 60 years or over (and partners aged 55 years plus).

Reason: In the interest of highway safety and to comply with Policy ESD15 of the Cherwell Local Plan 2011-2031 Part 1 and Government guidance in Section 12 of the National Planning Policy Framework.

NOTES TO DEVELOPER

1. In relation to condition 9, development shall be based upon the principles as laid out in the CEP Drainage Statement V1.1 dated October 2019, reference 23247 and as per drawing Preliminary Drainage Strategy Plan DS 04. Discharge to be limited to 2l/s at the 1:100 + 40% Climate Change Factor. Additional information required:

- Pre and Post development overland surface water flow plan required.
- Safe ingress/egress needs to be demonstrated.
- Sacrificial areas in the event of exceedance should be considered.
- Further thought needs to be given to maximising use of green space on site for SuDS incorporation.
- All hardstanding should be of a permeable construction, where this is not

considered

- practical full explanatory justification to be provided.
- Justification as to whether 10% Urban Creep allowance has been applied required.
- Phasing – to be detailed on plan including descriptive methodology as to how
- surface water will be managed during construction, the mobilisation of sediments
- and any contaminants.
- Exceedence – justification as to how surface water will be managed on site in event of failure or exceedance event.
- Evidence of safe ingress/egress to be provided.
- Justification that damaged pipework as identified in the Utility Surveys Ltd CCTV survey will be replaced where appropriate and abandoned where no longer required.
- Fully detailed numbered pipe network plan to be provided for assessment against MicroDrainage calculations.
- Stand-alone Surface Water Management Strategy document to be submitted.

Appendix 20

Launton Appeal Decision 3188671

Appeal Decision

Inquiry Held on 10, 11 and 12 July 2018

Site visit made on 12 July 2018

by Kenneth Stone BSc Hons DipTP MRTPI

an Inspector appointed by the Secretary of State

Decision date: 18 September 2018

Appeal Ref: APP/C3105/W/17/3188671

Land off Blackthorn Road, Launton OX26 5DA

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant outline planning permission.
 - The appeal is made by Manor Oak Homes (Mr William Main) against the decision of Cherwell District Council.
 - The application Ref 17/01173/OUT, dated 24 May 2017, was refused by notice dated 4 August 2017.
 - The development proposed is the development of up to 72 dwellings with associated large area of Public Open Space.
-

Decision

1. The appeal is allowed and outline planning permission is granted for the development of up to 72 dwellings with associated large area of Public Open Space at Land off Blackthorn Road, Launton OX26 5DA in accordance with the terms of the application, Ref 17/01173/OUT, dated 24 May 2017, subject to the conditions contained in the schedule at the end of this decision.

Procedural matters

2. The application was submitted in outline with all matters except for access to be reserved for future consideration. The application was supported by various plans and these are identified in the final signed Statement of Common Ground (CDC2) at paragraph 4. It was confirmed that the Feasibility layout, as it is referred to there (the drawing title on the plan is illustrative layout) was for illustrative purposes only to demonstrate one way in which the site could be developed.
3. During the conditions session it was also confirmed that JPP Consulting Plan T7866PM-01-A, from the Transport Assessment revision A, formed part of the plans for which permission was sought. The Council originally refused planning permission for five reasons; by the start of the Inquiry the Environment Agency and the Oxford County Council Drainage Officer withdrew their objections. This resulted in the Council no longer pursuing its objections on grounds of flooding or drainage. The Council confirmed that if a satisfactory obligation was provided to ensure the provision of infrastructure necessary to serve the development it would no longer contest that issue.
4. A completed and executed planning obligation in the form of a planning agreement pursuant to section 106 of the Town and Country Planning Act 1990

was provided by the close of the Inquiry. I return to the planning obligations secured below.

5. The revised National Planning Policy Framework (the Framework) was published on 24 July 2018 and the parties were given the opportunity to comment on the relevance this will have on their case.
6. The Government published a Written Ministerial Statement in relation to Housing Land Supply in Oxfordshire. I have had regard to the Statement.

Main Issues

7. The main issues are:
 - Whether the location and scale of the proposed development would conflict with the development plan's strategy for the distribution of housing in the district; and
 - The effect of the proposed development on the character and appearance of the settlement of Launton and the surrounding area.

Reasons

8. The development plan for the area comprises the saved policies from the Cherwell Local Plan 1996 (CLP 1996) and the Cherwell Local Plan 2031 part 1 (CLP 2031 (part 1)).
9. The Council is in the process of a partial review of the CLP 2031 (part 1) to address the apportionment of Oxford's identified unmet need to the surrounding district Councils. The Council submitted the Local Plan Part 1 Partial Review (Oxford's Unmet Housing Need) to the Secretary of State on 5th March 2018. This has not been the subject of public scrutiny. Whilst the Council may have agreed the level of unmet need it is to receive from Oxford in terms of the proportionate apportionment in the context of this appeal the review carries only little weight at this point in time.
10. Reference is made in the CLP 2031 (part 1) to the Cherwell Local Plan 2031 part 2 (CLP 2031 (Part 2)) however this appears to be in the very early stages of preparation with an issues consultation paper being published in January-March 2016. I have no evidence before me of any further progress on that plan and therefore I am of the view it carries very little weight in the determination of this appeal.

Location and scale of development

11. Underpinning the CLP 2031 (part 1) is a spatial strategy for Cherwell District which focusses the bulk of the proposed growth in and around Bicester and Banbury. It limits growth in the rural areas, directs it towards larger and more sustainable villages and aiming to strictly control development in open countryside.
12. Policy BSC1 identifies that 22,840 dwellings will be provided for between 2011 and 2031; distributed between Bicester, Banbury and the Rest of the District. A significant proportion of the 'rest of the district' figure relates to a strategic allocation at RAF Upper Heyford, the remainder distributed through the categorisation of Villages in Policy Villages 1: Village categorisation and Policy Villages 2: Distributing Growth Across the rural areas. The plan seeks to alter

the local pattern of recent housing growth, as a disproportionate percentage (almost half) has taken place in smaller settlements, adding to commuting by car and congestion on the road network at peak hours. The number of new homes outside the two main towns would be around a quarter of the overall plan total.

13. Launton is identified as a category A - service village in Policy Villages 1. Policy Villages 2 confirms that over the plan period a total of 750 homes will be delivered at category A villages. There is no further distribution of delivery within the villages and there is no timeframe or trajectory for delivery associated with the overall figure. All parties accept that the headline figure is not a ceiling and that conflict would only arise if there was a material increase over and above the identified 750 dwellings. This is consistent with the Framework's approach to significantly boost the delivery of housing.
14. The 2017 Annual Monitoring Report for the district identifies that a total of 664 dwellings have been identified for meeting the Policy Villages 2 requirement. By March 2017 there had been 103 completions on those sites. The proposed development would make provision for up to a further 72 dwellings taking the total to 736 (664 + 72). The 750 figure in the policy would not be breached. Furthermore the 750 figure refers to dwellings delivered, of which to date there are only 103, substantially below the 750 figure. As a matter of fact allowing this appeal would not breach this aspect of Policy Villages 2, I return to the criteria based aspects below.
15. My attention is drawn to the dismissal of an appeal in 2015¹ on the grounds that the provision of 95 homes in one location at that early stage of the local plan period would leave little scope for development in other category A villages either in terms of numbers or timing and would thus not be in accordance with the Plan's housing strategy. This was shortly after the plan had been adopted in 2014. Matters have moved on and information is available to consider whether performance across the rest of the district is meeting the aspiration of the strategy.
16. This proposition has been taken forward in more recent appeal decisions² however none of these have been the subject of the full scrutiny of Public Inquiry. Further, there are also significant site specific differences between those decisions and this appeal related to heritage concerns, sustainability and harm to character and appearance.
17. Whilst the level of planning permissions and resolutions to approve is approaching 750 the number of units built is still substantially below that figure. That equates to a delivery rate of some 34 units per annum based on the delivery since 2014. If that were continued the delivery would be too low to reach 750 in the plan period. The latest AMR figures demonstrate that completions and planning permissions outstanding in the two principle towns of Bicester and Banbury amount to in the region of two thirds of housing delivery. The remaining one third being delivery in the rural areas, a substantial proportion of which is at a strategic allocation location. This demonstrates that the overall intention of the strategy to deliver housing in the most sustainable locations of the main towns and strategic allocation and to limit development in the rural areas is succeeding. The proportion of housing being delivered at the

¹ APP/C3105/W/14/3001612

² APP/C3105/W/16/3158925, App/C3105/W/17/3169168 and APP/C3105/W/17/3187461.

smaller villages is significantly less than half of delivery as was identified as a main driver for the development of the strategy.

18. The 750 figure is not an upper limit and it would require a material exceedance to justify arriving at a conclusion the policy was being breached. Whilst the figure is moving towards the actual figure there is still some headroom available. Time has moved on and we are now further into the plan period, any permissions that are now granted will take time to produce the delivery of housing and therefore it is likely that the delivery of the units identified in this appeal would not arise until the plan was in the second half of its term. It is in my view no longer appropriate to characterise this as early in the plan period. The CLP 2031 (part 2) plan has the potential to review the implications of these policies or a formal review of the part 1 plan could come forward.
19. On the basis of the evidence before me I am satisfied that the proposed development would not lead to a breach of this aspect of Policy Villages 2 or the overall plan strategy.
20. In any event, there is evidence to demonstrate that housing delivery is strengthening. That it is focussing in the main towns of Bicester and Banbury and the strategic allocation and that the contribution from the more sustainable villages (category A villages) in the rural area to the overall delivery of housing is achieving the plans overall need in a manner consistent with the strategy. Whilst I accept that the delivery of all of the level of housing anticipated through Policy Villages 2 could reduce the flexibility later in the plan period I have been provided with no evidence that the granting of permission here would prevent development at a more sustainable location in another Category A village.
21. Indeed it is no part of the Council's case that Launton is not a sustainable village and does not have the services and facilities to meet the day to day needs of the future residents of the proposed development. The number of units proposed would not be excessive in relation to the services and facilities available in the village. The village contains a number of facilities including two pubs, a convenience store, farm shop, primary school, community hall and small business enterprises. It is categorised as a Category A village which are those villages in the district with the highest sustainability credentials in the rural area. The village is also well served by public transport. The additional demands placed on existing facilities would be addressed through the provision of the planning obligation. The scale of the development would not substantially detract from the character of the village as I conclude below. The increase in the number of new homes would not therefore result in materially harmful effects.
22. Any future developments at Category A villages in the future would need to be considered in the context of the circumstances pertaining at that time which would include, but not be limited to, matters such as whether the 750 figure had been materially exceeded, the specific needs for that development in relation to the village and the effect on the overall settlement strategy.
23. On the basis of the above conclusions I am satisfied that the location and scale of the proposed development would not conflict with the development plan's strategy for the distribution of housing in the district. The development would not conflict with policy BSC1, Policy Villages 1 or Policy Villages 2 and would

not undermine the overall strategy of the development plan, with which it would comply.

Character and appearance

24. The Council's reason for refusal alleges that the application contained insufficient information to enable it to assess the impact of the proposed development on its surroundings.
25. I have had regard to the advice in the Planning Practice Guidance with regard to Design and Access Statements (DAS) and to the two court cases³ submitted in Closing by the appellant to address the concern of the adequacy of the DAS. Given that the application is in outline with all matters reserved, other than access, much of the detailed layout, design and appearance are matters more properly considered at reserved matters stage. With the application before me the focus is on whether the scale and quantum of development could be satisfactorily accommodated on the site. As the PPG advises DASs are concise reports to provide a framework for applicants to explain how the proposed development is a suitable response to the site.
26. The PPG goes on to advise that the DAS must explain the design principles and concepts and demonstrate the steps taken to appraise the context and how the design takes that context into account. There is no prescriptive formulaic sequencing or ordering of steps that are to be undertaken or how these are to be ordered or reported in the final report. Given the outline nature of the application I am satisfied that there is sufficient depth and detail of analysis of the site and context and how the scheme has taken these matters on board in reaching its proposed outcome. The illustrative master plan is also just that, illustrative as one way in which the scheme could come forward, and is not set in stone.
27. The Council's witness Mr Stock confirmed under cross examination that he accepted that there was sufficient information before the Inquiry to enable me to make a proper assessment of these matters. I am satisfied that the amended DAS, the proofs of evidence of the various witnesses, the additional information submitted during the Inquiry including APP 8, along with my visits to the site and surrounding area enable me to come to an informed conclusion on the effect of the development on the character and appearance of the surrounding area.
28. Launton is a category A larger village in the rural area of the district. Its historic form was based on a linear settlement pattern focused predominantly along Station Road and West End. There was some consolidation of built form around the cross roads created by Blackthorn Road and Bicester Road. There remain a number of historic buildings fronting primarily onto Station Road and West End with a scattering along Bicester Road and a number at the junction of Blackthorn Road and Station Road. The historic core and buildings are identifiable and visible along the main roads and it is from these vantage points that the visual contribution the historic buildings make is most readily apparent. To the north and west Launton has significantly increased in density, depth of development and form which readily detaches the historic linear form

³ Two High Court Decisions: Michael Jonathan Parker v Secretary of State for Communities and Local Government and Rother District Council and Peter Bull [2009] EWHC 2330 (Admin). & [2011] EWHC 2325 (Admin) the Queen on the application of Bizzy B Management company Limited v Stockton-on-Tees Borough Council v Python Properties (A Firm).

- of the village from the countryside and surrounding fields. Similarly to the south much of the physical relationship to the rural hinterland has been interrupted with more modern development.
29. The appeal site is located to the east and south of Station Road. The site is open fields. However the site is not readily appreciated or viewed from Station Road and there are limited views when the historic core and field pattern surrounding the village would be read in the same views. There have been some modern developments to the rear of these properties in Station Road including at The Green which further detaches the rural fields from the historic core of the settlement.
30. Approaching the village from the south along Blackthorn Road there is modern development on one side of the road up to the point where the entrance feature demarking the entrance to the village is located. On the opposite side of the road the land is also developed, in the form of a pumping station and water works. The proposed development would abut the built development of the edge of the village and provide for a significant area of retained open space. The site is reasonably well screened from the wider countryside, with significant areas of tree planting and hedge boundaries. In this regard I am satisfied that, designed with care, the proposed development would not be unduly assertive or excessively intrusive such that it would undermine the intrinsic character and beauty of the countryside at this location. A suitable layout arrangement could address Blackthorn Road in a manner consistent with the existing development fronting the road. The development would not, in my view, result in the appearance that the village boundary had appreciably extended into the open countryside as the development would be within the village entrance demarcation and would be well contained by landscape features.
31. The development is proposed with a single point of access. It would therefore be a cul-de-sac of some 72 units. The illustrative layout suggests this would be with a principle spine with roads off it. I saw a number of Culs-de-sac in the village. Whilst none contained as many dwellings as that proposed in this scheme, there were a number with a similar pattern (single point of entry and accesses off a central spine) and a comparable size, eg at Sherwood Close (57 properties) and Skinner Road and Ancil Avenue (46 properties). I do not consider that the scale of development would inevitably lead to an excessively complex road layout.
32. It is no part of the Council's case that the setting of individual listed buildings would be affected by the proposed development. Further, the Council does not object to the effect of the development on landscape character. The design and appearance of the buildings, the materials to be used, the layout of the scheme are all matters that would be considered at the reserved matters application. I have neither seen nor heard anything to suggest that a competent architect could not design a scheme that would be in keeping with its surroundings.
33. I am satisfied that the provision of a Cul-de-sac including development fronting Blackthorn Road could be made to reflect the character and appearance of the surrounding area and the village. There would be change, that is not in dispute; a field would be developed for housing but that would not in my view result in material harm to the character and appearance of the village. There is

no identified landscape harm and any residual impact can be addressed by condition, the reserved matters can ensure the design and appearance of the scheme is compatible with and reflects local distinctiveness.

34. For the reasons given above I conclude that the proposed development would not harm the character and appearance of the settlement of Launton and the surrounding area. Consequently the proposal would not conflict with policies ESD15 of Policy Villages 2 in the CLP 2031 (part 1) or policies C28 and C30 in the CLP 1996. The development would therefore comply with the development plan in these regards.

Planning Obligations

35. The appellant has provided a planning obligation in the form of a deed of agreement under section 106 of the Town and Country Planning Act 1990, Section 111 of the Local Government Act 1972 and section 1 of the Localism Act 2011.
36. Overall the Obligations of the agreement are related to requirements of development plan policies and are all necessary to make the development acceptable in planning terms. They are all, furthermore, directly related to the development, are fairly and reasonably related in scale and kind to the development, and are in place to mitigate the effects of the development where appropriate. The planning obligations therefore comply with the tests set out in the Framework, the advice in the National Planning Practice Guidance and with Regulation 122 of the CIL Regulations 2010 (CIL). There is no conflict with CIL Regulation 123(3).

Other matters

37. At the outset of the Inquiry in my opening I identified whether the Council can demonstrate a five year supply of deliverable housing sites as a main issue to address. I dealt with housing land supply as a discreet topic and conducted this as a hearing style discussion session. I have taken account of the latest Written Ministerial Statement in relation to Housing Land Supply in Oxfordshire. However, given my conclusions in respect of the main issues above, if I accept the Council's position on its Housing Land Supply, my overall conclusion would be that the proposals accord with an up-to-date development plan. They would therefore benefit from the presumption in favour of sustainable development under paragraph 11 c of the Framework. This overall conclusion would not change taking on board the governments WMS on Housing Land Supply in Oxfordshire. It is therefore not a matter on which my decision turns.
38. The proposed development would provide for market housing and affordable housing. The positive contribution to the supply and delivery of housing in the district given the Government's objective of significantly boosting the supply of homes (Framework paragraph 59) is a benefit of significant weight. The District has identified it has a high need for affordable housing. Securing the provision of affordable housing, through the planning obligation, therefore is also a significant positive benefit of the scheme.
39. The appeal scheme identifies a significant area of public open space the scheme would include details to enhance the biodiversity and conservation target area landscape qualities in the area. In this regard this would assist in fulfilling policy ESD11 and a minor benefit is derived from the scheme as a

result of the enhancements to biodiversity that could be secured through the development of the site.

40. The additional traffic generated by the proposed development would not result in material harm to highway safety. There is no objection from the Highway Authority and the design of the access has been accepted on the basis of the information submitted. There was no evidence to demonstrate that there would be significant inconvenience or hazard that would be caused by the proposed access location or the additional traffic that would pass through the cross roads in the centre of the village.

Conditions

41. A list of draft conditions was provided by the Council (CDC1) and updated during the Inquiry (CDC 6). I have considered the conditions in the context of the advice in the Planning Practice Guidance and the model conditions set out in the annex (which remains extant) to the otherwise now cancelled Circular 11/95, the use of conditions in Planning Permissions. A number of the suggested conditions are in effect informative or advisory indicating the content of future submissions under the reserved matters, or cover matters that fall squarely within the ambit of the reserved matters. Unless it is necessary to restrict the discretion of both applicant and local planning authority at this outline stage, I have not imposed such conditions, as the submission of details/reserved matters would be the subject of evaluation.
42. Conditions 1 to 3 are the standard outline conditions and there is no reason to vary these other than removing access as a reserved matter as that was the basis of the application. Conditions 4 through to 8 address matters related to access, parking and travel. They are required to ensure the development is satisfactorily accessed and that suitable parking provision (both car and cycle) is provided and maintained on site and to ensure that the site is accessible by a range of modes of transport.
43. Conditions 9 through to 11 are required to ensure that the development is safe from flooding and does not result in an increased risk of flooding elsewhere. Launton is not connected to mains gas. Conditions 12 and 13 are required to avoid an excessive proliferation of above ground fuel tanks that could compromise the design and appearance of the final development. It could be argued that this could be left to the reserved matters but it is an important design principle and the imposition of such a condition now will ensure this matter is properly addressed at an early point in the consideration of the design of the detailed scheme.
44. Condition 14 will ensure that adequate regard is paid to the potential for buried remains and condition 15 ensures that appropriate consideration is given to securing the biodiversity enhancements and on the basis of policy ESD11. A Construction Environment and Management Plan (condition 16) is required to ensure the site is safely accessed during development, to safeguard the living conditions of surrounding residents and to ensure the development is carried out in a neighbourly manner. The site includes previously developed land and conditions 18 through to 21 address the potential for the site to be contaminated and the necessary steps to be undertaken in the event contamination is encountered. Condition 22 requires the removal of an existing residential dwelling unit to ensure the satisfactory completion of the proposed development.

45. Conditions 4, 10, 11, 12, 14, 15, 16, 17, 18, 19 and 22 are 'pre-commencement' form conditions, or include such elements, and require certain actions before the commencement of development. In all cases the matters they address are of an importance or effect and need to be resolved before construction begins.

Overall conclusions

46. I have concluded that the proposed development would accord with the strategy and objectives of the CLP 2031 (part1) and that there would be no conflict with policies BSC1 or Policy Villages 1 or Policy Villages 2 in that plan in respect of the scale and location of the development. Moreover, I have concluded that there would be no material harm to the character and appearance of the village or the surrounding area and therefore no conflict with policy Villages 2 or ESD15 in the CLP 2031 (Part 1) or policies C28 and C30 in the CLP 1996. On this basis I conclude that the proposed development would be in accordance with the development plan as a whole and as such would amount to sustainable development in the context of paragraph 11 of the Framework for which there is a presumption in favour of.
47. Section 38(6) of The Planning and Compulsory Purchase Act 2004 requires that planning permission must be determined in accordance with the development plan unless material considerations indicate otherwise.
48. Even if I were to accept the Council's position in terms of its five year housing land supply, that there was a 5.4 year supply, that would not alter my conclusions in respect of the development plan, the presumption in favour of development or the section 38(6) position. The issue of housing land supply therefore is not determinant in this appeal.
49. The proposal accords with the development plan and there are no other material considerations that indicate a decision otherwise would be appropriate. The scheme benefits from the presumption in favour of development as set out in the Framework. I therefore will grant planning permission without delay.
50. With the imposition of the above mentioned conditions and for the reasons given above, I conclude that the appeal should be allowed.

- APP11 Certified copy of the planning obligation by deed of agreement
- APP12 Closing submissions on behalf of the appellant (including two attachments of cited court cases).

Schedule of conditions for appeal APP/C3105/W/17/3188671

- 1) Details of the appearance, landscaping, layout, and scale, (hereinafter called "the reserved matters") shall be submitted to and approved in writing by the local planning authority before any development takes place and the development shall be carried out as approved.
- 2) Application for approval of the reserved matters shall be made to the local planning authority not later than 3 years from the date of this permission.
- 3) The development hereby permitted shall take place not later than 2 years from the date of approval of the last of the reserved matters to be approved.
- 4) Prior to the commencement of the development hereby approved, full details of both means of access between the land and the highway, including, position, layout, construction, drainage and vision splays shall be submitted to and approved in writing by the Local Planning Authority.

The means of access shall also include:

- lengths of footway on the north side of Blackthorn Road in either direction from the site access
- two uncontrolled crossing points
- alterations to the existing traffic calming and village entry treatment

Thereafter and prior to the first occupation of the development, the means of access shall be constructed and retained in accordance with the approved details.

- 5) No dwelling shall be occupied until car parking space(s) to serve that dwelling have been provided according to details that have been submitted to and agreed in writing by the Local Planning Authority. All car parking shall be retained unobstructed except for the parking and manoeuvring of vehicles at all times thereafter.
- 6) No dwelling shall be occupied until cycle parking space(s) to serve that dwelling have been provided according to details that have been submitted to and agreed in writing by the Local Planning Authority. All cycle parking shall be retained unobstructed except for the parking of cycles at all times thereafter.
- 7) Prior to occupation of the first dwelling hereby approved, a Residential Travel Plan Statement shall be submitted to and approved in writing by the Local Planning Authority. Thereafter the Travel Plan shall be operated and reviewed in accordance with details to be included in the agreed Travel Plan Statement.
- 8) Travel Information Packs, the details of which are to be submitted to and approved in writing by the Local Planning Authority prior to first occupation of the development, shall be provided to every resident on first occupation of each dwelling.

- 9) The development permitted by this planning permission shall be carried out in accordance with the Flood Risk Assessment (FRA) Proposed Residential Development, Land off Blackthorn Road, Launton, Bicester, Oxfordshire by JPP Consulting Civil and Structural Engineers, Revision E, June 2018 R-FRA-T7866PM-01-E and the following mitigation measures detailed within the FRA:

- There shall be no built development within the 1% annual probability (1 in 100) flood extent with 35% allowance for climate change; and
- Finished floor levels will be located a minimum of 150mm above the predicted flood level.

The mitigation measures shall be fully implemented prior to occupation of the dwellings to which they relate and in accordance with the timing/phasing arrangements embodied within the scheme.

- 10) No development shall take place until a scheme for the provision and management of a minimum 10m buffer zone alongside the Launton Brook shall be submitted to and agreed in writing by the local planning authority. The development shall be carried out in accordance with the approved scheme. The buffer zone covered by the scheme shall be free from built development (including lighting), domestic gardens, footpaths and formal landscaping.

The scheme shall include:

- Plans showing the extent and layout of the buffer zone;
- Details of any proposed planting scheme (for example native species);
- Details of the timing and implementation of the scheme;
- Details demonstrating how the buffer zone will be protected during development and maintained over the longer term including proposed financing, the body responsible for management and production of a detailed management plan.

- 11) Prior to the commencement of the development hereby approved, a surface water drainage scheme for the site shall be submitted to and approved in writing by the Local Planning Authority. The scheme shall be based on sustainable drainage principles and an assessment of the hydrological and hydro-geological context of the development. . The scheme shall also include:

- Discharge Rates
- Discharge Volumes
- Maintenance and management of SUDs
- Sizing of features – attenuation volume
- Infiltration tests to be undertaken in accordance with BRE365
- Detailed drainage layout with pipe numbers

- SUDS (list the suds features mentioned within the FRA to ensure they are carried forward into the detailed drainage strategy)
- Network drainage calculations
- Phasing plans
- Flood routes in exceedance (to include provision of a flood exceedance route plan).

The scheme shall be implemented in accordance with the approved details

- 12) Prior to the commencement of development details of the services and energy infrastructure shall be submitted to and approved in writing by the local planning authority. The development shall be carried out in accordance with the approved details prior to the occupation of any dwelling hereby permitted.
- 13) Notwithstanding any provisions contained within the Town and Country Planning (General Permitted Development Order) 2015 (and any Order or Statutory Instrument amending, revoking or re-enacting that order), No above ground fuel tanks to serve the proposed development shall be provided unless with the prior written approval of the local planning authority.
- 14) An archaeological investigation shall be completed in accordance with a Written Scheme of Investigation which shall first be submitted to and approved in writing by the Local Planning Authority prior to any demolition on the site and the commencement of the development.
- 15) Prior to the commencement of the development hereby approved, including any demolition, and any works of site clearance, a method statement for enhancing Biodiversity on site shall be submitted to and approved in writing by the Local Planning Authority. Thereafter, the biodiversity enhancement measures shall be carried out and retained in accordance with the approved details.
- 16) Prior to the commencement of the development, a Construction Environment and Traffic Management Plan (CEMP), which shall include details of the measures to be taken to ensure construction works do not adversely affect residential properties adjacent to or surrounding the site together shall be submitted to and approved in writing by the Local Planning Authority. The CEMP will include a commitment to deliveries only arriving at or leaving the site between 0930 and 1630. Thereafter the development shall be carried out in accordance with the approved CEMP.
- 17) Prior to the commencement of the development hereby permitted a desk study and site walk over to identify all potential contaminative uses on site, and to inform the conceptual site model shall be carried out by a competent person and in accordance with DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11' and shall be submitted to and approved in writing by the Local Planning Authority. No development shall take place until the Local

Planning Authority has given its written approval that it is satisfied that no potential risk from contamination has been identified.

- 18) If a potential risk from contamination is identified as a result of the work carried out under condition 16, prior to the commencement of the development hereby permitted, a comprehensive intrusive investigation in order to characterise the type, nature and extent of contamination present, the risks to receptors and to inform the remediation strategy proposals shall be documented as a report undertaken by a competent person and in accordance with DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11' and submitted to and approved in writing by the Local Planning Authority. No development shall take place unless the Local Planning Authority has given its written approval that it is satisfied that the risk from contamination has been adequately characterised as required by this condition.
- 19) If contamination is found by undertaking the work carried out under condition 17, prior to the commencement of the development hereby permitted, a scheme of remediation and/or monitoring to ensure the site is suitable for its proposed use shall be prepared by a competent person and in accordance with DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11' and submitted to and approved in writing by the Local Planning Authority. No development shall take place until the Local Planning Authority has given its written approval of the scheme of remediation and/or monitoring required by this condition.
- 20) If remedial works have been identified in condition 18, the development shall not be occupied until the remedial works have been carried out in accordance with the scheme approved under condition 18. A verification report that demonstrates the effectiveness of the remediation carried out must be submitted to and approved in writing by the Local Planning Authority.
- 21) If, during development, contamination not previously identified is found to be present at the site, no further development shall be carried out until full details of a remediation strategy detailing how the unsuspected contamination shall be dealt with has been submitted to and approved in writing by the Local Planning Authority. Thereafter the remediation strategy shall be carried out in accordance with the approved details.
- 22) No development subject of this permission shall commence until the mobile home that is the subject of certificate of lawfulness 09/01814/CLUE dated 18 March 2010, and associated structures, have been removed from the site.

Ambrosden Application and Appeal Decision

NOTICE OF DECISION
TOWN AND COUNTRY PLANNING ACT 1990
(AS AMENDED)

Name and Address of Agent/Applicant :

Gladman Developments Ltd
Gladman House
Alexandria Way
Congleton
CW12 1LB

Date Registered: 28th November 2018

Proposal: OUTLINE - Erection of up to 84no dwellings with public open space, landscaping and sustainable drainage system (SuDS) and vehicular access point from Merton Rd - All matters reserved except for means of access

Location: Land North Of, Merton Road, Ambrosden

Parish(es): Ambrosden

REFUSAL OF PERMISSION FOR DEVELOPMENT

The Cherwell District Council, as Local Planning Authority, hereby **REFUSES** to grant planning permission for the development described in the above-mentioned application, the accompanying plans and drawings and any clarifying or amending information. **THE REASONS FOR REFUSAL ARE SET OUT IN THE ATTACHED SCHEDULE.**

Cherwell District Council
Bodicote House
Bodicote
BANBURY
OX15 4AA

Robert Jolley

**Assistant Director
Planning and Economy**

Date of Decision: 20th February 2019

Checked by: NS (Officer initials)

REASONS FOR REFUSAL

- 1 The development proposed, by reason of its scale and siting beyond the built up limits of the village, in the open countryside and taking into account the number of dwellings already permitted at Ambrosden as well as Cherwell District Council's ability to demonstrate an up-to-date five housing land supply, is considered to be unnecessary, undesirable and unsustainable development that would lead to an over concentration of new housing development in Ambrosden, which would undermine the housing strategy and prejudice a more balanced distribution of rural housing growth planned for in the Cherwell Local Plan (2011-2031) Part 1. Thus, the proposal is unacceptable in principle and contrary to Policy Villages 2 of the Cherwell Local Plan (2011-2031) Part 1 and Government guidance contained within the National Planning Policy Framework.
- 2 The development proposed, by reason of its siting beyond the built up area of the village to the south west of the village, excessive scale and poorly integrated relationship with existing built development, would cause local landscape harm and a significant amount of harm to the character and appearance of the countryside, as well as cause considerable harm to the character and appearance of the area and would fail to reinforce local distinctiveness. It would also result in 'less than substantial' harm to the significance of the Grade II* listed Church of St Mary and the harm stemming from the proposal is not considered to be outweighed by any public benefits. Thus, the proposal is contrary to Policies ESD13, ESD15 and Villages 2 of the Cherwell Local Plan (2011-2031) Part 1, saved Policy C28 of the Cherwell Local Plan 1996 and Government advice within the National Planning Policy Framework.
- 3 The Ecological Appraisal, by virtue of the lack of a sufficient biodiversity impact assessment, fails to provide acceptable detail as to whether a net gain in biodiversity can be achieved on the site. Furthermore, the Ecological Appraisal has not provided sufficient surveys in relation to Great Crested Newts therefore it has not been demonstrated that the development would not cause unacceptable harm to protected species. Thus, the proposal is contrary to Policy ESD10 of the Cherwell Local Plan (2011-2031) Part 1 and Government guidance contained within the National Planning Policy Framework.
- 4 In the absence of the completion of a satisfactory unilateral undertaking or any other form of Section 106 legal agreement, the Local Planning Authority is not satisfied that the necessary infrastructure directly required both on and off site as a result of this development, in the interests of: safeguarding public infrastructure, education provision, community facilities and indoor and outdoor sports facilities; mitigating highway safety concerns; encouraging use of sustainable modes of transportation; delivering mixed and balanced communities by the provision of affordable housing; and securing on site future maintenance arrangements will be provided. This would be contrary to Policy INF1, PSD1, SLE4, BSC3, BSC4, BSC9, BSC10, BSC11, BSC12, ESD1 and ESD15 of the Cherwell Local Plan (2011-2031) Part 1 and Government guidance contained within the National Planning Policy Framework.

NOTICE OF DECISION

TOWN AND COUNTRY PLANNING ACT 1990 (AS AMENDED)

STATEMENT OF ENGAGEMENT

In accordance with the Town and Country Planning (Development Management Procedure) (England) Order 2015 (as amended) and paragraph 38 of the National Planning Policy Framework, Cherwell District Council has given consideration to whether amendments or additional information would overcome its concerns with the application, but unfortunately it has concluded that it would not be possible to resolve those concerns within the scope and timescales of this application. Cherwell District Council has resolved that the application proposals do not amount to sustainable development and consent must accordingly be refused.

The case officer's report and recommendation in respect of this application is available to view online at: <http://www.cherwell.gov.uk/viewplanningapp>. The agenda, minutes and webcast recording of the Planning Committee meeting at which this application was determined 14 February 2019 are also available to view online at: <http://modgov.cherwell.gov.uk/ieListMeetings.aspx?CId=117&Year=0>.

NOTES TO THE APPLICANT

REFUSAL OF PERMISSION

The Local Planning Authority has refused consent for the reasons set out in the schedule forming part of this notice of refusal. A further explanation of the reasons for the decision can be found in the planning officer's report, which can be viewed in Public Access via the council's web site.

If you wish to examine any of the development plans which set out the Local Planning Authority's policies and proposals for the development and use of land in its area, these are available for inspection on our website, or at the District Council offices, Bodicote House, Bodicote, during normal office hours.

APPEALS TO THE SECRETARY OF STATE

If you are aggrieved by the decision of the Local Planning Authority to refuse the application you can appeal to the First Secretary of State in accordance with Section 78(1) of the Town and Country Planning Act 1990.

If you wish to appeal then you must do so within six months of the date of this notice. Forms can be obtained from the **Planning Inspectorate, Temple Quay House, 2 The Square, Temple Quay, Bristol, BS1 6PN. Tel 0303 444 5000.**

The Secretary of State can allow a longer period for giving notice of an appeal, but he will not normally be prepared to use this power unless there are special circumstances which excuse the delay in giving notice of appeal.

The Secretary of State need not consider an appeal if it seems to him that the Local Planning Authority could not have granted permission or approval for the proposed development, having regard to the statutory requirements, to the provisions of the development order and to any

directions given under the order.

In practice, the Secretary of State does not refuse to consider appeals solely because the Local Planning Authority based its decision on a direction given by him.

PURCHASE NOTICES

If either the Local Planning Authority or the First Secretary of State refuses planning permission or approval for the development of land, the owner may claim that he/she can neither put the land to a reasonably beneficial use in its existing state nor render the land capable of a reasonably beneficial use by the carrying out of any development which has been or would be permitted.

In these circumstances the owner may serve a purchase notice on the District Council. This notice will require the Council to purchase his/her interest in the land in accordance with the provisions of Part VI of the Town and Country Planning Act 1990.

COMPENSATION

In certain circumstances compensation may be claimed from the Local Planning Authority if permission is refused by the Secretary of State on appeal or on reference of the application to him.

These circumstances are set out in the Town and Country Planning Act 1990 as amended by the Planning and Compensation Act 1991.

Appeal Decision

Inquiry opened on 20 August 2019

Site visit made on 22 August 2019

by Philip J Asquith MA(Hons) MA MRTPI

an Inspector appointed by the Secretary of State for Housing, Communities and Local Government

Decision date: 9th September 2019

Appeal Ref: APP/C3105/W/19/3228169

Land at Merton Road, Ambrosden, OX25 2NP

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant outline planning permission.
 - The appeal is made by Gladman Developments Ltd against the decision of Cherwell District Council.
 - The application Ref. 18/02056/OUT, dated 26 November 2018, was refused by notice dated 20 February 2019.
 - The development proposed is the erection of up to 84 dwellings with public open space, landscaping and sustainable drainage system (SuDS) and vehicular access point from Merton Road. All matters reserved except for means of access.
-

Decision

1. The appeal is allowed, and outline planning permission is granted for the erection of up to 84 dwellings with public open space, landscaping and sustainable drainage system (SuDS) and vehicular access point from Merton Road. All matters reserved except for means of access, at land at Merton Road, Ambrosden, OX25 2NP in accordance with the terms of the application Ref. 18/02056/OUT, dated 26 November 2018, subject to the conditions in the schedule at the end of this decision.

Procedural Matters

2. The application was submitted in outline with all matters except for access to be reserved for future consideration. The application was supported by a Development Framework Plan¹ (DFP) which, it was confirmed at the inquiry, was for illustrative purposes only and which I have treated as such.
3. The Appellant submitted a Unilateral Undertaking (UU) under s106 of the Town and Country Planning Act 1990 (as amended) containing a number of planning obligations. As the awaiting of comments on this from the Council had prevented a signed version being submitted during the inquiry, I agreed to accept a completed UU within 14 days of its close. A signed and certified UU was duly submitted. I have taken the various obligations into account in arriving at my decision. These are discussed below.

¹ Drawing No. CSA/3888/103 Rev F

Main Issues

4. The Council refused permission for four reasons. The third reason related to the Council's concern that the Appellant's Ecological Appraisal had provided insufficient detail as to whether a net gain in biodiversity could be achieved by the proposed development. Further, it suggested that insufficient surveys had been carried out to demonstrate that the development would not cause unacceptable harm to Great Crested Newts, a protected species.
5. However, in its Statement of Case the Council indicated that its concern regarding a net gain in biodiversity could be dealt with by the imposition of a condition should planning permission be granted. Furthermore, the Appellant submitted to the Council additional survey information on Great Crested Newts, together with a mitigation strategy. A Statement of Common Ground (SoCG) between the Appellant and the Council confirms that the additional information submitted provides adequate detail to confirm that survey work has been completed and that the proposed mitigation strategy is adequate to meet Natural England's standard licensing requirements.
6. It is also agreed that the information submitted is adequate to confirm that the proposed development would not affect the favourable conservation status of the species and that with the application of the suggested mitigation methods a derogation licence from Natural England would be likely to be forthcoming. As a result, the Council agreed that the matters relating to the third reason for refusal had been resolved and that mitigation could be achieved through the imposition of a suitably worded condition.
7. As a consequence of the above and having considered all the evidence provided, I consider the main issues in this case to be:
 - whether the proposal would lead to an over-concentration of new housing development in Ambrosden which would undermine the Council's housing strategy and prejudice a more balanced distribution of housing growth, contrary to Cherwell Local Plan policy and policies in the National Planning Policy Framework (the Framework);
 - the effect of the proposed development on the character and appearance of the surrounding area and on the significance of the Grade II* listed Church of St Mary the Virgin through change in its setting; and
 - whether the proposal makes adequate provision for necessary infrastructure directly arising from its development.

Reasons

Development Plan

8. The relevant development plan comprises the Cherwell Local Plan 2011 – 2031 (Part 1) (CLPP1), adopted July 2015, and saved policies of the Cherwell Local Plan 1996. In regard to the latter, the only policy referred to within the reasons for refusal is Policy C28. Amongst other matters this seeks to ensure appropriate standards of layout, design and external appearance. These are matters of limited relevance in respect of an outline application when they are reserved for subsequent approval. On behalf of the Council it was accepted at the inquiry that reliance is no longer placed on this policy in respect of impact on character and appearance.

9. Having regards to CLPP1, it was also accepted by the Council's planning witness that only those policies referred to within the reasons for refusal are relied upon and that it can be assumed no conflict arises with other policies.
10. The spatial strategy for the district underpinning CLPP1 is to focus the bulk of proposed growth in and around Bicester and Banbury. Growth within rural areas is to be limited, with this being directed towards the larger and more sustainable villages and with development in open countryside being strictly controlled.
11. CLPP1 Policy Villages 2 (PV2) concerns the distribution of growth across the district's rural areas. It indicates that a total of 750 homes will be delivered at Category A villages². This is in addition to the rural allowance for small site windfalls and planning permissions for 10 or more dwellings that existed as at 31 March 2014. Category A villages are 'Service Centres' listed under Policy Villages 1. These are considered to be the most sustainable villages, of which Ambrosden is one, which offer a wider range of services and are well connected to major urban areas, particularly by public transport.
12. In considering sites under this policy particular regard is to be given to a list of 11 specified criteria. Amongst these are: whether the land has been previously developed or is of lesser environmental value; whether significant adverse impact on heritage or wildlife assets could be avoided; whether development would contribute in enhancing the built environment; whether significant adverse landscape impact could be avoided; and whether the site is well located to services and facilities³.
13. Under Policy ESD 13 development will be expected to respect and enhance local landscape character, securing appropriate mitigation where damage to local landscape character cannot be avoided. Proposals will not be permitted if, amongst other matters, they would cause undue visual intrusion into the open countryside, be inconsistent with local character, or harm the setting of settlements, buildings, structures or other landmark features. Policy ESD 15 indicates that new development will be expected to complement and enhance the character of its context through sensitive siting, layout and high-quality design.
14. The Council's fourth reason refusal referred to the absence of satisfactory obligations under s106 to secure a range of necessary infrastructure. It consequently listed a range of CLPP1 policies with which the development would conflict, and which aim to secure satisfactory provision in respect of matters such as affordable housing, public services / utilities, open space and recreation facilities, contributions to mitigate transport impact and adaptation measures to ensure more resilience to climate change. The Council accepts that the proffered s106 UU now addresses these matters.
15. The Cherwell Local Plan Part 1 Partial Review aims to help satisfy the unmet housing needs of Oxford over the period 2011 – 2031. This was submitted for Examination in March 2018 and hearing sessions into the Review were held in February 2019. It sets out policies to achieve the delivery of an additional

² The accompanying text to the policy makes it clear that this quantum would be made up from sites for 10 or more dwellings

³ It is only these particular criteria with which the Council considers that the proposal would conflict

4,400 dwellings within Cherwell district, with allocations being made as close to Oxford as possible. At the time of the inquiry no formal report on the Examination had been issued although the Inspector's preliminary conclusions support the 4,400-figure to be accommodated within Cherwell. There is agreement between the Appellant and the Council that the part of the district within which Ambrosden is situated is unaffected. The Appellant considers that the emerging Partial Review sits alongside, rather than interfering with, the CLPP1 strategy for the district.

First reason for refusal - housing strategy and distribution of housing growth

16. The 750 homes figure for Category A villages is a component of the overall provision made by CLPP1 Policy BSC1 to meet the district's housing requirement of 21,734 between 2014 and 2031⁴. The Council contends that it can demonstrate both a three-year and a five-year supply of deliverable housing land within the district. This is not contested by the Appellant for the purposes of this appeal⁵.
17. The overall housing strategy of the CLPP1 is to rebalance growth to concentrate it within Bicester and Banbury. In crude terms the strategy seeks to provide for about three quarters of new dwellings over the plan period in the two towns. This compares with a proportion of about half in the period leading up to the plan's adoption when the other half had taken place in smaller settlements, adding to commuting by car and road congestion at peak times.
18. The Appellant notes that if up to 84 dwellings were to be provided on the appeal site this would represent less than 0.4% of the district's requirement over the plan period. If the proposed scheme were to be added to the stock of planning permissions recorded in the Council's Annual Monitoring Report, some 82.7% of permissions identified would be in Bicester and Banbury (the figure being 82.2% if added to the stock of permissions identified in the Council's 2019 update).
19. The Council's table of the district's residential completions and planning permissions from 2011 to 31 March 2019 (with a baseline of the latter date) records that, of the 14,170 dwellings built or permitted, some 27% were in the 'rest of the district' with 73% located in the towns of Bicester and Banbury. The Council accepts that the overall strategy of the plan to deliver most housing to Bicester and Banbury is currently succeeding.
20. The Council's evidence notes that the totals of completed dwellings under PV2 (271) and those benefitting from permissions (479) add up to the 750-figure sought under the policy. It is not claimed there would be a current breach of the policy (since only 271 have been *delivered*). However, granting permission for up to 84 dwellings, which would be likely to be built out within a short time, together with the other 479 committed and deliverable dwellings, could give rise to a total of 834 dwellings being delivered several years prior to 2031, the end date of CLPP1.
21. There is agreement that the 750-figure is not a ceiling or cap. However, the Council has referred to previous appeal decisions where PV2 has been engaged.

⁴ The provision for the 'rest of the district' outside Bicester and Banbury is a total of 2,350 which is made up of the 750 plus the specific allocation of 1,600 at the former RAF site at Upper Heyford

⁵ SoCG on spatial strategy, August 2019

The Inspector in dismissing an appeal for up to 95 dwellings in Kirtlington in 2015 noted that "... any significant increase over and above 750 could lead to unconstrained growth which would result in non-compliance with the strategy for rebalancing housing growth away from the villages and rural areas"⁶. This was a conclusion shared by the Inspector dismissing an appeal for 26 dwellings at Weston on the Green⁷.

22. In granting permission for a housing development in Launton⁸ in September 2018, the Inspector noted that 750 was not an upper limit and that it would require a material exceedance to justify arriving at a conclusion that the policy was being breached. The Council considers that the addition of 84 dwellings would be a material exceedance of the 750, would therefore be contrary to PV2 and would weaken the strategy of the strong urban housing focus of the plan.
23. I am not convinced by the evidence provided by the Appellant's planning witness that the 750-figure has no development management significance. The Inspector determining the appeal against a residential development for up to 51 dwellings in Chesterton considered the use of figure of 750 in PV2 must have some form of constraining effect on total numbers, otherwise the policy would be meaningless in terms of its contribution towards the overall strategy of the plan⁹. Nevertheless, neither within Policy PV2 itself nor within CLPP1 as a whole is the term 'material exceedance' found. Even if to exceed the 750-figure by 84 units now at a point less than halfway through the CLPP1 plan period was to be regarded as a material exceedance, the question arises what planning harm would arise from such a breach? This is bearing in mind that such a quantum of housing would not be *delivered* until later in the plan period.
24. Policy PV2 does not contain any temporal dimension in that it does not specify when during the plan period housing should be delivered, nor does it contain any phasing element. Similarly, other than relating to Category A villages, the policy has no spatial dimension.
25. A concern of the Council is that to allow an exceedance of the magnitude envisaged could lead to unrestrained growth in Category A villages, although it was acknowledged at the inquiry that a precedent argument was not being advanced. However, I accept that there is force in the point advanced by the Appellant that the specific management criteria of Policy PV2 would seem to ensure that it is a self-regulating policy; if the point is reached where the number of dwellings granted in Category A villages is likely to undermine the Council's overall spatial strategy, a series of planning harms is likely to emerge. These might include the point where local infrastructure is unable to cope, land of higher environmental value is sought, or out-commuting and traffic congestion manifest themselves.
26. Further concerns of the Council are that allowing the proposal would lead to an over-concentration of development in Ambrosden and a disproportionate share of the PV2 housing provision. Existing recent housing developments in the village (Church Leys Farm and Ambrosden Court) permitted under Policy PV2

⁶ CD 6.03, APP/C3105/W/14/3001612, para 9. (The CD references are to Core Documents submitted for the inquiry)

⁷ CD 6.05, APP/C3105/W/16/3158925, para 17

⁸ CD 6.07, APP/C3105/W/17/3188671, para 18

⁹ CD 6.04, APP/C3105/W/15/3130576, para13

amount to 129 units, which is 17% of 750¹⁰. If allowed, the proposal would represent a 25% share of the increased total of 834.

27. In an appeal decision on a 54-dwelling proposal in the Category A village of Hook Norton, acknowledged as a relatively sustainable location, the Secretary of State took the view that it would be acceptable for the village to provide a relatively larger share of the 750 dwellings than the other villages listed in PV2¹¹. There are some 23 Category A villages which display a wide range of populations, facilities and locations. Whilst the Council categorises these as the more sustainable settlements it is apparent that, comparatively, some settlements are clearly more sustainable than others.
28. Ambrosden is by population the fifth largest Category A village, with a population of in the region of 2,250¹². It benefits from a range of services including pre-school nurseries, primary school, food shop, post office / general store, village hall, two churches, hairdresser's, public house, recreational facilities and a limited opening doctor's surgery¹³. It is some 4.6km from Bicester, has two bus services through the village which connect to Bicester and Oxford, the more frequent S5 providing an hourly service through the week and on Saturdays. An off-road cycle path links the village with Bicester.
29. The CLPP1 allocates a considerable amount of land for employment uses on the southern and south-eastern outskirts of Bicester between the edge of the town and Ambrosden, with some development already in place. Whilst these areas are beyond what could be regarded as realistic daily walking distances for most people, they are within ready cycling distances. I address the more specific locational considerations of the appeal site in relation to village services and facilities below.
30. By comparison with the location and the range of facilities available in many of the other Category A villages, Ambrosden is one of the most sustainable settlements. There is agreement between the Appellant and the Council that this is the case. It is therefore unsurprising that recent housing schemes within the village have been permitted. On this basis, and against a background of no spatial apportionment of additional housing between Category A villages, and the intent of Policy PV2 that development should be enabled in the most sustainable locations, further development of the nature proposed would not be disproportionate.
31. The Council has expressed concern that allowing the proposal and exceeding the PV2 750-figure would make it more difficult for other Category A settlements to meet local housing needs within the second half of the plan period. However, no evidence has been provided as to the level of specific local housing need in any of the villages within the district and need is not disaggregated across different settlements. Policy PV2 does not contain a requirement to demonstrate a local housing need. Furthermore, should specific needs within villages be identified, Policies PV1 and PV3 would be relevant considerations to cater for this. Policy Villages 1 allows development within the built-up limits of villages, whilst PV3 provides for meeting specific identified

¹⁰ In addition, there is an 89-unit development at Springfield Farm that was permitted prior to 31 March 2014

¹¹ CD 6.13, APP/C3105/A/14/2226552, decision letter para 12

¹² This was a 2014 figure, so with more recent housing development in the village the figure is now likely to be higher

¹³ Evidence at the inquiry suggested that this was to close

housing needs through small-scale affordable schemes within or immediately adjacent to villages. The proposed scheme need not therefore pose any undue constraint on other villages to meet any specific or identified housing needs.

32. I have carefully noted views expressed by colleague Inspectors in the various appeal decisions to which reference was made during the inquiry. None of these decisions was made at a time when the 750-figure of delivered and committed dwellings had been reached. Concerns have been expressed in some decisions as to the possibility of contributing to unconstrained growth, as already noted¹⁴. But these decisions were made in the context of what were then hypothetical situations where the 750-figure might be breached.
33. I have not been privy to the evidence on which their decisions have been based, some of which were several years ago when the CLPP1 was in its very early years. It is not clear whether the decisions were informed by the examination of arguments which have been advanced in respect of the present proposal. Having regards to the detailed evidence provided in the present case, and for the reasons set out above, I do not consider that the Council has demonstrated how in its own right allowing the appeal would lead to the undermining of the Council's overall housing rebalancing strategy contrary to the intent of Policy PV2. The purpose of limiting growth within the rural 'rest of the district' is not an end in itself but is intended to ensure delivery of the rebalancing strategy of an urban focus of new development in Banbury and Bicester. I find that agreeing to the proposal need not make the maintenance of its strategy materially more difficult.
34. Part of the CLPP1's spatial strategy is to strictly control development in the open countryside. However, current national policy within the Framework does not couch protection of the countryside in terms of 'strict control'. It is also clear, and accepted, that in applying Policy PV2 locations on the edge of Category A villages would be used and are therefore likely to be in open countryside locations. I consider that should a proposal satisfy Policy PV2, if there was any inconsistency between it and one of the Council's objectives, such as strict protection of the countryside (which in itself could be considered to not be on all fours with the Framework's absence of a blanket protection of the countryside), the policy should take precedence. This was a point conceded by the Council.
35. Overall, I consider the proposal would not materially undermine the Council's housing strategy or prejudice the achieving of a more balanced housing growth.

Second reason for refusal

a) Character and appearance

36. The appeal site extends to about 4.12ha comprising part of a grassed field used for hay-making located at the south-western edge of Ambrosden. Whilst somewhat irregularly shaped, it has a hedged frontage to Merton Road from which vehicular and pedestrian access would be taken. To its north it has a short boundary with a densely vegetated low embankment to a railway line running from Bicester to the Ministry of Defence depot at Arcott. It is

¹⁴ For example CD 6.03, APP/C3105/W/14/3001612 and CD 6.05, APP/C3105/W/16/3158925

bounded to its north-eastern side by a residential curtilage and by paddocks, whilst reedy remnants of ponds associated with the former Ambrosden Hall, and further agricultural land, lie to the north-west.

37. Amongst the criteria of CLPP1 Policy PV2 to which particular regard should be given in assessing development in villages such as Ambrosden is whether significant adverse landscape impacts can be avoided. This recognises some development on the countryside edge of settlements is likely to be necessary. It is axiomatic and almost inevitable that some harm will result from the change from open countryside to built development.
38. The application was accompanied by a Landscape and Visual Impact Assessment (LVIA). Within the context of the appeal the Appellant's landscape witness carried out her own assessment of the landscape and visual effects of the proposal to be read in conjunction with the LVIA. Additionally, in respect of the appeal, the Ambrosden Parish Council commissioned its own review of the original LVIA. I have had regard to all these together with the evidence produced on behalf of the Council.
39. In terms of landscape character, the appeal site lies within the Clay Vale Landscape Character Type¹⁵, and the Clay Vale of Otmoor as defined in the Cherwell District Countryside Design Summary¹⁶. The site is part of what was originally parkland associated with the demolished Ambrosden Hall. The sinuous area of reed and marshy land to the immediate north-western side of the site is the remnant of former parkland ponds. However, the historic and landscape connections and appearance of parkland have long since disappeared and in my view the appeal site does not possess any readily perceptible associated landscape or visual qualities. The site is not subject to any statutory or non-statutory designations for landscape character, quality or value. It is part of a pleasant but unremarkable rural landscape.
40. The Council suggests that development on the site would conflict with the criterion of PV2 relating to the consideration of whether the land is previously-developed or is of lesser environmental value. It is not previously-developed and the term 'lesser environmental value' is a relative one. The Appellant suggests that reference to 'lesser environmental value' was plainly aimed at plan-making where a comparative exercise could be undertaken. However, as the CLP Part 2 does not exist such an exercise is not possible. By reason of the site's absence of specific landscape quality designations, and not being Best and Most Versatile agricultural land, it is reasonable in the present context to consider it as land of comparatively lesser environmental value.
41. The proposal, in whatever eventual form it might take, would clearly have a completely transformative effect on the site itself by reason of the introduction of residential development and its associated components into a currently open field. However, I have no reason to disagree with the view of the Council's landscape witness who concurred with the Appellant's LVIA assessment that the landscape character of the site and surrounding area has a medium sensitivity, as does the townscape of the adjoining area. Further, the effect of the proposal on landscape and townscape character of the surrounding area would be 'moderate adverse' on completion. There would be potential for this

¹⁵ Oxfordshire Wildlife and Landscape Study

¹⁶ Supplementary Planning Guidance, June 1998

- to decrease by year 15 with the maturation of landscaping and the weathering of the built development.
42. In terms of the landscape and visual impact evidence produced at the inquiry, the Council's concern centred on the visual aspects of the proposal. There is agreement as to the selection of viewpoints used within the LVIA. The relatively low-lying and well vegetated landscape near the site means that views are generally limited when seen from far- and middle-distance locations. Impact on the few possible far- to middle-distance views from the south would be negligible. Impact on views from closer at hand along bridleway 295/4, about 1.5km to the south-east, would in my judgement be only slightly adverse. This is as a result of distance, existing vegetative screening, that which could be incorporated into the development, and the already present appearance of roofscapes of dwellings within the village¹⁷.
43. From along footpath 295/7, about 500m to the south-west, oblique views are possible across the site over field hedging for a length of about 80m. There are current views of the tower of St Mary's, which is seen in conjunction with the roofscape of housing. Although at the detailed design stage it may be possible to retain views of the church, the extension of built development closer to the viewer would, in my opinion, result in a moderate adverse impact even at year 15.
44. When approaching Ambrosden from the south-west along Merton Road the site is screened by existing vegetation almost until it is reached, when there are direct oblique views across it. The DFP suggests the incorporation of a sustainable drainage system (SuDS), open space and a children's play area towards the site's frontage which would serve to maintain views of the tower of St Mary's from the road. There would be substantially adverse impacts on views in the early stages of development until landscaping matured and the proposal became assimilated.
45. There would be impacts for residential receptors in Jasper Row to the opposite side of Merton Road who currently have views across the open farmland. However, separation and detailed design could ensure that, other than alteration of views for private individuals, there would be no detriment to overall living conditions.
46. The development would result in a significant extension of the village to its south-western side beyond the single-track railway line that crosses Merton Road via a level crossing, pushing the built edge further into the open countryside. It is certainly the case that the part of Ambrosden to the south-western side of the railway line is currently less developed than the main body of the village.
47. However, from my site inspections it is my view that the railway line does not represent a clear physical or visual demarcation or barrier that suggests further development beyond it would be ill-related or poorly connected to the overall village structure. Housing that presently exists to the south-western side of the line clearly has the appearance and feel of being an integral part of the village, with the railway line not forming a disjointing element. There has been the recent in-depth development of Ambrosden Court to the southern side of

¹⁷ Impact on views of the Church of St Mary the Virgin in terms of its setting are considered below

Merton Road and a recent permission for an additional five dwellings to the rear of Home Farm Close.

48. I am mindful of the comments of the Inspector who determined the appeal against the refusal of permission for the Ambrosden Court development¹⁸. In his decision allowing the appeal (which concerned an application that was in outline) he expressed the view that the proposal would cause a moderate amount of harm to the appearance and character of the countryside, and some local landscape harm. The Council subsequently approved the appropriate reserved matters and the development has been completed.
49. The development clearly appears as a new element in respect of which weathering and nascent landscaping have not had chance to soften its impact. Nonetheless, I consider Ambrosden Court has now to be viewed as an existing, appropriate and acceptably-designed component of the village. I have no reason to suppose that the Council would not be able to exercise similar appropriate control over the details of layout, overall design and landscaping for development on the appeal site. In this regard the Parish Council has criticised the nature of the landscaping as shown on the Appellant's FDP. However, this plan is for illustrative purposes only and as landscaping is a reserved matter the Council would have control over this should the development proceed.
50. In my view, the village is now as much defined in terms of its character by the development that has taken place in the second half of the 20th century and that which has occurred very recently. This is largely estate housing that has spread out from the historic village core near the Church of St Mary the Virgin. In terms of scale and nature, a development of up to 84 dwellings, complemented by appropriate landscaping and open space, would not be at odds with the overall character of the village. This is particularly bearing in mind the recent approvals at Springfield Farm (89 dwellings), Church Leys Farm (85 dwellings) and Ambrosden Court (45 dwellings).
51. The Council suggests that the abrupt and stark transition from what is described as an 'urban' to a rural environment at the south-western end of the village is part of local distinctiveness. I am not convinced that this is a particularly beneficial characteristic that necessarily needs to be respected by new development or one which would be undermined if the proposal went ahead. Nor do I consider that Ambrosden possesses any other particular individual element of distinctiveness with which the proposed development would materially conflict. Through detailed control, the opportunity exists to provide a development with an appropriate and fitting layout, appearance and landscaping.
52. I do not share the Council's concern that if developed in accordance with the illustrative DFP, with the likely set back of housing from Merton Road (to accommodate the SuDS, play area and the maintenance of views of St Mary's Church tower), this would be an uncharacteristic feature. It may not be a current feature of development to the south-western side of the railway line. Nonetheless, the set back of residential development behind open space is clearly an established element within Ambrosden as a whole and its replication therefore would not be an overtly alien feature.

¹⁸ CD 6.02, APP/C3105/A/13/2206998

53. The proposal includes both a vehicular and a separate pedestrian access from the site onto Merton Road, and the Council considers the site would have poor connectivity with the village. It is the case that all car, pedestrian and cycle traffic would be funnelled onto Merton Road to access the rest of the village and its facilities. There would be a need to provide improved footpath linkage from the site to the village. It is also suggested that a footpath could be provided to the south-west to link the site with the existing public right of way 295/7. This is considered further below. Through detailed design I have no reason to suppose that acceptable levels of permeability within the site itself could not be achieved. In general, I do not consider the degree of connectivity of the site represents a significant drawback of the scheme.
54. Overall, I conclude that whilst inevitably rendering localised change the proposal, subject to subsequent careful attention to layout, design, external appearance and landscaping, would not have any significant adverse impact on the character and appearance of its surroundings. Opportunity would exist to provide an acceptable, fitting and suitably mitigated development that could contribute positively to this entrance to the village. As such, it would not conflict with these relevant criteria of Policy PV2 to which particular regard should be given. Nor would there be conflict with Policies ESD 13 or ESD 15.

b) Impact on the significance of the Church of St Mary the Virgin

55. It is an agreed position that the Grade II* listed church is the only heritage asset which has the potential to be impacted upon by the proposed development. The church, dating in parts from the 12th, 14th and 15th centuries with restoration in the 19th, is stone-built with a three-stage tower to its western end. The proposed development would have no direct effect upon the church, being separated from it by over 300m. There would be no change in the experience and appreciation of the church from within its surrounding churchyard or from within Ambrosden.
56. However, it is an agreed position between the Appellant and the Council that there would be an impact on its significance as a result of change in its setting by reason of alterations of views of its tower from the south-west. There is further agreement that the proposal would result in less than substantial harm to the church's significance; the Council considering the harm to be minor whereas the Appellant considers the degree of harm to be very minor.
57. I consider that the heritage significance of the church derives principally from the architectural and historic interest of the physical fabric of the asset and the evidential, historic and aesthetic value contained as an example of a church originating in the early medieval period.
58. The church tower provides a landmark feature within the rural landscape. The Council considers its visibility reflects the social importance of religion in times past and the manner in which local communities used a prominent church tower to mark their presence in the landscape. At present there are clear views of the tower across the grassed appeal site when viewed from Merton Road on the approach to the village. It is also seen, as already noted above, from a limited stretch of footpath 295/7 to the south-west and, more distantly, from the bridleway 295/4. Whilst the agricultural surrounds to the village have some historic associative connection with the church, these connections are no longer discernible and make only a very minor contribution to the historic, evidential and aesthetic value of the heritage asset via setting.

59. The tower is currently seen rising above and between rooftops of housing to its western side and these comprise a major element of its setting, which has changed over time. The planning permission for five dwellings to the rear of Home Farm Close would introduce an additional foreground residential element. In order to maintain views of the tower on the approach into Ambrosden the FDP suggests the setting back of residential development within the site to form a visual corridor. This would be achieved through the imposition of a condition to ensure that this was secured at the reserved matters stage. Detailed design may also allow the positioning of dwellings to maintain some views from footpath 295/7.
60. I accept that the proposal would result in a more 'channelled' view of the church tower from Merton Road and this would be across a more developed foreground. However, any change that would be wrought would relate more to impact on its landmark significance rather than the heritage significance of the asset. I consider that the proposed development would result in a very minor impact on the overall heritage significance of the church as a result in change in its setting. Having regards to the Framework, this amounts to less than substantial harm and in my judgement would be at the lowermost end of less than substantial harm. In accordance with Framework paragraph 196, where there would be less than substantial harm this should be weighed against the public benefits of a proposal. This is carried out below in the overall planning balance and conclusions.

Third reason for refusal - whether the proposal makes adequate provision for necessary infrastructure directly arising from its development

61. The signed s106 UU by the Appellant and landowners provides obligations to both the Council and to the County Council. Those to the Council include the provision of contributions towards: the extension / enhancement of Bicester Leisure Centre and the expansion and / or upgrade of the Whitelands Farm Sports Ground at Bicester; the improvements / expansion of the existing community facilities at Ambrosden Village Hall or towards the development of Graven Hill Community Centre; and waste and recycling bins for each dwelling. A further obligation would secure a scheme for the establishment of a Management Company Structure to be approved by the Council for the purposes of managing and maintaining the proposed open space and SuDS within the appeal site.
62. The UU secures the provision of 35% of the dwellings as affordable units through the need for the agreement of an Affordable Housing Scheme. This would include details of numbers, type, tenure, location and phasing of the housing, the arrangements for the transfer of the affordable housing to a Registered Provider, arrangements to ensure the provision is affordable for both first and subsequent occupiers, and allocation arrangements.
63. Provision is made to ensure that either a Biodiversity Offsetting Scheme is agreed and implemented or that a Biodiversity Contribution is paid. The former would be a scheme to ensure the development does not result in any biodiversity loss and would include a management plan for the provision and maintenance of offsetting measures for not less than 30 years. The latter would be towards the costs of enhancement and long-term biodiversity within the vicinity of the site.

64. Obligations to the County Council include the payment of financial contributions towards: improvement of the bus service between Oxford and Bicester, including increasing the frequency of service; capacity enhancement of the junction of Ploughley Road and the A41; the expansion of permanent capacity at the Five Acres Primary School in Ambrosden; and the costs of monitoring the Travel Plan, which is to be submitted pursuant to an attached condition, and the other obligations to the County.
65. The Council has submitted a compliance statement in respect of the obligations, which includes an appended compliance statement from the County Council. I am satisfied that the above obligations are necessary to make the development acceptable in planning terms. They are all directly related to the development, are fairly and reasonably related in scale and kind to it and are designed to mitigate the development where appropriate. The obligations therefore comply with the requirements of Regulation 122(2) of the Community Infrastructure Levy (CIL) Regulations 2010 (as amended) and comply with the tests set out in paragraph 56 of the Framework and advice in National Planning Practice Guidance.
66. The Council's compliance statement notes that the Council's Developer Contributions Supplementary Planning Document expects residential development to contribute towards the provision of additional health care infrastructure generated by population growth where there is insufficient existing capacity, well located to serve the development. At the inquiry local concern was expressed about the future of the currently-limited opening of the doctors' surgery in Ambrosden. However, whilst the Oxfordshire Clinical Commission Group was consulted on the application, no comments were received from it. The Council indicates that, as such, it could not justify a request for contributions towards health care infrastructure in the locality.
67. The UU also includes a contribution of £40,000 towards the cost of provision of a footpath link between the appeal site and footpath 295/7 to the south-west of the site. This is to improve the site's connectivity to the existing public rights of way network, and countryside generally, for recreational purposes given that there is no existing footpath linkage alongside Merton Road from Ambrosden.
68. The County Council considers such a contribution fulfils the CIL tests. Cherwell Council considers this not to be the case. It is concerned that there are too many uncertainties regarding its delivery (given the 400m - 500m length of connection, the possible need for third party land, and the possible need for planning permission, which might be resisted because of fears of 'urbanisation'). Whilst I acknowledge these concerns, in the context of the appeal the Council has expressed concerns generally about the appeal site's connectivity.
69. In my view, the proposed link would be a necessary element to promote walking and recreational activity for occupiers of the proposed development. It would accord with the Framework's exhortations to improve sustainable modes of transport and recreational access. As such, I have taken this obligation into account and it too fulfils the requirements of the CIL regulations.
70. Given the above, I am satisfied that the proposal makes adequate provision for the necessary infrastructure arising from its development.

Other matters

71. Having regards to the site's location in relation to services and facilities, there is agreement between the Appellant and the Council that it is within walking distance of local facilities in what is a sustainable settlement. However, the Council's planning witness suggests that it is not *well* located as per the relevant criterion in Policy PV2. It is my view that certain facilities are within what, for most, would be ready and reasonable walking distances of the site (post office, hairdresser's, village hall, public house, parish church), whilst others are more distant but easily cyclable.
72. Walking distance from the centre of the appeal site to the nearest bus stops on Ploughley Road (to gain access to a wider range of services, facilities and employment) would be about 800m. However, the walk is level and through a generally pleasant village environment (as opposed to a potentially busier urban one where reasonable walk distances are generally assumed to be lower) that would make use of the bus a not unrealistic option as an alternative to use of the car. The proposal includes provisions to promote sustainable travel. These include the commitment to improve the footpath which would link the development back into the village, a contribution towards bus services, the provision of a Travel Plan and electric vehicle charging infrastructure. Overall, I consider the proposal to be in general compliance with the relevant PV2 criterion.
73. Traffic and transport-related matters did not form part of the Council's reasons for refusal, other than in regard to the absence of a mechanism for securing mitigation and the encouragement of use of sustainable modes of transport. However, these issues were a concern of the Parish Council and a number of local residents who submitted representations.
74. In response to detailed criticisms made on behalf of the Parish Council, the Appellant produced a Technical Note response. The Appellant's transport consultant also attended the inquiry to answer queries and requests by the Parish Council in respect of highways matters. The County Council, as highway authority, has reviewed both the details submitted with the original application, which included a Transport Assessment, and the Technical Note response. This resulted in the conclusion of a SoCG with the Appellant in which it is agreed that all transport and highways matters have been addressed and resolved. A separate SoCG with Cherwell Council also confirms the proposal would have no adverse impact on the safe and efficient operation of the highway network, subject to suitable conditions and obligations.
75. A particular raised concern is the nature of the footpath link along Merton Road into the village. The application plans provide for the footway to be extended from the site to join that existing adjacent to No. 66 Merton Road. The existing footpath to the northern side of Merton Road is of variable quality in terms of surfacing and width. However, as a result of the relatively low pedestrian flows along it, together with those which would be generated by residents of the proposed development, this is not an issue raised by the highway authority.
76. Nonetheless, as pointed out by certain residents, and as I saw on my visits, there exists a narrowing 'pinch point' in the footway adjacent to Holly Tree Cottage caused by the presence of telegraph poles. There is concern that these present difficulties for those with mobility aids and for pedestrians with pushchairs or prams.

77. In accordance with condition No. 12 attached to the permission Ref. 13/00621/OUT¹⁹, a scheme for their removal should have been submitted to the Council and should have been implemented prior the occupation of dwellings on what is now the completed Ambrosden Court development. The Council confirmed at the inquiry that this matter was the subject of enforcement investigations. This would seem to be the likely means by which this matter could be resolved. However, a similar condition to that which was imposed on the above permission could be included on a permission for the present proposal, subject to there being no necessity for a scheme for removal if this had already occurred prior to first occupation.
78. From the detailed evidence provided and subject to the provisions of the s106 UU, and the imposition of appropriate conditions discussed below, I have no reason to conclude differently to either the Council or the local highway authority that the proposed development would be acceptable in terms of highway capacity and safety.
79. Potential flooding and drainage issues are other matters of concern that have been raised by local residents. The application was accompanied by a detailed Flood Risk Assessment. A further Technical Note on flood risk and drainage issues was produced in the context of the appeal. A SuDS drainage scheme is proposed to manage excess runoff from the development and maintain runoff to pre-development rates, with surface water attenuation provided to accommodate a 1 in 100-year event plus 40% climate change allowance. Subject to appropriate mitigation the proposed development would be at minimal risk from flooding and would not increase flood risk elsewhere. The Council has agreed in a SoCG with the Appellant that drainage matters are capable of being controlled via approval of reserved matters, by condition and / or via planning obligations. I have no reason to disagree.
80. Concerns have been raised regarding increased light pollution. The Council's Environmental Health Officer has raised no objections to the proposal. A suitable condition could require the provision of an appropriate lighting design at the reserved matters stage. This could ensure that not only is extraneous light minimised but also that it would not be harmful to the local bat population.
81. I have noted the synopsis of the survey results amongst village residents carried out by the Parish Council. However, there is no detail as to who the respondents were and to what extent they are representative of the village population. The response rate of 66 is relatively low and not indicative of widespread concern about the proposal.

Conclusions and the planning balance

82. In terms of the Council's housing strategy and distribution of housing growth there would be no conflict with the thrust and intent of Policy PV2. There would be some limited degree of landscape and visual impact resulting from the transformative nature of development on this edge of settlement site. However, the proposal would not cause undue visual intrusion into the open countryside, would not be inconsistent with local character, or harm the setting of Ambrosden. It would therefore not conflict with Policy ESD 13. Control that

¹⁹ CD 6.02, APP/C3105/A/13/2206998

- could be exercised at the reserved matters stage could ensure there should be no conflict with Policy ESD 15.
83. Less than substantial harm would result to the significance of the listed church of St Mary the Virgin as a result of change to its setting. This would be very minor harm given the intention to maintain a visual corridor so that the church tower would remain visible on the south-western approach to the village. Nevertheless, considerable weight and importance should be attached to harm arising to listed buildings resulting from a change in their setting in accordance with s66(1) of the Planning (Listed Buildings and Conservation Areas) Act 1990. Having regards to paragraph 196 of the Framework, when a development would lead to less than substantial harm to the significance of a heritage asset the harm should be weighed against the public benefits of the proposal.
84. Having regards to such benefits, the Appellant points to the scheme's provision of 35% (up to 30) of the proposed dwelling units as affordable housing. This follows from the requirement of CLPP1 Policy BSC3, the Local Plan noting that that Cherwell district has a high level of need for affordable housing²⁰. No evidence of a specific need for affordable housing in Ambrosden has been provided. Nonetheless, the need within the district should be seen within the context of a locally widening gap in the ratio of house prices to earnings.
85. Within the district the lower quartile house price is more than eleven times lower quartile annual earnings²¹. This is higher than for England as a whole (7.29) and greater than the South East region (10.51). The affordability ratio has increased more rapidly in the district than in Oxfordshire over the CLPP1 plan period and it is apparent that market housing is increasingly unaffordable for many. As such, even though the proposal would simply be policy-compliant in regard to the quantum of affordable housing, I give significant weight to this provision in helping to address what is clearly a district-wide need.
86. I accord moderate weight to the benefit of the market housing element of the proposal against the Government's national objective of significantly boosting the supply of homes²². More limited weight is also attached to the economic and financial benefits that would arise through construction spending and the direct and indirect job creation which could result, and the generation of household expenditure which would support the local economy.
87. Some local scepticism was expressed at the inquiry as to whether the additional residents of the proposal would contribute to sustaining the vitality of the village. However, it is my view that there would be some potential benefits arising from the support and additional spending and patronage of existing village facilities.
88. The appeal site has little present ecological value. Through the scheme's ability to provide open space and landscaping a positive contribution to biodiversity could result, as could the opportunity recognised in the Flood Risk Assessment for betterment in terms of runoff rates. I attach modest weight to these aspects.

²⁰ Paragraph B.104

²¹ Mortgages typically being capped at 4.5 times annual salary

²² Framework paragraph 59

89. Through the s106 obligations financial contributions would be made to bus service provision, highway improvements, education and community facility provision. However, as these directly stem from the proposal itself these are neutral benefits.
90. I consider that the potential benefits of the proposal outweigh the less than substantial harm to the significance of the heritage asset of St Mary's that would result from change in its setting. There would be accord with the relevant criterion of Policy PV2 in that there would be no significant adverse impact on this heritage asset.
91. Overall, the proposal would accord with the CLPP1 and would comply with the economic, social and environmental overarching objectives of sustainable development as set out in the Framework²³. For these reasons, and having considered all other matters raised, I consider the proposal to be acceptable and that the appeal should be allowed.

Conditions

92. The Appellant and the Council discussed draft conditions during the inquiry, culminating in an agreed set presented towards its close. I have considered these against the tests for conditions as set out in paragraph 55 of the Framework, amending where necessary for accuracy and consistency.
93. In addition to the usual conditions relating to the necessity for approval of reserved matters, and the specification of plans to which the permission relates, a condition is appropriate limiting the maximum number of dwellings to 84, for the avoidance of doubt and to ensure a satisfactory form and density of development. Also, to ensure a satisfactory form and standard of development compatible with the surroundings and one which is made secure, conditions are necessary limiting the ridge height of dwellings, the provision and implementation of a landscape management plan, and the need for an application for Secured by Design accreditation. For the same reason and as referred to above, I shall impose a condition in order to protect views across the site of the tower of St Mary's to preserve its significance as an important heritage asset.
94. In the interests of highway safety, a condition is required to ensure the access to the site is constructed before the first occupation of dwellings. I shall impose a condition requiring the submission of a scheme for the removal of telegraph poles adjacent to Holly Tree Cottage. This is to ensure the removal of the footway obstruction and improve pedestrian access. Submission of a scheme would only be required if the poles had not already been removed prior to the commencement of development. To promote sustainable travel choices the approval and subsequent operation of a Residential Travel Plan is required, as is a condition requiring that each dwelling is provided with ducting to allow for the future installation of electrical vehicle charging infrastructure.
95. A condition is necessary requiring the approval and subsequent implementation of a surface water drainage scheme, to ensure adequate drainage and sufficient capacity to accommodate the development. To ensure the protection of breeding birds a condition is required to time limit removal of trees and

²³ Framework paragraph 8

hedgerows, and a condition is needed requiring the agreement of a lighting strategy to prevent light pollution and to protect bats. Similarly, to safeguard the protected species of Great Crested Newts, a condition is needed to ensure mitigation measures identified in the Appellant's Great Crested Newt Mitigation Strategy are implemented.

96. To safeguard the recording of any archaeological remains within the site I shall impose conditions requiring the agreement and subsequent implementation of an Archaeological Written Scheme of Investigation. To ensure highway safety and the protection of residential amenity, agreement of a Construction Environment and Traffic Management Plan is required. Conditions relating to studies to identify whether there are potential contaminants within the site are required to minimise risk to those involved in construction and subsequent occupiers and in light of the past infilling of pond features.
97. Additional conditions have been suggested requiring details to be provided of services and energy infrastructure and the withdrawal of permitted development rights for the provision of above-ground fuel tanks. Having regards the former, I do not consider this to be necessary as such detail is covered by other legislation. In respect of the latter, I have been provided with no evidence to suggest that the exceptional withdrawal of this permitted development right under the Town and Country Planning (General Permitted Development Order 2015 is necessary.

Philip J Asquith

INSPECTOR

Schedule of Conditions

Reserved matters

1. Details of the appearance, landscaping, layout, and scale (hereinafter called 'the reserved matters') shall be submitted to and approved in writing by the local planning authority before any development takes place and the development shall be carried out as approved.
2. Application for approval of the reserved matters shall be made to the local planning authority not later than three years from the date of this permission.
3. The development hereby permitted shall be begun not later than the expiration of two years from the final approval of the reserved matters or, in the case of approval on different dates, the final approval of the last reserved matters to be approved.
4. Except where otherwise stipulated by conditions attached to this permission, the development shall be carried out strictly in accordance with the following drawings:

Drawing No. CSA/3888/107 (Site Location Plan)

Drawing Number 18166-001 Rev A Access Design – Priority Junction & Emergency Access (Access Plan).

5. The number of dwellings hereby permitted shall not exceed 84.
6. No building on the site shall exceed 8.5m at ridge height, and no building at the edge of the development shall exceed 7.5 at ridge height.
7. Any reserved matters application relating to layout and / or landscaping shall maintain a visibility corridor that secures a view of the Church of St Mary the Virgin from Merton Road, in broad accordance with the illustrative Development Framework Plan Drawing No. CSA/3888/103/F.
8. As part of the reserved matters, a Landscape Management Plan, to include the timing of the implementation of the plan, long-term design objectives, management responsibilities, maintenance schedules and procedures for the replacement of failed planting for all landscaped areas, other than privately-owned domestic gardens, shall be submitted to and approved in writing by the local planning authority. Thereafter, the Landscape Management Plan shall be carried out in accordance with the approved details.

Highways and Travel Plan

9. Prior to the first occupation of the development hereby permitted, the approved means of access as detailed on Drawing No. 18166-001 Rev A (Access Plan) shall be constructed and retained thereafter in accordance with the approved details and all ancillary works specified shall be undertaken. The visibility splays shall be kept permanently clear of all obstructions in excess of 0.6m in height.
10. Prior to commencement of development a scheme for the removal of the two telegraph poles from the footway outside Holly Tree Cottage shall be

submitted to and approved in writing by the local planning authority. The agreed scheme shall be implemented in full before the first occupation of any of the dwellings hereby permitted on the site. Such a scheme shall only be required if both poles have not already been removed prior to the commencement of development.

11. Prior to the occupation of the first dwelling of the development hereby permitted, a Residential Travel Plan, including a Travel Information Pack, shall be submitted to and approved in writing by the local planning authority. Thereafter, the Travel Plan shall be operated and reviewed in accordance with the approved details. The approved Travel Information Pack shall be provided to each household on first occupation of each dwelling.

Drainage

12. Development shall not begin until a surface water drainage scheme for the site, based on sustainable drainage principles and an assessment of the hydrological and hydro-geological context of the development, has been submitted to and approved in writing by the local planning authority. The scheme shall not be implemented other than in accordance with the approved details and shall be retained as such thereafter.

Ecology

13. No removal of hedgerows, trees or shrubs shall take place between 1 March and 31 August inclusive, unless the local planning authority has confirmed in writing that such works can proceed, or a recent survey (no older than one month) undertaken by a competent ecologist to assess nesting bird activity on site together with details of measures to protect the nesting bird interest on the site, has been submitted.
14. Prior to commencement of development, a lighting strategy for the publicly-accessible areas of the site, which includes details of light spill and which adheres to the Bat Conservation Trust Guidelines, shall be submitted to and approved in writing by the local planning authority. Thereafter, the development shall be carried out in accordance with the approved strategy.
15. The mitigation measures regarding Great Crested Newts identified in the Great Crested Newt Mitigation Strategy produced by FPCR, dated July 2019, shall be implemented in full prior to commencement of development, except where the timing is stated otherwise by the Great Crested Newt Mitigation Strategy, and maintained thereafter.

Design

16. Prior to commencement of development above slab level, an application shall be made for Secured by Design accreditation for the development hereby permitted. The development shall not be carried out other than in accordance with the approved details prior to the occupation of any dwelling hereby permitted.
17. Each dwelling shall be provided prior to its first occupation with ducting to allow for the future installation of electrical vehicle charging infrastructure to serve the dwelling.

Archaeology

18. Prior to commencement of development, a professional archaeological organisation acceptable to the local planning authority shall prepare an Archaeological Written Scheme of Investigation relating to the application site which shall be submitted to and approved in writing by the local planning authority.
19. Following the approval of the Written Scheme of Investigation referred to in Condition 18, and prior to the commencement of development (other than in accordance with the Written Scheme of Investigation), a staged programme of archaeological evaluation and mitigation shall be carried out by the commissioned archaeological organisation in accordance with the approved Written Scheme of Investigation. The programme of work shall include all processing, research and analysis necessary to produce an accessible and useable archive and a full report for publication which shall be submitted to the local planning authority.

Construction Management

20. Prior to commencement of development, a Construction Environment and Traffic Management Plan (CEMP), which shall include details of measures to be taken to ensure construction works do not adversely affect residential properties adjacent to the site, together with details of the consultation and communication to be carried out with local residents, shall be submitted to and approved in writing by the local planning authority. The CEMP shall include a commitment to deliveries only arriving at or leaving the site between 09.30 and 16.30. The development shall be carried out in accordance with the approved CEMP.

Potential Contamination

21. Prior to commencement of development, a desk study and site walk-over to identify all potential contaminative uses on the site and to inform a conceptual site model, shall be carried out by a competent person in accordance with DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11' and shall be submitted to and approved in writing by the local planning authority. No development shall take place until the local planning authority has given its written approval that it is satisfied that no potential risk from contamination has been identified.
22. If a potential risk from contamination is identified as a result of the work carried out under Condition 21, prior to commencement of development, a comprehensive intrusive investigation in order to characterise the type, nature and extent of contamination present, the risks to receptors, and to inform remediation strategy proposals shall be documented as a report undertaken by a competent person. This shall be in accordance with DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11' and shall be submitted to and approved in writing by the local planning authority. No development shall take place unless the local planning authority has given its written approval that it is satisfied that the risk from contamination has been adequately characterised as required by this condition.

23. If contamination is found by undertaking the work carried out under Condition 22, prior to the commencement of development a scheme of remediation and / or monitoring to ensure the site is suitable for its proposed use shall be prepared by a competent person in accordance with DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11' and submitted to and approved in writing by the local planning authority. No development shall take place until the local planning authority has given its written approval of the scheme and / or monitoring required by this condition.
24. If remediation works have been identified as necessary under Condition 23, the development shall not be occupied until the remediation works have been carried out in accordance with the scheme approved under Condition 23. A verification report that demonstrates the effectiveness of the remediation carried out must be submitted to and approved in writing by the local planning authority.
25. If, during development, contamination not previously identified is found to be present at the site, no further development shall be carried out until full details of a remediation strategy detailing how the unsuspected contamination shall be dealt with has been submitted to and approved in writing by the local planning authority. Thereafter the remediation strategy shall be carried out in accordance with the approved details.

Bodicote Application and Appeal Decision

NOTICE OF DECISION
TOWN AND COUNTRY PLANNING ACT 1990
(AS AMENDED)

Name and Address of Agent/Applicant :

Hollins Strategic Land LLP
c/o Emery Planning Partnership Ltd
Mr Stephen Harris
Units 2 - 4 South Park Court
Hobson Street
Macclesfield
SK11 8BS

Date Registered: 10th May 2018

Proposal: Outline application (all matters reserved except for access) for the demolition of existing buildings and erection of up to 46 no dwellings, with associated works and provision of open space

Location: Land At Tappers Farm, Oxford Road, Bodicote, Banbury OX15 4BN

Parish(es): Bodicote

REFUSAL OF PERMISSION FOR DEVELOPMENT

The Cherwell District Council, as Local Planning Authority, hereby **REFUSES** to grant planning permission for the development described in the above-mentioned application, the accompanying plans and drawings and any clarifying or amending information. **THE REASONS FOR REFUSAL ARE SET OUT IN THE ATTACHED SCHEDULE.**

Cherwell District Council
Bodicote House
Bodicote
BANBURY
OX15 4AA

Jim Newton

**Assistant Director for
Planning Policy and Development**

Date of Decision: 31st October 2018

Checked by: CF (Officer initials)

REASONS FOR REFUSAL

- 1 Taking into account the number of dwellings already permitted across the Category A villages and Cherwell District Council's ability to demonstrate a 5.4 year housing land supply, which exceeds the requirement for a 3 year housing land supply the proposal is unnecessary and undesirable as it would result in development of an area of open land which is important in distinguishing the settlements of Banbury and Bodicote and would undermine the character and identity of Bodicote. This would be contrary to Policy Villages 2 and Policy ESD15 of the adopted Cherwell Local Plan 2011-2031 Part 1 and saved Policies C15 and C33 of the adopted Cherwell Local Plan 1996.
- 2 In the absence of the completion of a satisfactory Planning Obligation under s106 of the Town and Country Planning Act 1990, the Local Planning Authority is not convinced that the necessary infrastructure directly required to mitigate the impact of this development will be provided. This would not be in the interests of delivering sustainable, mixed and balanced communities by providing affordable housing, appropriate public open space and its future maintenance arrangements, providing adequate health services and community and sports provision, meeting education needs and enhancing sustainable transport options. This would be contrary to Policies INF1, BSC3, BSC7, BSC10, BSC11, BSC12 and SLE4 of the adopted Cherwell Local Plan (2011-2031) Part 1, the Council's Adopted Developer Contributions Supplementary Planning Document (SPD) (February 2018) and the National Planning Policy Framework.

STATEMENT OF ENGAGEMENT

In accordance with the Town and Country Planning (Development Management Procedure) (England) Order 2015 (as amended) and paragraph 38 of the National Planning Policy Framework, Cherwell Council has resolved that the application proposals do not amount to sustainable development and consent must accordingly be refused.

The case officer's report and recommendation in respect of this application is available to view online at: <http://www.cherwell.gov.uk/viewplanningapp>. The agenda, minutes and webcast recording of the Planning Committee meeting at which this application was determined 25 October 2018 are also available to view online at: <http://modgov.cherwell.gov.uk/ieListMeetings.aspx?CId=117&Year=0>.

NOTICE OF DECISION
TOWN AND COUNTRY PLANNING ACT 1990
(AS AMENDED)

NOTES TO THE APPLICANT

REFUSAL OF PERMISSION

The Local Planning Authority has refused consent for the reasons set out in the schedule forming part of this notice of refusal. A further explanation of the reasons for the decision can be found in the planning officer's report, which can be viewed in Public Access via the council's web site.

If you wish to examine any of the development plans which set out the Local Planning Authority's policies and proposals for the development and use of land in its area, these are available for inspection on our website, or at the District Council offices, Bodicote House, Bodicote, during normal office hours.

APPEALS TO THE SECRETARY OF STATE

If you are aggrieved by the decision of the Local Planning Authority to refuse the application you can appeal to the First Secretary of State in accordance with Section 78(1) of the Town and Country Planning Act 1990.

If you wish to appeal then you must do so within six months of the date of this notice. Forms can be obtained from the **Planning Inspectorate, Temple Quay House, 2 The Square, Temple Quay, Bristol, BS1 6PN. Tel 0303 444 5000.**

The Secretary of State can allow a longer period for giving notice of an appeal, but he will not normally be prepared to use this power unless there are special circumstances which excuse the delay in giving notice of appeal.

The Secretary of State need not consider an appeal if it seems to him that the Local Planning Authority could not have granted permission or approval for the proposed development, having regard to the statutory requirements, to the provisions of the development order and to any directions given under the order.

In practice, the Secretary of State does not refuse to consider appeals solely because the Local Planning Authority based its decision on a direction given by him.

PURCHASE NOTICES

If either the Local Planning Authority or the First Secretary of State refuses planning permission or approval for the development of land, the owner may claim that he/she can neither put the land to a reasonably beneficial use in its existing state nor render the land capable of a reasonably beneficial use by the carrying out of any development which has been or would be permitted.

In these circumstances the owner may serve a purchase notice on the District Council. This notice will require the Council to purchase his/her interest in the land in accordance with the provisions of Part VI of the Town and Country Planning Act 1990.

COMPENSATION

In certain circumstances compensation may be claimed from the Local Planning Authority if permission is refused by the Secretary of State on appeal or on reference of the application to him.

These circumstances are set out in the Town and Country Planning Act 1990 as amended by the Planning and Compensation Act 1991.

Appeal Decision

Hearing Held on 4 September 2019

Site visit made on 4 September 2019

by M Allen BSc (Hons) MSc MRTPI

an Inspector appointed by the Secretary of State

Decision date: 30 October 2019

Appeal Ref: APP/C3105/W/19/3222428

Land at Tappers Farm, Oxford Road, Bodicote OX15 4BN

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant outline planning permission.
 - The appeal is made by Hollins Strategic Land LLP against the decision of Cherwell District Council.
 - The application Ref 18/00792/OUT, dated 4 May 2018, was refused by notice dated 31 October 2018.
 - The development proposed is an outline application (all matters reserved except for access) for the demolition of existing buildings and erection of up to 52 no. dwellings, with associated works and provision of open space.
-

Decision

1. The appeal is allowed and planning permission is granted for an outline application (all matters reserved except for access) for the demolition of existing buildings and erection of up to 46 no. dwellings, with associated works and provision of open space at Land at Tappers Farm, Oxford Road, Bodicote OX15 4BN in accordance with the terms of the application, Ref 18/00792/OUT, dated 4 May 2018, subject to the following conditions set out in the attached Schedule.

Procedural Matters

2. The application was submitted in outline. The application form indicates that approval was sought only for the matter of access. I have determined the appeal on this basis.
3. During the course of the application, the number of units proposed was reduced from 52 dwellings as set out in the planning application form, to 46 dwellings. It was agreed at the hearing that the description should reflect this reduction in numbers, as such I have included this in the decision above.
4. The appellant submitted a draft agreement under s106 of the Town and Country Planning Act 1990 (as amended) at the hearing. At that time a number of amendments were being made and the agreement was unsigned. I agreed to allow 7 days for the submission of a signed and completed agreement, which has now been received. I have taken this agreement and the obligations therein into account when making my decision.
5. Prior to the hearing the Council highlighted that a number of the notification letters sent to interested parties did not contain the details of the date of the

hearing. At the start of the hearing I asked for the parties' views on this matter. The Council duly informed me that the correct details were sent with the notification letters and that it was only a saved office copy that lacked the details. The Council confirmed that the correct notification had therefore taken place. I was satisfied that interested parties had been notified and I proceeded with the hearing on this basis.

6. Since the close of the hearing the appellant has drawn my attention to a recent appeal decision. The Council has had the opportunity to comment on this decision. I am satisfied no prejudice has been caused and, as such, I have taken it into account when making my decision.

Main Issues

7. The main issues raised in this case are:
 - i) whether the development is acceptable in principle;
 - ii) the effect of the development on the character and appearance of the area; and
 - iii) whether the scheme makes adequate contribution towards the provision of infrastructure.

Reasons

Principle of development

8. The development plan for the area consists of the Cherwell Local Plan 2011 – 2031, Part 1 (the CLP 2011) and the saved policies of the Cherwell Local Plan 1996 (the CLP 1996). At the hearing, the Council agreed that only the policies referred to in the decision notice were being relied on, namely Policies Villages 2 (PV2) and ESD15 of the CLP 2011 and Policies C15 and C33 of the CLP 1996.
9. The spatial strategy as set out in the CLP 2011 directs most growth to locations within or immediately adjoining Banbury and Bicester. Growth within the remainder of the district is limited and directed towards the larger villages. It was acknowledged by the Council that the appeal scheme would not affect its overall housing strategy.
10. PV2 identifies that 750 homes will be delivered at Category A villages, of which Bodicote is one of twenty-three, as defined in Policy Villages 1 (PV1). It was highlighted at the hearing that Policy Villages 2 contains no requirements in respect of the distribution of housing across the Category A villages, as well as no timeframe or trajectory for their delivery. Both main parties agreed that the 750-figure provided in the policy is not a ceiling or limit. It is also noteworthy that the policy requires the delivery of 750 units, not just a requirement to grant planning permission for this number.
11. My attention has been drawn to a previous appeal decision in the district¹ in which the Inspector noted that it would require a "material exceedance" of the 750-figure in order to conclude that there would be any conflict with PV2. The Council stated that if this appeal were allowed, it would not trigger a material increase over 750 dwellings. Furthermore, the figure refers to dwellings delivered, not consented, of which according to the Council there are 271. There are also a further 425 under construction. Since March 2014, there has

¹ APP/C3105/W/17/3188671, decision date 18 September 2018

- been a delivery rate of 54 dwellings per year from PV2, which would result in the delivery of 750 homes by 2028, three years before the end of the plan period (2011-2031). This however assumes that the delivery of housing will continue at this rate and that all permissions that have been granted will not only be implemented but completed.
12. The appellant has suggested that a 10% lapse rate for sites should be applied in recognition that not all sites granted planning permission will necessarily come forward. The Council disagree with this point and contend that it is likely that all sites will be delivered. Whilst I acknowledge that the delivery rate has increased in recent years, this will undoubtedly fluctuate from year to year, as evidenced by the fact that the Council state that in 2014/15 only two homes were delivered. There is also reference to the Council's Annual Monitoring Report (2018) identifying that permission for 33 dwellings had either lapsed or not been issued, suggestive of some permitted schemes not being delivered.
 13. In my view, it is not realistic to expect that all dwellings that have the benefit of planning permission will, in fact, be delivered. I acknowledge the Council's opinion that there should not be a lapse rate applied, given that when undertaking reviews of permissions they liaise directly with developers and agents, the submission of applications to discharge planning conditions can be taken as an indication of intent to implement a permission and there is a good record of delivery. However, this does not account for any circumstances where a development may not come forward. As such, I do not consider it realistic to expect a 100% delivery rate for the permitted dwellings.
 14. Even if all sites were delivered, and as I state above, I am not convinced that they will be, it is accepted by the Council that the grant of permission for an additional 46 dwellings would not lead to a material increase over the figure expected by PV2.
 15. I note that reference is made to Bodicote having been subject to permissions for a number of developments which would deliver 99 new dwellings. However, there is no reference in PV2 to any distribution of new dwellings across the twenty-three Category A villages. Furthermore, given the close proximity of Bodicote and the appeal site to Banbury, together with good accessibility to larger settlements and the services that are within Bodicote itself, the site would be one of the most accessible locations, with access to services, for new residential development, which is reflected in its categorisation in PV1 as a Category A or "Service" village.
 16. The Council also has concern that allowing the appeal scheme would restrict the potential for a more even spread of housing across all of the Category A villages. However, PV2 does not require any spatial distribution. Moreover, the development is near to one of the main settlements, Banbury, which provides for access to a good range of services and with access to a range of transport modes.
 17. The appellant has drawn my attention to a recent appeal decision² in the district which allowed up to 84 dwellings under PV2. Notwithstanding the stance taken at the hearing, the Council now consider that this permitted scheme together with the appeal scheme would result in a material increase over the 750-dwelling delivery target. However, the Council are including 31

² APP/C3105/W/19/3228169, decision date 9 September 2019

dwellings for which there is a resolution to grant permission. Whilst this matter is noted, these are not schemes for which planning permission currently exists and until such time that a decision is issued on them, it is open to the Council to consider any subsequent change in circumstances that may occur.

18. The grant of permission for these 84 dwellings adds to the number of dwellings above 750 which have permission, but the number of dwellings that have currently been delivered falls far short of this figure (271 as referred to above). There will undoubtedly be a point where there will be a situation that will result in the material increase over the 750 dwellings figure and at that time there will be some planning harm arising from the figure being exceeded, for example harm to the overall locational strategy of new housing in the district. There is no substantive evidence before me to demonstrate that this is the case in this appeal. Clearly, when considering any subsequent schemes however, this matter will need to be carefully scrutinised.
19. However, at this time, no evidence of such harm has been presented and, in my view, the allowing of this appeal for 46 dwellings would not harm the overall strategy of the development plan which is to concentrate housing development in and around Banbury and Bicester. This is particularly so given the specific circumstances of this site, including its close proximity to Banbury.
20. The Council contended that both policies PV1 and PV2 should be considered together. However, I find nothing to suggest that this is the case, and both appear to be discrete policies against which development proposals can be assessed. In any event, it is conflict with PV2 that the Council allege, and it is this matter which I have considered. There is no mention of conflict with PV1 in the Council's reason for refusal.
21. Accordingly, I am satisfied that the scheme would not result in a material increase over the target of delivering 750 dwellings and thus the principle of development is acceptable on this site in accordance with Policy PV2 of the CLP 2011.

Character and appearance

22. The site lies to the northern fringe of Bodicote and currently comprises of a grassed field with a number of buildings associated with a farm shop which operates at the site, together with associated external storage, with an area of caravan storage also. The site also contains several mature trees which are the subject of a Tree Preservation Order (TPO). Access to the site is gained from the adjacent White Post Road.
23. The site is enclosed along Oxford Road to the east by hedging which contains a number of trees. This boundary effectively screens the site from the majority of views from Oxford Road. To the north, along White Post Road, the site is enclosed by a mixture of hedging and post and rail fencing. There are however clear views into the site from this road where it appears as a field surrounded by existing development, particularly the existing farm shop buildings and the school located to the east. To its southern extremity, the site borders existing residential development, comprised of two-storey dwellings.
24. The Council contend that the site comprises the last undeveloped gap which provides separation between Bodicote and Banbury and as such is an important green space preventing the coalescence of these two settlements. It was also

- stated at the hearing that when leaving Banbury and entering Bodicote, there is the feel of leaving the larger settlement and entering a village. However, in my view, this overstates the importance of the site, as a whole, as a separating feature. I observed there to be development on the other side of Oxford Road, extending northwards, which stretches beyond the appeal site. This existing development already diminishes the distinction between Bodicote and Banbury and the introduction of development on the appeal site would not materially worsen this.
25. There is an area of vegetation between the northern extremity of the site and the Bankside flyover at the southern edge of Banbury which provides a much stronger visual break between the settlements. This would be unaffected by the proposal. Moreover, the existing development that lines Oxford Road does not, in my view, result in a village feel or appearance to the area. Whilst I acknowledge that the whole of the eastern boundary of the site currently comprises hedging, it is located near to existing built development and is not reflective of a rural countryside location. Furthermore, the indicative layout submitted, shows that dwellings would be set off the eastern boundary, with the provision of a green corridor which would limit the visibility of dwellings from Oxford Road. As a consequence, the introduction of built development within the appeal site would not have an unacceptably urbanising effect.
26. The Council also refer to the area surrounding the site having a spacious and open feel. However, there is built development to the immediate south of the site, as well as to the east. This significantly limits any sense of spaciousness. Whilst a school lies to the west, with its associated playing fields, this does little to create a sense of spaciousness. I appreciate that the majority of the site is currently not covered by built development, however the proposed residential development would not be out of character with its context of nearby development.
27. Additionally, the indicative layout submitted with the application shows that proposed dwellings would not extend into the northern part of the site, which would be left open as amenity open space. This would re-enforce the visual break provided by the existing landscaping I refer to above and ensure that from viewpoints in close proximity to the site along White Post Road, an open aspect is retained to an acceptable degree, with buildings set back within the site. It would also provide a "green link" with the mature trees and landscaping to the west of the site, along Salt Way. Thus, a distinction between the two settlements would be maintained.
28. The matter of access is for determination at this stage and the submitted details show the creation of a new vehicular access to the east of the existing. Whilst it is likely that this will be a more formal and well-defined feature at this location, given the context of the site, in particular the appearance of the formal and engineered slip road onto Oxford Road and the Bankside flyover, this would not be unduly prominent or appear as a discordant element. The Council also express concern in respect of the prominence of the development in views from Sycamore Drive to the north west. However, these would not be close up views and where the development may be visible, it would be in the context of the amenity open space to the north and set back into the site. As such, I consider that any visual effect in this regard would be acceptable.

29. The mature trees within the site are the subject of a TPO and whilst there is no immediate concern over the removal of these trees, the matter of the future maintenance of the trees was raised at the hearing. In this respect, I note that the indicative layout of the site takes into account the existing trees and positions buildings around them. As such, whilst I appreciate that these details are indicative only, I have no substantive evidence before me to persuade me that the scheme would have an adverse effect on the future health of the protected trees, particularly in light of the matters of layout and landscaping being for future consideration.
30. Accordingly, I find that the scheme would not harm the character or appearance of the area and as such there would be no conflict with Policies Villages 2 and ESD15 of the CLP 2011 and Policies C15 and C22 of the CLP 1996. Together, and amongst other things, these policies seek to ensure that significant adverse landscape impacts are avoided, that new development reinforces local distinctiveness, that the coalescence of settlements is resisted and that important undeveloped gaps are preserved.

Infrastructure

31. The appellant provided a draft planning obligation by deed of agreement under section 106 of the Town and Country Planning Act 1990 (as amended), section 11 of the Local Government Act 1972 and section 1 of the Localism Act 2011. Subsequent to the hearing, the appellant has now provided a signed and completed agreement.
32. The agreement contains obligations following discussions with the Council, since the application was refused. Prior to the hearing, a table was provided outlining all of the requirements that the Council sought to be secured by way of the legal agreement. These include:
- Affordable housing
 - Open space and landscaping
 - Off-site sports and Community facilities
 - Primary medical care
 - Public transport services
 - Primary school provision
 - Refuse Disposal
 - Transportation and Highways
33. The submitted details outline the basis on which the contributions are sought, with reference to development plan policies and the adopted Developer Contributions Supplementary Planning Document (SPD) (2018). At the hearing, the appellant raised concern in respect of two of the required contributions as set out: Primary Medical Care (PMC) and Refuse Disposal (RD).
34. In respect of PMC, I note that the NHS Oxfordshire Commissioning Group highlights that North Oxfordshire, particularly the Banbury area, is mostly at capacity in terms of PMC and that housing growth will require additional or expanded infrastructure to be provided. I consider this to be reasonable, given the proximity of the site to Banbury where there is an identified shortfall in service provision. In regard to RD, the appellant initially had concerns that there was insufficient justification for a contribution in this respect, highlighting that facilities were ordinarily funded through Council Tax income. The Council clarified that the contribution would be towards bin provision for new dwellings, which is not funded by Council Tax. Following this, the appellant was satisfied

that the RD contribution was justified based on the SPD. I have no reason to disagree.

35. Having reviewed the details of the contributions, they are necessary to make the development acceptable in planning terms, directly related to the development as well as fairly and reasonably related in scale and kind to the development.
36. Accordingly, the scheme would comply with Policies INF1, BSC3, BSC7, BSC10, BSC11, BSC12 and SLE4 of the CLP 2011. Together, and amongst other things, the policies seek to ensure development provides a proportion of affordable housing, that education needs are met, that schemes make adequate open space, outdoor sport, recreation and community facility provision, that infrastructure is provided to meet the District's growth and that the transport impacts of development are mitigated.

Other Matters

37. Interested parties have raised concerns in respect of the effect of the development on wildlife in the area, as well as on highway safety, in particular the effect of additional traffic and potential conflict with traffic in association with the adjacent school. However, I note that the Council do not object to the proposal on the basis of these matters. Furthermore, I have no substantive evidence to show that there would be any detriment in respect of these matters. As such, they have little bearing on my decision.
38. There has also been concern in respect of the effect on infrastructure in the area. The contributions secured by the legal agreement are intended to mitigate the effects of the proposal on such matters and as such the scheme would not result in any harm in this regard.
39. I note that concern has been expressed by interested parties in respect of the proximity of proposed dwellings to existing ones. However, the matter of the layout of the site is for later determination. There is also reference to the loss of the existing farm shop, as well as the use of the grassed area for events. The Council have raised no objection on this basis and in the absence of a policy basis for protecting these existing uses I find that I have no reason to find differently.
40. There was reference to the ability of the Council to demonstrate a three and five-year supply of deliverable housing sites. As I have found above that the scheme accords with an up-to-date development plan, this is not a matter which I need to consider further.

Conditions

41. A list of draft conditions was provided prior to the hearing and as set out in the Statement of Common Ground; these were agreed by both main parties. Nonetheless, there was a discussion on these suggested conditions at the hearing. I have considered the conditions in light of the advice of the Planning Practice Guidance and the six tests.
42. I have imposed standard conditions relating to the submission and timing of reserved matter applications and the commencement of development. A condition is also required to ensure compliance with the submitted plans, but only in respect of access, as this is not a reserved matter.

43. Given the proximity of the site to Oxford Road, I have imposed a condition requiring details of measures to ensure that the living conditions of residents will not be adversely impacted on by noise. A condition is also imposed in respect of biodiversity enhancements, as required by Policy ESD10 of the CLP2011, as well as requiring that the development incorporate the recommendations of the Habitat Survey Report. In order to protect retained trees a condition in respect of an Arboricultural Method Statement is required.
44. In order to ensure the development does not adversely affect the natural environment and or the living conditions of nearby residents, I have included a condition requiring the submission of a Construction Environmental Management Plan. In order to ensure that any contamination of the site is satisfactorily dealt with, conditions are required in respect of site investigation and any necessary remediation, together with measures to deal with unsuspected contamination.
45. I have included a condition in respect of the construction details of the vehicular access, in the interests of highway safety. Similarly, a condition is required stopping up the existing vehicular access. In order to ensure the potential for buried remains within the site is properly addressed a condition is included requiring a written scheme of archaeological investigation. So that there is no conflict between residential properties and the existing farm shop, a condition is included requiring the demolition of all existing buildings prior to the occupation of any dwelling.
46. In the interests of sustainable transport and to ensure the site is accessible by a range of transport modes, conditions are included requiring travel plan statements and travel information packs to be provided to occupiers, as well as ducting to allow for the installation of electric charging points. I have also included a condition preventing occupation of any dwelling until necessary upgrades to the wastewater, surface water and water supply infrastructure have been completed. To facilitate communications infrastructure, a condition is necessary in respect of high-speed broadband facilities.
47. In the interests of biodiversity, I have imposed a condition requiring full details of external lighting to be submitted with the reserved matters application in respect of layout. Also, in this regard I have included a condition preventing site clearance or demolition of buildings during the bird nesting season.
48. A condition is recommended in respect of the reserved matters reflecting the principles set out in the submitted parameters plan, landscape strategy plan and indicative species list. However, only the matter of access is for determination at this stage and it has not been evidenced that the illustrative details submitted would be the only satisfactory way to develop the site. As such, I do not consider this condition is necessary.
49. To safeguard landscaping that contributes to biodiversity, a condition is recommended requiring a landscape and ecological management plan. However, as landscaping is a reserved matter it is not necessary to impose such a condition at this stage. Similarly, it is not necessary to impose a condition securing the implementation of landscaping or the retention of trees and hedgerows, as these are matters that should properly be dealt with under future reserved matters.

50. Conditions have been recommended in respect of the construction of internal roads and footways, vehicular parking areas and manoeuvring areas and provision of cycle parking facilities. Whilst access is for determination at this stage, this refers only to the means of access to the site. As such, these matters can be dealt with satisfactorily under a subsequent reserved matters application in respect of layout.

Conclusion

51. I have found that the scheme would not result in a material increase over the target of delivering 750 dwellings and therefore would not conflict with Policy PV2 of the CLP 2011. I have also found that the scheme would not result in harm to the character and appearance of the area. Furthermore, a completed legal agreement has been submitted securing the necessary contributions. The scheme therefore complies with the development plan.

52. For the reasons given above, and having regard to all matters raised, I conclude that the appeal should be allowed.

DOCUMENTS

- 1 Draft Section 106 Planning Agreement
- 2 Drawing Number IL1002 Rev C – Parameters Plan Final
- 3 Letter from Bovis Homes dated 29th August 2019
- 4 Letter from Emanuel Land & Real Estate dated 18th June 2018
- 5 Letter from the Land Team UK dated 6th June 2018
- 6 Extract of appellants closing submissions made at Inquiry in respect of Appeal ref APP/C3105/W/17/3188671
- 7 Addendum to CIL table

Schedule of Conditions

- 1) Details of the appearance, landscaping, layout, and scale, (hereinafter called "the reserved matters") shall be submitted to and approved in writing by the local planning authority before any development takes place and the development shall be carried out as approved.
- 2) Application for approval of the reserved matters shall be made to the local planning authority not later than 3 years from the date of this permission.
- 3) The development hereby permitted shall commence not later than 2 years from the date of approval of the last of the reserved matters to be approved.
- 4) The development hereby permitted shall be carried out in accordance with the following approved plan: Drawing number 1608/01 (Proposed Site Access Arrangements White Post Road), dated April 2018.
- 5) The first reserved matters application shall be accompanied by a specialist acoustic consultant's report demonstrating that internal noise levels in habitable rooms within the dwellings and external noise levels for outdoor areas (including domestic gardens and recreation areas) will not exceed the criteria specified in the British Standard BS8233:2014 'Guidance on sound insulation and noise reduction for buildings'. Where mitigation measures are required in order to achieve these standards, full details, to include any acoustic barriers, planting, glazing and ventilation requirements as necessary, shall also be included. The approved mitigation measures shall be implemented prior to the first occupation of the affected dwellings and the first use of the outdoor areas. The measures shall be retained as approved at all times.
- 6) The first reserved matters application shall be accompanied by a method statement for protecting and enhancing biodiversity on the site, to include all details of proposed bat and bird boxes and all integrated features within buildings, together with timings for their installation. The method statement shall also include details in respect of the implementation of the recommendations as set out in Section 6 – Conclusions and Recommendations of the "Extended Phase 1 Habitat Survey Report", prepared by REC, dated April 2018. The biodiversity protection and enhancement measures shall be carried out and retained in accordance with the approved details.
- 7) As part of the reserved matters application in respect of layout, a surface water drainage scheme for the site shall be submitted. The scheme shall be based on sustainable drainage principles and an assessment of the hydrological and hydro-geological context of the development. The scheme shall also include:
 - Discharge Rates
 - Discharge Volumes
 - SUDS (Sustainable Drainage Systems) (the suds features mentioned within Section 5.3 of the Flood Risk Assessment)
 - Maintenance and management of SUDs
 - Infiltration tests to be undertaken in accordance with BRE365 – Soakaway Design
 - Detailed drainage layout with pipe numbers
 - Network drainage calculations

- Phasing plans
- Flood routes in exceedance (to include provision of a flood exceedance route plan).

The scheme shall be implemented in accordance with the approved details.

- 8) The reserved matters application in respect of layout shall include full details of all external lighting, including predicted lux levels and light spill and details showing that lighting avoids vegetation and site boundaries. The lighting shall at all times accord with the approved details.
- 9) No development, other than demolition, shall commence before an Arboricultural Method Statement (AMS) has been submitted to and approved in writing by the Local Planning Authority. The AMS shall include protective fencing specifications and details of construction methods close to retained trees and hedges; and shall be undertaken in accordance with BS: 5837:2012 (including all subsequent revisions). Thereafter, the development shall at all times be carried out in accordance with the approved AMS.
- 10) No development shall take place, including any works of demolition, until a Construction Environmental Management Plan (CEMP) has been submitted to, and approved in writing by the local planning authority. The CEMP shall include details of:
- i) Construction traffic management measures;
 - ii) Measures to ensure construction works do not adversely affect biodiversity and protect habitats and species of biodiversity importance;
 - iii) Measures to ensure construction works do not adversely affect nearby residential properties, including any details of consultation and communication with local residents.

The approved CEMP shall be adhered to throughout the construction period for the development.

- 11) No development shall commence until an assessment of the risks posed by any contamination shall have been submitted to and approved in writing by the local planning authority. This assessment must be undertaken by a suitably qualified contaminated land practitioner, in accordance with British Standard BS 10175: Investigation of potentially contaminated sites - Code of Practice and the Environment Agency's Model Procedures for the Management of Land Contamination (CLR 11) (or equivalent British Standard and Model Procedures if replaced), and shall assess any contamination on the site, whether or not it originates on the site. The assessment shall include:
- i) a survey of the extent, scale and nature of contamination;
 - ii) the potential risks to:
 - human health;
 - property (existing or proposed) including buildings, crops, livestock, pets, woodland and service lines and pipes;
 - adjoining land;
 - ground waters and surface waters;
 - ecological systems; and
 - archaeological sites and ancient monuments.

- 12) No development shall take place where (following the risk assessment required by Condition 10) land affected by contamination is found which poses risks identified as unacceptable in the risk assessment, until a detailed remediation scheme shall have been submitted to and approved in writing by the local planning authority. The scheme shall include an appraisal of remediation options, identification of the preferred option(s), the proposed remediation objectives and remediation criteria, and a description and programme of the works to be undertaken including the verification plan. The remediation scheme shall be sufficiently detailed and thorough to ensure that upon completion the site will not qualify as contaminated land under Part IIA of the Environmental Protection Act 1990 in relation to its intended use. The approved remediation scheme shall be carried out and upon completion a verification report by a suitably qualified contaminated land practitioner shall be submitted to and approved in writing by the local planning authority before the development is occupied.
- 13) No development shall take place, other than demolition, before full details of the means of access between the land and the highway, including layout, construction, materials, surfacing, drainage and vision splays have been submitted to and approved in writing by the local planning authority. The means of access shall be completed in accordance with the approved details prior to the occupation of any dwelling and thereafter retained as approved.
- 14) No development shall take place until a Written Scheme of Archaeological Investigation shall have been submitted to and approved in writing by the local planning authority. The scheme shall include
 - i) the programme and methodology of site investigation and recording;
 - ii) the programme for post investigation assessment;
 - iii) the provision to be made for analysis of the site investigation and recording;
 - iv) the provision to be made for publication and dissemination of the analysis and records of the site investigation;
 - v) the provision to be made for archive deposition of the analysis and records of the site investigation;
 - vi) the nomination of a competent person or persons/organization to undertake the works set out within the Written Scheme of Investigation.
- 15) Prior to the occupation of any dwelling hereby approved, all existing buildings as shown on Drawing Number S18-225 (Topographical Land Survey) shall be demolished and the resultant debris and materials removed from the site.
- 16) No dwelling shall be occupied before a Travel Plan Statement and Travel Information Pack have been submitted to and approved in writing by the local planning authority. The approved documents shall be provided to each dwelling on its first occupation.
- 17) No dwelling shall be occupied until a system of ducting to allow for future installation of electrical vehicles charging infrastructure has been provided to serve that dwelling.

- 18) No dwelling shall be occupied until written confirmation has been provided that either:
- i) all wastewater network, surface water network and water network upgrades required to accommodate the development have been completed, or
 - ii) a housing and infrastructure phasing plan has been submitted to and approved in writing by the local planning authority, allowing properties to be occupied on a phased basis.

Where a housing and infrastructure phasing plan is agreed, no occupation shall take place other than in accordance with the approved details.

- 19) No dwellings shall be occupied until it has been provided with service connections capable of supporting the provision of high-speed broadband to serve that dwelling.
- 20) Any contamination that is found during the course of construction of the approved development that was not previously identified shall be reported immediately to the local planning authority. Development on the part of the site affected shall be suspended and a risk assessment carried out and submitted to and approved in writing by the local planning authority. Where unacceptable risks are found remediation and verification schemes shall be submitted to and approved in writing by the local planning authority. These approved schemes shall be carried out before the development is resumed or continued.
- 21) Prior to the first use of the access hereby approved, the existing access onto White Post Road shall be permanently stopped up by means of the installation of a verge and full-height kerb and shall not be used for any vehicular traffic whatsoever.
- 22) Any vegetation clearance and all works to demolish existing buildings shall take place outside of the bird nesting period (1 March to 31 August inclusive), unless a check for breeding birds has been undertaken by a suitably qualified surveyor within 24 hours of work commencing. If a nest (or a nest in construction) is found, a stand-off area should be maintained until the young have fledged.

Appendix 23

Sibford Ferris Application and Appeal Decision

DISTRICT COUNCIL
NORTH OXFORDSHIRE

NOTICE OF DECISION
TOWN AND COUNTRY PLANNING ACT 1990
(AS AMENDED)

Name and Address of Agent/Applicant :

Land & Partners Limited
c/o Land & Partners
Mr Harbottle
8 High Bois Lane
Amersham
HP6 6DG

Date Registered: 7th November 2018

Proposal: Outline planning permission with all matters reserved for up to 25 dwellings with associated open space, parking and sustainable drainage

Location: OS Parcel 4300 North Of Shortlands And South Of High Rock, Hook Norton Road, Sibford Ferris

Parish(es): Sibford Ferris

REFUSAL OF PERMISSION FOR DEVELOPMENT

The Cherwell District Council, as Local Planning Authority, hereby **REFUSES** to grant planning permission for the development described in the above-mentioned application, the accompanying plans and drawings and any clarifying or amending information. **THE REASONS FOR REFUSAL ARE SET OUT IN THE ATTACHED SCHEDULE.**

Cherwell District Council
Bodicote House
Bodicote
BANBURY
OX15 4AA

Robert Jolley

**Assistant Director
Planning and Economy**

Date of Decision: 30th April 2019

Checked by: NS (Officer initials)

REASONS FOR REFUSAL

- 1 By reason of its scale and the relative sustainability of Sibford Ferris, and taking into account the number of dwellings already permitted across the Category A villages, and Cherwell District Council's ability to demonstrate a 5 year housing land supply, which exceeds the requirement for a 3 year housing land supply, the proposed development is considered to be unnecessary, disproportionate, undesirable and unsustainable development that would undermine the housing strategy in the Cherwell Local Plan Part 1 which seeks to distribute new housing to the most sustainable locations having regard to such matters as public services and facilities, transport and employment. This would be contrary to Policies ESD1, Villages 1 and Villages 2 of the Cherwell Local Plan 2011-2031 Part 1, Saved Policy H18 of the Cherwell Local Plan 1996 and Government guidance contained within the National Planning Policy Framework.
- 2 By virtue of its extension beyond the built limits of the village on a greenfield site and in an area of Grade 2 (very good) agricultural land and its visual impact on the rural character and appearance of the locality, the proposed development would cause unacceptable harm to the character and appearance of the area, open rural countryside and rural edge of village setting, failing to reinforce local distinctiveness. The proposal is therefore contrary to Policies ESD13, ESD15 and Villages 2 of the Cherwell Local Plan 2011-2031 Part 1, saved Policy C28 of the Cherwell Local Plan 1996 and Government guidance contained within the National Planning Policy Framework.
- 3 In the absence of the completion of a satisfactory Planning Obligation, the Local Planning Authority is not convinced that the necessary infrastructure directly required as a result of this development, in the interests of supporting the sustainability of the village and the development, and in the interests of safeguarding public infrastructure and securing on site future maintenance arrangements, will be provided. This would be contrary to Policies INF1, PSD1, BSC10 and BSC11 of the Cherwell Local Plan 2011-2031 Part 1 and Government guidance contained within the National Planning Policy Framework.

STATEMENT OF ENGAGEMENT

In accordance with the Town and Country Planning (Development Management Procedure) (England) Order 2015 (as amended) and paragraph 38 of the National Planning Policy Framework, Cherwell Council has given consideration to whether amendments or additional information would overcome its concerns with the application, but unfortunately it has concluded that it would not be possible to resolve those concerns within the scope and timescales of this application. Cherwell Council has resolved that the application proposals do not amount to sustainable development and consent must accordingly be refused.

The case officer's report and recommendation in respect of this application is available to view online at: <http://www.cherwell.gov.uk/viewplanningapp>. The agenda, minutes and webcast recording of the Planning Committee meeting at which this application was determined 18 April 2019 are also available to view online at: <http://modgov.cherwell.gov.uk/ieListMeetings.aspx?CId=117&Year=0>.

NOTICE OF DECISION
TOWN AND COUNTRY PLANNING ACT 1990
(AS AMENDED)

NOTES TO THE APPLICANT

REFUSAL OF PERMISSION

The Local Planning Authority has refused consent for the reasons set out in the schedule forming part of this notice of refusal. A further explanation of the reasons for the decision can be found in the planning officer's report, which can be viewed in Public Access via the council's web site.

If you wish to examine any of the development plans which set out the Local Planning Authority's policies and proposals for the development and use of land in its area, these are available for inspection on our website, or at the District Council offices, Bodicote House, Bodicote, during normal office hours.

APPEALS TO THE SECRETARY OF STATE

If you are aggrieved by the decision of the Local Planning Authority to refuse the application you can appeal to the First Secretary of State in accordance with Section 78(1) of the Town and Country Planning Act 1990.

If you wish to appeal then you must do so within six months of the date of this notice. Forms can be obtained from the **Planning Inspectorate, Temple Quay House, 2 The Square, Temple Quay, Bristol, BS1 6PN. Tel 0303 444 5000.**

The Secretary of State can allow a longer period for giving notice of an appeal, but he will not normally be prepared to use this power unless there are special circumstances which excuse the delay in giving notice of appeal.

The Secretary of State need not consider an appeal if it seems to him that the Local Planning Authority could not have granted permission or approval for the proposed development, having regard to the statutory requirements, to the provisions of the development order and to any directions given under the order.

In practice, the Secretary of State does not refuse to consider appeals solely because the Local Planning Authority based its decision on a direction given by him.

PURCHASE NOTICES

If either the Local Planning Authority or the First Secretary of State refuses planning permission or approval for the development of land, the owner may claim that he/she can neither put the land to a reasonably beneficial use in its existing state nor render the land capable of a reasonably beneficial use by the carrying out of any development which has been or would be permitted.

In these circumstances the owner may serve a purchase notice on the District Council. This notice will require the Council to purchase his/her interest in the land in accordance with the provisions of Part VI of the Town and Country Planning Act 1990.

COMPENSATION

In certain circumstances compensation may be claimed from the Local Planning Authority if permission is refused by the Secretary of State on appeal or on reference of the application to him.

These circumstances are set out in the Town and Country Planning Act 1990 as amended by the Planning and Compensation Act 1991.

Appeal Decision

Site visit made on 25 September 2019

by **Stephen Wilkinson BA BPI MRTPI**

an Inspector appointed by the Secretary of State

Decision date: 5th November 2019

Appeal Ref: APP/C3105/W/19/3229631

OS Parcel 4300 North of Shortlands and South of High Rock, Hook Norton Road, Sibford Ferris, Oxfordshire OX15 5QW

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant outline planning permission.
 - The appeal is made by Land and Partners against the decision of Cherwell District Council.
 - The application Ref 18/1894/OUT, dated 29 October 2018, was refused by notice dated 30 April 2019.
 - The development proposed is outline planning permission with all matters reserved for up to 25 dwellings, associated open space, parking and sustainable drainage.
-

Decision

1. The appeal is allowed and outline planning permission with all matters reserved for up to 25 dwellings, associated open space and sustainable drainage is granted at OS Parcel 4300 north of Shortlands and south of High Rock, Hook Norton Road, Sibford Ferris, Oxfordshire, OX15 5QW in accordance with the terms of the application, Ref 18/1894/OUT, dated 29 October 2018, subject to the conditions included in the schedule attached to this letter.

Procedural Matters

2. The application has been submitted in outline with all matters reserved and this is the basis on which I considered this appeal. At the start of the Hearing I sought clarification over the proposed 'parameter plan' as two different revisions had been included for my consideration. I accepted the revised plan no. 6426/ASP3/PP Rev D which included a typographical change to the legend and my decision has been made on this basis.
3. A draft agreement made under Section 106 of the Town and Country Planning Act 1990, as amended, agreed by all parties was presented to me during the Hearing. This has been completed and informs my conclusion on the third main issue identified below.
4. In the week following the Hearing the Government issued a National Design Guide. I wrote to the parties seeking their views on whether this Guidance had any bearing on their cases and my findings have taken on board their views.

Main Issues

5. There are three main issues in this Appeal which I define as follows:

- Whether the proposals comply with the housing policies of the development plan
- The effect of the proposals on the character and appearance of the settlement of Sibford Ferris and the surrounding area, and
- Whether the proposals include adequate provision for the necessary infrastructure directly required by this development.

The appeal site

6. The appeal site forms part of an arable field, classified as Grade 2, with a site area of about 3.7ha located on the southern edge of Sibford Ferris on the western side of Hook Norton Road. The site slopes down by approximately 10m to Woodway Road, a single track road which forms its western boundary. The site affords good views to the west of the Cotswolds Area of Outstanding Natural Beauty which lies approximately 1.5km away. The appeal site has hedges along each boundary apart from its southern side which is open to the remainder of the arable field.
7. Sibford Ferris is separated from its nearest settlements of Sibford Gifford and Burdrop by approximately half a mile across the steep valley of the River Sib. For this appeal I will refer to these settlements, collectively, as the 'Sibfords'. Together they have a population of approximately 1,000 residents. The valley sides are characterised by small wooded copses and paddocks laced with footpaths. The Sibfords have a range of services which include, doctors surgery, primary school, public house, food shop and post office. Sibford School, a private school lies opposite the site on Hook Norton Road. Limited bus services connect the Sibfords to Banbury and Stratford.

Reasons

Policy background

8. The development plan comprises the Cherwell Local Plan 2011-31, Part 1 (2015) (CLPP1) and 'saved' policies Cherwell Local Plan (1996). The Policies cascade from principles of sustainable development included in Policy ESD1 in line with the National Planning Policy Framework (2019) and seek to distribute growth to the most sustainable locations to ensure that amongst other matters, dependence on private transport is reduced.
9. Accordingly, the CLPP1 requires that the district wide housing target of 22,840 is delivered in the main centres of Bicester and Banbury. Outside these two centres the plan allocates 2,350 houses with 1,600 houses proposed for the former RAF base at Upper Heyford. The plan recognises the importance of sustaining rural villages and through Policy Villages 1 (PV1) defines categories of village by criteria which include their population, services/facilities, and accessibility. The focus of this policy is to 'manage' small scale development proposals which come forward within the built up limits of each village through minor development, infilling or conversions.
10. Policy Villages 2 (PV2) provides a rural allocation of sites of 10 or more dwellings at the Category A villages. This policy identifies that 750 houses will be delivered at Category A villages; this would be in addition to the 'rural allowance' of small site windfalls and planning permissions that existed at 31st March 2014. Underpinning this policy is a recognition of the need to deliver

housing growth evenly across the whole District at the larger villages. A range of criteria to guide new development in Category A villages is identified in policy PV2 covering matters such as the environmental qualities of sites, agricultural value, access to services and landscape impacts.

11. At the time of adoption of the CLPP1 the Council anticipated that it would prepare a CLP Part 2 which would have identified housing sites which would have informed policy PV2. This part of the Plan has not progressed because of the inception of the 'growth deal' for Oxfordshire.

Whether the proposal would be in accordance with the housing policies of the development plan

12. There are two issues underpinning the application of adopted policy to this site with the first concerning the total of 750 homes to be delivered at the Category A villages and the second on whether the proposed scheme accords with other housing policies.
13. The Council acknowledges that the 750 housing figure is not a target. A point reinforced by my colleague inspectors in recent appeal decisions. However, it should be regarded as a benchmark to govern future decisions on applications for housing development otherwise the integrity of the plan would be undermined. The Council can identify 5.2 years housing land supply in excess of the requirement for just 3 years required for the Oxfordshire Districts. Furthermore, it can demonstrate that 168 houses have been delivered against the PV2 target of 750 houses despite the Plan being only 4 years through its 16 years 'life'. The Council's statement identifies that across the District 7,455 houses were completed of which 2,765 are in the rest of the District and a further 6,715 houses are committed of which 1,129 are in the rest of the District.
14. The Council identifies that by 31st March 2019 planning permissions had been granted for over 750 houses on 18 large sites and to date 271 units had been built out on these sites in line with policy PV2. However, none of these have been permitted within the Sibfords. Evidence provided through the Annual Monitoring Report (AMR) acknowledges the accelerating rate of delivery since 2015 and the Council anticipate that the 750 homes will be built out by 2028.
15. During the Hearing both parties made references to a large number of appeal decisions involving similar housing schemes throughout the District. Underpinning many of these decisions is the issue of 'material exceedance', a term used to describe the extent to which decisions to allow development above the figure of 750 houses for the Category A villages would erode the basis of the CLPP1. Whilst I do not have all the evidence before me regarding each of these appeal decisions there was discussion during the Hearing of a recent appeal decision¹, which had been allowed for an additional 84 dwellings at Ambrosden, another Category A village within the District albeit with a much larger population and containing a broader range of services. Again the issue of 'material exceedance' had informed the decision to allow the Appeal.
16. I do not consider 'material exceedance' to be an issue for this appeal given the modest number of units proposed and the categorisation and size of the Sibfords. The Category A status of the village in the plan warrants further

¹ APP/C3105/W/19/3228169

- investment in housing. Although the plan period is only 4 years old I do not consider that a decision to allow this appeal would undermine the essential thrust of policy PV2 and by extension the local plan.
17. The second issue is the extent to which the proposals are acceptable against other housing policies included in the CHPP1.
 18. The principles of sustainable development, identified in the National Planning Policy Framework (2019) (the Framework), underpin policy PSD1 at several levels within the CLPP1. At a strategic level the policy seeks to ensure that development will be concentrated in the main centres, then outside those there is an allowance for development within the rural areas but concentrated within the Category A villages which are defined by their range of services and being located throughout the District would support a balanced pattern of growth. Finally, at another level within each village specific sites have to be 'sustainable' in how they function in their local context with regard to a range of criteria.
 19. The Sibfords are identified as a Category A village because of several factors including its population and range of services. These services are spread across each of the 3 settlements. I acknowledge that local connectivity between them via walking and cycling is restricted by the steep sided Sib valley but these services do exist within reasonable proximity of the appeal site. Given the spread of services across each settlement it is unlikely that the development of any site around the Sibfords would readily enable access by sustainable transport modes. This is an argument against the inclusion of the Sibfords as a Category A village but is not a matter before me in this Appeal.
 20. Policy PV2 identifies a broad range of criteria which would have informed the CHLPP2 allocations, not all of which are relevant to the issues concerning this appeal. However whilst the site does not comply with several of these I consider that the principle of some form of development on at least part of this site has been accepted. In addition, I accord moderate weight to the inclusion of the part of the appeal site in the Council's Housing and Economic Land Availability (HELAA 2018) for up to 10 houses.
 21. The scheme would provide for 35% affordable housing in line with policy. I understand that one of the reasons for the Council's decision resolving to grant permission for a scheme in 2014 was the inclusion of 6 affordable homes to meet local housing need following the Housing Needs Survey in 2010 and the Register of Interest in 2013.
 22. Part of the case presented by the Sibford Action Group (SAG) referred to the poor level of service provision in the Sibfords substantiating why further development should not occur. Whilst it is difficult to determine the exact impact that 25 new households would have on local services such as the local shop, it is a fair assumption that this is likely to be positive in supporting it.
 23. For the above reasons on this main issue I conclude that the proposals would be in line with adopted housing policies and in line with the Framework. The proposals are in line with policies PSD1, PSV1 and PSV2 of the CHPP1. They are not in conflict with 'saved' policy H18 given the status of the village defined by PSV1 and PSV2. The scheme would not amount to a material exceedance in breach of policy PV2 and would deliver housing in line with other policies of the Plan.

Character and Appearance

24. Sibford Ferris is a linear village extending northwards along Hook Norton Road before turning east above the Sib valley. The village's linear character means that its rural landscape prevails with the village being a subservient element. For example, the well treed Sib valley restricts views between the Sibfords reducing the impacts of the settlement pattern on landscape. Over the last 20 years new housing has been integrated into the existing settlement pattern in a sensitive way.
25. The appeal site's boundaries are formed by hedges on each side apart from the southern edge which is open to the remainder of the arable field. The site sits on top of a broad ridge above the Sib valley and further away, to the south the Stour valley. When viewed from the south and west across both valleys the appeal site appears as an extension to arable fields. The line of trees on the western edge of the Sibford School is a critical boundary to the edge of the settlement. The site has no statutory or non statutory landscape designations.
26. The adopted policies ESD 13 and ESD15 included in the CLPP1 seek to both protect landscapes and to ensure that new development responds positively to an area's character through creating or reinforcing local distinctiveness. These policies are underpinned by the 'saved' policy C28 of the Cherwell Local Plan (1996) designed to ensure that new development is sympathetic to its rural context and high value landscapes.
27. Where adherence to these policies is not possible proposals will not be permitted if they cause undue visual intrusion into the countryside, impact on its natural landscape and topography and be inconsistent with local character. These policies are consistent with several of the criteria included in policy PV2 which seek amongst other matters, to avoid adverse landscape impacts of new development and to avoid development on the best and most versatile agricultural land.
28. Although the site lies outside the Cotswolds Area of Outstanding Natural Beauty (AONB) its landscape context is shaped by this. Furthermore, the site lies in Character Area 13 of the Oxfordshire Wildlife and Landscape Study defined as an area of 'Rolling Village Pastures' and close to another landscape type, 'Wooded Pasture Valleys and Slopes'. The nature of this rolling landscape interspersed with hedgerows and copses means that views into the site from its immediate boundaries are limited compared to those from further away. For example, the proposed area of housing would be difficult to see from Woodward Road due to the slope the land and height of the hedge.
29. The appeal site would create a new pattern of development as an extension to the southern edge of the village. The indicative drawings identify that development would be set in the north east corner of the site with housing of 2.5 storeys which steps down towards the middle of the site to 1.5 storeys. Within the appeal site the extent of development would be limited and when set against existing development at Margaret Lane House (part of the Sibford School), it would extend the village envelope by only a small area. The suggested height parameters are important in reducing the visual impacts of the scheme from surrounding receptor points.
30. Whilst there are differences in approach to their respective landscape studies both the Appellants and the SAG identify a range of receptor points from which

to gauge the impact of the scheme on landscape and visual character. However neither study include montages of the proposed development or images of what the site could look like after 1 and 15 years – critical points in the 'life' of a development.

31. Having visited several of the receptor points and considered the views included in both reports in detail I conclude that potentially the two most sensitive receptor points are from the west from the Cotswolds AONB and from the south. From the former I consider that the integrity of the landscape would not be compromised by this development. This is in part because within the appeal site the dwellings would be set close to existing housing and only marginally extend the pattern of development to just south of Margaret Lane House which forms part of the Sibford School. Furthermore, the line of trees along the boundary of the Sibford School along Hook Norton Road would still be the dominant landscape feature when the site is viewed from the west. For these reasons I consider that the proposals would not have an 'urbanising effect' on the site and its surroundings as the Council have stated.
32. From my own observations I find that the appeal site is most prominent when viewed at just over 1km away from the south along D'Arcy Dalton Way. This is particularly important given that at this point the appeal site would not have a natural edge to its southern boundary. However, the scheme does include mitigation along this edge in the form of tree planting. The Appellants Landscape and Visual Appraisal recognises that the proposed scheme would be contained within the existing landscape. The concentration of development at the north east corner of the site and its relative low density would reduce its intrusiveness.
33. The National Design Guide 2019 builds on Chapter 12 of the National Planning Policy Framework (NPPF) 2019 which requires, amongst other matters, that new development reflects its landscape context and setting. Having viewed the site from a number of receptor points I consider that its low density combined with the extent of proposed planting belts would ensure that the proposal could be 'accommodated' within its context.
34. On this issue I conclude that the proposals would not cause unacceptable harm to the landscape setting of the Cotswolds AONB and the setting of Sibford Ferris. For these reasons I consider that the proposed scheme would not be in conflict with saved policies C28 of the Cherwell Local Plan (1996) and ESD 13, ESD 15 and PV1 and PV2 of the CHPP1.

Infrastructure provision

35. The completed section 106 agreement includes a range of provisions. These cover the requirement that 35% of the dwellings are 'affordable', provision of and commuted payments for local play area and public amenity space within the scheme, maintenance arrangements for onsite trees and boundary hedgerows, and a sustainable drainage system. Other provisions include a contribution to the provision of waste management facilities and community hall facilities and contributions to the local secondary school and the Sibford School for indoor and outdoor recreation opportunities. The agreement includes provisions made under section 278 for a new pedestrian footway, crossing and access into the site, bus shelter, local play and provisions for a traffic regulation order to ensure lower speed on Hook Norton Road as drivers approach from the south.

36. Overall, the obligations included in the agreement are related to the requirements of development plan policies and are necessary, directly related and fairly and reasonably related in scale and kind to the proposed scheme in line with paragraphs 56-57 of the National Planning Policy Framework 2019.

Other Matters

37. Interested parties raised issues regarding matters which I address in turn below.

Unsustainability of the Sibfords to take more development

38. The Sibfords are a Category A settlement included in the local plan. Although the Inspector at the local plan inquiry did consider that the hierarchy of settlement types was not set in stone this is a matter for a review of the local plan and not one for me to determine in this appeal. This categorisation of village types was based on the range of factors including local service provision. Whilst I acknowledge that journey times between the Sibfords would be hindered by the quality of the local highway network and the Sib valley potentially leading to more private transport use than would be normally expected a range of services consistent with Category A settlements does still operate in the Sibfords for the benefit of residents of the appeal scheme.
39. Many of the decisions of my inspector colleagues to dismiss appeals in other villages within the District can be distinguished from this case for several reasons. In some cases the scale of development was large compared to the size of the original village. For example, in Fimmere, the appeal² was dismissed for 47 houses but the range of services was limited as the village had no shop or post office. The Sibfords do have a shop and other services. In other cases the appeal proposals would add to further development given extant permissions as in the cases³ of both Weston on the Green and Chesterton. The Sibfords have not experienced new development since the adoption of the Local Plan.
40. In other appeals other factors such as substantial harm to heritage assets prevailed. For example, in Kirtlington and Cropredy the impact of proposals on the setting of listed buildings and the character and appearance of a conservation area was cited respectively as reasons for dismissal⁴. These are not matters relevant to this appeal.

Traffic generation and congestion

41. The amount of traffic generation arising from the appeal scheme was not identified in the Council's reasons for refusal. Whilst representations from interested parties focused on the extent of additional traffic generation arising from the appeal proposal I did not receive other evidence to dispute the Appellants traffic survey which indicated that during the critical morning and evening peaks the amount of traffic generation would be between 10 and 12 vehicles generated an hour by the proposals.
42. I acknowledge the CRAILTUS survey completed in 2009 and its conclusions on the use of private transport in the Sibfords but this matter was considered as

² APP/C3105/WW/17/3169168

³ APP/C3105/W/16/3158925 and APP/C3105/W/15/3130576

⁴ APP/C3105/W/14/3001612 and APP3105/WW/17/3187461

part of the local plan which designated the village as a Category A village. Furthermore, although representations from SAG addressed concerns over the levels of congestion in the village caused by the amount of traffic passing through the narrow village roads, compounded by the 'school run' to the Sibford school I saw only limited examples of this during this critical time when I visited the village. Furthermore, during two visits to the village I observed that the amount of traffic on local roads was low. Although I acknowledge that bus services to the village have been reduced since the local plan's adoption in 2015 I still consider that the inclusion of new housing could go some way to sustaining the existing level of service provision.

43. Although the proposals would involve the loss of Grade 2 agricultural land this has to be balanced against the benefits which the proposals could make to the provision of additional housing.
44. Finally, a further objection referred to concerns over flooding. The site lies in the Flood Zone 1 and a Flood Risk Assessment submitted with the appeal identified that the risk of flooding was low. Furthermore, the scheme does include sustainable urban drainage.

Planning balance and conclusions

45. Section 38(6) of the Planning and Compulsory Purchase Act 2004 requires that planning permission must be determined in accordance with the development plan unless material considerations indicate otherwise. The National Planning Policy Framework (2019) places considerable emphasis on sustainable development and highlights the delivery of new housing as a national priority.
46. The appeal proposals are consistent with the essential thrust of the housing policies included in the adopted CHLPP1. In particular, they are consistent with ESD1 and in line with policies PV1 and PV2. Set against this is the number of dwellings included in extant permissions in the Category A villages across the District which exceeds the 750 dwellings included in policy PV2. However, I do not consider that the appeal proposals represent a material exceedance to this figure given its modest size and they would not undermine policy PV2 and the basis of the local plan. Furthermore, the scheme includes a quantum of affordable units compliant with policy.
47. In addition, the scheme includes other features including a path across the site improving permeability, allotments and local play facilities. These key into some concerns identified in the non statutory Sibford Action Plan (2012) and are consistent with adopted policies in the CHPP1. I have already identified the obligations included in the completed section 106 agreement which through contributions would improve local highways, restrict speeds into the village along Hook Norton Road and support active lifestyles through contributions to the facilities of the local secondary school and the Sibford School. In addition, 25 new households would go some way to support local services.
48. Whilst the proposed schemes location on the edge of the village does form a limited extension to its current settlement pattern this must be seen in the context of this site set close to Margaret Lane House. The integrity of the landscape character is not compromised by the scheme. The character of the landscape means that the scheme's visual impacts are reduced. Its most sensitive southern boundary can be adequately mitigated through landscaping. The details of this can be determined at reserved matters stage.

49. Taking into account all these matters I conclude that the appeal is allowed and outline planning permission is granted subject to the conditions included in the attached schedule.

Conditions

50. During the Hearing there was a discussion between the main parties on the draft conditions. Having considered these further, I am making a series of small amendments to ensure full compliance with Planning Practice Guidance. I have imposed a condition specifying the timeframes for the commencement of development and for the submission of outstanding reserved matters as required by Sections 91 and 92 of the Town and Country Planning Act 1990, as amended. A condition is required to ensure that the development is carried out in accordance with the plans and documents submitted with the application to ensure adherence to the principle of the proposed development hereby approved. Other conditions require a Construction Traffic Management Plan and Construction Environmental Management Plan to ensure that the operational works to complete the scheme do not adversely impact on the living conditions of surrounding residential occupiers, avoid potential conflict with highway users and protect the environment and biodiversity.
51. A condition requiring a Landscape and Ecology Management Plan is required to identify the habitats to be created in the scheme including the requirement for bat and bird boxes in line with both local and national policy. A condition requiring an energy statement is required to ensure that the energy consumption is minimised during construction and on completion to deliver a low carbon development in line with both local and national policy. A condition is required to ensure archaeological investigations are completed in advance of works proceeding following advice received from the County Council.
52. Other conditions include a need for detailed drawings of the proposed access from Hook Norton Road to ensure highway safety. A condition is required to address contamination if this is found on site. Finally, a condition is required for a starter pack for new homes advising on sustainable modes of travel to ensure that the use of private transport is reduced.

Stephen Wilkinson

Inspector

Schedule of Conditions

- 1) Details of the access, appearance, landscaping, layout, and scale, (hereinafter called "the reserved matters") shall be submitted to and approved in writing by the local planning authority before any development takes place and the development shall be carried out as approved.
- 2) Application for approval of the reserved matters shall be made to the local planning authority not later than 3 years from the date of this permission.
- 3) The development hereby permitted shall take place not later than 2 years from the date of approval of the last of the reserved matters to be approved.
- 4) The development hereby permitted shall be carried out in accordance with the following approved and submitted plans and documents: Site Location Plan 1;2500 scale (Promap), Concept Schematic 6426/ASP3/PP – Rev D Parameter Plan and 6426/ASP4/LSP-Rev A-Landscape Strategy Plan, Design and Access Statement; Flood Risk Assessment; Arboricultural Impact Assessment; Ecological Impact Assessment; Archaeological Desk Based Assessment; Flood Risk Assessment and Drainage Strategy report and drawings labelled 3361.101.
- 5) Prior to commencement of the development hereby approved, full details of the means of access between the land and the highway shall be submitted to and approved in writing, by the Local Planning Authority. The access shall be broadly in accordance with the positioning indicated on the approved plan 3361.101-Concept Schematic,6426/ASP3/PP and include detail of layout and vision splays. Thereafter and prior to the first occupation of any of the development the means of access shall be constructed and retained in accordance with the approved details.
- 6) Prior to the first occupation of the development hereby approved a travel information pack shall be submitted to and approved by the Local Planning Authority. Thereafter and upon occupation the first residents of each dwelling shall be provided with a copy of the approved information pack.
- 7) Prior to commencement of the development hereby approved a Construction Traffic Management Plan (CTMP) shall be submitted to and approved in writing by the local planning authority. Thereafter, the approved CTMP shall be implemented and operated in accordance with the approved details.
- 8) Prior to commencement of the development hereby approved, full details of a surface water drainage scheme for the site detailing all on and off site drainage works required in relation to the development which shall be broadly in accordance with the drainage proposals set out in the submitted flood risk assessment produced by JNP Group Consulting Engineers and which shall include a sewer modelling assessment shall be submitted to and approved in writing by the local planning authority. The development shall not be carried out other than in accordance with the approved scheme, until such time no discharge of foul or surface water from the site shall be accepted from the site into the public system. The scheme shall also include:
 - Discharge rates

- Discharge volumes
 - SUDS (permeable paving, soakaways, infiltration devices, attenuation pond, swales)
 - Maintenance and management of SUDS features to include a SUDS management and maintenance plan
 - Sizing of features – attenuation volume
 - Infiltration in accordance with BRE 365 (to include comprehensive infiltration testing and annual monitoring recording of ground water levels across the site).
 - Detailed drainage layout with pipe numbers
 - Network drainage calculations
 - Phasing
 - Flood flow routing in exceedance conditions (to include provision of a flood exceedance route plan).
- 9) Prior to the commencement of the development hereby approved, a landscape and ecology management plan (LEMP) showing how all habitats will be created managed and funded and to include details of a bat and birdbox scheme shall be submitted to and approved in writing by the local planning authority. Thereafter, the development shall not be carried out other than in strict accordance with the approved LEMP.
- 10) Prior to the commencement of the development hereby approved, including any site clearance, a Construction Environmental Management Plan (CEMP), which shall include details of the measures taken to ensure that construction works do not adversely affect biodiversity, shall be submitted to and approved in writing by the local planning authority. Thereafter, the development shall not be carried out other than in strict accordance with the approved CEMP.
- 11) If during development, contamination not previously identified is found at the site, no further development shall be carried out until full details of a remediation strategy detailing how the contamination shall be dealt with has been submitted to and approved by the Local Planning Authority. Thereafter, the remediation strategy shall be carried out in accordance with the approved details.
- 12) Prior to or as part of the first reserved matters submission, an Energy Statement shall be submitted to and approved in writing by the Local Planning Authority. The Energy Statement should:
- Be structured in accordance with the energy hierarchy in ESD2 of the Cherwell Local Plan 2011-31 Part 1 with information provided on each element of the hierarchy
 - Inform and be reflected in the reserved matters
 - Include a description of the development, number and type of residential units,
 - Demonstrate sustainable construction methods as per Policy ESD3 of the Cherwell Local Plan Part 1 2011-31, and
 - Consider the use of renewable energy to supply the development.

Thereafter, the development shall be carried out in strict accordance with the recommendations and measures contained in the approved Energy Statement.

- 13) Prior to or as part of the submission of the first reserved matter a Written Scheme of Archaeological Investigation shall be submitted to and approved in writing by the local planning authority. The scheme shall include an assessment of significance and research questions:
- i) the programme and methodology of site investigation and recording;
 - ii) the programme for post investigation assessment;
 - iii) the provision to be made for analysis of the site investigation and recording;
 - iv) the provision to be made for publication and dissemination of the analysis and records of the site investigation;
 - v) the provision to be made for archive deposition of the analysis and records of the site investigation;
 - vi) the nomination of a competent person or persons/organization to undertake the works set out within the Written Scheme of Investigation.

Weston-on-the-Green Application and Appeal Decision

NOTICE OF DECISION
TOWN AND COUNTRY PLANNING ACT 1990
(AS AMENDED)

Name and Address of Agent/Applicant :

Greystoke Land Limited
c/o Pegasus Group
Mr David Hutchison
Pegasus House
Querns Business Centre
Whitworth Road
Cirencester
GL7 1RT

Date Registered: 2nd April 2019

Proposal: Residential development of up to 18 dwellings with associated access, internal roads, car parking, public open space, landscaping, drainage and other associated infrastructure

Location: Land North Of, Southfield Farm, North Lane, Weston On The Green

Parish(es): Weston On The Green

REFUSAL OF PERMISSION FOR DEVELOPMENT

The Cherwell District Council, as Local Planning Authority, hereby **REFUSES** to grant planning permission for the development described in the above-mentioned application, the accompanying plans and drawings and any clarifying or amending information. **THE REASONS FOR REFUSAL ARE SET OUT IN THE ATTACHED SCHEDULE.**

Cherwell District Council
Bodicote House
Bodicote
BANBURY
OX15 4AA

Robert Jolley

**Assistant Director
Planning and Economy**

Date of Decision: 21st June 2019

Checked by: NS (Officer initials)

REASONS FOR REFUSAL

- 1 The development proposed, by reason of its scale and siting beyond the built up limits of the village, encroachment into the open countryside, and taking account of the Council's ability to demonstrate an up-to-date five year housing land supply, is considered to be unnecessary, undesirable and unsustainable new development that would harm the rural character and setting of the village. The proposal is therefore unacceptable in principle and contrary to Policies ESD13, ESD15 and Villages 2 of the Cherwell Local Plan 2011-2031 Part 1 and saved Policy C28 of the Cherwell Local Plan 1996 and Government guidance within the National Planning Policy Framework.
- 2 The development proposed, by reason of its poor connectivity and links to the existing village and position adjacent to the busy Northampton Road, and the relative lack of facilities within the village, would represent an unsustainable form of development, that would not give future occupiers a realistic choice of travel means. The proposed development would therefore be contrary to Policies SLE4, ESD1 and ESD15 of the Cherwell Local Plan 2011-2031 Part 1 and Government guidance in the National Planning Policy Framework which seeks to ensure that new development facilitates sustainable modes of transport and provides opportunities for the use of public transport, walking and cycling.
- 3 The submitted Drainage Strategy is inadequate and does not provide sufficient information to demonstrate that a drainage strategy based on Sustainable Urban Drainage Systems has been explored for the site. The proposal is therefore contrary to Policy ESD7 of the Cherwell Local Plan 2011-2031 Part 1 and Government guidance in the National Planning Policy Framework.
- 4 In the absence of the completion of a satisfactory Planning Obligation, the Local Planning Authority is not convinced that the necessary infrastructure directly required as a result of this development, in the interests of supporting the sustainability of the village and the development, and in the interests of safeguarding public infrastructure and securing on site future maintenance arrangements, will be provided. The proposal therefore conflicts with Policies BSC3 and INF1 of the Cherwell Local Plan 2011-2031 Part 1 and Government advice within the National Planning Policy Framework.

STATEMENT OF ENGAGEMENT

In accordance with the Town and Country Planning (Development Management Procedure) (England) Order 2015 (as amended) and paragraph 38 of the National Planning Policy Framework, Cherwell Council has given consideration to whether amendments or additional information would overcome its concerns with the application, but unfortunately it has concluded that it would not be possible to resolve those concerns within the scope and timescales of this application. Cherwell Council has resolved that the application proposals do not amount to sustainable development and consent must accordingly be refused.

The case officer's report and recommendation in respect of this application is available to view online at: <http://www.cherwell.gov.uk/viewplanningapp>. The agenda, minutes and webcast recording of the Planning Committee meeting at which this application was determined 20 June 2019 are also available to view online at: <http://modgov.cherwell.gov.uk/ieListMeetings.aspx?CId=117&Year=0>.

NOTICE OF DECISION
TOWN AND COUNTRY PLANNING ACT 1990
(AS AMENDED)

NOTES TO THE APPLICANT

REFUSAL OF PERMISSION

The Local Planning Authority has refused consent for the reasons set out in the schedule forming part of this notice of refusal. A further explanation of the reasons for the decision can be found in the planning officer's report, which can be viewed in Public Access via the council's web site.

If you wish to examine any of the development plans which set out the Local Planning Authority's policies and proposals for the development and use of land in its area, these are available for inspection on our website, or at the District Council offices, Bodicote House, Bodicote, during normal office hours.

APPEALS TO THE SECRETARY OF STATE

If you are aggrieved by the decision of the Local Planning Authority to refuse the application you can appeal to the First Secretary of State in accordance with Section 78(1) of the Town and Country Planning Act 1990.

If you wish to appeal then you must do so within six months of the date of this notice. Forms can be obtained from the **Planning Inspectorate, Temple Quay House, 2 The Square, Temple Quay, Bristol, BS1 6PN. Tel 0303 444 5000.**

The Secretary of State can allow a longer period for giving notice of an appeal, but he will not normally be prepared to use this power unless there are special circumstances which excuse the delay in giving notice of appeal.

The Secretary of State need not consider an appeal if it seems to him that the Local Planning Authority could not have granted permission or approval for the proposed development, having regard to the statutory requirements, to the provisions of the development order and to any directions given under the order.

In practice, the Secretary of State does not refuse to consider appeals solely because the Local Planning Authority based its decision on a direction given by him.

PURCHASE NOTICES

If either the Local Planning Authority or the First Secretary of State refuses planning permission or approval for the development of land, the owner may claim that he/she can neither put the land to a reasonably beneficial use in its existing state nor render the land capable of a reasonably beneficial use by the carrying out of any development which has been or would be permitted.

In these circumstances the owner may serve a purchase notice on the District Council. This notice will require the Council to purchase his/her interest in the land in accordance with the provisions of Part VI of the Town and Country Planning Act 1990.

COMPENSATION

In certain circumstances compensation may be claimed from the Local Planning Authority if permission is refused by the Secretary of State on appeal or on reference of the application to him.

These circumstances are set out in the Town and Country Planning Act 1990 as amended by the Planning and Compensation Act 1991.

Appeal Decision

Hearing Held on 29 October 2019

Site visit made on 29 October 2019

by A Spencer-Peet BSc(Hons) PGDip.LP Solicitor (Non Practising)

an Inspector appointed by the Secretary of State

Decision date: 17 December 2019

Appeal Ref: APP/C3105/W/19/3233293

Land to the West of Northampton Road, Weston-on-the-Green OX25 3RQ

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant outline planning permission.
 - The appeal is made by Greystoke Land Limited against the decision of Cherwell District Council.
 - The application Ref 19/00596/OUT, dated 14 March 2019, was refused by notice dated 21 June 2019.
 - The development proposed is described as for residential development of up to 18 dwellings with associated access, internal roads, car parking, public open space, landscaping, drainage and other associated infrastructure.
-

Decision

1. The appeal is dismissed.

Procedural Matters

2. During the course of the appeal, the Appellant sought to make an amendment to the proposed development with the intention that the amended proposal be considered and determined on the basis of 100% affordable housing provision. At the Hearing the main parties were given the opportunity to provide final verbal submissions in respect of the proposed amendment.
3. In deciding whether to accept the proposed amendment to the appeal scheme, I am mindful of the principles of *Bernard Wheatcroft Ltd v SSE* [JPL 1982 P37] and the guidance contained within the Planning Appeals: Procedural Guide. In this instance I have concluded that, by reason of the nature of the proposed amendment, the amended proposal would be so changed, that to make my decision on that basis would deprive those who should have been consulted the opportunity of such consultation. Consequently, this appeal has been determined on the basis of the original application and submissions.
4. Following the submission of the planning application and appeal in relation to this matter, the Weston-on-the-Green Neighbourhood Plan (the WNP) has been submitted for, and has progressed through, the examination process. I have considered the Report of the Examination as provided within the appeal submissions and, by reason of its advanced stage, I have given substantial weight to the WNP in the determination of this appeal.
5. Outline planning permission is sought with all matters reserved. The details submitted with the application include reference to layout. Whilst not formally part of the scheme and provided for illustrative purposes, I have nevertheless

treated these details as a useful guide as to how the site might be developed. I have determined the appeal on this basis.

6. At the Hearing, the Council confirmed that it has withdrawn its objections in relation to the effect of the proposed development on the existing drainage network and the potential for flooding in the surrounding area. The Appellant has been made aware of this change to the reasons for refusal and has had the opportunity to comment. However, at the Hearing interested parties raised further concerns regarding the potential for flooding and, consequently, whilst I have not considered this matter to form part of the main issues in this appeal, I will return to this subject within the Other Matters section provided below.

Main Issues

7. The main issues in this appeal are:

- Whether the proposal would constitute an appropriate form of development with particular regard to the provisions of local and national policy in respect of the location of the development and the effect of the proposal on the character and appearance of the surrounding area;
- Whether the proposed development is in a suitable location for housing with particular reference to the accessibility of services and facilities; and,
- Whether the proposed development makes adequate provision for any additional need for infrastructure, services and facilities arising from the development.

Reasons

Principle of development

8. Section 38(6) of the Planning and Compulsory Purchase Act 2004 provides that planning applications are determined in accordance with the development plan unless material considerations indicate otherwise. In this instance, the development plan comprises the Cherwell Local Plan 2011-2031 Part 1¹ (the CLPP1) and the saved policies of the Cherwell Local Plan (1996) (the CLP).
9. Policy Villages 1 of the CLPP1 confirms that Weston-on-the-Green is a Category A village. Whilst I acknowledge the Council's comments regarding the variety of sizes and populations for Category A villages within the District, in the context of the development plan, Category A villages are considered to be the most sustainable rural settlements in the district.
10. Policy Villages 2 of the CLPP1 concerns the distribution of growth across rural areas within the district and provides that "a total of 750 homes will be delivered at Category A villages", in addition to rural allowance for small site windfalls and planning permissions for ten or more dwellings as at 31 March 2014. This policy further confirms that sites will be identified through the preparation of the Local Plan Part 2, through the preparation of Neighbourhood Plans where applicable and through the determination of planning permission applications.

¹ Adopted July 2015

11. It is agreed between the main parties that the 750 homes figure provided under Policy Villages 2 of the CLPP1, is not a cap or ceiling and therefore does not represent a maximum number of homes to be delivered. It has been put to me by the Council that, as of the date of the Hearing, planning permission for a total of 750 homes have been granted since April 2014 under the provisions of Policy Villages 2 of the CLPP1 and that approximately 271 homes have been completed.
12. As such, the Council contends that if planning permission were to be granted then the 750 homes figure for dwellings at Category A Villages would be exceeded well in advance of the end of the plan period. The Council maintains that by exceeding this figure, the proposed development would undermine the District's aim to focus growth at the larger settlements of Banbury and Bicester, and would make it more difficult for other Category A Villages within the District to meet their potential housing needs later on during the plan period.
13. The main parties have cited a number of previous appeal decisions in support of their submissions, which include a previous appeal decision which relates to this appeal site² (the previous appeal decision). In this regard, several of the referenced appeal decisions concerned development proposals where the 750 homes figure had not been exceeded. However, the recent decision in relation to a site located at Ambrosden³ (the Ambrosden Appeal) concerned development where, as in this present case, it was shown that the number of homes delivered during the relevant period, in combination with planning permissions that had been granted, had reached the 750 homes figure.
14. In this regard, whilst I acknowledge the Council's submissions in relation to this proposal, I concur with the Inspector's findings in the Ambrosden Appeal in that such proposals will not harm the strategy of concentrating development in Bicester and Banbury and, furthermore, that development at Category A Villages which exceeds the 750 homes figure need not place any undue constraint on other villages to meet any specific or identified housing needs, as other policies contained within the development plan, for example Policy Villages 1 and Policy Villages 3 of the CLPP1, would be relevant considerations to cater for any such needs.
15. Indeed, as noted above, the WNP is at an advanced stage and recognises that additional housing, and specifically affordable housing, is needed in Weston-on-the-Green. Whilst there is disagreement between the main parties regarding the total number of houses that will now be required to meet the aims and objectives of the WNP and further disagreement regarding the availability of alternative suitable sites within the village to meet any such needs, it is clear that in order to meet these objectives it will necessitate exceeding the already reached goal of providing 750 homes in Category A Villages within the District.
16. In summary of the above, I consider the proposed scheme would not necessarily undermine the District's housing strategy nor place any undue constraint on other villages to meet any specific or identified housing needs during the relevant plan period. Furthermore, I acknowledge that the scheme

² Appeal Reference: APP/C3105/W/16/3158925

³ Appeal Reference: APP/C3105/W/19/3228169

would provide some affordable housing units which would assist in meeting the objectives of the WNP.

17. However, I accept that notwithstanding the above finding, other forms of harm may arise for example in respect of the effect of the scheme on the character and appearance of the surrounding area or in respect of the location of the site with regards to access to services and facilities. These are matters which I shall now turn to as below.

Character and appearance

18. The appeal site comprises part of a substantial and relatively flat parcel of open land which has been divided into a number of separate paddocks. The site is located outside of the village and adjacent to land which has been granted permission for a scheme of up to twenty dwellings⁴.
19. I acknowledge that existing hedgerows and vegetation would partially screen the site from views from the surrounding locality and, consistent with the findings of the Inspector in the previous appeal decision, I acknowledge the conclusions of the Landscape and Visual Impact Appraisal that the effect on the wider landscape would be limited.
20. However, and notwithstanding the above, whilst the proposed scheme would reduce the total number of dwellings to be provided at this site when compared to the scheme considered under the previous appeal decision, the appeal proposal would still alter the agricultural appearance of the site to that of a domestic residential one and, consequently, would have an urbanising effect on this countryside location. As stated by the Appellant, the proposal would create a new settlement edge and, consequently, the scheme would appear as an encroachment into the open countryside. In my view, this would represent an undue visual intrusion into the open countryside and would thereby detract from the rural character of the surrounding area.
21. Further to the above, the proposed scheme would appear as a modern estate which would not reflect the mixture of older and newer housing that can be found throughout Weston-on-the-Green and, consequently, the proposed scheme would be harmful to the character and setting of this village.
22. For the above reasons, the proposed development would conflict with Policies Villages 2, ESD13 and ESD15 of the CLPP1 which, amongst other matters, seek to ensure that development contributes positively to the character of the area and does not cause an undue visual intrusion into the open countryside. Furthermore, the proposal would not accord with those parts of the National Planning Policy Framework (the NPPF) which seek to protect the countryside from inappropriate development. Saved Policy C28 of the CLP concerns layout, design and external appearance and as the planning application is in outline with all matters reserved, no assessment of the proposal in light of this policy is required.

Access to services and facilities

23. As highlighted by the Inspector in relation to the previous appeal decision, Weston-on-the-Green contains a basic core of services which includes access to

⁴ Council Reference: 13/01796/OUT

a Post Office, a general store, public houses, a church and village hall. The appeal site would be within reasonable walking distance of these facilities for most people and, whilst I acknowledge the concerns of interested parties with regards to the safety of pedestrians entering the centre of the village along the B340 road, I am satisfied that the provision of the proposed footpath would be sufficient to allow for safe access to the village.

24. However, as noted by the Inspector in the previous appeal decision at this site, while there would be access to some basic core services and facilities within Weston-on-the-Green, these services are limited and consequently potential future residents would have to travel further afield to access facilities which are likely to be required on a day to day basis, for example schooling, healthcare, shopping and leisure.
25. The Appellant has put it to me that access to a wider range of services could be achieved other than by means of private motor vehicle. In this regard, the Appellant maintains that children would have access to free transport to the nearest available schools and that there are alternative community services, such as the Oxfordshire Comet bookable transport service, which would provide choice for future residents.
26. However, I would again concur with the findings of the Inspector in the previous appeal decision, in that as residents would have no real choice of transport other than by private vehicle or community transport this would bring into question the sustainability of the village and the proposed development itself. This position would not be changed by the introduction of additional train services from Oxford Parkway station into Oxford.
27. Furthermore, whilst I acknowledge the proposed contribution towards new bus services and acknowledge the Appellant's submissions regarding the need to provide housing in order to maintain a suitable level of local employees with respect to employment opportunities within Weston-on-the-Green, the evidence before me indicates that the financial contribution would be insufficient to secure the long term viability of any new bus service. Additionally, there is no evidence before me which demonstrates that there are insufficient potential employees currently residing within the village to meet the needs of local businesses.
28. In my view, it is therefore likely that future occupants of the proposed scheme would be reliant on private motor vehicles in order to access day to day services such as schools, medical facilities or wider transport links. Whilst dependence on private vehicles may be expected in rural locations, the proposal would only exacerbate this level of reliance. It would contribute to a pattern of development that would be likely to cause environmental harm as a result of increased car journeys and hence carbon emissions.
29. For the above reasons, the proposed development would conflict with Policies Villages 2, ESD1 and SLE4 of the CLPP1 and would not accord with those provisions of the NPPF which, amongst other things, requires that development should facilitate the use of sustainable modes of transport to make the fullest possible use of public transport, walking and cycling.

Planning Obligations

30. At the Hearing, the Appellant confirmed that it was their intention to provide deeds pursuant to Section 106 of the Town and Country Planning Act 1990 which would secure any planning obligations that were necessary to make the appeal proposal acceptable in planning terms. It was put to me that the details of such obligations had been agreed in principle with the Council and that the relevant deeds were in the process of being executed. Consequently, it was agreed that further time would be provided in order that the said obligations could be completed. However, at the date upon which this appeal has been determined, no such completed obligations have been provided.
31. Paragraph 56 of the NPPF explains that planning obligations must only be sought where they meet all of the following tests as set out in Regulation 122(2) of the Community Infrastructure Levy Regulations (CIL Regs) 2010, as amended: a) necessary to make the development acceptable in planning terms; b) directly related to the development; and c) fairly and reasonably related in scale and kind to the development.
32. Policies BSC10 and BSC11 of the CLPP1 require the provision of open space to support new housing growth in accordance with Table 7: Local Standards of Provision. Policy BSC3 of the CLPP1 requires the provision of 35% Affordable Housing as part of the proposed development. The Developer Contributions SPD (2018) requires financial contributions towards provision of refuse/recycling bins for the development, as well as contributions towards improvements to off-site sports facilities and new community facilities or the improvement of any such existing facilities.
33. Policy INF1 of the CLPP1 provides that development proposals will be required to demonstrate that infrastructure requirements can be met including the provision of transport, education, health, social and community facilities. The evidence before me indicates and confirms that financial contributions towards education provision, specifically in relation to the expansion of Chesterton Primary School are required in respect of the appeal scheme.
34. On the basis of the evidence submitted in relation to this appeal, I am satisfied that it has been demonstrated that the above contributions are reasonable and necessary. As noted above, no legal agreement has been submitted as part of this appeal and, consequently, in the absence of any legal agreements which secure the above requirements, the proposal would conflict with Policies BSC3, BSC10, BSC11 and INF1 of the CLPP1. Furthermore, the appeal scheme would not accord with the provisions of the NPPF.

Other Matters

35. Interested parties raise several additional objections to the proposal including the effect of the proposal on highway safety, residential amenity, ecology and, as noted above, in relation to its effect on drainage and flood risk. These are important matters and I have considered all the evidence before me. However, given my findings in relation to the main issues, these are not matters which have been critical to my decision and consequently require no further consideration or assessment in relation to this appeal.

Planning Balance

36. The NPPF provides that the concept of sustainable development comprises three mutually dependent dimensions – being the economic, social and environmental elements of the proposal. Paragraph 11 of the NPPF confirms that proposed development that accords with an up to date development plan should be approved without delay. In this respect, the evidence before me indicates that the development plan is up to date and it is agreed that the Council can currently demonstrate a five year supply of deliverable housing sites.
37. However, the proposal would provide social benefits in terms of contribution towards housing supply, comprising a mixture of housing types including affordable housing. I acknowledge that the provision of such housing may result in the improvement of living conditions for those, especially children, who currently reside in unsatisfactory housing and consequently I attach substantial weight to these benefits in the determination of this appeal.
38. The appeal scheme would further provide economic benefits in terms of employment opportunities during the construction phase and I accept that housing at this location may help maintain the vitality of Weston-on-the-Green and other nearby settlements. I attach moderate weight to these considerations in the determination of this appeal.
39. It has been further put to me by the Appellant that the appeal scheme would provide benefits in terms of financial contributions towards a new bus service. However, for the reasons given above, there is doubt as to whether the level of financial contribution towards a new bus service would be sufficient to ensure its long term viability and, consequently, I attached very limited weight to this consideration in the determination of this appeal.
40. In terms of environmental benefits, I accept that additional planting and landscaping may result in biodiversity enhancement, but I attach only limited weight to this consideration in the determination of this appeal by reason of the scale of the development.
41. Set against the potential benefits of the appeal scheme as described above, the development plan conflict in relation to the effect of the proposal on the character and appearance of the area and the setting of Weston-on-the-Green, and the conflict in relation to the appeal site's location with regards to access to services and facilities by means other than by private motor vehicle, weighs significantly against the proposal. Furthermore, I recognise that the WNP provides that twenty additional houses are sufficient at present, and that as the proposal would be for housing in excess of this, the appeal scheme would not accord with the aims and objectives of the WNP.
42. Whilst I acknowledge the suggestion by the Appellant that the Planning Obligation could be secured by means of a Grampian condition, most of the contributions secured by such documents would carry neutral weight in the planning balance as they are designed to make the development acceptable. The proposal would secure affordable housing which would have positive weight. However, this would still not be of sufficient weight to outweigh the harm identified above. Accordingly, I find that, in the event that planning obligations were secured, this would not alter the outcome of this decision in the overall planning balance.

43. In summary of the above, the proposal's conflict with the development plan when taken as a whole, and the environmental harm that would arise due to the likely reliance of future residents on use of private vehicles, weighs significantly against the appeal scheme. For the reasons given, I conclude that the potential benefits described above, either individually or in combination, would not outweigh the harm identified in relation to the development plan conflict. Consequently, the appeal scheme would not accord with the aims and objectives of the NPPF with regards to sustainable development.

Conclusion

44. For the reasons given above, I conclude that the appeal should be dismissed.

Appendix 25

Fritwell Committee Report

Case Officer: James Kirkham

Applicant: CALA Homes (Chiltern) Ltd

Proposal: The erection of up to 28 dwellings and associated site access onto Fewcott Road

Ward: Deddington

Councillors: Councillor Hugo Brown, Councillor Bryn Williams, Councillor Mike Kerford-Byrnes

Reason for Referral: Major development – 10 or more new dwellings

Expiry Date: 29 November 2019

Committee Date: 18th December 2019

EXECUTIVE SUMMARY OF PROPOSALS AND RECOMMENDATION

RECOMMENDATION: GRANT PERMISSION SUBJECT TO CONDITIONS AND SUBJECT TO A S106 LEGAL AGREEMENT

Proposal

The current application seeks permission for up to 28 dwellings on the site. The application is made in outline will all matters reserved except the principle means of access from Fewcott Road. An indicative layout has been provided demonstrating one way this quantum of development could be provided on the site.

Consultations

The following consultees have raised **objections** to the application:

- Oxfordshire Clinical Commissioning Group

The following consultees have raised **no objections** to the application:

- OCC Highways, OCC Rights of Way, Lead Local Flood Authority, OCC Education, CDC Planning Policy, CDC Ecology, CDC Tree Officer, CDC Strategic Housing, CDC Leisure and Recreation, CDC Environmental Protection Anglian Water

The following consultees are **in support** of the application:

- Fritwell Parish Council (subject to requirements), Mid-Cherwell Neighbourhood Forum (subject to requirements)

45 letters of objection have been received and 7 letters of support have been received.

Planning Policy and Constraints

A public footpath runs adjacent to the southern boundary of the site. The site is also located in the area covered by the Mid Cherwell Neighbourhood Plan and is lies outside the settlement areas identified in the Neighbourhood Plan. Fritwell Conservation Area also exists to the south west of the site.

The application has also been assessed against the relevant policies in the NPPF, the adopted Local Plan and other relevant guidance as listed in detail at Section 8 of the report.

Conclusion

The key issues arising from the application details are:

- Principle of Development
- Landscape and Visual Impact
- Site Layout and Design Principles
- Heritage
- Highways
- Ecology
- Affordable Housing and Housing Mix
- Flood Risk and Drainage
- Residential Amenity
- Impact on Local Infrastructure
- Other matters

The report looks into the key planning issues in detail, and Officers conclude that the proposal is acceptable subject to conditions and a legal agreement.

Members are advised that the above is a summary of the proposals and key issues contained in the main report below which provides full details of all consultation responses, planning policies, the Officer's assessment and recommendations, and Members are advised that this summary should be read in conjunction with the detailed report.

MAIN REPORT

1. APPLICATION SITE AND LOCALITY

- 1.1. The application site consists of a small grouping of fields forming part of the open countryside on the eastern edge of Fritwell, south of Fewcott Road. The site is relatively flat with the boundaries delineated by varying densities of trees and hedgerows. The site contains some small informally arranged outbuildings in its northeast corner. A public footpath runs immediately to the south of the site which separated from the site from a hedgerow and links through to Southfield Lane and on to East Street.
- 1.2. To the north of the site on the opposite side of Fewcott Road lies flat and expansive open countryside consisting of arable farmland. To the south and beyond the public footpath lies more paddock land, Lodge Farm and its associated farm buildings together with its fishing lakes. A track linking Lodge Farm with Fewcott Road passes down the eastern edge of the site. The 1990s residential development of Hodgson Close is located to the west where combinations of rear gardens and general amenity space border the site.
- 1.3. The site itself is not subject to any specific statutory or locally designated environmental or heritage constraints though the designated Fritwell Conservation Area lies to the south-west and incorporates not just buildings within the historic core of the village but also paddock land to the south-west of the site.

2. CONSTRAINTS

- 2.1. A public footpath runs adjacent to the southern boundary of the site and continues further to the east and west.
- 2.2. The site is also located in the area covered by the Mid Cherwell Neighbourhood Plan. Fritwell Conservation Area also exists to the south west of the site.

3. DESCRIPTION OF PROPOSED DEVELOPMENT

- 3.1. The current application seeks outline permission for to 28 dwellings on the site. All matters are reserved expect the principal means of access from Fewcott Road. This would also include the provision of a new public footpath to the south of Fewcott Road which would connect to the existing footpath adjacent to Hodgson Close.
- 3.2. An indicative layout has been provided with the application with shows the provision of 28 dwellings, public open space and a small paddock to the south of the site. It is also proposed to create a new pedestrian link to the public footpath of the south of the site.
- 3.3. When the original application was submitted the application was for 38 dwellings. Further to discussions with officers the application was reduced to 28 dwellings and the access to the site was moved closer to the village along Fewcott Road. These amendments have been subject to re-consultation.

4. RELEVANT PLANNING HISTORY

- 4.1. The following planning history is considered relevant to the current proposal:

<u>Application Ref.</u>	<u>Proposal</u>	<u>Decision</u>
16/01594/F	Erection of 34 dwellings	Withdrawn

This application was for development of the southern part of the existing site (it excluded the northern parcel of land closest to the village in this application) and was made in full. It was withdrawn prior to be formally determined by the Council. A Committee report was however published for the scheme which recommended it for refusal. The reasons for refusal included that the poor sustainability of the village to accommodate this level of growth (due to lack of services facilities, and public transport); the harm to the rural character of the village; the failure to integrate and respect the pattern of development; unacceptable mix of affordable and market houses; unacceptable in terms of design detail; inadequate amenity spaces and inadequate access. It should be noted that this scheme related to different overall site area, was prior to the adoption of the Mid Cherwell Neighbourhood Plan and considered matters relating to layout, appearance, landscaping and scale which are reserved in the current application.

5. PRE-APPLICATION DISCUSSIONS

- 5.1. The following pre-application discussions have taken place with regard to this proposal:

17/00283/PREAPP - Proposed residential development of 43 dwellings. This only related to the southern parcel of land and was prior to the adoption of the Mid Cherwell Neighbourhood Plan. This reiterated the advice given on the withdrawn planning application.

6. RESPONSE TO PUBLICITY

- 6.1. This application has been publicised by way of a site notice displayed near the site, by advertisement in the local newspaper, and by letters sent to all properties immediately adjoining the application site that the Council has been able to identify from its records (amend as appropriate). The final date for comments was 30/10/2019, although comments received after this date and before finalising this report have also been taken into account.
- 6.2. The comments raised by third parties are summarised as follows:

Object (45)

- Principle – The site is outside the boundaries of the village; Site is not previously developed land as supported in the MCNP; The proposals would undermine public faith in the planning system and the Neighbourhood Plan. There are already new houses under construction in the village. These should count towards the Neighbourhood Plan number. The Council's rural housing allocation has already been met. No need for more housing and existing properties struggle to sell. Many developments to meet housing need elsewhere in Bicester, Upper Heyford, etc. Similar applications have been resisted in the past and the current proposal is already. The reasons remain relevant. Proposal will set a precedent for more developments in the village. There is a proposal for further housing development by Lagan Homes elsewhere in the village.
- Sustainability – The village is unsustainable for this level of growth with limited services, facilities and very limited public transport. Occupiers will be car dependant to access services and facilities. Categorisation of the village as a Cat A is wrong. Public house in the village is no longer open.
- Impact on character and appearance of the area – Loss of greenfield countryside between villages contrary to MCNP; Impact on the rural character of the area; Loss of trees and landscaping; The development would result in prominent intrusion into open countryside. Upgrading the footpath would be detrimental to the rural character of the area and impact on the amenity of residents adjacent to this route.
- Impact on character and/or setting of the village – Detrimental visual impact on the village; Proposal is not integrated into the village. Scale of growth is inappropriate for the size of the village.
- Impact on residential amenity – Loss of privacy, outlook and light to neighbouring properties in Hodgson Close. Increase in noise, disturbance, overlooking and light pollution
- Impact on highway safety – Access is unsafe due to vehicle speeds and will lead to accidents. Village is already a 'rat run'. Increase in traffic. Inadequate visibility from the access. Inadequate parking
- Impact on wildlife and ecology. Little evidence of 'net gains'.
- Impact on infrastructure – Concerns regarding capacity of sewage system which has already suffered problems and increased flooding. Proposed footway may impact on drainage ditch. Additional pressure on local infrastructure. Developer should contribute to new infrastructure. Objections to this money being spent outside of the village. Additional community facilities should be provided or funds to buy the local pub

- The Parish Council's support – The Parish Council's comments are not correct and do not fairly represent the views of the community. Strongly disagree with the views of the Parish Council. Requests for the parish to remove support for scheme.
- Other – Affordable (social) housing should be provided. The application is in outline and the details may change. This is not transparent and matters of design, layout and housing mix. The submission documents are inaccurate. Support OCCG comments. Impact on Human Rights. No attempt by the developer to engage with the community.
- Benefits overstated – Any support the application will provide to the school will be short lived until children grow up. No direct link between the shop remaining open and the development.
- Planning obligations – Request for outdoor sport facilities contribution towards playing field including details of usage and potential projects. Fritwell Village Hall Committee requested contributions towards improvement which are detailed in their submission.

Support (7)

- Need – Support need for new housing. More residents means more people to support village facilities.
- Housing mix – Site has been identified as most appropriate site for new housing. Important there is a mix of dwellings to meet local need.
- Benefits to infrastructure – The School has written in support of the application as likely to increase school roll which has fallen in recent years.

Non material considerations

- Right to Light. Loss of view over field.

6.3. The comments received can be viewed in full on the Council's website, via the online Planning Register.

7. RESPONSE TO CONSULTATION

7.1. Below is a summary of the consultation responses received at the time of writing this report. Responses are available to view in full on the Council's website, via the online Planning Register.

PARISH/TOWN COUNCIL AND NEIGHBOURHOOD FORUMS

7.2. FRITWELL PARISH COUNCIL: Originally raised a number of concerns regarding the scheme and requested further information including the scale of the development; the highway impacts of the proposal; contributions for local facilities and mitigation; biodiversity enhancement; and drainage and sewerage. Following receipt of amended plans have the following comments:

7.3. **Supports** the application subject to a number of issues. Support housing for young people and downsizers to support community facilities. Note the inclusion of the site in the HELAA as 'suitable, available and achievable'. Consider the site is the most appropriate and sustainable for further development in Fritwell. The reduction in number of dwellings more closely complies with the Neighbourhood Plan and 35% is

proposed. The inclusion of 2 bungalows and 4 x 2 bed houses response to the views of residents. The amount of 3 and 4/5 bed houses needs to be reviewed. Request developer considered Neighbourhood Plans Forums comments on building design, construction and energy use.

- 7.4. Support the responses made by the playing field committee, village hall committee and primary school for the contributions to help improve and mitigate impacts of the development.
- 7.5. In relation transport note the village has no bus service and continues to campaign for a rural bus service and request a contribution towards subsidies for transport services. Parking should be increased to the maximum standard on the development given all occupants are likely to own a car. Parish welcome the inclusion of road calming along Fewcott Road including new signage, road markings and vehicle activated sign alongside proposal to move the spend limit. Request that further place making style road calming such as planted areas to narrow the entrance to the village and rumble strips (in keeping with those in Hodgson Close), and paved road areas be considered. Also welcomes connection to public right of way to the south of the site which should be surfaced to provide year-round access.
- 7.6. Support the Neighbourhood Plans response to consider low cost biodiversity measures like wild flower planting along verges or off-site.
- 7.7. MID CHERWELL NEIGHBOURHOOD PLAN FORUM: Objected to original proposal on ground of conflict with Policy PD1 and overall scale of development significantly exceeding the indicative growth of 25 dwellings.
- 7.8. Amended proposal: Supports subject to modification to housing mix to meet requirements set out in Policy PH1 and a clear statement for the developer they are prepared to consider the below points.
- 7.9. Pleased to see a reduction in number of dwellings but still exceeds indicative figure of 25 set out in the Neighbourhood Plan. Furthermore have concern that taking the scale of the current development would mean the whole allocation for housing growth in the village would be taken up immediately and may prevent any further development in the village for the rest of the plan period. They also raised concern with the housing mix against Policy PH1 and note there are too many '4 or more' bedroom properties and not sufficient 3 bed properties. In order to support the proposal, requests a number of outcomes are committed to in a Section 106:
 - Should be an exemplar scheme in respect of climate change designed to minimise energy consumption and avoid use of fossil fuels. Use of ground source heat pumps and highly insulated dwellings should be considered.
 - Serious consideration of making the scheme a pilot for off-site modular construction
 - Provide net gain biodiversity which exceeds the minimum
 - Provide support for local transport options; charging points for electric vehicles; traffic calming measures; new speed signs linked to mains electricity; enhancement of children's play area on playing field; provision of more recreational and sports facilities within Fritwell for all ages; support for the existing Village Hall, including additional storage, repairs and improved car park; developer funding directed to works in the village to benefit Fritwell residents

CONSULTEES

- 7.10. OCC HIGHWAYS: Objected to original application.
- 7.11. Amended plans: **No objection** subject to S106 to secure £15,000 for improvements to the Public Right of Way to the south of the site and an obligation to enter into a S278 agreement (construction of the site access, extension of the 30mph speed limit, construction of footway from site access to join existing footpath in village, land ownership and visibility splays, village entry treatment including traffic calming) and planning condition.
- 7.12. The traffic impact of the development is considered to be acceptable and not result in severe impact. The reduction in dwellings further reduces this impact. This site access has been amended and it has been sufficient visibility based on the speed surveys for the site can be achieved. The land within the visibility splays appears to be land either owned by the application, classified as public highway or is the highway ditch. As part of the S278 agreement part of this ditch will need to become within the applicants control through the land registry.
- 7.13. The application includes alterations to the highway directly in front of the application site, this includes extending the 30mph speed limit, new VAS speed limit sign and relocation of gateway and dragons teeth on carriageway. This will be done via S278 agreement and will require consultation.
- 7.14. In terms of pedestrian access the proposal is for a 1.8m footway to Fewcott Road. This is required to enable residents to walk into the village. The link to the south allows more permeability and better access to other parts of Fritwell and a contribution is sought to upgrade this to allow increase use to a better standard.
- 7.15. The indicative level of parking of 54 allocated and 10 visitor spaces in accordance with the OCC Standard however visitor bays need to be increase in width. Cycle parking provision should also be made for the dwellings.
- 7.16. Travel information packs should be provided for residents to encourage sustainable transport choices and vehicle tracking will be required.
- 7.17. OCC RIGHTS OF WAY: **No objection** subject to a upgrading the public right of way to the south of the site. Also request conditions on no obstruction of the footpath, no changes to footpath without agreement, no vehicular access along footpath and no gates opening onto footpath.
- 7.18. CDC ECOLOGY: **No objections** subject to conditions. The report is sufficient in scope and depth. No significant protected issues on the site however there is potential for bats to be present in the trees and potential reptiles and nesting birds and timing constraints and methodology of clearance is needs. These are covered in the submitted survey and could be including in CEMP for Biodiversity condition
- 7.19. The Biodiversity Metric submitted indicates there will be a reasonable level of net gain however raises queries where the open water and marginal vegetation will be provided. The fencing and walls must have gaps at their base and bird and bat boxes provided.
- 7.20. NATURAL ENGLAND: **No comments.**
- 7.21. CDC TREE OFFICER: **No objections.** The amended layout has lessened concerns regarding the site entrance, vision splays and plots to the south of the site.
- 7.22. CDC LANDSCAPE OFFICER: (on original submission) Comment. The existing boundary planting is a major design constraint. It does not appearance to have

informed the LVIA. The loss of planting for the visibility splay needs to be better understood. Viewpoints from the public right of way to the north of the site would have a major significance of effect which could be moderated over time will planting. Space is required between the visibility space and the plots on the northern boundary to help mitigate impact of PROW and roadside receptors. Concerns regarding plots very close to southern boundary and there may be pressure to reduce height of hedge increasing visual impacts. Suggest properties are moved from the southern boundary. No attenuation tanks should be provided under the LAP.

- 7.23. LEAD LOCAL FLOOD AUTHORITY: **No objection** subject to conditions on details surface water strategy, management and maintenance.
- 7.24. OCC EDUCATION: **No objections** subject to contributions towards secondary school capacity at Heyford Park School. No contributions sought to nursery, primary or SEN provision.
- 7.25. ANGLIAN WATER: **No objection.** The wastewater treatment and sewerage system has capacity for these flows. The proposal does not propose to discharge surface water to Anglian Water assets. Request informative regarding assets near the site, connections and protection of existing assets.
- 7.26. OXFORDSHIRE CLINICAL COMMISSIONING GROUP: **Objects** on the basis it will put further pressure on primary care services supporting the Fritwell Area. The main GP practices which cover this area are Deddington Practice and Alchester Medical group. The application will increase the population by c.67 people, which will put direct pressure on the ability of the practices to continue to provide primary care services, without funding to support their infrastructure needs. Highlight growth in population in both these areas. Seek £360 per head to support capital projects associated with either of the two practices, to ensure primary care services are provided directly or indirectly to the development population.
- 7.27. CDC STRATEGIC HOUSING: **No objection.** Requests 10 affordable units with the indicative mix of tenures and sized:
- 2 x 1b2pM – Social Rent
 - 3 x 2b4pH – Social Rent
 - 2 x 2b4pH – Shared Ownership
 - 1 x 3b5pH – Social Rent
 - 1 x 3b5pH – Shared Ownership
 - 1 x 4b7pH – Social Rent
- 7.28. This represents a 70/30 split between (Social Rent level) rented units and Shared Ownership units as stated in our adopted Local Plan Part 1, Policy BSC3 and blends the findings of the most recent county-wide Strategic Housing Market Assessment, with our own district-specific levels of in-house data. 50% of the social rent should meet M4(2)(2) requirement and all rental units should be to national space standard. Expect parking for all units
- 7.29. CDC LEISURE AND RECREATION: **Comment.** Request contributions towards improvements to Fritwell Village Hall, outdoor sports (improvements to Fritwell Playing field for benefit/improvement of sport) and off-site indoor sports facilities

(contribution towards Bicester Gymnastics Club to develop a specialist gymnastics in Bicester for the Bicester and District Gymnastics Club)

7.30. CDC BUILDING CONTROL: **No comment.**

7.31. CDC ENVIRONMENTAL PROTECTION: **No objections** subject to Construction Environmental Management Plan, full land investigation conditions, air quality condition and electric charging points. No comments in relation to odour or light.

8. RELEVANT PLANNING POLICY AND GUIDANCE

8.1. Planning law requires that applications for planning permission must be determined in accordance with the development plan unless material considerations indicate otherwise.

8.2. The Cherwell Local Plan 2011-2031 - Part 1 was formally adopted by Cherwell District Council on 20th July 2015 and provides the strategic planning policy framework for the District to 2031. The Local Plan 2011-2031 – Part 1 replaced a number of the ‘saved’ policies of the adopted Cherwell Local Plan 1996 though many of its policies are retained and remain part of the development plan. The relevant planning policies of Cherwell District’s statutory Development Plan are set out below:

MID-CHERWELL NEIGHBOURHOOD PLAN 2018-2031 (Feb 2019)

- PD1 – Development at Category A Villages
- PD4 – Protection of Important Views and Vistas
- PD5 – Buildings and Site Design
- PD6 – Control of Light Pollution
- PH1 – Open Market Housing Schemes
- PH3 – Adaptable housing
- PH5 – Parking, garaging and storage
- PC2 – Health Facility at Heyford

CHERWELL LOCAL PLAN 2011 - 2031 PART 1 (CLP 2031 Part 1)

- PSD1 – Presumption in Favour of Sustainable Development
- SLE4 – Improved Transport and Connections
- BSC1 – District Wide Housing Distribution
- BSC2 – The Effective and Efficient Use of Land – Brownfield land and Housing Density
- BSC4 – Housing Mix
- BSC10 – Open Space, Outdoor Sport and Recreation Provision
- BSC11 – Local Standards of Provision – Outdoor Recreation
- BSC12 – Indoor Sport, Recreation and Community Facilities
- ESD1 – Mitigating and Adapting to Climate Change
- ESD2 – Energy Hierarchy and Allowable Solutions
- ESD3 – Sustainable Construction
- ESD6 – Sustainable Flood Risk Management
- ESD7 – Sustainable Drainage Systems (SuDs)
- ESD10 – Protection and Enhancement of Biodiversity and the Natural Environment
- ESD13 – Local Landscape Protection and Enhancement
- ESD15 – The Character of the Built and Historic Environment
- Villages 1 – Village Categorisation

- Villages 2 – Distribution Growth Across the Rural Areas
- INF1 – Infrastructure

CHERWELL LOCAL PLAN 1996 SAVED POLICIES (CLP 1996)

- H18 – New dwellings in the countryside
- C8 – Sporadic development in the open countryside
- C28 – Layout, design and external appearance of new development
- C30 – Design of new residential development
- ENV1 – Environmental pollution
- ENV12 – Potentially contaminated land

8.3. Other Material Planning Considerations:

- National Planning Policy Framework (NPPF)
- Planning Practice Guidance (PPG)
- Annual Monitoring Report (AMR) 2018
- Cherwell Residential Design Guide SPD 2018
- Developer Contributions SPD 2018
- Circular 06/2005 (Biodiversity and Geological Conservation)
- Human Rights Act 1998 (“HRA”)
- Equalities Act 2010 (“EA”)

9. APPRAISAL

9.1. The key issues for consideration in this case are:

- Principle of Development
- Landscape and Visual Impact
- Site Layout and Design Principles
- Heritage
- Highways
- Ecology
- Affordable Housing and Housing Mix
- Flood Risk and Drainage
- Residential Amenity
- Impact on Local Infrastructure
- Other matters

Principle of Development

Policy Context

9.2. Section 38(6) of the Planning and Compulsory Purchase Act 2004 requires that any application for planning permission must be determined in accordance with the Development Plan unless material considerations indicate otherwise. The Development Plan for the District comprises the adopted Cherwell Local Plan 2011-2031 and the saved policies of the Cherwell Local Plan 1996. The Development Plan in this area also includes the Mid-Cherwell Neighbourhood Plan which was adopted in February 2019.

9.3. The National Planning Policy Framework (NPPF) explains that the purpose of the planning system is to contribute to the achievement of sustainable development. This is defined as meeting the needs of the present without compromising the ability of future generations to meet their own needs. Paragraph 7 of the NPPF sets out

the Government's view of what sustainable development means in practice for the planning system – the three strands being the economic, social and environmental roles. It is clear from this that as well as proximity to facilities, sustainability also relates to ensuring the physical and natural environment is conserved and enhanced as well as contributing to building a strong economy through the provision of new housing of the right type in the right location at the right time.

- 9.4. The NPPF does not change the statutory status of the development plan as the starting point for decision making. Proposed development that conflicts with the Local Plan should be refused unless other material considerations indicate otherwise. Cherwell District Council has an up-to-date Local Plan which was adopted on 20th July 2015 and can demonstrate a 5 year housing land supply. The Written Ministerial Statement of 12 September 2018 now considers important policies for determining the application to be out of date only where a 3 year supply of deliverable sites cannot be demonstrated in Cherwell.
- 9.5. Policy PD1 of the Mid-Cherwell Neighbourhood Plan (MCNP) states that in Category A Villages, such as Fritwell infill, conversion and minor development will be supported in principle within the settlement limits (as defined in the Neighbourhood Plan). It states that residential development proposals outside the settlement areas in such villages must have regard to the following criteria:
- Be immediately adjacent to the village
 - Not be best and most versatile agricultural land and previously developed land is particularly likely to be acceptable.
 - Conserve and, wherever possible, enhance the landscape.
 - Conserve and, where possible, enhance heritage assets
 - Not give rise to coalescence with other nearby settlements.
- 9.6. Policy PD1 of the MCNP goes on to state that the *'total indicative number of additional dwellings permitted during the plan period either within the settlement area of those villages, or adjacent to them, shall be approximately 25 for Fritwell'*.
- 9.7. The overall housing strategy in the Cherwell Local Plan 2011-2031 (including Policy BSC1) is to focus strategic housing growth at the towns of Banbury and Bicester and a small number of strategic sites outside of these towns. With regards to villages, the Local Plan notes that the intention is to protect and enhance the services, facilities, landscapes and natural and historic built environments of the villages and rural areas. It does however advise that there is a need within the rural areas to meet local and Cherwell-wide needs.
- 9.8. Policy Villages 1 of the CLP 2031 provides a framework for housing growth in the rural areas of the district and groups villages into three separate categories (A, B and C), with Category A villages being considered the most sustainable settlements in the District's rural areas which have physical characteristics and a range of services within them to enable them to accommodate some limited extra housing growth. Fritwell is classified as a Category A village.
- 9.9. In order to meet the areas housing needs Policy Villages 2 of the CLP 2015 states that: *"A total of 750 homes will be delivered at Category A villages. This will be in addition to the rural allowance for small site 'windfalls' and planning permissions for 10 or more dwellings as at 31 March 2014"*. This Policy notes that sites will be identified through the preparation of the Local Plan Part 2, through the preparation

of the Neighbourhood Plans where applicable, and through the determination of applications for planning permission.

9.10. Policy Villages 2 then sets out that when identifying and considering sites, particular regard will be given to the following criteria:

- *“Whether the land has been previously developed land or is of less environmental value;*
- *Whether significant adverse impact on heritage and wildlife assets could be avoided;*
- *Whether development would contribute in enhancing the built environment;*
- *Whether best and most versatile agricultural land could be avoided;*
- *Whether significant adverse landscape impacts could be avoided;*
- *Whether satisfactory vehicular and pedestrian access/egress could be provided;*
- *Whether the site is well located to services and facilities;*
- *Whether necessary infrastructure could be provided;*
- *Whether land considered for allocation is deliverable now or whether there is a reasonable prospect that it could be developed within the plan period;*
- *Whether land the subject of an application for planning permission could be delivered within the next five years; and*
- *Whether development would have an adverse impact on flood risk.”*

Assessment

9.11. As outlined above the Development Plan in this case consists of both the Cherwell Local Plan Part 1 (2015) (CLP) and the MCNP (2019). The application site is considered to fall outside of the built up limits of the village and is also outside the settlement boundaries identified in the MCNP. The most relevant policy to consider in relation to this application under the CLP (2015) would be Policy Villages 2, which provides a rural allocation of 750 dwellings to be provided at Category A Villages and significant progress has been made in regard to this allocation.

9.12. However, in this case Policy PD1 of the MCNP identifies an indicative level of growth to the Fritwell over the plan period (as outlined below) and there may be considered to be some conflict between these policies. The Planning Practice Guidance (PPG) and Section 38(5) of the Planning and Compulsory Purchase Act 2004 states that, where policy in a development plan for an area conflicts with another policy in the development plan, the conflict should be resolved in favour of the policy which is contained in the last document to be adopted, approved or published. In this case this would be the MCNP. Therefore, MCNP Policy PD1 is considered to take precedent over Policy Villages 2 – although the criteria of Policy Villages 2 are still considered to be relevant to the consideration of the application.

9.13. Policy PD1 of the MCNP states that an indicative number of additional dwellings permitted within or adjacent to Fritwell over the plan period (2018-2031) will be approximately 25 dwellings. It is clear from the use of the words ‘indicative’ and ‘approximately’ in the policy that 25 dwellings is not a ceiling and must be viewed as a guideline for the level of growth envisaged, and flexibility therefore applied in this respect whilst having regard 25.

9.14. At the current time 1 dwelling has been granted permission in the plan period (i.e. 2018-2031) in Fritwell (19/01402/OUT refers) and another single dwelling (19/02162/F refer) is pending consideration. Several objectors to the application

has referred to existing housing sites which are undergoing construction at the Former George and Dragon Site (17/01954/F refers for 7 dwellings) and a development of 8 dwellings on Fewcott Road (13/01347/F refers) which they consider should count towards this allocation. However, given these were granted prior to the plan period for the Neighbourhood Plan which covers the period 2018-2031, they do not count towards the level of growth specified in the Neighbourhood Plan (i.e. approximately indicatively 25 dwellings).

- 9.15. During the course of the application the number of dwellings proposed as part of the current application has been reduced from 38 dwellings to 28 dwellings in response to significant concerns raised by officers regarding the scale of growth proposed as originally submitted in the context of the housing strategy in the Neighbourhood Plan. Granting planning permission for the current application would result in a total of 30 dwellings being permitted in Fritwell within the plan period (if a pending separate application is approved for a single dwelling elsewhere in the village). Officers consider, on balance, that this level of growth complies with the indicative level of growth that is proposed to be provided in Fritwell through the Neighbourhood Plan.
- 9.16. Several concerns have been raised by neighbours over the general sustainability of village to accommodate this level of growth and prior to the adoption of the MCNP this was a significant concern of Officers. The village of Fritwell has relatively limited services and facilities including a school, a small shop, a play area, pub (albeit currently closed) and village hall. There is also no meaningful public transport to the village resulting in residents being highly reliant on the private car. Whilst these concerns do still exist, the MCNP clearly indicates a level of growth for the village and as outlined above the proposal is considered to accord with the MCNP's housing strategy. There has been no significant change in services to the village since the adoption of the MCNP which would justify taking a different position on this issue.
- 9.17. The basis of the planning system is plan-led and therefore the aforesaid concerns regarding the general sustainability of the village do not outweigh the provision of the recently adopted neighbourhood plan in regard to the scale of growth appropriate for the village. It should also be noted that the proposed development is likely to help support the existing services and facilities (shop, school and pub – in the event it re-opens) in the village to some extent although this is hard to fully quantify; and the governors of the primary school have supported the application.
- 9.18. The Neighbourhood Plan Forum has noted that Policy PD1 relates to all new housing 'within' and 'outside' of the built limits of the village over the whole of the plan period and has concerns that permitting 28 dwellings on the current site at an early point in the plan period may result in further development in the village taking the level of growth in the village into what they regard as 'unacceptable territory'. Whilst Officers sympathise with this view to some extent, Policy PD1 does not include any phasing of the indicative level of growth of 25 dwellings over the plan period and there is no limit on the amount of the envisaged development that comes forward on any one site. There are some benefits of allowing growth on a larger site (as opposed to multiple smaller sites) as planning obligations can be provided to mitigate impacts on infrastructure and affordable housing can be secured. This could not be insisted upon on smaller sites (of under 10 units). Each future application would need to be assessed on its own merits so any future growth in Fritwell would need to be considered in the context of the housing strategy outlined in Policy PD1 of the MCNP and other relevant policies and a view taken at the time as to whether the level of growth proposed would conflict with the Development Plan when read as a whole. Therefore, this matter is not considered to be a matter that would justify refusing consent on its own.

- 9.19. Policy PD1 goes onto provide several criteria to which applications for development outside the settlement must have particular regard. It is important to note that the policy has no requirement for all these criteria to be met although they clearly are material considerations in undertaking the planning balance. The current proposal is considered to comply with a number of these criteria. The site is located immediately adjacent to the village and would conserve heritage assets (as outlined below). It would also not give rise to coalescence with other settlements given the distance that would exist to the neighbouring villages. The site is not previously developed so does not gain support from that criteria. The issues relating to the use of best and most versatile agricultural land and landscape impact are outlined elsewhere in this report and need to be considered in the planning balance.
- 9.20. Several comments have also referred a proposal by Lagan Homes at Forge Place which may come forward in the future. However, this is not relevant to the current application and each application has to be assessed on its own merits. The Council has no formal proposals before them for an alternative development. Therefore, this is not considered to carry any significant weight in the context of the current application.

Conclusion

- 9.21. The most relevant policy to consider the principle of the application against is considered to be Policy PD1 of the MCNP. On balance, the scale of growth is considered to broadly comply with the Policy PD1 and therefore to accord with the growth strategy outlined in the Neighbourhood Plan. Subject to other material considerations the principle of this level of growth at Fritwell is therefore considered to be acceptable.

Landscape and visual impact and impact on the character of the area

Policy context

- 9.22. Government guidance contained within the NPPF towards achieving well-designed places states that the creation of high quality buildings and places is fundamental to what the planning and development process should achieve. The NPPG goes on to note that good design is a key aspect of sustainable development, creates better places in which to live and work and helps make development acceptable to communities. Further, Paragraph 130 of the NPPF states that permission should be refused for development of poor design that fails to take the opportunities for improving the character and quality of an area and the way it functions. Paragraph 170 states planning decisions should contribute and enhance the natural and local environment recognising the intrinsic character and beauty of the countryside.
- 9.5. Paragraph 127 of the NPPF states that planning decisions should ensure that developments:
- Will function well and add to the overall quality of the area, not just for the short term but over the lifetime of the development;
 - Are visually attractive as a result of good architecture, layout and appropriate and effective landscaping;
 - Are sympathetic to local character and history, including the surrounding built environment and landscape setting
 - Establish or maintain a strong sense of place, using the arrangement of streets, spaces, building types and materials to create attractive, welcoming and distinctive places to live, work and visit;

9.23. Policy ESD15 of the Cherwell Local Plan Part 1 states that: *“New development proposals should:*

- *Contribute positively to an area’s character and identity by creating or reinforcing local distinctiveness and respecting local topography, including skylines, valley floors, significant trees, historic boundaries, landmarks, features or views.*
- *Respect the traditional pattern routes, spaces, blocks, plots, enclosures and the form, scale and massing of buildings. Development should be designed to integrate with existing streets and public spaces, and buildings configured to create clearly defined active public frontages.”*

9.24. Policy ESD13 of the Cherwell Local Plan Part 1 states that: *“Development will be expected to respect and enhance local landscape character, securing appropriate mitigation where damage to local landscape character cannot be avoided. Proposals will not be permitted if they would:*

- *Cause undue visual intrusion into the open countryside;*
- *Cause undue harm to important natural landscape features and topography;*
- *Be inconsistent with local character;*
- *Harm the setting of settlements, buildings, structures or other landmark features;*
- *Harm the historic value of the landscape.”*

9.25. Policy Villages 2 also states regard will be had to whether a proposal would have significant adverse impacts on heritage, whether development would contribute to enhancing the built environment and whether significant adverse landscape and impacts can be avoided in determining applications under that policy.

9.26. Saved Policy C28 of the Cherwell Local Plan 1996 exercises control over all new developments to ensure that the standards of layout, design and external appearance are sympathetic to the character of the context and Saved Policy C8 seeks to limit sporadic development beyond the built limits of settlements.

9.27. The Cherwell Residential Guide SPD (2018) builds on the above policies and provides a framework to deliver high quality locally distinctive development.

9.28. Policy PD5 of the MCNP states that new development is required to high quality and reflect the guidance and principles set out in the Heritage and Character Assessment accompanying the Neighbourhood Plan. It goes onto state proposals should include appropriate landscape measure to mitigate impacts and be in keeping with the rural character of the village.

Assessment

9.29. The application is a flat grassland paddock with hedgerows along the southern, eastern and western boundaries. It is part of the wider paddock land to the east of Fritwell with expansive flat open arable farmland beyond to the north east and east. The natural landscape of the area is defined within the Oxfordshire Wildlife and Landscape Study of 2004 (OWLS) (referenced in Policy ESD13 of the CLP 2031 Part 1) as being of Farmland Plateau landscape type which is generally characterised by large level arable fields, sparse settlements with small grassland fields surrounding villages with long straight country roads between villages. The

strategy for this area as set out in OWLS is to conserve the open and remote character of the landscape type.

- 9.30. On entry to Fritwell from the east along Fewcott Road the village is prominent in views within its surrounding flat farmland landscape which creates a rural setting for the village. Whilst the site itself is not part of a designated landscape or intrinsically interesting or beautiful in landscape terms, it is nonetheless an archetypal part of the rural north Oxfordshire countryside and complements the Farmland Plateau landscape character with its surrounding paddocks and farmland contributing towards the experience of the rural character of the village.
- 9.31. The site is separated from the wider open countryside by the track serving Lodge Farm to the east and is arranged in a smaller field pattern than the surrounding more expansive fields which surround the village in this location. Hedgerows on the boundaries of the site and the presence of some informal buildings in the north west corner of the site also give the site a sense of enclosure and some sense of separation from the surround countryside.
- 9.32. The proposed development would lead to the loss of this site to development and would represent an encroachment into the open countryside as any loss of greenfield site at the edge of the village would. However, as noted above this site already has a different character to the wider more expansive countryside setting of the village which exists to the north and east of the site which somewhat limits the impact on the wider landscape character.
- 9.33. The illustrative layout for the proposed development seeks to retain and strengthen the planting on the eastern boundary of the site which borders the large arable field to the east. This would provide a further degree of containment to the site in terms of the wider landscape and visual impacts. Whilst views of the development from Fewcott Road to the west of the site and the public footpath that crosses the field to the west of the site would still be available, these would be filtered to some extent and diminish in time and distance.
- 9.34. The hedgerow to the south of the site, which separates the development from the public footpath (ref: 219/6/10), is largely to be retained with the exception of a small amount which would be lost to provide a pedestrian connection to this footpath which links back into the village. This footpath already runs along the side of several properties to the west of the site and the indicative plans have been amended to create a small paddock to the south of the site which would help soften the views of the development from the south and set the development away from this boundary.
- 9.35. The requirement for visibility splays at the site access with Fewcott Road means that much of the planting to the east of the proposed access on the northern boundary will need to be removed and this will open up views of the site in views from the road and the areas to the northern of the site. This would include the public bridleway (ref 219/11/10) which traverses the agricultural field approximately 200 metres to the north of the site and extends between the recreation ground and M40. Views from this footpath and the road to the front of the site would be relatively stark upon completion and would lead to some harm. However, it is proposed to plant new trees, shrubs and hedgerow planting in native species in this location on the northern boundary to help mitigate the impacts of the development to some extent and with landscaping being a reserved matter this could be controlled through subsequent applications. Furthermore, views from the public right of way are viewed in the context of the existing development at the edge of the village and are viewed from a distance of approximately 250 metres.

- 9.36. Views of the proposal would also be visible from other public footpaths to the east of the site; however, given the relatively flat topography of the area, existence of planting, and the fact many would be seen in the context of the existing built form of the village, these are not considered to lead to significant adverse impacts
- 9.37. In terms of the impact of the development on the immediate setting of the village, the proposed development would undoubtedly lead to some harm through the urbanisation of the site. However, the proposed development has to be viewed in the context of the aspirations of the MCNP to direct some growth to the village and given the scale of growth this is likely in officers' opinion to lead to the development of existing open land outside the settlement limits. The proposal is located at one of the less sensitive edges of the village from a heritage perspective and the proposed development would be viewed in the context of the existing more modern development at Fewcott View and Hodgson Close, the latter of which also provides development in a similar depth to the current proposal at the edge of the village. The screening which exists around the site and presence of the access to Lodge Farm also provides visual containment to the site and the countryside beyond.
- 9.38. Views of the proposal would also be available from the properties within Hodgson Close; however, these would be generally private views from properties over open countryside which are not given the same weight in planning decisions given that the planning system operates in the public rather than private interests. The impact on the residential amenity of these properties is covered elsewhere in this report.
- 9.39. The site was recently considered in the Housing and Economic Land Availability Assessment (HELAA 2018) where it was concluded that the site was suitable, available and achievable for housing. However, this document is only part of the evidence base to inform the plan making process and it is not considered to carry significant weight in decision making. It has not been subject to the robust scrutiny of public examination and it does not allocate land for development. It merely provides part of an evidence basis to allow the local authority to proactively plan for their housing and economic growth needs in future plans. The starting point for decision making is the up to date Development Plan and the development should be assessed in accordance with the policies within the Development Plan. This is reinforced by the Planning Practice Guidance. This matter is therefore only given limited weight in favour of the proposal.

Conclusion

- 9.40. Overall the impact of the development on the landscape character area is considered to moderate. There would be visual impacts associated with the development and with the more significant visual impacts of the development particularly from the north and east however these can be mitigated to some extent through additional planting and screening to the boundaries. The site is at one of the less sensitive entrances to the village to change and is relatively well contained by existing features. This harm needs to be weighed in the planning balance when considering the development as a whole.

Site Layout and Design Principles

Policy Context

- 9.41. Policy ESD15 of the CLP 2015 provides guidance as to the assessment of development and its impact upon the character of the built and historic environment. It seeks to secure development that would complement and enhance the character of its context through sensitive siting, layout and high quality design meeting high design standards and complementing any nearby heritage assets. The National

Planning Policy Framework is clear that good design is a fundamental to what the planning and development process should achieve. BSC2 of the CLP 2015 states that new housing should be provided on net development areas at a density of at least 30 dwellings per hectare unless there are justifiable reasons to lower the density.

- 9.42. Policy PD5 states that new development is required to high quality and reflect the guidance and principles set out in the Heritage and Character Assessment accompanying the Neighbourhood Plan. It goes onto state proposal should include appropriate landscape measure to mitigate impacts and be in keeping with the rural character of the village. Policy PH5 states parking should be built in direct association with the dwellings they serve and should be large enough to accommodate modern cars and bicycles.
- 9.43. The Council's Design Guide SPD seeks to ensure that new development responds to the traditional settlement pattern and character of a village. This includes the use of continuous building forms along principle routes and the use of traditional building materials and detailing and form that respond to the local vernacular.

Assessment

- 9.44. The application is in outline with all matters reserved except for access from Fewcott Road. The application is accompanied by an indicative layout and a Design and Access Statement, which indicates one way in which the site could be developed. It includes a public open space to the centre of the development around a mature tree, a small paddock area to the south and landscape buffers to north and east of the site.
- 9.45. Whilst many of the principles (including those outlined above) within the proposed indicative layout are considered appropriate for the site officers have several concerns which would need to be fully addressed as a part of a subsequent reserved matters application. For example, whilst frontage is created to the majority of Fewcott Road, the plot closest to the village is shown to have a side garden boundary wall creating the frontage which would not be in keeping with the pattern of development where there is generally a stronger frontage facing onto Fewcott Road. It is also considered that the plots to the east of the site should be further set into the plot to provide a gentler transition into the village.
- 9.46. Officers also have concerns that the proposed dwellings appear to be based on the more modern developments in the local village with deep plan forms and narrow frontage rather than the more traditional vernacular building form which is generally shallower plan form and wider frontage. The layout also appears rather gappy in places and lacks any continuous frontage; and the building styles indicated in the submitted Design and Access Statement would be overly complex and would not reflect the simpler vernacular form and detail. More defined boundary treatment and the use of limestone would all aid in improving the quality of the scheme and reflect the aspirations of the MCNP and other policy. However, given the current application is made in outline, these matters could be addressed through a reserved matters application.
- 9.47. The density of the scheme (excluding the paddock area to the south) equates to approximately 20 dwelling per hectare and is therefore relatively low density. Policy BSC2 of the CLP states that dwellings should be provided at 30dph unless there are justifiable planning reasons for a lower density. In this case the site lies at the edge of the village where the surrounding development has a relative low density. Furthermore, there is a need to provide landscape mitigation to the boundaries of the site. On balance the density is considered acceptable.

- 9.48. The illustrative layout seeks to retain the higher value trees on the site and integrate them into the layout and public open spaces. The layout demonstrates an appropriate level of public open space can be provided at the site including the area to the centre of the site countryside and areas around the boundaries of the site to comply with the requirements to general amenity space under Policy BSC11 of the CLP 2015 (approx. 0.2 hectares). Policy BSC11 also requires the provision of a local area of play (LAP); however, the parish council had requested a commuted sum to help upgrade the existing play area near the school and this can be secured through a legal agreement. This play area is approximately 250 metres from the site and is considered an acceptable alternative by officers to on-site provision.
- 9.49. In terms of integration with the surround movement network the proposal seeks to provide a new footpath along the frontage of Fewcott Road to join with Hodgson Close which will allow residents to access the village in a safe fashion on foot. It is also proposed to update the surface of the public footpath to the south of the site which would provide an alternative and more convenient link to Southfield Lane and East Street where the shop and public house exist. Whilst this route is not ideal it does improve the permeability of the development and the integration into the village.
- 9.50. Overall therefore it is considered that an acceptable layout and detailing can be negotiated at a reserved matters stage when matters of layout, appearance and landscaping are fully considered.

Heritage Impact

- 9.51. The designated Fritwell Conservation Area lies to the west and south-west of the site covering both the historic built core of the village as well as some of the paddocks to the south. Conservation Areas are designated heritage assets, and Paragraph 193 of the NPPF states that: *when considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation (and the more important the asset, the greater the weight should be). This is irrespective of whether any potential harm amounts to substantial harm, total loss or less than substantial harm to its significance.* Policy ESD15 of the CLP 2031 Part 1 and Policy PD4 echoes this guidance and this extends to the consideration of setting if the Conservation Area.
- 9.52. The development of the type and scale proposed on the site is not considered to be readily experienced from within the Conservation Area subject to an appropriate layout and is not considered to impact notably on its setting from main viewpoints from the Conservation Area in this locality given the intervening modern housing developments as well as landscape features. Officers are therefore satisfied that the proposals would not directly or indirectly harm the special character and appearance of the Conservation Area and so the proposals would not conflict with national or local planning policy in this regard

Highways

- 9.53. Policy ESD15 of the Cherwell Local Plan Part 1 states that: "New development proposals should be designed to deliver high quality safe, attractive, durable and healthy places to live and work. Development of all scales should be designed to improve the quality and appearance of an area and the way it functions." Policy SLE4 states that: "All development where reasonable to do so, should facilitate the use of sustainable modes of transport (and) development which is not suitable for the roads that serve the development and which have a severe traffic impact will not be supported." Policy PD5 of the MCNP seeks to ensure requires the provision of new footpaths to provide access to services and facilities of the village. The NPPF

advises that development should provide safe and suitable access for all and development should only be prevented or refused on transport grounds where the residual cumulative impacts are severe.

Assessment

- 9.54. The current application proposes to create a new 5.5 metre wide vehicle access from Fewcott Road into the development and also provide a new public footpath along Fewcott Road to link into the existing footpath at Hodgson Close.
- 9.55. When the application was originally submitted the Local Highway Authority (LHA) raised concerns over the visibility from the proposed access given the posted speed limit (60mph). Since this time the access has been relocated closer to the village and information of speed surveys undertaken at the site frontage been provided showing the 85th percentile speeds of 34.4mph for northbound traffic and 36.7mph for southbound traffic. The applicant has also proposed a number of works to the highway to help reduce vehicle speeds including the relocating the existing speed gate feature on Fewcott Road to a point approximately 30 metres to the south of the proposed site access, the provision of a Vehicle Activated Sign (VAS) and “dragons teeth” road markings. It is also proposed to relocate the existing 30mph speed limit which would be subject to a Traffic Regulation Order. Further to this information the LHA has raised no objection to the provision the new access and it is considered to be acceptable in terms of visibility and tracking. The works outlined above to create the access and undertake the highway improvement works would need to be secured through a S278 Agreement via the Section 106 agreement. The pedestrian link back to the village along Fewcott Road is also considered to be essential to provide pedestrian access and integration to the remainder of the village and the LHA is now satisfied this can be achieved in an acceptable manner.
- 9.56. The Parish Council has requested that further place making style road calming such as planted areas to narrow the entrance to the village and rumble strips (in keeping with those in Hodgson Close), and paved road areas be considered along Fewcott Road. However, Officers do not consider this is justified or necessary to make the proposal acceptable in planning terms in light of the LHA’s comments.
- 9.57. The LHA has not raised any objection to the application in terms of the impact of traffic generation on the highway network terms. Government guidance in the NPPF is clear that development should not be resisted on transport grounds except where the cumulative impact of congestion would be ‘severe’. This is a high test and is not considered the case in this application where the traffic impact would be relatively modest given the scale of the development and where there is no evidence that the existing highway network is at or near capacity.
- 9.58. The layout submitted is indicative, but it is also proposed to create a new link to the public right of way which exists to the south of the site and provides access to the East Street. This is considered important in terms of connecting and linking the site to the surrounding movement network and its provision can be controlled through a planning condition. The Highway Engineer and the Public Rights of Way (PRW) Officer at the County Council have both noted that surface of the existing public right of way needs to be improved to provide a more suitable access for residents and the Developer has agreed to undertake these under a Section S278. This needs to be secured through the legal agreement. The PRW Officer has requested a number of conditions relating to the protection of the right of way. However, the right of way is situated outside of the application site and obstruction of the right of way could be enforced by the LHA through other means.

- 9.59. The detailed matters raised by the LHA regarding the parking provision and vehicle tracking around the site would be considered as part of a reserved matters application as the layout of the site would be considered at that point.
- 9.60. It is noted that the Parish Council has requested a contribution toward future subsidies for public transport services serving the village. However, in light of there not being any public transport available in the village and given the fact there have been no requests for contributions for the County Council who may administer subsidies this is not considered to be reasonable or related to the development. Furthermore the County Council's request for Travel Information packs to new residents is also not considered to be justified given the limited choices available to new residents.

Ecology Impact

Legislative context

- 9.61. The Conservation of Habitats and Species Regulations 2017 consolidate the Conservation of Habitats and Species Regulations 2010 with subsequent amendments. The Regulations transpose European Council Directive 92/43/EEC, on the conservation of natural habitats and of wild fauna and flora (EC Habitats Directive), into national law. They also transpose elements of the EU Wild Birds Directive in England and Wales. The Regulations provide for the designation and protection of 'European sites', the protection of 'European protected species', and the adaptation of planning and other controls for the protection of European Sites. Under the Regulations, competent authorities i.e. any Minister, government department, public body, or person holding public office, have a general duty, in the exercise of any of their functions, to have regard to the EC Habitats Directive and Wild Birds Directive.
- 9.62. The Regulations make it an offence (subject to exceptions) to deliberately capture, kill, disturb, or trade in the animals listed in Schedule 2, or pick, collect, cut, uproot, destroy, or trade in the plants listed in Schedule 4. However, these actions can be made lawful through the granting of licenses by the appropriate authorities by meeting the requirements of the 3 strict legal derogation tests:
- (1) Is the development needed to preserve public health or public safety or other imperative reasons of overriding public interest including those of a social or economic nature and beneficial consequences of primary importance for the environment?
 - (2) That there is no satisfactory alternative.
 - (3) That the action authorised will not be detrimental to the maintenance of the population of the species concerned at a favourable conservation status in their natural range.

Policy Context

- 9.63. Paragraph 170 of the NPPF states that Planning policies and decisions should contribute to and enhance the natural and local environment by (amongst others): a) protecting and enhancing valued landscapes, sites of biodiversity or geological value and soils; and d) minimising impacts on and providing net gains for biodiversity.
- 9.64. Paragraph 175 states that when determining planning applications, local planning authorities should apply the following principles: a) if significant harm to biodiversity

resulting from a development cannot be avoided, adequately mitigated, or, as a last resort, compensated for, then planning permission should be refused; d) development whose primary objective is to conserve or enhance biodiversity should be supported; while opportunities to incorporate biodiversity improvements in and around developments should be encouraged, especially where this can secure measurable net gains for biodiversity.

- 9.65. Paragraph 180 of the NPPF states that planning decisions should also ensure that new development is appropriate for its location taking into account the likely effects (including cumulative effects) of pollution on health, living conditions and the natural environment, as well as the potential sensitivity of the site or the wider area to impacts that could arise from the development. In doing so they should (amongst others) limit the impact of light pollution from artificial light on local amenity, intrinsically dark landscapes and nature conservation.
- 9.66. Policy ESD10 of the Cherwell Local Plan 2011-2031 lists measures to ensure the protection and enhancement of biodiversity and the natural environment, including a requirement for relevant habitat and species surveys and associated reports to accompany planning applications which may affect a site, habitat or species of known ecological value.
- 9.67. Policy PD5 of the MCNP seeks net gain in biodiversity from planting.
- 9.68. The Planning Practice Guidance dated 2014 post-dates the previous Government Circular on Biodiversity and Geological Conservation (ODPM Circular 06/2005), although this remains extant. The PPG states that Local Planning Authorities should only require ecological surveys where clearly justified, for example if there is a reasonable likelihood of a protected species being present and affected by development. Assessments should be proportionate to the nature and scale of development proposed and the likely impact on biodiversity.

Assessment

- 9.69. The application is supported by a detailed Ecological Survey which concluded that there are no significant protected species issues on the site. The Council's Ecologist (CE) is satisfied with the detail and scope of the assessments and has noted that there is potential for bats to be present in some of the trees which will require checking if removed. Furthermore, there is potential for both reptiles and nesting birds to be affected so timing constraints and methods of clearance of vegetation need to be adhered to. These are outlined in the submitted reports and can be controlled by condition.
- 9.70. During the course of the application the CE requested that information be provided to demonstrate that a net gain in biodiversity can be achieved through the development. Given the outline nature of the application a indicative calculation has been undertaken which shows a net gain can be provided. The CE has queried where a number of features on which this calculation relies would be provided on the site. However, given the outline nature of the application where the layout is only indicative and the fact that the scheme will be relatively low density it is considered that it would be appropriate to control submission of these details to be provide with a the reserved matters application when these could be considered alongside the detailed layout of the proposal. This would also be considered through the proposed Landscape and Environmental Management Plan (LEMP) which is recommended to be conditioned.
- 9.71. Overall officers are satisfied, on the basis of the CE's advice and the absence of any objection from Natural England, and subject to conditions, that the welfare of any

European Protected Species found to be present at the site and surrounding land will continue and be safeguarded notwithstanding the proposed development and that the Council's statutory obligations in relation to protected species and habitats under the Conservation of Habitats & Species Regulations 2017, have been met and discharged.

Affordable Housing and Housing Mix

Policy

- 9.72. Policy BSC3 of the Cherwell Local Plan (2011-2031) states that development on the site should make provision for 35% affordable housing with 70% of the affordable housing being for rent and 30% as intermediate homes such as shared ownership. Policy BSC4 states that new development will be expected to provide a mix of home to meet current and expected future demand creating socially mixed and inclusive communities.
- 9.73. Policy PH1 of the MCNP relates to the housing mix of proposed market houses on development sites. This states new market should favour homes with a smaller number of bedrooms and states housing mix will be determined on the basis of the Strategic Housing Market Assessment (SHMA) or more up to date published evidence. It also goes onto state that regard will also be had to the characteristics of the site. On the basis of the SHMA, development of 10 dwellings or more should have the following indicative mix: 30% 1 or 2 bedrooms, 46% 3 bedrooms and no more than 24% with 4 or more bedrooms.
- 9.74. Policy PH3 of the MCNP seeks to favour development which provides dwellings which are designed to enable residents to live their through different stages of their life. It also offers support of new homes to be built to accessible standards (wheelchair adaptable or wheelchair accessible) and dwellings on a single level suitable for older people and those with disabilities.

Assessment

- 9.75. The applicant has committed to providing 35% affordable housing on the site in line with Policy BSC3. The detailed housing mix would be determined at reserved matters stage and at the current time the plans are only indicative. This would equate to 10 affordable units which would be split 70% rent and 30% shared ownership/intermediate housing. The Councils Housing Officer has suggested a proposed mix of tenures and sizes and these would form the basis of negotiations on the reserved matters application.
- 9.76. In relation to the market housing mix the Local Planning Authority was not provided details when the application was submitted. However, the Neighbourhood Plan Forum and Parish Council have both raised concerns regarding the number of 4 bedroom properties and consider the mix should be altered to reflect the Neighbourhood Plan housing mix with less '4 or more' and an increase in 3 bed properties. The applicant has responded providing an indicative mix of market dwellings as outlined below:

Unit Type	Proposed market Housing	Proposed %	MCNP %requirement
2 Bed	5 (incl 2 x bungalow)	28%	30%

3 Bed	8	44%	46%
4/5 Bed	5	28%	24%
Total	18	100%	100%

- 9.77. In officers view the revised indicative mix broadly complies with the policy in the Neighbourhood Plan. Furthermore, it must be remembered that full details of the housing mix both of market and affordable housing would be determined at reserved matters stage (although it would need to reflect that set out in the table above, unless a greater number of smaller dwellings are proposed at that time). The affordable housing would need to be secured by a legal agreement.
- 9.78. The applicant is also proposing to provide 2 bungalows on the site as part of the housing mix. The applicant has agreed that these will be provided to Part M 4(2) (accessible and adaptable dwellings) standard and this can be secured as a planning condition which weighs in favour of the development in terms of gaining support from Policy PH3 of the MCNP.
- 9.79. Overall therefore officers consider the level of affordable housing and housing mix has been adequately addressed.

Flooding Risk and Drainage

- 9.80. Policy ESD6 of the CLP 2015 essentially replicates national policy contained in the NPPF with respect to assessing and managing flood risk. In short, this policy resists development where it would increase the risk of flooding and seeks to guide vulnerable developments (such as residential) towards areas at lower risk of flooding. Policy ESD7 of the Local Plan requires the use of Sustainable Urban Drainage Systems (SUDS) to manage surface water drainage. This is all with the aim to manage and reduce flood risk in the District.

Assessment

- 9.81. The current is situated wholly within Flood Zone 1 which is land which has a less than 1 in 1,000 annual probability of river flooding which has the lowest probability of flooding. The site also lies in an area identified as very low risk of surface water flooding on the Environment Agency's flood risk maps. The site is accompanied by a Flood Risk Assessment. This proposed an outline surface water drainage strategy which indicates it is proposed to discharge the surface water through a combination of domestic soakaways, permeable paving and restricted discharge to the ditch on the south east boundary of the site. The report states that infiltration is likely to be feasible.
- 9.82. The LLFA has raised a number of queries in relation to surface water drainage scheme however given the outline nature of the scheme they are satisfied that a detailed drainage scheme can be conditioned and be considered at part of the detailed layout of the site. Officers agree with this assessment. Concerns have also been raised that the provision of a footway along Fewcott Road may impact on the existing roadside ditch. If this does occur full details of this can be considered in the detailed drainage scheme.
- 9.83. A number of concerns have been raised regarding the adequacy of the existing sewerage infrastructure to accommodate the development including statements that issues have occurred in other parts of the village. However, Anglian Water has been

consulted and have stated that there is adequate capacity in their existing systems to accommodate the demands of the proposed development and the developer would need to contact them to arrangement the relevant connections. Given they are the statutory undertaker in this regard this is considered to be acceptable.

Impact on neighbouring amenity

- 9.84. Policy ESD 15 of the CLP 2031 (Part 1) requires new development to consider the amenity of both existing and future occupants, including matters of privacy, outlook, natural lighting, ventilation, and indoor and outdoor space.

Assessment

- 9.85. The layout submitted is only indicative so it is difficult to make a full assessment of the impacts of the development on residential amenity as these would be subject to consideration in the reserved matters application where layout and appearance would be fully considered. However, the residential nature of the proposal is considered to be compatible with the surrounding land uses which are residential and agricultural. Whilst concerns have been raised regarding noise and disturbance to existing properties these are not considered to lead to material harm given the residential nature of the proposal.

- 9.86. The properties which would be most significantly impacted upon by the proposals are those properties which face onto the western boundary of the site in Hodgson Close. The proposal would clearly alter the view experienced over the application site from these properties which is currently over an undeveloped field; however, it is a long-established planning principle that there is no right to a private view. The indicative layout suggests the proposal would exceed the separation distances outlined in the Council's Residential Development Design Guide SPD which seeks to ensure that new development does not result in significantly harmful impacts to neighbouring properties in terms of loss of privacy, light or outlook. Therefore, whilst acknowledging there would be some increase in overlooking, loss of outlook and light to the adjoining residential properties this is considered to ensure a good standard of residential amenity would be retained for these properties.

Impact on Local Infrastructure

Policy Context

- 9.87. Policy INF1 of the CLP 2015 states that: *"Development proposals will be required to demonstrate that infrastructure requirements can be met including the provision of transport, education, health, social and community facilities."*
- 9.88. Policy BSC11 of the CLP 2015 states that: *"Development proposals will be required to contribute to the provision of open space, sport and recreation, together with secure arrangements for its management and maintenance. The amount, type and form of open space will be determined having regard to the nature and size of development proposed and the community needs generated by it. Provision should usually be made on site in accordance with the minimum standards of provision set out in 'Local Standards of Provision – Outdoor Recreation'. Where this is not possible or appropriate, a financial contribution towards suitable new provision or enhancement of existing facilities off site will be sought, secured through a legal agreement."* Policy BSD12 requires new development to contribute to indoor sport, recreation and community facilities.
- 9.89. The Developer Contributions Supplementary Planning Document (SPD) sets out the position in respect of requiring financial and onsite contributions towards ensuring

the necessary infrastructure or service requirements are provided to meet the needs of development, and to ensure the additional pressure placed on existing services and infrastructure is mitigated. This is the starting point for negotiations in respect of completing S106 Agreements.

Assessment

- 9.90. Where on and off-site infrastructure/measures need to be secured through a planning obligation (i.e. legal agreement) they must meet statutory tests set out in regulation 122 of the Community Infrastructure Ley (CIL) Regulations 2010 (as amended). These tests are that each obligation must be:
- a) Necessary to make the development acceptable in planning terms;
 - b) Directly related to the development;
 - c) Fairly and reasonably related in scale and kind to the development.
- 9.91. Where planning obligations do not meet the above statutory tests, they cannot be taken into account in reaching a decision. In short, these tests exist to ensure that local planning authorities do not seek disproportionate and/or unjustified infrastructure or financial contributions as part of deciding to grant planning permission. Officers have had regard to the statutory tests of planning obligations in considering the application and Members must also have regard to them to ensure that any decision reached is lawful.
- 9.92. Having regard to the above, in the event that Members were to resolve to grant planning permission, the following items would in officers' view need to be secured via a legal agreement with both Cherwell District Council and Oxfordshire County Council in order to secure an appropriate quality of development as well as adequately mitigate its adverse impacts:

Cherwell District Council

- Provision of and commuted sum for maintenance of open space (including informal open space, mature trees, hedgerows etc) in accordance with the Policy BSC11 of the CLP (approx. 0.2ha of informal open space)
- Provision of a commuted sum of £2,306.68 per dwelling to the upgrading/provision of local play equipment in Fritwell as no play provision is being provided on site
- Off-site outdoor sports facilities capital provision – improvement of sports fields in Fritwell to benefit sports provision including potential green gym equipment. This has included discussions with the Recreation Officer and the Playing Fields Committee. A request was made to spend this money on a zip wire however this was considered by officers to be play related rather than sports related therefore it was not considered appropriate. Based on £2017.03 per dwelling. 28no dwellings = £56,476.84
- Off-site indoor sports facilities – Towards Bicester Gymnastics Club to develop a specialist gymnastics (identified in the Councils District Sports Study). Whilst concerns have been raised this should be spend in the village there are no specific indoor sports facilities in the village and the population of the development will clearly be reliant on the neighbouring towns such as Bicester for wider indoor sports provision. This is a project is identified in the District Sports Study - £23,378.51
- Community hall facilities - £32,266.00 – To be spent on improvements/enhancements to Fritwell Village Hall
- £106 per dwelling for bins
- Affordable housing provision – 35% (10 units)

Oxfordshire County Council

- Contribution towards creation of additional secondary school capacity through expansion of Heyford Park School (£118,662 based on current housing mix but will change with different housing mix)
- No contributions are sought to primary education, SEN provision or nursery provision as there is capacity in the local area to accommodate the development taking into account the scale of the development.
- An obligation to enter into a S278 Agreement will be required to secure mitigation/improvement works, including:
 - Construction of the site access.
 - Extension of the 30mph speed limit.
 - Construction of footway from site access to join existing footpath in village at Hodgson Close
 - Identification of areas to be provided as public highway and provision of visibility splays.
 - Village entry treatment including new vehicle activated sign, relocation of gateway feature and dragons teeth on carriageway.
- Obligation to enter into a S278 agreement to provide upgrades to the public right of way to the south of the site.

Other

- OCCG group have requested a contribution to support capital projects associated with either Deddington surgery or Alchester Medical group (£360 per person – circa 67 people). Whilst they have pointed to growth in population in these catchments over recent years they have not indicated whether these surgeries are operating at or above capacity and what infrastructure the contributions would be used to fund to mitigate the impacts of the development. At the current time it is not considered that such a contribution can be justified however further information has been requested from the OCCG.

Conclusion

9.93. A number of items would need to be secured via a legal agreement with both Cherwell District Council and Oxfordshire County Council in order to secure an appropriate quality of development as well as adequately mitigate its adverse impacts.

Other Matters

9.94. Saved Policy ENV12 of the CLP1996 sets out that development on land which is known or suspect to be contaminated will only be permitted if,

- (i) Adequate measures can be taken to remove any threat of contamination to future occupiers of the site.
- (ii) The development is not likely to result in contamination of surface or underground water resources
- (iii) The proposed use does not conflict with other policies in the plan.

9.95. The site is on land which is potentially contaminated and the Council's Environmental Protection Officer (EPO) has therefore recommended that phased contaminated land conditions need to be attached should permission be granted. Officers agree with this assessment.

- 9.96. The Council's EPO has requested a condition in regard to the installation of Electric Vehicle charging infrastructure in order to make resident parking places EV ready for future demand. The NPPF and Policies SLE4 and ESD1 of the CLP 2015 encourage and support the incorporation of measures into new development that promote more sustainable forms of transport. It is considered reasonable and necessary for this to be secured through a condition of any permission given.
- 9.97. Policy ESD1 of the CLP 2031 states that measures should be taken to mitigate the impact of development within the District on climate change, and Policy ESD2 of the CLP 2031 seeks to achieve carbon emission reductions. Policy ESD3 of the CLP 2031 encourages sustainable construction methods. The reference to allowable solutions in Policy ESD2 and 'zero carbon' are no longer being pursued by the government so are no longer relevant. However, the water usage requirements of ESD3 are still required to be met. In regard to energy efficiency the Council now seeks to secure in excess of that required under the 2013 Building Regulations. These could be controlled through a condition. The Neighbourhood Plan Forum has requested that the developer make the scheme an exemplar scheme in terms of energy usage and insulation. However, this does not form part of the proposals currently advanced by the applicant and it is not a requirement of the Development Plan to do this. This is therefore not considered to be justified and it is not considered there would be sufficient policy grounds to require this given the conclusion that the development as a whole complies with the Development Plan.
- 9.98. Policy PD6 requires the consideration of external lighting and the impact of this on the character and appearance of the locality and nature conservation. Given the outline nature of this application full details of this could be controlled through condition.
- 9.99. In relation to the best and most versatile agricultural land (BMV), a report has been submitted with the application that concludes the site falls within Grade 3A which is classified as being best and most versatile agricultural land (alongside Grade 1 and 2 land) which Policy Villages 2 of the Cherwell Local Plan and Policy PD1 of the MCNP requires the consideration of this issue. The NPPF also states planning decisions should recognise the economic and other benefits BMV land. The applicant has provided an analysis of this matter and it is noted that the site has previously been used as roughly grazed paddock and a small private allotment. Given the size of the site and the multiple ownerships it is not considered likely to be used for arable cropping in the future and even if it were to be the economic contribution this land would make would be limited given its size. Furthermore, they have reviewed the Predictive BMV Land Assessment maps from DEFRA and note that all the land around Fritwell has a moderate to high likelihood to include BMV agricultural land. Therefore, any development outside the settlement has a relatively high potential to impact on BMV land. Given these matters this issue are only considered to carry limited weight against the proposal.
- 9.100. Concerns have been raised by a number of local residents that they do not consider the comments of the parish represent the views of local residents. However, these are not matters that impact on the determination of the planning application. The views of the Parish Council as an organisation may differ from the views of the individuals making comments on the application. Officers have considered and had regard to all the comments on the application in forming a recommendation the application.
- 9.101. Finance considerations - Section 70(2) of the Town and Country Planning Act 1990 (as amended) provides that a local planning authority must have regard to a local finance consideration as far as it is material. Section 70(4) of the 1990 Act (as amended) defines a local finance consideration as a grant or other financial

assistance that has been, that will or that could be provided to a relevant authority by a Minister of the Crown (such as New Homes Bonus payments), or sums that a relevant authority has received, or will or could receive, in payment of the Community Infrastructure Levy.

- 9.102. In this particular instance, the above financial payments are not considered to be material to the decision as they would not make the development acceptable in planning terms. It would not be appropriate to make a decision based on the potential for the development to raise money for a local authority.

10. PLANNING BALANCE AND CONCLUSION

- 10.1. The NPPF states that the purpose of the planning system is to contribute to the achievement of sustainable development. Paragraph 8 advises that the three dimensions to sustainable development (economic, social and environmental), which are interdependent; need to be pursued in mutually supportive ways.
- 10.2. Government guidance within the NPPF supports the plan-led system and advises that applications that accord with an up-to-date plan should be approved without delay.
- 10.3. In reaching an informed decision on planning applications there is a need for the Local Planning Authority to undertake a balancing exercise to examine whether the adverse impacts of a development would be outweighed by the benefits such that, notwithstanding the harm, it could be considered sustainable development within the meaning given in the NPPF. In carrying out the balancing exercise it is, therefore, necessary to take into account policies in the development plan as well as those in the NPPF. It is also necessary to recognise that Section 38 of the 1990 Act continues to require decisions to be made in accordance with the development plan and the NPPF highlights the importance of the plan led system as a whole.
- 10.4. The site is not specifically allocated for development however it is located adjacent to the settlement boundary of Fritwell which is a Category A settlement. The MCNP provides an indicative/approximate level of growth of 25 dwellings, which is considered to be acceptable at Fritwell over the plan period. On balance the scale of the current proposal would comply with this level of growth and would bring economic and social benefits arising for the provision of new housing which carry moderate weight in the planning balance. The proposal would also bring benefits in terms of the provision of affordable housing to the village and would also provide 2 accessible bungalows which is supported by the MCNP. These matters weigh in favour of the development.
- 10.5. The proposal would result in some harm to the rural character and appearance of the locality and the urbanisation of the site at the edge of the village. However, these impacts could be reduced through the provision of additional landscaping which over time would reduce the more significant impacts. There would also be some harm to the landscape character of the area. However, this would be limited given the scale of the scheme and relationship to existing settlement. Officers consider that the scale of growth outlined at Fritwell in the MCNP is very likely to require the provision a site(s) outside the built up limits of the village and Policy PD1 does allow for such sites to come forward. Therefore, the loss of open countryside is likely to occur to accommodate the growth planned at the village. The application site is located at one of the less sensitive edges of the village in heritage terms and would be seen in the context of existing modern development. Furthermore, given the features on site, the site has a relatively strong visual connection to the settlement and a degree of visual containment. The loss of Best and Most Versatile

Agricultural Land also weighs against the proposal; however, given the nature and size of the site this harm is considered to be limited.

- 10.6. Whilst acknowledging there would be some harm to the character and appearance of the area, the benefits of the proposal are considered to outweigh the identified harm, and when viewed together the proposals are considered to comply with the Development Plan when read as a whole. It is therefore recommended that planning permission be granted.

11. RECOMMENDATION

RECOMMENDATION – DELEGATE TO THE ASSISTANT DIRECTOR FOR PLANNING AND DEVELOPMENT TO **GRANT PERMISSION, SUBJECT TO THE CONDITIONS SET OUT BELOW** (AND ANY AMENDMENTS TO THOSE CONDITIONS AS DEEMED NECESSARY) **AND THE COMPLETION OF A PLANNING OBLIGATION UNDER SECTION 106** OF THE TOWN AND COUNTRY PLANNING ACT 1990, AS SUBSTITUTED BY THE PLANNING AND COMPENSATION ACT 1991, TO SECURE THE FOLLOWING (AND ANY AMENDMENTS AS DEEMED NECESSARY):

- a) Provision of and commuted sum for maintenance of open space (including informal open space, mature trees, hedgerows etc) in accordance with the Policy BSC11 of the CLP (approx. 0.2ha of informal open space)
- b) Provision of a commuted sum of £2,306.68 per dwelling to the upgrading/provision of local play equipment in Fritwell as no play provision is being provided on site
- c) Off-site outdoor sports facilities capital provision towards improvement of sports fields in Fritwell. Based on £2017.03 per dwelling. 28no dwellings = £56,476.84
- d) Off-site indoor sports facilities – Towards Bicester Gymnastics Club to develop a specialist gymnastics (identified in the Councils District Sports Study) - £23,378.51
- e) Community hall facilities - To be spent on improvements/enhancements to Fritwell Village Hall - £32,266.00
- f) £106 per dwelling for bins
- g) Affordable housing provision – 35% (10 units)
- h) Contribution towards creation of additional secondary school capacity through expansion of Heyford Park School (£118,662 based on current housing mix but will change with different housing mix)
- i) An obligation to enter into a S278 Agreement will be required to secure mitigation/improvement works, including:
 - Construction of the site access.
 - Extension of the 30mph speed limit.
 - Construction of footway from site access to join existing footpath in village at Hodgson Close
 - Identification of areas to be provided as public highway and provision of visibility splays.
 - Village entry treatment including new vehicle activated sign, relocation of gateway feature and dragons teeth on carriageway.
- j) Obligation to enter into a S278 agreement to provide upgrades to the public right of way to the south of the site.

CONDITIONS

Time Limits

1. No development shall commence until full details of the layout (including the

layout of the internal access roads and footpaths), scale, appearance, and landscaping (hereafter referred to as reserved matters) have been submitted to and approved in writing by the Local Planning Authority.

Reason: This permission is in outline only and is granted to comply with the provisions of Section 92 of the Town and Country Planning Act 1990, as amended by Section 51 of the Planning and Compulsory Purchase Act 2004

2. In the case of the reserved matters, the final application for approval shall be made not later than the expiration of three years beginning with the date of this permission.

Reason: This permission is in outline only and is granted to comply with the provisions of Section 92 of the Town and Country Planning Act 1990, as amended by Section 51 of the Planning and Compulsory Purchase Act 2004

3. Application for approval of all the reserved matters shall be made to the Local Planning Authority before the expiration of three years from the date of this permission and the development hereby permitted shall be begun either before the expiration of five years from the date of this permission or before the expiration of two years from the date of approval of the last of the reserved matters to be approved whichever is the later.

Reason : To comply with the provisions of Section 92 of the Town and Country Planning Act 1990, as amended by Section 51 of the Planning and Compulsory Purchase Act 2004, and Article 5(1) of the Town and Country Planning (General Development Procedure) Order 2015 (as amended).

Compliance with Plans

4. Except where otherwise stipulated by conditions attached to this permission, the development shall be carried out strictly in accordance with the following plans and documents: Application form and drawing number PL.01 and drawing number J32-3847-PS-001 Rev F included in Mode Transport Planning Technical Note (dated 30.9.19)

Reason – For the avoidance of doubt, to ensure that the development is carried out only as approved by the Local Planning Authority and comply with Government guidance contained within the National Planning Policy Framework.

Finished floor levels

5. No development shall take place until details of all finished floor levels in relation to existing and proposed site levels and to the adjacent buildings have been submitted to and approved in writing by the Local Planning Authority. The development hereby permitted shall be constructed strictly in accordance with the approved levels.

Reason: To secure an acceptable standard of development that safeguards the visual amenities of the area and the living conditions of existing and future occupiers and to ensure compliance with Policy ESD15 of the Cherwell Local Plan 2011-2031 Part 1 and government guidance within Section 12 of the National Planning Policy Framework. This information is required prior to commencement of the development as it is fundamental to the acceptability of the scheme.

Accessible and adaptable homes

6. As part of the reserved matters the proposal shall include the provision of at least 2 bungalows which shall be constructed to meet the Building Regulations M4(2) standards for accessible and adaptable homes. The dwellings shall be provided on site to accord with this standard and shall be retained as such thereafter.

Reason: To provide a mix of dwellings as supported by Policy PH3 of the Mid-Cherwell Neighbourhood Plan (2019), Policy ESD15 of the Cherwell Local Plan and advice in the National Planning Policy Framework.

Land Contamination Desk Study / Site Walkover

7. Prior to the submission of any reserved matters and prior to the commencement of development a desk study and site walk over to identify all potential contaminative uses on site, and to inform the conceptual site model has been carried out by a competent person and in accordance with DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11' and has been submitted to and approved in writing by the Local Planning Authority. No development shall take place until the Local Planning Authority has given its written approval that it is satisfied that no potential risk from contamination has been identified.

Reason: To ensure that any ground and water contamination is identified and adequately addressed to ensure the safety of the development, the environment and to ensure the site is suitable for the proposed use to comply with Saved Policy ENV12 of the Cherwell Local Plan 1996 and Section 15 of the National Planning Policy Framework. This information is required prior to commencement of the development as it is fundamental to the acceptability of the scheme.

Land Contamination Intrusive Investigation

8. If a potential risk from contamination is identified as a result of the work carried out under condition 7, prior to the commencement of the development hereby permitted, a comprehensive intrusive investigation in order to characterise the type, nature and extent of contamination present, the risks to receptors and to inform the remediation strategy proposals shall be documented as a report undertaken by a competent person and in accordance with DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11' and submitted to and approved in writing by the Local Planning Authority. No development shall take place unless the Local Planning Authority has given its written approval that it is satisfied that the risk from contamination has been adequately characterised as required by this condition.

Reason: To ensure that any ground and water contamination is adequately addressed to ensure the safety of the development, the environment and to ensure the site is suitable for the proposed use, to comply with Saved Policy ENV12 of the Cherwell Local Plan 1996 and Section 15 of the National Planning Policy Framework. This information is required prior to commencement of the development as it is fundamental to the acceptability of the scheme.

Land Contamination Remediation Scheme

9. If contamination is found by undertaking the work carried out under condition 8, prior to the commencement of the development hereby permitted, a scheme of remediation and/or monitoring to ensure the site is suitable for its proposed use shall be prepared by a competent person and in accordance with DEFRA and

the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11' and submitted to and approved in writing by the Local Planning Authority. No development shall take place until the Local Planning Authority has given its written approval of the scheme of remediation and/or monitoring required by this condition.

Reason: To ensure that any ground and water contamination is adequately addressed to ensure the safety of the development, the environment and to ensure the site is suitable for the proposed use, to comply with Saved Policy ENV12 of the Cherwell Local Plan 1996 and Section 15 of the National Planning Policy Framework. This information is required prior to commencement of the development as it is fundamental to the acceptability of the scheme.

Land Contamination Remediation Works

10. If remedial works have been identified in condition 9, the development shall not be occupied until the remedial works have been carried out in accordance with the scheme approved under condition 9. A verification report that demonstrates the effectiveness of the remediation carried out must be submitted to and approved in writing by the Local Planning Authority.

Reason: To ensure that any ground and water contamination is adequately addressed to ensure the safety of the development, the environment and to ensure the site is suitable for the proposed use, to comply with Saved Policy ENV12 of the Cherwell Local Plan 1996 and Section 15 of the National Planning Policy Framework.

Detailed Drainage Scheme

11. As part of any reserved matters for layout and prior to the development commencing detailed designs of the proposed surface water drainage scheme including details of implementation, maintenance and management shall be submitted to and approved in writing by the local planning authority. Those details shall include:
 - a) Information about the design storm period and intensity, critical storm duration (1 in 30 & 1 in 100 (+40% allowance for climate change), discharge rates and volumes (both pre and post development), temporary storage facilities, means of access for maintenance, the methods employed to delay and control surface water discharged from the site, and the measures taken to prevent flooding and pollution of the receiving groundwater and/or surface waters;
 - b) Any works required off-site to ensure adequate discharge of surface water without causing flooding or pollution (which should include refurbishment of existing culverts and headwalls or removal of unused culverts where relevant);
 - c) Flood water exceedance routes, both on and off site;
 - d) A timetable for implementation;
 - e) Site investigation and test results to confirm infiltrations rates; and
 - f) A management and maintenance plan, in perpetuity, for the lifetime of the development which shall include the arrangements for adoption by an appropriate public body or statutory undertaker, management and maintenance by a Residents' Management Company or any other arrangements to secure the operation of the surface water drainage scheme throughout its lifetime.

No building hereby permitted shall be occupied until the sustainable drainage scheme for this site has been completed in accordance with the approved details. The sustainable drainage scheme shall be managed and maintained thereafter in accordance with the agreed management and maintenance plan.

Reasons: To ensure that the proposed development can be adequately drained and to manage the flood risk on or off the site resulting from the proposed development in accordance with Policy ESD6 and ESD7 of the Cherwell Local Plan and advice in the National Planning Policy Framework.

Full details of access

12. Prior to the commencement of the development hereby approved, details of the means of access between the land and the highway on Fewcott Road, including position, layout and vision splays shall be submitted to and approved in writing by the Local Planning Authority. Thereafter, and prior to the occupation of any of the dwellings, the means of access shall be constructed and retained in accordance with the approved details.

Reason - In the interests of highway safety and to comply with Government guidance contained within the National Planning Policy Framework

Details of connection to footpath

13. As part of the reserved matters for layout, full details of the proposed new connection to the public footpath adjacent to the southern boundary of the site shall be submitted and approved in writing by the local planning authority. The connection shall be provided in accordance with the approved details in accordance with a timetable to be first submitted and approved in writing by the Local Planning Authority prior to any works above slab level on any of the dwellings hereby permitted.

Reason: To integrate the development into the surrounding movement network and promote walking in accordance with Policy SLE4 of the Cherwell Local Plan (2015) and advice in the NPPF.

Construction Traffic Management Plan

14. Prior to commencement of the development hereby approved, a Construction Traffic Management Plan (CTMP) shall be submitted to and approved in writing by the Local Planning Authority. Thereafter, the approved Construction Traffic Management Plan shall be implemented and operated in accordance with the approved details.

Reason - In the interests of highway safety and the residential amenities of neighbouring occupiers.

Construction Environment Management Plan

15. Prior to the commencement of the development, a Construction Environment Management Plan (CEMP), which shall include details of the measures to be taken to ensure construction works do not adversely affect residential properties on, adjacent to or surrounding the site together with details of the consultation and communication to be carried out with local residents shall be submitted to and approved in writing by the Local Planning Authority. Thereafter the development shall be carried out in accordance with approved CEMP.

Reason – To protect the amenity of the neighbouring properties in accordance with Policy ESD15 of the Cherwell Local Plan and advice in the National Planning Policy Framework.

Energy Statement

16. Prior to the commencement of any works associated with the construction of a dwelling, details of the means by which all dwellings will be designed and constructed to achieve an energy performance standard equivalent to a 19% improvement in carbon reductions on 2013 Part L of the Building Regulations (unless a different standard is agreed with the local planning authority) shall be submitted to and approved in writing by the local planning authority. The development shall thereafter be carried out in accordance with the approved details and no dwelling shall be occupied until it has been constructed in accordance with the approved energy performance measures.

Reason - In the interests of environmental sustainability in construction in accordance with the requirements of Policy ESD3 of the Cherwell Local Plan 2011-2031 Part 1 and government guidance in the National Planning Policy Framework.

Biodiversity enhancement

17. Prior to the commencement of the development hereby approved including any demolition, and any works of site clearance, and as part of any reserved matters for layout and landscaping, a method statement and scheme for enhancing biodiversity on site such that an overall net gain for biodiversity is achieved, to include details of enhancement features and habitats both within green spaces and integrated within the built environment, shall be submitted to and approved in writing by the Local Planning Authority. This shall also include a timetable for provision. Thereafter, the biodiversity enhancement measures shall be carried out and retained in accordance with the approved details.

Reason -To ensure the development provides a net gain in biodiversity in accordance with Policy ESD10 of the Cherwell Local Plan 2011-2031 Part 1 and Government guidance contained within the National Planning Policy Framework.

NOTE: It is advised that this condition include a Biodiversity Impact Assessment to show how a clear net gain for biodiversity will be achieved.

Landscape and Ecological Management Plan (LEMP)

18. Prior to the commencement of the development hereby approved, a Landscape and Ecology Management Plan (LEMP) shall be submitted to and approved in writing by the Local Planning Authority. This shall include details of all planting, soft landscaping and biodiversity features and management and maintenance ongoing (including funding details and timetable). Thereafter, the development shall not be carried out other than in accordance with the approved LEMP.

Reason -To protect habitats of importance to biodiversity conservation from any loss or damage in accordance with Policy ESD10 of the Cherwell Local Plan 2011-2031 Part 1 and Government guidance contained within the National Planning Policy Framework.

Electric charging points infrastructure

19. No development shall commence above slab level until a scheme for a system of ducting to allow for the future installation of electrical vehicle charging infrastructure to serve each dwelling or a scheme showing the provision of electrical vehicle charging points for each dwelling has been submitted to and approved in writing by the Local Planning Authority. Thereafter the development shall be carried out in accordance with the approved details prior to the first

occupation of the dwelling.

Reason: To comply with Policies SLE 4, ESD 1, ESD 3 and ESD 5 of the Cherwell Local Plan 2011-2031 Part 1 and to maximise opportunities for sustainable transport modes in accordance with paragraph 110(e) of the National Planning Policy Framework.

Lighting strategy

20. Prior to the installation of any external lighting a full lighting strategy to include illustration of proposed light spill shall be submitted to and approved in writing by the Local Planning Authority. Thereafter, the development shall be carried out in accordance with the approved details.

Reason -To protect the amenity of the locality and habitats of importance to biodiversity conservation from any loss or damage in accordance with Policy ESD10 and ESD15 of the Cherwell Local Plan 2011-2031 Part 1 and Government guidance contained within the National Planning Policy Framework.

Water usage

21. No dwelling shall be occupied until it has been constructed to ensure that it achieves a water efficiency limit of 110 litres person/day and shall continue to accord with such a limit thereafter.

Reason - In the interests of sustainability in accordance with the requirements of Policy ESD3 of the Cherwell Local Plan 2011-2031 Part 1 and Government guidance contained within the National Planning Policy Framework.

Compliance with ecological appraisal

22. The development hereby approved shall be carried out strictly in accordance with the recommendations outlined in sections 9.7, 9.8 and 8.9-8.11 of Extended Phase 1 Survey Report prepared by Lockhart Garratt, dated 12/11/2018.

Reason - To ensure that the development does not cause harm to any protected species or their habitats in accordance with Policy ESD10 of the Cherwell Local Plan 2011-2031 Part 1 and Government guidance contained within the National Planning Policy Framework.

Cycle Parking Provision

23. No dwelling of the development hereby permitted shall be occupied until cycle parking has been provided according to a plan showing the number, location and design of cycle parking for the dwellings that has previously been submitted to and approved in writing by the Local Planning Authority. The cycle parking will be permanently retained and maintained for the parking of cycles in connection with the development.

Reason - To ensure appropriate levels of cycle parking are available at all times to serve the development, and to comply with Government guidance contained within the National Planning Policy Framework.

Appendix 26

Banbury Road Appeal Decision

Appeal Decision

Inquiry held on 29 July 2014

Site visit made on 4 August 2014

by **S R G Baird BA (Hons) MRTPI**

an Inspector appointed by the Secretary of State for Communities and Local Government

Decision date: 3 September 2014

Appeal Ref: APP/C3105/A/14/2213263

Land off Banbury Road, Adderbury, Oxfordshire OX17

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant planning permission.
 - The appeal is made by Cala Homes Limited against the decision of Cherwell District Council.
 - The application Ref 13/00996F, dated 28 June 2013, was refused by notice dated 4 October 2013.
 - The development proposed is residential development of 26 units.
-

Preliminary Matter

1. The appellant asked that the appeal be determined on the basis of the erection of 25 dwellings along with alterations to the proposed elevations. The reasons for the amendments are to provide a Local Area of Play (LAP) and to address concerns relating to appearance. The appellant carried out public consultation and submitted a planning application for 25 units to the local planning authority (lpa), which was refused on 20 June 2014.
2. Given the consultation exercise and the lpa's formal consideration of a broadly similar scheme, there would be no prejudice to any party by determining this appeal on the basis of the scheme as amended. Accordingly, this appeal has been decided on the basis of the refusal of planning permission for residential development of 25 units as shown on Drawing Nos. 13-843-001; 003 Location Plan only); 014A; 131; 132; 133; 135; 136; 138; 141; 143; 150; 151; 152; 060; 061 and 062.
3. Reason for Refusal (RfR) 2 relating to Footpath 1 (10/11) was added to the decision notice in error and was not pursued by the lpa.
4. A copy of an engrossed S106 Agreement between the land owners, Cala, Cherwell District Council and Oxfordshire County Council was submitted.

Decision

5. The appeal is allowed and planning permission is granted for residential development of 25 units on land off Banbury Road, Adderbury, Oxfordshire OX17 in accordance with the terms of the application, Ref 13/00996F, dated 28 June 2013, subject to the conditions set out in the attached Schedule of Conditions.

Main Issues

6. The first issue is the effect on the character and appearance of the area. The second issue is whether having regard to the design, layout and housing mix, the proposal would constitute a high quality and inclusive design. The third issue is whether the proposal provides an acceptable mix of affordable housing to meet the needs of the local community. The fourth issue is whether any harm arising from the development would be outweighed by any other material considerations.

Planning Policy

Planning Policy

7. The National Planning Policy Framework (Framework) seeks, amongst other things, “...to boost significantly the supply of housing..., the achievement of high quality and inclusive design... and to ...contribute to and enhance the natural and local environment...” Framework paragraph 49 says that relevant policies for the supply of housing should not be considered up-to-date if the lpa cannot demonstrate a 5-year supply of deliverable housing sites. Whilst not accepting the appellant’s calculation of housing land supply, the lpa acknowledged that it does not have a 5-year supply of deliverable housing sites and therefore the guidance at Framework paragraph 14 is engaged.
8. Framework paragraph 14 says that where, amongst other things, relevant policies are out-of-date, planning permission should be granted unless, “any adverse impacts in doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the Framework taken as a whole...”. At paragraph 215, the Framework goes on to say, “...due weight should be given to relevant policies... according to their degree of consistency with this framework...” As to emerging plans, paragraph 216 says that weight may be given to relevant policies depending on, amongst other things, the stage of preparation of the emerging plan and the degree of consistency of relevant policies to policies in the Framework. The Framework, the High Court (HC) judgements¹ and appeal decisions that were placed before the Inquiry set the context for my consideration of the development plan.
9. The development plan includes saved policies in the Cherwell Local Plan (LP) adopted in 1996. Although the Non-Statutory Cherwell Local Plan 2004 was approved as interim planning policy for decision making purposes, it was never submitted for examination nor formally adopted and as such attracts very little weight. Whilst the Proposed Submission Cherwell Local Plan 2013 was submitted for examination, that process has been suspended because the plan did not reflect the District’s objectively assessed housing need. As such and given the nature of this appeal, this plan attracts little weight. The Draft Adderbury Plan is a Neighbourhood Plan being prepared by the Parish Council. This plan has not been submitted to the Council or for examination. In this context and given that the Parish Council could not indicate when the plan would be submitted for examination, it attracts very little weight.

[2014] EWHC 573 (Admin).

10. The appeal site adjoins the built-up area of Adderbury and for planning policy purposes is located in the countryside. As LP Policies H12 and H13 refer to development within settlements, they are not relevant to this case. None of the criteria set out in LP Policy H18, which allows new dwellings in the countryside, apply in this case. Moreover, given the guidance at Framework paragraph 49, the lpa acknowledged that LP Policy H18 is, "...to a large extent ...redundant..." and "...of no real assistance in this case". I have no reason to disagree with the lpa's conclusion on the relevance of LP Policy H18.
11. The LP contains policies relating to rural and urban conservation and design. LP Policy C7 says that development will not normally be permitted if it would cause demonstrable harm to the topography and character of the landscape. This policy is not inconsistent with the Framework and as such attracts due weight. LP Policy C8 indicates that sporadic development in the countryside will generally be resisted. The supporting text says that this policy applies to all new developments beyond the built-up limits of settlements. Assessing this policy in light of the Framework, HC judgements and appeal decisions and given that the policy clearly says that it is to be applied to all development, I conclude that it is a policy relevant to the supply of housing and, in the absence of a 5-year supply of housing land, is out of date.
12. The site falls within an area identified in the LP as an Area of High Landscape Value (AHLV) where the objective of LP Policy C13 is to conserve and enhance the environment. Noting that the emerging LP does not intend to take forward the AHLV designations and guidance in the Framework, which expects development plans to give protection to landscapes commensurate with their status through criteria based policies, LP Policy C18 is inconsistent with the Framework and as such attracts reduced weight. LP Policies C28 and C30, seek to achieve a high standard of development and are generally consistent with the objectives of the Framework attract appropriate weight.

Reasons

Issue 1 - Character & Appearance

13. The site comprises a field of rough pasture located on the north-western edge of the settlement and straddles the upper slopes of a localised valley associated with the Sor Brook to the west. The boundary with Banbury Road is formed by a dense mainly deciduous hedgerow containing a number of mature trees, which generally obscures views of the open countryside to the south-west, west and north-west from the road and views of the houses on the opposite side of the road from the west. Where there are gaps in the mature hedgerow on the northern approach to Adderbury along Banbury Road, glimpses of the spire of the Church of St. Mary located within the village core are obtained. The site dips steeply to the west following the east/west line of the valley. To the north, beyond a low post and rail fence and a sporadic hedge, the land rises, steeply in parts, to the north. To the south is a small area of open space that, along with built development that curves to the east along a ridge line, overlooks the Sor Brook valley. These developments form a prominent and, in places, harsh built-up fringe of this part of Adderbury. The southern and western boundaries of the site are formed by a low post and rail fence with very little hedgerow planting.

14. Having regard to the position of the site within the AHLV and the local landscape characteristics², but more particularly the prominent and harsh edge formed by houses on Banbury Road and at Adderbury Court and the limited zone of visibility of the site, I consider the site has medium-high landscape value. Whilst the development would result in encroachment into the countryside, given the sloping nature of the site and that houses would be seen against existing built development, the site has a medium susceptibility to change. In this context, the development would not appear isolated or incongruous in the landscape and as such would have a moderate adverse effect on landscape character.
15. The countryside to the north-west and around the site contains a network of public footpaths. The eastern, northern and western site boundaries have public footpaths either within the site or outside it running broadly parallel to its boundaries. Immediately adjoining the proposed site access on Banbury Road, a public footpath runs through the open space, and Adderbury Court to the village core. These paths form part of, or link into, paths that run into the wider countryside. Other than the overgrown and inaccessible path that runs parallel to Banbury Road through the site, the remainder of the paths appear to be well used. The Adderbury Conservation Area Appraisal identifies a "Positive Vista" which appears to be from a point at the north-eastern corner of the site on the inaccessible footpath.
16. Having walked several of the paths and along Banbury Road southwards from Green Hill House, given the topography of the area and the availability of intervening planting and screening, the proposed development would have a limited visual impact in medium to the long distance views. One area of particular concern was the potential impact of the development on views of the northern edge of the village and the Church of St Mary from Banbury Road and the Positive Vista Point. As the Positive Vista point is within the site, this would be lost through the development. However, the path is inaccessible and that view cannot be experienced.
17. Produced using computer modelling, the appellant produced a photomontage (PM) of the development viewed from Footpath 101/1 to the north of the site. This PM suggests that the development would sit below the ridge line of properties at Adderbury Court, well below the ridge on which the village sits, the ridge lines of properties along northern edge of the village and would not block views of the church spire. The lpa, acknowledging that it had not carried out a similar computer-based exercise, submitted a revised PM which suggested that the appellant's PM significantly underestimates the impact of the scheme in terms of its height in relation to the ridge and ridge lines of houses beyond and its projection to the west. The photograph on which both PMs are based was taken during the winter. However, at the time of the Inquiry, the view south and west was completely obscured by a crop of sweet-corn and I was unable to come to a conclusion regarding the veracity of the lpa's submission. However, what is clear is that in both PMs, the development would sit below the ridge line on which the village sits and the view of the church spire would not be obscured in views from Banbury Road to the north of the site.

² The Cherwell District Landscape Assessment 995. The Cherwell Countryside Design Summary 1998 and the Oxfordshire Wildlife and Landscape Study 2004

18. Notwithstanding my conclusions above, whilst the visual impact of the scheme would be partly mitigated by the introduction of strong boundary hedge planting on the northern, western and southern boundaries, the development would have a significant and major adverse visual impact on users of the public footpaths near to and around the site. In particular these adverse impacts would be felt from the public footpath through the open space to the north of Adderbury Court, from the southern end of Croft Lane where the Adderbury Circular Trail leaves the village and from Footpath 101/11 immediately to the west of the site. In terms of views along Banbury Road, whilst these would change with the loss of the mature hedge, given the built-up nature of the area, the visual impact would be moderate adverse.
19. Drawing the above together, the proposed scheme would have a moderate adverse effect on landscape character and a major adverse visual impact when viewed from the public footpaths to the west and south. As such the proposal would conflict with the objectives of LP Policies C7, C13 and C18.

Issue 2 - Design and layout

20. One of the core planning principles identified at Framework paragraph 17 is securing high quality design and a good standard of amenity for existing and future occupants of land and buildings. The Framework, at Section 7, says that good design is indivisible from good planning and should contribute positively to making places better for people. Paragraph 61 identifies that securing high quality and inclusive design goes beyond aesthetic considerations and should address the connections between people and places and the integration of new development into the natural and built environment. Amongst other things, decisions should aim to ensure that a development functions well and adds to the overall quality of the area; establishes a strong sense of place; responds to local character and reflects the identity of local surroundings and materials; creates safe and accessible environments and is visually attractive as a result of good architecture and landscaping. Development that fails to take opportunities available for improving the character and quality of an area and the way it functions should be refused.
21. The lpa expressed concern that as the LAP was originally designed to provide a housing unit and on 2 sides abutted private garages it lacked permeability and surveillance. As such it would not function well or create a safe environment. LAPs are intended to be small areas used for informal play and social interaction. To provide for security and to avoid anti-social activity, LAPs should be designed and located to allow for informal observation and supervision. In terms of surveillance, other than suggesting that LAPs should be located to allow for surveillance from adjacent well-used pedestrian routes and property, no evidence was submitted to suggest that it should be overlooked by a minimum number of dwellings or that there should be 360 degree overlooking. Indeed, the Fields in Trust guidance provided by the lpa indicates that, "*gable ends or other exposed walls can be protected ...by providing a dense strip of planting...*" indicating that 360 degree surveillance is not a pre-requisite to the successful location and design of a LAP.
22. Here, the LAP would be located on a corner, adjacent to a footpath and estate road that the residents of 22 of the proposed dwellings would have to walk and drive along. At a minimum the area would be directly overlooked by 5

dwellings and partly overlooked by a further 3, albeit these would be further away. In this context, the LAP is located such that there would be adequate informal supervision to provide security for play. Moreover, the boundary treatment of the LAP and feature landscaping could be designed and maintained so as to maintain informal surveillance and permeability.

23. It is suggested that by providing the affordable housing as mostly higher density apartments and locating them in the north-eastern corner of the site this would ensure they were distinguishable from the market housing and as such fail to demonstrate inclusive design. This, the Ipa suggests conflicts with local and national guidance that affordable housing should not be distinguishable from private housing by its design or be banished to the least attractive part of the site. In terms of design and the nature of the finishing materials to be used there would be nothing, in my judgement, that would distinguish this block from the rest of the development. Similarly, given the scale of the site there is nothing that suggests that the north-eastern corner of the site would qualify as the least attractive part of the site. Indeed, the Council's Strategic Housing Officer (SHO) records that he accepts the location of the affordable housing. In this context, the fact that these dwellings are apartments would not immediately suggest that they are affordable units.
24. It is my experience that mixed developments are encouraged so as to provide diversity and social cohesion. Moreover, many developments contain a range of house types to react to market demand and housing need. People choose to live in apartments for a variety of reasons i.e. they are downsizing or they do not want a garden. The fact that people live in flats does not show that they are in need of affordable housing. Drawing this together, there is nothing in the design, location and type of accommodation intended as affordable housing that would suggest that this development would not be inclusive.
25. A variety of criticisms are levelled at the development including the use of a cul-de-sac layout, the detached nature of the housing and the absence of links from the development to the public footpath network particularly to the north-west, west and south-west. Other concerns relate to the scale and design of the flats, particularly the use of false doors to 2 of the flats on the Banbury Road frontage, the nature of the Banbury Road frontage and the incorporation of non-functioning chimneys.
26. The split level design of the apartment block responds to the change in levels at the north-eastern corner thus optimising the potential of the site. In terms of its appearance looking north along Banbury Road, the building would appear as row of 2-storey terraced houses taking its cue, in terms of scale and massing, from the traditional dwellings located in the village core and later houses on the eastern side of Banbury Road. In this context, the use of false front doors to 2 of the units as a design tool to reinforce this impression would not appear incongruous or obtrusive. Similarly, the use of non-functioning chimneys as a design feature in a settlement where the majority of dwellings have chimneys does not strike me as an example of poor design. Whilst the chimneys may not serve fires they can serve as outlets for soil stacks and other ventilation features thus removing unsightly pipe work from external elevations. Moreover, I noted that the use of false design features does have some pedigree in the village where some dwellings have false windows painted onto their elevations. When viewed from the north along

Banbury Road and from the west on the public footpath, the scale of the building and massing of the building would be more obvious. However, the impact and impression of the building would be mitigated by the generally dense mature hedge along the Banbury Road to the north and the opportunity to include within the landscaping scheme substantial tree and hedgerow planting along the northern boundary and in the north-eastern corner.

27. I note the concerns raised regarding security, particularly in relation to the apartments and the positioning of its access. However, I consider that the submission of details relating to the achievement of Security by Design measures, which is a matter that could appropriately be covered by a condition would ensure that such concerns are ameliorated.
28. Adderbury is a substantial settlement and whilst the original core is characterised by mainly mature terraced housing of varying design and scale set at the back of or close to the pavement, the settlement has been extended very substantially to the west along New Water Lane, Cross Hill Road and Horn Hill Road and to a lesser extent to the east to the north and south of Aynho Road. These more recent and extensive areas reflect the designs, styles and types of dwellings of their periods. Thus, it would be difficult to pin down the defining character of Adderbury as a whole and conclude that this scheme failed to reflect and enhance local character.
29. In terms of the position of the access, the orientation and alignment of the road layout these, in my view, optimise the potential of the site for development. Whilst the historic core of the village may not feature true cul-de-sacs or a preponderance of detached houses, I saw several examples of this type of development on the east and west of the settlement where the developments were largely inward looking. In terms of their scale and massing, the proposed dwellings are consistent with many in the settlement and, whilst I make an allowance for artistic interpretation, the visualisations provided do indicate to me that the development would create an appropriate sense of place for future residents and that the Banbury Road frontage would not appear incongruous or obtrusive in the existing street scene.
30. The Ipa is critical of the failure of the development to link with the public footpaths on the northern and western edges of the site. Whilst this would appear to be an opportunity lost, other than the inaccessible public footpath that runs parallel to Banbury Road the paths that run along the northern and western boundaries are set away from the site boundary on land not within the appellant's control. To access the network of paths to the north and west, the occupants of the development, bar those of Flat 8, would have to use the site access and walk, a relatively short distance, along Banbury Road. To access the settlement, occupants would use the site access and Banbury Road, which would give access to the primary school at the junction with Aynho Road and the village core, or access the village core using the public footpath through Adderbury Court and Croft Lane. Whilst I agree that the development would not optimise links to the existing public footpath network and some residents would have to walk further to access countryside walks or the village core, the distances are not excessive or a deterrence and would not on its own be a reason to dismiss this appeal.
31. Drawing the threads of this issue together, whilst I accept there are issues relating to security and permeability these matters on their own would not be

sufficient to warrant the dismissal of this scheme. Overall, I conclude that the design and layout of the proposed development would be acceptable and would not conflict with the objectives of development plan Policies C28 and C30 or national planning policy in terms of achieving high quality and inclusive design.

Issue 3 - Affordable Housing Mix

32. The scheme would provide for 9 affordable houses comprising 2 one-bed flats, 5 two-bed flats and 2 three-bed semi-detached houses. In percentage terms, this mix of 1, 2 and 3-bed properties would be consistent with the SHO's request. However, rather than 2-bed flats the Council seeks the provision of 2-bed houses. Notwithstanding this request, the SHO has indicated that "*...the Council does not consider the failure to provide affordable housing in accordance with the locally assessed need would constitute a reason for refusal in itself.*" In terms of local need, i.e. Adderbury, the most recent information before the Inquiry relates to a Housing Needs Survey³ carried out in December 2011. Under affordable housing need, the survey indicates that some 10% of respondents would like a flat. Other than identifying that the Ipa has resolved to grant planning permission for residential development on the eastern edge of Adderbury which would include 4 one and two-bed flats there was no other evidence to indicate that the local need for flats had been satisfied. Accordingly, on the evidence before me, I conclude that the proposal would provide an acceptable mix of affordable housing to meet the needs of the local community.

Issue 4 – Planning Balance

33. As indicated earlier paragraph 14 of the Framework indicates that where relevant policies are out-of-date, planning permission should be granted unless any adverse impacts in doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the Framework taken as a whole. In this case, I conclude that on-balance the proposed scheme would represent high quality and inclusive design and provide an acceptable mix of affordable housing to meet the needs of the local community. The scheme would have a moderate adverse effect on landscape character and a major adverse, albeit localised, visual impact conflicting with the objectives of relevant LP policies. However, having regard to the Framework as a whole, I conclude that these matters do not demonstrably outweigh the significant benefit of delivering 25 units of residential accommodation of which 9 would be affordable housing in a settlement which is acknowledged as sustainable and an area where there is a lack of a 5-year supply of housing sites. Accordingly, taking the above and all other matters into consideration I proposed to allow this appeal.

S106 Agreement

34. In response to a request from Cherwell District Council, the Agreement contains obligations to cover the provision and retention of the proposed Affordable Housing, the laying out of the LAP and the provision of £30,620 as a commuted sum towards the cost of future maintenance, a sum of £38.96 per sq. m of hedgerow and £2,752 per tree for hedgerow and tree maintenance; the sum of £1,687.50 to provide 3 refuse bins and a food caddy

³ Adderbury Housing Needs Survey Report December 2011, Oxfordshire Rural Community Council.

per dwelling based on £64 for bins and £3.50 towards recycling banks and a £3,000 monitoring fee.

35. In response to request made by Oxfordshire County Council, the Agreement includes sums of £92,656, £140,756 and £6,316 for the provision of primary, secondary and special needs education respectively; £6,715 for library provision; £5,056 for strategic waste recycling/disposal facilities; £359 towards expansion of the County Museum Resource Centre; £800 towards adult learning; £5,500 towards day-care facilities; £25,000 as a public transport subsidy and £3,750 for administration.
36. Framework paragraph 204 and CIL Regulation 122 say that Planning Obligations should only be sought and weight attached to their provisions where they meet all of the following tests. These are: necessary to make the development acceptable in planning terms; directly related to the development; and fairly and reasonably related in scale and kind to the development.
37. On the information before me, I consider the contributions relating to library provision; primary, secondary and special needs education; contributions to public open space/hedgerow/tree maintenance in the event that the public LAP is transferred to the Council and, in the absence of appropriate planning conditions, the provisions relating to the provision and retention of affordable housing satisfy the requirements of Framework paragraph 204 and CIL R122 and I have taken them into account in coming to my decision.
38. In the absence of a planned and costed proposal for additional waste recycling/disposal facilities; the absence of a finalised scheme for an adult learning facility in Banbury town centre and evidence to support a conclusion that the extension of the Museum Resource Centre and the provision of day care facilities are directly related to the proposed development, I consider that these contributions do not satisfy the tests at Framework paragraph 204 and CIL R122. Therefore, I have not attached weight to them in coming to my conclusion. With regard to the provision of refuse bins and the payment of monitoring fees, the purchase of refuse bins by the developer rather than the Council or individual home owners and the payment of a monitoring/administration fee are not necessary to make the development acceptable in planning terms.
39. As to the public transport contribution, the County Council seeks a contribution towards the development of the S4 service to provide 2 buses per hour along with an evening and Sunday service. The total cost is "*...assumed to be £400,000...to produce an eventual commercially viable bus service. The aspiration provision of this improved level of service is cross-referenced in the forthcoming Bus Strategy, and is required to provide the minimum credible level of service for journeys to work in Banbury.*" For journeys to work there is an existing S4 service that provides 2 buses in the morning before 0830 hours and a return service in the evening after 1700 hours. This is in addition to the 50, 59A and 59B services through Adderbury at similar times. Given that there is an existing bus service for which there was no evidence of any dissatisfaction, the paucity of the justification provided does not allow me to conclude that the contribution sought is necessary to make the development acceptable in planning terms; directly related to the development; and fairly and reasonably related in scale and kind to the development. Accordingly, I

consider that this contribution does not satisfy the tests at Framework paragraph 204 and CIL R122. Therefore, I have not attached weight to it in coming to my conclusion.

Planning Conditions

40. Conditions relating to the submission of details and the implementation of approved schemes in relation to: finishing materials (3)⁴, a sample panel of stone (4), landscaping (5, 6 & 7), the treatment of the open space (8), details ground levels (14), a Construction Environment Management Plan (9); street lighting (10), road surfacing, parking, drainage and location of fire hydrants; the access with Banbury Road and the estate roads (11, 12, 17 & 18); biodiversity enhancement (13) and achieving security by design (15) are reasonable and necessary in the interests of the appearance of the area, highway safety and the protection neighbours' living conditions. In the interests of protecting neighbour's and potential resident' living conditions, conditions relating to hours of construction (16), the implementation of flood risk measures (19) and potential ground contamination (20) are reasonable and necessary. In the interests of protecting ecology and achieving sustainable construction, conditions relating to site clearance and the avoidance of works during the nesting season, further ecological surveys and the achievement of BREAM Level 4 construction are reasonable and necessary. For the avoidance of doubt and in the interests of proper planning and I have imposed a condition relating to the specification of plans (2). Where necessary in the interests of precision and enforceability I have reworded the suggested conditions.
41. I have not imposed the suggested conditions relating to public rights of way as these matters are covered by other legislation. I have not imposed the suggested condition relating to submission of details relating full details of doors and windows. Planning Practice Guidance (PPG) indicates that such conditions should only be used where the decision maker is satisfied that the requirements of the condition are so fundamental to the development permitted that it would have been necessary to refuse the whole scheme. Here, given the nature and location of the proposed development, such a condition would be unnecessarily onerous and not relevant. Given the changes in level across the site and in the interests of protecting neighbours' living conditions, the lpa suggests conditions removing permitted development rights in relation to the use of garages and the erection of walls, fences and extensions. Whilst I have noted the concerns regarding changes in levels, the lpa's concerns do not, in my view, accord with the guidance in PPG, which indicates that conditions restricting the future use of permitted development rights will rarely pass the test of necessity and should only be used in exceptional circumstances.

George Baird

INSPECTOR

⁴ Numbers relate to those in the Schedule of Conditions.

Schedule of Conditions

- 1) The development hereby permitted shall begin not later than 3 years from the date of this decision.
- 2) The development hereby permitted shall be carried out in accordance with Drawing Nos. 13-843-001; 13-843-003 (Location Plan only); 13-843-014A; 13-843-131; 13-843-132; 13-843-133; 13-843-135; 13-843-136; 13-843-138; 13-843-141; 13-843-143; 13-843-150; 13-843-151; 13-843-152; 13-843-060; 13-843-061 and 13-843-062.
- 3) Prior to the commencement of the development hereby permitted, a schedule of materials and finishes with samples for the external walls, roofs and hard surfaces of the development hereby approved shall be submitted to and approved in writing by the local planning authority. Development shall be carried out in accordance with the approved schedule and samples.
- 4) Prior to the commencement of the development hereby permitted, a stone sample panel (minimum 1 sq. m in size) shall be constructed on site in natural stone, which shall be inspected and approved in writing by the local planning authority. Thereafter, the external walls of the development shall be laid, dressed, coursed and pointed in strict accordance with the approved panel.
- 5) Prior to the commencement of the development hereby permitted, a landscaping scheme shall be submitted to and approved in writing by the local planning authority. The scheme for landscaping the site shall include:-
 - (a) details of the proposed tree and shrub planting including their species, number, sizes and positions, together with grass seeded/turfed areas,
 - (b) details of the existing trees and hedgerows to be retained as well as those to be felled, including existing and proposed soil levels at the base of each tree/hedgerow and the minimum distance between the base of the tree and the nearest edge of any excavation,
 - (c) details of the hard surface areas, including pavements, pedestrian areas, reduced-dig areas, crossing points and steps;
 - (d) details of minor artefacts/structures (i.e. surfaces, benches, fencing, walling etc) which comprise public art.
- 6) All species used in the planting proposals associated with the development shall be native species of UK provenance and should refer to those species recommended within section 4.10 of the Extended Phase 1 and Protected Species Survey Report, prepared by FPCR dated 11 June 2013.
- 7) All planting, seeding or turfing comprised in the approved details of landscaping shall be carried out in accordance with BS 4428:1989 Code of Practice for general landscape operations (excluding hard surfaces), or the most up to date and current British Standard, in the first planting and seeding seasons following the occupation of the building(s) or on the

- completion of the development, whichever is the sooner. Any trees, herbaceous planting and shrubs which, within a period of 5 years from the completion of the development die, are removed or become seriously damaged or diseased shall be replaced in the current/next planting season with others of similar size and species.
- 8) Prior to the commencement of the development hereby permitted full details of the provision, landscaping and treatment of open space/play space within the site together with a programme for its implementation and long term maintenance and management shall be submitted to and approved in writing by the local planning authority. Thereafter, the open space/play space shall be landscaped, laid out and completed in accordance with the approved details and programme and retained at all times as open space/play space.
 - 9) Prior to the commencement of the development hereby permitted a Construction Environment Management Plan (CEMP), which shall include details of: hours of deliveries and traffic management measures to be taken to ensure construction works do not adversely affect residential properties on or adjacent to the site and details of wheel washing facilities for site vehicles, shall be submitted to and approved in writing by the local planning authority. Development shall be carried out in accordance with approved CEMP.
 - 10) Prior to the commencement of development hereby permitted full details of a street lighting scheme for each phase of development shall be submitted to and approved in writing by the local planning authority. Prior to first occupation of each phase, the lighting scheme for that phase shall be completed in all respects in accordance with the approved details, inclusive of parking courts, and maintained in working order thereafter.
 - 11) Prior to the commencement of development of the development hereby permitted full design details of the vehicular access, footways and visibility splays, to be provided shall be submitted to and approved in writing by the local planning authority. The approved scheme shall be carried out prior to the first occupation of the development. The vision splays shall not be obstructed by any object, structure, planting or other material of a height exceeding 0.6m measured from the carriageway level.
 - 12) Prior to the commencement of the development hereby permitted full design details of the estate road (or roads) for each phase including a means of surface water disposal and details of fire hydrants shall be submitted to and approved in writing by the local planning authority. The approved details shall be implemented prior to the first occupation of the development or the phase to which it relates.
 - 13) Prior to the commencement of the development hereby permitted including any demolition and any works of site clearance, a method statement for enhancing biodiversity on site shall be submitted to and approved in writing by the local planning authority. Thereafter, the biodiversity enhancement measures shall be carried out and retained in accordance with the approved details.
 - 14) Prior to the commencement of the development hereby permitted full details of existing and proposed ground levels and all boundary

- treatments and means of enclosure shall be submitted to and approved in writing by the local planning authority. Development shall be carried out in accordance with the approved details.
- 15) No development shall commence until a strategy that details the measures to be incorporated into the development to demonstrate how 'Secured by Design (SBD)' will be achieved, have been submitted to and approved in writing by the local planning authority. The development shall be carried out in accordance with the approved details.
 - 16) Construction work shall only take place between the hours of 0700 – 1700 hours Monday to Friday inclusive and 0700 – 1300 hours on Saturdays with no such work on a Sunday or Public Holiday.
 - 17) No dwelling shall be occupied until the access road between that dwelling and the existing county highway, including footways and turning heads (where applicable), has been laid out in accordance with the approved plans and details approved under condition No. 12 and constructed to at least base course level.
 - 18) No dwelling shall be occupied until the car parking and associated turning area for that dwelling has been completed and marked out in accordance with the approved plans. The car parking area and turning areas shall thereafter be retained in accordance with the approved plans and available for use as car parking and turning areas and no other use whatsoever.
 - 19) The development hereby approved shall proceed in accordance with the Flood Risk Assessment and Drainage Strategy prepared by MJA Consulting dated June 2013.
 - 20) If, during development, contamination not previously identified is found to be present at the site, no further development shall be carried out until full details of a remediation strategy detailing how the contamination shall be dealt with has been submitted to and approved in writing by the local planning authority. Thereafter the remediation strategy shall be carried out in accordance with the approved details.
 - 21) All site clearance (including removal of vegetation) shall be timed so as to avoid the bird nesting/breeding season from 1st March to 31st August inclusive, unless a suitable method statement for the removal of vegetation is submitted to and agreed in writing with the local planning authority.
 - 22) Should more than 2 years pass from the date of the submitted ecological report (11 June 2013) before development commences, then prior to, the commencement of the development, the site shall be thoroughly checked by a suitably qualified ecologist to ensure that no protected species, which could be harmed by the development, have moved on to the site since the previous surveys were carried out. Should any protected species be found during this check, full details of mitigation measures to prevent their harm shall be submitted to and approved in writing by the local planning authority. Development shall be carried out in accordance with the approved mitigation scheme.
 - 23) The dwellings shall achieve Level 4 of the Code for Sustainable Homes. No dwelling shall be occupied until a final Code Certificate has been issued for it certifying that Code Level 4 has been achieved.

APPEARANCES

FOR THE APPELLANT

Satnam Choongh of Counsel instructed Cala Homes Limited.

He Called:

Mr K Charsley BA (Hons); Dip LA; CMLI.
Associate Director of Aspect Landscape Planning Limited.

Mr G Worsfold P.G. Dip (Dist). Arch. Hist; IHBC; FRSA; MCSD (Design).
Director, Scott Worsfold Associates, Chartered Architects.

Mr A C Bateman BA (Hons) TP; MRICS; MCMI; MIOd; FRSA.
Managing Director, Pegasus Planning Group Limited.

FOR THE LOCAL PLANNING AUTHORITY

Ned Westaway of Counsel instructed by the Head of Law and Governance, Cherwell District Council.

He called:

Mrs T Morrissey Dip TP; MRTPI.
Principal Planning Officer, Major Developments, Cherwell District Council.

Mrs N Brown BA (Hons); BLandArch; Cert UD; CMLI.

Appendix 27
Appeals Summary

Appeal 3188671

1.1 The appeal was against CDCs decision to refuse an application for outline planning permission for up to 72 dwellings on land off Blackthorn Road, Launton by notice dated 04/08/2017. The appeal was allowed on 18/09/2018.

1.2 With regard LPp1 policy PV2, the Inspector states:

Policy Villages 2 confirms that over the plan period a total of 750 homes will be delivered at category A villages. There is no further distribution of delivery within the villages and there is no timeframe or trajectory for delivery associated with the overall figure. All parties accept that the headline figure is not a ceiling and that conflict would only arise if there was a material increase over and above the identified 750 dwellings. (para. 13)

1.3 At the time of the Inquiry (July 2018), the housing identified for Category A development was set out in the 2017 Annual Monitoring Report (AMR). The Inspector summarised the position as follows:

The 2017 Annual Monitoring Report for the district identifies that a total of 664 dwellings have been identified for meeting the Policy Villages 2 requirement. By March 2017 there had been 103 completions on those sites. The proposed development would make provision for up to a further 72 dwellings taking the total to 736 (664 + 72). The 750 figure in the policy would not be breached. Furthermore the 750 figure refers to dwellings delivered, of which to date there are only 103, substantially below the 750 figure. As a matter of fact allowing this appeal would not breach this aspect of Policy Villages 2, I return to the criteria based aspects below. (para. 14)

1.4 The Inspector found that the proposals would not result in a breach of the 750-figure aspect of PV2 or the overall plan strategy.

Whilst the level of planning permissions and resolutions to approve is approaching 750 the number of units built is still substantially below that figure. That equates to a delivery rate of some 34 units per annum based on the delivery since 2014. If that were continued the delivery would be too low to reach 750 in the plan period. The latest AMR figures demonstrate that completions and planning permissions outstanding in the two principle towns of Bicester and Banbury amount to in the region of two thirds of housing delivery. The remaining one third being delivery in the rural areas, a substantial proportion of which is at a strategic allocation location. This demonstrates that the overall intention of the strategy to deliver housing in the most sustainable

locations of the main towns and strategic allocation and to limit development in the rural areas is succeeding. The proportion of housing being delivered at the smaller villages is significantly less than half of delivery as was identified as a main driver for the development of the strategy. (para. 17)

The 750 figure is not an upper limit and it would require a material exceedance to justify arriving at a conclusion the policy was being breached. Whilst the figure is moving towards the actual figure there is still some headroom available. Time has moved on and we are now further into the plan period, any permissions that are now granted will take time to produce the delivery of housing and therefore it is likely that the delivery of the units identified in this appeal would not arise until the plan was in the second half of its term. It is in my view no longer appropriate to characterise this as early in the plan period. The CLP 2031 (part 2) plan has the potential to review the implications of these policies or a formal review of the part 1 plan could come forward.(para. 18)

In any event, there is evidence to demonstrate that housing delivery is strengthening. That it is focussing in the main towns of Bicester and Banbury and the strategic allocation and that the contribution from the more sustainable villages (category A villages) in the rural area to the overall delivery of housing is achieving the plans overall need in a manner consistent with the strategy. Whilst I accept that the delivery of all of the level of housing anticipated through Policy Villages 2 could reduce the flexibility later in the plan period I have been provided with no evidence that the granting of permission here would prevent development at a more sustainable location in another Category A village. (para. 20)

Any future developments at Category A villages in the future would need to be considered in the context of the circumstances pertaining at that time which would include, but not be limited to, matters such as whether the 750 figure had been materially exceeded, the specific needs for that development in relation to the village and the effect on the overall settlement strategy. (para. 22)

On the basis of the above conclusions I am satisfied that the location and scale of the proposed development would not conflict with the development plan's strategy for the distribution of housing in the district. The development would not conflict with policy BSC1, Policy Villages 1 or Policy Villages 2 and would not undermine the overall strategy of the development plan, with which it would comply. (para. 23)

Appeal 3228169

1.5 The appeal was against CDCs decision to refuse an application for outline planning permission for up to 84 dwellings on land at Merton Road, Ambrosden by notice dated 20/02/2019. The appeal was allowed on 09/09/2019.

1.6 With regard LPp1 policy PV2, the Inspector states:

CLPP1 Policy Villages 2 (PV2) concerns the distribution of growth across the district's rural areas. It indicates that a total of 750 homes will be delivered at Category A villages². This is in addition to the rural allowance for small site windfalls and planning permissions for 10 or more dwellings that existed as at 31 March 2014. Category A villages are 'Service Centres' listed under Policy Villages 1. These are considered to be the most sustainable villages, of which Ambrosden is one, which offer a wider range of services and are well connected to major urban areas, particularly by public transport. (para. #)

1.7 At the time of the appeal, the housing identified for Category A development was as follows:

The Council's evidence notes that the totals of completed dwellings under PV2 (271) and those benefitting from permissions (479) add up to the 750-figure sought under the policy. It is not claimed there would be a current breach of the policy (since only 271 have been delivered). However, granting permission for up to 84 dwellings, which would be likely to be built out within a short time, together with the other 479 committed and deliverable dwellings, could give rise to a total of 834 dwellings being delivered several years prior to 2031, the end date of CLPP1. (para. 20)

1.8 The Inspector assessed the appeal proposals against PV2:

I am not convinced by the evidence provided by the Appellant's planning witness that the 750-figure has no development management significance. The Inspector determining the appeal against a residential development for up to 51 dwellings in Chesterton considered the use of figure of 750 in PV2 must have some form of constraining effect on total numbers, otherwise the policy would be meaningless in terms of its contribution towards the overall strategy of the plan. Nevertheless, neither within Policy PV2 itself nor within CLPP1 as a whole is the term 'material exceedance' found. Even if to exceed the 750-figure by 84 units now at a point less than halfway through the CLPP1 plan

period was to be regarded as a material exceedance, the question arises what planning harm would arise from such a breach? This is bearing in mind that such a quantum of housing would not be delivered until later in the plan period.

Policy PV2 does not contain any temporal dimension in that it does not specify when during the plan period housing should be delivered, nor does it contain any phasing element. Similarly, other than relating to Category A villages, the policy has no spatial dimension.

A concern of the Council is that to allow an exceedance of the magnitude envisaged could lead to unrestrained growth in Category A villages, although it was acknowledged at the inquiry that a precedent argument was not being advanced. However, I accept that there is force in the point advanced by the Appellant that the specific management criteria of Policy PV2 would seem to ensure that it is a self-regulating policy; if the point is reached where the number of dwellings granted in Category A villages is likely to undermine the Council's overall spatial strategy, a series of planning harms is likely to emerge. These might include the point where local infrastructure is unable to cope, land of higher environmental value is sought, or out-commuting and traffic congestion manifest themselves. (para. 23 – 25)

Overall, I consider the proposal would not materially undermine the Council's housing strategy or prejudice the achieving of a more balanced housing growth. (para. 35)

- 1.9 In refusing application #, RfR 1 made reference to the “*the number of dwellings already permitted in Adderbury*”. The Committee Report confirms that CDC considers Adderbury has already accommodated enough of the overall Category A provision. The Report states that “*the 120 dwellings approved under Policy Villages 2 (i.e. since 31 March 2014) represents 16% of the 750 dwellings*” (para. 9.26) and continues to state that “*concentrating a large proportion of the number of new dwellings in a few larger villages would conflict with the spatial strategy of the Local Plan*” (para. 9.27). CDC attempted to run this argument for appeal 3228169.

Further concerns of the Council are that allowing the proposal would lead to an over-concentration of development in Ambrosden and a disproportionate share of the PV2 housing provision. Existing recent housing developments in the village (Church Leys Farm and Ambrosden Court) permitted under Policy PV2 amount to 129 units, which is 17% of 75010. If allowed, the proposal would represent a 25% share of the increased total of 834.

In an appeal decision on a 54-dwelling proposal in the Category A village of Hook Norton, acknowledged as a relatively sustainable location, the Secretary of State took the view that it would be acceptable for the village to provide a relatively larger share of the 750 dwellings than the other villages listed in PV211. There are some 23 Category A villages which display a wide range of populations, facilities and locations. Whilst the Council categorises these as the more sustainable settlements it is apparent that, comparatively, some settlements are clearly more sustainable than others.

Ambrosden is by population the fifth largest Category A village, with a population of in the region of 2,250¹². It benefits from a range of services including pre-school nurseries, primary school, food shop, post office / general store, village hall, two churches, hairdresser's, public house, recreational facilities and a limited opening doctor's surgery. It is some 4.6km from Bicester, has two bus services through the village which connect to Bicester and Oxford, the more frequent S5 providing an hourly service through the week and on Saturdays. An off-road cycle path links the village with Bicester.

The CLPP1 allocates a considerable amount of land for employment uses on the southern and south-eastern outskirts of Bicester between the edge of the town and Ambrosden, with some development already in place. Whilst these areas are beyond what could be regarded as realistic daily walking distances for most people, they are within ready cycling distances. I address the more specific locational considerations of the appeal site in relation to village services and facilities below.

By comparison with the location and the range of facilities available in many of the other Category A villages, Ambrosden is one of the most sustainable settlements. There is agreement between the Appellant and the Council that this is the case. It is therefore unsurprising that recent housing schemes within the village have been permitted. On this basis, and against a background of no spatial apportionment of additional housing between Category A villages, and the intent of Policy PV2 that development should be enabled in the most sustainable locations, further development of the nature proposed would not be disproportionate. (para. 26 - 30)

- 1.10 CDC sought to challenge the decision. CDC applied for permission to apply for Planning Statutory Review. Permission was refused on 29/11/2019 by order of the Honourable Mrs Justice Lang DBE¹ who gave the following reason:

I agree with the First and Second Defendants' submission in their Summary Grounds of Defence that it is unarguable that the Inspector misinterpreted Policy PV2. He correctly identified the issue as whether the proposal would lead to an over—concentration of new housing development in Ambrosden which would undermine the Council's housing strategy and prejudice a more balanced distribution of housing growth, contrary to Cherwell Local Plan policy and policies in the National Planning Policy Framework ("the Framework"), and he determined that issue by applying a series of planning judgments to the material before him. He concluded that the proposal would not materially undermine the Council's housing strategy or prejudice the achieving of a more balanced housing growth (at paragraph 35). Policy PV2 did not impose a strict ceiling of 750 homes, and although it had a constraining effect on total numbers, it did not limit the number of dwellings which could be built at any one Category A Village, at any particular time in the plan period.

Moreover, the Inspector was entitled to find that strict control of development in the countryside, under CLPP1's spatial strategy, would not be consistent with the Framework's absence of a blanket protection of the countryside.

¹ Appendix #: Refusal of permission to challenge

Appeal 3222428

1.11 The appeal was against CDCs decision to refuse an application for outline planning permission for up to 46 dwellings on land at Tappers Farm, Oxford Road, Bodicote by notice dated 04/05/2018. The appeal was allowed on 30/10/2019.

1.12 With regard LPp1 policy PV2, the Inspector states:

PV2 identifies that 750 homes will be delivered at Category A villages, of which Bodicote is one of twenty-three, as defined in Policy Villages 1 (PV1). It was highlighted at the hearing that Policy Villages 2 contains no requirements in respect of the distribution of housing across the Category A villages, as well as no timeframe or trajectory for their delivery. Both main parties agreed that the 750-figure provided in the policy is not a ceiling or limit. It is also noteworthy that the policy requires the delivery of 750 units, not just a requirement to grant planning permission for this number.

1.13 At the time of the appeal, the housing identified for Category A development was as follows:

Furthermore, the figure refers to dwellings delivered, not consented, of which according to the Council there are 271. There are also a further 425 under construction (para. 11)

1.14 The AMR 2018 stated that there were another # dwellings on sites with permission but not under construction. It was agreed that the Council had resolved to approve a further 21 dwellings at Deddington and the Inspector took account of the 84 dwellings arising from appeal 3228169. This provided a total of # dwellings contributing to Category A development.

1.15 The appellant argued that a 10% non-implementation rate should apply in recognition that not all sites granted planning permission will necessarily come forward. The Inspector stated "*I do not consider it realistic to expect a 100% delivery rate for the permitted dwellings*" (para. 13). CDC has since applied a 10% non-implementation rate in the 2019 Annual Monitoring Report.

1.16 The Inspector assesses the proposals against PV2:

Even if all sites were delivered, and as I state above, I am not convinced that they will be, it is accepted by the Council that the grant of permission for an

additional 46 dwellings would not lead to a material increase over the figure expected by PV2. (para. 14)

The grant of permission for these 84 dwellings adds to the number of dwellings above 750 which have permission, but the number of dwellings that have currently been delivered falls far short of this figure (271 as referred to above). There will undoubtedly be a point where there will be a situation that will result in the material increase over the 750 dwellings figure and at that time there will be some planning harm arising from the figure being exceeded, for example harm to the overall locational strategy of new housing in the district. There is no substantive evidence before me to demonstrate that this is the case in this appeal. Clearly, when considering any subsequent schemes however, this matter will need to be carefully scrutinised. (para. 18)

However, at this time, no evidence of such harm has been presented and, in my view, the allowing of this appeal for 46 dwellings would not harm the overall strategy of the development plan which is to concentrate housing development in and around Banbury and Bicester. This is particularly so given the specific circumstances of this site, including its close proximity to Banbury. (para. 19)

Accordingly, I am satisfied that the scheme would not result in a material increase over the target of delivering 750 dwellings and thus the principle of development is acceptable on this site in accordance with Policy PV2 of the CLP 2011. (para. 21)

- 1.17 CDC attempted to argue that Bodicote had already accommodated enough Category A housing. The Inspector addressed this as follows:

I note that reference is made to Bodicote having been subject to permissions for a number of developments which would deliver 99 new dwellings. However, there is no reference in PV2 to any distribution of new dwellings across the twenty-three Category A villages. Furthermore, given the close proximity of Bodicote and the appeal site to Banbury, together with good accessibility to larger settlements and the services that are within Bodicote itself, the site would be one of the most accessible locations, with access to services, for new residential development, which is reflected in its categorisation in PV1 as a Category A or "Service" village. (para. 15)

The Council also has concern that allowing the appeal scheme would restrict the potential for a more even spread of housing across all of the Category A villages. However, PV2 does not require any spatial distribution. Moreover, the

development is near to one of the main settlements, Banbury, which provides for access to a good range of services and with access to a range of transport modes. (para. 16)

Appeal 3229631

1.18 The appeal was against CDCs decision to refuse an application for outline planning permission for up to 25 dwellings on land off Hook Norton Road, Sibford Ferris by notice dated 30/04/2019. The appeal was allowed on 05/11/2019.

1.19 With regard LPp1 policy PV2, the Inspector states:

Policy Villages 2 (PV2) provides a rural allocation of sites of 10 or more dwellings at the Category A villages. This policy identifies that 750 houses will be delivered at Category A villages; this would be in addition to the 'rural allowance' of small site windfalls and planning permissions that existed at 31st March 2014. Underpinning this policy is a recognition of the need to deliver housing growth evenly across the whole District at the larger villages. A range of criteria to guide new development in Category A villages is identified in policy PV2 covering matters such as the environmental qualities of sites, agricultural value, access to services and landscape impacts. (para. 10)

1.20 At the time of the appeal, the housing identified for Category A development was as follows:

The Council identifies that by 31st March 2019 planning permissions had been granted for over 750 houses on 18 large sites and to date 271 units had been built out on these sites in line with policy PV2 (para. #)

1.21 These figures are set out in the 2019 AMR. The 2019 AMR was only published in December 2019 but it is assumed that some/all of the data relating to Category A villages was provided for appeal 3229631 by CDC. The 2019 AMR states that "a total of 920 dwellings have been identified for meeting the Policy Villages 2 requirement of 750 dwellings" (para. 5.94). This figure allows for a 10% non-implementation rate as suggested for appeal 3222428 but also incorporates the site of appeal 3229631. It is also of note that the decision for appeal 3229631 was published on 05/11/2019, shortly after the decision on appeal 3222428 on 30/10/2019; it is therefore assumed that the Inspector would not have taken the Bodicote decision into account. As such, it can be reasonably assumed that the Inspector for appeal 3229631 based his decision on there being 841 dwellings (920 – 46(-10%) – 25(10%)) identified for meeting the requirement of PV2.

1.22 The Inspector assessed the appeal proposals against PV2:

The Council acknowledges that the 750 housing figure is not a target. A point reinforced by my colleague inspectors in recent appeal decisions. However, it should be regarded as a benchmark to govern future decisions on applications for housing development otherwise the integrity of the plan would be

undermined. The Council can identify 5.2 years housing land supply in excess of the requirement for just 3 years required for the Oxfordshire Districts. Furthermore, it can demonstrate that 168 houses have been delivered against the PV2 target of 750 houses despite the Plan being only 4 years through its 16 years 'life'. The Council's statement identifies that across the District 7,455 houses were completed of which 2,765 are in the rest of the District and a further 6,715 houses are committed of which 1,129 are in the rest of the District.

The Council identifies that by 31st March 2019 planning permissions had been granted for over 750 houses on 18 large sites and to date 271 units had been built out on these sites in line with policy PV2. However, none of these have been permitted within the Sibfords. Evidence provided through the Annual Monitoring Report (AMR) acknowledges the accelerating rate of delivery since 2015 and the Council anticipate that the 750 homes will be built out by 2028.

During the Hearing both parties made references to a large number of appeal decisions involving similar housing schemes throughout the District. Underpinning many of these decisions is the issue of 'material exceedance', a term used to describe the extent to which decisions to allow development above the figure of 750 houses for the Category A villages would erode the basis of the CLPP1. Whilst I do not have all the evidence before me regarding each of these appeal decisions there was discussion during the Hearing of a recent appeal decision, which had been allowed for an additional 84 dwellings at Ambrosden, another Category A village within the District albeit with a much larger population and containing a broader range of services. Again the issue of 'material exceedance' had informed the decision to allow the Appeal.

I do not consider 'material exceedance' to be an issue for this appeal given the modest number of units proposed and the categorisation and size of the Sibfords. The Category A status of the village in the plan warrants further investment in housing. Although the plan period is only 4 years old I do not consider that a decision to allow this appeal would undermine the essential thrust of policy PV2 and by extension the local plan.

For the above reasons on this main issue I conclude that the proposals would be in line with adopted housing policies and in line with the Framework. The proposals are in line with policies PSD1, PSV1 and PSV2 of the CHPP1. They are not in conflict with 'saved' policy H18 given the status of the village defined by PSV1 and PSV2. The scheme would not amount to a material exceedance in breach of policy PV2 and would deliver housing in line with other policies of the Plan. (para. 23)

Appeal 3233293

1.23 The appeal was against CDCs decision to refuse an application for outline planning permission for up to 18 dwellings on land west of Northampton Road, Weston-on-the-Green by notice dated 21/06/2019. The appeal was dismissed on 17/12/2019.

1.24 With regard LPp1 policy PV2, the Inspector states:

Policy Villages 2 of the CLPP1 concerns the distribution of growth across rural areas within the district and provides that “a total of 750 homes will be delivered at Category A villages”, in addition to rural allowance for small site windfalls and planning permissions for ten or more dwellings as at 31 March 2014. This policy further confirms that sites will be identified through the preparation of the Local Plan Part 2, through the preparation of Neighbourhood Plans where applicable and through the determination of planning permission applications.

It is agreed between the main parties that the 750 homes figure provided under Policy Villages 2 of the CLPP1, is not a cap or ceiling and therefore does not represent a maximum number of homes to be delivered. (para. 10-11)

1.25 At the time of the appeal, the housing identified for Category A development was as follows:

It has been put to me by the Council that, as of the date of the Hearing, planning permission for a total of 750 homes have been granted since April 2014 under the provisions of Policy Villages 2 of the CLPP1 and that approximately 271 homes have been completed.

1.26 It can be reasonably assumed that the Inspector based the decision on 1021 dwellings contributing to the PV2 requirement.

1.27 The Inspector assessed the appeal proposals against PV2:

As such, the Council contends that if planning permission were to be granted then the 750 homes figure for dwellings at Category A Villages would be exceeded well in advance of the end of the plan period. The Council maintains that by exceeding this figure, the proposed development would undermine the District’s aim to focus growth at the larger settlements of Banbury and Bicester, and would make it more difficult for other Category A Villages within the District to meet their potential housing needs later on during the plan period.

The main parties have cited a number of previous appeal decisions in support of their submissions, which include a previous appeal decision which relates to this appeal site (the previous appeal decision). In this regard, several of the referenced appeal decisions concerned development proposals where the 750 homes figure had not been exceeded. However, the recent decision in relation to a site located at Ambrosden (the Ambrosden Appeal) concerned development where, as in this present case, it was shown that the number of homes delivered during the relevant period, in combination with planning permissions that had been granted, had reached the 750 homes figure.

In this regard, whilst I acknowledge the Council's submissions in relation to this proposal, I concur with the Inspector's findings in the Ambrosden Appeal in that such proposals will not harm the strategy of concentrating development in Bicester and Banbury and, furthermore, that development at Category A Villages which exceeds the 750 homes figure need not place any undue constraint on other villages to meet any specific or identified housing needs, as other policies contained within the development plan, for example Policy Villages 1 and Policy Villages 3 of the CLPP1, would be relevant considerations to cater for any such needs.

Indeed, as noted above, the WNP is at an advanced stage and recognises that additional housing, and specifically affordable housing, is needed in Weston-on-the-Green. Whilst there is disagreement between the main parties regarding the total number of houses that will now be required to meet the aims and objectives of the WNP and further disagreement regarding the availability of alternative suitable sites within the village to meet any such needs, it is clear that in order to meet these objectives it will necessitate exceeding the already reached goal of providing 750 homes in Category A Villages within the District.

In summary of the above, I consider the proposed scheme would not necessarily undermine the District's housing strategy nor place any undue constraint on other villages to meet any specific or identified housing needs during the relevant plan period. Furthermore, I acknowledge that the scheme would provide some affordable housing units which would assist in meeting the objectives of the WNP. (para 12 - 16)

Appendix 28
Ambrosden Challenge

**In the High Court of Justice
Queen's Bench Division
Planning Court**

CO/4091/2019

In the matter of a claim for Planning Statutory Review

CHERWELL DISTRICT COUNCIL

Claimant

versus

**(1) SECRETARY OF STATE FOR HOUSING,
COMMUNITIES AND LOCAL GOVERNMENT
(2) GLADMAN DEVELOPMENTS LIMITED**

Defendants

**Application for permission to apply for Planning Statutory Review
NOTIFICATION of the Judge's decision (CPR PD 8C 7.1 to 7.6)**

Following consideration of the documents lodged by the Claimant and the Acknowledgements of service filed by the Defendants;

Order by the Honourable Mrs Justice Lang DBE

1. Permission is hereby refused.
2. The Claimant do pay the First Defendant's costs of preparation of the Acknowledgment of Service in the sum of £3,067. This is a final order unless within 14 days the Claimant files at court and serves on the First Defendant written objections to it. In that event, the First Defendant has 14 days in which to file and serve a response and the Claimant has a further 7 days in which to file and serve a reply. A Judge will then make a final determination on costs, either on the papers or at a hearing of any renewed application for permission.
3. The Claimant do pay the Second Defendant's costs of preparation of the Acknowledgment of Service in the sum of £3,627.50 This is a final order unless within 14 days the Claimant files at court and serves on the Second Defendant written objections to it. In that event, the Second Defendant has 14 days in which to file and serve a response and the Claimant has a further 7 days in which to file and serve a reply. A Judge will then make a final determination on costs, either on the papers or at a hearing of any renewed application for permission.

Reasons:

Ground 1

I agree with the First and Second Defendants' submission in their Summary Grounds of Defence that it is unarguable that the Inspector misinterpreted Policy PV2. He correctly identified the issue as whether the proposal would lead to an over-concentration of new housing development in Ambrosden which would undermine the Council's housing strategy and prejudice a more balanced distribution of housing growth, contrary to Cherwell Local Plan policy and policies in the National Planning Policy Framework ("the Framework"), and he determined that issue by applying a series of planning judgments to the material before him. He concluded that the proposal would not materially undermine the Council's housing strategy or prejudice the achieving of a more balanced housing growth (at paragraph 35).

Policy PV2 did not impose a strict ceiling of 750 homes, and although it had a constraining effect on total numbers, it did not limit the number of dwellings which could be built at any one Category A Village, at any particular time in the plan period.

Moreover, the Inspector was entitled to find that strict control of development in the countryside, under CLPP1's spatial strategy, would not be consistent with the Framework's absence of a blanket protection of the countryside.

Ground 2

In my view, it is unarguable that the Inspector's reasons did not meet the required standard. They were clear, intelligible and adequate, and enabled the parties to the appeal to understand why he had concluded as he did on the main issues identified.

1.0 Introduction

What is the Annual Monitoring Report?

- 1.1 Our AMR reviews progress in preparing the Council's planning policy documents and assesses whether development plan policies are being effective. It provides monitoring information, amongst other things, on employment, housing and the natural environment.
- 1.2 This year's AMR covers the period 1 April 2018 – 31 March 2019. A base date of 31 March 2019 is therefore used for monitoring performance against specified indicators. However, the AMR includes an up-to-date report on Local Plan progress when measured against the Local Development Scheme (LDS), the programme for producing Local Development Documents. It also includes up-to-date information on the future deliverability of development.
- 1.3 The Cherwell Local Plan 2011-2031 Part 1 was formally adopted by Cherwell District Council on 20 July 2015. The Plan provides the strategic planning policy framework for the District. Policies within the Plan replace some of the saved policies of the adopted Cherwell Local Plan 1996. Policy Bicester 13 of the Local Plan was re-adopted on 19 December 2016 following the outcome of a legal challenge. The re-adopted policy is identical to that originally adopted by the Council on 20 July 2015, other than the deletion of the words, '*That part of the site within the Conservation Target Area should be kept free from built development*' from the third bullet point of the policy's key site specific design and place shaping principles.
- 1.4 This is the fifth AMR to monitor against the indicators and targets from the adopted Local Plan 2011-2031 Part 1. However, as the Plan was adopted on 20 July 2015 which is partly through the monitoring period of 2015/16 this is the third AMR that fully reports on these indicators. There are some data that are still unavailable therefore not all indicators can be reported in this AMR.

Purpose of the Annual Monitoring Report

- 1.5 The purpose of this AMR is to:
 - monitor the preparation of Cherwell's Local Plan against timetables in the Local Development Scheme;
 - assess the extent to which policies are being achieved;
 - review key actions taken under the Duty to co-operate.

Legislative Background

- 1.6 The Council has a statutory obligation to produce a monitoring report. The Town and Country Planning (Local Planning) (England) Regulations 2012 (as amended) sets out the requirements that must be satisfied by the report.

- 1.7 Subject to those requirements, it is a matter for individual Councils to decide the content on their monitoring reports. There is no longer a requirement to submit the report to the Secretary of State for Housing, Communities and Local Government.

Structure of the Annual Monitoring Report

- 1.8 **Section 2** presents the key findings from the monitoring work undertaken during this monitoring year.
- 1.9 **Section 3** reports on the delivery of Cherwell District’s Local Plan and other supporting documents, providing a review of progress against the targets and milestones set out in the Local Development Scheme.
- 1.10 **Section 4** looks at the progress made on neighbourhood planning within the district.
- 1.11 **Section 5** sets out detailed monitoring results using specific indicators from the adopted Local Plan 2011-2031 Part 1.
- 1.12 **Section 6** looks at progress on infrastructure delivery.
- 1.13 For further information relating to the AMR, please contact the Council’s Planning Policy, Conservation and Design team:

Tel: 01295 227985

Email planning.policy@cherwell-dc.gov.uk

2.0 Key Findings

2.1 This chapter sets out the key findings of the AMR for the monitoring year 2018/19. They are discussed in more detail in Chapter 5.

Local Plan Progress / Local Development Scheme

Progress in the Monitoring Year 2018/19

- The Adderbury Neighbourhood Plan referendum was held on 21 June 2018, which resulted in a favourable decision. On 16 July 2018 Cherwell District Council formally 'made' the Adderbury Neighbourhood Plan.
- The Cherwell Residential Design Guide Supplementary Planning Document was adopted by the Council on 16 July 2018.
- The Local Development Scheme was updated, approved and published in December 2018.
- The Council's Brownfield Land Register was published in December 2018.
- The Examination Hearings to the Cherwell Local Plan Part 1 Partial Review: Oxford's unmet housing need were held between 5 and 13 February 2019.
- The Shipton-on-Cherwell and Thrupp Neighbourhood Area was designated on 11 February 2019.

Progress since the end of the Monitoring Year

- The Mid-Cherwell Neighbourhood Plan referendum was held on 21 March 2019, which resulted in a favourable decision. On 14 May 2019 Cherwell District Council formally 'made' the Mid-Cherwell Neighbourhood Plan.
- The Examination of the Deddington Neighbourhood Plan commenced on 28 April 2019 with the Examiner's Report issued on 3 September 2019.

Employment

- The district has seen a considerable gain in employment floorspace with 100,523 sqm completed over 2018/19 following a low gain in 2017/18 (951 sqm).
- At 31 March 2019 there was over 392,000 sqm (net) of employment floorspace with planning permission.
- There is planning permission in place for 184 ha of land on allocations.
- There are 81 ha of remaining allocated employment land yet to receive planning permission.
- Only 0.29 ha of employment land was lost to non-employment use during 2018/19.
- Overall there was a loss of 1870.87 sqm (net) floorspace in tourism related developments over the course of 2018/19.

Housing

- There were 1,489 housing completions (net) during 2018/19.
- The total number of housing completions (net) between 2011 and 2019 is 7,455 dwellings.
- 30% of housing completions (net) in 2018/19 were on previously developed land.
- Net affordable housing completions in 2018/19 were 507.
- At 31 March 2019 there are extant planning permissions for a total of 6,722 dwellings. These are homes with planning permissions but not yet built.
- The District presently has a 4.6 year housing land supply for the period 2019-2020 and a 4.4 year housing land supply for the period 2020-2025 (commencing 1 April 2020).

Natural Environment

- There were 7 planning applications granted permission contrary to Environment Agency's advice on flood risk grounds, however no permissions granted on water quality grounds objection.
- 6 planning permissions were approved for renewable energy schemes including one for a wind turbine, one for a ground source heat pump and four for solar photovoltaics (PVs).
- There has been an increase in total area of priority habitats from 3,913 ha to 3,925 ha (increase of 12 ha).
- The number of priority species listed in the District has very slightly decreased from 126 to 125.
- 97.1% of the SSSI units are in Favourable or Unfavourable recovering conditions, which is a decrease of 1.9% since last year.

3.0 Cherwell Planning Policy Documents

- 3.1 The existing statutory Development Plan comprises the adopted Cherwell Local Plan 2011-2031 Part 1 (July 2015 incorporating Policy Bicester 13 re-adopted December 2016), the saved policies of the adopted Cherwell Local Plan 1996, the made (adopted) Hook Norton, Bloxham, Adderbury and Mid Cherwell Neighbourhood Development Plans. The Development Plan also includes the saved policies of the Oxfordshire Minerals and Waste Local Plan 1996, the production of which is a County Council function. A new Minerals and Waste Core Strategy Part 1 was adopted on 12 September 2017. Progress on the Minerals and Waste Local Plan Part 2 – Site Allocations was made with the Issues and Options consultation held between August and October 2018.
- 3.2 The Cherwell Local Plan 1996 was adopted in November 1996 and its relevant policies were saved from 27 September 2007.
- 3.3 The Cherwell Local Plan 2011-2031 Part 1, containing strategic development sites and policies, was adopted on 20 July 2015. It replaced many of the saved policies of the adopted Cherwell Local Plan 1996. Appendix 7 of the adopted Local Plan 2011-2031 provides a list of the saved policies.
- 3.4 The following Neighbourhood Development Plans have been ‘made’ and therefore form part of the statutory development plan for their designated area:
- Hook Norton – made 19 October 2015
 - Bloxham – made 19 December 2016
 - Adderbury – made 16 July 2018
 - Mid Cherwell – made 14 May 2019

Local Development Scheme Progress

- 3.5 The Local Development Scheme (LDS) is a rolling business plan for the preparation of key planning policy documents relevant to future planning decisions. The LDS that this AMR reports on was published in December 2018. It provided for:
- **Partial Review of the Cherwell Local Plan 2011-2031 (Part 1)** – a supplemental planning strategy with strategic development sites in order for the district to contribute in meeting the identified unmet housing needs of Oxford City.
 - **Oxfordshire Plan 2050 (formerly known as Joint Statutory Spatial Plan (JSSP))** – a new countywide strategic plan prepared jointly by the six Oxfordshire Councils through the Oxfordshire Growth Board.

- **Cherwell Local Plan Review** – a review of the adopted Cherwell Local Plan 2011-2031 to ensure key planning policies are kept up to date, to assist implementation of the JSSP and to replace the remaining saved policies of the 1996 Local Plan.
- **Supplementary Planning Documents (SPDs)** which expand upon and provide further detail to policies in Development Plan Documents. The Banbury Canalside SPD was highlighted.
- **Community Infrastructure Levy Charging Schedule** which raise funds to deliver off-site infrastructure that will support the development proposed within Cherwell.

Partial Review of the Cherwell Local Plan 2011-2031 (Part 1)

- 3.6 In paragraph B.95 of the adopted Local Plan Part 1 the Council recognises that Oxford may not be able to accommodate the whole of its new housing requirement (as identified in the 2014 Oxfordshire Strategic Housing Market Assessment) within its administrative boundary.
- 3.7 The Partial Review process is the means by which Cherwell makes its contribution (4,400 homes) to meeting the identified unmet need from Oxford City. The Partial Review was submitted to Secretary of State for Housing, Communities and Local Government for formal examination on 5 March 2018. Following the Plan's submission, the Plan's progress is guided by the Planning Inspector's examination process and programme.
- 3.8 A Preliminary Hearing took place on 28 September 2018 followed by Main Hearings in February 2019. In response to the Inspector's Post-Hearings Advice Note dated July 2019, the Council prepared a schedule of proposed Main Modifications to the Partial Review. The consultation period on the modifications ended on 20 December 2019.

Supplementary Planning Documents

- 3.9 A draft **Banbury Canalside Development Area SPD** was published for informal consultation between January 2018 and February 2018. Further work on the SPD will be recommenced in 2020.
- 3.10 The **Cherwell Residential Design Guide SPD** was adopted by the Council on 16 July 2018.

Community Infrastructure Levy (CIL) Charging Schedule

- 3.11 The Council has previously consulted upon a Preliminary Draft (Feb/March 2016) and a Draft CIL Charging Schedule (Nov 2016 – Jan 2017). However, work was then paused pending the outcome of the Government's review of CIL. Following the recent completion of this review work it was envisaged that further consultation on a Draft Charging Schedule is expected in September/October 2019 however it has not been progressed due to other commitments. Further work will be recommenced in 2020.

Duty to Co-operate

3.12 Local Councils are expected to consider strategic issues relevant to their areas through a statutory 'Duty to Co-operate' established by the Localism Act (2011) and described in the National Planning Policy Framework (NPPF).

3.13 The Duty:

- relates to sustainable development or use of land that would have a significant impact on at least two local planning areas or on a planning matter that falls within the remit of a County Council;
- requires that councils set out planning policies to address such issues;
- requires that councils and public bodies engage constructively, actively and on an on-going basis to develop strategic policies; and
- requires councils to consider joint approaches to plan making.

3.14 During the monitoring period 2018/19 the Council:

- continued work with the Oxfordshire authorities as part of the Oxfordshire Growth Board to implement the Oxfordshire Housing and Growth Deal 2018. The first stage of public consultation (Regulation 18 part1) of the Oxfordshire Local Plan 2050 was completed in February-March 2019.
- prepared and agreed Statements of Common Ground with the Oxfordshire authorities and a number of prescribed bodies supporting the preparation of the Local Plan Partial Review (February 2019). Published as part of the Plan's examination evidence.
- agreed a Statement of Common Ground (22 March 2019) with the Oxfordshire authorities as part of the submission of the Oxford Local Plan 2036 and South Oxfordshire Local Plan 2034 to the Secretary of State for examination. Published as part of these plans' evidence.

4.0 Neighbourhood Planning

- 4.1 In addition to the made neighbourhood plans listed at paragraph 3.4 above, five Parish Councils have had their administrative areas designated as Neighbourhood Areas. These are shown below.

Neighbourhood Plan Area	Designated Date	Monitoring Year
Bodicote	04/01/2016	2015/16
Deddington	02/12/2013	2013/14
Merton	02/12/2013	2013/14
Stratton Audley	03/06/2013	2013/14
Weston on the Green	02/11/2015	2015/16
Shipton on Cherwell & Thrupp	11/02/2019	2018/19

Deddington

- 4.2 The Deddington Pre-Submission Neighbourhood Plan was consulted upon from 1 October to 19 November 2017 over a seven week period.
- 4.3 Deddington Parish Council submitted their Neighbourhood Plan to Cherwell District Council on 1 October 2019. Cherwell District Council then undertook a six-week public consultation on the draft (Submission) Plan between 8 November 2018 and 21 December 2018. Following the consultation an independent examiner was appointed in April 2019 to carry out the independent examination of the Deddington Neighbourhood Plan. The Examiner's report was published on 3 September 2019. Following receipt of the Examiner's report Deddington Parish Council resolved at their meeting on 20 November 2019 to withdraw the Neighbourhood Plan. It is their intention to continue with the Neighbourhood Plan process and to submit a revised plan at the earliest opportunity.

Weston on the Green

- 4.4 The Weston on the Green Pre-Submission Neighbourhood Plan was consulted from 15 May to 26 June 2017.
- 4.5 The Weston on the Green draft Submission Neighbourhood Plan was submitted by Weston on the Green Parish Council to Cherwell District Council on 11 October 2018. The Neighbourhood Plan and supporting documents were publicised as required and public consultation took place between 19 November 2018 and 11 January 2019. Following the consultation, the Council, in agreement with the Parish Council, appointed an Independent Examiner to undertake the independent examination. The Examiner's report is dated 11 September 2019.
- 4.6 On 4 November 2019 Cherwell District Council, having considered each of the recommendations made by the examiner:

1. approved all the Examiner's recommendations and modifications with the exception of Modifications 15,21, 24, 26 and 27
 2. Agreed not to proceed to referendum on the Weston on the Green Neighbourhood Plan at this time
 3. Approved the area for the future referendum as being the designated Neighbourhood Plan area in accordance with the examiner's recommendations, noting that there will be no extension to the area
- 4.7 The Council is currently inviting comments on its proposed alternative modifications 15, 21, 24, 26 and 27, and the reasons for its decision.

5.0 Monitoring Results

5.1 This section sets out the detailed monitoring results using specific indicators from the adopted Local Plan 2011-2031 (Part 1).

Theme One: Developing a Sustainable Local Economy

Policy	Indicator	Target	Progress
SLE 1 Employment Development	Employment commitments and completions on allocated employment land per sub area (Banbury, Bicester, Kidlington, Rural Areas)	100% take up of allocations by the end of the plan period	<p>During 2018/19, 85,688.8 sqm of employment floorspace was completed. At 31 March 2019 there was permission for 36,6126.3 sqm of employment floorspace yet to be built.</p> <p>At 31 March 2019 the total remaining allocated employment land available in Cherwell District (yet to receive planning permission) was 81.34 ha.</p> <p>There is planning permission for 184.14 ha of land on Local Plan allocations.</p>
SLE 1 Employment Development	Employment commitments and completions on non-allocated employment land per sub area (Banbury, Bicester, Kidlington, Rural Areas)	Yearly increase in employment use class commitments and completions	<p>During 2018/19, 14,834.69 sqm of employment floorspace was completed. At 31 March 2019 there was permission for 26,228.49 sqm of employment floorspace yet to be built.</p>
SLE 1 Employment Development	Completions resulting in a loss of employment use to non-employment use per sub area (Banbury, Bicester, Kidlington, Rural Areas)	No overall net loss of employment land	<p>During 2018/19, a total of 0.29 ha of employment land was lost to non-employment uses.</p>

5.2 The strategic employment allocations (including mixed use sites for housing and employment) in the 2015 Local Plan, as well as development on non-allocated sites, are monitored in this section. Until the adoption of the next Local Plan, non-strategic

employment allocations from the Non-Statutory Local Plan 2011 and saved policies from the adopted 1996 Local Plan are also monitored. Employment (non-commercial) monitoring for 2018/19 was only carried out on sites where more than 200 sqm of employment floorspace is proposed.

Employment Completions

5.3 Table 5 shows the total employment floorspace completed during 2018/19 (net). The 'net' figures reflect the overall completion totals taking into account any losses which include redevelopments and changes of use away from commercial use.

5.4 In 2017/18, Cherwell saw a gain of 951 sqm of employment floorspace completed and gains in floorspace were located mainly in the rural areas, including for example 10 new employment units at Wroxton. At Bicester a heritage centre and employment building were completed at Bicester airfield. In 2018/19, Cherwell saw a considerable gain of 100,523.5 sqm of employment floorspace completed which was mostly in B8 uses in Banbury and mixed B1 uses in Bicester.

Employment Commitments

- 5.5 Employment commitments include sites which have been granted planning permission in the past and remain extant. The total number of employment commitments have decreased slightly compared to the last monitoring year. At 31 March 2019, there was outstanding employment floorspace to be implemented equating to 392,354.8 sqm. Bicester contributed to majority of the total commitments (74%) followed by Banbury with 17% and Rural Areas with 9%. Kidlington shows a net loss, with -468 sqm of floorspace committed.
- 5.6 Banbury – There are commitments totalling 67,367.99 sqm of employment floorspace, mainly for B8 uses (44,424.58 sqm). Land south of Overthorpe Road and adjacent to the M40 (Local Plan site Banbury 6) remains the most significant commitment at Banbury, where construction continues.
- 5.7 Bicester – There are net gains across all the different B use classes in Bicester with a significant commitment of over 288,876.8 sqm of employment floorspace predominantly in B8 use class (171,101.7 sqm). Planning permission has been granted for employment development at North West Bicester (Local Plan site Bicester 1), Land North East of Skimmingdish Lane (Local Plan site Bicester 11), at South East Bicester (Local Plan site Bicester 12), and at land adjacent to the Oxford Road (Local Plan site Bicester 10) where construction on these sites are underway.
- 5.8 Kidlington and Rural Areas – A range of applications have been granted permission in the rural areas during the monitoring year including at Begbroke Science Park for up to 12 B1 and ancillary D1 units. The Former RAF Upper Heyford site (Villages 5) which is a strategic allocation for mixed use in the adopted Local Plan 2011-2031 proposes 1,075 new homes and over 120,000 sqm of mixed B use class. This site is currently under construction.

Table 7 – Remaining Local Plan Employment Allocations - 31/03/19 (ha)

Location	Remaining Allocated Area (ha)	Comments
Banbury	25.34	The majority of this remaining allocated land consists of the allocation at Employment Land North East of Junction 11 (Local Plan Policy Banbury 15), which has a resolution to approve; and there is no planning on the remaining part at employment Land West of M40 (Local Plan Policy Banbury 6).
Bicester	50.01	The majority of this remaining allocated land consists of a number of sites allocated such as Bicester Business Park (Local Plan Policy Bicester 4), where a new planning application on part of the site is pending; no planning on the remaining part at Bicester Gateway (Local Plan Policy Bicester 10); and South East Bicester (Local Plan Policy Bicester 12), which has a resolution to approve on the larger part of the site.

Rural Areas	5.99	Remaining Non-Statutory Local Plan allocation at Banbury Business Park Phase 2 (Adderbury), Brymbo Ironworks (Hook Norton) and PA Turneys (Weston on the Green). No allocations were made in the adopted Local Plan 2011-2031.
Total	81.34	

5.9 Table 7 shows the total remaining allocated land available in the District (81.34 ha), excluding land with planning permission on Local Plan allocations. However sites ‘committed’ for development (i.e. with planning permission) are still ‘available’ since it is possible that the permission may expire unimplemented or may be superseded by another. The majority of the remaining allocated land available is at strategic sites in the adopted Local Plan 2011-2031. Planning permissions are shown in Table 8.

5.10 The employment trajectory in the Local Plan 2011-2031 shows how strategic sites will be delivered and the Council is working to bring forward strategic sites, for example at Graven Hill (Bicester 2) and North West Bicester (Bicester 1) where planning permissions have been granted. The Council will be exploring the potential of sites for employment through the next Local Plan.

Table 8 – Employment Permissions at 31/03/19 (ha)

Extant permissions on allocations		Extant Permissions on Non-Allocations		Total Extant Permissions	
Location	Site Area (ha)	Location	Site Area (ha)	Location	Site Area (ha)
Banbury	9.66	Banbury	4.55	Banbury	14.21
Bicester	89.05	Bicester	1.66	Bicester	90.71
Kidlington	8.35	Kidlington	0.62	Kidlington	8.97
Rural Areas	77.08	Rural Areas	13.54	Rural Areas	90.62
Total	184.14	Total	20.37	Total	204.51

5.11 Table 8 shows the amount of land taken up with planning permissions at 31/03/19. A total of 204 ha has been permitted with 90% being at strategic allocations. In terms of the planning permissions in Table 8, only new build employment development is shown, not changes of use between employment uses since this would result in no overall gain in employment land.

Table 9 – Total Employment Land on Allocations (adopted Local Plan 2011-2031 and Non-Statutory Local Plan 2011) at 31/03/19 (ha)

Location	Total Area (ha)
Banbury	35.00
Bicester	139.06
Kidlington	8.35

Rural Areas	83.07
Total	265.48

5.12 The total employment land available on Local Plan allocations is 265.48 ha (this includes remaining undeveloped land within allocated sites, a proportion of which will have planning permission). Planning permissions are in place on 184.14 ha of this allocated land. A large proportion of this is located at Bicester where there are six strategic allocations for employment and mixed use development.

Table 10 - Loss of employment land to non-employment use (includes completions on allocations and non-allocations) during 2018/19

Location	Land Area (ha)
Banbury	0.07
Bicester	0.22
Kidlington	0
Rural Areas	0
Cherwell Total	0.29

5.13 During 2018/19, only 0.29 ha of employment land was lost to other uses which was slightly lower than the previous year (0.51 ha).

Policy	Indicator	Target	Progress
SLE 2 Securing Dynamic Town Centres	Town centre uses (including use classes A1-A5, B1a, D2) completions within and outside of each of the town centres	No net loss of town centre use floor space within town centres	This indicator is monitored as part of Bicester 5 and Banbury 7.
SLE 2 Securing Dynamic Town Centres	No. of retail impact assessments submitted with planning applications	100% of applications over the thresholds set out in Policy SLE2	No retail impact assessments were received during 2018/19 as the scale of the applications received did not exceed the thresholds set out in Policy SLE2.

5.14 Please see Bicester 5 and Banbury 7 for the monitoring of the indicator on completions of town centre uses within and outside of Banbury and Bicester town centres.

Policy	Indicator	Target	Progress
Policy SLE 3 Supporting Tourism Growth	Completed tourism developments (including D use class uses and Sui Generis)	An annual increase in completed tourism developments over the plan period	Overall there was a net loss of 1870.87 sqm during 2018/19. The main loss was in SG use which came from a change of use from a military storage building to storage purposes (B8) at Heyford Park.
Policy SLE 3 Supporting Tourism Growth	Number of visitors to tourist attractions in the District	An annual increase over the plan period	Between January and December 2018 there were 8,147,873 visitors to the district, day and overnight.

Table 11 – Completed tourism developments during 2018/19

Use Class	Net floorspace completions (sqm) 2018/19
D1	1485.3
D2	48.1
Sui Generis	-3404.27
Total	-1870.87

5.15 Between January and December 2018 there were 8,147,873 visitors to the district (an increase of over 495,000 visitors from last year): 7,743,873 of day visitors; and 404,000 of overnight trips. The total visitors spend for the year is £370,886,000 which is an increase of £22,963,000 from last year. The total tourism value is £453,549,000.

Policy	Indicator	Target	Progress
Policy SLE 4 Improved Transport and Connections	Completed transport improvement schemes	Timely provision of transport infrastructure in accordance with strategic site delivery and as set out in the IDP	Progress of Transport Schemes is recorded in the IDP Update. Section 6 of this AMR monitors the implementation of Policy INF 1 and contains a summary of completed and new transport infrastructure projects including completion of: <ul style="list-style-type: none"> - Pedestrian crossing over SW Bicester

			<p>perimeter road (Vendee Drive), Oxford Road and Middleton Stoney Road</p> <ul style="list-style-type: none"> - Jubilee Ride, 9.5 mile circular equestrian / mountain bike route to the north of Bicester - Bus service improvements between Bloxham and Banbury - New bus service between Hardwick Farm/Southam Road to Banbury town centre - Improvements to cycling and walking routes on Duke Meadow Drive and between Hanwell Fields and Southam Road, Banbury.
Policy SLE 4 Improved Transport and Connections	Developer contributions to transport infrastructure	To meet development needs, as set out in the IDP	See IDP Update. Specific contributions data not available at this time.

Policy	Indicator	Target	Progress
Policy SLE 5 High Speed Rail 2 – London to Birmingham	Level of Council involvement with the proposed High Speed Rail Link	<p>Respond to all relevant Government consultations on HS2.</p> <p>Respond to all planning</p>	<ul style="list-style-type: none"> - Meetings ongoing. A Works Programme update from HS2 is expected soon. - First Schedule 17 applications are likely to be received in the early part of 2020.

		applications relating to HS2.

Theme Two: Building Sustainable Communities

Policy	Indicator	Target	Progress
Policy BSC 1 District Wide Housing Distribution	Housing commitments and completions per sub area (Banbury, Bicester, Kidlington, rural areas)	As set out in Policy BSC 1	<p>During 2018/19, there were 1,489 housing completions (net) and as at 31 March 2019 there were extant planning permissions for another 6,722 dwellings.</p> <p>From 2011-2019, completions were as follows:</p> <p>Banbury – 2,571 Bicester – 2,119 Kidlington – 307 Remaining Areas – 2,458</p> <p>At 31/3/19, the stock of planning permissions was as follows:</p> <p>Banbury – 2,245 homes Bicester – 3,348 homes Kidlington – 151 homes Remaining Areas – 978 homes</p>
Policy BSC 2 The Effective and Efficient Use of Land	% of residential completions on previously developed land	As set out in Policy BSC 2	30% of the 1,489 housing completions were on previously developed land.

Housing Requirement

- 5.16 The housing requirement against which housing delivery and housing land supply is measured against is set out in the adopted Cherwell Local Plan 2011-2031 Part 1 (2015). Policy BSC1: District Wide Housing Distribution plans for 22,840 dwellings to be delivered between 2011 and 2031, which equates to an annual requirement of 1,142 dwellings to meet the needs of Cherwell.
- 5.17 The housing requirement was based on the Oxfordshire Strategic Housing Market Assessment (SHMA) (April 2014) which provided the objective assessment of housing need for the district.

Housing Completions**Table 12 – Housing Completions (net) 2011 - 2019**

Totals	1929	642	2571	1689	430	2119	1381	1384	2765	4999	2456	7455	33%

- 5.18 Table 12 shows the annual housing completions in Cherwell since 2011. The total number of housing completions (net) between 2011 and 2019 is 7,455 dwellings. During 2018/19, 1,489 (net) housing completions were recorded. This is higher than the previous highest recorded completion figure during 2015/16 (1,425).
- 5.19 As a consequence of the local plan and SHMA period being from 2011 onwards (pre-dating adoption of the Local Plan in 2015) there is a 'shortfall' of some 1,681 homes for the period 2011 to 2019 which must be made up.
- 5.20 In 2018/19, 44% of completions were at Banbury, 29% at Bicester and 27% elsewhere. 30% of the 1,489 homes delivered were on previously developed land.
- 5.21 Delivery on strategic development sites has included Longford Park, Banbury (96 dwellings); Southam Road, Banbury (122 dwellings); North of Hanwell Fields, Banbury (117 dwellings); Graven Hill, Bicester (122 dwellings); Kingsmere, Bicester (205 dwellings); and Heyford Park, Upper Heyford (97 dwellings).
- 5.22 There was good progress made at West of Bretch Hill, Banbury; West of Bloxham Road (South of Salt Way), Banbury; and at the North West Bicester eco-development. The sites progressing well in rural areas include Church Leys Field, Ambrosden; Land North of Station Road, Bletchingdon; Land South of Milton Road, Bloxham; Land South of Blackwood Place and Molyneux Drive, Bodicote; and Sibford Road, Hook Norton.

5.23 Table 13 shows the progress being made on strategic sites (100 or more dwellings) that are under construction.

Table 13 – Progress of strategic Sites

Site	No. of developers (Oct 2019)	Completions during 2018/19	Completions during 2017/18	Completions during 2016/17	Completions during 2015/16	Completions during 2014/15

Planning Permissions

Table 15 - Housing Commitments as at 31/03/2019

		No. of dwellings
Banbury	GF	1983
	PDL	262
	Total	2238
Bicester	GF	1501
	PDL	1847
	Total	3348
Elsewhere	GF	557
	PDL	572
	Total	1129
District	GF	4041
	PDL	2674
	Total	6722

5.25 At 31 March 2019, there were extant planning permissions for a total of 6,722 dwellings that had not yet been built.

5.26 In Banbury, most of the permissions relate to strategic, greenfield sites such as Southam Road East, West of Bloxham Road (South of Salt Way), West of Warwick Road and West of Bretch Hill. At Bicester there are permissions for greenfield development at Kingsmere (South West Bicester), SW Bicester Phase 2 and the North West Bicester eco-development. Permission also exists for the development of previously developed land at Graven Hill and Bessemer Close/Launton Road.

5.27 There were 323 homes with permission at Former RAF Upper Heyford which have yet to be built. Other extant planning permissions in the rural areas include 65 dwellings at

Ambrosden; 95 dwellings at Bodicote; 40 dwellings at Hook Norton; 54 dwellings at Kidlington and 72 dwellings at Launton.

Housing Land Supply

5.28 The NPPF (paragraph 73) requires local planning authorities to *'identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old. The supply of specific sites should in addition include a buffer (moved forward from later in the plan period) of:*

- a) 5% to ensure choice and competition in the market for land; or*
- b) 10% where the local planning authority wishes to demonstrate a five year supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or*
- c) 20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply.'*

5.29 The NPPF defines what is required for sites to be considered to be deliverable within its glossary and states that:

'To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. In particular:

- a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).*
- b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.'*

5.30 The PPG (paragraph 007 Reference ID: 68-007-20190722) provides further clarification on assessing deliverability and the evidence required. For sites with outline planning permission, permission in principle, allocated in a development plan or identified on a brownfield register, *'Such evidence, to demonstrate deliverability, may include:*

- current planning status – for example, on larger scale sites with outline or hybrid permission how much progress has been made towards approving reserved matters, or whether these link to a planning performance agreement that sets out*

the timescale for approval of reserved matters applications and discharge of conditions;

- *firm progress being made towards the submission of an application – for example, a written agreement between the local planning authority and the site developer(s) which confirms the developers’ delivery intentions and anticipated start and build-out rates;*
- *firm progress with site assessment work; or*
- *clear relevant information about site viability, ownership constraints or infrastructure provision, such as successful participation in bids for large-scale infrastructure funding or other similar projects.’*

- 5.31 A comprehensive review of housing land supply has been undertaken. All known sites of 10 or more dwellings were individually identified and examined.
- 5.32 Site promoters, developers and agents were engaged in reviewing the deliverability of these sites with each being sent a form containing details on planning applications and permissions and, where applicable, the expected delivery rates from the last AMR. Information was requested concerning progress on planning, expected build-out rates, the number of housebuilders currently on site and/or expected and build-out rates. The responses received were considered in reviewing the deliverability of sites and the projected timescale for delivery having regard to lead-in times, site preparation and infrastructure provision. The base date for updating the progress on individual sites and reviewing deliverability and delivery assumptions was 12 November 2019.
- 5.33 The review included consultation with Development Management officers and other Council services involved in the delivery of sites to ensure that assessments of deliverability were realistic. Sites were discounted as being ‘deliverable’ if there was insufficient demonstrable evidence such as Gavray Drive in Bicester, Land at Merton Road in Ambrosden and Land North of Shortlands and South of High Rock in Sibford Ferris. Consideration was given to the outcome of planning appeals where relevant to the assessment of housing land supply particularly the Inspectors comments regarding evidence for justifying deliverability of sites. This is reflected in the site update forms that were sent to site promoters, developers and agents.
- 5.34 Where site promoters/developers did not respond to requests for information, chasing enquiries were made. Where, ultimately, no update was received, officers made an informed judgement about deliverability and delivery timescales having regard to the information available, to internal consultations and with the benefit of contextual information from the review of other sites.
- 5.35 A peak delivery assumption of 50 dwellings per annum for each housebuilder on strategic sites based on recent evidence (see Table 13), unless specific circumstances suggest otherwise. The results of site visits undertaken for 2019/20 site monitoring (separately for quarters 1 and 2) were used to help understand the most up to date delivery position. The number of developers on site can change over time and at peak build-out, 3-5 developers can be seen on larger strategic sites. At one point there were 5 developers on site at Kingsmere during 2015/16 before coming down to 4 developers from 2016/17.

Once completions start on site a rate of approximately 50 dwellings per year per developer is considered to be a reasonable assumption for strategic sites as demonstrated by Table 13.

- 5.36 Deliverability, timescales and rates of delivery were considered on a site by site basis. For all sites of 10 or more dwellings, no assumptions were made that because a site had planning permission it would be delivered. Consequently, applying a generic lapse rate to planning permissions for those sites was not appropriate.
- 5.37 Sites not considered to be deliverable were assessed for developability over a longer period of time.
- 5.38 The NPPF and the PPG set out that a windfall allowance for small sites (unidentified sites or less than 10 dwellings) may be justified in the five-year supply if a local planning authority has compelling evidence that such sites have consistently become available in the local area and will continue to provide a reliable source of supply. Any allowance should be realistic having regard to the Housing and Economic Land Availability Assessment (HELAA), historic windfall delivery rates and expected future trends, and should not include residential gardens.
- 5.39 The Housing Delivery Monitor (HDM) at Appendix 2 includes a windfall allowance of 35 dwellings per year at Banbury, 10 dwellings per year at Bicester and 61 dwellings per year at rural areas. These assumptions have been lowered for the second half of the plan period in the interest of caution. A total of 530 dwellings are added to the five year supply calculation.
- 5.40 The 2018 HELAA (section 5) provides the evidence on windfall allowance. It considered historic completions of small, unidentified sites, the identification of sites on previously developed land, expiries of planning permissions and completions against permissions. The conclusion led to 106 dwellings per year with a breakdown by areas as shown in para 5.39.
- 5.41 The results of the review of housing land supply are presented in the Housing Delivery Monitor at Appendix 2. The Housing Delivery Monitor distinguishes between sites that are considered to be deliverable (those contributing to the 5 year land supply) from those only presently considered to be developable at a future point.

Five Year Housing Land Supply Position

- 5.42 Table 16 provides the calculation of the current five year land supply based on the Housing Delivery Monitor at Appendix 2. Only sites considered to be 'deliverable' are included in the calculation of the five year housing land supply.

Table 16 – Calculation of housing land supply from deliverable sites

		Five Year Period 2019-24 (current period)	Five Year Period 2020- 25 (from 1 April 2020)
a	Plan Requirement (2011-2031)	22840	22840
b	Annual Requirement (a/20)	1142	1142
c	Requirement to date (b*years)	9136	10278
d	Completions	7455	8903
e	Shortfall at 31/3/19 (c-d)	1681	1375
f	Base Requirement over next 5 years (b x 5)	5710	5710
g	Base Requirement over next 5 years plus shortfall (f + e)	7391	7085
h	5 Year Requirement and shortfall plus 5% (g+5%)	7761	7439
i	Revised Annual Requirement over next 5 years (h/5)	1552.1	1487.9
j	Deliverable Supply over next 5 Years	7096	6573
k	Total years supply over next 5 years (j/i)	4.6	4.4
l	'Shortfall' (j – h)	665	866

** projected completions of 1,448 for 2019/20 added to roll forward to 2020/2025*

- 5.43 There are two five year periods shown. The current assessment of supply is for the period 2019 to 2024. However, to ensure that a calculation is provided for the next five years in full, a calculation is also shown for 2020 to 2025 which will be applied in decision making from 1 April 2020. There is no duplication or overlap in the figures as the calculations are produced at the same point in time having regard to the same assessment of supply. The only adjustment necessary to roll forward the five year period is to add the projected completions for 19/20 to overall completions for 2011-2020 and to consider the projected deliverable supply from 2020-2025 rather than 2019-2024.
- 5.44 Table 16 illustrates that the District can demonstrate a 4.6 year supply for the current period 2019-2024 and a 4.4 year supply for the next five year period (2020-2025) commencing on 1 April 2020. The calculations include a 5% buffer to both the base housing requirement and the shortfall and the making up of a delivery shortfall within five years. This AMR shows that a supply of 7,096 homes is expected from deliverable sites from 2019 to 2024 and a supply of 6,573 homes is expected for 2020-2025.
- 5.45 The fall in the district's housing land supply position does not result from recent under-delivery but reflects some caution in the projections for future delivery. This particularly the case for a number of large, complex development sites some of which have been the

subject of protracted discussion. The circumstances of individual sites and developers and market conditions also affects the speed at which homes can be delivered.

- 5.46 The Council considers that the extent of the five year land supply shortfall is manageable and reversible. High levels of delivery in the district demonstrate the demand that exists and a number of large sites are expected to move forward. As illustrated in the Housing Delivery Monitor, the district is experiencing a high level of growth and the supply of development land is evidently abundant. The issue going forward is more one of bringing forward sites that have not commenced and ensuring that higher rates of delivery are achieved where there is current caution.

- 5.47 As site specific issues are resolved, and with the assistance of targeted funds from the Oxfordshire Housing and Growth Deal, it is expected that the five year land supply position will improve. Furthermore, The Housing Delivery Monitor shows that there is some potential additional supply from other developable (rather than deliverable) sites in the medium term which will help maintain a healthy land supply.

Housing Land Supply in Oxfordshire: Written Ministerial Statement, 12 September 2018 (HCWS955)

- 5.48 On 12 September 2018, the Secretary of State for Ministry of Housing, Communities and Local Government issued a written statement containing a *‘temporary change to housing land supply policies as they apply in Oxfordshire’*. Ministerial Statement HCWS955 is a Government commitment as part of the Oxfordshire Housing Growth Deal providing a temporary planning flexibility pending the adoption of the Oxfordshire Plan 2050. For the purpose of decision-taking under paragraph 11(d), footnote 7 of the Framework will apply where the authorities in Oxfordshire cannot demonstrate a three year supply of deliverable housing sites with the appropriate buffer. This statement is a material consideration in planning decisions.

- 5.49 Although the Council presently cannot demonstrate a five year supply, its position exceeds the current three year housing land supply requirement as set out in the Written Ministerial Statement therefore paragraph 11(d) of the NPPF is not engaged for reasons of housing land supply.

Housing Density

Policy	Indicator	Target	Progress
Policy BSC 2 The Effective and Efficient Use of Land	Net housing density of completions	As set out in Policy BSC 2	The housing density of large completed sites (10 or more dwellings) during 2018/19 is 20.7 dwellings per hectare (dph).

Table 17 - Housing density of large completed sites during 2018/19 (10 or more dwellings)

	2018/19
Total Site area (gross)	46.06
No. of dwellings on large sites	953
Housing Density	20.7

- 5.50 The indicator looks at net housing density of completions however for the purpose of this AMR the gross site areas were used therefore the housing density recorded is actually lower than it should have achieved.
- 5.51 The housing density of large completed sites (10 or more dwellings) during 2018/19 is 20.7 dwellings per hectare (dph) which is lower than the previous year (26.3) and below the target set out in Policy BSC 2. Out of the 57 large completed sites, 35 of them have exceeded the target of 30 dph. Examples of completed sites with higher housing densities are primarily on parcels at Graven Hill (various densities) and the Oxford & Cherwell Valley College site (98 dph).

Affordable Housing

Policy	Indicator	Target	Progress
Policy BSC 3 Affordable Housing	Net affordable housing completions/acquisitions per tenure	As set out in Policy BSC 3	During 2018/19 there were 507 net affordable housing completions.
Policy BSC 3 Affordable Housing	No. of self-build completions	An annual increase in the number of self-build completions	There were 122 self-build completions in 2018/19.

Table 18 – Net Affordable Housing Completions

Year	Affordable housing completions (net)
2011/12	204
2012/13	113
2013/14	140
2014/15	191
2015/16	322
2016/17	278
2017/18	426
2018/19	507
Totals	2181

- 5.52 There were 507 net affordable housing completions during 2018/19 which is the highest recorded delivery for affordable housing. This excludes 14 acquisitions (i.e. transfers from market housing stock). The number of affordable housing completions has continued to increase which reflects the higher overall rate of housing delivery across the district. The level of affordable housing completion has continued to exceed the Council’s affordable housing target of 190 dwellings per year.
- 5.53 From the 507 affordable housing completions there were 335 in affordable rented and 172 in shared ownership. There continues to be no delivery of social rented homes.
- 5.54 During 2018/19, there were 122 self-build affordable housing completions in the District which took place at the Graven Hill site (Bicester 2 allocation in the Local Plan). Graven Hill has planning permission for 1,900 self-build dwellings and will be the largest self-build development in the country. The site has made considerable progress during 2018/19 with several plots under construction.

Policy	Indicator	Target	Progress
Policy BSC 4 Housing Mix	Number of completed dwellings per number of bedrooms	As set out in Policy BSC 4	No data is available at this time.
Policy BSC 4 Housing Mix	Number of ‘extra care’ completions	As set out in Policy BSC 4	There were 78 extra care completions during 2018-19.

- 5.55 There were 78 extra-care dwellings completed during 2018/19, all delivered at the Oxford and Cherwell Valley College site on Broughton Road, Banbury.

Area Renewal

Policy	Indicator	Target	Progress
Policy BSC 5 Area Renewal	Completed development per type in the ‘area of renewal’	Improvements in levels of deprivation in the District	Progress recorded in The Brighter Futures in Banbury Programme Annual Report 2018/19.
Policy BSC 5 Area Renewal	The ‘Brighter Futures in Banbury’ performance Measures Package Reports	Positive trends across all the Programme’s indicators	Progress recorded in The Brighter Futures in Banbury Programme Annual Report 2018/19.

- 5.56 Brighter Futures in Banbury is a strong long term partnership programme delivering new opportunities, innovative projects and high quality focussed services in Ruscote, Neithrop and Grimsbury and Castle Wards.
- 5.57 The Brighter Futures in Banbury Programme Annual Report 2018/19 is available to view on the Council’s website
<https://www.cherwell.gov.uk/info/118/communities/483/brighter-futures-in-banbury/2>)

Travelling Communities

Policy	Indicator	Target	Progress
Policy BSC 6 Travelling Communities	Completed/Lost Gypsy & Traveller Plots/Travelling Showpeople Pitches, by location (location criteria as set out in Policy BSC 6)	Provision for new pitches to meet identified shortfall as set out in Policy BSC 6	There remains a need to meet policy requirements and to secure 5 year land supplies. A separate needs assessment was published in June 2017. Applications continue to be considered against the criteria in Policy BSC6.

- 5.58 The Government’s overarching aim is to ensure fair and equal treatment for travellers, in a way that facilitates the traditional and nomadic way of life of travellers whilst respecting the interests of the settled community. Local Planning Authorities should:
- Make their own assessment of need for the purposes of planning
 - Develop fair and effective strategies to meet need through the identification of land for sites
 - Plan for sites over a reasonable timescale
 - Ensure that their Local Plan includes fair, realistic and inclusive policies
 - To have due regard to the protection of local amenity and local environment.

Table 19 – Existing Supply of Gypsy and Traveller Pitches at 31 March 2019 (Policy BSC 6)

Site	Net Loss / Gain								Net Running Totals
	Supply at 31 March 2012	12/13	13/14	14/15	15/16	16/17	17/18	18/19	
Bicester Trailer Park, Chesterton	8	0	0	0	0	0	0	0	8

Corner Meadow, Fanborough Road, Mollington	4	0	5	0	0	6	0	0	15
Horwood Site, Ardley Road, Ardley	1	0	0	0	0	0	0	0	1
Land adjoining A34 by Hampton Gay and Poyle	8	0	0	0	0	0	3	0	11
Land South West of Woodstock Road, Yarnton	3	0	0	0	0	0	0	0	3
Lower Heyford Road, Caulcott	0	0	0	0	5	0	0	0	5
OS Parcel 3431 Adjoining And North East Of Blackthorn Road Launton	0	2	0	0	0	0	0	0	2
Smiths Caravan Park, Milton	36	0	0	-16	0	-20	0	0	0
Station Caravan Park, Banbury	10	0	0	0	0	0	-10	0	0
Summer Place, Blackthorn Road, Launton	0	0	0	0	0	0	2	0	2
The Stable Block, Fanborough Road, Mollington	0	0	0	0	0	5	0	0	5
Totals	70	2	5	-16	5	-9	-5	0	52

5.59 At 31 March 2019, the total supply of Gypsy and Traveller pitches was 52 which remains unchanged from the previous year due to no new pitches being approved during 2018/19. Therefore there is a net loss of 18 pitches since 1 April 2012.

5.60 Policy BSC 6: Travelling Communities of the adopted Cherwell Local Plan 2011-2031 (Part 1) provides a sequential and criteria based approach for considering opportunities and planning applications. The Policy sets a requirement of 19 (net) additional pitches to meet the needs of Gypsies and Travellers from 2012 to 2031. It also requires 24 (net) additional plots for Travelling Showpeople from 2012 to 2031.

5.61 Tables 20 and 21 below show the remaining Local Plan requirement for Gypsy and Traveller sites and the latest projections for future supply.

Table 20 – Meeting planned requirements for Gypsy and Traveller Pitches (Policy BSC 6)

Policy BSC 6 Requirements	
No. of additional pitches required 2012-2031	19
Completions (2012-2019)	-18
Remaining Requirement 2018-2031	37 pitches (19+18)

5.62 There is a total of 10 new pitches that were given permission during 2019/20 (4 pitches at Summer Place, Launton and 6 pitches at Widnell Lane, Piddington). There is currently a live planning appeal for 3 pitches at Land West of M40, Kirtlington Road, Chesterton and there are no current planning applications pending.

Site	Permissions at 31/3/19	19/20	20/21	21/22	22/23	23/24	24/25	Details
Land North East of HM Bullingdon Prison, Widnell Lane, Piddington	0	0	6	0	0	0	0	Planning permission for 6 pitches - 17/01962/F (28/10/2019). Expected delivery during 2020/21.
Summer Place, Blackthorn Road, Launton	0	0	4	0	0	0	0	Planning permission for 4 pitches - 18/01259/F (13/09/2019). Expected delivery during 2020/21.
Totals	0	0	10	0	0	0	0	

5.63 There is a requirement for Local Planning Authorities, in producing their Local Plan, to identify and update annually, a supply of specific deliverable sites sufficient to provide 5 years’ worth of sites against their locally set targets.

5.64 Table 21 provides the five year supply calculation on the basis of Local Plan requirements.

Table 21 – Calculation of 5 Year Land Supply for Gypsy and Traveller Pitches (Policy BSC 6)

		Five Year Period 2019 - 24 (current period)	Five Year Period 2020 - 25 (from 1 April 2020)
a	Plan Requirement (2012-2031)	19	19
b	Annual Requirement (a/19)	1	1
c	Requirement to date (b x years)	7	8
d	Completions	-18	-18*
e	Shortfall at 31/3/19 (c-d)	25	26
f	Base Requirement over next 5 years (b x 5)	5	5
g	Base Requirement over next 5 years plus shortfall (f + e)	30	31
h	Revised Annual Requirement over next 5 years (g/5)	6	6.2
i	Deliverable Supply over next 5 Years	10	10
j	Total years supply over next 5 years (i/h)	1.7	1.6
k	Shortfall (g-i)	20	21

* There is no projected completion for 2019/20 added to roll forward to 2020-2025

- 5.65 A Gypsy, Traveller and Travelling Showpeople Accommodation Assessment (GTAA) for Cherwell, Oxford, South Oxfordshire and Vale of White Horse Councils was published in June 2017 (<https://www.cherwell.gov.uk/downloads/download/318/gypsy-traveller-and-travelling-showpeople-accommodation-assessment-oxford-cherwell-south-oxfordshire-and-vale-of-white-horse-june-2017>). It identifies a new objective assessment of need for each authority based on the definitions of Gypsies and Travellers and Travelling Showpeople for planning purposes (Annex 1 of the Government's Planning Policy for Traveller Sites (PPTS, 2015)). It identifies a need for 7 additional pitches for households for Cherwell by 2032 where it is known that they meet the planning definition.
- 5.66 The Assessment highlights that there are many households where it is 'unknown' whether or not the new planning definition of Gypsies and Travellers is met. Should further information arise, it states that the overall need could increase by up to 12 pitches. Additionally, a potential need for 8 pitches is highlighted due to the closure of a site (Smiths Caravan Park).
- 5.67 The Assessment advises that that for 'unknown' travellers 'it would not be appropriate when producing a robust assessment of need to make any firm assumptions about whether or not they meet the planning definition...' based on interviews that have taken place (para.7.28 of the study).

5.68 An alternative five year supply calculation is presented in Table 22 which does not include an allowance for 'unknown' need but which includes the potential need for 8 pitches arising from the Smiths site (a site that was previously included in the district's supply).

Table 22 – Calculation of 5 Year Land Supply for Gypsy and Traveller Pitches (GTAA, June 2017)

		Five Year Period 2019 - 24 (current period)	Five Year Period 2020 - 25 (from 1 April 2020)
a	Objective Assessment of Need (2017 - 2032) (meeting the Planning Definition)	15 (7+8)	15 (7+8)
b	Annual Requirement (a/15)	1	1
c	Requirement to date (b x years)	2	3
d	Completions	-5	-5*
e	Shortfall at 31/3/19 (c-d)	7	8
f	Base Requirement over next 5 years (b x 5)	5	5
g	Base Requirement over next 5 years plus shortfall (f + e)	12	13
h	Revised Annual Requirement over next 5 years (g/5)	2.4	2.6
i	Deliverable Supply over next 5 Years	10	10
j	Total years supply over next 5 years (i/h)	4.2	3.8
k	Shortfall (g- i)	2	3

* There is no projected completion for 2019/20 added to roll forward to 2020-2025

5.69 Tables 23 and 24 show the current supply position for plots for Travelling Showpeople. Table 25 shows the five year supply calculation based on Local Plan requirements. Table 26 provides an alternative five year supply calculation based on the Accommodation Assessment and a need for 12 plots from 2017-2032. The 'unknown' need for Travelling Showpeople (not included in the calculation) is only 1 plot. Although the identified need is lower than Local Plan requirements, there remains a five year land supply of zero years for both 2018-23 and 2019-24 as no new supply has yet been identified. Policy BSC6 provides a sequential and criteria based approach for considering opportunities and planning applications.

Table 23 – Existing Supply of Travelling Showpeople Plots (Policy BSC 6)

Site	No. of plots in 2008	Net Loss / Gain

Policy	Indicator	Target	Progress
Policy BSC 7 Meeting Education Needs	Completed education infrastructure	Timely provision of education infrastructure in accordance with strategic site delivery and as set out in the IDP	Progress of education schemes is recorded in the IDP Update. Section 6 of this AMR monitors the implementation of Policy INF 1 and contains a summary of completed and new education infrastructure projects including completion of: - Expansion of Warriner School, Bloxham by an additional 56 places per year group - Expansion of Chesterton CE (VA) Primary School from

			an admission number of 20 to 25 pupils.
Policy BSC 7 Meeting Education Needs	Developer contributions to education infrastructure	To meet development needs, as set out in the IDP	See IDP Update. Specific contributions data not available at this time.

Policy	Indicator	Target	Progress
Policy BSC 8 Securing Health and Well Being	Completed health care infrastructure	Timely provision of health infrastructure in accordance with strategic site delivery and as set out in the IDP	Progress of Health and Well Being Schemes is recorded in the IDP Update. Section 6 of this AMR monitors the implementation of Policy INF 1 and contains a summary of new health schemes. There are no completed health schemes reported in this AMR period.
Policy BSC 8 Securing Health and Well Being	Developer contributions to health care infrastructure	To meet development needs, as set out in the IDP	See IDP Update. Specific contributions data not available at this time.
Policy BSC 8 Securing Health and Well Being	Completions at Bicester Community Hospital	Replacement of Bicester Community Hospital within the plan period	The new community hospital was completed during 2014/15.

Policy	Indicator	Target	Progress
Policy BSC 9 Public Services and Utilities	Completed public services/utilities infrastructure	Timely provision of public services/utilities infrastructure in accordance with strategic site delivery and as set out in the IDP	Progress of public services and utilities infrastructure schemes is recorded in the IDP Update. Section 6 of this AMR monitors the implementation of Policy INF 1 and contains a summary of completed and new public services and utilities infrastructure

			<p>projects including completion of:</p> <ul style="list-style-type: none"> - Temporary relocation of Bicester Green Reuse Centre to Claydon's Yard
Policy BSC 9 Public Services and Utilities	Developer contributions to public services/utilities	To meet development needs, as set out in the IDP	See IDP Update. Specific contributions data not available at this time.

Policy	Indicator	Target	Progress
Policy BSC 10 Open Space, Outdoor Sport & Recreation Provision	Amount, type and location of open space/sport/recreation facilities	No net loss of open space/outdoor sport/recreation sites	Progress of Open Space, Outdoor Sport and Recreation Schemes is recorded in the IDP Update. Section 6 of this AMR monitors the implementation of Policy INF 1 and contains a summary of completed and new open space and recreation infrastructure projects.
Policy BSC 10 Open Space, Outdoor Sport & Recreation Provision	Areas deficient in recreation provision by type and amount	Annual improvements over the plan period	Open space, sport and play areas assessment which is nearing completion will identify current deficiencies in open space and play provision. The updated Playing Pitch and Sports Facilities Strategies (2018) contain baseline information on deficiencies in recreation provision. The findings informed the Active Communities Strategy 2019-2023 approved by the Council in June 2019. This indicator will be

			reported in the 2020 AMR.
Policy BSC 10 Open Space, Outdoor Sport & Recreation Provision	Completed built development on (former) sites of open space, outdoor sport and recreation	No net loss of open space/outdoor sport/recreation sites	Progress has been made on updating open space, sport and recreation assessments which will provide updated baseline information. The Open Space and Play Areas Strategy is nearing completion and the Sports Facilities Strategy and Playing Pitch Strategy were published at the end of 2018. The findings informed the Active Communities Strategy 2019-2023 approved by the Council in June 2019. This indicator will be reported in the 2020 AMR.
Policy BSC 10 Open Space, Outdoor Sport & Recreation Provision	Open spaces in the District meeting quality standards	A yearly improvement in the quality of sites/facilities	Progress has been made on updating open space, sport and recreation assessments which will provide updated baseline information. The Open Space and Play Areas Strategy is nearing completion and the Sports Facilities Strategy and Playing Pitch Strategy were published at the end of 2018. The findings informed the Active Communities Strategy 2019-2023 approved by the Council in June 2019. This indicator will be reported in the 2020 AMR.

Policy	Indicator	Target	Progress
Policy BSC 11 Local Standards of Provision - Outdoor Recreation	Developer contributions to open space/sport/recreation facilities per typology	As set out in policy BSC11	See IDP Update. Specific contributions data not available at this time.

Policy	Indicator	Target	Progress
Policy BSC 12 Indoor Sport, Recreation and Community Facilities	Developer contributions to open space/sport/recreation facilities per typology	As set out in policy BSC12	Progress of Indoor Sport and Recreation and community facilities Schemes is recorded in the IDP Update. Section 6 of this AMR monitors the implementation of Policy INF 1 and contains a summary of completed and new schemes including: - The Kingsmere Community Centre was completed in July 2018.
Policy BSC 12 Indoor Sport, Recreation and Community Facilities	Completed community facilities infrastructure	As set out in policy BSC12	See IDP Update. Specific contributions data not available at this time.

Theme Three: Ensuring Sustainable Development

Policy	Indicator	Target	Progress
Policy ESD 1 Mitigating and Adapting to Climate Change	Carbon emissions in the District per capita	Reductions over the plan period	Carbon emissions in the District per capita were 9.8 tonnes in 2011. In 2017, the latest year for which data is available estimates the figure to be 8.5 tonnes.
Policy ESD 1 Mitigating and Adapting to Climate Change	Permissions granted contrary to Environment Agency advice on Flood Risk grounds	No permissions granted contrary to EA advice on flood risk grounds	There were 7 permissions granted with unresolved objections from the Environment Agency. This applies to the same indicator under Policy ESD 6.
Policy ESD 1 Mitigating and Adapting to Climate Change	Access to services and facilities by public transport, walking and cycling	Improvement over the plan period, linked to Oxfordshire LAA target (National Indicator 175)	Refer to Policy SLE4.

5.70 There were 7 planning permissions granted (or allowed on appeal) between 1 April 2018 and 31 March 2019 to which the Environment Agency had initially objected on flood risk grounds.

Policy	Indicator	Target	Progress
Policy ESD 2 Energy Hierarchy	Number of Energy Statements submitted	As set out in Policy ESD2 i.e. required for all major applications	No data is available at this time.

Policy	Indicator	Target	Progress
Policy ESD 3 Sustainable Construction	% of new dwellings completed achieving water use below 110 litres/person/day	As set out in Policy ESD3	All new dwellings are required to meet the mandatory national standard set out in the Building Regulations of 125 litres/person/day. Policy ESD3 seeks a reduced level of water

			use in recognition of the district being in an area of water stress. The reduced limit of 110 litres/person/day is not however currently monitored and requires further liaison with Development Management and water utility companies to identify how best to achieve this target.
Policy ESD 3 Sustainable Construction	Completed non residential development achieving BREEAM Very Good, BREEAM Excellent	As set out in Policy ESD3	All non-residential development is typically required by condition to be constructed to achieve at least a BREEAM 'Very Good' rating based on the relevant BREEAM standard for that building type applicable at the time of the decision. There is however currently no requirement for developers to provide evidence that the development has achieved the required BREEAM rating.

Policy	Indicator	Target	Progress
Policy ESD 4 Decentralised Energy Systems	Number of District Heating Feasibility Assessments submitted	As set out in Policy ESD4 i.e. required for all applications for 100 dwellings or more	No data is available at this time.
Policy ESD 4 Decentralised Energy Systems	Number of permitted District heating schemes in the District	Increase over the plan period	No district heating schemes were permitted during 2018/19.

Policy	Indicator	Target	Progress
Policy ESD 5 Renewable Energy	Permitted renewable energy capacity per type	Increase over the plan period	6 planning permissions were approved for renewable energy schemes.

Table 27 – Permitted renewable energy capacity per type

Type	No. of applications granted permission in 2018/19
Wind	1
Solar PV	4
Solar thermal	0
Ground source	1
Air source	0
Biomass	0
Total	6

5.71 During 2018/19, 6 planning permissions were approved for renewable energy schemes which is an increase of one from 2017/18. The renewable energy schemes approved were small-scale domestic installations. It should be noted that the majority of small scale energy schemes, especially solar PV schemes, benefit from permitted development rights and do not require planning permission. It is not therefore possible to identify and record these installations.

Policy	Indicator	Target	Progress
Policy ESD 6 Sustainable Flood Risk Management	Permissions granted contrary to Environment Agency advice on flood risk grounds	No permissions granted contrary to EA advice on flood risk grounds	There were 7 permissions granted with unresolved objections from the Environment Agency. This applies to the same indicator under Policy ESD 6.
Policy ESD 6 Sustainable Flood Risk Management	Flood Risk Assessments received for development proposals within Flood Zones 2 & 3, within 1 ha of Flood Zone 1, or 9m of any watercourse	As set out in Policy ESD6 i.e. required for all proposals meeting the locational criteria	There were 295 planning applications for development proposals within Flood Zones 2 & 3, 9m of any watercourse or greater than 1ha in area and located within Flood Zone 1.

Table 28 – Planning applications received during 2018/19 for development proposals within Flood Zone 1, 2 or 3, or within 9m of any watercourse

Development Location	Applications Received
Flood Zone 1 exceeding 1 ha in area	147
Flood Zones 2 or 3	110
Within 9m of any watercourse	38
Total	295

5.72 During 2018/19, there were 295 planning applications for development proposals within Flood Zones 2 and 3, 9m of any watercourse or greater than 1 ha in area and located within Flood Zone 1.

Note: This data contains duplicate entries where a development proposal is located in more than one development location. For example, if a development proposal is located in Flood Zone 2 and is also within 9m of a watercourse then it will be counted twice, once per development location.

Policy	Indicator	Target	Progress
Policy ESD 7 Sustainable Drainage Systems (SuDS)	Completed SuDS schemes in the District	Annual increase over the plan period	No data is available at this time.

Policy	Indicator	Target	Progress
Policy ESD 8 Water Resources	Number of permissions granted contrary to Environment Agency advice on water quality grounds	No permissions granted contrary to EA advice on water quality grounds	There have been no planning permissions granted contrary to an Environment Agency objection on water quality grounds.

Policy	Indicator	Target	Progress
Policy ESD 9 Protection of the Oxford Meadows SAC	Number of permissions granted contrary to consultee (Environment Agency, BBOWT, CDC/OCC etc.) advice on water quality grounds within the SAC catchment	No permissions granted contrary to consultee (EA, BBOWT, CDC/OCC etc.) advice on water quality	There were no planning permissions granted within 1000m of the Oxford Meadows SAC contrary to consultee advice.

		grounds within the SAC catchment	
--	--	----------------------------------	--

5.73 There were no planning permissions granted within 1000m of the Oxford Meadows SAC contrary to consultee advice.

Policy	Indicator	Target	Progress
Policy ESD 10 Protection and Enhancement of Biodiversity and the Natural Environment	Total LWS/LGS area	A net gain in total areas of biodiversity importance in the District	The area of Local Wildlife Sites in Cherwell has increased by 12.8 hectares since last year. The area of Local Geological Sites in Cherwell has remained unchanged at 146 ha.
Policy ESD 10 Protection and Enhancement of Biodiversity and the Natural Environment	Changes in priority habitats by number & type	An annual increase over the plan period	The area of priority habitats has increased from 3,913 ha (2018) to 3,925 ha (2019), an increase of 12 ha.
Policy ESD 10 Protection and Enhancement of Biodiversity and the Natural Environment	Changes in priority species by number & type	A net gain in priority species by number and type	The number of priority species listed in Cherwell has decreased from 126 (2008-2018) to 125 (2009-2019).
Policy ESD 10 Protection and Enhancement of Biodiversity and the Natural Environment	Ecological condition of SSSIs	100% of SSSI units in favourable or unfavourable recovering condition	97.1% of the SSSI units in Cherwell are in Favourable or Unfavourable recovering conditions. This represents a decrease of 1.9% compared to 2018.

Policy ESD 10 Protection and Enhancement of Biodiversity and the Natural Environment	Distribution and status of farmland birds	A yearly increase in the District index of farmland bird presence	There was a small decline in the farmland bird presence index trend from 1.1 (2017) to 1.0 (2018).
Policy ESD 10 Protection and Enhancement of Biodiversity and the Natural Environment	Distribution and status of water voles	A yearly increase in the presence of water voles	There were 8 water vole surveys undertaken in Cherwell in 2018. Of the sixteen sections of the Oxford Canal that were surveyed, two had signs of low water vole activity although no positive sightings were recorded. The number of positive sightings has declined from last year at 20%.
Policy ESD 10 Protection and Enhancement of Biodiversity and the Natural Environment	Permissions granted contrary to tree officer advice	No permissions granted contrary to tree officer advice	No data is available at this time.
Policy ESD 10 Protection and Enhancement of Biodiversity and the Natural Environment	Permissions granted contrary to biodiversity consultee advice	No permissions granted contrary to biodiversity consultee advice	
Policy ESD 10 Protection and Enhancement of	Number of Ecological Surveys submitted with applications	Ecological Surveys to accompany all planning applications which may affect a site,	

Biodiversity and the Natural Environment		habitat or species of known or potential ecological value	
Policy ESD 10 Protection and Enhancement of Biodiversity and the Natural Environment	Local Sites in Positive Conservation Management	A net gain in Local Sites in Positive Conservation Management	There was a significant increase in the number of Local Wildlife Sites in positive conservation management between 2016-17 and 2017-18. After a gradual decline from 2013-2017, this year shows a slight increase in site condition.

5.74 Information on biodiversity has been provided by the Thames Valley Environmental Records Centre (TVERC) in their Biodiversity Annual Monitoring Report.

Table 29 – Total Local Wildlife Sites and Local Geological Sites

Designated Site	Area in hectares (2018)	Area in hectares (2019)	As % of Cherwell (2019)
Local Wildlife Sites (LWS)	1,571	1,584	2.69%
Local Geological Sites (LGS)	146	146	0.25%

5.75 There are 90 Local Wildlife Sites and 12 Local Geological Sites within Cherwell. The area of Local Wildlife Sites has increased by 12.8 hectares since last year. The area of Local Geological Sites remains unchanged.

Table 30 – Changes in priority habitats by number and type

UK priority habitat type	Area (ha) 2017-18	Area (ha) 2018-19
Coastal and floodplain grazing marsh	1,432.23	1,432.71
Eutrophic standing water	108.15	108.34
Lowland beech and yew woodland	0.16	0.16
Lowland calcareous grassland	108.63	108.71
Lowland dry acid grassland	7.34	7.35

Lowland fens	39.90	39.97
Lowland meadows	517.61	517.99
Lowland mixed deciduous woodland	1,029.60	1,040.99
Lowland wood pasture and parkland	443.02	443.35
Open mosaic habitats on previously developed land	83.66	83.72
Ponds	1.75	1.74
Purple moor grass and rush pastures	5.56	5.58
Reedbeds	17.50	17.52
Rivers	19.26	19
Traditional orchards	26.77	26.79
Wet woodland	29.87	29.63
Total area of priority habitat	3,912.66	3,925.22

5.76 Table 30 provides details of the 41 UK priority habitats which have been identified within Cherwell. The changes in the UK priority habitats are mostly attributable to new information such as confirmation of boundaries or habitat types, rather than the creation or loss of habitat.

Table 31 – Change in numbers of UK priority species

	2008-2018	2009-2019
Number of UK priority species	126	125

5.77 The number of priority species listed in Cherwell is 125. One species has been removed from the list as no new records have been made since 2008:

- Oblique Carpet

Table 32 – SSSI condition for 2018-2019

Condition	No. of units or part units 2018/19	Sum of hectares 2018/19	% in Cherwell
Favourable	30	457	74%
Unfavourable declining	1	3	0%
Unfavourable no change	1	6	1%
Unfavourable recovering	12	142	23%
Destroyed	2	9	1%
Total	44	665	

5.78 There are 18 SSSI's wholly or partly within Cherwell covering 0.01% of the District. No SSSI sites were surveyed during 2018-2019 in Cherwell.

Table 33 – Distribution and Status of Farmland Birds (Mean counts per squares (i.e. density per square kilometre) of farmland birds in Cherwell. Results generated from data supplied by the BTO/JNCC/RSPB Breeding Bird Survey)

Species	2012	2013	2014	2015	2016	2017	2018
Corn Bunting	0	0	0	0	0	0	0
Goldfinch	10	4.4	4	6.5	15.2	7.2	10.4
Greenfinch	1.5	0.8	7	3.5	3.6	1.6	0.8
Grey Partridge	0	0	0	0	0.6	0	0
Jackdaw	4	2.8	1.5	3.5	20.6	8	10.4
Kestrel	1	1.6	3.5	1	0	1.2	0.8
Lapwing	14.5	2.8	4.5	3	1.6	5.2	5.2
Linnet	8.5	6.8	11	10.5	10.8	12	11.2
Reed Bunting	6	6.4	7	9.5	4.8	7.2	4.4
Rook	95.5	24.4	27	31.5	15.2	25.6	25.2
Skylark	19.5	13.2	17.5	13	9.6	12.8	18.4
Starling	42	70.4	15.5	0	62.6	9.6	4.4
Stock Dove	1	1.2	1	0	1.2	7.2	5.6
Tree Sparrow	0	0	3	0	7.6	0	0
Turtle Dove	0	1.2	0	0	0	0.4	0
Whitethroat	8.5	10.4	8.5	7.5	3.6	6.4	7.6
Woodpigeon	39	73.6	74	49.5	55.2	62.8	45.2
Yellow Wagtail	0	0.4	0	0	0	0	0.8
Yellowhammer	37	8	17	7.5	6.4	6.4	7.6
Index	1.9	1.5	1.3	0.96	1.4	1.1	1.0

5.79 This indicator uses an established list of 19 species, identifiable as farmland birds, compiled by the RSPB. Survey data were generated by the British Trust for Ornithology

(BTO), survey volunteers and compiled by BTO officers from the BTO/JNCC/RSPB Breeding Bird Surveys, in specific 1km by 1km squares and then used to determine a farmland bird index. These records were then made available to TVERC for processing at a district-specific level, using the methodology established by RSPB Central England Office staff.

5.80 There was a change in the index compared with 2017. Survey effort was changed compared to last year. Most species have shown declines in population density compared to last year, but the index remains higher than the baseline in 2018.

Table 34 – Distribution and Status of Water Voles

Year	Number of sections surveyed along the Oxford Canal (per 500m stretch)	Number of surveys in Cherwell	Number of sites with positive signs in Cherwell
2018	16	8	0 (0%)

5.81 Sixteen sections of the Oxford Canal were surveyed during 2018, two had signs of low water vole activity, however anecdotal reports suggest activity may extend further than the surveys suggest. No water voles were recorded through Kidlington, where small numbers were seen in 2017.

Policy	Indicator	Target	Progress
Policy ESD 11 Conservation Target Areas	Total amount of Natural Environment and Rural Communities (NERC) Act s41 Habitats of Principal Importance within active Conservation Target Areas (CTAs)	A net gain of relevant NERC Act Habitats in active CTAs within the District	The total area of UK priority habitat resource in Conservation Target Areas in Cherwell has risen from 2162.13 ha in 2018 to 2218.23 ha in 2019.
Policy ESD 11 Conservation Target Areas	Permissions granted in Conservation Target Areas contrary to biodiversity consultee advice	No permissions granted in Conservation Target Areas contrary to biodiversity consultee advice	No data is available at this time.

Table 35: UK priority habitat resource in CTAs in Cherwell

Priority Habitat	Total area (ha.) 2018	Total area (ha.) 2019
Coastal and floodplain grazing marsh	912.16	909.94
Eutrophic standing waters	81.02	28.42
Lowland beech and yew woodland	0.16	0
Lowland calcareous grassland	22.51	90.96

Lowland dry acid grassland	3.95	7.32
Lowland fens	33.66	32.68
Lowland meadows	485.56	414.65
Lowland mixed deciduous woodland	319.79	384.68
Lowland wood pasture and parkland	241.25	284.13
Open mosaic habitats on previously developed land	0.11	0.11
Ponds	0.3	0.29
Purple moor grass and rush Pasture	5.55	5.54
Reedbeds	17.15	16.44
Rivers	4.36	6.5
Traditional orchards	4.6	4.26
Wet woodland	17.97	17.84
TOTAL	2162.13	2218.23

Policy	Indicator	Target	Progress
Policy ESD 12 Cotswold AONB	Built development permitted in the AONB	No major development in AONB	No planning permissions were granted for major development within the AONB during 2018/19.
Policy ESD 12 Cotswold AONB	Permissions granted contrary to the advice of the AONB Management Board	No permissions granted contrary to the advice of the AONB Management Board	No planning permissions were granted for development within the AONB contrary to the advice of the AONB Management Board.

Policy	Indicator	Target	Progress
Policy ESD 13 Local Landscape Protection and Enhancement	Number and location of urban fringe restoration / improvement schemes completed	An annual increase over the plan period	No data is available at this time.
Policy ESD 13 Local Landscape Protection and Enhancement	Permissions granted contrary to Landscape Officer advice	No permissions granted contrary to Landscape Officer advice	

Policy	Indicator	Target	Progress
Policy ESD 14 Oxford Green Belt	Completed development (per type) in the Green Belt	All development in Green Belt to comply with Policy ESD14	No data is available at this time.

Policy	Indicator	Target	Progress
Policy ESD 15 The Character of the Built and Historic Environment	Permissions granted contrary to the advice of English Heritage / consultee advice on heritage grounds	All development impacting on non designated/designated heritage assets to comply with ESD15	No data is available at this time.
Policy ESD 15 The Character of the Built and Historic Environment	Permissions granted contrary to design consultee advice on design grounds	No permissions granted contrary to design consultee advice on design grounds	
Policy ESD 15 The Character of the Built and Historic Environment	% of permitted and completed developments with Design and Access Statements (that address the criteria of policy ESD15).	All new developments to complete a Design and Access Statement	
Policy ESD 15 The Character of the Built and Historic Environment	Number of new (and reviews of) conservation area appraisals	Review 6 Conservation Areas annually	

A post 2005 appraisal and management plan for all 60 conservation areas in the district was achieved in 2018/19.
5 conservation area appraisals were reviewed in 2018/19.

Policy	Indicator	Target	Progress
Policy ESD 16 The Oxford Canal	Completed transport/recreation/leisure/tourism uses within 1km of the Oxford Canal	Increase over the plan period	No substantial transport/recreation/leisure or tourism uses have been completed during 2018/19. There are however a number of projects in progress

			including the redevelopment and extension of the Castle Quay Shopping Centre and hotels in Kidlington and Banbury.
Policy ESD 16 The Oxford Canal	Permissions granted contrary to consultee advice on heritage grounds	No permissions granted contrary to consultee advice on heritage grounds	There were no planning permissions granted contrary to consultee advice on heritage grounds.

Policy	Indicator	Target	Progress
Policy ESD 17 Green Infrastructure	Completed green infrastructure schemes	A net gain in green infrastructure provision over the plan period	Progress of GI Schemes is recorded in the IDP Update. Section 6 of this AMR monitors the implementation of Policy INF 1. No completed GI infrastructure projects reported in this AMR period.
Policy ESD 17 Green Infrastructure	Developer contributions to green infrastructure	To meet development needs and as identified in IDP/Green Infrastructure Strategy	No data is available at this time.

Cherwell’s Places

Completions at strategic allocations: Bicester

Policy	Indicator	Target	Progress
Policy Bicester 1 North West Bicester Eco-Town	Housing, infrastructure, employment completions at North West Bicester	As set out in policy Bicester 1 (and agreed masterplan/detailed planning documents)	The site is under construction with 184 dwellings completed at 31 March 2019. The Eco Business Centre has recently opened during 2019/20.

Policy Bicester 2 Graven Hill	Housing, infrastructure, and employment completions at Graven Hill	As set out in policy Bicester 2 (and agreed masterplan/detailed planning documents)	Planning permission granted for 1900 dwellings (11/01494/OUT). A Local Development Order for 276 dwellings was approved in December 2017. The site is under construction with 151 completions at 31 March 2019.
Policy Bicester 3 South West Bicester Phase 2	Housing and infrastructure completions at South West Bicester Phase 2	As set out in policy Bicester 3 (and agreed masterplan/detailed planning documents)	Planning permission granted for 709 dwellings (13/00847/OUT) with currently 2 Reserved Matters approved. The site is currently under construction by CALA Homes, Ashberry Homes and Bellway Homes.
Policy Bicester 4 Bicester Business Park	Completed employment development at Bicester Business Park	As set out in policy Bicester 4 (and agreed masterplan/detailed planning documents)	Planning permission granted for a business park (07/01106/OUT) but not yet started.
Policy Bicester 8 Former RAF Bicester	Completed development at former RAF Bicester	Development to accord with any agreed masterplan/detailed planning documents	No completed development at former RAF Bicester during 2018/19.
Policy Bicester 10 Bicester Gateway	Employment and infrastructure completions at Bicester Gateway site	As set out in Policy Bicester 10 (and agreed masterplan/detailed planning documents)	Planning permission granted for employment use and a hotel on part of the site (16/02586/OUT). Reserved matters was approved for the hotel (17/02557/REM) in 2017/18 and

			construction has now started.
Policy Bicester 11 Employment Land at North East Bicester	Employment and infrastructure completions at Employment Land at North East Bicester	As set out in Policy Bicester 11 (and agreed masterplan/detailed planning documents)	Planning permission granted for employment use on part of the site (17/01289/REM) was completed in 2018/19. A separate Reserved Matters application (18/00584/REM) is under construction.
Policy Bicester 12 South East Bicester	Employment, housing and infrastructure completions at South East Bicester	As set out in Policy Bicester 12 (and agreed masterplan/detailed planning documents)	Planning permission granted for employment use on a small part of the site (16/00861/HYBRID) which is part completed. For the remaining area, a planning application (16/01268/OUT) for 1500 dwellings, 18ha of employment land, local centre with retail and community use and primary school was approved on 25 October 2018 subject to legal agreement.
Policy Bicester 13 Gavray Drive	Housing and infrastructure completions at Gavray Drive	As set out in policy Bicester 13 (and agreed masterplan/detailed planning documents)	A planning application (15/00837/OUT) for 180 dwellings was refused in June 2017 and dismissed at appeal on 16 July 2018.

5.82 At 31 March 2019 there have been 335 housing completions on the strategic allocations at Bicester, Details on the delivery of housing sites are provided in Appendix 2 - Housing Delivery Monitor. At 31 March 2019 there were planning permissions at the above sites for 2,817 dwellings.

Completions at strategic allocations: Banbury

Policy	Indicator	Target	Progress
Policy Banbury 1 Banbury Canalside	Employment, housing and infrastructure completions at Canalside	As set out in Policy Banbury 1 and Canalside SPD (i.e. masterplan/detailed planning documents)	Further work on the Canalside SPD has been put on hold due to other commitments. Planning permissions granted for 51 dwellings at 31 March 2019.
Policy Banbury 2 Hardwick Farm, Southam Road (East and West)	Housing and infrastructure completions at Southam Road	As set out in Policy Banbury 2 (and agreed masterplan/detailed planning documents)	Planning permissions for a total of 604 dwellings granted. Southam Road East is under construction with 327 completions at 31 March 2019.
Policy Banbury 3 West of Bretch Hill	Employment, housing and infrastructure completions at West of Bretch Hill	As set out in Policy Banbury 3 (and agreed masterplan/detailed planning documents)	Planning permissions for 480 dwellings and 500 sqm of employment floorspace granted. The site is under construction with 192 completions at 31 March 2019.
Policy Banbury 4 Bankside Phase 2	Housing and infrastructure completions at Bankside Phase 2	As set out in Policy Banbury 4 (and agreed masterplan/detailed planning documents)	Outline planning applications for 700 and 850 dwellings are pending consideration.
Policy Banbury 5 Land North of Hanwell Fields	Housing and infrastructure completions at Land North of Hanwell Fields	As set out in Policy Banbury 5 (and agreed masterplan/detailed planning documents)	Planning permissions for a total of 515 dwellings granted. The site is under construction with 280 completions at 31 March 2019.
Policy Banbury 6 Employment	Employment and infrastructure completions at Land West of the M40	As set out in policy Banbury 6 (and agreed	Planning permissions for a total of approximately 120,000

Land West of the M40		masterplan/detailed planning documents)	sqm employment floorspace granted. Application 18/00108/F for 30007.5sqm of B8 and 929sqm of B1a was completed during 2018/19.
Policy Banbury 8 Bolton Road Development Area	Housing, Retail and Leisure Completions on the Bolton Road site	In accordance with Policy Banbury 8 and the Masterplan/detailed planning documents for the site	The Bolton Road multi-storey car park has been demolished with a replacement surface long stay car park provided.
Policy Banbury 9 Spiceball Development Area	Completions at the Spiceball Development Area	In accordance with Policy Banbury 9 and the Masterplan/detailed planning documents for the site	Planning permission for a retail foodstore, hotel, cinema, restaurants and cafes has been granted but not yet started.
Policy Banbury 10 Bretch Hill Regeneration Area	Completed development in the Bretch Hill Regeneration Area by type	Increase over the plan period	Progress recorded in The Brighter Futures in Banbury Programme Annual Report 2018/19.
Policy Banbury 15 Employment Land North East of Junction 11	Employment and infrastructure completions at Employment Land North East of Junction 11	As set out in policy Banbury 15 (and agreed masterplan/detailed planning documents)	A planning application for employment uses (19/00128/HYBRID) has a resolution to approve.
Policy Banbury 16 Land South of Salt Way: West	Housing and infrastructure completions at Land at South of Salt Way: West	As set out in policy Banbury 16 (and agreed masterplan/detailed planning documents)	Planning permission for a total of 350 dwellings granted. The site is under construction with 42 completions at 31 March 2019.
Policy Banbury 17 Land South of Salt Way: East	Housing and infrastructure completions at Land at South of Salt Way: East	As set out in policy Banbury 17 (and agreed masterplan/detailed planning documents)	A planning application for 1,000 dwellings has a resolution to approve. A separate planning application for 280 dwellings was allowed

			at appeal on 20 December 2017 with a Reserved Matters application pending consideration. The site benefits from a planning permission for 145 dwellings which delivered 142 completions at 31 March 2019.
Policy Banbury 18 Land at Drayton Lodge Farm	Housing and infrastructure completions at Land at Drayton Lodge Farm	As set out in policy Banbury 18 (and agreed masterplan/detailed planning documents)	Outline application for 320 dwellings has a resolution to approve.
Policy Banbury 19 Land at Higham Way	Housing and infrastructure completions at Land at Higham Way	As set out in policy Banbury 19 (and agreed masterplan/detailed planning documents)	A planning application for approximately 200 dwellings is pending consideration.

5.83 At 31 March 2019 there have been 983 completions on the strategic allocations at Banbury. At 31 March 2019 there were planning permissions at the above sites for 1,442 dwellings.

Completions at strategic allocations: Former RAF Upper Heyford

Policy	Indicator	Target	Progress
Policy Villages 5 Former RAF Upper Heyford	Housing, employment and infrastructure completions at Former RAF Upper Heyford	As set out in policy Villages 5, and agreed masterplan/detailed planning documents	At 31 March 2019 there have been 540 housing completions. 2 small permissions for employment use were completed during 2018/19.

Table 36 - Completions at Strategic Allocations: Former RAF Upper Heyford (at 31/3/19)

Strategic Allocations	Housing completed	Employment completed	Infrastructure completed	Other uses completed
Former RAF Upper Heyford (Policy Villages 5)	540	1.26 ha	0	0

5.84 Planning permission was given in December 2011 for 1,075 dwellings (gross) with a net gain of 761 dwellings. A number of Reserved Matter applications have been approved and the site is currently under construction. Total number of dwellings with permission is 863. There were 540 dwellings completed at 31 March 2019.

Other Indicators – Policy Bicester 1 North West Bicester Eco-Town

Policy	Indicator	Target	Progress
Policy Bicester 1 North West Bicester Eco-Town	Environmental standards of completed development at NW Bicester	As set out in policy Bicester 1	No data is available at this time.
Policy Bicester 1 North West Bicester Eco-Town	Embodied impacts of construction to be monitored, managed and minimised	As set out in policy Bicester 1	
Policy Bicester 1 North West Bicester Eco-Town	Sustainability metrics to be agreed and monitored	As set out in policy Bicester 1	

Other Indicators – Policy Bicester 5 Strengthening Bicester Town

Policy	Indicator	Target	Progress
Policy Bicester 5 Strengthening Town Centre	Permitted residential development at ground floor level in Bicester Town Centre	No residential floorspace permitted at ground floor level	There were no permissions granted during 2018/19.
Policy Bicester 5 Strengthening Town Centre	Town centre vacancies	No increase in vacancy rates over the plan period	No data is available at this time. An update will be provided in the next

			AMR if data becomes available.
Policy Bicester 5 Strengthening Town Centre	Diversity of uses	Maintain or improve the balance of uses within the town centre over the plan period	There was 1 completed scheme in the Bicester town centre during 2018/19 which resulted in a change of use from A1 use to flexible use within Classes A1 and A3.
Policy Bicester 5 Strengthening Town Centre	Completed town centre uses (including use classes A1-A5, B1a, D2) within and outside of Bicester Town Centre	No net loss of town centre use floorspace within Bicester Town Centre	There was a net loss of 210 sqm of town centre uses within Bicester town centre.

5.85 There were no permissions granted for residential development at ground floor level in Bicester town centre during 2018/19.

Table 37 - Town Centre uses completions within and outside of Bicester town centre

Location	A1	A2	A3	A4	A5	B1a	D2	Total
Within Bicester town centre	-150	0	150	0	0	-210	0	-210
Outside Bicester town centre	421.2	21.2	295.2	21.2	295.2	13224	0	14278
Bicester Total	271.2	21.2	445.2	21.2	295.2	13014	0	14068

5.86 Overall, there was an overall net gain of floorspace (14,068 sqm) at Bicester which primarily took place outside of the Bicester town centre. E.g. completion of a mixed use Class B1/B2/B8 development at Land North East of Skimmingdish Lane, Launton (17/01289/REM).

Other Indicators – Policy Bicester 7 Meeting the Need for Open Space, Sport & Recreation

Policy	Indicator	Target	Progress
Policy Bicester 7 Meeting the Need for Open Space, Sport & Recreation	Urban edge park schemes in Bicester	An annual increase in such schemes over the plan period	Refer to Policy BSC10.

Policy Bicester 7 Meeting the Need for Open Space, Sport & Recreation	Community woodland provision in Bicester	An annual increase in provision over the plan period	No data is available at this time.
Policy Bicester 7 Meeting the Need for Open Space, Sport & Recreation	Type of permitted/completed development at Stratton Audley Quarry	In accordance with a planning consent	

Other Indicators – Policy Bicester 9 Burial Site Provision in Bicester

Policy	Indicator	Target	Progress
Policy Bicester 9 Burial Site Provision in Bicester	Developer contributions for Burial Site in Bicester	To meet needs and as set out in IDP	No data is available at this time.

Other Indicators – Policy Banbury 1 Banbury Canalside

Policy	Indicator	Target	Progress
Policy Banbury 1 Banbury Canalside	Progress on completing the Canalside Supplementary Planning Document	As set out in an up to date Local Development Scheme	December 2018 LDS - Consultation is scheduled for March – April 2019 which did not take place. Further work on the SPD has been put on hold due to other commitments.

Other Indicators – Policy Banbury 7 Strengthening Banbury Town Centre

Policy	Indicator	Target	Progress
Policy Banbury 7 Strengthening	Permitted residential development at ground floor level in Banbury Town Centre	No residential floorspace permitted at ground floor level	There were no permissions granted during 2018/19.

Banbury Town Centre			
Policy Banbury 7 Strengthening Banbury Town Centre	Town centre vacancies	No increase in vacancy rates over the plan period	No data is available at this time. An update will be provided in the next AMR if data becomes available.
Policy Banbury 7 Strengthening Banbury Town Centre	Diversity of uses	Maintain or improve the balance of uses over the plan period	There were 3 completed schemes during 2018/19 which resulted in small net losses of -346 sqm in B1a and -8 sqm in A1 uses.
Policy Banbury 7 Strengthening Banbury Town Centre	Completed town centre uses (including use classes A1-A5, B1a, D2) within and outside of Banbury Town Centre	No net loss of town centre use floorspace within Banbury Town Centre	There was a net loss of -354 sqm of town centre uses within Banbury town centre.

5.87 There were no permissions granted for residential development at ground floor level in Banbury town centre during 2018/19.

Table 38 - Town Centre uses completions within and outside of Banbury town centre

Location	A1	A2	A3	A4	A5	B1a	D2	Total
Within Banbury town centre	-8	0	0	0	0	-346	0	-354
Outside Banbury town centre	0	0	0	0	0	929	0	929
Banbury Total	-8	0	0	0	0	583	0	575

5.88 Town centre uses within Banbury town centre received a greater loss of -354 sqm of B1a and A1 use classes, however there was a net gain outside of Banbury town centre with 929 sqm. Overall, there was a net gain of 575 sqm of town centre uses in Banbury.

Other Indicators – Policy Banbury 11 Meeting the need for Open Space, Sport & Recreation

Policy	Indicator	Target	Progress
Policy Banbury 11 Meeting the	Completed open space/sport/recreation facility provision within Banbury	As set out in Policy BSC10 and BSC11	Refer to Policy BSC10.

need for Open Space, Sport & Recreation			
---	--	--	--

Other Indicators – Policy Banbury 12 Meeting the Need for Open Space, Sport & Recreation

Policy	Indicator	Target	Progress
Policy Banbury 12 Meeting the Need for Open Space, Sport & Recreation	Completions at the relocation site for Banbury United FC	As set out in policy Banbury 12, to be achieved over the plan period	None.

Other Indicators – Policy Banbury 13 Burial Site Provision in Banbury

Policy	Indicator	Target	Progress
Policy Banbury 13 Burial Site Provision in Banbury	Developer contributions for Burial Site in Banbury	To meet needs and as set out in the IDP	No data is available at this time.

Other Indicators – Policy Banbury 14 Cherwell Country Park

Policy	Indicator	Target	Progress
Policy Banbury 14 Cherwell Country Park	Progress on delivering the Cherwell Country Park	As set out in Policy Banbury 11	Refer to Policy BSC10.

Other Indicators – Policy Kidlington 1 Accommodating High Value Employment Needs

Policy	Indicator	Target	Progress
Policy Kidlington 1 Accommodating High Value Employment Needs	Employment completions in Kidlington (at a. Langford Lane/London-Oxford Airport and b. Begbroke Science Park)	An annual increase over the plan period	Planning permission for a new technology park comprising 40,362 sqm of employment floorspace (14/02067/OUT) has been granted.

			Reserved Matters permission (17/01542/REM) for Phase 1 was granted on 24 November 2017 and construction has started during 2018/19.
Policy Kidlington 1 Accommodating High Value Employment Needs	Completed employment development on Green Belt land in Kidlington beyond review areas	To accord with Policy ESD14	No employment development recorded during 2018/19.

Other Indicators – Policy Kidlington 2 Strengthening Kidlington Village Centre

Policy	Indicator	Target	Progress
Policy Kidlington 2 Strengthening Kidlington Village Centre	Permitted residential development at ground floor level in Kidlington Village Centre	No residential floorspace permitted at ground floor level	There were no permissions granted during 2018/19.
Policy Kidlington 2 Strengthening Kidlington Village Centre	Village centre vacancies	No increase in vacancy rates over the plan period	No data is available at this time. An update will be provided in the next AMR if data becomes available.
Policy Kidlington 2 Strengthening Kidlington Village Centre	Diversity of uses	Maintain or improve the balance of uses within the town centre over the plan period	There was 1 completed scheme in Kidlington village centre during 2018/19 which resulted in a change of use from A2 to a nail and beauty salon (SG).
Policy Kidlington 2 Strengthening Kidlington Village Centre	Completed town centre uses (including use classes A1-A5, B1a, D2) within and outside of Kidlington Village Centre	No net loss of town centre use floorspace within Kidlington Village Centre	There was a net loss of 140.8 sqm of town centre uses within the Kidlington village centre.

Table 39 - Town Centre uses completions within and outside of Kidlington Village Centre

Location	A1	A2	A3	A4	A5	B1a	D2	Total
Within Kidlington village centre	0	-140.8	0	0	0	0	0	-140.8
Outside Kidlington centre	0	0	0	0	0	0	48.1	48.1
Kidlington Total	0	-140.8	0	0	0	0	48.1	-92.7

5.89 Overall, there was a net loss of floorspace (92.7 sqm) in town centre uses within and outside the Kidlington village centre with the majority being within A2. This was due to the change of use of a bank/building society to a nail and beauty salon.

Other Indicators – Policy Villages 1 Village Categorisation

Policy	Indicator	Target	Progress
Policy Villages 1 Village Categorisation	Completed development per village category and size of scheme (number of dwellings)	As set out in policy Villages 1	Progress is recorded in the Housing Delivery Monitor in Appendix 2.

Other Indicators – Policy Villages 2 Distributing Growth Across the Rural Areas

Policy	Indicator	Target	Progress
Policy Villages 2 Distributing Growth Across the Rural Areas	Land allocations made in the rural areas	As set out in policy Villages 2 and to be set out in the Local Plan Part 2.	No non-strategic allocations at this time. There are no land allocations in the 4 'made' Neighbourhood Plans over and above existing planning permissions.
Policy Villages 2 Distributing Growth Across the Rural Areas	Completions on allocated sites in rural areas	100% take up of allocations over the plan period	There are presently no new non-strategic allocations.
Policy Villages 2 Distributing Growth Across the Rural Areas	Completions on non-allocated sites in rural areas	As set out in the criteria in policy Villages 1 and 2	There were 103 completions at Category A villages during 2018/19 that contributes to Policy Villages 2.

- 5.90 Policy Villages 2 of the adopted Local Plan 2011-2031 provides for an additional 750 dwellings at Category A villages (2014-2031) in addition to the rural allowance for small site 'windfalls' and planning permissions as at 31 March 2014. Therefore new planning permissions given at the Category A villages from 1 April 2014 and completions on those sites will contribute to the requirement of 750 dwellings.
- 5.91 Table 40 show 582 dwellings are either completed or under construction on sites with planning permission in Category A villages. During 2018/19 there were 103 dwellings completed at Category A villages that contribute to the Policy Villages 2 requirement of 750 dwellings. There are also 311 dwellings that are under construction from the supply of permitted sites. Between 1 April 2014 and 31 March 2019 there were a total of 271 net housing completions on the above sites. This equates to 36.1% of the total requirement of 750 dwellings. These sites are fully committed to help deliver the Policy Villages 2 requirement.

Delivering Policies Villages 1 and Villages 2 and the Local Plan strategy

- 5.92 Cherwell Local Plan (2011-2031) directs the majority of development to the 2 main towns in Cherwell with a proportion of the overall growth expected to come forward in the rural areas. Policy Villages 1 is intended to manage small scale development in the built-up limits of villages while Policy Villages 2 identifies 750 dwellings to be delivered in Category A villages on sites of 10 or more dwellings. It was intended that sites would be allocated in an emerging Local Plan Part 2 (now Local Plan Review).
- 5.93 Table 41 show sites with planning permission but not yet started (333 dwellings), sites with resolution to approve (21 dwellings) and identified sites without planning permission (17 dwellings) which comprises 371 dwellings. If a 10% non-implementation rate has been applied to sites with permission but not started therefore reducing from 333 dwellings to 300 dwellings.
- 5.94 Since 1 April 2014 a total of 920 dwellings have been identified for meeting the Policy Villages 2 requirement of 750 dwellings. These are included in the Housing Delivery Monitor in Appendix 2. Policy Villages 2 requirement has already been exceeded by 170 dwellings when considering all of the planning permissions and identified sites without planning permission in the above (582+300+38).
- 5.95 There is one rural strategic allocation namely the Former RAF Upper Heyford included in the adopted Local Plan 2011-2031. The completion figure below excludes any completions at this strategic allocation.

**Table 40 - Housing completions at Category A villages for meeting Policy Villages 2 (10 or more dwellings)
(Sites with planning permission that have been completed or under construction at 31/03/2019)**

Site	Location	Dwellings with planning permission	Completions during 14/15	Completions during 15/16	Completions during 16/17	Completions during 17/18	Completions during 18/19	Total Completions	Site Status

Land North of The Green and adj. Oak Farm Drive, Milcombe	Milcombe	40	36	0
Land North of Shortlands and South of High Rock, Hook Norton Road, Sibford Ferris	Sibford Ferris	25	23	0
Land North of Oak View, Weston on the Green	Weston on the Green	20	18	0
	TOTAL	333	300	38

Other Indicators – Policy Villages 3 Rural Exception Sites

Policy	Indicator	Target	Progress
Policy Villages 3 Rural Exception Sites	Completions on rural exception sites	To meet needs as per Policy Villages 3	No affordable homes on exception sites completed during 2018/19.

Other Indicators – Policy Villages 4 Meeting the Need for Open Space, Sport & Recreation

Policy	Indicator	Target	Progress
Policy Villages 4 Meeting the Need for Open Space, Sport & Recreation	Developer contributions to open space/sport/recreation facilities in the rural areas	As set out in policy BSC11 and BSC12 and the Infrastructure Delivery Plan	Refer to Policy BSC10.
Policy Villages 4 Meeting the Need for Open Space, Sport & Recreation	Open space/sport/recreation facilities created in the rural areas	As set out in policy Villages 4, BSC11, BSC12 and the Infrastructure Delivery Plan	Open space, sport and play areas assessment which is nearing completion will identify current deficiencies in open space and play provision. The updated Playing Pitch and Sports Facilities Strategies (2018) contain baseline information on deficiencies in recreation provision. The findings informed the Active Communities Strategy 2019-2023 approved by the Council in June 2019. This indicator will be reported in the 2020 AMR.

SA/SEA Adoption Statement – Cherwell Local Plan 2011-2031 Part 1 (July 2015)

SA Objectives and Suggested Indicators

5.96 The SA/SEA Adoption Statement (July 2015) sets out the monitoring indicators for monitoring the effects of the Cherwell Local Plan 2011-2031 Part 1 on the SA objectives. The majority of the suggested indicators have already been included in the Monitoring Framework of the adopted Local Plan Part 1. However there were three not included which related to SA Objectives 5 (crime) and 14 (waste).

SA Objective	Suggested Indicator	Progress
5. To reduce crime and disorder and the fear of crime	Crime levels in Cherwell District	During 2018/19 there were a total of 10,643 recorded crimes in the district.
14. To reduce waste generation and disposal, and achieve the sustainable management of waste	% of household waste sent for re-use, recycling and compost	The latest data published by DEFRA confirms that in 2017/18, 55.64% of Cherwell’s household waste was sent for reuse, recycling and compost.
14. To reduce waste generation and disposal, and achieve the sustainable management of waste	% of construction and demolition waste re-used	Oxfordshire County Council is responsible for minerals and waste. Progress will be recorded on the County’s website. https://www.oxfordshire.gov.uk/cms/content/new-minerals-and-waste-local-plan

Table 42 - Crime Rates in Cherwell District during 2018/19 (Source: www.ukcrimestats.com)

	ASB	Burglary	Robbery	Vehicle	Violent	Shoplifting	CD&A	Other Theft	Drugs	Bike Theft	Theft from the person	Weapons	Public Order	Other	Total
March 2019	125	41	4	59	272	75	80	81	39	5	18	8	27	22	856
February 2019	96	42	3	56	218	86	75	72	35	5	6	5	31	22	752
January 2019	110	58	2	50	215	80	109	90	37	9	8	3	32	34	837
December 2018	100	61	12	36	197	74	67	90	24	13	24	5	29	28	760
November 2018	108	58	10	64	277	81	79	95	33	12	20	6	21	40	904

October 2018	106	43	5	68	263	74	103	90	32	11	15	9	34	21	874
September 2018	117	49	9	81	256	54	81	97	22	18	7	4	43	21	859
August 2018	156	57	8	66	267	65	98	94	34	10	9	4	37	16	921
July 2018	183	38	9	70	317	78	82	129	38	28	10	7	41	32	1062
June 2018	165	43	4	74	294	127	103	104	23	14	22	8	36	24	1041
May 2018	144	29	5	39	247	124	74	105	31	12	14	5	57	23	909
April 2018	136	45	3	59	237	120	65	95	36	5	10	9	30	18	868
Total	1546	564	74	722	3060	1038	1016	1142	384	142	163	73	418	301	10643

5.97 During 2018/19 there were a total of 10,643 recorded crimes in the district which is a decrease of 690 from the previous year (11,333). Similar to the previous year the majority of crimes recorded were in violent (28.8%) and anti-social behaviour (14.5%) followed by other theft (10.7%), shoplifting (9.8%) and criminal damage and arson (9.5%).

Table 43 – Percentage of household waste sent for reuse, recycling and composting (annual) in Cherwell District during 2012/13 – 2018/19 (Source: lginform.local.gov.uk)

Period	Percentage
2012/13	54.80
2013/14	53.90
2014/15	54.80
2015/16	55.10
2016/17	56.50
2017/18	55.64
2018/19	Data not available

6.0 Monitoring progress of infrastructure provision

- 6.1 The Infrastructure Delivery Plan (IDP) contains the infrastructure required to support the adopted Cherwell Local Plan 2011-2031 Part 1 (July 2015) and it is set out in Appendix 8 of the Plan.
- 6.2 The IDP is a live document adjusted over time to reflect changes in circumstances and strategies alongside the annual monitoring of Local Plan infrastructure Policy INF1.
- 6.3 This AMR update includes summary tables of infrastructure progress. IDP Update December 2019 can be viewed at www.cherwell.gov.uk/monitoring.
- 6.4 Appendix 6 of this AMR shows progress on infrastructure delivery including new projects, known to CDC Officers at November 2019. The tables also indicate pipeline projects, those known to be at early project development stage. These pipeline projects could potentially be included in next IDP updates subject to their progression as part of infrastructure providers' plans and programmes.
- 6.5 IDP Update December 2019 includes adjusted phasing periods to reflect project updates as the plan period progresses and projects are completed: Short term: 2017-2020, Medium term: 2020-2025 and Long term 2025-2031.
- 6.6 More detailed information on infrastructure provision will arise through the progression of new Local Plans and Neighbourhood Plans. This includes the Local Plan Part 1 Partial Review.

7.0 Future Monitoring

- 7.1 The Local Plan 2011-2031 Part 1 was adopted in July 2015 which means that this is the second third AMR to cover the full monitoring year. There are still a number of indicators from the Monitoring Framework within the Plan that cannot be monitored but which will be reported upon next year.

- 7.2 Monitoring is important to ensuring the successful delivery and implementation of the Cherwell Local Plan 2011-2031 and in preparing future evidence and policy documents. Monitoring highlights good and poor performance, where action might be necessary and ultimately where policies might need to be reviewed.

- 7.3 The Local Plan Monitoring Framework is closely linked to the monitoring framework developed for the Local Plan Sustainability Appraisal, which sets out the monitoring indicators for monitoring the effects of the Cherwell Local Plan 2011-2031 Part 1 on the SA objectives.

Appendices

Appendix 1: List of Replaced and Retained Saved Policies

Appendix 1: List of Replaced and Retained Saved Policies

Policy Number	Description	Replaced or Retained	Replacement Policy	Does this Affect the Adopted Proposals Map 1996?
Saved Policies of the Cherwell Local Plan 1996				
GB1	Development in the Green Belt	replaced	ESD 14	Yes
GB2	Outdoor Recreation in the Green Belt	retained	-	
GB3	Major Development Sites in the Green Belt	retained	-	
H1	Allocation of sites for housing	replaced	BSC 1 Bicester 1 Bicester 2 Bicester 3 Bicester 12 Bicester 13 Banbury 1 Banbury 2 Banbury 3 Banbury 4 Banbury 5 Banbury 8 Banbury 16 Banbury 17 Banbury 18 Banbury 19 Villages 2 Villages 5	Yes (except BSC1 and Villages 2)

TR16	Access Improvements in the vicinity of Banbury Railway Station	retained	-	
TR20	Reservation of land for road schemes at Bicester	replaced	SLE 4	Yes
TR22	Reservation of land for road schemes in the countryside	retained	-	
R1	Allocation of land for recreation use	part replaced	Bicester 13	Yes
R5	Use of redundant railway lines and disused quarries for recreation purposes	retained	-	
R7	Protection and enhancement of the recreational roles of the Oxford Canal and River Cherwell	replaced	ESD 16	No
R9	Facilities for canal users	replaced	ESD 16	No
R12	Provision of public open space in association with new residential development	replaced	BSC 11	No
R14	Reservation of land for community buildings in association with housing	replaced	BSC 12	No

	developments at Hanwell Fields, Banbury and Slade Farm, Bicester			
T2	Proposals for hotels, motels, guest houses and restaurants within settlements	retained	-	
T3	Land reserved for hotel and associated tourist or leisure based development, in vicinity of junction 11 of the M40, Banbury	retained	-	
T5	Proposals for new hotels, motels, guesthouses and restaurants in the countryside	retained	-	
T7	Conversion of buildings beyond settlements to self-catering holiday accommodation	retained	-	
AG2	Construction of farm buildings	retained	-	
AG3	Siting of new or extension to existing intensive livestock and poultry units	retained	-	
AG4	Waste disposal from intensive livestock and poultry units	retained	-	
AG5	Development involving horses	retained	-	
C1	Protection of sites of nature conservation value	replaced	ESD 10	Yes
C2	Development affecting protected species	replaced	ESD 10 ESD 11	No
C4	Creation of new habitats	replaced	ESD 10	No
C5	Protection of ecological value and rural character of specified features of value in the District	retained	-	
C6	Development proposals adjacent to the River Thames	retained	-	
C7	Landscape conservation	replaced	ESD 13	No
C8	Sporadic development in the open countryside	retained	-	
C9	Scale of development compatible with a rural location	replaced	ESD 13	No
C10	Historic landscapes, parks and gardens and historic battlefields	replaced	ESD 13 ESD 15	Yes
C11	Protection of the vista and setting of Rousham Park	retained	-	
C12	Development in the Cotswold Area of Outstanding Natural Beauty	replaced	ESD 12	Yes

C13	Areas of High Landscape Value	replaced	ESD 13	Yes
C14	Countryside Management Projects	retained	-	
C15	Prevention of coalescence of settlements	retained	-	
C17	Enhancement of the urban fringe through tree and woodland planting	replaced	ESD 13	Yes
C18	Development proposals affecting a listed building	retained	-	
C21	Proposals for re-use of a listed building	retained	-	
C23	Retention of features contributing to character or appearance of a conservation area	retained	-	
C25	Development affecting the site or setting of a schedule ancient monument	retained	-	
C27	Development in villages to respect historic settlement pattern	replaced	ESD 15	No
C28	Layout, design and external appearance of new development	retained	-	
C29	Appearance of development adjacent to the Oxford Canal	retained	-	
C30	Design Control	retained	-	
C31	Compatibility of proposals in residential areas	retained	-	
C32	Provision of facilities for disabled people	retained	-	
C33	Protection of important gaps of undeveloped land	retained	-	
C34	Protection of views of St Mary's Church, Banbury	retained	-	
C38	Satellite dishes in conservation areas and on listed buildings	retained	-	
C39	Telecommunication masts and structures	retained	-	
ENV1	Development likely to cause detrimental levels of pollution	retained	-	
ENV2	Redevelopment of sites causing serious detriment to local amenity	retained	-	
ENV6	Development at Oxford Airport, Kidlington likely to increase noise nuisance	retained	-	

ENV7	Development affecting water quality	replaced	ESD 8	No
ENV10	Development proposals likely to damage or be at risk from hazardous installations	retained	-	
ENV11	Proposals for installations handling hazardous substances	retained	-	
ENV12	Development on contaminated land	retained	-	
OA2	Protection of land at Yarnton Road Recreation ground, Kidlington for a new primary school	retained	-	
GB1	Saved Policy of the Central Oxfordshire Local Plan (Cherwell) 1992 - Development in the Green Belt	replaced	ESD 14	Yes
H2	Saved Policy of the Oxfordshire Structure Plan 2005 - Upper Heyford	replaced	Villages 5	Yes

Oxford & Cherwell Valley College, Broughton Road	0.81	-	Full - Application (15/01024/F) for demolition of existing buildings and change of use from D1 non residential to C3 dwelling houses comprising 78 no 1 bedroom and 2 bedroom extra care residential apartments with associated ancillary accommodation. Approved on 18 February 2016.	-	Site completed in March 2019 (2018/19).	0	78	0	0	0	0	0	0	0	0	0	0	0	0	0	78
Penrose House, 67 Hightown Road	0.16	-	Full - Planning Permission 04/01395/F for 12 flats superseded by 11/00820/F for 14 flats which was granted permission on 20 December 2011.	-	14 new dwellings were completed in December 2015 (2015/16).	0	14	0	0	0	0	0	0	0	0	0	0	0	0	0	14
Town Centre House, Southam Road	0.19	-	Prior Approval - Commercial Prior Approval (15/00581/PAJ) for conversion of existing building from its current use (Class B1 offices) to a residential use comprising multiple apartments (Class C3) (39 1 bedroom apartments) was approved on 19 June 2015.	-	Site completed in June 2016 (2016/17).	0	39	0	0	0	0	0	0	0	0	0	0	0	0	0	39
1A Banbury - Completed Identified Sites Sub-Totals						0	429	0	429												
Banbury - Deliverable (Available, Suitable and Achievable) Sites (10 or more dwellings) - Contributing to the '5 year land supply'																					
1 - 6 Malthouse Walk, Banbury	0.07	-	Prior Approval - Change of use of the first and second floors from office (B1a) to residential to create 20 self-contained flats was approved on 18 October 2019 (19/01734/O56).	Agents (UPP Consultants Ltd) advised (November 2019) that the scheme will be converted over the next 12 months and is expected to be completed by January 2021.	This is a small brownfield site in a very sustainable location. Prior approval has already been obtained.	0	0	0	0	20	0	0	0	0	0	0	0	0	0	0	20
3 West Bar Street	0.14	-	Prior Approval/Full - change of use of existing offices to C3 (8 dwellings) was approved on 30 January 2018 (17/02425/O56). This has been superseded by a recent Full permissions for change of existing building together with a 2.5 storey high extension to the eastern elevation to facilitate the conversion of the building to 8 no residential units which was approved on 2 August 2019 (19/00958/F). A separate Full application (17/00914/F) for demolition of existing single storey element and erection of new building to provide 4 flats was approved on 4 July 2017.	Agents (JPPC) advised (October 2019) that they are no longer involved since the latest planning permission was obtained therefore is unable to provide an update.	Full planning permissions secured. This is a small brownfield site in a very sustainable location. Due to the latest planning permission only recently been issued and that the site has not yet started the expected delivery rate is pushed back a year.	12	0	0	12	0	0	0	0	0	0	0	0	0	0	0	12
30 Crouch Street	0.06	-	Prior Approval - Change of use from B1 (office) to C3 (dwelling) to provide 13 residential units was approved on 12 July 2019. (19/00746/O56)	Agents (Walker Graham Architects) advised (October 2019) that development on site is expected to start in November 2019 and will be completed by September 2020.	This is a small brownfield site in a very sustainable location. Prior approval has already been obtained.	0	0	0	13	0	0	0	0	0	0	0	0	0	0	0	13
60-62 Broad Street, Banbury	0.06	-	Full - Planning application for alterations to building and change of use to form retail units at ground floor level and 12 No self contained flats over (16/02529/F) was approved on 24 April 2017.	-	This is a small brownfield site in a very sustainable location. The site is currently under construction (since March 2019). Delivery rate to remain unchanged.	12	0	12	0	0	0	0	0	0	0	0	0	0	0	0	12
Bankside Phase 1 (Longford Park)	75.1	-	Full/Reserved Matters - Permission granted on 30 September 2009 for 1070 homes (05/01337/OUT). Separate (but linked) permission for another 20 dwellings (net) (13/01682/F) which was approved on 5 November 2014. Multiple Reserved Matters have been approved. Total number of homes - 1090 dwellings.	Housebuilders Taylor Wimpey, Barratts and Bovis are developing the site. The three housebuilders have provided (October 2019) combined expected delivery rates of 142 in 2019/20 and 54 in 2020/21. Bovis Homes is likely to be the only housebuilder on site from end of 2020. Bovis Homes advised that their Phase 4 is expected to start in February 2020.	Permitted urban extension for up to 1070 homes. The site is very advanced with over 70% of the homes already built. There are currently 3 housebuilders on site.	292	798	142	54	50	46	0	0	0	0	0	0	0	0	1090	

Appendix 2 - 2019 AMR Housing Delivery Monitor

Sites	Site Area (ha)	Local Plan Status	Planning Application / Permission Status	Information from developer / agent / landowner	Scheme Progress	Planning Permissions at 31/3/19 minus units built & recorded at 31/03/19 (net)	Completions 01/04/11 to 31/03/19	Projection 19/20	Projection 20/21	Projection 21/22	Projection 22/23	Projection 23/24	Projection 24/25	Projection 25/26	Projection 26/27	Projection 27/28	Projection 28/29	Projection 29/30	Projection 30/31	Total Completions and Projected Completions 2011-2031	
Canalside - Crown House, caravan site (Station Road) and Robert Keith Cars Sales	1.31 (part of 26)	Local Plan allocation (2015) - Banbury 1	Full/Outline - There are multiple planning permissions on a small area of the site (Crown House). The most relevant permissions are 17/00243/F - change of use of existing office building into 37 apartments (30/03/2017), 17/00288/F - extension to create 10 apartments (22/5/2017), 17/00658/F - change of use of existing building to create coffee shop (A3) and 4 dwellings (19/6/17). A variation of condition application (19/00279/F) for reducing 10 dwellings to 9 dwellings was approved on 26/04/2019. This supersedes 17/00288/F. A separate application for 63 dwellings (18/00293/OUT) at Station Road was approved on 25 June 2019. An additional application (18/01569/F) for mixed use development comprising 19 apartments, commercial space and associated cycle and bin storage was approved on 7 November 2019. Total number of homes - 132 dwellings.	The Crown House site is owned by Cherwell District Council and was completed in September 2019 (46 dwellings). Station Road - Agent was contacted but no update was received. Robert Keith Car Sales - Agents (SF Planning Ltd) advised (October 2019) that the Section106 is expected to be signed imminently. Conditions will need to be discharged. Development on site is expected to start in April 2020 or earlier depending on the discharge of conditions. The site is expected to be completed in 12 months (2021/22).	Part of a strategic allocation in the adopted Local Plan 2011-2031 for 700 dwellings (Banbury 1). A Supplementary Planning Document is being prepared and will be out for consultation in spring 2019. The remaining Canalside allocation is included as a developable site. HELAA (2018) site HELAA258. Development at Crown House (46 dwellings) was completed in September 2019 (2019/20) . i.e. after basedate for completions. The Robert Keith Car Sales site has recently received full planning permission. Expected delivery rates on the remaining 2 sites allows sufficient time for lead-in.	51	0	50	0	19	63	0	0	0	0	0	0	0	0	0	132
Drayton Lodge Farm	15	Local Plan allocation (2015) - Banbury 18	Outline - Outline application (18/01882/OUT) for up to 320 dwellings including affordable housing, together with a local centre of 0.5ha (providing retail and community facilities) was approved subject to legal agreement on 20 June 2019.	Agents (Savills) advised (October 2019) that there is likely to be 1 or 2 housebuilders on site. Reserved Matters application is unlikely to be submitted until end of 2020/21, however it is envisaged that development on site is expected to start in 2021. Expected build-out rate at 2-3 units per month (36 per year).	Outline planning permission is expected to be issued by end of 2019. A strategic allocation in the adopted Local Plan 2011-2031 for 250 dwellings. HELAA (2018) site HELAA255. The build-out rates are based on 50 dwellings per year per housebuilder. The expected delivery rates allows sufficient lead-in time.	0	0	0	0	0	50	100	100	50	20	0	0	0	0	320	
Former The Admiral Holland, Woodgreen Avenue	0.3	-	Full - Application (18/01591/CDC) for development of 8 No houses and 6 No flats was approved on 28 March 2019.	This is a council owned site. CDC Housing advised (October 2019) that the site is expected to be completed by April 2020. Delivery rate to remain unchanged.	The site is currently under construction (since September 2019) and is expected to be completed by March 2020.	14	0	14	0	0	0	0	0	0	0	0	0	0	0	14	
Land Adjoining And West Of Warwick Road	12.14	-	Reserved Matters - Outline application 13/00656/OUT for up to 300 dwellings with access from Warwick Road together with associated open space, allotments and a 500 sq m retail store was allowed on appeal on 3 March 2014. Reserved Matters application 15/00277/REM was approved on 7 March 2017. A separate Reserved Matters application 16/02428/REM for 148 dwellings was approved on 29 June 2018. This is part of the overall 300 dwellings.	Housebuilder (Taylor Wimpey) provided (October 2019) updated expected delivery rates for their site only as: 42 in 2019/20, 54 in 2020/21 and 39 in 2021/22. There are currently 2 housebuilders on site. Housebuilder - Miller Homes was contacted but no update was received.	The site is being developed by 2 housebuilders (Taylor Wimpey and Miller Homes) and is now under construction. The expected delivery rates are updated based on information from Taylor Wimpey and that both housebuilders are making progress on site. The 2018 AMR identified 50 completions will be expected during 2019/20. The Council's monitoring for quarters 1-2 (19/20) suggests that this is likely to be exceeded.	289	11	100	100	89	0	0	0	0	0	0	0	0	0	300	
Land at Higham Way	3.1	Local Plan allocation (2015) - Banbury 19	Outline - Outline application (16/00472/OUT) for approximately 200 dwellings is pending consideration.	Agents (JSA Architects) advised (October 2019) that there has been some planning delays. It is unclear if the land will be sold to a housebuilder or will be developed by the applicant. No other information is available.	A strategic allocation in the adopted Local Plan 2011-2031 for 150 dwellings. This is not an extensive site and in the interest of caution the site should remain with 150 dwellings as per Local Plan allocation. The Council's Development Management Officer leading on the site advised (November 2019) that the application is expected to go to December's Planning Committee with a recommendation for approval subject to a S106 agreement. There is an outstanding matter with Thames Water which requires survey work therefore the issue of permission could be slightly delayed. The expected delivery rates to be pushed back 2 years to allow sufficient time for determining the Outline application and obtaining a Reserved Matters permission.	0	0	0	0	25	100	25	0	0	0	0	0	0	0	150	
Land East of Southam Road	25.61	Local Plan allocation (2015) - Banbury 2	Reserved Matters/Full - Planning application for 510 homes (13/00159/OUT) was approved on 18 December 2013. A Reserved Matters application (14/02140/REM) for the first 98 homes was approved on 17 July 2015. Reserved Matters (15/00961/REM) for 412 dwellings (phase 2) was approved on 23 October 2015. Separate full applications: 18/00376/F for erection of four pairs of semi-detached houses with detached garages was approved on 09/05/2018. 18/01614/F for 83 dwellings comprising a partial re-plan of the approved layout under 15/00961/REM to include an uplift of 23 dwellings was approved on 12 September 2019. Total number of homes - 537 dwellings.	Housebuilder (Bellway Homes) provided (October 2019) updated expected delivery rates for their site only as: 44 in 2019/20, 77 in 2020/21, 42 in 2021/22 and 18 in 2022/23. There are currently 2 housebuilders on site. Housebuilder Ashberry Homes was contacted but no update was received.	One part of a strategic allocation in the adopted Local Plan 2011-2031 (Banbury 2). There are 2 housebuilders (Bellway Homes and Ashberry Homes) and is under construction. The 2018 AMR identified 50 completions will be expected during 2019/20. The Council's monitoring for quarters 1-2 (19/20) suggests that this is likely to be exceeded.	187	327	70	70	40	30	0	0	0	0	0	0	0	0	537	

Appendix 2 - 2019 AMR Housing Delivery Monitor

Sites	Site Area (ha)	Local Plan Status	Planning Application / Permission Status	Information from developer / agent / landowner	Scheme Progress	Planning Permissions at 31/3/19 minus units built & recorded at 31/03/19 (net)	Completions 01/04/11 to 31/03/19	Projection 19/20	Projection 20/21	Projection 21/22	Projection 22/23	Projection 23/24	Projection 24/25	Projection 25/26	Projection 26/27	Projection 27/28	Projection 28/29	Projection 29/30	Projection 30/31	Total Completions and Projected Completions 2011-2031	
Land South of Salt Way and West of Bloxham Road	18.45	Local Plan allocation (2015) - Banbury 16	Reserved Matters - Outline application (14/01188/OUT) for 350 dwellings was approved on 13 November 2015. Reserved Matters application 17/00669/REM for 318 dwellings was approved on 12 October 2017. A new Reserved Matters application (18/01973/REM) was approved on 29 March 2019.	Housebuilder (Redrow Homes) advised (October 2019) that the site is still expected to be completed in 2024/25 and that the expected delivery rates should remain unchanged.	A strategic allocation in the adopted Local Plan 2011-2031 (Banbury 16). The site is currently under construction by Redrow Homes. The 2018 AMR identified 50 completions will be expected during 2019/20. The Council's monitoring for quarters 1-2 (2019/20) suggests that this is likely to be achieved.	308	42	50	50	50	50	50	26	0	0	0	0	0	0	0	318
Land to the rear of 7 and 7A High Street	0.12	-	Full - Application (18/00487/F) for part three storey, part two storey development of 14 flats with ground floor commercial units, on land to rear on 7 High Street; car parking area to rear accessed from George Street was approved subject to legal agreement on 18 April 2019.	Agents (Cumming Anderton Architects) advised (October 2019) that the S106 is still being discussed. Currently the applicant is looking to develop the site himself. Expect the earliest start on site to be in 2021/22 with a 12 month build programme.	This is a small brownfield site in a very sustainable location. Full planning permission is expected to be issued shortly. The Council's Development Management Officer leading on the site advised (November 2019) that the S106 is currently with the applicants and that the decision is likely to be issued by end of this year. The expected delivery rate allows a sufficient lead-in time.	0	0	0	0	0	14	0	0	0	0	0	0	0	0	0	14
Land West of Southam Road	17.62 (gross)	Local Plan allocation (2015) - Banbury 2	Outline - Outline application (18/00273/OUT) for development of up to 90 residential units (Use Class C3), Class A Uses, Class D Use and associated access, landscaping/open space, parking and related works was approved on 12 November 2018. A Reserved Matters application (19/02226/REM) was submitted in October 2019 and is pending consideration.	Sanctuary Housing advised (October 2019) that the Reserved Matters pre-application was made and a meeting was held in February 2019. A Reserved Matters application was submitted in October 2019. Should Planning be determined within the 13 weeks period the decision is expected in February 2020 with a start on site envisaged May/June 2020. First units would be handed over after circa 9 months from SOS being around March 2021 with handovers subject to sales rates but would envisage 2/3 per month at this moment in time subject to market conditions. Expected delivery rates to be 10 in 2020/21, 40 in 2021/22 and 40 in 2022/23. Only 1 housebuilder is expected on site. Build-out rates 2-3 per month subject to market conditions.	The site is to be developed by Sanctuary Housing who has already submitted a Reserved Matters application. The expected delivery rates updated takes into account information from Sanctuary Housing.	90	0	0	10	40	40	0	0	0	0	0	0	0	0	0	90
Neithrop House, 39 Warwick Road	0.08	-	Full - 05/01431/F was approved on 22 December 2012. 14 dwellings in total, 7 already provided.	-	Site completed in June 2019 (2019/20). i.e. after basedate for completions.	7	0	7	0	0	0	0	0	0	0	0	0	0	0	0	7
North of Hanwell Fields	18.75	Local Plan allocation (2015) - Banbury 5	Full/Reserved Matters - Application for 350 homes (12/01789/OUT) was submitted by Persimmon Homes and was approved on 2 September 2014. First Reserved Matters (15/00462/REM) for 118 dwellings was approved on 13 November 2015. Application (14/00066/OUT) for an additional 160 dwellings was approved on 2 April 2015. Reserved Matters (15/01115/REM) for 160 dwellings from Davidsons Developments was approved on 17 December 2015. Reserved Matters (15/01589/REM) for Phase 2 for 210 dwellings was approved on 18 November 2018. Application 16/01210/F for erection of 20 no. dwellings was approved on 15 March 2017 (partly supersedes the 118 dwellings). Another 20 dwellings approved on 21 May 2018 (17/00708/F). A separate outline application for up to 46 dwellings (18/01206/OUT) was approved subject to legal agreement on 30 May 2019. An additional Full application (19/02126/F) for an extra 34 dwellings was submitted in September 2019 and is pending consideration. The 2 Council schemes for 11 dwellings (16/01484/CDC and 16/01485/CDC) were completed in September 2017. Total number of homes - 595.	Persimmon Homes provided (October 2019) updated expected delivery rates for their phase 2 as: 25 in 2019/20, 55 in 2020/21, 55 in 2021/22, 55 in 2022/23 and 20 in 2023/24. Phase 3 is for another 34 dwellings (19/02126/F) which the application is still pending. The build-out rate is 55 per year. There are currently 2 housebuilders on site.	A strategic allocation in the adopted Local Plan 2011-2031 (Banbury 5). Two housebuilders are currently on site: Persimmon Homes (378 dwellings) and Davidson Homes (160 dwellings), however the Davidson Homes parcel has recently been completed in September 2019 (2019/20).	235	280	50	55	55	55	55	45	0	0	0	0	0	0	595	

Appendix 2 - 2019 AMR Housing Delivery Monitor

South of Salt Way - East	68	Local Plan allocation (2015) - Banbury 17	Outline/Reserved Matters - Planning permission (12/00080/OUT) given for 145 dwellings on part of the site (on appeal) on 23 September 2013. Reserved Matters application (14/01225/REM) was approved on 28 November 2014. Planning application for 280 dwellings (15/01326/OUT) was allowed on appeal on 20 December 2017. Reserved Matters (19/01037/REM) for 280 dwellings is pending consideration. Planning application for 1,000 homes (14/01932/OUT) was approved on 4 August 2016 subject to legal agreement.	Housebuilder (David Wilson Homes) advised (October 2019) for their site only for 280 homes which relates to 15/01326/OUT and the subsequent Reserved Matters 19/01037/REM. Provided updated expected delivery rates as: 39 in 2020/21, 82 in 2021/22, 82 in 2022/23 and 77 in 2023/24. Development on site is expected to start in May 2020. Only 1 housebuilder is expected on site. The Reserved Matters application is pending but decision is expected by end of 2019. Agents (David Lock Associates) provided (November 2019) updated expected delivery rates for their site only based on the assumption that grant of permission this year and that details requiring approval prior to submission of reserved matters are dealt with by OCC and CDC expeditiously, early in the new year to enable start on site in 2020. Delivery rates as: 50 in 2021/22, 75 in 2022/23, 100 in years 2023/24-26/27, 125 in years 2027/28-2029/30 and 100 in 2030/31.	A strategic allocation in the adopted Local Plan 2011-2031 (Banbury 17). Planning permission for 145 homes on part of the site (north-west corner) which is developed by Morris Homes has recently been completed in June 2019 (2019/20). The David Wilson Home's permission for 280 homes relates to the eastern part of the site. Reserved Matters permission is expected soon. Planning permission is expected to be issued imminently for the Gallagher Estate's outline application for 1000 homes. This covers the remaining area of the site which is the majority of the strategic allocation. Expected delivery rates updated based on a peak of 3 developers, 50 homes per year per developer. The Council's Development Management Officer leading on the site advised (November 2019) that the S106 is nearly finalised and is a matter of the bond with Oxfordshire County Council. An extension of time until 1 December 2019 was agreed therefore the permission is expected to be issued by end of the year.	283	142	3	39	132	157	177	100	100	100	125	125	125	100	1425
West of Bretch Hill	27.03	Local Plan allocation (2015) - Banbury 3	Full/Reserved Matters - Application 13/00444/OUT for 400 dwellings was approved on 9 March 2016. Reserved Matters (16/00576/REM) for the first 110 dwellings was approved on 25 August 2016. Reserved Matters (16/02437/REM) for a specialised housing scheme comprising of 51 units was approved on 24 March 2017. A separate planning application for 319 dwellings (17/00189/F) was approved on 10 November 2017. Total number of homes - 480 dwellings.	Housebuilder (Bloor Homes) advised (November 2019) that 200 dwellings have been completed prior to 2019 with a balance of 280 left to complete. Build-out rate of 60 units per year. Provided updated expected delivery rates as: 60 in years 2019/20-2022/23 and 40 in 2023/24. There is only 1 housebuilder on site.	The site is currently under construction by Bloor Homes. The 2018 AMR identified 60 completions will be expected during 2019/20. The Council's monitoring for quarters 1-2 (19/20) suggests that this is likely to be achieved.	288	192	60	60	60	60	48	0	0	0	0	0	0	0	480
Windfall Allowance (<10 dwellings)					Projection based on the 2018 HELAA. For previously developed sites only and discounted to allow for non-implementation. Expectations lowered for second half of plan period in the interest of caution. Windfall completions on sites less than 10 dwellings are also recorded.	177	350	35	35	35	35	35	17	17	17	17	17	17	17	644

Land adjacent Bretch Hill Reservoir	2.5	-	-	A site to be Cherwell led. CDC Housing advised (October 2019) that the site is still being considered and there are ongoing discussions. The expected number of homes still remains at 40.	A site that was identified internally for potential housing in the near future. HELAA (2018) site HELAA259. 2018 HELAA concluded that the site is not suitable and has no housing potential. Update provided from the Council's Housing team indicate the site is suitable and could accommodate 40 dwellings on a smaller part of the site. In interest of caution delivery will be pushed back to 2022/23 to allow more lead-in time.	0	0	0	0	0	40	0	0	0	0	0	0	0	0	0	40
Land at Banbury AAT Academy	2.03	-	-	-	The planning permission for 44 dwellings including the variation of condition expired on 24 April 2017. HELAA (2018) site HELAA278. Expected delivery rates to be pushed back 2 years to allow more lead-in time. The site should be kept under review.	0	0	0	0	0	10	34	0	0	0	0	0	0	0	0	44

Appendix 2 - 2019 AMR Housing Delivery Monitor

Sites	Site Area (ha)	Local Plan Status	Planning Application / Permission Status	Information from developer / agent / landowner	Scheme Progress	Planning Permissions at 31/3/19 minus units built & recorded at 31/03/19 (net)	Completions 01/04/11 to 31/03/19	Projection 19/20	Projection 20/21	Projection 21/22	Projection 22/23	Projection 23/24	Projection 24/25	Projection 25/26	Projection 26/27	Projection 27/28	Projection 28/29	Projection 29/30	Projection 30/31	Total Completions and Projected Completions 2011-2031	
Graven Hill	207.23	Local Plan allocation (2015) - Bicester 2	Outline/LDO/Reserved Matters - Outline application (11/01494/OUT) granted on 8 August 2014 for redevelopment of former MOD sites including demolition of existing buildings, development of 1900 homes; local centre to include a 2 form entry primary school (class D1), a community hall of 660sqm, five local shops or facilities to include A1, A2, A3, A5 and D1 uses totalling up to 1358sqm, up to 1000sqm gross A1 uses, a pub/restaurant/hotel (class A4/A3/C1) up to 1000sqm and parking areas; employment floorspace comprising up to B1(a) 2160sqm, B1(b) 2400sqm, B1(c) and B2 20520sqm and B8 uses up to 66960sqm; creation of public open space and associated highway improvement works, sustainable urban drainage systems, biodiversity improvements, public transport improvements and services infrastructure. Local Development Order for 276 dwellings (17/02107/LDO) was adopted on 20 December 2017. Reserved Matters application for demonstrator plots was approved on 19 December 2016. Multiple Reserved Matters have been approved.	Graven Hill Development Company provided (October 2019) updated expected delivery rates: 71 in 2019/20, 325 in 2020/21, 334 in 2021/22, 192 in 2022/23, 171 in 2023/24, 147 in 2024/25, 113 in 2025/26, 90 in 2026/27, 56 in 2027/28, 54 in years 2028/29 - 2030/31. An additional 57 in 2031/32 and 5 in 2032/33. The high delivery rates in 2020/21 and 2021/22 will be from the completion of apartment blocks which account for 104 and 161 and also for the 65 extra care units. The delivery rates are based on the latest version of the viability evidence. Various housebuilders - self build and custom. Build-out rate varies. Multiple Reserved Matters applications ongoing.	A strategic allocation in the adopted Local Plan 2011-2031 for 2100 dwellings (Bicester 2). The site has been acquired by the Council and transferred to a Graven Hill Village Holding Company. The MoD is contractually obliged to transfer the land in two phases. Phase 1 - 2015 and Phase 2 - 2019. Lead housebuilder - Graven Hill Development Company Ltd. Infrastructure is in place and the site is now under construction. 9 of the first 10 demonstrator plots have been completed to date and the remaining 1 plot is near completion. A revised Local Development Order for 276 plots was approved in December 2017 which will help facilitate the delivery of initial self-build dwellings on the site. Several of these plots are now under construction. The remaining 200 homes will be provided on land at Langford Park. This is a self-build development with primarily 1 housebuilder therefore in interest of caution the expected delivery rates have been amended.	1749	151	71	200	200	200	171	147	113	90	56	54	54	54	54	1561
Inside Out Interiors, 85-87 Churchill Road, Bicester	1.18		Outline - Outline planning application for conversion of existing building to provide 5 no. two bed house, 1 no. two bed flat and 1 no. one bed flat. New build to provide 1 no. commercial unit with outside space parking and cycle storage + 3 no. two bed flats (16/02461/OUT) was approved on 19 May 2017. A Reserved Matters application (19/01276/REM) for 10 dwellings was received in July 2019 and is pending consideration.	Agents (Richard Court Designs Ltd) advised (October 2019) that the Reserved Matters permission is expected to be issued shortly with the applicant planning to start on site in early 2020. The current business to remain therefore the units to the rear will be constructed first followed by the conversion to allow for the business to be relocated to the new premises. A 12 month build programme is expected.	This is a brownfield site in a very sustainable location. There is a plan to relocate the existing commercial units on site which would not affect the housing delivery. The expected delivery rate is based on the information from the agents.	10	0	0	0	10	0	0	0	0	0	0	0	0	0	0	10
Kingsmere (South West Bicester) - Phase 1	82.7	Identified in the Non-Statutory Local Plan (2011)	Full/Reserved Matters - Outline planning permission for an urban extension (1631 homes - 06/00967/OUT (1585) & 14/010207/OUT (46). Reserved Matters for the 46 dwellings (16/00192/REM) was approved on 8 June 2016. Application (11/01840/F) for conversion of existing barns to form 7 no. dwellings and construction of 4 no. dwellings was approved on 15 July 2013 which was completed in September 2014 (2014/15). Planning application for an additional 100 homes (13/00433/OUT) was approved on 15 August 2016. The 100 homes are delivered across all the remaining parcels and were subsequently approved through various Reserved Matters applications. Application for 9 dwellings above the local centre (17/01849/F) was approved on 9 January 2018. A separate application for 57 dwellings (18/01721/OUT) is pending consideration. Reserved Matters approvals ongoing. Total number of homes - 1799 dwellings.	Countryside Properties on behalf of the housebuilders advised (October 2019) that there are currently 4 housebuilders on site, reducing to 3 housebuilders from 2019/20 followed by 1 housebuilder from 2021/22. Provided updated expected delivery rates based on a build-out rate of 200 homes per year.	Countryside Properties joint venture. There are currently 4 housebuilders on site (Bovis Homes, Bellway Homes, Linden Homes and Persimmon Homes). The site is under construction and is very advanced with approximately 70% of the site already delivered. The 2018 AMR identified 200 completions will be expected during 2019/20. The Council's monitoring for quarters 1-2 (19/20) suggests that this is likely to be achieved.	418	1324	200	200	50	25	0	0	0	0	0	0	0	0	0	1799
Land at Bessemer Close / Launton Road	3.35	Identified for 70 dwellings in the Non-Statutory Local Plan (2011)	Reserved Matters - A planning application (15/02074/OUT) for demolition of existing industrial buildings and erection of 21 affordable dwellings and 49 open market dwellings was allowed on appeal on 3 May 2017. A Reserved Matters application (17/01253/REM) was approved on 25 August 2017.	Housebuilder (Vanderbilt Homes) was contacted but no update was received.	The site is currently under construction by Vanderbilt Homes. The 2018 AMR identified 52 completions will be expected during 2019/20. First completions were recorded during 2018/19. The Council's monitoring for quarters 1-2 (19/20) suggests that the remaining homes will be built out during 2019/20 and 2020/21.	55	15	40	15	0	0	0	0	0	0	0	0	0	0	0	70
Land at Skimmingdish Lane	2.4		Full - Application (14/00697/F) for 46 dwellings was approved on 9 December 2015.		Site completed in September 2019 (2019/20). i.e. after basedate for completions.	14	32	14	0	0	0	0	0	0	0	0	0	0	0	0	46
Land South of Church Lane (Old Place Yard and St Edburghs)	0.63	Identified for 15 dwellings in the Non-Statutory Local Plan (2011)	Full - Planning application 16/00043/F for 11 self-contained flats for adults with physical disabilities/learning disabilities and autistic spectrum condition was approved on 13 June 2016.	Council led scheme. CDC Housing advised (October 2019) that the remaining part of the site is likely to deliver only 3 houses. Internal discussions ongoing. A planning application is currently being prepared which is likely to be submitted in December 2019. Development on site is expected to start in Autumn 2020 with the site being completed by end of 2021.	This is a brownfield site in a very sustainable location. The 11 approved dwellings were completed in June 2018. The former Bicester Library still remains vacant. Development principles approved in June 2007. The former library is owned by Cherwell District Council and a planning application for 3 dwellings is expected to be submitted.	0	11	0	0	3	0	0	0	0	0	0	0	0	0	0	14

Appendix 2 - 2019 AMR Housing Delivery Monitor

Sites	Site Area (ha)	Local Plan Status	Planning Application / Permission Status	Information from developer / agent / landowner	Scheme Progress	Planning Permissions at 31/3/19 minus units built & recorded at 31/03/19 (net)	Completions 01/04/11 to 31/03/19	Projection 19/20	Projection 20/21	Projection 21/22	Projection 22/23	Projection 23/24	Projection 24/25	Projection 25/26	Projection 26/27	Projection 27/28	Projection 28/29	Projection 29/30	Projection 30/31	Total Completions and Projected Completions 2011-2031	
North West Bicester Eco-Town Exemplar Project	22.4	Local Plan allocation (2015) - Bicester 1 Identified in Annex A of the Eco-Towns PPS (2009).	Full - Full approval (10/01780/HYBRID) for 393 residential units, an energy centre (up to 400 square metres), means of access, car parking, landscape, amenity space and service infrastructure and outline permission for a nursery of up to 350 square metres (use class D2), a community centre of up to 350 square metres (sui generis), 3 retail units of up to 770 square metres (including but not exclusively a convenience store, a post office and a pharmacy (use class A1), an Eco-Business Centre of up to 1,800 square metres (use class B1), office accommodation of up to 1,100 square metres (use class B1), an Eco-Pub of up to 190 square metres (use class A4), and a primary school site measuring up to 1.34 hectares with access and layout to be determined. (Approved 10 July 2012).	Housebuilder (A2Dominion) provided (October 2019) updated expected delivery rates: 67 in 2019/20, 56 in 2020/21, 77 in 2021/22, 34 in 2022/23.	The site is currently under construction by A2Dominion and Crest Nicholson. This is the first stage of Council endorsed eco-development. The new primary school (Gagle Brook) was opened in September 2018. The 2018 AMR identified 65 completions will be expected during 2019/20. The Council's monitoring for quarters 1-2 (19/20) suggests that this is likely to be achieved. The expected delivery rates updated takes into account information from A2Dominion and actual completions data recorded by the Council.	209	184	67	56	56	30	0	0	0	0	0	0	0	0	0	393
North West Bicester Phase 2	322.6	Local Plan allocation (2015) - Bicester 1 Identified in Annex A of the Eco-Towns PPS (2009).	Outline/Full - Application 17/00455/HYBRID for highways and residential development (150 dwellings) was approved on 7 August 2017, however a previous application (14/01675/OUT) for a similar scheme for employment use and 4.5ha of residential land was allowed on appeal on 28 November 2017. (Albion Land) Resolutions to approve: 14/01641/OUT for 900 dwellings (A2Dominion), 14/01384/OUT for 2600 dwellings (A2Dominion) and 14/02121/OUT for 1700 dwellings (P3Eco Ltd) (24/10/19). Outline planning application for 75 dwellings (18/00484/OUT-SGR (Bicester)1 Ltd) is pending consideration. Application 14/01968/F for the construction of a new road from Middleton Stoney Road roundabout to join Lord's Lane and to include a new crossing under the existing railway line was approved on 21 August 2019.	Housebuilder, A2Dominion who is the main residential developer advised (October 2019) that there are no dates available for future phases. Agents (Quod) advised (October 2019) that the Albion Land parcel is expected to be offered to the market at some point in the future as the applicant is not a housebuilder. No information is available on delivery. Agents (Quod) advised (October 2019) that the application for the SGR parcel is currently with the Council and has not been determined. Given the application is in outline only, the delivery rates are currently unknown. Agents (Turleys) for the P3Eco Ltd parcel was contacted but no update was received.	The North West Bicester site is allocated for 6000 homes in total with 393 in Phase 1 and at least a further 3293 to be delivered in Phase 2 by 2031 (the Plan does not preclude earlier delivery). Main residential developer is A2 Dominion with other housebuilders expected on site. There are outstanding resolutions to approve, ongoing planning applications pending consideration. The Council's Development Management Officer leading on the site advised (October 2019) that Albion Land are restricted from delivering any of the residential development until the realigned Howes Lane are delivered and opened to vehicular traffic. Tunnels are expected to be delivered by April 2021 followed by the delivery of roads in 2022. Reserved Matters are needed so first completions are expected during 2023/24. There is currently 1 outline permission for 150 dwellings with other outline applications with resolutions to approve. Due to infrastructure requirements and the need for Reserved Matters applications the expected delivery rates are pushed back to allow more lead-in time. Ongoing discussions between the Council and the applicants.	150	0	0	0	0	0	50	155	220	220	220	220	220	220	220	1525
South East Bicester	40	Local Plan allocation (2015) - Bicester 12	Outline - A planning application (16/01268/OUT) for up to 1500 dwellings, up to 18ha of employment land for B1 and/or B8, a local centre with retail and community use to include A1 and/or A2 and/or A3 and/or A4 and/or A5 and/or D1 and/or D2A and/or B1 and/or uses considered as sui generis, up to a 3 Form Primary School was approved on 25 October 2018 subject to legal agreement.	Agents (Boyer Planning) was contacted but no update was received.	Site promoted by Boyer Planning on behalf of Redrow Homes/Wates. Outline permission awaited - S106 is unlikely to be signed off by end of this year. Due to the need for the Outline permission to be issued and Reserved Matters applications to be submitted the expected delivery rates are pushed back 2 years to allow more lead-in time.	0	0	0	0	0	50	100	150	200	200	200	200	200	100	1400	
South West Bicester Phase 2	36.88	Local Plan allocation (2015) - Bicester 3	Outline/Reserved Matters - Application 13/00847/OUT for 709 dwellings was approved on 30 May 2017. A Reserved Matters application for 247 dwellings (18/00647/REM) was approved on 16 October 2018. A separate Reserved Matters for 176 dwellings (18/01777/REM) was approved on 1 March 2019. Reserved Matters application for 226 dwellings was received on 10 October 2019 and is pending consideration. A separate application for 60 dwellings is expected.	Countryside Properties on behalf of the housebuilders advised (October 2019) that there are currently 3 housebuilders on site increasing up to 5 housebuilders. Provided updated delivery rates based on a build-out rate of 200 homes per year.	Countryside Properties joint venture. This is phase 2 of the Kingsmere development which is at an advanced build stage. The Reserved Matters for 247 dwellings was submitted by Cala Homes. A separate Reserved Matters application for 176 dwellings was submitted by Bellway Homes. Ashberry Homes to develop on part of the Bellway's site therefore resulting in 3 housebuilders. The site is expected to have up to 6 housebuilders. In interest of caution the expected delivery rate for the first year is lower as construction had only commenced since June 2019.	709	0	50	200	200	200	59	0	0	0	0	0	0	0	709	
Windfall Allowance (<10 dwellings)					Projection based on 2018 HELAA. For previously developed sites only and discounted to allow for non-implementation. Expectations lowered for second half of plan period in the interest of caution. Windfall completions on sites less than 10 dwellings are also recorded.	34	131	10	10	10	10	10	5	5	5	5	5	5	5	216

Bicester - Specific, Developable Sites (10 or more dwellings) - Identified developable sites not yet considered to be deliverable																					

Appendix 2 - 2019 AMR Housing Delivery Monitor

Sites	Site Area (ha)	Local Plan Status	Planning Application / Permission Status	Information from developer / agent / landowner	Scheme Progress	Planning Permissions at 31/3/19 minus units built & recorded at 31/03/19 (net)	Completions 01/04/11 to 31/03/19	Projection 19/20	Projection 20/21	Projection 21/22	Projection 22/23	Projection 23/24	Projection 24/25	Projection 25/26	Projection 26/27	Projection 27/28	Projection 28/29	Projection 29/30	Projection 30/31	Total Completions and Projected Completions 2011-2031	
Cattle Market	0.79	Identified for 40 dwellings in the Non-Statutory Local Plan (2011)		Council owned site. CDC Parking Services advised (October 2019) that there is no update for the site therefore comments from the 2018 AMR remains relevant. The Cattle Market is the only long stay car park in Bicester town centre and has recently been upgraded to pay on exit. The car park is very well used by local businesses and residents. The car park offers cheap all day parking, the Apcoa contract runs until 31 May 2022 and there are no pending plans to change the position with Apcoa.	Previously granted outline permission subject to s.106 (01/00073/CDC) but granted temporary change of use to public car park (04/00779/CDC & 09/00828/CDC). The site is required as a public car park during town centre redevelopment. Phase 1 has been completed. A review of the town's car parking capacity will need to be undertaken before the site is released. No more than 40 dwellings are likely to be provided due to the anticipated need for some informal parking and/or more scope to provide an attractive, open environment (square/open space). HELAA (2018) site HELAA264. The 2018 HELAA has considered the site to be developable. In temporary use as a public car park. Planning permission to extend the use of existing car park for a further 5 years (14/00461/CDC) was given on 20 June 2014. A new 5 year management plan has recently been signed by the Council which retains the car park use until September 2022. No update since last year - Expected delivery rates to remain unchanged.	0	0	0	0	0	0	20	20	0	0	0	0	0	0	0	40
Gavray Drive	23	Local Plan allocation (2015) - Bicester 13	Outline - Application (15/00837/OUT) for 180 dwellings was refused on 22 June 2017 and was dismissed at appeal on 16 July 2018.	Agents (David Lock Associates) advised (October 2019) that a new and comprehensive application is being prepared for the full site for next year. A more robust assumption would be to push back the start date by a year given that there is no current planning permission on the site allocation. Expected delivery rates: 25 in 2021/22, 75 in 2022/23, 100 in 2023/24, 75 in 2024/25 and 25 in 2025/26.	A strategic allocation in the adopted Local Plan 2011-2031 for 300 dwellings (Bicester 13). The site is located in a sustainable location and close to Bicester town centre. Development could provide integration with the existing Langford Village development to the south and west. Appeal was dismissed due to the uncertainty whether the balance of 120 dwellings can be delivered on the eastern part of the site in a manner that would adequately protect and enhance locally significant ecological interest. There is currently no live planning application therefore the site has been changed to a developable site as there is no prospect of the site being brought forward at present time. Expected delivery rate to be pushed back by an additional year to allow more lead-in time. The site should be kept under review.	0	0	0	0	0	25	75	100	75	25	0	0	0	0	0	300
St. Edburg's School, Cemetery Road	0.7				Planning application 17/01578/OUT for erection of 10 dwellings was received in July 2017 and was withdrawn in September 2017. Due to the uncertainty of the site, it has been taken out of the 5 year housing land supply. This is a potential site if needed to address any identified shortfall in the Council's housing supply. Development principles approved in October 2008. HELAA (2018) site HELAA262. The site is included in the Council's 2018 Brownfield Land Register. Expected delivery to be pushed back 2 years to allow more lead-in time. The site should be kept under review.	0	0	0	0	0	10	0	0	0	0	0	0	0	0	0	10

Sites	Site Area (ha)	Local Plan Status	Planning Application / Permission Status	Information from developer / agent / landowner	Scheme Progress	Planning Permissions at 31/3/19 minus units built & recorded at 31/03/19 (net)	Completions 01/04/11 to 31/03/19	Projection 19/20	Projection 20/21	Projection 21/22	Projection 22/23	Projection 23/24	Projection 24/25	Projection 25/26	Projection 26/27	Projection 27/28	Projection 28/29	Projection 29/30	Projection 30/31	Total Completions and Projected Completions 2011-2031		
2 - 4 High Street, Kidlington	0.11	-	Prior Approval (18/00809/O56) - Change of Use from Class B1(a) offices to Class C3 residential - 16 No one and two bedroom and studio flats was approved on 12 July 2018.	Agents (Mike Gilbert Planning Ltd) advised (October 2019) the housebuilder, Ede Homes is looking to start on site in March 2020 and expect the site to be completed by Spring 2021.	This is a brownfield site in a very sustainable location. A housebuilder is involved. The expected delivery rate is a realistic date to allow for the change of use to be implemented.	16	0	0	0	16	0	0	0	0	0	0	0	0	0	0	16	
British Waterways Site, Langford Lane, Kidlington	0.4	-	Full - application (17/01556/F) for redevelopment of site comprising the erection of 10 residential dwellings was approved on 2 July 2018.	Applicants (Canal & River Trust) advised (October 2019) that a housebuilder is currently in the process of working on discharging conditions and one aspect has already been agreed with the Council. Once details are agreed development is anticipated to commence immediately with a construction period of around 12 months. Occupation will follow completion of the whole scheme and as such occupation is anticipated in the monitoring year 2021/22. 10 completions during 2021/22. 1 housebuilder is expected and is looking to start on site in spring/summer 2020.	This is a small brownfield site in a reasonably sustainable location. A housebuilder is involved. Full planning permission is secured and the expected delivery rate allows a sufficient lead-in time.	10	0	0	0	10	0	0	0	0	0	0	0	0	0	0	10	
Church Leys Field, Blackthorn Road, Ambrosden	5.6	-	Full - Planning application for 85 dwellings (16/02370/F) was approved on 25 January 2018.	Housebuilder (Bellway Homes) advised (October 2019) that there is currently 1 housebuilder on site and provided updated expected delivery rates: 46 in 2019/20 and 39 in 2020/21.	The site is currently under construction by Bellway Homes (since June 2018). The expected delivery rates updated takes into account information from Bellway Homes and actual completions data recorded by the Council.	65	20	40	25	0	0	0	0	0	0	0	0	0	0	0	85	
Co Op, 26 High Street, Kidlington	0.55	-	Full - Application (15/01872/F) for 54 dwellings was refused on 22 February 2017 but allowed on appeal on 3 January 2018.	Housebuilder (Cantay Estates) advised (November 2019) that phase 1 residential units are to be occupied in early 2020 and phase 2 comprising 44 units will be completed and ready for occupation in March 2021.	This is a brownfield site in a very sustainable location. The site is currently under construction by Cantay Estates (since June 2019). Phase 1 for 8 dwellings is near completion and are expected to be completed by March 2020. This is based on information from Cantay Estates and the Council's monitoring information. Expected delivery rates to remain unchanged.	54	0	8	44	0	0	0	0	0	0	0	0	0	0	0	52	
Cotefield Farm Phase 2, Bodicote	5.4	-	Outline/Reserved Matters - Application (14/02156/OUT) for 95 homes was approved on 3 October 2016. Reserved Matters application for 37 dwellings (18/00193/REM) was approved on 28 August 2018. Reserved Matters application for 58 dwellings (18/01309/REM) was approved on 5 November 2018.	Housebuilder (Crest Nicholson) was contacted but no update was received.	The site is currently under construction by Crest Nicholson (since March 2019). Reserved Matters permissions secured. Show homes are opened. The 2018 AMR identified 30 completions will be expected during 2019/20. The Council's monitoring for quarters 1-2 (19/20) suggests that this is likely to be achieved. In interest of caution the expected delivery rates are updated slightly in years 2 and 3.	95	0	30	50	15	0	0	0	0	0	0	0	0	0	0	95	
Former RAF Upper Heyford	505	Local Plan allocation (2015) - Villages 5	Outline/Full/Reserved Matters - Outline permission 08/00716/OUT for a new settlement of 1075 (there are 314 existing homes, leaving a net new build of 761) dwellings, together with associated works and facilities including employment uses, community uses, school, playing fields and other physical and social infrastructure was granted on appeal on 11 January 2010. Revised outline application 10/01642/OUT permitted on 22 December 2011. Reserved Matters approvals ongoing. A separate application for additional 60 dwellings (13/01811/OUT) was approved on 31 March 2016 with the Reserved Matters (16/00627/REM) approved on 31 August 2016. A Full application for 43 dwellings (16/00263/F) was approved on 8 May 2017. A permission for 13 dwellings (16/00627/REM) which resulted in a net loss of 1. Resolution to approve for 79 homes (15/01357/F) on a greenfield site within the strategic allocation by Pye Homes and 297 homes (16/02446/F) by Dorchester on the western part of the site. A new Hybrid application (18/00825/HYBRID) for 1175 dwellings is pending. Total number of homes on site with planning permission (including completions at 31/3/18) is 863.	Housebuilder (Dorchester Living) advised (November 2019) that due to unforeseen contamination issues the 2018/19 year saw a drop in delivery. Provided updated expected delivery rates for their site only as: 64 in 2019/20, 130 in years 2020/21 and 2021/22, 150 in years 2022/23-2030/31. On target to get back up to the delivery rates of 130 units per year in the 2020/21 year and expect the Hybrid planning application for 1,175 units to go to Planning Committee in early 2020. There are currently 2 housebuilders on site. There is a team onsite who can deliver circa 150 units per year however quicker determination of planning applications and S106 negotiations will be needed to deliver full potential. Housebuilder (Bovis Homes) provided (October 2019) updated expected delivery rates as: 71 in 2019/20 and 2020/21. Advised the build-out rate of 71 units per year. Phase 6 is expected to start shortly with phase 4a and 4b in 2020. Housebuilder, Pye Homes to develop on a separate parcel for 79 dwellings. Contact was made but no update was received.	The site has been acquired by the Dorchester Group who have signed up Bovis Homes as a partner housebuilder. The site is currently under construction with over 60% of the permitted dwellings delivered. Expected delivery rates takes into account information from the housebuilders.	323	540	130	150	130	150	150	150	150	150	150	150	150	150	150	150	2300
Kings Two Wheel Centre, 139 Oxford Road, Kidlington	0.1	-	Full - Application (18/01388/F) for demolition of existing vacant workshop and show room buildings, and erection of two and three storey building to provide 10no. dwellings (8 x 2-bed and 2 x 1-bed) was approved on 28 March 2019.	Agents (JP Planning Ltd) was contacted by no update was received.	This is a small brownfield site in a very sustainable location. Full planning permission is secured. The commercial unit has already been demolished and work on the residential has commenced. The site is expected to be completed during 2020/21,	10	0	0	10	0	0	0	0	0	0	0	0	0	0	0	10	

Appendix 2 - 2019 AMR Housing Delivery Monitor

Sites	Site Area (ha)	Local Plan Status	Planning Application / Permission Status	Information from developer / agent / landowner	Scheme Progress	Planning Permissions at 31/3/19 minus units built & recorded at 31/03/19 (net)	Completions 01/04/11 to 31/03/19	Projection 19/20	Projection 20/21	Projection 21/22	Projection 22/23	Projection 23/24	Projection 24/25	Projection 25/26	Projection 26/27	Projection 27/28	Projection 28/29	Projection 29/30	Projection 30/31	Total Completions and Projected Completions 2011-2031
Land adj to Cotswold Country Club and South Of properties on Bunkers Hill, Shipton On Cherwell	0.97	-	Outline - application (18/01491/OUT) for demolition of existing club house, bowling club pavilion and ancillary store, and erection of 10 no. dwellings was approved on 21 June 2019. A Reserved Matters application (19/01410/REM) was approved on 23 October 2019.	Housebuilder (Keble Homes) advised (November 2019) that the site is expected to be completed during 2020/21.	Reserved Matters permission secured. A small site with a housebuilder involved. Expected delivery rate is based on the information from Keble Homes.	0	0	0	10	0	0	0	0	0	0	0	0	0	0	10
Land at Station Road, Enslow	0.58	-	Full - Planning application for 14 dwellings (15/00822/F) was approved on 21 November 2016.	Housebuilder (Portdevon) advised (October 2019) that the site is expected to be completed in 2019/20. Delivery rate to remain unchanged.	The site is currently under construction with Portdevon. The site is expected to be completed by March 2020.	12	2	12	0	0	0	0	0	0	0	0	0	0	0	14
Land at Tappers Farm, Oxford Road, Bodicote	2.19	-	Outline - application (18/00792/OUT) for the demolition of existing buildings and erection of up to 52 no. dwellings (now 46) with associated works and provision of open space was allowed on appeal on 30 October 2019.	-	Outline planning permission secured. The agents (Hollins Strategic Land) advised in the Appeal Statement (February 2019) that the 46 dwellings are expected to be completed within 5 years. Expected to start the development on site within 12 months with a 18 months build programme. In August 2019 Bovis Homes has expressed an interest in opening negotiations to acquire the site therefore there has already been discussions with a housebuilder. A Reserved Matters application will be needed therefore the expected delivery rates allows a sufficient lead-in time.	0	0	0	0	0	20	26	0	0	0	0	0	0	0	46
Land East Of Jersey Cottages Station Road, Ardley	0.357	-	Full - Planning application (18/01881/F) for erection of 13 new affordable dwellings together with associated external works, car parking and landscaping was approved on 28 March 2019.	Agents (Oakley Architects Ltd) advised (October 2019) that contract has commenced and work on site is expected to start in December 2019. The site is expected to be completed by end of 2020.	A rural exception site. The site is owned by Waterloo housing association who will be developing the site. The site is part of the Oxfordshire Housing and Growth Deal therefore will be offered funding to assist the delivery of the site. This is one of the priority sites to be delivered within a short timeframe. Full planning permission is secured and the housebuilder is expected to start on site by end of this year. Expected delivery rate to remain unchanged.	13	0	0	13	0	0	0	0	0	0	0	0	0	0	13
Land North of Hook Norton Primary School And South Of Redland Farm, Sibford Road, Hook Norton	2.68	-	Reserved Matters - Planning application 14/00844/OUT for erection of 54 dwellings, landscape, public open space and associated works was approved on 8 December 2015. Reserved Matters application (17/00950/REM) was approved on 21 December 2017.	Housebuilder (Lioncourt Homes) was contacted but no update was received.	The site is currently under construction by Lioncourt Homes. The site is expected to be completed during 2019/20.	40	14	40	0	0	0	0	0	0	0	0	0	0	0	54
Land North of Milton Road, Adderbury	5.83	-	Full - Planning application (14/00250/F) for 31 dwellings was approved on 1 December 2014. A separate planning application for 5 additional dwellings on land previously allocated for possible community use (17/00813/F) was approved on 9 November 2017. A separate application (18/00691/F) for an additional dwelling was approved on 12 November 2018.	-	Site completed in June 2019 (2019/20). i.e after basedate for completions.	1	36	1	0	0	0	0	0	0	0	0	0	0	0	37
Land North Of Oak View, Weston On The Green	0.89	The site is included in the pre-submission Weston on the Green Neighbourhood Plan for 20 dwellings.	Reserved Matters - Outline application 13/01796/OUT for residential development of up to 20 dwellings was approved on 7 April 2015. A Reserved Matters application (16/00574/REM) was approved on 20 December 2016. A variation of condition application (17/01458/OUT)) to amend the details to layout, appearance, access and landscaping; including alterations to the Courtyard arrangement and alterations to the layout & plots was approved on 8 May 2018. An additional 4 dwellings was approved on 30 July 2019 (18/02066/F).	Agent (Msquare Architects) was contacted but no update was received.	This is a reasonably small greenfield site with Reserved Matters permission. In interest of caution the expected delivery rate is pushed back a year.	20	0	0	24	0	0	0	0	0	0	0	0	0	0	24
Land North of Station Road, Bletchington	3.92	-	Full/Reserved Matters - Application (13/00004/OUT) for 40 market homes plus 18 affordable, school, village hall, shop was approved on 14 May 2014. Reserved Matters application (14/01141/REM) was approved on 18 December 2014. A Variation of condition (16/00362/F) was approved on 2 September 2016. A separate planning application (16/02616/F) for conversion of 2 proposed houses into 5 flats (net gain of 3) was approved on 21 February 2017.	Applicants (Places For People) advised (October 2019) that delivery has been slower than the Council's assumed programme due to the bespoke product and the need to maintain construction output aligned with sales rate. Provided updated expected delivery rates: 30 in 2019/20 and 15 in 2020/21.	The site is currently under construction by ZeroC with over 70% of the permitted dwellings delivered. The expected delivery rates updated takes into account information from the applicants and actual completions data recorded by the Council. The site is expected to be completed by March 2021.	37	24	30	7	0	0	0	0	0	0	0	0	0	0	61

Appendix 2 - 2019 AMR Housing Delivery Monitor

Sites	Site Area (ha)	Local Plan Status	Planning Application / Permission Status	Information from developer / agent / landowner	Scheme Progress	Planning Permissions at 31/3/19 minus units built & recorded at 31/03/19 (net)	Completions 01/04/11 to 31/03/19	Projection 19/20	Projection 20/21	Projection 21/22	Projection 22/23	Projection 23/24	Projection 24/25	Projection 25/26	Projection 26/27	Projection 27/28	Projection 28/29	Projection 29/30	Projection 30/31	Total Completions and Projected Completions 2011-2031	
Land North of The Green and adj. Oak Farm Drive, Milcombe	1.43	-	Outline - Outline application 15/02068/OUT for 40 dwellings was approved on 25 October 2017. A Variation of Condition (19/00045/OUT) in relation to footpath links and open space/play spaces was approved on 14 October 2019. Reserved Matters (19/00046/REM) for 40 dwellings was received in January 2019 and is pending consideration.	Sanctuary Housing advised (October 2019) that the Reserved Matters application is with the Council and that a revised outline permission (variation of condition) is still outstanding however this is expected to be issued shortly. The Reserved Matters permission is expected to follow. Development on site is expected to start on site in March 2020 with 30 completions in 2021 and remaining balance in 2022 (30 in 2021/22 and 10 in 2022/23).	The site is owned by Sanctuary Housing who will be developing the site. Ongoing discussions between Sanctuary Housing and the Council's Development Management team. The Reserved Matters application is received and is expected to be issued soon. The updated expected delivery rates are based on the information from Sanctuary Housing which allows a sufficient lead-in team.	40	0	0	0	30	10	0	0	0	0	0	0	0	0	0	40
Land off Banbury Road, Adderbury	0.84	-	Full - Planning application (13/00996/F) for 26 dwellings was allowed on appeal on 3 September 2014. A Variation of condition (16/01459/F) was approved on 15 March 2017. 25 dwellings being proposed on the site.	Housebuilder (Barwood Homes) was contacted but no update was received.	The site is currently under construction by Barwood Homes. The block of apartments are near to completion. The Council's monitoring for quarters 1-2 (19/20) suggests that the site is expected to be completed by March 2020.	16	9	16	0	0	0	0	0	0	0	0	0	0	0	0	25
Land South of Milton Road, Bloxham	5.4	-	Reserved Matters - Outline application 12/01139/OUT of up to 85 dwellings was undetermined, called in by the Secretary of State and allowed on appeal on 23 September 2013. Permission expired on 23 September 2014. Planning application (14/01017/OUT) for 85 dwellings was approved on 9 February 2015. Reserved Matters application (15/01021/REM) was approved on 21 December 2016.	Housebuilder (Miller Homes) was contacted but no update was received.	The site is currently under construction by Miller Homes. The Council's monitoring for quarters 1-2 (19/20) suggests that the site is expected to be completed by March 2020.	30	55	30	0	0	0	0	0	0	0	0	0	0	0	0	85
South East Of Launton Road And North East Of Sewage Works Blackthorn Road, Launton	5.34	-	Outline - application (17/01173/OUT) for development of up to 72 dwellings with associated large area of public open space was allowed at appeal on 18 September 2018. A Reserved Matters application for 65 dwellings (19/02419/REM) submitted by Mulberry Homes was received on 29 October 2019 and is pending consideration.	Agent/Housebuilder (Manor Oak Homes) advised (October 2019) that the site has been sold to a housebuilder and there is no other information available. Housebuilder (Mulberry Homes) who has purchased the site was contacted but no update was received.	The site has been purchased by a housebuilder (Mulberry Homes) who has recently submitted a Reserved Matters application for 65 dwellings. Expected delivery rates to be pushed back a year to allow more lead-in time.	72	0	0	0	15	30	20	0	0	0	0	0	0	0	0	65
Stone Pits, Hempton Road, Deddington	1.02	-	Outline - application (18/02147/OUT) for up to 21 dwellings comprising 1, 2, 3 and 4 bedroom dwellings was approved subject to legal agreement on 30 May 2019.	Agents (Pembury Estates Ltd) was contacted but no update was received.	Outline permission is expected to be issued by end of this year. The Council's Development Management Officer leading on the site advised (November 2019) that the S106 is currently with the applicant and there is only 1 outstanding issue to resolve. Ground investigations work is being undertaken before the site is expected to be put on the market. The expected delivery rate allows a sufficient lead-in time.	0	0	0	0	0	21	0	0	0	0	0	0	0	0	0	21
Taylor Livock Cowan, Suite F Kidlington Centre, High Street, Kidlington	0.05	-	Full - application (18/00587/F) for the erection of ten residential flats with associated undercroft car parking, cycle storage and bin storage was approved on 6 November 2019.	Agents (Edgars Ltd) advised (October 2019) that the S106 is still pending. If permission is issued by end of the year, development on site is expected by middle of 2020 with a 12 month build programme. The site is expected to be completed in 2021/22.	This is a small brownfield site in a very sustainable location. Full planning permission is secured. The expected delivery rate is based on the information from the agents which allows a sufficient lead-in time.	0	0	0	0	10	0	0	0	0	0	0	0	0	0	0	10
The Paddocks, Chesterton	3.08	-	Reserved Matters - Planning application (14/01737/OUT) for 45 dwellings was approved on 2 February 2016. A Reserved Matters application (16/00219/REM) was approved on 9 December 2016.	-	Site completed in June 2019 (2019/20). i.e after base date for completions.	5	40	5	0	0	0	0	0	0	0	0	0	0	0	0	45
Windfall Allowance (<10 dwellings)		-	-	-	Projection based on 2018 HELAA. For previously developed sites only and discounted to allow for non-implementation. Expectations lowered for second half of plan period in the interest of caution. Windfall completions on sites less than 10 dwellings are also recorded.	270	638	61	61	61	61	61	30	30	30	30	30	30	30	30	1153
3B Other Areas - Deliverable (Available, Suitable and Achievable) Sites Sub-Totals						1129	1378	403	394	287	292	257	180	4271							
Other Areas - Specific, Developable Sites (10 or more dwellings) - Identified developable sites not yet considered to be deliverable																					
Land at Arncott Hill Farm, Buchanan Road, Arncott	0.58	-	-	-	A Reserved Matter application (12/01003/REM) was approved on 18/10/12. Implementation was required within a year of the decision (18 Oct 2012). Planning permission lapsed on 18 October 2013. Site taken out of the 5 year housing land supply. This is a potential site if needed to address any identified shortfall in the Council's housing supply. HELAA (2018) site HELAA265. The 2018 HELAA considered the site to be developable. Site to be kept under review.	0	0	0	17	0	0	0	0	0	0	0	0	0	0	0	17

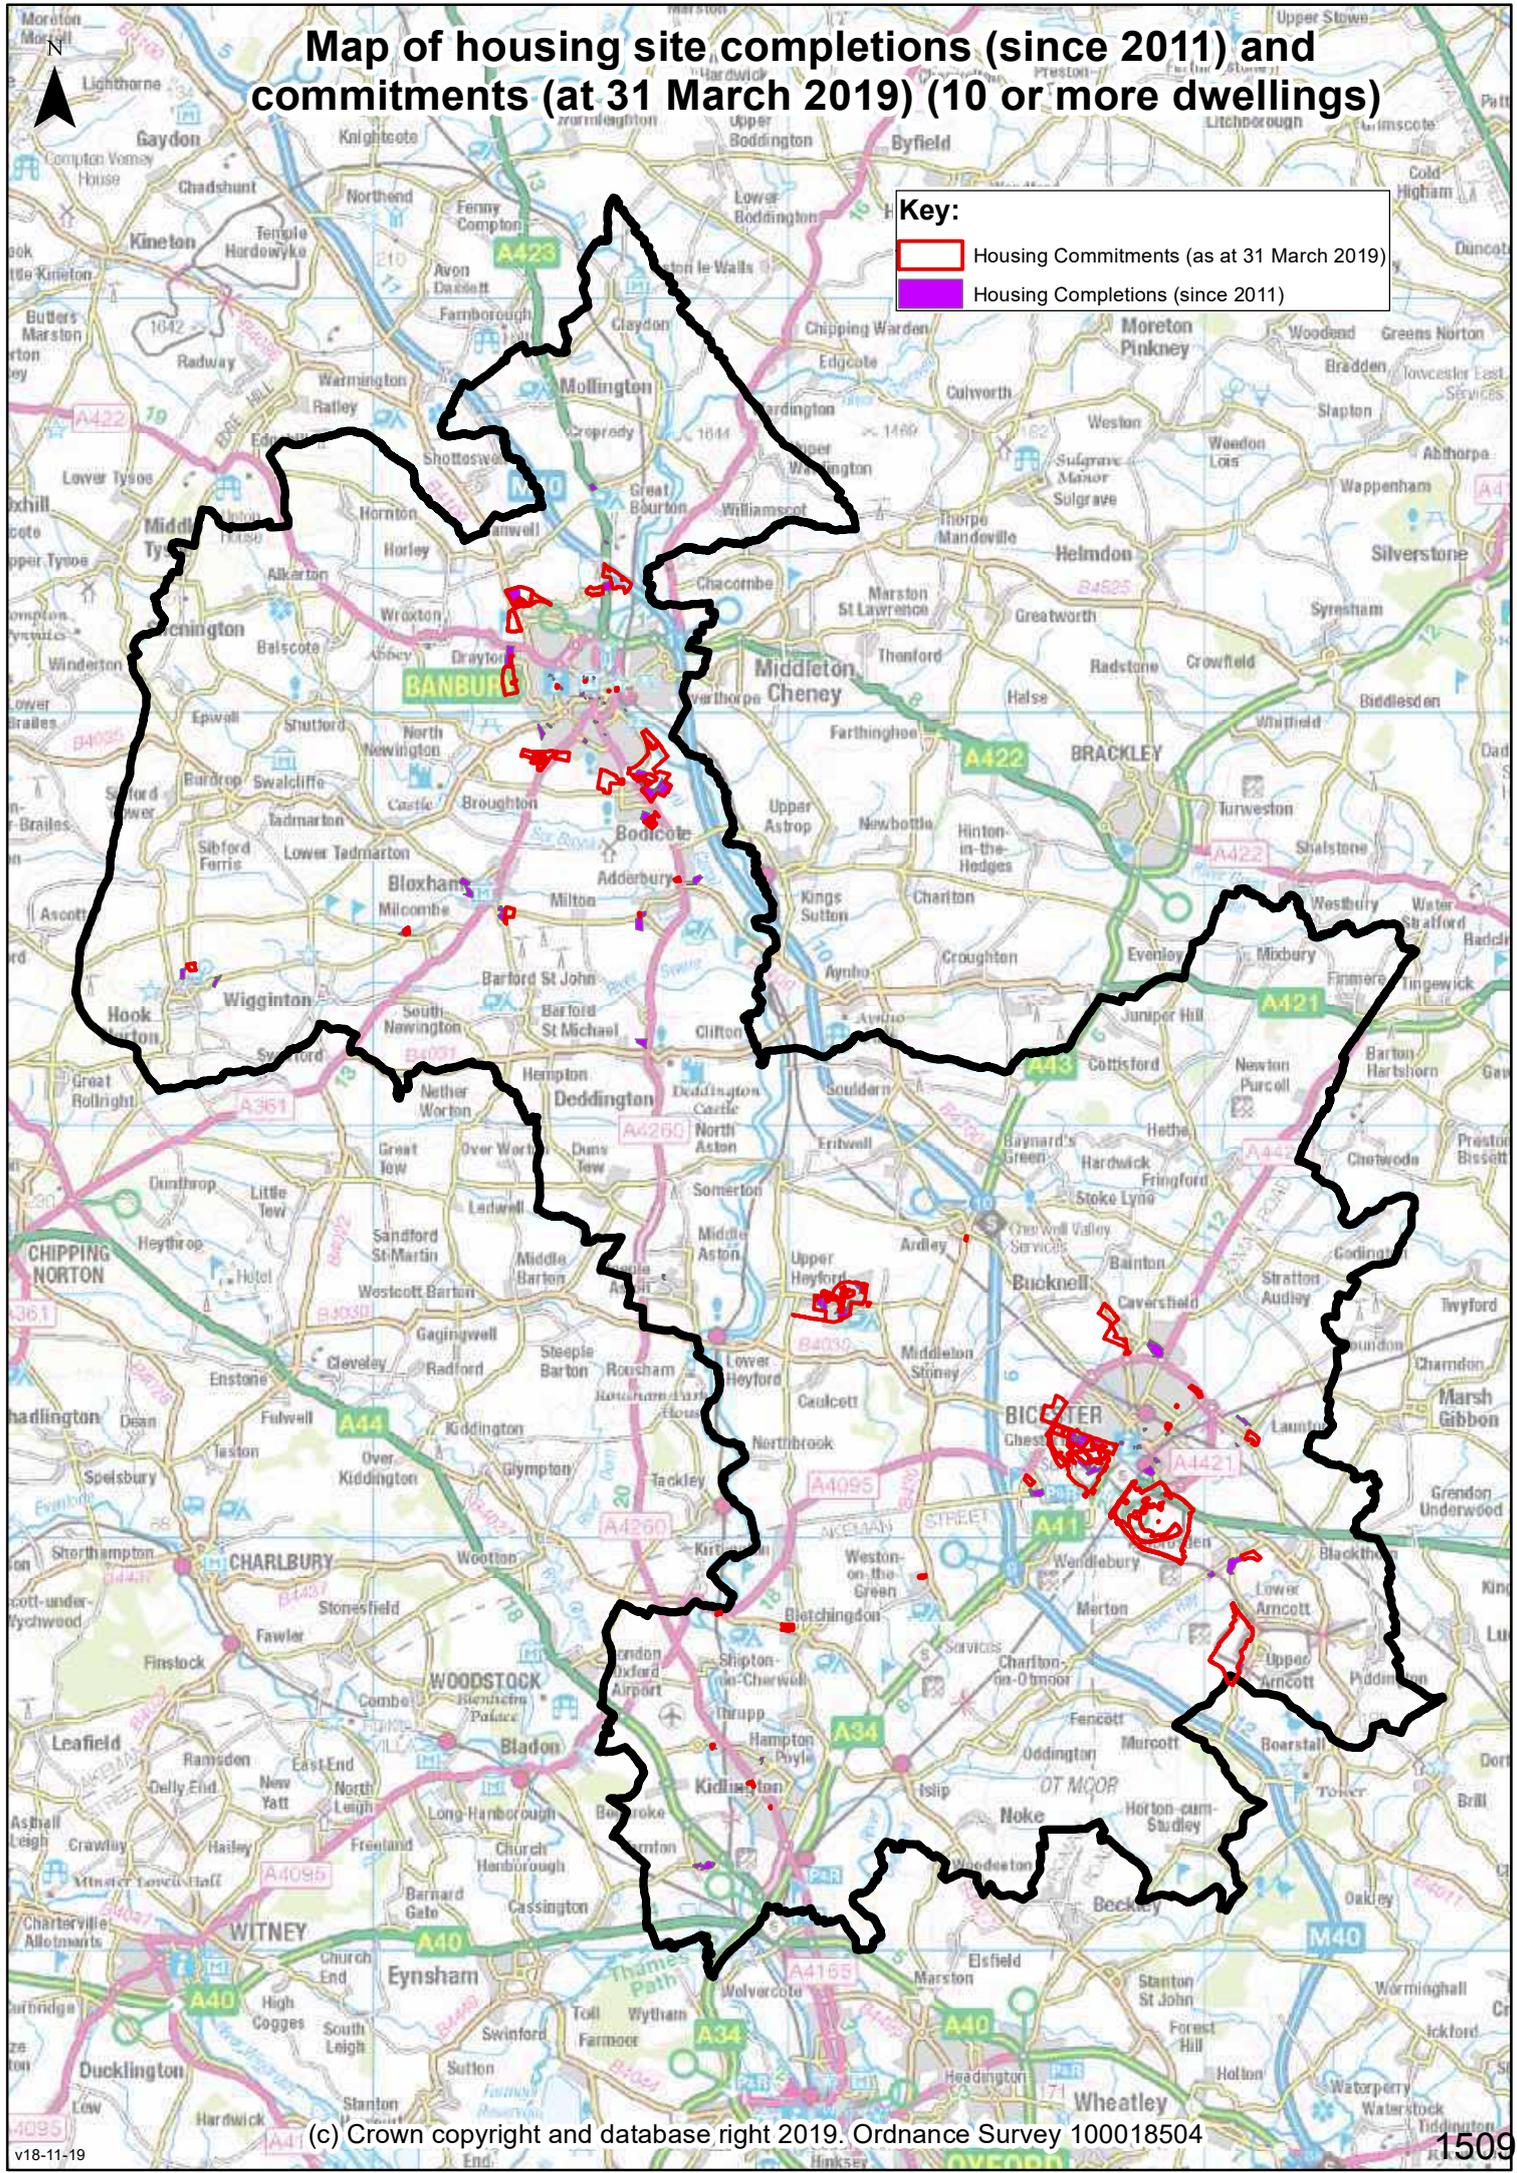

Appendix 2 - 2019 AMR Housing Delivery Monitor

Appendix 4: Adopted Local Plan 2011-2031 Monitoring Framework

A Strategy for Development in Cherwell

Policy Reference	Policy Title	Local Plan Indicators	Target
PSD 1	Presumption in favour of Sustainable Development	Monitoring of PSD1 is undertaken by Sustainability Indicators	Monitoring of PSD1 is undertaken by Sustainability Indicators

Policies for Development in Cherwell

Theme One: Policies for Developing a Sustainable Local Economy

Policy Reference	Policy Title	Local Plan Indicators	Target
SLE 1	Employment Development	Employment commitments and completions on allocated employment land per sub area (Banbury, Bicester, Kidlington, Rural Areas)	100% take up of allocations by the end of the plan period
SLE 1	Employment Development	Employment commitments and completions on non-allocated employment land per sub area (Banbury, Bicester, Kidlington, Rural Areas)	Yearly increase in employment use class commitments and completions
SLE 1	Employment Development	Completions resulting in a loss of employment use to non employment use per sub area (Banbury, Bicester, Kidlington, Rural Areas)	No overall net loss of employment land
SLE 2	Securing Dynamic Town Centres	Town centre use (including use classes A1-A5, B1a, D2) completions within and outside of each of the town centres	No net loss of town centre use floor space within town centres
SLE 2	Securing Dynamic Town Centres	No. of retail impact assessments submitted with planning applications	100% of applications over the thresholds set out in Policy SLE2
SLE 3	Supporting Tourism Growth	Completed tourism developments (including D use class uses, Sui Generis uses)	An annual increase in completed tourism developments over the plan period
SLE 3	Supporting Tourism Growth	Number of visitors to tourist attractions in the District	An annual increase over the plan period
SLE 3	Supporting Tourism Growth	Number of visitors to tourist attractions in the District	An annual increase over the plan period

SLE 4	Improved Transport and Connections	Completed transport improvement schemes	Timely provision of transport infrastructure in accordance with strategic site delivery and as set out in the IDP
SLE 4	Improved Transport and Connections	Developer contributions to transport infrastructure	To meet development needs, as set out in the IDP
SLE 5	High Speed Rail 2 – London to Birmingham	Level of Council involvement with the proposed High Speed Rail Link	Respond to all relevant Government consultations on HS2 Respond to all planning applications relating to HS2.

Theme Two: Policies for Building Sustainable Communities

Policy Reference	Policy Title	Local Plan Indicators	Target
BSC 1	District Wide Housing distribution	Housing commitments and completions per sub area (Banbury, Bicester, Kidlington, rural areas)	As set out in Policy BSC1
BSC 2	The Effective and Efficient Use of Land	% of residential completions on previously developed land	As set out in Policy BSC2
BSC 2	The Effective and Efficient Use of Land	Net housing density of completions	As set out in Policy BSC2
BSC 3	Affordable Housing	Net affordable housing completions/acquisitions per tenure	As set out in Policy BSC3
BSC 3	Affordable Housing	No. of self-build completions	An annual increase in the number of self-build completions
BSC 4	Housing Mix	Number of completed dwellings per number of bedrooms	As set out in Policy BSC4
BSC 4	Housing Mix	Number of 'extra care' completions	As set out in Policy BSC4
BSC 5	Area Renewal	Completed development per type in the 'area of renewal'	Improvements in levels of deprivation in the District
BSC 5	Area Renewal	The 'Brighter Futures in Banbury' Performance Measures Package Reports	Positive trends across all the Programme's indicators
BSC 6	Travelling Communities	Completed/Lost Gypsy & Traveller Plots/Travelling Showpeople Pitches, by location (location criteria as set out in Policy BSC6)	Provision for new pitches to meet identified shortfall as set out in Policy BSC6

BSC 7	Meeting Education Needs	Completed education infrastructure	Timely provision of education infrastructure in accordance with strategic site delivery and as set out in the IDP
BSC 7	Meeting Education Needs	Developer contributions to education infrastructure	To meet development needs, as set out in the IDP
BSC 8	Securing Health and Well Being	Completed health care infrastructure	Timely provision of health infrastructure in accordance with strategic site delivery and as set out in the IDP
BSC 8	Securing Health and Well Being	Developer contributions to health care infrastructure	To meet development needs, as set out in the IDP
BSC 8	Securing Health and Well Being	Completions at Bicester Community Hospital	Replacement of Bicester Community Hospital within the plan period
BSC 9	Public Services and Utilities	Completed public services/utilities infrastructure	Timely provision of public services/utilities infrastructure in accordance with strategic site delivery and as set out in the IDP
BSC 9	Public Services and Utilities	Developer contributions to public services/utilities	To meet development needs, as set out in the IDP
BSC 10	Open Space, Outdoor Sport & Recreation Provision	Amount, type and location of open space/sport/recreation facilities	No net loss of open space/outdoor sport/recreation sites
BSC 10	Open Space, Outdoor Sport & Recreation Provision	Areas deficient in recreation provision by type and amount	Annual improvements over the plan period
BSC 10	Open Space, Outdoor Sport & Recreation Provision	Completed built development on (former) sites of open space, outdoor sport and recreation	No net loss of open space/outdoor sport/recreation sites
BSC 10	Open Space, Outdoor Sport & Recreation Provision	Open spaces in the District meeting quality standards	A yearly improvement in the quality of sites/facilities
BSC 11	Local Standards of Provision - Outdoor Recreation	Developer contributions to open space/sport/recreation facilities per typology	As set out in policy BSC11
BSC 12	Indoor Sport, Recreation and Community	Developer contributions to open space/sport/recreation facilities per typology	As set out in policy BSC12

	Facilities		
BSC 12	Indoor Sport, Recreation and Community Facilities	Completed community facilities infrastructure	As set out in policy BSC12

Theme Three: Policies for Ensuring Sustainable Development

Policy Reference	Policy Title	Local Plan Indicators	Target
ESD 1	Mitigating and Adapting to Climate Change	Carbon emissions in the District per capita	Reductions over the plan period
ESD 1	Mitigating and Adapting to Climate Change	Permissions granted contrary to Environment Agency advice on Flood Risk grounds	No permissions granted contrary to EA advice on flood risk grounds
ESD 1	Mitigating and Adapting to Climate Change	Access to services and facilities by public transport, walking and cycling	Improvement over the plan period, linked to Oxfordshire LAA target (National Indicator 175)
ESD 2	Energy Hierarchy	Number of Energy Statements submitted	As set out in Policy ESD2 i.e. required for all major applications
ESD 3	Sustainable Construction	% of new dwellings completed achieving water use below 110 litres/person/day	As set out in Policy ESD3
ESD 3	Sustainable Construction	Completed non residential development achieving BREEAM Very Good, BREEAM Excellent	As set out in Policy ESD3
ESD 4	Decentralised Energy Systems	Number of District Heating Feasibility Assessments submitted	As set out in Policy ESD4 i.e. required for all applications for 100 dwellings or more
ESD 4	Decentralised Energy Systems	Number of permitted District heating schemes in the District	Increase over the plan period
ESD 5	Renewable Energy	Permitted renewable energy capacity per type	Increase over the plan period
ESD 6	Sustainable Flood Risk Management	Permissions granted contrary to Environment Agency advice on flood risk grounds	No permissions granted contrary to EA advice on flood risk grounds
ESD 6	Sustainable Flood Risk Management	Flood Risk Assessments received for development proposals within Flood Zones 2 & 3, within 1 ha of Flood Zone 1, or 9m of any watercourse	As set out in Policy ESD6 i.e. required for all proposals meeting the locational criteria
ESD 7	Sustainable Drainage	Completed SuDS schemes in the District	Annual increase over the plan period

	Systems (SuDS)		
ESD 8	Water Resources	Number of permissions granted contrary to Environment Agency advice on water quality grounds	No permissions granted contrary to EA advice on water quality grounds
ESD 9	Protection of the Oxford Meadows SAC	Number of permissions granted contrary to consultee (Environment Agency, BBOWT, CDC/OCC etc) advice on water quality grounds within the SAC catchment	No permissions granted contrary to consultee (EA, BBOWT, CDC/OCC etc) advice on water quality grounds within the SAC catchment
ESD 10	Protection and Enhancement of Biodiversity and the Natural Environment	Total LWS/LGS area	A net gain in total areas of biodiversity importance in the District
ESD 10	Protection and Enhancement of Biodiversity and the Natural Environment	Changes in priority habitats by number & type	An annual increase over the plan period
ESD 10	Protection and Enhancement of Biodiversity and the Natural Environment	Changes in priority species by number & type	A net gain in priority species by number and type
ESD 10	Protection and Enhancement of Biodiversity and the Natural Environment	Ecological condition of SSSIs	100% of SSSI units in favourable or unfavourable recovering condition
ESD 10	Protection and Enhancement of Biodiversity and the Natural Environment	Distribution and status of farmland birds	A yearly increase in the District index of farmland bird presence
ESD 10	Protection and Enhancement of Biodiversity and the Natural Environment	Distribution and status of water voles	A yearly increase in the presence of water voles
ESD 10	Protection and Enhancement of Biodiversity and the Natural Environment	Permissions granted contrary to tree officer advice	No permissions granted contrary to tree officer advice
ESD 10	Protection and	Permissions granted contrary to	No permissions granted

	Enhancement of Biodiversity and the Natural Environment	biodiversity consultee advice	contrary to biodiversity consultee advice
ESD 10	Protection and Enhancement of Biodiversity and the Natural Environment	Number of Ecological Surveys submitted with applications	Ecological Surveys to accompany all planning applications which may affect a site, habitat or species of known or potential ecological value
ESD 10	Protection and Enhancement of Biodiversity and the Natural Environment	Local Sites in Positive Conservation Management	A net gain in Local Sites in Positive Conservation Management
ESD 11	Conservation Target Areas	Total amount of Natural Environment and Rural Communities (NERC) Act s41 Habitats of Principal Importance within active Conservation Target Areas (CTAs)	A net gain of relevant NERC Act Habitats in active CTAs within the District
ESD 11	Conservation Target Areas	Permissions granted in Conservation Target Areas contrary to biodiversity consultee advice	No permissions granted in Conservation Target Areas contrary to biodiversity consultee advice
ESD 12	Cotswolds AONB	Built development permitted in the AONB	No major development in AONB
ESD 12	Cotswolds AONB	Permissions granted contrary to the advice of the AONB Management Board	No permissions granted contrary to the advice of the AONB Management Board
ESD 13	Local Landscape Protection and Enhancement	Number and location of urban fringe restoration/improvement schemes completed	An annual increase over the plan period
ESD 13	Local Landscape Protection and Enhancement	Permissions granted contrary to Landscape Officer advice	No permissions granted contrary to Landscape Officer advice
ESD 14	Oxford Green Belt	Completed development (per type) in the Green Belt	All development in Green Belt to comply with Policy ESD14
ESD15	The Character of the Built Environment	Permissions granted contrary to the advice of English Heritage/consultee advice on heritage grounds	All development impacting on non designated/designated heritage assets to comply with ESD15
ESD15	The Character of the Built Environment	Permissions granted contrary to design consultee advice on design grounds	No permissions granted contrary to design consultee advice on design

			grounds
ESD15	The Character of the Built Environment	% of permitted and completed developments with Design and Access Statements (that address the criteria of policy ESD15).	All new developments to complete a Design and Access Statement
ESD15	The Character of the Built Environment	Number of new (and reviews of) conservation area appraisals	Review 6 Conservation Areas annually
ESD16	The Oxford Canal	Completed transport/recreation/leisure/tourism uses within 1km of the Oxford Canal	Increase over the plan period
ESD16	The Oxford Canal	Permissions granted contrary to consultee advice on heritage grounds	No permissions granted contrary to consultee advice on heritage grounds
ESD17	Green Infrastructure	Completed green infrastructure schemes	A net gain in green infrastructure provision over the plan period
ESD17	Green Infrastructure	Developer contributions to green infrastructure	To meet development needs and as identified in IDP/Green Infrastructure Strategy

Policies for Cherwell's Places

Bicester

Policy Reference	Policy Title	Local Plan Indicators	Target
Bicester 1	North West Bicester Eco-Town	Housing, infrastructure, employment completions at North West Bicester	As set out in policy Bicester 1 (and agreed masterplan/detailed planning documents)
Bicester 1	North West Bicester Eco-Town	Environmental standards of completed development at NW Bicester	As set out in policy Bicester 1
Bicester 1	North West Bicester Eco-Town	Embodied impacts of construction to be monitored, managed and minimised	As set out in policy Bicester 1
Bicester 1	North West Bicester Eco-Town	Sustainability metrics to be agreed and monitored	As set out in policy Bicester 1
Bicester 2	Graven Hill	Housing, infrastructure, and employment completions at Graven Hill	As set out in policy Bicester 2 (and agreed masterplan/detailed planning documents)
Bicester 3	South West Bicester Phase 2	Housing and infrastructure completions at South West	As set out in policy Bicester 3 (and agreed

		Bicester Phase 2	masterplan/detailed planning documents)
Bicester 4	Bicester Business Park	Completed employment development at Bicester Business Park	As set out in policy Bicester 4 (and agreed masterplan/detailed planning documents)
Bicester 5	Strengthening Bicester Town Centre	Permitted residential development at ground floor level in Bicester Town Centre	No residential floorspace permitted at ground floor level
Bicester 5	Strengthening Bicester Town Centre	Town centre vacancies	No increase in vacancy rates over the plan period
Bicester 5	Strengthening Bicester Town Centre	Diversity of uses	Maintain or improve the balance of uses within the town centre over the plan period
Bicester 5	Strengthening Bicester Town Centre	Completed town centre uses (including use classes A1-A5, B1a, D2) within and outside of Bicester Town Centre	No net loss of town centre use floorspace within Bicester Town Centre
Bicester 6	Bure Place Town Centre Redevelopment Phase 2	Completions (plot level) at Bicester Town Centre Phase 1 & 2	Development to accord with Policy BIC6 and agreed masterplan/detailed planning documents for the site
Bicester 7	Meeting the Need for Open Space, Sport & Recreation	Urban edge park schemes in Bicester	An annual increase in such schemes over the plan period
Bicester 7	Meeting the Need for Open Space, Sport & Recreation	Community woodland provision in Bicester	An annual increase in provision over the plan period
Bicester 7	Meeting the Need for Open Space, Sport & Recreation	Type of permitted/completed development at Stratton Audley Quarry	In accordance with a planning consent
Bicester 8	Former RAF Bicester	Completed development at former RAF Bicester	Development to accord with any agreed masterplan/detailed planning documents
Bicester 9	Burial Site Provision in Bicester	Developer contributions for Burial Site in Bicester	To meet needs and as set out in IDP
Bicester 10	Bicester Gateway	Employment and infrastructure completions at Bicester Gateway site	As set out in Policy Bicester 10 (and agreed masterplan/detailed planning documents)
Bicester 11	Employment Land at North East Bicester	Employment and infrastructure completions at Employment	As set out in Policy Bicester 11 (and agreed

		Land at North East Bicester	masterplan/detailed planning documents)
Bicester 12	South East Bicester	Employment, housing and infrastructure completions at South East Bicester	As set out in Policy Bicester 12 (and agreed masterplan/detailed planning documents)
Bicester 13	Gavray Drive	Housing and infrastructure completions at Gavray Drive	As set out in policy Bicester 13 (and agreed masterplan/detailed planning documents)

Policies for Cherwell's Places

Banbury

Policy Reference	Policy Title	Local Plan Indicators	Target
Banbury 1	Banbury Canalside	Employment, housing and infrastructure completions at Canalside	As set out in Policy Banbury 1 and Canalside SPD (i.e. masterplan/detailed planning documents)
Banbury 1	Banbury Canalside	Progress on completing the Canalside Supplementary Planning Document	As set out in an up to date Local Development Scheme
Banbury 2	Hardwick Farm, Southam Road (East and West)	Housing and infrastructure completions at Southam Road	As set out in Policy Banbury 2 (and agreed masterplan/detailed planning documents)
Banbury 3	West of Bretch Hill	Employment, housing and infrastructure completions at West of Bretch Hill	As set out in Policy Banbury 3 (and agreed masterplan/detailed planning documents)
Banbury 4	Bankside Phase 2	Housing and infrastructure completions at Bankside Phase 2	As set out in Policy Banbury 4 (and agreed masterplan/detailed planning documents)
Banbury 5	Land North of Hanwell Fields	Housing and infrastructure completions at Land North of Hanwell Fields	As set out in Policy Banbury 5 (and agreed masterplan/detailed planning documents)
Banbury 6	Employment Land West of the M40	Employment and infrastructure completions at Land West of the M40	As set out in policy Banbury 6 (and agreed masterplan/detailed planning documents)
Banbury 7	Strengthening Banbury Town Centre	Permitted residential development at ground floor level in Banbury Town Centre	No residential floorspace permitted at ground floor level

Banbury 7	Strengthening Banbury Town Centre	Town centre vacancies	No increase in vacancy rates over the plan period
Banbury 7	Strengthening Banbury Town Centre	Diversity of uses	Maintain or improve the balance of uses over the plan period
Banbury 7	Strengthening Banbury Town Centre	Completed town centre uses (including use classes A1-A5, B1a, D2) within and outside of Banbury Town Centre	No net loss of town centre use floorspace within Banbury Town Centre
Banbury 8	Bolton Road Development Area	Housing, Retail and Leisure Completions on the Bolton Road site	In accordance with Policy Banbury 8 and the Masterplan/detailed planning documents for the site
Banbury 9	Spiceball Development Area	Completions at the Spiceball Development Area	In accordance with Policy Banbury 9 and the Masterplan/detailed planning documents for the site
Banbury 10	Bretch Hill Regeneration Area	Completed development in the Bretch Hill Regeneration Area by type	Increase over the plan period
Banbury 11	Meeting the Need for Open Space, Sport & Recreation	Completed open space/sport/recreation facility provision within Banbury	As set out in Policy BSC10 and BSC11
Banbury 12	Meeting the Need for Open Space, Sport & Recreation	Completions at the relocation site for Banbury United FC	As set out in policy Banbury 12, to be achieved over the plan period
Banbury 13	Burial Site Provision in Banbury	Developer contributions for Burial Site in Banbury	To meet needs and as set out in the IDP
Banbury 14	Cherwell Country Park	Progress on delivering the Cherwell Country Park	As set out in Policy Banbury 11
Banbury 15	Employment Land North East of Junction 11	Employment and infrastructure completions at Employment Land North East of Junction 11	As set out in policy Banbury 15 (and agreed masterplan/detailed planning documents)
Banbury 16	Land South of Salt Way: West	Housing and infrastructure completions at Land at South of Salt Way: West	As set out in policy Banbury 16 (and agreed masterplan/detailed planning documents)
Banbury 17	Land South of Salt Way: East	Housing and infrastructure completions at Land at South of Salt Way: East	As set out in policy Banbury 17 (and agreed masterplan/detailed planning documents)
Banbury	Land at Drayton	Housing and infrastructure	As set out in policy Banbury 18

18	Lodge Farm:	completions at Land at Drayton Lodge Farm	(and agreed masterplan/detailed planning documents)
Banbury 19	Land at Higham Way	Housing and infrastructure completions at Land at Higham Way	As set out in policy Banbury 19 (and agreed masterplan/detailed planning documents)

Policies for Cherwell's Places Kidlington

Policy Reference	Policy Title	Local Plan Indicators	Target
Kidlington 1	Accommodating High Value Employment Needs	Employment completions in Kidlington (at a. Langford Lane/London-Oxford Airport and b. Begbroke Science Park)	An annual increase over the plan period
Kidlington 1	Accommodating High Value Employment Needs	Completed employment development on Green Belt land in Kidlington beyond review areas	To accord with Policy ESD14
Kidlington 2	Strengthening Kidlington Village Centre	Permitted residential development at ground floor level in Kidlington Village Centre	No residential floorspace permitted at ground floor level
Kidlington 2	Strengthening Kidlington Village Centre	Village centre vacancies	No increase in vacancy rates over the plan period
Kidlington 2	Strengthening Kidlington Village Centre	Diversity of uses	Maintain or improve the balance of uses within the town centre over the plan period
Kidlington 2	Strengthening Kidlington Village Centre	Completed town centre uses (including use classes A1-A5, B1a, D2) within and outside of Kidlington Village Centre	No net loss of town centre use floorspace within Kidlington Village Centre

Policies for Cherwell's Places Our Villages and Rural Areas

Policy Reference	Policy Title	Local Plan Indicators	Target
Villages 1	Village Categorisation	Completed development per village category and size of scheme (number of dwellings)	As set out in policy Villages 1
Villages 2	Distributing Growth Across the Rural Areas	Land allocations made in the rural areas	As set out in policy Villages 2 and to be set out in the Local Plan Part 2.

Villages 2	Distributing Growth Across the Rural Areas	Completions on allocated sites in rural areas	100% take up of allocations over the plan period
Villages 2	Distributing Growth Across the Rural Areas	Completions on non-allocated sites in rural areas	As set out in the criteria in policy Villages 1 and 2
Villages 3	Rural Exception Sites	Completions on rural exception sites	To meet needs as per Policy Villages 3
Villages 4	Meeting the Need for Open Space, Sport & Recreation	Developer contributions to open space/sport/recreation facilities in the rural areas	As set out in policy BSC11 and BSC12 and the Infrastructure Delivery Plan
Villages 4	Meeting the Need for Open Space, Sport & Recreation	Open space/sport/recreation facilities created in the rural areas	As set out in policy Villages 4, BSC11, BSC12 and the Infrastructure Delivery Plan
Villages 5	Former RAF Upper Heyford	Housing, employment and infrastructure completions at Former RAF Upper Heyford	As set out in policy Villages 5, and agreed masterplan/detailed planning documents

The Infrastructure Delivery Plan

Policy Reference	Policy Title	Local Plan Indicators	Target
INF 1	Infrastructure	Projects provided to date in the Infrastructure Delivery Plan	Key infrastructure to be delivered in accordance with the Infrastructure Delivery Plan

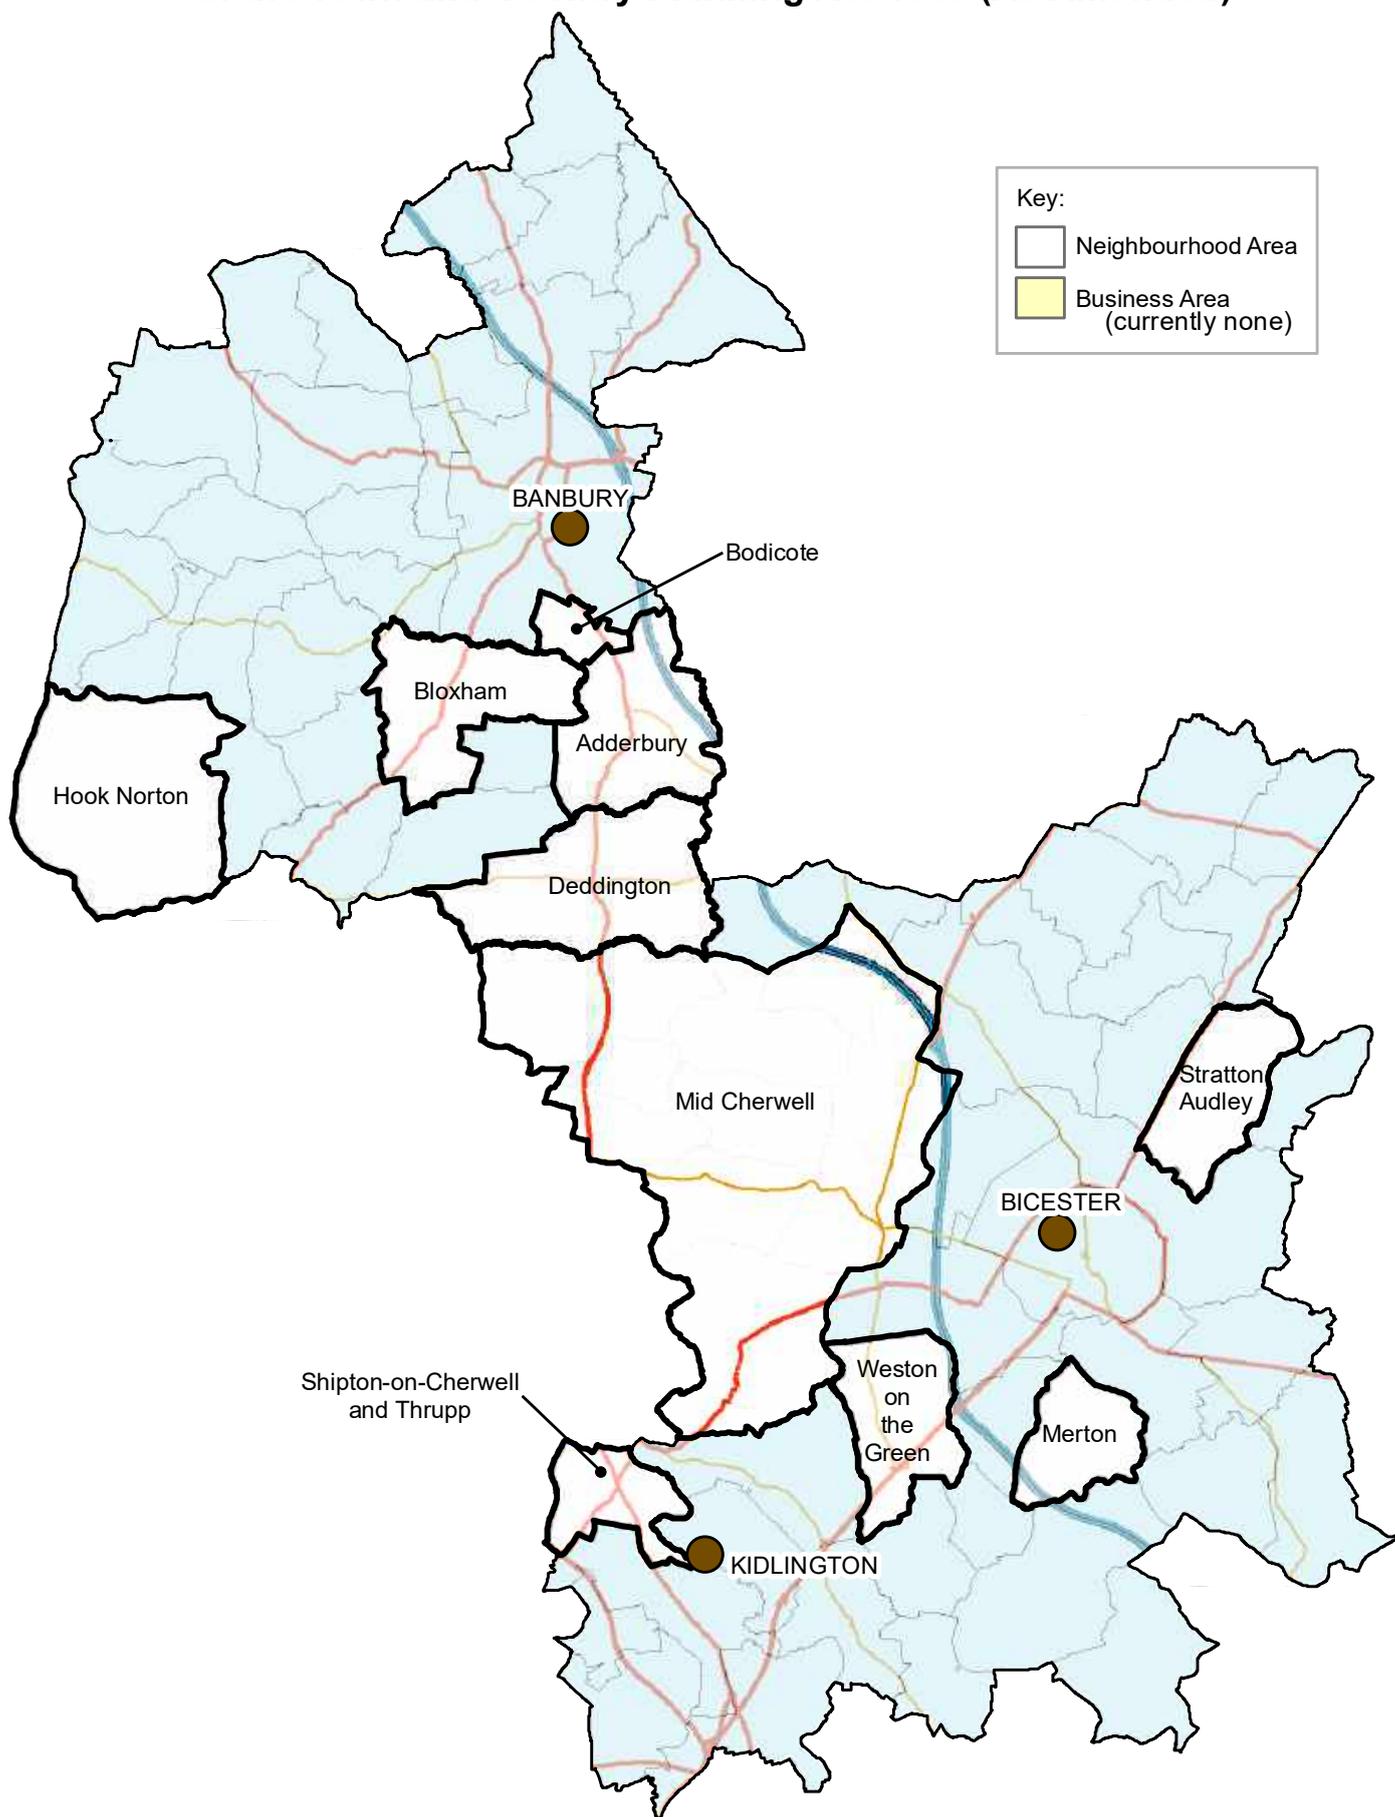

Duty to Cooperate

Reference	Title	Local Plan Indicators	Target
DTC 1	Duty to cooperate – Partial Review of the Cherwell Local Plan Part 1	Meet milestones for Partial Review of the Cherwell Local Plan Part 1 as set out in the Local Development Scheme (Nov 2014)	Adoption of a Partial Review of the Cherwell Local Plan 2011-31 Part 1 addressing wider unmet need within the housing market area within 2 years of Local Plan Part 1 adoption.

- Neighbourhood Area
- Business Area (currently none)

Appendices

Appendix 6: Summary of Infrastructure Updates – December 2019

Bicester Projects

No. Project	BICESTER Projects	Main aim	Priority Critical Necessary Desirable	Update
Transport and movement				
(1) Comp	East West Rail Phase 1 – Oxford to Bicester Village Station (formerly known as Evergreen 3) New station at Oxford Parkway (Water Eaton), upgrades to the current stations at Islip and Bicester Village and a new fast Chiltern Railways service between Oxford and London Marylebone	Supporting economic growth and new homes with better access to the national rail network	Necessary	Completed in Autumn 2015
(2) Comp	Introducing bus facilities at Bicester Village Station, including a bus turning head and new bus stops on London Road	Improving access and facilities at train stations	Critical	Completed
(7b) Comp	Ensuring delivery of high-quality public transport from all Strategic Sites to Bicester Town Centre and Rail Stations: South West Bicester Phase 1	Improving access and facilities at town centres and train stations	Critical	Completed
(7c) Comp	Ensuring delivery of high-quality public transport from all Strategic Sites to Bicester Town Centre and Rail Stations: North West Bicester Ecotown Phase 1 (Exemplar site)	Improving access and facilities at town centres and train stations	Critical	Completed
(9) Comp	Cycle parking facilities at Bicester Village station	Improving access and facilities at train stations at Bicester North. Some cycle parking has already been installed	Desirable	Completed
(10) Comp	New bus interchange hub in Manorsfield Road and 500 space multi-storey car park		Necessary	Completed in July 2013
(10a) Comp	Oxford Road corridor: Pingle Drive access	Improvements to strategic highways capacity – Reduce traffic congestion into the Tesco and Bicester Village development and implement a park and ride at South West Bicester	Necessary	Completed in January 2017
(10b) Comp	A41 Oxford Road corridor: Widening of A41 for right and left turn lanes and new signalised crossing	Improvements to strategic highways capacity – Reduce traffic congestion into the Tesco and Bicester Village development and implement a park and ride at South West Bicester	Necessary	Completed
Comp	Central corridor: Improve Queens Avenue junction with the Community College junction to provide a better pedestrian environment	To improve pedestrian environment and provide environmental improvements	Necessary	Completed
(11) Comp	Bringing Bicester area bus stops to Premium Route standard: Town Centre	To reduce traffic congestion, provide environmental improvements and increase attractiveness of the town centre	Necessary	Completed in July 2013
(13) Comp	Park & Ride to serve Bicester town centre, employment and rail stations, Bicester Village and Oxford. South West of Bicester	To reduce traffic congestion, provide environmental improvements and increase attractiveness of the town centre	Necessary	Completed in November 2015
(13a) Comp	Improvements to Middleton Stoney Road roundabout western end: Shakespeare Drive and Howes Lane roundabouts	To improve journey time reliability and traffic flow while improving access for all forms of transport	Necessary	Completed
(14a) Comp	M40 Motorway capacity enhancements: M40, Junction 9	Improvements to strategic highways capacity	Critical	Completed Spring 2015
(14b) Comp	M40 Motorway capacity enhancements: M40, Junction 10	Improvements to strategic highways capacity	Critical	Completed Spring 2015
(16) Comp	Bicester Strategic Highway Improvements: South West Peripheral Route (Vendee Drive)	Improvements to strategic highways capacity To improve journey time reliability and traffic flow while improving access for all forms of transport To facilitate integration of new development with the town	Critical	Completed in April 2012
(16a) Comp	Highway capacity improvements to peripheral routes: Western corridor. Improvements to Howes Lane / Bucknell Road Junction: North West Bicester Ecotown Phase 1	Improvements to strategic highways capacity To improve journey time reliability and traffic flow while improving access for all forms of transport To facilitate integration of new development with the town	Critical	Completed
(17a) Comp	A41 Oxford Road corridor: A41 Oxford Road / Boundary Way roundabout	Improvements to strategic highways capacity – Reduce traffic congestion into the Tesco and Bicester Village development and implement a park and ride at South West Bicester	Necessary	Completed in January 2017
(17h) Comp	Bicester pedestrian and cycle links – Footpath and appropriate signage from Priory Lane to Bicester Village Station	Physical improvements to cycling and walking routes to key destinations. Deliver improved cycle/footpath links around the town and into the neighbourhoods to encourage visits to the town centre and sustainable travel.	Necessary	Completed
Comp	Bicester pedestrian and cycle links – Pedestrian crossing over South West Perimeter Road (Vendee Drive), Oxford Road and Middleton Stoney Roads	Physical improvements to cycling and walking routes to key destinations. Deliver improved cycle/footpath links around the town and into the neighbourhoods to encourage visits to the town centre and sustainable travel.	Necessary	Completed
Comp	Bicester pedestrian and cycle links – Jubilee Ride 9.5-mile circular equestrian / mountain bike route to the north of Bicester	Improving public rights of way	Desirable	Completed

No. Project	BICESTER Projects	Main aim	Priority Critical Necessary Desirable	Update
(19a) Comp	Town centre access improvements Phase 1: Sheep Street and Manorsfield Road junction improvements (junctions remodelled)	To improve journey time reliability and traffic flow while improving access for all forms of transport – including buses, cyclists and pedestrians to improve access to Bicester town centre and sustainable travel	Necessary	Completed in July 2013
(20) Comp	Bicester Wayfinding Project	Improve facilities for pedestrians with better legibility and wayfinding to key facilities	Desirable	Completed
(21a) Comp	Improvements to Middleton Stoney Road Roundabout western-end: Shakespeare Drive and Howes Lane roundabouts	To improve journey time reliability and traffic flow while improving access for all forms of transport	Necessary	Completed
(23) Comp	Improvements to St. John's Street and the 5-arm junction at the northern end of Field Street . to allow for 2-way traffic, linking with the Bus Interchange and Bure Place	To reduce traffic congestion and provide environmental improvements	Necessary	Completed in July 2013
(24b) Comp	Vehicle charging points installed at Bicester North Rail Station and Bure Place	To reduce pollution from road traffic.	Desirable	Completed
(26a) Comp	Bicester pedestrian and cycle links: Northwest Bicester (Phase 1- Exemplar site) to town centre - implementation of new cycle route on the B4100 from site to Lord's Lane junction and across Lord's Lane	Physical improvements to cycling and walking routes to key destinations. Deliver improved cycle/footpath links around the town and into the neighbourhoods to encourage visits to the town centre and sustainable travel.	Necessary	Completed
(26e) Comp	Bicester Pedestrian and cycle links Bridge Over Railway - Tubbs Crossing	Bridge to facilitate access over railway replacing level crossing	Necessary	Completed
(4b) Del	London Road level crossing solution – pedestrian/cycle link	To avoid severance of town centre from the development areas to the south east of the town	Necessary	Project DELETED from IDP given its removal from OCC capital programme. A scheme remains for road access: 3b London Road level crossing - vehicular solution
1	East West Rail Phase 2 - Oxford to Milton Keynes, Bletchley to Bedford	Supporting economic growth and new homes with better access to the national rail network.	Necessary	Public Inquiry into the western section to take place in February 2019. Advance works are already started (removal of track) under existing Network Rail powers.
(7) Comp	Cycle parking facilities at Bicester North station	Improving access and facilities at train stations at Bicester North. Some cycle parking has already been installed	Desirable	Completed
(14a) Comp	Electric vehicle initiatives. Charging points at Bicester North and Bicester Village Stations, Elmsbrook, Sainsbury's at Pioneer Square, Bicester Little Chef and Grovesbury Cars	To reduce pollution from road traffic.	Desirable	Completed
(15a) Comp	Car Club at Elmsbrook (NW Bicester Phase 1)	To reduce pollution from road traffic.	Desirable	Completed
Pipeline	A34 Oxford to Cambridge Expressway	Improvements to strategic highways capacity	TBC	Part of the Government's Road Investment Strategy, commissioned by the Department for Transport Preferred corridor B 'east-West Rail route' announced in September 2018 Announcement of preferred route in 2020 Commencement of work in 2025 Expressway opening in 2030
Pipeline	Investigating and delivering better cycle routes to Bicester Village station.	Improving access and facilities at train stations at Bicester North. Some cycle parking has already been installed	Desirable	Projects to be aligned with the Bicester Sustainable Transport Strategy published in October 2015 with project plan currently under development
Pipeline	Investigating and delivering better cycle routes to Bicester North station.	Improving access and facilities at train stations at Bicester North. Some cycle parking has already been installed	Desirable	Projects to be aligned with the Bicester Sustainable Transport Strategy published in October 2015 with project plan currently under development
Pipeline	Strategic Road Network: A new motorway junction at Arncott, Bicester (new motorway junction and link road)	Improvements to strategic highways capacity	TBC	Garden town project investigating a motorway option to take strategic highway traffic away from the town and reduce congestion on key links. Currently at project development stage
Pipeline	Highway capacity improvements to peripheral routes: eastern corridor. Skimmingdish Lane dualling and signalisation of junctions.	Improvements to strategic highways capacity	Critical	Progression of IDP scheme 9a
Pipeline	Highway capacity improvements to peripheral routes: eastern corridor. Provision of a new south east link road (western end)	Improvements to strategic highways capacity	Critical	South East link road option now identified by OCC. Both projects are now part of IDP scheme 9c Highway capacity improvements to peripheral routes: southern corridor Provision of new highway link in the form of a south east perimeter road

No. Project	BICESTER Projects	Main aim	Priority Critical Necessary Desirable	Update
Pipeline	Highway capacity improvements to peripheral routes: eastern corridor. Provision of a new south east link road -section from A41 Pioneer Road junction to Gavray Drive junction on Wretchwick Way	Improvements to strategic highways capacity	Critical	South East link road option now identified by OCC. Both projects are now part of IDP scheme 9c Highway capacity improvements to peripheral routes: southern corridor Provision of new highway link in the form of a south east perimeter road
Pipeline	The Causeway	Physical improvements to cycling and walking routes to key destinations. Deliver improved cycle / footpath links around the town and into the neighbourhoods to encourage visits to the town centre and sustainable travel	Necessary	Projects to be aligned with the Bicester Sustainable Transport Strategy published in October 2015 with project plan currently under development.
Pipeline	Increasing long term highway capacity. New M40/Southam Road slip roads	Improvements to strategic highways capacity	TBC	Whilst a new link road east of M40 J11 (Overthorpe Road to A422) was an option to increase long term highway capacity reported in the 2018 IDP, OCC are currently exploring a solution incorporating new slip roads onto the M40 at Southam Road. Optioneering for this proposal will take place during 2019/20; consultation will be undertaken at the project level and through LTCP5.
Education				
(22) Comp	Primary school (1 x 2FE) - North West Bicester phase 1 – Exemplar site (Elmsbrook) Gagle Brook Primary School	Expand the schools and colleges provision to match the needs of residents and businesses. Provide opportunities for local people to improve the quality of their life: Skills, training and education	Critical	School opened in 2018 as a 1 FE. Timing of expansion to 2FE will depend on housing delivery.
(31) Comp	Expansion and relocation of St Edburg's Primary - Southwest Bicester phase 1 (Kingsmere) 2FE with inclusive Foundation Stages	Expand the schools and colleges provision to match the needs of residents and businesses. Provide opportunities for local people to improve the quality of their life: Skills, training and education	Critical	Completed
(33a) Comp	New secondary school provision to accommodate growth to 2031: Expansion of The Cooper School	Expand the schools and colleges provision to match the needs of residents and businesses. Provide opportunities for local people to improve the quality of their life: Skills, training and education	Critical	Completed
(33d) Comp	Bicester Technology Studio	Expand the schools and colleges provision to match the needs of residents and businesses. Provide opportunities for local people to improve the quality of their life: Skills, training and education	Critical	Completed
Utilities				
(34) Comp	Waste water treatment - foul drainage Upgrading sewage treatment works near Horton and Horley	Ensure utilities infrastructure grows at the same rate as communities	Critical	Completed
(42) Comp	Biomass Boiler - Bicester Leisure Centre	Ensure utilities infrastructure grows at the same rate as communities	Desirable	Completed
(43) Comp	Bicester Green Reuse Centre McKay Trading Estates	Ensure utilities infrastructure grows at the same rate as communities	Necessary	Completed
33 a, b, c	Reinforcement of existing electricity network: East Claydon to Bicester	Ensure utilities infrastructure grows at the same rate as communities	Critical	The entire 18.6km route from East Claydon to the new grid substation at Bicester North is now ducted, with over 80% of this being cabled and jointed successfully. The next phase is to build the resilience of the local electricity infrastructure, this has commenced.
34a Comp	Bicester Green Reuse Centre temporary relocation to Claydon's Yard	Ensure utilities infrastructure grows at the same rate as communities	Necessary	Temporary relocation
35a	CHP and use of heat from Ardley Energy Recovery Facility: North West Bicester 12.5 MW supply capacity from Ardley 5.3 km transmission length	Ensure utilities infrastructure grows at the same rate as communities	Desirable	Feasibility completed, project no being pursued at this stage.
Flood risk				
(45) Comp	Realignment of the River Bure	Reduce probability of flooding	Critical	Completed
Emergency and rescue services				

No. Project	BICESTER Projects	Main aim	Priority Critical Necessary Desirable	Update
39b NEW	Provision of touchdown police facilities as part of community facilities	Ensure emergency and rescue infrastructure grows at the same rate as communities	Necessary	New scheme to be explored as part of provision of community facilities
Health				
(48) Comp	Conversion of existing non-GP space at Bicester Health Centre to create the additional capacity needed in East Bicester and Upper Heyford	Ensure health infrastructure grows at the same rate as communities	Critical	Completed
(50a) Comp	Bicester Community Hospital	Ensure health infrastructure grows at the same rate as communities	Critical	Completed in December 2014
Community Infrastructure				
(55) Comp	Civic Building within the Town Centre Redevelopment: Relocated and expanded library	Ensure social infrastructure grows at the same rate as communities and there are opportunities for culture and leisure	Necessary	Completed
(56) Comp	Adult Learning Service within the Town Centre Redevelopment – Bicester Adult Learning Centre	Ensure social infrastructure grows at the same rate as communities	Necessary	Completed
43	Sports Facilities Strategy, October 2018 The strategy identifies future needs for sport and recreation up to 2031.	Ensure social infrastructure grows at the same rate as communities and there are opportunities for culture and leisure	Necessary	Sports Facilities Strategy completed. Projects to address needs to be identified in 2019
(43d) Comp	Community facility/centre - South West Bicester Phase 1 (Kingsmere) South West Bicester Phase 2 – expected to be served by provision at SW Phase 1 with an increase in size to accommodate increased use.	Ensure social infrastructure grows at the same rate as communities and there are opportunities for culture and leisure	Necessary	Completed in September 2018
(44) Del.	Increased floor area of community facilities built to support increased demand for Adult Learning 40m2 increased floor space at 2 centres	Ensure social infrastructure grows at the same rate as communities and there are opportunities for culture and leisure	Necessary	Project DELETED – No longer pursued by County Council, it does not directly affect implementation of local plan policies
(45) Del.	Older People's Resource Centre integrated within a new Extra Care Housing development	Ensure social infrastructure grows at the same rate as communities and there are opportunities for culture and leisure	Necessary	Project DELETED – No longer pursued by County Council, it does not directly affect implementation of local plan policies
(46) Del.	Early Years Facilities. Increased floor area of community facilities Increase of 30m2 at four centres	Ensure social infrastructure grows at the same rate as communities and there are opportunities for culture and leisure	Necessary	Project DELETED – No longer pursued by County Council, it does not directly affect implementation of local plan policies
(48) Del.	Early Intervention Hub - Expansion of facilities in the town centre Increase of 15m2 at four centres	Ensure social infrastructure grows at the same rate as communities and there are opportunities for culture and leisure	Necessary	Project DELETED – No longer pursued by County Council, it does not directly affect implementation of local plan policies
(49) Del.	Expansion of Registration Service	Ensure social infrastructure grows at the same rate as communities and there are opportunities for culture and leisure	Necessary	Project DELETED – No longer pursued by County Council, it does not directly affect implementation of local plan policies
(50) Del.	Expansion of Health and Wellbeing Centre, Launton Road	Ensure social infrastructure grows at the same rate as communities and there are opportunities for culture and leisure	Necessary	Project DELETED – No longer pursued by County Council, it does not directly affect implementation of local plan policies
(43d) Comp	Community facility/centre - South West Bicester Phase 1 (Kingsmere) South West Bicester Phase 2 – expected to be served by provision at SW Phase 1 with an increase in size to accommodate increased use.	Ensure social infrastructure grows at the same rate as communities and there are opportunities for culture and leisure	Necessary	Completed in September 2018
(46) NEW	The provision of public art to enhance the quality of the place, legibility and identity. Installation of public art including participatory workshop in SW Bicester	Improve health, social and cultural wellbeing	Desirable	Participatory workshop in progress. Artwork installed including: mosaic panels, wooden benches, metal pergola and marker post
(47) Comp	The provision of public art to enhance the quality of the place, legibility and identity. Installation of 'The Magical Forest' public art featuring silver birch lit trees forming an entrance feature to Bicester Village (on the former Tesco site)	Improve health, social and cultural wellbeing	Desirable	Completed
Open space, recreation and biodiversity				
53	Playing Pitches and Sports Facilities strategies. Identify future needs for sport and recreation up to 2031 taking into account the housing requirements in the adopted Cherwell Local Plan 2011-2031 (Part 1)	Ensure play and sports infrastructure grows at the same rate as communities and current deficiencies in provision are addressed	Necessary	Playing Pitches and Sports Facilities strategies completed in 2018. Projects addressing need to be identified in 2019.
(53c) Comp	Whitelands Sports Village Phase 1 and 2 P1- construction of grass pitches (full size rugby compliant) P2- pavilion and car park P3a – 3G synthetic pitch	Ensure play and sports infrastructure grows at the same rate as communities and develop competition level facilities	Necessary	Completed
Pipeline	Ecological enhancement and restoration opportunities in the Rivers Cherwell and Ray Catchment Areas (Rivers Cherwell and Ray Catchment Plan)	To identify ecological enhancement and restoration opportunities in the catchments and prioritise them	Desirable	Rivers Cherwell and Ray Catchment Plan due to be agreed by the Cherwell and Ray Catchment Partnership. Funding will be sought by the partnership to carry out the work

Banbury Projects

No. Project	BANBURY Projects	Main aim	Priority Critical Necessary Desirable	Update
Transport and movement				
(3) Comp.	Multi-storey car parks to serve Banbury railway station (700 space)	Deliver new railway station car park without increasing traffic congestion	Desirable	Completed
(3) Comp	Calthorpe Street Multi-storey car park	Rationalisation of existing car parking sites to be replaced with new multi-storey parking integrated into the planned commercial and employment areas	Necessary	Completed
(10a) Comp.	Delivering bus stop improvements to a Premium Route standard: Routes S4	New or improved bus services Improve the transport and movement networks into and through the town	Necessary	Completed
(10b) Comp.	Delivering bus stop improvements to a Premium Route standard: Routes B1, B2, B5 and B8	New or improved bus services Improve the transport and movement networks into and through the town	Necessary	Completed
(16b) Comp.	Vehicle charging point installed at Banbury Railway Station	To reduce pollution from road traffic.	Desirable	Completed
(24) Comp.	Grimsbury environmental improvements - East Street and Centre Street	Improvements to public realm	Necessary	Completed in February 2013.
(9a) Comp.	Bus service from Bankside developments (Longford Park)	New or improved bus services	Critical	Completed, service commenced in November 2017.
(7) Comp	Developing interurban services through enhancements or new services: Improving the Oxford to Banbury bus service (especially on the Banbury to Deddington section) and quality of bus, along with equipping vehicles with real-time information equipment Improve the frequency of the Deddington to Banbury bus service.	New or improved bus services	Necessary	Improvements made to Banbury to Oxford S4 service. Deddington Service has been withdrawn for commercial unviability reasons.
(8) Comp	Improve the frequency of the Bloxham to Banbury bus service	New or improved bus services	Desirable	Frequency has been stabilised at one bus per hour
(9b) Comp	Bus link between Bridge Street and Tramway Road to better serve the railway station, Canalside redevelopment and Longford Park (Bankside);	New or improved bus services Improve the transport and movement networks into and through the town	Necessary	New service to Warwick Road (B9 service) also serving the western end of Dukes Meadow Drive. New B4 route serves the eastern end of Dukes Meadow Drive. Community Transport Service now covering the Daimler A venue section of the B8 service.
(9c) Comp	Bus service from Hardwick Farm/Southam Road to town centre	New or improved bus services Improve the transport and movement networks into and through the town	Necessary	Completed
(9d) Comp	Bus service linking development sites to the town centre via Highlands and Longelandes Way	New or improved bus services Improve the transport and movement networks into and through the town	Necessary	Completed
12	Improving the routing, quality and level of bus services and facilities to employment areas and new residential areas.	New or improved bus services Improve the transport and movement networks into and through the town	Desirable	A trial service started in November 2017 to extend the B5 service from Bretch Hill across to Ermont Way during peak periods. It has not been a popular service and is being withdrawn in January 2019.
(19b) Comp	Provide footways and cycleways from all Strategic Sites: Improve track from Hanwell Fields to A361 Southam Road with surface and safety improvements for walking and cycling.	Improving cycling and walking routes Provide sustainable movement routes for pedestrians and cyclists	Desirable	Completed
(22) Comp	Potential crossing upgrades. Cycle and pedestrian way on Dukes Meadow Drive and Southam Road	Improving cycling and walking routes Provide sustainable movement routes for pedestrians and cyclists	Desirable	Completed
Pipeline	Increasing long term highway capacity: Link Road East of M40 J11 (Overthorpe Road to A422)	Improving capacity of the highways network and anticipated traffic growth at M40 Junction 11	TBC	New schemes from LTP4
Pipeline	Increasing long term highway capacity: Potential link road crossing from Tramway to Higham Way or a South East Link Road	Improving capacity of the highways network and anticipated traffic growth at M40 Junction 11	TBC	New schemes from LTP4
Education				
(32) Comp.	2FE primary school - Bankside Phase 1 & 2 (Longford Park Primary School	Expand the schools and colleges provision to match the needs of residents and businesses.	Critical	Longford Park Primary School opened in September 2017 as a 1.5 FE school. Expansion to 2FE not yet scheduled. It will depend on housing delivery.

No. Project	BANBURY Projects	Main aim	Priority Critical Necessary Desirable	Update
		Provide opportunities for local people to improve the quality of their life: Skills, training and education		
33	Expansion of one or more existing schools to the equivalent of at least 1FE primary school (to serve Warwick Rd & Bretch Hill and Drayton Lodge Farm)	Expand the schools and colleges provision to match the needs of residents and businesses. Provide opportunities for local people to improve the quality of their life: Skills, training and education	Critical	Recent expansions of Hill View and Hanwell Fields provide sufficient capacity for now; further expansion may still be required in the longer term
(36) Comp.	School expansions at Hanwell Fields Primary School and Hill View Primary School	Expand the schools and colleges provision to match the needs of residents and businesses. Provide opportunities for local people to improve the quality of their life: Skills, training and education	Critical	Completed
(35) Comp.	School expansion to 2 FE at Queensway Primary School	Expand the schools and colleges provision to match the needs of residents and businesses. Provide opportunities for local people to improve the quality of their life: Skills, training and education	Critical	Completed
Utilities				
(34) Comp.	Waste water treatment - foul drainage Upgrading sewage treatment works near Horton and Horley	Ensure utilities infrastructure grows at the same rate as communities	Critical	Completed
Pipeline	Potential water conservation measures resulting from emerging Water Cycle Study supporting new Local Plans	Ensure utilities infrastructure grows at the same rate as communities and respond to Climate change and Water Stress	Necessary	New schemes to be explored
Flood risk				
(42) Comp.	Banbury Flood Alleviation scheme	Reduce probability of flooding	Critical	Completed in 2012
Emergency and rescue services				
No updates				
Health				
No updates				
Community Infrastructure				
(59) Comp	Improvements to Woodgreen Leisure Centre	Ensure social infrastructure grows at the same rate as communities	Necessary	Completed
(58) Comp.	Improvements to the Sunshine Centre Phase 1 – Internal works	Ensure social infrastructure grows at the same rate as communities	Necessary	Completed
56	Sports Facilities Strategy, October 2018 The strategy identifies future needs for sport and recreation in Cherwell to 2031.	Ensure social infrastructure grows at the same rate as communities	Necessary	Strategy completed. Projects addressing need to be identified in 2019.
56	Sports Facilities Strategy, October 2018 The strategy identifies future needs for sport and recreation in Cherwell to 2031.	Ensure social infrastructure grows at the same rate as communities	Necessary	Strategy completed. Projects addressing need to be identified in 2019.
(65) Comp.	Expansion of the Health & Wellbeing Centre - Stanbridge House Re-provision of Banbury Resource Centre as part of new extra care	Ensure social infrastructure grows at the same rate as communities	Necessary	Completed
(62) NEW	Provision of public art to enhance the quality of the place, legibility and identity. Installation of public artwork at Central M40, Banbury	Improve health, social and cultural wellbeing	Desirable	Artist appointed to create 'The Figure of Industry' sculpture
(63) NEW	Provision of public art to enhance the quality of the place, legibility and identity. Installation of public artwork at Oxford and Cherwell College, Broughton Road, Banbury	Improve health, social and cultural wellbeing	Desirable	Artist commissioned by the college for the project
(64) NEW	Provision of public art to enhance the quality of the place, legibility and identity. Installation of public artwork at Crown House, Bridge Street, Banbury	Improve health, social and cultural wellbeing	Desirable	Artist commissioned to create artwork for the walkway
(65) NEW	Provision of public art to enhance the quality of the place, legibility and identity. Installation of public artwork at Broughton Road, Banbury	Improve health, social and cultural wellbeing	Desirable	Artist commissioned to create either a feature or seating
60	Exploring provision of community hub facilities that enable multi agency facilities to be co-located including provision of library accommodation of an appropriate size.	Project changed from increasing size of existing library to facilitating community hub facilities with library accommodation		
(61) Del.	Adult Learning Service – Spiceball Development Area	Project DELETED - No longer pursued by County Council, it does not directly affect implementation of local plan policies.		
(62) Del.	Early Intervention Centre – Increase of 15m2 at two centres	Project DELETED - No longer pursued by County Council, it does not directly affect implementation of local plan policies.		

No. Project	BANBURY Projects	Main aim	Priority Critical Necessary Desirable	Update
(63) Del.	Registration Service – Bodicote House	Project DELETED - No longer pursued by County Council, it does not directly affect implementation of local plan policies.		
(65) Del.	Increased floor area of community facilities built to support increased demand for Adult Learning 40 m2 increased floor space at one centre	Project DELETED - No longer pursued by County Council, it does not directly affect implementation of local plan policies.		
(66) Del.	Early Years Facility Increased floor area of community facilities 30 m2 increased floor space at 4 centres	Project DELETED - No longer pursued by County Council, it does not directly affect implementation of local plan policies.		
Open space, recreation and biodiversity

Summary	15

Executive Summary

My examination has concluded that the Weston-on-the-Green Neighbourhood Plan should proceed to referendum, subject to the Plan being amended in line with my recommended modifications, which are required to ensure the plan meets the basic conditions. The more noteworthy include –

- That the changes proposed by CDC to Policy E1 be accepted.
- That the proposed change to Policy C1 not be accepted and that Policy C1 should be deleted from the plan although reference to the community's aspirations for The Schoolfield site, under the consequential changes can be retained in the document.

Introduction

1. Neighbourhood planning is a process, introduced by the Localism Act 2011, which allows local communities to create the policies which will shape the places where they live and work. The Neighbourhood Plan provides the community with the opportunity to allocate land for particular purposes and to prepare the policies which will be used in the determination of planning applications in their area. Once a neighbourhood plan is made, it will form part of the statutory development plan alongside the adopted Cherwell Local Plan 2011-2031. Decision makers are required to determine planning applications in accordance with the development plan unless material considerations indicate otherwise.
2. The neighbourhood plan making process has been led by Weston-on-the-Green Parish Council. A Steering Group was appointed to undertake the plan preparation made up of both parish councillors and local volunteers. Weston-on-the-Green Parish Council is a “qualifying body” under the Neighbourhood Planning legislation.
3. This report is the outcome of the second examination of the Submission Version of the Weston-on-the-Green Neighbourhood Plan. The plan was originally submitted to Cherwell District Council in 2018 and was the subject of independent examination carried out by Timothy Jones QC, an experienced planning barrister and examiner, who issued his report on 11th September 2019.
4. This examination is what is known as a partial examination which is only looking at the District Council's responses to a specific number of the recommended modifications, namely Modification 15 which relates to Policy E1, Modification 21 which relates to Policy C1 and consequential modifications to the plan set out as Modifications 24, 26 and 27. It is being conducted under the provisions of Paragraph 13(2) of Schedule 4B of the Town and Country Planning Act 1990.
5. The District Council has already agreed in its Decision Statement dated 4th November 2019 to accept all the other modifications recommended by the original examiner. At that time, it resolved not to put the plan to referendum presumably until these remaining matters had been resolved. However, in the light of the COVID 19 crisis, subsequent legislation dictates that a referendum cannot be held until at least May 2021.
6. Following the issuing of Secretary of State amended guidance, upon the issuing of the Decision Statement under Regulation 19 by Cherwell District Council, on how it intends to respond to the first set of modifications, those policies including those modified, will be accorded *significant weight* in development management decisions, until such time as a referendum can be held. The two policies the subject to this partial examination cannot be given such weight as they are dependent on the outcome of this examination and the decisions that Cherwell DC take on my recommendations.

The Examiner's Role

7. I was appointed by Cherwell District Council in March 2020, with the agreement of Weston-on-the-Green Parish Council to conduct this partial examination.
8. In order for me to be appointed to this role, I am required to be appropriately experienced and qualified. I have over 41 years' experience as a planning practitioner, primarily working in local government, which included 8 years as a Head of Planning at a large unitary authority on the south coast, but latterly as an independent planning consultant and director of John Slater Planning Ltd. I am a Chartered Town Planner and a member of the Royal Town Planning Institute. I am independent of both Cherwell District Council and Weston-on-the-Green Parish Council. I can confirm that I have no interest in any land that is affected by the Neighbourhood Plan.
9. Under the terms of the neighbourhood planning legislation, I am required to make one of three possible recommendations:
 - That the plan should proceed to referendum on the basis that it meets all the legal requirements.
 - That the plan should proceed to referendum, if modified.
 - That the plan should not proceed to referendum on the basis that it does not meet all the legal requirements
10. In examining the Plan on the limited basis of my remit, I will only be addressing the following legal questions as they relate to the proposed policies.
 - Do the specific policies relate to the development and use of land for a Designated Neighbourhood Plan area in accordance with Section 38A of the Planning and Compulsory Purchase Act 2004?
 - Do the specific policies relate to matters which are referred to as "excluded development"?
11. All the other legal matters, that are set out in the legislation, have already been dealt with by the original examiner, including the plan period and confirmation that there are no other neighbourhood plans affecting this plan area.
12. I am able to confirm that the Plan does relate only to the development and use of land, covering the area designated by Cherwell District Council, for the Weston-on-the-Green Neighbourhood Plan, on 2nd November 2015, *if it is modified in accordance with my recommendations*.
13. I can confirm that the policies do not cover "excluded development".

The Examination Process

14. The presumption is that the neighbourhood plan will proceed by way of an examination of written evidence only. However, the Examiner can ask for a public hearing in order to hear oral evidence on matters which he or she wishes to explore further or if he considers a person has a fair chance to put a case.

15. I am required to give reasons for each of my recommendations and also provide a summary of my main conclusions.
16. I visited the parish of Weston-on-the-Green on Friday 20th March 2020. I initially toured the village and saw the general disposition of development, both inside and outside of the Green Belt. Driving through the village, I saw the housing allocation site at the northern fringes of the village before seeing the airfield to the north of the parish. On returning to the village, I also noted the protected green spaces. However, the next stage of my visit concentrated on The Schoolfield site. I parked in the village hall car park and then using the rights of way, I spent some time crossing and re crossing the site and saw for myself its relationship with the rest of the conservation area. On returning to my car, I saw the site from North Lane, Shepherd Lane and Westlands Avenue. I then visited each of the sites which were identified as HEELA sites in Appendix F of the plan, including Fir Tree Farm.
17. On 23rd March 2020, I issued a preliminary document entitled *Initial Comments* which asked specific questions of the Parish Council, the District Council and Pegasus Group on behalf of Lagan Homes. My initial view was that I would be able to conduct the examination solely on the basis of the written material. I received a response from Pegasus Group on 14th April 2020 and from the two councils on 21st April 2020. The information in these responses introduced new material which prompted me to conclude that I needed to hear oral representations, to explore some of these matters and their implications for the examination, in greater detail.
18. Unfortunately, due to the restrictions imposed, as a result of the COVID 19 outbreak, the submission of these oral representations could only be conducted, “virtually” via “teleconferencing” The Secretary of State had a couple of weeks earlier, issued PPG advice that these would be appropriate for neighbourhood plan examinations, where needed. I therefore issued a further document entitled “Further Comments of the Independent Examiner” on 30th April 2020, which indicated my decision and the topics that would be covered. Prior to the conference call taking place, via a video platform, (facilitated by Cherwell District Council), the District Council circulated a legal note as to the status of a Section 52 agreement, that had been referred to in the Parish Council’s response to my Initial Comments paper, plus an Inspectors decision letter in respect of a dismissed appeal for a site immediately to the north of the Site A allocation site.
19. The video conference took place on 19th May and lasted three hours and a record of that session is available on the following You Tube site via this link <https://www.youtube.com/watch?v=LrUKA2VNtdc&feature=youtu.be>
20. I wish to express my gratitude for the contributions and positive engagement of all contributors, for what was a new experience for all of us.

The Consultation Process

21. On 4th November 2019, the District Council’s Executive considered the Examiners Report and resolved to accept all his recommendations with the exception of Modifications 15,21,24,26 and 27 and agreed the Proposed Changes to the two policies, E1 and C1 and the other consequential changes. It agreed that these

changes should be the subject of a period of further consultation, as allowed by Regulation 19 of the Neighbourhood Planning Regulations. This was the subject of a public consultation period, that ran from 15th November 2019 to 10th January 2020 and as a result 7 responses were received from:

- Scottish and Southern Electricity Network
- Environment Agency
- Natural England
- Oxfordshire County Council
- Weston-on-the-Green Parish Council
- Highways England
- The Pegasus Group on behalf of Lagan Homes

The Basic Conditions

22. The Neighbourhood Planning Examination process is different to a Local Plan Examination, in that the test is not one of “soundness”. The Neighbourhood Plan is tested against what is known as the Basic Conditions which are set down in legislation. It will be against these criteria that my examination must focus.

23. The five questions, which seek to establish that the Neighbourhood Plan meets the basic conditions test, are: -

- Is it appropriate to make the Plan having regard to the national policies and advice contained in the guidance issued by the Secretary of State?
- Will the making of the Plan contribute to the achievement of sustainable development?
- Will the making of the Plan be in general conformity with the strategic policies set out in the Development Plan for the area?
- Will the making of the Plan breach or be otherwise incompatible with EU obligations or human rights legislation?
- Will the making of the Plan breach the requirements of Regulation 8 of Part 6 of the Conservation of Habitats and Species Regulations 2017?

24. The neighbourhood plan was submitted before 24th January 2019, which was the cut-off date set in paragraph 214 of the 2018 version of the NPPF that stated, that under the transitional arrangements, examinations would be conducted having regard to the 2012 version of the NPPF.

Compliance with the Development Plan

25. To meet the basic conditions test, the Neighbourhood Plan is required to be in general conformity with the strategic policies of the Development Plan, which in this case is the Cherwell Local Plan, adopted in July 2015 and the saved policies of the Cherwell Local Plan 1996.

26. In the adopted local plan, Weston-on-the-Green is identified as a Category A village in Policy Villages 1. Policy Villages 2 states that a total of 750 homes will be provided within this category of settlement, in addition to small sites, windfall and planning permissions for 10 or more dwellings. The selection of sites can be through the preparation of neighbourhood plans and the policy sets a range of criteria, for considering the acceptability of sites. Policies for the Green Belt are set out in Policy ESD 14.
27. Other policies relevant to this examination, as they have been quoted by Cherwell District Council in their reasons for not accepting the first Examiner's recommendations, are Policy ESD 10: Protection and Enhancement of Biodiversity and the Natural Environment, Policy ESD 13: Local Landscape Protection and Enhancement and Policy ESD 15 The Character of the Built and Historic Environment.

Compliance with European and Human Rights Legislation

28. The original Examiner, in paragraph 28 of his report, confirmed that he had no issues of compatibility or breaches of European obligations and would be compatible with the requirements of the Conservation of Habitat and Species Regulations. I do not believe that the matters the subject of this examination would change that conclusion, but the District Council as Competent Authority may choose to formally screen the amended plan under the Habitat Regulations.
29. The previous Examiner also considered that there is no conflict with the Human Rights Act and my recommendations will not change that situation.

Policies C1 and E1: An Overview

30. In the context of the two policies at the heart of this examination, Policies C1 and E1, it is clear that the first examiner had concerns that the extent of constraints affecting the village, imposed through the Green Belt, local green spaces, important green spaces, floodplain, conservation area and ecological designations, could potentially prevent the achievement of "sustainable development" and hence would not meet the basic conditions without modification. My partial examination is also bound to have regard to the same legal requirements and the basic conditions.
31. I fully recognise that there can be tensions between the test of contributing to the delivery of sustainable development and the matter of general conformity issues with strategic development plan policy. This can be an issue reflecting the way that the neighbourhood plan legislation was drafted and requires a holistic assessment of all the basic conditions before a recommendation is made as to whether the plan can move forward to referendum.
32. The achievement of sustainable development has three strands, which are set out in paragraph 7 of the NPPF (2012), namely an economic role, a social role and an environmental role. Of particular relevance to my considerations of this examination, is the social dimension, of supporting strong vibrant and healthy

communities, by providing a supply of housing required to meet the needs of present and future generations. The environmental role is of equal importance, which recognises the role of the planning system to protect and enhance the natural, built and historic environment.

33. The examiner's recommendations recognise that development may be required in locations which would ordinarily be constrained, outside of the village confines, alongside the B430 and also possibly on The Schoolfield site, if there is shown to be a need for "sustainable development" which cannot be met in "a more sustainable location".
34. My approach to the limited scope of this examination has been to seek to test whether the neighbourhood plan is likely to be able to deliver its housing requirements, in a way that could be consistent with the existing development plan policy, as proposed by the District Council proposed re wording of Policy E1.
35. The parish's housing needs identified by the neighbourhood plan, are found on page 45 of the plan, which sets out an objective of a 15% growth in new housing over the plan period 2017 - 2031, which equates to 38 new homes. I note that Cherwell District Council accepts the figure and it has not been challenged on the basis of what new housing is required to meet the village's own housing requirements.
36. During the video conference, I heard evidence that may have not been available to the previous examiner, specifically, that in addition to the 20 units allocated on Site A, other planning permissions have been granted in recent years and during the period since this version of the plan had been prepared. The position according to evidence given by the District Council's representative is that, as of 31st March 2020, there were planning permissions in place for 26 units (one at The Dower House, four at Southfield Farm, one rear of Ladygrass, Church Lane as well as the 20 units approved on Site A, plus there had been two additional completions.
37. Therefore, that leaves an outstanding requirement for 10 further houses to be provided within the plan period to meet Weston-on-the-Green's housing needs for the plan period.
38. I then turned to the question of how that these houses could be provided in a manner consistent with strategic policies. I heard evidence that windfalls had delivered a total of 19 units within the parish, over the period 2011 to 2019, which averages at close to 2 dwellings per year. There can be some confidence that windfall development will continue to contribute to housing numbers under schemes allowed under Policy H2 of the neighbourhood plan.
39. However, I recognise that it is not just the total number of units which is important but whether that housing would meet the village's housing requirements going forward. I am confident that the types of housing can be influenced in the future by Policy H3, once the plan becomes part of the development plan and is used in the development management context.
40. I did hear concerns regarding the "affordability" question. Affordable housing will only be required on sites of 10 units or more, under the new Policy H9. However, I learnt that the Parish Council is proposing to deliver affordable housing for local people, on land which it is to be gifted at Fir Tree Farm. The Parish Council had indicated in its response to CDC's Housing and Employment Land Availability

Assessment (HELAA) following a call for sites, that in respect of Site HELAA 229 in Appendix F, it fully supported development on the site, “if planning conditions could be met”. It transpired that the Parish Council had been advised by Cherwell District Council that it could not allocate the site due to its Green Belt status and development could only proceed if the site was to be taken out of the Green Belt, which is not normally within the scope of a neighbourhood plan.

41. I do not agree with that assertion, as paragraph 89 of the NPPF (2012) allows “limited infilling in villages and limited affordable housing for local community needs under policies set out in the local plan”. If development is “appropriate development” in Green Belt terms, I do not consider that there is anything to prevent a community within its neighbourhood plan from allocating a site for such development within the Green Belt. Such an allocation could, in my opinion, meet the basic conditions test and could comply with Policy ESD 14 of the Cherwell Local Plan. I have been sent details of the terms of the proposed gifting of the land to the Parish Council. If the development is appropriate then there is no reason for saying that the site must come out of the Green Belt.
42. The District Council contest that this would be a strategic matter and I would agree that it would be if it was allocating land in the Green Belt that did not fall into the definition of appropriate development or the neighbourhood plan was promoting Green Belt boundary changes, (in the absence of a strategic policy framework that supports such changes). I have been pointed towards the comments of the Examiner of the Chalfont St Giles NP where the Examiner is purported to be stating that neighbourhood plans cannot be allocating sites in the Green Belt, but her comments were made in the context of representations made at Regulation 16 from promoters seeking to allocate Green Belt land for housing development that would not have been appropriate development. I would contend that my interpretation is consistent with CDC Local Plan Policy ESD 14 which refers to the assessment of proposals in accordance with national policy, which allows “limited infilling in villages”.
43. It is not necessary as part of my examination to pursue this matter, in terms of my recommendations, but the Parish Council could choose to include the site as a future allocation, then that could be taken forward in a neighbourhood plan review, which is something I will return to later in this report. Alternatively, it could propose a Community Right to Build Order which would effectively grant planning permission for the development and could provide ongoing protection as social rented accommodation against general “right to buy” provisions.
44. I heard that another site at Gallisbrook Way could be developed for affordable housing as it is owned by Sanctuary Housing, a registered social landlord, but as I had not visited the site, I do not intend to comment or rely upon its suitability.
45. Based on the level of completions and commitments, past rates of windfall development and specific information that more affordable housing could be delivered in the village over the plan period, I am satisfied that the community’s housing needs for the present and future housing needs of the village can be delivered, which is one of the indicators whether the plan will be delivering sustainable development.

46. As a Category A village, it is possible that additional homes could be promoted under the provisions of Local Plan Policies Villages 1 and 2, which could contribute to meeting the wider housing needs of the district.
47. This major conclusion has implications for the proposed wording of both Policy E1 and C1, as modified by the first examiner, in that I can be satisfied that despite the constraints within the village, that the housing needs of the community can be achieved in the way that is consistent with the other policies in the neighbourhood plan and the general local plan. This has implications for my conclusions in respect of the examiner's proposed modifications in respect of Policies E1 and C1 based on this new information.
48. I will be recommending that the District Council's proposed amendments to Policy E1 be retained but I cannot agree with its reasons for not accepting the Examiner's recommendations in its entirety. I do not consider that the implications of his recommendations would necessarily have led to inefficient use of the land. I interpreted his proposed policy wording as seeking to restrict the amount of land required to be developed to the extent required to meet the need, rather than to restrict the amount of development that took place on the site to that required to meet the need, irrespective of the size of the site.
49. Similarly, I believe that the test of whether there is a more sustainable place for development to take place, would have to be restricted to the plan area and effectively the sequential approach would have considered whether other sites are more or less sustainable and that search should be restricted to within Weston-on-the-Green. and hence the development would be focused on one of the designated villages deemed to be acceptable to accept some development in the strategic policies in the local plan. I do not believe that the examiner's intention was that the village's housing needs would need to be tested against the availability of sites in less sustainable locations beyond the plan area.
50. The reference to Policies ESD 10, ESD 13 and ESD 15 in the reasons for not accepting the two modifications, 15 and 21, is not necessarily justified, as these three policies would not necessarily rule out development. Rather they set criteria on how development should take place in terms of protecting and enhancing biodiversity, the character of the built and historic environment of the area and local landscape. As no schemes have been put forward, I do not see how it can be concluded that the modifications would actually be inconsistent with these policies to protect the natural, built and historic environment.
51. My consideration of Policy C1 has not been so straightforward. I am satisfied that the protection of the Schoolfield site has been something of a touchstone for the village. That was recognised by the first Examiner, who acknowledged the importance the community attached to its protection and his recommendation was only countenancing development on that site, if unmet housing need had been established and it was shown that no more sustainable sites were available.
52. I agree with the plan's contention that the Schoolfield is seen by the village as a valuable green space. However, as was discussed during the video conference, the current land-use is agricultural, it is primarily used for grazing. I suspect that the current ecological value of the eastern section of the site is limited, but I can fully appreciate the importance of the western part of the site away from the

- surrounding houses, which extends to the west of the north-south footpath crossing the site. I saw for myself the clear evidence of “ridge and furrow” being present, a feature which I am familiar with from other neighbourhood plans in the Midlands, which have chosen to designate such features as non-designated heritage assets. Authorised public access to the field is currently restricted to users of the public footpaths which runs across the site. The land is in private ownership and any public recreational use beyond the footpaths would be unauthorised.
53. The original policy and Cherwell District Council’s proposed replacement policy refer to the site as “a habitat” and its use as “recreational open space”. In terms of land-use, it would appear that the plan is anticipating a change of use from agricultural to recreational open space, although upon being pressed on the matter, it was confirmed that this was not necessarily the aspiration, if public access could be achieved.
54. Public access can only normally be secured through public ownership or with the consent of the landowner. It cannot be something that can be conferred through a planning policy. The representation submitted on behalf of the landowners, Lagan Homes, indicated that the intention is that the land will remain in private ownership. No parties have suggested the possible use of Compulsory Purchase powers. I am also conscious of the Secretary of State’s advice that neighbourhood plans “should be prepared positively in a way that is aspirational but *deliverable*”.
55. Whilst the District Council’s proposal for this policy is that such usage “will be encouraged”. I consider that the expectations of the policy will never be realised without the agreement of a willing landowner and as such the policy is undeliverable. I do not believe that the Parish Council has recognised that the proposal as submitted would constitute a material change of use of the land which would require the submission of a planning application.
56. The matter has been further complicated by the information, which had not been apparent as part of the first examination, that a Section 52 agreement, covering the entirety of Area B was completed in 1980, which restricts the usage of the land to its “*current use*”, which everyone agreed was agricultural use, both then and remains so to date. Whilst this agreement could, under certain circumstances, be used to frustrate the residential development of the site, equally it could be argued that its terms, would prevent the change of use from agricultural to recreational land.
57. The legal advice which was circulated before the video conference, and was not challenged, was that the Section 52 covenants could only be set aside by the District Council acting as party to the agreement, separate from its role as local planning authority. Without their explicit consent, there is only one way that the covenants could be set aside, and that is by application to the Upper Tribunal (Land Division) under the Law of Property Act 1925.
58. That Section 52 agreement would also have been a material consideration had I been minded to recommend the allocation of the Schoolfield site or part thereof as a residential site. In my view of my conclusions elsewhere, such an allocation is not required or justified, but if I had needed to consider it, the existence of the covenant could have cast doubt on the deliverability of that allocation. It also

- undermines, in my opinion, the first Examiner's proposed modification to Policy C1, although it goes without saying, that he was not aware of its existence.
59. A detailed analysis of the drafting of the Proposed Modification to Policy C1 equally throws up questions on whether the new policy meets basic conditions and the legal tests for a neighbourhood plan policy.
60. The policy wording refers to the "*preservation*", of "*a potential* grassland habitat." The use of "*potential*" implies that it currently does not exist and therefore cannot be something that can be "*preserved*". If it is a potential habitat, then the policy should have referred to the "*creation*" of that habitat. The policy also refers to the "*management*" of that habitat. How land is "*managed*" is not a matter that ordinarily would require planning permission as it is not development and "habitat" is a description of the role of land in terms of its ecological value, it is not a land use. How land is managed and maintained is a matter for the land owner and any obligations he/ she is bound by, such as Stewardship Schemes.
61. I have therefore concluded that Policy C1 is not "a policy for the development and use of land" as it principally refers to the "preservation", "maintenance" and "management" of the land as habitat and as a lowland meadow. Similarly, a planning policy cannot grant access onto private land for passive recreational open space. From the comments made during the video conference call it was not the intention of the Parish Council to seek to change the agricultural use of the land, although that is how the policy actually reads, but merely to enable public access to an area which will be managed in the way that enhances its biodiversity. This, however, is beyond the scope of planning control.
62. I have concluded that even though the policy is now worded as a matter of "encouragement", it is not a policy that meets the statutory definition of being a policy for "the development and use of land". I will therefore be recommending that the policy be deleted although the community's aspirations for this land and its management can be included within the plan document, but not as a development plan policy.
63. If the expectations of the neighbourhood plan had been to seek to prevent development because of the importance attached to the green space by the *whole community*, as opposed to just the properties that back onto the site, then it could have chosen to designate it as a Local Green Space, which effectively would rule out development, except in very special circumstances. It would have to be demonstrated that it met all the requirements set out in paragraph 76 and 77 of the NPPF (2012).
64. I probed this issue in my Initial Comments document and at during the video conference. In hindsight, the Parish Council conceded that it was an opportunity missed. It is not my role to introduce a new local green space designation into the plan at this late stage of an examination. That is not really within an examiner's remit and such a designation would need to be subject to public consultation and direct contact with the landowner about possible designation, as set out in Planning Practice Guidance advice. If the Parish Council were to be minded to pursue this route in the future, then this would either have to be dealt with as a modification to the plan, once a referendum is held, or if a formal review of the neighbourhood plan were conducted.

65. In conclusion, my overall recommendations on this partial examination are:

- to accept Cherwell District Council's proposed modification to Policy E1 on the basis that it meets basic conditions, particularly in terms of being in general conformity with strategic policies in the Cherwell Local Plan, has regard to Secretary of State advice and policy and it will contribute to the delivery of sustainable development and other legal tests are complied with.
- but to recommend not to proceed with the Policy C1 whether as submitted, or as proposed to be changed by the District Council, as it does not meet the legal definition of being a policy for the use and development of land and, in view of my conclusions in respect of Policy E1, to not proceed with the modification proposed by the first Examiner,

66. The impact of my recommendation to delete policy C1 will have consequential implications for the proposed responses to modifications 24,26 and 27. It will require consequential amendments to subsequent policy numbering and the removal of sections of the supporting text.

67. Finally, there is a minor point that may have been missed in the response to the Examiner's report. The first Examiner's Modification 15 included "Replace ", in particular" in Policy E2 with "and where appropriate"

68. I consider that to be a necessary amendment which may have been inadvertently overlooked in the District Council's Decision Statement which stated that Modification 15 be not accepted. I will include it in Recommendation 1.

Recommendations

Recommendation 1

Modification15

That the District Council 's proposed changes to Policy E1 be accepted, but that the last element of the Examiners Modification 15 be accepted, which amends the wording of Policy E2.

Recommendation 2

Modification21

That the District Council's proposed alternative wording of Policy C1 should not be accepted and that Policy C1 should be removed from the plan and all the other policy numbers be amended accordingly.

Recommendation 3

Consequential changes

Amend Executive summary to remove reference to Policy C1

Page 26 – remove from the second sentence: "and the subject to Policy C1((Area B))"

Page 37 – remove from the final paragraph "(see Policy C1 and)

Page 38 –from the final paragraph change "propose for protection" to "wish to see protected"

Remove just the wording “(Area B)” from Figure 15

Recommendation 4

Modification 24

Remove Box C1 on Page 84 in its entirety and renumber policies accordingly

Recommendation 5

Modification 26

Replace the title “The policy proposes Policy C1 of the Plan: Area B” on page 140 with “The Parish Council’s aspirations in terms of The Schoolfield”

Recommendation 6

Modification 27

On page 43 replace in the third paragraph “The intention of Policy C1...” with “The Parish Council desires...”

Remove paragraph on Page 144 beginning “Policy C1 embodies...”

Delete the paragraph immediately above the map on Page 144

Map on Page 146 Remove the wording “(Area B)” and the map to be coloured as per first Examiners Modification 10 (which has already been agreed. In the Decision Statement”

Amend Map on Page 144- Replace “Area B: Community Neighbourhood Green Space (to be managed as lowland meadow” with “The Schoolfield- The Parish Council would wish to see the area managed as a lowland meadow”

Delete the last sentence on Page 152

Summary

69. This examination has been a focussed examination conducted under the provisions of Paragraph 13(2) of Schedule 4B of the Town and Country Planning Act 1990, which has concentrated on two specific policies and consequential modifications that had been proposed by the first examiner, which had not been accepted by the District Council. I have recommended acceptance of one of the proposed changes, the revised wording of Policy E1, as it meets the basic conditions.
70. However, I am not recommending acceptance of the proposed alternative wording to Policy C1 and I go further, by recommending that the original policy as well as the Council’s proposed change, be deleted on the basis that neither are a policy that meets the definition of a policy for the use and development of land.
71. As all the original examiners other recommendations, not considered by this report, have already been accepted by the District Council in its Decision Statement including confirmation that the referendum area does not need to be extended, I am delighted to recommend to Cherwell District Council that the

Weston-on-the-Green Neighbourhood Plan, if my recommendations are accepted, should proceed in due course, to referendum.

Your ref: P17/S4254/O

23 April 2020

Dear Madam,

**TOWN AND COUNTRY PLANNING ACT 1990 – SECTION 78
APPEAL MADE BY OXFORD BROOKES UNIVERSITY
OXFORD BROOKES UNIVERSITY, WHEATLEY CAMPUS, COLLEGE CLOSE,
WHEATLEY, OXFORD OX33 1HX APPLICATION REF: P17/S4254**

1. I am directed by the Secretary of State to say that consideration has been given to the report of D M Young BSc(Hons), Ma MRTPI MIHE, who held a public local inquiry between 22 and 31 October 2019 into your client's appeal against the decision of South Oxfordshire District Council to refuse your client's application for outline planning permission with all matters reserved for subsequent approval except details of vehicular access, for demolition of all existing structures and redevelopment of the site with up to 500 dwellings and associated works including; engineering operations, including site clearance, remediation, remodelling and deposition of inert fill material arising from demolition on site; installation of new and modification of existing services and utilities; construction of foul and surface water drainage systems, including SuDS; creation of noise mitigation bund and fencing; creation of public open space, leisure, sport and recreation facilities including equipped play areas; ecological mitigation works; construction of a building for community/sport use and associated car parking; construction of internal estate roads, private drives and other highways infrastructure and construction of pedestrian footpaths, in accordance with application ref: P17/S4254/O dated 19 January 2018.
2. On 12 July 2019 this appeal was recovered for the Secretary of State's determination, in pursuance of section 79 of, and paragraph 3 of Schedule 6 to, the Town and Country Planning Act 1990.

Inspector's recommendation and summary of the decision

3. The Inspector recommended that the appeal be allowed.
4. For the reasons given below, the Secretary of State agrees with the Inspector's conclusions except where stated, and agrees with his recommendation. He has decided

Ministry of Housing, Communities & Local Government
Andrew Lynch, Decision Officer
Planning Casework Unit
3rd Floor Fry Building
2 Marsham Street
London SW1P 4DF

Tel: 0303 444 43594
Email: PCC@communities.gsi.gov.uk

to allow this appeal. A copy of the Inspector's report (IR) is enclosed. All references to paragraph numbers, unless otherwise stated, are to that report.

Environmental Statement

5. In reaching this position, the Secretary of State has taken into account the Environmental Statement which was submitted under the Town and Country Planning (Environmental Impact Assessment) Regulations 2011, the Environmental Statement addendum dated October 2018, and the ES Addendum Review letter dated 6 June 2019. Having taken account of the Inspector's comments at IR1.8, the Secretary of State is satisfied that the Environmental Statement complies with the above Regulations and that sufficient information has been provided for him to assess the environmental impact of the proposal.

Procedural matters

6. The Secretary of State considers that the matters described in IR1.6 have been overtaken by events since the Inquiry, and he deals with these matters in paragraphs 13-16 of this letter below. The Secretary of State agrees with the Inspector for the reasons given in IR1.7 that no injustice would be caused due to consideration of the plans as amended after the Council's decision was issued.

Matters arising since the close of the inquiry

7. The Secretary of State received a representation from John Howell MP dated 10 March 2020, sent on behalf of a number of residents of the village of Wheatley subsequent to the issuing of the Wheatley Neighbourhood Plan Examiner's report dated 27 February 2020. A further representation was received by email dated 6 April from South Oxfordshire District Council confirming their decision to accept the modifications recommended by the Examiner and proceed to referendum.
8. The Secretary of State is satisfied that the issues raised do not affect his decision, and no other new issues were raised in this correspondence to warrant further investigation or necessitate additional referrals back to parties. Copies of these representations may be obtained on written request to the address at the foot of the first page of this letter.

Policy and statutory considerations

9. In reaching his decision, the Secretary of State has had regard to section 38(6) of the Planning and Compulsory Purchase Act 2004 which requires that proposals be determined in accordance with the development plan unless material considerations indicate otherwise.
10. In this case the development plan consists of saved policies in the "*South Oxfordshire Local Plan 2011*" (the LP) adopted 2006 and the "*South Oxfordshire Core Strategy 2012*" adopted 2012 (the CS). The Secretary of State considers that relevant development plan policies include those set out at IR3.12-3.15 and in the Planning Statement of Common Ground.
11. Other material considerations which the Secretary of State has taken into account include the National Planning Policy Framework ('the Framework') and associated planning guidance ('the Guidance'), as well as the Oxfordshire Housing and Growth Deal (OHGD) updated 14 September 2018 and the Written Ministerial Statement "Housing Land Supply in Oxfordshire", published on 12 September 2018. The revised National Planning Policy

Framework was published on 24 July 2018 and further revised in February 2019. Unless otherwise specified, any references to the Framework in this letter are to the 2019 Framework.

12. In accordance with section 66(1) of the Planning (Listed Buildings and Conservation Areas) Act 1990 (the LBCA Act), the Secretary of State has paid special regard to the desirability of preserving those listed buildings potentially affected by the proposals, or their settings or any features of special architectural or historic interest which they may possess.

Emerging plan

13. The emerging local plan (eLP) comprises "*Local Plan 2034*". On 3 March, the Secretary of State lifted the holding direction he issued on 9 October 2019. This had prevented the Council taking any further action in relation to their submitted Local Plan, including withdrawal of the plan, whilst he considered use of his intervention powers. His letter of 3 March also made legally binding directions that require the Council to progress their plan through examination and adoption by December 2020, pursuant to powers in section 27(2)(b) of the Planning and Compulsory Purchase 2004 Act.
14. The Examiner's report on the emerging "*Wheatley Neighbourhood Plan*" (eWNP) was issued on 27 February 2020, and concluded that, subject to modifications, the Wheatley Neighbourhood Plan meets all necessary legal requirements. South Oxfordshire District Council has made the decision to progress the plan to referendum. Policy SPOBU – WHE25 of the referendum version of the emerging Neighbourhood Plan states that the comprehensive redevelopment for residential purposes of the Wheatley Campus site will be supported where they conform with certain development principles, including:
 - the development of the site is underpinned by a masterplan addressing infrastructure, access, landscaping, and recreation/open space issues;
 - the layout, design and height of the new buildings take account of the openness of the Oxford Green Belt and as identified generally in national planning policy (NPPF145g);
 - the development of the site should incorporate the provision of affordable housing to the most up-to-date standards of South Oxfordshire District Council;
 - the development of the site should incorporate high quality public realm and open space; and
 - the development of the site should address opportunities to incorporate safe, convenient and attractive pedestrian and cycling access to and from Wheatley
15. Paragraph 48 of the Framework states that decision makers may give weight to relevant policies in emerging plans according to: (1) the stage of preparation of the emerging plan; (2) the extent to which there are unresolved objections to relevant policies in the emerging plan; and (3) the degree of consistency of relevant policies to the policies in the Framework.
16. In light of the lifting of the Holding Direction on the eLP, the Secretary of State considers that it carries limited weight, given that it is yet to proceed to Examination. In accordance with the revisions to Planning Practice Guidance of 7 April 2020, the Secretary of State

considers that the emerging Wheatley Neighbourhood Plan is now a material consideration of significant weight.

Main issues

17. The Secretary of State agrees with the Inspector that the main issues with regard to the determination of this case are those set out at IR13.2.

Most important policies

18. For the reasons given in IR13.3-13.17 the Secretary of State agrees with the Inspector at IR13.17 that the majority of the most important policies for determining this appeal are out of date. He therefore concludes that paragraph 11(d) of the Framework is engaged which indicates that planning permission should be granted unless: (i) the application of policies in the Framework that protect areas or assets of particular importance provides a clear reason for refusing the development proposed; or (ii) any adverse impacts of doing so significantly and demonstrably outweigh the benefits, when assessed against policies in the Framework taken as a whole. The appeal site is located outside the built limits of Wheatley and Holton where large-scale development would not normally be appropriate, and would therefore conflict with policies CSS1 and CSH1. However, the Secretary of State finds these policies to be out of date where they are used to restrict development outside settlement boundaries (IR13.8-13.9). He also finds the following policies to be out of date: Policies relating to Landscape, Protection and Enhancement of the Environment and Green Belt CSEN1 (IR13.10), G2 (IR13.10) and GB4 (IR13.12); Policies relating to heritage and archaeology CSEN3 (IR13.13); CON5 (IR13.14) and CON11 (IR13.14).

Green Belt

19. The Secretary of State agrees with the Inspector at IR13.18 that, although the site is proposed to be removed from the GB and allocated for development in the eLP, given that Plan has yet to proceed to Examination and attracts only limited weight, the site currently remains in the Green Belt. He also agrees with the Inspector at IR13.18, that, in the absence of up to date Green Belt development management policies, the proposal should be considered against advice in the Framework.
20. For the reasons given in IR13.22-13.24 the Secretary of State considers that the central and eastern sections of the proposal site, together with the sports pitches and circulation areas around them can be considered previously developed land (PDL) and can therefore be considered against para 145g and Annex 2 of the Framework.
21. Further he agrees with the Inspector at IR13.25 that, as no development is proposed in the north-west quadrant, the principle Green Belt objection relates to the south-west quadrant only which accounts for approximately 14% of the site. The Secretary of State agrees with the Inspector for the reasons given at IR13.26 that the south-west quadrant is not curtilage and cannot therefore be considered PDL as defined in the Framework.
22. For those parts of the site that are considered to be PDL, the Secretary of State agrees with the Inspector for the reasons given in IR13.27-13.33 that the development would address an affordable housing need, would have a broadly neutral effect on openness as experienced from within the appeal site, and that there would be a significant net-beneficial effect on the openness of the wider Green Belt through the removal of the tower. He concludes that, save for the south-west quadrant, the development would not

be inappropriate development in the Green Belt. Like the Inspector at IR13.110, the Secretary of State finds that the significant visual benefit to openness over a wide area of the South Oxfordshire Green Belt resulting from the removal of the tower and other large, unsightly structures on the site carries very substantial weight in favour of the scheme.

23. The Secretary of State agrees with the Inspector at IR13.34 that the proposed development in the south-west quadrant would be inappropriate development, and that such development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances. The Secretary of State considers that the harm arising from that part of the development which would be inappropriate must be afforded substantial weight, in line with the Framework.

Character and Appearance

24. The Secretary of State has carefully considered the Inspector's assessment at IR13.35-13.48. He notes at IR13.38 that the site is not a designated or a 'valued' landscape in the terms set out in the Framework, and that it was common ground between the parties that the removal of the tower and other dilapidated structures would be beneficial in landscape terms.
25. For the reasons given in IR13.39-13.41, the Secretary of State agrees with the Inspector that the illustrative masterplan does not necessarily conflict with the requirement to "focus" development on the previously developed area. While Policy STRAT14 of the eLP indicates that development on the western part of the site will not be considered appropriate with the exception of an access route and functional green space, given the progress of the eLP, this is a consideration of only limited weight.
26. For the reasons given in IR13.42-IR13.45 the Secretary of State agrees with the Inspector that the scheme is in general accordance with the recommendations of the Kirkham Study, and that the character of the southwest quadrant is not particularly sensitive in landscape or visual terms such that it should be excluded from development. For the reasons given in IR13.46-13.48 he further agrees with the Inspector that there would be an overall net-gain in landscape and visual terms over the wider area, that the development would not therefore harm the character and appearance of the area, and that there would be no conflict with CS Policy CSEN1 or LP Policies G2, C4 and C9 insofar as they seek to protect the district's countryside and settlements from adverse development.

Heritage assets

27. For the reasons given in IR13.50-13.60 the Secretary of State agrees with the Inspector that while there would be some limited harm to the setting of the Scheduled Monument (SM) arising from the encroachment of housing and from the spine road on its southern flank, this would be towards at the lower end of "less than substantial" harm, and would be clearly outweighed by a combination of the proposed landscape improvements in the north-west quadrant, the SM improvement scheme and also the removal of the existing university buildings which form a stark backdrop in eastward views of the SM. Accordingly, the Secretary of State concludes that there would be an overall heritage benefit to the SM.
28. For the reasons given in IR13.61-13.65 the Secretary of State agrees with the Inspector at IR13.66 that as houses would not encroach into the sensitive open area between Holton Park and the SM, and as the appeal scheme would retain and enhance the

openness of the north-west quadrant through a landscaping scheme that would return this part of the site to something more akin to its original parkland setting, the appeal scheme would lead to an enhancement to the setting of Holton Park.

29. For the reasons given in IR13.67-13.69, the Secretary of State agrees with the Inspector that the removal of the tower would improve views southwards from the churchyard of St Bartholomew's Church, and would represent a heritage benefit.
30. The Secretary of State therefore concludes, like the Inspector at IR13.73, that no overall heritage harm has been found. He has not therefore found it necessary to undertake the heritage balancing exercise required by paragraph 196 of the Framework. Like the Inspector at IR13.113, he concludes that the heritage benefits arising from the on-site mitigation, the removal of the existing buildings and the opening up of the site and the SM to public appreciation, carries significant weight in favour of the proposal.

Accessibility

31. For the reasons given in IR13.75-13.84, the Secretary of State agrees with the Inspector that, bearing in mind the rural nature of the area, the site and particularly the south-west quadrant are well located to services and facilities in Wheatley, and that accordingly, there would be no conflict with CS Policies CS1, CSS1, CSM1 and CSM2 of the CS or Policies T1, T2 and T7 of the LP. He further agrees that the extensive nature of the off-site highway works, and the bus service contribution mean that there would be accessibility gains to the local community. He concludes that these benefits should carry significant weight in favour of the scheme.

Housing Land Supply – Housing Need

32. The Secretary of State notes at IR13.86 to 13.90 that there is no dispute over the Council's ability to demonstrate a 5 year housing land supply.

Other considerations

33. In paragraph 23 of this letter, the Secretary of State has concluded that the proposed development in the south-west quadrant would be inappropriate development. The Framework states that inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances. 'Very special circumstances' will not exist unless the potential harm to the Green Belt by reason of inappropriateness, and any other harm resulting from the proposal, is clearly outweighed by other considerations. Like the Inspector at IR13.93, the Secretary of State has not identified any other harm in addition to the harm by virtue of inappropriateness.
34. The Secretary of State has concluded in paragraph 22 of this letter that the significant visual benefit to openness over a wide area of the South Oxfordshire Green Belt resulting from the removal of the tower and other large, unsightly structures on the site is a consideration that carries very substantial weight.
35. While he has concluded that the council are able to demonstrate a 5 year supply of housing land, the Secretary of State agrees that, for the reasons given in IR13.97 to 13.102, the proposed development would contribute significantly towards the Council's affordable housing shortfall. Given the seriousness of the affordable housing shortage in South Oxfordshire, described as "acute" by the Council, he agrees with the Inspector at IR13.111, that the delivery of up to 500 houses, 173 of which would be affordable, are considerations that carry very substantial weight.

36. The Secretary of State also agrees with the Inspector's assessment of the economic benefits of the scheme at IR13.103, except in relation to New Homes Bonus revenues, where, as he has seen no evidence of the proposed usage of the Bonus, he does not give them any weight in relation to his decision. He agrees with the Inspector at IR13.112 that the economic benefits of the scheme should be afforded significant weight.
37. At paragraphs 27 to 31 of this letter, the Secretary of State has considered the development in terms of its impact on heritage assets and on accessibility. For the reasons given in IR13.104 and 13.106-13.107, he has concluded, like the Inspector at IR13.113-114 that both issues are benefits which should be afforded significant weight.
38. For the reasons given in IR13.105, the Secretary of State considers, like the Inspector at IR13.115, that the net benefit to biodiversity that would be delivered by the scheme is a consideration of moderate weight in favour of the scheme. He also finds for the reasons given in IR13.108, that the reinvestment of the proceeds arising from the sale of the land into the education sector is a benefit of the proposal which should be afforded significant weight (IR13.115).
39. The Secretary of State agrees with the Inspector at IR13.116 that the overall benefit to the openness of the Green Belt alone would be enough to outweigh the harm by reason of inappropriateness. Like the Inspector at IR13.117, he considers that the 'other considerations' identified above clearly outweigh the 'definitional harm' to the Green Belt by virtue of inappropriateness identified in this case. He therefore concludes that very special circumstances exist, which would justify development in the Green Belt, and that the proposal would not conflict with CS Policy CSEN2, LP Policy GB4 or Green Belt policy in Section 13 of the Framework.

Planning conditions

40. The Secretary of State has given consideration to the Inspector's analysis at IR11.1-11.8, the recommended conditions set out at the end of the IR and the reasons for them, and to national policy in paragraph 55 of the Framework and the relevant Guidance. He is satisfied that the conditions recommended by the Inspector comply with the policy test set out at paragraph 55 of the Framework and that the conditions set out at Annex B should form part of his decision.

Planning obligations

41. Having had regard to the Inspector's analysis at IR12.1-12.14, the planning obligation dated 15 November 2019, paragraph 56 of the Framework, the Guidance and the Community Infrastructure Levy Regulations 2010, as amended, the Secretary of State agrees with the Inspector's conclusion for the reasons given that, with the exception of:

- the £96,001 active communities contribution in Schedule 2 (IR12.5-12.7);
- the street naming contribution of £134 per 10 dwellings in Schedule 2 (IR12.8); and
- the provision of "expert advice" in relation to the construction of the sports pavilion, bowling green and cricket pitch (IR12.10-12.11);

the obligation complies with Regulation 122 of the CIL Regulations and the tests at paragraph 56 of the Framework.

Planning balance and overall conclusion

42. For the reasons given above, the Secretary of State considers that the appeal scheme is in accordance with the following policies of the development plan: CS Policy CSEN2, LP Policy GB4. He has identified an overall benefit to heritage assets, so has found no conflict with heritage policies CSEN3, CON5 and CON11. He has found no conflict with CS Policy CSEN1 or LP Policies G2, C4 and C9 insofar as they seek to protect the district's countryside and settlements from adverse development. While he has found conflict with policies CSS1 and CSH1 regarding the amount and spatial distribution of housing, he has found these policies to be out of date. He has therefore concluded that the appeal scheme is in accordance with the development plan overall. He has gone on to consider whether there are material considerations which indicate that the proposal should be determined other than in accordance with the development plan.
43. At IR13.118, the Inspector, having concluded that the proposed development would not conflict with the development plan, states that it should be approved without delay in accordance with paragraph 11c) of the Framework. The Secretary of State disagrees. Paragraph 11 c) of the Framework refers to "development proposals that accord with an up-to-date development plan". As the Secretary of State has concluded that the policies which are most important for determining this appeal are out-of-date, he considers that paragraph 11 c) of the Framework does not apply.
44. Paragraph 11(d) of the Framework indicates that planning permission should be granted unless: (i) the application of policies in the Framework that protect areas or assets of particular importance provides a clear reason for refusing the development proposed; or (ii) any adverse impacts of doing so significantly and demonstrably outweigh the benefits, when assessed against policies in the Framework taken as a whole.
45. The Secretary of State considers the harm to the Green Belt on that part of the site where development is considered inappropriate carries substantial weight.
46. The Secretary of State considers that the significant visual benefit to openness over a wide area of the South Oxfordshire Green Belt and the delivery of up to 500 houses, 173 of which would be affordable, are both considerations that carry very substantial weight.
47. The Secretary of State considers that the economic benefits of the scheme should be afforded significant weight.
48. The Secretary of State has considered the development in terms of its impact on heritage assets and on accessibility and considers that both offer benefits that should be afforded significant weight.
49. The net benefit to biodiversity that would be delivered by the scheme is a consideration of moderate weight, and the reinvestment of the proceeds arising from the sale of the land into the education sector should be afforded significant weight.
50. Given his findings in this letter, the Secretary of State considers that the proposal meets the emerging Neighbourhood Plan site-specific development principles in respect of Green Belt, affordable housing and accessibility, and public open space.
51. Having concluded at paragraph 39 of this letter that very special circumstances exist the Secretary of State considers that there are no policies in the Framework that protect areas or assets of particular importance that provide a clear reason for refusing the development proposed. He also concludes that any adverse impacts of granting

permission do not significantly and demonstrably outweigh the benefits, when assessed against policies in the Framework taken as a whole.

52. Overall the Secretary of State considers that the material considerations in this case indicate a decision in line with the development plan.

53. The Secretary of State therefore concludes that the appeal should be allowed, and planning permission granted.

Formal decision

54. Accordingly, for the reasons given above, the Secretary of State agrees with the Inspector's recommendation. He hereby allows your client's appeal and grants outline planning permission subject to the conditions set out in Annex B of this decision letter, with all matters reserved for subsequent approval except details of vehicular access, for demolition of all existing structures and redevelopment of the site with up to 500 dwellings and associated works including; engineering operations, including site clearance, remediation, remodelling and deposition of inert fill material arising from demolition on site; installation of new and modification of existing services and utilities; construction of foul and surface water drainage systems, including SuDS; creation of noise mitigation bund and fencing; creation of public open space, leisure, sport and recreation facilities including equipped play areas; ecological mitigation works; construction of a building for community/sport use and associated car parking; construction of internal estate roads, private drives and other highways infrastructure and construction of pedestrian footpaths, in accordance with application ref: P17/S4254 dated 29 January, amended as described in IR1.7.

55. This letter does not convey any approval or consent which may be required under any enactment, bye-law, order or regulation other than section 57 of the Town and Country Planning Act 1990.

Right to challenge the decision

56. A separate note is attached setting out the circumstances in which the validity of the Secretary of State's decision may be challenged. This must be done by making an application to the High Court within 6 weeks from the day after the date of this letter for leave to bring a statutory review under section 288 of the Town and Country Planning Act 1990.

57. An applicant for any consent, agreement or approval required by a condition of this permission for agreement of reserved matters has a statutory right of appeal to the Secretary of State if consent, agreement or approval is refused or granted conditionally or if the Local Planning Authority fail to give notice of their decision within the prescribed period.

58. A copy of this letter has been sent to South Oxfordshire District Council, and notification has been sent to others who asked to be informed of the decision.

Yours faithfully

Andrew Lynch

Authorised by the Secretary of State to sign in that behalf

Annex A List of representations

General representations

Party	Date
John Howell OBE MP	10 March 2020
South Oxfordshire District Council	6 April 2020

Annex B List of conditions

- 1) Details of the appearance, landscaping, layout, and scale, (hereinafter called "the reserved matters") shall be submitted to and approved in writing by the local planning authority before any development begins and the development shall be carried out as approved.
- 2) Application for approval of the reserved matters shall be made to the local planning authority not later than 3 years from the date of this permission.
- 3) The development hereby permitted shall begin not later than 2 years from the date of approval of the last of the reserved matters to be approved.

Reason: To comply with Section 92 of the Town and Country Planning Act 1990.

- 4) The development hereby approved shall be carried out in accordance with the following approved plans:

Site Location Plan (Drawing no: 7590-L-17RevA)

Parameters Plan 1: Land Use (Drawing no: 7590-L-18RevG)

Parameters Plan 2: Green Infrastructure (Drawing no: 7590-L19Rev F)

Parameters Plan 3: Building Heights (Drawing no: 7590-L-20RevF)

Reason: For the avoidance of doubt.

- 5) No development shall take place until a Phasing Plan has been submitted to and approved in writing by the Local Planning Authority. The plan shall provide the following information for each phase or sub phases:
 - a) The number and mix (bedroom number) of market dwellings;
 - b) The number and mix (bedroom number) and gross internal floor areas of affordable housing to meet the latest evidence of affordable housing need (the total amount of affordable housing to cumulatively be 34.57% of the total amount of housing across the site);
 - c) The tenure of each affordable unit;
 - d) The number of accessible and adaptable homes to be built to Building Regulations Part M4(2) category 2 for both market (which shall be a minimum of 10% overall) and affordable sectors;
 - e) Location and boundaries of public open space, play areas, green infrastructure, leisure and sports pitches/pavilion, associated parking areas to be provided and a scheme for their future management;
 - f) Key infrastructure including means of vehicular and pedestrian and cycle access and links to serve each phase;
 - g) Drainage and landscaping works including future management arrangements;
 - h) Existing and proposed ground and ridge levels;

An updated Phasing Plan shall be provided with each subsequent reserved matter application showing how each of these elements of the development is to be phased. The development shall be implemented in accordance with the approved Phasing Plan/s.

Reason: In order to secure the satisfactory development of the site

- 6) Prior to commencement of the development, details of the works to the site accesses onto Waterperry Road and Holton Park Drive, shall be submitted to and agreed in writing by the Local Planning Authority. The works shall be completed in accordance with the approved details and timescales.

Reason: In the interest of highway safety in accordance with Policy T1 of the Local Plan 2012.

- 7) Prior to the commencement of any development (including demolition works), a Construction Method Statement, incorporating a Construction Traffic Management Plan shall be submitted to and approved in writing by the Local Planning Authority. The Statement will have been prepared in the light of Outline Construction and Demolition Environmental Management Plan dated January 2018 and shall include details of the following:
 - a) Vehicle parking facilities for construction workers, other site operatives and visitors;
 - b) Site offices and other temporary buildings;
 - c) Loading and unloading of plant and materials;
 - d) Storage of plant and materials used during construction;
 - e) Vehicle wheel washing facilities;
 - f) Measures to control the emission of dust and dirt;
 - g) A scheme for recycling and/or disposing of waste materials arising from the demolition and construction works;
 - h) Installation and maintenance of security hoarding/fencing;
 - i) Hours of construction

The development hereby approved shall be undertaken in accordance with the details approved in accordance with this condition and complied with throughout the construction period

Reason: In the interests of visual and residential amenity and highway safety (Policies D1, and T1 of the Local Plan.

- 8) No development hereby permitted shall begin until surface and foul water drainage schemes for the site have been submitted to and agreed in writing by the Local Planning Authority. The surface water scheme shall be based on sustainable drainage principles and an assessment of the hydrological and hydrogeological context of the development. The schemes shall subsequently be implemented in accordance with the approved details.

Reason: To ensure the effective drainage of the site and to avoid flooding (Policy DC14 of the adopted Local Plan).

- 9) Prior to the commencement of the development hereby approved an Archaeological Written Scheme of Investigation, relating to the application site area, shall be submitted to and approved in writing by the Local Planning Authority.

Following the approval of the Written Scheme of Investigation and the commencement of the development (other than in accordance with the agreed Written Scheme of Investigation), a staged programme of archaeological evaluation and mitigation shall be carried out by the commissioned archaeological organisation in accordance with the approved Written Scheme of Investigation.

The programme of work shall include all processing, research and analysis necessary to produce an accessible and useable archive and a full report for publication which shall be submitted to the Local Planning Authority.

Reason: To secure the protection of and proper provision for any archaeological remains in accordance with Policy CSEN3 of the Core Strategy and Policies CON11, CON13 and CON14 of the Local Plan.

- 10) Prior to the commencement of the development a phased risk Assessment shall be carried out by a competent person in accordance with current government and Environment Agency Guidance and Approved Codes of Practice. Each phase shall be submitted to and approved in writing by the Local Planning Authority. Phase 2 shall include a comprehensive intrusive investigation in order to characterise the type, nature and extent of contamination present, the risks to receptors and if significant contamination is identified to inform the remediation strategy. A remediation strategy shall be submitted to and approved by the LPA to ensure the site will be rendered suitable for its proposed use and the development shall not be occupied until the approved remediation strategy has been carried out in full and a validation report confirming completion of these works has been submitted to and approved in writing by the Local Planning Authority.

Reason: To ensure that any ground, water and associated gas contamination is identified and adequately addressed to ensure the safety of the development, the environment and to ensure the site is suitable for the proposed use.

- 11) Either prior to, or concurrent with the submission of each reserved matters application a Construction Environmental Management Plan (CEMP) shall be submitted to and approved in writing by the local planning authority. The CEMP shall include the following:
- a) Risk Assessment of potentially damaging construction activities;
 - b) Identification of biodiversity protection zones;
 - c) Practical measures (both physical measures and sensitive working practices) to avoid, reduce or mitigate the impacts on important habitats and protected species during construction;
 - d) A mitigation strategy for all protected species ensuring that each species long term conservation status is protected and enhanced;
 - e) The location and timing of sensitive works to avoid harm to biodiversity features;
 - f) The times during construction when specialist ecologists need to be present on site to oversee works;
 - g) Responsible persons and lines of communication, and
 - h) Use of protective fences, exclusion barriers and warning signs.

The approved CEMP shall be adhered to and implemented throughout the construction period strictly in accordance with the approved details.

Reason: To ensure the protection of habitats and species on the site, in accordance with Policy CSB1 of the Core Strategy and Policy C8 of the Local Plan.

- 12) Concurrent with the submission of the first reserved matters application, a Biodiversity Enhancement Plan (BEP) shall be submitted to and approved in writing by the Local Planning Authority. The plan should demonstrate how the development can achieve a no net loss of biodiversity overall compared to the

biodiversity value of the site prior to development. The plan should include both habitat and species enhancements and should use a suitable form of biodiversity accounting to prove that no net loss can be achieved. The BEP should include:

- a) Details of habitat creation or enhancements (this could cross reference relevant landscape plans) and include suitably detailed drawings and cross sections as required;
- b) Details of species enhancements including relevant scale plans and drawings showing the location, elevation and type of features such as bat and bird boxes etc. as appropriate;
- c) Selection of appropriate strategies for creating/restoring target habitats or introducing target species;
- d) Selection of specific techniques and practices for establishing vegetation;
- e) Sources of habitat materials (e.g. plant stock) or species individuals;
- f) Method statement for site preparation and establishment of target features;
- g) Extent and location of proposed works, and
- h) Details of the biodiversity offsetting metric calculations that clearly demonstrate that the proposals contained in the plan avoid a net loss of biodiversity.

Thereafter, the biodiversity enhancement measures shall be developed on site and retained in accordance with the approved details. All enhancements should be delivered prior to final occupation.

Reason: To avoid a net loss of biodiversity in accordance with Policy CSB1 of the Core Strategy and government guidance as stated in paragraphs 170(d) and 175 of the Framework.

- 13) No development shall take place until the tree protection measures detailed in Appendix B of the Arboricultural Assessment dated January 2018 are erected around any trees affected by construction activity.

Reason: To safeguard trees which are visually important in accordance with Policies CSEN1 and CSQ3 of the Core Strategy 2027 and Policies G2, C9 and D1 of the Local Plan 2011.

- 14) Before any dwelling hereby permitted is first occupied, the proposed vehicular accesses, driveways and turning areas that serve that dwelling shall be constructed, laid out, surfaced and drained in accordance with the specification details that have been submitted to and approved in writing by the Local Planning Authority prior to the commencement of those works.

Reason: To ensure a satisfactory residential environment in accordance with policy D1 and EP2 of the Local Plan.

- 15) Prior to the occupation of the first dwelling hereby permitted a Travel Plan in general accordance with the Framework Travel Plan dated 5 January 2018 shall be submitted to and approved in writing by the Local Planning Authority and shall be implemented in accordance with the approved details.

Reason: To promote the use of non-car modes of transport in accordance with Policy CSM2 of the Core Strategy.

- 16) Prior to first occupation of any dwelling or building to which they relate electric vehicle charging points shall be installed and be operational in accordance with details that shall previously have been submitted to and approved in writing by the Local Planning Authority.

Reason: To ensure satisfactory standards of air quality for the residents of the development and surrounding residential properties in accordance with Policies G2 and EP1 of the Local Plan, CSQ2 of the Core Strategy and paragraphs 105 and 181 of the Framework.

- 17) Prior to the occupation of the first dwelling hereby approved details of the means by which the dwellings may be connected to the utilities to be provided on site to facilitate super-fast broadband connectivity have been submitted to and approved in writing by the Local Planning Authority. The development shall be carried out in accordance with the approved details.

Reason: To facilitate homeworking and to reduce the need to travel in accordance with Policies CSM1 and CSM2 of the Core Strategy.

- 18) Prior to first occupation of any dwelling a noise mitigation strategy including full details of the proposed noise bund to be erected along the southern boundary of the site, shall be submitted to and approved in writing by the Local Planning Authority. The approved measures shall be implemented and retained thereafter.

Reason: To minimise the noise levels from the adjacent A40 and to ensure a satisfactory residential environment in accordance with policy D1 and EP2 of the Local Plan.

- 19) Prior to the occupation of the first dwelling, details of a scheme for the enhancement and protection of the on-site Scheduled Ancient Monument on the site shall be submitted to and approved in writing by the Local Planning Authority. The enhancement scheme shall include details of the following;
- a) strimming / mowing and removal of scrub vegetation and self-set trees from the monument;
 - b) a management plan for the preservation / maintenance of the monument in the future, prepared with the objective of removing the need to secure scheduled monument consent to carry out future maintenance of the monument;
 - c) consultation with Historic England and the Local Planning Authority Archaeology Officer in respect of research into the history and the origins of the monument;
 - d) Design and location of an interpretation and information board in respect of the monument. The board shall include information in respect of the monument. It shall also include details of the statutory protection and security measures that the monument benefits from and the repercussions for any individuals who damage the monument through illegal or unauthorised activities, such as metal detecting, and
 - e) Design and location of a seating area, comprising at least one bench and associated hard standing, adjacent to, but outside, the perimeter of the monument. The perimeter of the monument is defined as the extremities of ditch, plus an additional two metre buffer zone.

The interpretation board and seating area shall be installed and the SAM maintained in accordance with the details set out in the SAM enhancement scheme as approved by the Council and shall be maintained thereafter for the lifetime of the development unless otherwise agreed in writing by the LPA.

Reason: To ensure adequate mitigation of a designated heritage asset in accordance with Policy CSEN3 of the Core Strategy.

Report to the Secretary of State for Housing, Communities and Local Government

by D M Young BSc (Hons) MA MRTPI MIHE

An Inspector appointed by the Secretary of State

Date: 27 December 2019

TOWN AND COUNTRY PLANNING ACT 1990

SOUTH OXFORDSHIRE DISTRICT COUNCIL

APPEAL MADE BY

OXFORD BROOKES UNIVERSITY

Inquiry Held on 22-25, 29-31 October 2019

Appeal Ref: APP/Q3115/W/19/3230827
Oxford Brookes University, Wheatley Campus, College Close, Wheatley, Oxford OX33 1HX

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant outline planning permission.
- The appeal is made by Oxford Brookes University against the decision of South Oxfordshire District Council.
- The application Ref P17/S4254/O dated 19 January 2018 was refused by notice dated 13 December 2018.
- The development proposed is a Outline planning application, with all matters reserved for subsequent approval except details of vehicular access, for demolition of all existing structures and redevelopment of the site with up to 500 dwellings and associated works including; engineering operations, including site clearance, remediation, remodelling and deposition of inert fill material arising from demolition on site; installation of new and modification of existing services and utilities; construction of foul and surface water drainage systems, including SuDS; creation of noise mitigation bund and fencing; creation of public open space, leisure, sport and recreation facilities including equipped play areas; ecological mitigation works; construction of a building for community/sport use and associated car parking; construction of internal estate roads, private drives and other highways infrastructure and construction of pedestrian footpaths.

Summary of recommendation: the appeal be allowed

1. Procedural Matters

- 1.1 The appeal was recovered by the Secretary of State (SoS) for his own determination by means of a Direction dated 12 July 2019¹. The reasons for the Direction are that the appeal involves proposals for residential development over 150 units or on sites over 5 hectares in the Green Belt, which would significantly impact on the Government's objective to secure a better balance between housing demand and supply and create high quality, sustainable, mixed and inclusive communities.
- 1.2 The Inquiry sat for 7 days between 22 and 31 October 2019. The venue was located on the appeal site and therefore I undertook numerous site visits during the course of the Inquiry. In addition, I carried out an unaccompanied visit to the site and surrounding area on 21 October 2019. Having heard all the relevant evidence in relation to landscape, Green Belt and accessibility matters I undertook an accompanied site visit on 28 October.
- 1.3 Although the application was submitted in outline with only access to be determined, it was accompanied by an illustrative masterplan and set of parameter plans as well as a raft of supporting technical documentation contained in an Environmental Impact Assessment (EIA)². This material is broadly accepted by technical consultees and demonstrates that a number of matters are capable of being satisfactorily dealt with either by condition or planning obligation.
- 1.4 The application was refused against officer recommendation for 5 reasons. Reason for Refusal (RfR) 1 alleges the development would be inappropriate

¹ See main file

² See Appendix 2 of Planning SOCG for full list of amended plans and documents (CD16.1)

development in the Green Belt and cause harm to its openness with no very special circumstances identified to outweigh this harm. RfR 2 considers that the development would harm the setting of nearby heritage assets with little public benefit to offset the harm. The Council accept that the wording of RfR2 erroneously refers to Policy CON15 instead of Policy CON11 which relates to nationally important archaeological remains. RfR3 focuses on the location of the development and alleges that it would be poorly related to local settlements and facilities leading to an over reliance on car borne trips. RfRs 4 and 5 relate to the absence of a planning obligation to secure affordable housing and infrastructure.

- 1.5 A signed and dated agreement under s106³ of the Town and Country Planning Act 1990 (S106) was submitted after the close of the Inquiry. Amongst other things, this contains obligations to both South Oxfordshire District Council (the Council) and Oxfordshire County Council (OCC) in respect of affordable housing, off-site sports facilities and highway works. A draft version of the agreement was discussed at the Inquiry⁴. All the proposed obligations need to be assessed against the statutory Community Infrastructure Levy (CIL) tests, a matter I return to later. On the basis of the S106 RfRs 4 and 5 fall away.
- 1.6 On 9 October 2019, the SoS issued a Holding Direction⁵ to prevent the Council taking any further action in relation to the emerging South Oxfordshire Local Plan (the eLP), including its withdrawal, whilst he considers use of his intervention powers, under s21A of the Planning and Compulsory Purchase Act 2004 (as amended) (the 2004 Act). This direction remains in force until the SoS withdraws it or gives a direction under section 21 of the 2004 Act in relation to the Plan. Section 21A (2) of the 2004 Act indicates that; “A document to which a direction under this section relates has no effect while the direction is in force”. The eLP therefore has no effect whilst the Holding Direction remains in place and, consequently, policies within the plan are of no effect also. I return to the matter of the evidence base later in my report.
- 1.7 During the determination period, the scheme was amended to reflect discussions between the Appellant and Council officers. Amongst other things the amendments included the introduction of a retail shop⁶. After the Council issued its decision, the requirement for a retail shop was omitted from the January 2019 version of the eLP. The appeal scheme was hence amended a second time to remove the shop. The Appellant conducted a further round of public consultation between 9 May and 4 June 2019 to give interested persons the opportunity to comment on this amendment. Having regard to the principles set out in the Wheatcroft judgement⁷, and bearing in mind the original scheme did not include a shop, I do not consider the post-decision amendment materially alters the substance of the proposal. In any event, given the Appellant’s consultation exercise, I am satisfied that local residents as well as the Council have had ample opportunity to comment on the change. In these

⁵ <https://www.gov.uk/government/publications/south-oxfordshire-local-plan-holding-direction-letter-to-council>

⁶ This was included to reflect the requirements of Policy STRAT10 of the ‘Publication Version’ of the eLP, dated October 2017.

⁷ *Bernard Wheatcroft Ltd v SSE (JPL 1982) (CD9.1)*

circumstances, I am satisfied that no injustice would be caused if I were to consider the revised plans.

- 1.8 As the proposal is EIA development, the various amendments resulted in the submission of an Environmental Statement (ES) Addendum dated October 2018 and an ES Addendum Review letter dated 6 June 2019⁸. The conclusions of both documents were that the findings of the original ES are unchanged by the amendments. The Council do not disagree. I am therefore satisfied that the ES remains robust and does not require amendment.
- 1.9 A pre-Inquiry Case Management Conference was held on 14 August 2019 to discuss the arrangements for the Inquiry and deadlines for the submission of various documents. A summary of the conference was subsequently sent to the main parties⁹.

2. The Site and Surroundings

- 2.1 The appeal site covers a total area of 21.5 hectares located immediately north of the A40 dual-carriageway, approximately 3.5km east of Oxford. To the south of the site, beyond the A40 London Road, lies Wheatley which is a relatively large, rural village with a good range of facilities and amenities. Waterperry Road adjoins the eastern site boundary and serves as the main point of vehicular access to the site. To the north, there are agricultural fields which separate the site from the rural settlement of Holton. To the west lies an education and leisure complex comprising the John Watson/Wheatley Park schools and the Park Sport Centre and gym. Holton Park, sometimes referred to as Old House, is a Grade II Listed Building¹⁰ situated at the eastern end of the complex adjacent to the site's western boundary.
- 2.2 The site itself is currently in use as a university campus although Oxford Brookes University (OBU) intends to vacate the site by 2021/2022. Prior to the current use, the site was used as a military hospital during the Second World War and before that it once formed part of a medieval field system which subsequently became a deer park around the late 18th Century remaining until the early part of the 20th Century.
- 2.3 As it is today, a range of buildings are located within the eastern and central parts of the site, most of which date from the mid/late 20th Century. The heights of the existing buildings range from single storey to a 12-storey tower block approximately 35m tall. There are 2 residential properties located within the eastern part of the site, and a row of houses located within the centre of the site known as College Close. The campus also includes a range of informal recreational green spaces along with various grass and artificial playing pitches which are predominantly located on the western side of the site. In the north-west quadrant lies a Scheduled Monument¹¹ (SM) which comprises a circular, ditched, landscape feature. The south-west quadrant is a visually distinct, undeveloped green space that accounts for approximately 13.75% of the site¹².

⁸ CD3.2

⁹ Summary of Case Conference (CD18.2)

¹⁰ List Entry No. 1369201

¹¹ Ref: SM1018425

¹² Table 2, Bolger PoE

- 2.4 The site is generally well vegetated particularly along its site boundaries with a number of existing mature trees, hedgerows and shrubs which are the subject of a Tree Preservation Order¹³ (reference 35/2005). The landscaping most of which would be retained along with local topography provides for a degree of visual containment such that the majority of existing buildings are not visible outside the site boundaries.

3. Planning Policy and Guidance

- 3.1 Section 38(6) of the 2004 Act requires planning applications to be determined in accordance with the development plan unless material considerations indicate otherwise. One such material consideration is the Framework, which can override development plan policy if it is not consistent with the Framework's provisions. I therefore summarise the national planning policy context first, before turning to look at relevant development plan policies.
- 3.2 The latest version of the Framework was issued in February 2019. Like earlier versions it emphasises that the purpose of the planning system is to contribute to the achievement of sustainable development, through 3 over-arching objectives – economic, social and environmental. It makes it plain that planning policies and decisions should play an active role in guiding development towards sustainable solutions, but should take local circumstances into account, to reflect the character, needs and opportunities of each area.
- 3.3 To ensure that sustainable development is pursued in a positive way there is a presumption in favour of sustainable development at the heart of the Framework. Paragraph 11 explains that for decision-taking this means, firstly, approving development proposals that accord with an up-to-date development plan without delay. If there are no relevant development plan policies, or the policies which are most important for determining the application are out-of-date, then planning permission should be granted unless the application of policies in the Framework that protect areas or assets of particular importance provides a clear reason for refusing the development proposed; or any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the Framework taken as a whole.
- 3.4 Of particular relevance in this case are those parts of the Framework which deal with Green Belt, heritage assets and housing provision. Section 13 of the Framework is entitled "Protecting the Green Belt", with paragraph 136 making it clear that once established, Green Belt boundaries should only be altered where exceptional circumstances are fully evidenced and justified, through the preparation or updating of plans. Paragraph 143 reaffirms that inappropriate development is, by definition, harmful to the Green Belt, and should not be approved, except in very special circumstances.
- 3.5 Paragraph 144 goes on to explain that when considering any planning application, substantial weight should be given to any harm to the Green Belt, and that very special circumstances will not exist unless the potential harm to the Green Belt by reason of inappropriateness, and any other harm resulting from the proposal, is clearly outweighed by other considerations.

¹³ Council ref: 35/2005

- 3.6 With regard to housing, paragraph 59 of the Framework confirms that it is the Government's objective to significantly boost the supply of homes and to ensure that a sufficient amount and variety of land can come forward where it is needed and that the needs of groups with specific housing requirements are addressed. In considering ways to boost supply, paragraph 72 advises that the supply of large numbers of new homes can often be best achieved through planning for larger-scale development, such as new settlements or significant extensions to existing villages and towns, provided they are well-located and designed, and supported by the necessary infrastructure and facilities.
- 3.7 Paragraph 73 requires local planning authorities to identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of 5 years' worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than 5 years old.
- 3.8 Paragraph 190 states that in determining applications, local planning authorities should take account of the desirability of sustaining and enhancing the significance of heritage assets. Paragraph 193 advises that when considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation (and the more important the asset, the greater the weight should be). This is irrespective of whether any potential harm amounts to substantial harm, total loss or less than substantial harm to its significance. In those circumstances where less than substantial harm is identified, this should be weighed against the public benefits of the proposal including, where appropriate, securing its optimum viable use.
- 3.9 Other relevant paragraphs in the Framework are referenced, as appropriate, later in this Report. The Planning Practice Guidance (PPG), initially published in 2014, is also a material consideration in the determination of this appeal.

The Development Plan

- 3.10 The Development Plan comprises saved policies in the "*South Oxfordshire Local Plan 2011*"¹⁴ (the LP) and the "*South Oxfordshire Core Strategy 2012*"¹⁵ (the CS).
- 3.11 The LP was adopted in 2006 and covered the relatively short period up to 2011. The housing requirements for the LP were derived from the now defunct Regional Planning Guidance¹⁶ (RPG) for the South East (as amended) which was adopted in 2001 and the Oxfordshire Structure Plan which was adopted in August 1998. Various policies in the LP were saved by the SoS in 2008. Following the adoption of the CS, the LP was reviewed, and those policies found to be superseded by or inconsistent with the CS were 'struck through'.
- 3.12 The Planning SoCG¹⁷ identifies 36 'relevant' LP policies. Of these, only 7 are referred to in the contested RfRs, these are: GB4 (Visual Amenity of the Green

¹⁴ CD5.1

¹⁵ CD5.2

¹⁶ ID14: RPG Revocation Order 2013 No. 427

¹⁷ CD16.1

Belt), CON5 (Setting Of Listed Buildings), CON11 (Archaeological remains), T1 (Safe, Convenient And Adequate Highway Network For All users), T2 (Unloading, Turning and Parking For All Highway Users) and T7 (Improvements And Extensions To Footpaths And Cycle Network).

- 3.13 Whilst the LP is time expired, that does not mean the aforementioned policies and any other relevant policies are necessarily inconsistent with the Framework. I will return to the issue of consistency later in my report.

The Core Strategy

- 3.14 The CS was adopted in 2012 following the publication of the original version of the Framework. It sets out the vision for South Oxfordshire to 2027. Although the Examining Inspector found the CS to be generally consistent with the provisions of the Framework¹⁸, much of the evidence base underpinning the plan and the Examination hearings themselves pre-dated the March 2012 Framework. The housing requirement of the CS was based upon the constrained supply contained in the RPG which remained in force at the time of adoption and therefore the Examining Inspector (and Council) were obliged to rely on it under the transitional arrangements set out in paragraph 218 of Annex 1 of the 2012 Framework.
- 3.15 The Planning SoCG includes a list of 19 relevant CS policies of which the following 6 are cited in the RfRs: CSEN2 (Green Belt), CSEN3 (Historic Environment), Policy CSM2 (Transport Assessments and Travel Plans), Policy CSM1 – Transport, CS1 (Presumption in favour of sustainable development) and CSS1 (The overall strategy). As paragraph 1.10 of the CS makes clear, the aforementioned policies are of a strategic nature and are intended to be supplemented by more detailed policies in a Development Management Policies DPD. That document was abandoned at an early stage in favour of a new local plan.

The eLP

- 3.16 The eLP¹⁹ was submitted for Examination on 29 March 2019. Despite the advanced stage of preparation at the time of the Council's decision, none of the RfRs refer to policies in the eLP. Even before the SoS's Holding Direction, it was common ground that the eLP carries only limited weight in the determination of this appeal.
- 3.17 Notwithstanding the current status of the eLP, it has been submitted for Examination and the SoS has publicly confirmed his support for it²⁰. Although the Cabinet has recommended that the plan is withdrawn²¹, the Council's planning witness confirmed that it is still committed to the eLP for plan-making purposes. In these circumstances, I consider the evidence base which has been thoroughly and diligently compiled over several years is a material consideration in this appeal.

¹⁸ Paragraph 144-146, of the Examining Inspector's Report (CD5.3)

¹⁹ CD6.1

²⁰ CD15.4, CD15.11 & CD15.15

²¹ Council Cabinet's decision 3 October 2019

- 3.18 In relation to housing growth in the district over the plan period, the evidence base supports an annual housing requirement of 775 homes per year or an overall requirement of 17,825 homes between 2011 and 2034. This represents the midpoint in the annualised housing requirement range identified for South Oxfordshire District in the Strategic Housing Market Assessment (SHMA)²².
- 3.19 The evidence base also supports Policy STRAT 14 (formerly STRAT10) which proposes to remove the appeal site from the Green Belt and allocate it for a development to deliver at least 300 new homes within the plan period.

The Wheatley Neighbourhood Plan

- 3.20 Part of the appeal site falls within the emerging Wheatley Neighbourhood Plan²³ (the eWNP) area designated on 31 March 2016. The second draft of the eWNP was published for consultation in May 2019. On 3 September 2019 it was submitted to the Council under Regulation 15 of the Neighbourhood Planning (General) Regulations 2012. This document was then the subject of statutory consultation ending on 18 October 2019.
- 3.21 The eWNP sets out the community's vision for the future of the area during the plan period (2019 - 2033) and provides a land use framework for development in the area. The vision confirms that a main objective of the plan will be to *"provide a range of different types of new houses across all tenures to meet the needs of all income and age ranges, including key workers, within Wheatley and its catchment area using design guidance..."*. It identifies that the main housing needs are for affordable housing, starter homes and supported housing for the elderly²⁴. It aims to promote the provision of 40% affordable homes, in line with the policy of the eLP.
- 3.22 The eWNP acknowledges the importance of bus services to Wheatley²⁵ and seeks to locate new homes within walking distance of the village centre which is described in the following terms:
- "The retail activities in Wheatley centre are mainly food shops (the Co-op, Costcutter, a well-established baker and butcher) and catering (pub, restaurant, chip shop and take away). Among other High Street services there is the post office, hairdressers, pharmacy, dog grooming, estate agent, a laundrette and a tattooist. Above the High Street on Church Road services include another pub, an architect's business, garage, dentist, the library, the parish church and a further estate agent. A car tyre supplier operates on Holloway Road and a veterinary practice can be found on Roman Road. On the village perimeter, there is a motel complex, an ASDA store and petrol station, a car sales outlet, a coach depot and 2 garden centres. The seven pubs of 1975 have now been reduced to two (and one private club). There are four worshipping congregations: Anglican, Catholic, United Reform and Community Church."*²⁶
- 3.23 Policy SPOBU-WHE25 supports the release of the appeal site from the Green Belt and its allocation as a strategic housing site. It goes on to advise that

²² CD10.6 & CD10.7

²³ Chapter 9 (CD6.2)

²⁴ Paragraph 8.8 (CD6.2)

²⁵ Paragraph 4.22 (CD 6.2)

²⁶ Paragraph 4.16 (CD 6.2)

alterations or replacement of existing buildings should be focused on the previously developed part of the site and should avoid an adverse impact on the SM. In general, development on undeveloped parts of the site will not be considered appropriate with the exception of access routes and functional green spaces.

- 3.24 Some of the requirements of SPOBU-WHE25 relate to the area outside of Wheatley parish and the plan is subject to a number of unresolved objections in that regard. Accordingly, it was common ground at the Inquiry that only limited weight can be given to the eWNP at this time.

The Growth Deal

- 3.25 In 2016 the Government instructed the National Infrastructure Commission (NIC) to undertake a review of the potential for growth in the geographic corridor containing Oxford, Milton Keynes and Cambridge. Sitting at the Western end of the arc, Oxfordshire has a major role to play in delivering on the Government's ambitions for this area, and beyond. The NIC's final report²⁷ was published in late 2017. It found that Oxford with other cities in the arc is successful and fast-growing. However, a sustained shortfall in housing supply has led to high house prices and low levels of affordability which is having a constraining effect on future growth.
- 3.26 The Oxfordshire Housing and Growth Deal (OHGD)²⁸ is a response to those problems and seeks to unlock the growth potential of the area. It requires the Council along with, Oxford City Council, Vale of White Horse, Cherwell and West Oxfordshire District Councils to plan and deliver 100,000 homes by 2031 in exchange for £215m of Government investment. The OHGD requires the constituent authorities to submit and adopt a joint statutory spatial plan (JSSP) covering all 5 district councils in Oxfordshire by 2021.
- 3.27 In addition to the investment, the Government has committed to certain time-limited planning flexibilities for the relevant authorities. In a Written Ministerial Statement (the WMS), published on 12 September 2018²⁹, the SoS implemented a temporary change to the Framework's housing land supply policies as they apply in Oxfordshire. It confirmed that:

"For the purposes of decision-taking under paragraph 11(d), footnote 7 of the National Planning Policy Framework will apply where the authorities in Oxfordshire cannot demonstrate a 3-year supply of deliverable housing sites (with the appropriate buffer, as set out in paragraph 73). This policy flexibility does not apply to the Housing Delivery Test limb of footnote 7 of the National Planning Policy Framework nor plan making policy in paragraph 67. If a local authority intends to fix their land supply under paragraph 74 they will still be required to demonstrate a minimum of 5 year supply of deliverable housing sites, with the appropriate buffer."

- 3.28 The WMS is a material consideration in planning decisions and applies to South Oxfordshire provided the timescales agreed in the OHGD are adhered to. It

²⁷ Partnering for Prosperity: A new deal for the Cambridge-Milton Keynes-Oxford Arc (CD20.5)

²⁸ CD10.4

²⁹ CD10.3

confirms that the SoS will monitor progress with plan-making and keep the planning flexibilities under review. The OHGD is not an assessment of housing need and as such does not identify a housing requirement for each district, nor does it attempt to apportion any housing needs from one authority to another. The overall aspirational housing target in the deal is derived from the SHMA.

4. The Application Proposal

- 4.1 The appeal proposal seeks outline planning permission for the development of up to 500 houses. 2 points of vehicular and pedestrian access are proposed from Waterperry Road in the east and Holton Park Drive in the west. In addition to housing, the development includes generous areas of green infrastructure including; a Local Equipped Area of Play (LEAP), bowling green, cricket pitch, sports pavilion, structural landscaping and an ecological area. The green infrastructure would amount to at least 10.69ha, approximately 50% of the site.
- 4.2 An illustrative layout plan³⁰ which is to be read alongside 3 parameter plans³¹ show how the site might be developed. These plans were supplemented at the appeal stage by a suite of photomontages³². The principle components of the layout are a central spine road which links the 2 access points. Areas of housing are interspersed between the areas of landscaping. The majority of existing trees on the site would be retained.
- 4.3 The central and eastern sections of the site would be dominated by 3 and 4-storey housing. This is where the largest buildings are currently located. Low density 2-storey housing would be confined to the south-west and north-central quadrants. The north-west quadrant which is currently occupied by sports pitches would be kept largely free of development with the SM being incorporated within the proposed green infrastructure.

5. Background

- 5.1 Following OBU's decision to vacate the appeal site by 2021, the Appellant pursued a housing allocation in the eLP. At the same time and following discussions with Council officers a planning application was submitted for the redevelopment of the site. Pre-application discussions took place between September 2016 through to early 2018. The full details of these discussions are set out in paragraph 7 of the Appellant's Closing Submissions³³ and I need not repeat all of that information here.
- 5.2 The planning application was submitted on 19 January 2018 and was given the reference number P17/S4254/O. Due to the scale of the development, an EIA was submitted in support of the application. During the determination period, the scheme was amended to reflect discussions that had taken place between the Appellant, the Council and various statutory consultees. These amendments were reflected in amended parameter and layout plans that were subject to re-consultation. Amongst other things, the amendments provided for:

³⁰ Drawing ref: 7590-L-60

³¹ Drawing refs: 7590-L-19 F, 7590-L-20 F & 7590-L-18 G

³² ID1 & Appendix 6 Holiday PoE

³³ ID28

- an expansion of proposed areas of publicly accessible green open space;
- a reduction in the extent of housing in the western portion of the site;
- an expansion of open space around the SM;
- the introduction of a retail shop;
- various landscaping and biodiversity improvements, and
- an increase in the amount of 4-storey development.

5.3 The application was considered by the Council's Planning Committee at their meeting dated 28 November 2018. In recommending approval, the Committee Report³⁴ concluded:

"very special circumstances exist that demonstrate that the principle of residential development in the Green Belt is acceptable. In addition to being a previously developed site, an increase in openness achieved by the flattening and wider dispersal of buildings, demonstrates the proposal would not have any greater impact on the openness of the Green Belt than existing development. Revisions to the layout and parameter plans have resulted in a scheme that responds appropriately to the site constraints and areas of importance within the site. There are public benefits and on-site mitigation delivered through the proposal, which outweigh the identified 'less than substantial harm' to the heritage significance, as well as on and off-site infrastructure secured through the legal agreement. On this basis, the development accords with the revised National Framework and the Development Plan, and officers recommend approval of the outline planning permission."

5.4 According to the Minutes supplied by the Council³⁵ the Committee expressed concerns about encroachment of the proposed built form to the south-west quadrant, a higher number of dwellings than is provided for in the eWNP, the impact on the setting of Holton Park; and the lack of connectivity with Holton. The Decision Notice³⁶ was issued on the 13 December 2018.

6. Agreed Facts

6.1 The following SoCG's have been agreed between the Council and the Appellant:

- 1) Main Planning SoCG dated 16 August 2019³⁷
- 2) Landscape SoCG including 10 appendices dated 27 September 2019³⁸
- 3) Heritage SoCG dated September 2019³⁹
- 4) Accessibility SoCG dated 30 September 2019⁴⁰

⁴⁰ CD16.4

5) Affordable Housing SoCG October 2019⁴¹

- 6.2 The main planning SoCG sets out the application description, the submitted plans and a brief description of the proposal, the site and its surroundings. It confirms that the application was subject to amendment relating to the convenience store during the determination period and then again after the Council's decision. It confirms the RfRs and the date of the Council's decision. Section 5 covers the Development Plan and lists 35 Local Plan and 19 Core Strategy policies that are relevant to the appeal. It confirms that the Framework, PPG, The Planning (Listed Buildings and Conservation Areas) Act 1990 (the 1990 Act), the OHGD, the eLP and the eWNP are all material considerations.
- 6.3 The Landscape SOCG lists all the relevant landscape and Green Belt studies. It goes on to identify 4 agreed matters which are: 1) the Wheatley Campus Map is helpful when discussing the parts of the site; 2) there would be landscape, visual and Green Belt benefits from the removal of the approximately 35m tall tower; 3) there would be landscape and visual benefits from the removal of buildings and structures within the site that have become dilapidated, and 4) the current visibility of buildings within the site is limited and only the tower is visible from the wider landscape.
- 6.4 The Heritage SoCG confirms the duty under the 1990 Act to have special regard to the desirability of preserving the building or its setting or any features of special architectural or historic interest which it possesses⁴². The matters agreed are listed as:
- 1) The designated heritage assets which are, to a greater or lesser degree, affected by the appeal proposals are the SM on the appeal site; Holton Park 'Old House' at the adjacent Wheatley Park School site, St. Bartholomew's Church, Holton⁴³, and a Scheduled Monument⁴⁴ and listed buildings and structures on the adjacent Wheatley Park School site comprising stretches of listed wall, a bridge, ice house and stable block.
 - 2) There would be an impact on the setting of Holton Park 'Old House' as a result of the appeal proposals. The setting of Holton Park 'Old House' is currently affected by the present situation on the appeal site.
 - 3) The former deer park, of which the appeal site is a part, is neither a designated nor non-designated heritage asset.
- 6.5 The Accessibility SoCG agrees the distances from the centre of the appeal site to various local destinations⁴⁵. It is also agreed that the Wheatley Park School and sports centre complex, which lies at the far western end of Holton village, is within reasonable walking distance of the site. It is further agreed that distance alone is not the only factor that affects the attractiveness of walking and that the quality of footways and crossings, perceived personal security, quality and the good appearance of routes are also relevant.

⁴¹ CD16.5

⁴² The SM is not a listed building and therefore is not covered by the duty under s66 of the 1990 Act

⁴³ List No. 1047596

⁴⁴ SM1018424

⁴⁵ Table 2, page 5

- 6.6 The Affordable Housing SoCG sets out the party's respective position on the housing need and supply in South Oxfordshire. It confirms that the Council is able to demonstrate a 5YHLS against the figure which arises from the standard method which defines a Local Housing Need of 632 dwellings per annum (dpa).
- 6.7 It is also agreed that the OHGD commits the Oxfordshire authorities to plan for and support the delivery of 100,000 new homes between 2011 and 2031, and to progress their respective local plans to achieve this as well as a JSSP to address longer-term development needs to 2050. The 100,000 homes figure is derived from the 2014 Oxfordshire SHMA which breaks down the need for each of the 5 Oxfordshire authorities. South Oxfordshire's need was assessed at 15,500 homes between 2011-31, equivalent to 775dpa. Oxford's unmet need is 15,000 homes. The Oxfordshire authorities have agreed how this should be distributed through a Memorandum of Understanding, which South Oxfordshire did not sign, and the more recent Statement of Common Ground in support of the Oxford Local Plan 2036 and South Oxfordshire Local Plan 2034, which South Oxfordshire has signed up to. This statement agrees that apportionment of unmet housing need, arising from the Oxfordshire Housing Market Area, must be strategically and cooperatively considered through the Oxfordshire Growth Board, and that the latest agreed apportionment figure is 4,950 for South Oxfordshire.
- 6.8 The Council submitted its Local Plan in March 2019 on the basis of the above. Planning Inspectors at three Oxfordshire local plan Examinations have found the calculations of Oxford's unmet need to be sound, and the SoS himself has drawn the Council's attention to this in a recent letter on 26th August 2019⁴⁶.
- 6.9 It is also agreed that the WMS, which sets out that paragraph 11 d) of the Framework will be engaged where authorities cannot demonstrate a 3-year supply of deliverable land (3YHLS), has been developed within the specific context of the OHGD. It is common ground that the WMS recognises that in the *"short-term this will result in fewer permissions granted under paragraph 11 but that it is important to support ambitious plans that will deliver more housing in the longer term"*.
- 6.10 Other agreed matters include:
- Period of Assessment: housing land supply will be assessed for the period 1st April 2019 to 31st March 2024.
 - The 2019 Housing Land Supply Statement⁴⁷ (HLSS), has a base date of 1st April 2019;
 - Buffer: a 5% buffer is appropriate when calculating the 5YHLS; requirement, and
 - There is also agreement on the relevant parts of the Framework and PPG that deal with housing delivery.

⁴⁶ CD15.11

⁴⁷ CD10.1

7. The Case for South Oxfordshire District Council

The case for the Council is summarised as follows.

Overview

- 7.1 This appeal scheme is speculative development of a very substantial scale in the Green Belt where national policy is firmly against such an approach. There is an emerging allocation, but the scheme proposed is substantially bigger in terms of dwelling numbers than that proposed in the eLP which supports development of "at least 300 new homes", rather than the 500 proposed. Moreover, the overall spread of development across the site is in stark conflict with the eLP's emphasis on accommodating dwellings in the east and not the sensitive western half of the site.
- 7.2 The eLP was submitted for Examination by 1st April 2019 in accordance with the OHGD timetable and has been following a similar timetable to Oxford City's emerging plan. It is only since the Holding Direction that progress on the eLP has faltered. Even before the Holding Direction the eLP attracted only limited weight and with the Direction in place it attracts no weight.
- 7.3 The scheme would result in Green Belt, landscape and heritage harm and is not plan-led, and there is nothing about the benefits that take us into the territory of very special circumstances.

Green Belt – Inappropriate development

- 7.4 Only the area on the brownfield land register plan⁴⁸ is previously developed land (PDL). Consequently, the appeal scheme does not benefit from the exemption in paragraph 145g) of the Framework and is inappropriate development in the Green Belt.
- 7.5 Curtilage is not defined in the Framework or legislation. Case law provides some assistance, although the cases are very fact sensitive. Curtilage is generally viewed as being limited in scope and applicable to an individual building, not a group of buildings⁴⁹. There are open spaces in and around campus buildings which are within curtilage. But no authority has been provided for the proposition that the buildings can be aggregated in a way that leads to them having a very large curtilage, as contended by the Appellant.
- 7.6 It is not correct to suggest that the areas of playing fields, which are quite separate in character and function from the developed area of the campus, should be considered curtilage in ordinary language. Having failed the PDL hurdle, the appeal scheme cannot come within paragraph 145g).
- 7.7 Even if one takes a different view on PDL, the appeal scheme would cause substantial harm to the openness of the Green Belt and therefore fails to satisfy the first indent of paragraph 145g).

⁴⁸ Appendix 6, CD16.1

⁴⁹ See *Dyer v Dorset CC*, 1988 WL 622738 (1989) & *Skerritts of Nottingham Ltd v Secretary of State*, (2000) WL 389505 (CD19.1 & CD19.3)

Openness

- 7.8 The Government's commitment to the protection of the Green Belt is unequivocal. The Government attaches "great importance to Green Belts"⁵⁰ and it is difficult to think of a higher hurdle in policy terms than very special circumstances.
- 7.9 The rigour with which this site's contribution to the Green Belt is assessed must reflect the importance given to Green Belts. It would not be sufficient to focus on the existing concentration of buildings in the centre of the site. Built development quickly thins out and by far the majority of the site does not contain significant built development⁵¹. Openness is defined by the absence of built development. The site is predominantly open and therefore serves the fundamental aim of Green Belt policy of keeping land permanently open.
- 7.10 This contribution to the Green Belt is recognised in the 2015 Kirkham Green Belt Study⁵² which drew an inset boundary around the built form and hardstanding on the site, plus the southern recreational area, and excluded the north-west and south-west quadrants. These inset areas are those which do not display essential Green Belt characteristics; the point being, that the rest of the campus outside the proposed inset boundary does display those essential characteristics.
- 7.11 The Kirkham Study also aligns with the Council's assessment of the contribution of the site to the Green Belt purposes. In respect of purpose 2 (to prevent neighbouring towns merging into one another), the study notes that while the area between Wheatley and Holton does not contribute to the separation of towns, the area does contribute to the separation of Wheatley and Holton and any substantial development would lead to the perception of settlements merging. In respect of purpose 3 (safeguarding the countryside from encroachment), the open areas with a wooded and parkland character in the west plainly safeguard the countryside from encroachment.
- 7.12 The 2018 LUC Green Belt study⁵³ downgrades the site's contribution to the Green Belt but still finds that harm could be caused by its release. The study's overall judgement of 'low moderate' harm needs to be treated with significant caution in light, of conflicts with the earlier Kirkham Study and the evidence of the Council's landscape witness.
- 7.13 The harm to openness is multi-faceted. On a parcel by parcel analysis of the site, the proposal would result in approximately 70% of the site being dominated by built development, rather than 33% now⁵⁴. In respect of the visual element of openness, the site is currently experienced from within as largely open but for the concentration of development in the centre and east. Visually the site would be radically changed, from an open university campus to a dense residential estate, with the exception of the north-western quadrant only.

⁵⁰ Paragraph 133 of the Framework

⁵¹ Bolger PoE paragraph 4.2.1-15

⁵² Kirkham Landscape Planning Local Green Belt Study for South Oxfordshire: Final Report 14 September 2015 (CD16.2, Appendix 6)

⁵³ Green Belt Assessment of Strategic Sites in South Oxfordshire Final Report (Appendix 7 to CD16.2)

⁵⁴ Bolger PoE paragraph 8.2.3

7.14 The 4-storey development on the south of the site would be visible from the A40 and Waterperry Road outside of the site. The removal of the tower would be a clear benefit in openness terms. However, the actual extent of this benefit to openness needs careful assessment. It is a single tall tower, and from many viewpoints there is considerable screening of the bottom half of it by trees. The visual Assessment in the LVIA is that, where the tower can be seen, there are only glimpsed views and that the removal of the tower would only give rise to a “*minor beneficial*” effect.

Volume

7.15 The Appellant’s description of “*flattening and dispersing*” is not accurate. The tower’s demolition is flattening, but elsewhere currently developed areas see a substantial increase in height. As the PPG states⁵⁵, an analysis of existing v proposed volumes are part of the assessment of impact on Green Belt openness even at the outline stage.

7.16 The volume of the existing built form on site is agreed to be around 125,500m³. By overlaying the illustrative layout and the building heights parameters plan, the Council has calculated⁵⁶ a building envelope of around 203,500 m³. That equates to a 62% increase on the existing volume – a substantial increase.

7.17 Although it is not possible to know the exact volume of development that would come forward in the future, the parameter plans do control the limits of development. A planning permission granted in the terms sought would be for up to 500 dwellings, such that no more dwellings could be built, but dwellings filling the 203,500 m³ would be consistent with that permission.

7.18 The alternative approach to volume involves a ‘bottom up’ approach, whereby a SHMA compliant mix of dwellings is used to calculate a volume for 500 dwellings. On this approach, the Council has calculated⁵⁷ a volume of approximately 170,000m³. The Appellant volume figure of 125,563m³ has been calculated using a higher proportion of 1 and 2 bed flats⁵⁸ as requested by the Council during the application stage. However, this is likely to be a significant underestimate for the following reasons:

- a. It makes no allowance for storage, communal storage, lifts, lobbies or pitched roofs to any of the 3 or 4 storey flats, and
- b. Discussions with local affordable housing providers indicate that the dwellings are unrealistically small in terms of floorspace.

7.19 On either of the Council’s approaches to volume, there would be a substantial increase in built volume under the appeal scheme. This further bolsters the conclusions set out above that there would be a significant impact on openness.

⁵⁵ Paragraph ID64-001.

⁵⁶ Kashdan-Brown Rebuttal PoE Appendix JKB1 paragraph 2.

⁵⁷ Kashdan-Brown Rebuttal PoE paragraph 16.

⁵⁸ Gardner PoE paragraph 12.36

7.20 The Appellant cites the Wheatley Campus SPD⁵⁹ (the SPD) which provided for up to 194,995m³ of volume. However, the SPD shows a redevelopment scheme which is essentially confined to the area of existing built form.

Character and appearance

7.21 There is a distinction in character between the western and eastern halves of the site. The eastern and central areas are dominated by large scale development whereas the west, is largely open and significant elements of the former historic parkland are retained: the open and expansive grassland, the specimen parkland trees, the wooded area in the south-west quadrant, and the view to the mansion house of Holton Park just set back from its north-western boundary. Despite the use of the term 'relict parkland' in the application documents, there is more than just fragments: the parkland character is quite evident and links in particular to the parkland setting of the school to the west.

7.22 The parkland character is acknowledged in the Oxfordshire Wildlife and Landscape Study 2004⁶⁰, the western half of the site falls in the Wooded Estatelands landscape type, while the eastern half is in the Rolling Farmland landscape type. These landscape types can cover quite large swathes of land around Oxford, but the drawing of the line down through the middle of the site evidences the different character of the western half. "Large parklands and mansion houses" are characteristic of the Wooded Estatelands landscape type. The appeal site sits in just such a former park with the mansion house overlooking it, and although the whole is not intact, unlike for instance Shotover Park to the east, the character is still evident.

7.23 The Appellant's use of the term "*institutional*" is unhelpful and various landscape studies⁶¹ have referenced the site's parkland character. The scheme would harm this character with built development dominating the currently wooded south-west quadrant, enclose the southern boundary of the north-western quadrant and advance west some way into the north-west quadrant itself at the north of the site. In doing so not only would areas with parkland character be lost to dense residential development, but the remaining north-western quadrant would be significantly more influenced by the built development on its boundaries.

7.24 The scheme would conflict with the aforementioned landscape studies which advise that development should be focussed on the previously developed parts of the site. These studies form the evidence base that fed into the principle in eLP Policy STRAT14 that "*development on the western, undeveloped part of the site will not be considered appropriate*".

7.25 In visual terms, there would be harm to the visual amenity of the users of the campus (which include the public). On the western side the university buildings do not become prominent until pedestrians and cyclists are well into the site, especially in summer. The change to close views of the edge of residential development would be adverse. The proposed 4-storey development in the

⁵⁹ Oxford Brookes University Wheatley Masterplan SPD December 2012 (ID21).

⁶⁰ Appendix 3, CD16.2

⁶¹ SODC Landscape Sensitivity Assessment – Potential Strategic Allocations 2018 by KLP & South Oxfordshire District Council - Landscape Assessment Update 2018 by HDA 2018 (Appendices 9 & 10 CD16.2)

south-east quadrant is likely to be visible from the A40, including at night, and would harm the current impression of a rural landscape to the north. Users of Waterperry Road are also likely to have views of the development, impacting on the existing rural character of the road.

- 7.26 There would be some benefits to users of the Public Rights of Way network and residents in Holton, for whom the proposed development is unlikely to be visible, and who would benefit from the demolition of the tower. Care needs to be taken, however, that the undoubted benefits from the removal of the tower in landscape and visual terms, are not exaggerated.

Heritage

- 7.27 The western half of the site is sensitive in heritage terms with an on-site SM and a strong visual connection to Holton Park beyond which is a further SM and a collection of listed structures. There is no inter-visibility with this off-site SM and listed structures, but setting is not dependent on inter-visibility.
- 7.28 As the Council's witness explained these heritage assets are part of the same story of the Manor House's shifting locations through the centuries across the site and its surroundings. Holton Park has been orientated and positioned to take advantage of views to the south-east, and despite the intervening fence and vegetation there remain long views from Holton Park over its historic parkland.
- 7.29 The current open settings of the on-site SM and off-site Holton Park allow their inter-relationship to be understood. Despite the inability to be certain as to the nature of the monument, Historic England (HE) note that the on-site SM's setting has "*good open views in all directions*" and that "*in all of the possible interpretations of this feature, there is a connection with the earthwork and the relatively open and rural space surrounding it*".⁶²
- 7.30 The John Moore report⁶³ highlights an area (in green) which is "*the area that should be withheld from development to ensure the least impact to these heritage assets*". This "*designed landscape setting implication*" is essentially all of the north and south west quadrants of the site. The figure on page 266 of the same report includes a smaller shaded orange area described as "*Scheduled monument and listed building setting implication*". That shows an area where each heritage asset has a relationship with the other. There are no grounds to suggest that the "*designed landscape setting implication*" in the John Moore report was influenced by the outcome of the decision on the planning application.
- 7.31 The appeal scheme fails to respect the open context which allows the relevant heritage assets to be understood. The scheme mostly fills the south-west quadrant of the appeal site with residential development, and comes within 50m of the SM. Although the majority of the north-west quadrant is left open there is nonetheless encroachment of development into this area. This would leave the assets heavily influenced by suburban residential development.

⁶² CD20.1

⁶³ Paragraph 4.7.3 of the John Moore Heritage Services: Heritage Impact Assessment of South Oxfordshire Local Plan 2034 Potential Strategic Sites, March 2019 (CD13.3)

- 7.32 The existing university buildings occupy only 70 degrees of the field of view from the on-site SM. They leave it predominantly open. The proposed development would see this extend to more than 180 degrees, due to the spreading of development to the north and to the south west of the site. This impact would be exacerbated by the new access road which would comprise a double streetway, with kerbing and streetlighting. The illustrative layouts suggest a corridor could be kept open to the south of the on-site SM, but this would be a channelled view through residential development. By reducing openness in this way, the effect of the proposed development would be to significantly diminish the context of the SM and Holton Park that enables them to be understood and tell the Holton Park manorial story.
- 7.33 In terms of Holton Park, only 40 of the 130-degree view cone from the rear windows of the building comprise built development. This would increase to 93 degrees. Presently, the closest 2 storey buildings on the appeal site are 265m away, but the proposed development would be as close as 180m, with the access road being closer still.⁶⁴
- 7.34 Based on changes to the setting of the SM, the Council considers the proposal would result in less than substantial harm of a moderate extent. There would be noticeable changes to the setting of Holton Park, which supports a conclusion of less than substantial harm of minor extent. The same extent of adverse impact would be seen in respect of the off-site SM and associated listed structures. It is striking that HE, the Council's Conservation Officer and the authors of the John Moore report come to similar conclusions.
- 7.35 The removal of the tower would have a minor positive effect upon the significance of the heritage assets. In respect of the SM and Holton Park, the tower is several hundred metres away and well screened by parkland trees. The view of the tower from the churchyard is a seasonal, filtered, distant and incidental one. Although there may be some limited heritage benefit in redesign and tree planting in the north-west quadrant, it falls well short of counterbalancing the harm that would be caused by the encroachment of built form into the settings of the heritage assets and the reduction of the north-west open area itself by 0.8ha.
- 7.36 Paragraph 196 of the Framework requires harm to be identified. It is only then that benefits can come into play in determining whether any harm is outweighed. This approach is supported by paragraph 193 and the requirement to give "great weight" to an asset's conservation. This must require a separate consideration of harms from benefits.

Accessibility

- 7.37 There is a good range of facilities and services in Wheatley but to comply with the Development Plan and national policy and guidance those facilities and services need to be accessible by sustainable modes of transport.
- 7.38 The distances to the facilities and services in Wheatley are significant. With the exception of the Wheatley Park Secondary School and the Park Sports Centre (both of which are on the Holton side of the A40) and the doctor's surgery at

⁶⁴ ID12

Morland House, all of the facilities are over 1km away, with the primary school 1,407m and the Asda 1,739m⁶⁵.

- 7.39 The IHT's Guidelines for Providing for Journeys on Foot 2000⁶⁶, gives a 'desirable' walking distance of 400m, an 'acceptable' walking distance of 800m, and a 'preferred maximum' distance of 1,200m. All the facilities exceed the acceptable distance, and many exceed the preferred maximum. Paragraph 4.4.1 of Manual for Streets⁶⁷ states:

"Walkable neighbourhoods are typically characterised by having a range of facilities within 10 minutes' (up to about 800 m) walking distance of residential areas which residents may access comfortably on foot. However, this is not an upper limit and PPS13 states that walking offers the greatest potential to replace short car trips, particularly those under 2 km. MfS encourages a reduction in the need to travel by car through the creation of mixed-use neighbourhoods with interconnected street patterns, where daily needs are within walking distance of most residents."

- 7.40 Two other factors emphasise the need for sustainability improvements to be very effective if the appeal scheme is to be sustainable. First, the A40 adds to the perception of separation. Walking through an underpass or on an overbridge to get across 4 lanes of trunk road is unattractive and a deterrent. Secondly, the scale of the appeal scheme is strategic. When so many people are affected, it is particularly important that the scheme is a sustainable one.
- 7.41 The eLP recognises this. STRAT14 notes that provision is likely to be needed for "cycling and walking links into the centres of Holton and Wheatley and to the primary school". The cycle and pedestrian provision across the bridge is unsatisfactory. The scope for further cycle lanes to, from and around Wheatley could also be explored; the narrowness of some historic streets may mean there are limits to what can be achieved, but the Council is not satisfied that all avenues have been explored.
- 7.42 The Appellant has proposed accessibility and connectivity improvements from the site to Wheatley, which have been sufficient to satisfy the Highway Authority. The Council have had regard to that view but have reached a different judgement that in light of all the above factors.
- 7.43 In the direction of Holton, the shortcomings of the scheme are particularly stark. There are no existing adequate footpath or safe cycle links with Holton. The scheme does nothing to improve this, providing no connectivity improvements with Holton. Being divorced from Holton in this way despite lying in its parish is unsatisfactory in social and sustainability terms.

Housing requirement

- 7.44 This issue is of importance both to this appeal and more widely. The starting point must be national policy in the Framework. Paragraph 73 and footnote 37 are the principal provisions. In the present case, where strategic policies are more than 5 years old, paragraph 73 and footnote 37 are clear that housing

⁶⁵ Accessibility SOCG table 5.1 (CD16.4)

⁶⁶ CD14.17

⁶⁷ CD14.3

supply is to be calculated against local housing need. For these purposes, local housing need is expressly defined as “*the standard method set out in national planning guidance*”. There is a critical difference with plan-making. In the plan-making context, paragraph 60 entertains the possibility that exceptional circumstances might justify an alternative approach to the standard method. In the decision-making context, paragraph 73 entertains no such possibility. Annex 2 puts the matter beyond doubt: in the “*context of preparing strategic policies only*” can an alternative to the standard method be adopted.

- 7.45 The October 2018 Technical Consultation explains that these amendments to footnote 37 and Annex 2 were introduced to remove any ambiguity on this issue⁶⁸. The PPG is to the same effect: ID68-005 and other paragraphs provide that the standard method is to be used in these circumstances. The Appellant’s reliance on ID21-010 regarding alternative, higher housing requirements than that derived from the standard method fails to have regard to the fact that that paragraph is clearly talking about plan-making.
- 7.46 The Appellant has sought to argue that the Framework permits a different approach, by reference to: (i) the WMS, (ii) the OHGD, and (iii) the Government’s response to the ‘Partnering for Prosperity’ NIC report⁶⁹. For the following reasons, it is considered the Appellant’s approach is wrong in relation to all 3 documents.
- 7.47 Paragraph 6 of the Framework provides that Written Ministerial Statements may, as statements of government policy, be material. The WMS does not however, change the housing requirement for the Oxfordshire authorities. Its actual effect is to implement one specific change to national policy. This is found in the fourth paragraph of the WMS: “*For the purposes of decision taking under paragraph 11(d), footnote 7 of the Framework will apply where authorities in Oxfordshire cannot demonstrate a 3-year supply of deliverable housing sites (with appropriate buffer, as set out in paragraph 73)*”. That amends footnote 7 as it applies in Oxfordshire. Nowhere does the WMS amend paragraph 73 or Annex 2 so as to provide that the Oxfordshire authorities should calculate housing supply by reference to a requirement other than that derived from the standard method.
- 7.48 The actual words of the WMS must be respected. It is not possible to read in to the WMS, as the Appellant would like to do, an obligation on the Oxfordshire authorities to calculate supply for decision-taking purposes by reference to a housing requirement derived from the SHMA, including a sizeable chunk of Oxford City’s unmet need. Nor does the OHGD amend national policy so as to mean that South Oxfordshire is obliged to use a non-standard method housing requirement. The OHGD is all about planned growth⁷⁰. The 100,000 homes should not therefore be delivered through speculative applications and appeals outside the plan-led system, such as the present one.
- 7.49 The Government response to the NIC report became a key plank of the Appellant’s case, despite it only featuring in a single footnote in Mr Ireland’s PoE. Paragraph 6 of the Framework also provides that “*endorsed*

⁶⁸ Appendix 7 paragraphs 30-34 (PoE/NI)

⁶⁹ CD 20.6

⁷⁰ Paragraph 1.2.3 of the OHGD Delivery Agreement (CD15.7)

recommendations of National Infrastructure Commission” are statements of government policy which may be material. However, recommendation 6 which states, that agreements between central and local government must not lead to a drop-in supply⁷¹, is not an endorsed recommendation. Rather the response explains that it has negotiated a bespoke agreement with the Oxfordshire authorities. That obviously implies that one must look at the precise terms of the bespoke agreement itself to understand its implications.

- 7.50 The Appellant also relies on the reference to “*ensuring land supply will increase despite flexibilities agreed to the application of the 5-year land supply requirement*” and the “*authorities planning for significantly greater levels of housing growth than their Local Housing Need assessment*”⁷². However, the Government’s response is plainly referring to the WMS’s expectation that although fewer permissions may be issued in the short term, land supply would increase in the longer term through the significant growth being planned for. Using the standard method together with a 3YHLS is entirely consistent with that. It is also consistent with the purpose for which the WMS 3-year flexibility was negotiated: temporary breathing space to allow resources to be focused on ambitious plan-making, without resources being constantly diverted to dealing with speculative applications and appeals based on an alleged lack of land supply. This is set out in the Growth Board report and consultation documents which preceded the adoption of the flexibility.
- 7.51 The WMS provides that the SoS will monitor progress against the Growth Deal timescales and keep the 3-year flexibility under review. No alterations have been made to the flexibility, no doubt because all the plans were submitted by the 1st April deadline and the JSSP is progressing.

Housing land supply

- 7.52 As set out above, the Council is required to demonstrate a 3YHLS against a housing requirement derived from the Standard Method. This it can do very comfortably with a supply of 9.71 years⁷³. Even on the Appellant’s supply figures, the Council can demonstrate a 3YHLS of 5.4 years.
- 7.53 The figure only drops below 3 years in Table 3⁷⁴ if: (i) the housing requirement is made to match the housing numbers in the OHGD, i.e. 775pa and 495pa from 2021; and (ii) the Appellant’s supply figures are used.
- 7.54 For the reasons set out above, the OHGD housing numbers cannot possibly be the appropriate housing requirement for decision making in advance of plan adoption. Accordingly, whether the Council’s or Appellant’s deliverable supply figures are used, the Council has requisite supply and paragraph 11(d) of the Framework is not engaged. As observed in the Lower Shiplake decision⁷⁵, there is no point in examining the supply figures.
- 7.55 Nevertheless, as the Appellant has advanced its argument based on a higher requirement figure, it is necessary for the Council to address the supply issues.

⁷¹ Final paragraph page 16 (CD20.6)

⁷² Page 17 (CD20.6)

⁷³ Table 2, Housing SOCG (CD16.5) reproduced in Appendix E

⁷⁴ Appendix E to this report

⁷⁵ PINS Ref: APP/Q3115/W/19/3220425 Paragraph 48 (ID4)

The starting point is to have close regard to the definition of deliverable in Annex 2 of the Framework. As the SoS made clear in the recent North Worcestershire Golf Club decision⁷⁶ “*realistic prospect’ remains the central test against which the deliverability of all sites must be measured*”.

- 7.56 On several of the disputed sites specific SoCGs have been signed by the Council and the developer. These are important because they are evidence direct from the developer, i.e. the person who is in the best position to assess deliverability. The Appellant warns against developer’s ‘talking up’ delivery to curry favour with the Council. However, as the Appellant’s witness accepted, there is no real basis to approach the developer’s statements on that disbelieving basis. The information listed in the SoCGs is carefully aligned to the categories of evidence suggested in the PPG⁷⁷.
- 7.57 The Appellant’s approach to supply is essentially to identify where more information particularly around the status of reserved matters applications could be provided. But discussing the progress of every reserved matters application would be disproportionate and excessive. Unless there has been some significant delay in the determination of a reserved matters application, the submission of a reserved matters can of itself contribute to ‘clear evidence’.
- 7.58 The Appellant has raised concerns about the dates of some of the SoCGs. However, there is no requirement for evidence to pre-date the base date. Neither the Framework nor PPG support that and the Inspector in the North Worcestershire Golf Club appeal expressly recognised that evidence could legitimately post-date the base date⁷⁸.
- 7.59 A proper understanding of the nature of the exercise means that evidence is likely to post-date the base date. The base date is a fixed point in time for monitoring and data collection. All completions must be collected up to that date. All outline and detailed permissions issued up to that date, along with all allocations (e.g. in a Neighbourhood Plan) and resolutions to grant need to be taken into account. Given that completions / permissions / allocations / resolutions will still be happening up to the end of 31st March, collection of evidence as to the deliverability of those permissions / allocations / resolutions will necessarily be a retrospective exercise after 31st March. Even if a permission has been issued well before 31st March, deliverability needs to be assessed around the base date. The Appellant suggested the Council should collect all the evidence in January / February. But in addition to missing permissions / allocations / resolutions from after that date, the Council would miss any change of circumstances up to the base date.
- 7.60 The Council’s evidence of lead in times and build out rates, contained in Appendices B and C of the HLSS is also important in contributing to the clear evidence required. Its robustness derives from the fact that it is both recent and derived from the local area. The Appellant was critical that one of the averages was derived from 4 sites, which was asserted not to be sufficient. But there is no reason why an average from 4 recent and local sites should not give a reasonable idea of future rates.

⁷⁶ PINS Ref: APP/P4605/W/18/3192918 (Duffy Rebuttal PoE Appendix N)

⁷⁷ ID68-007

⁷⁸ Paragraph 14.48

- 7.61 On windfalls and non-implementation rate, the Appellant appears to have misunderstood the Council's approach. The Council includes 666 small site permissions for years 1 – 3 because they have got permission, not because they are windfalls. For years 4 – 5, the Council does include a windfall allowance of 100pa, because past windfall rates provide the compelling evidence that paragraph 70 of the Framework requires. The Appellant's attempt to apply a windfall rate across all of years 1 – 5 fails to appreciate that for years 1–3 the existence of actual permissions means that there is no need to apply a windfall rate.
- 7.62 Finally, on supply, the Appellant was critical of the inclusion of allocations and resolutions to grant in the supply. But the Framework expressly lists allocations as a category for which clear evidence may be sufficient to show deliverability. If allocations can be deliverable, it must follow that resolutions to grant can be deliverable, given that a resolution shows a site more advanced than if it only has an allocation. The Councils housing supply figures are set out in Appendix E to this report.

Affordable housing

- 7.63 The affordable housing proposed is a significant benefit of the scheme. Affordability is an issue in the district and there is need for affordable housing.
- 7.64 That said, the extent of the benefit should not be overstated. The Government does not impose any separate policy requirement in respect of affordable housing supply or delivery. The Council is meeting the two key policies in respect of housing supply and delivery, of which affordable housing supply and delivery will form part: 5YHLS and the Housing Delivery Test.
- 7.65 The Appellant criticises the Council for not having met the affordable housing need in full. The SHMA identifies a full need of 331pa and the Council's average over the last 7 years or so is 201pa. But the trend is upwards, and last year the 331pa was exceeded. Further, the difficulties of delivering affordable housing to meet the need in full are well recognised in the SHMA⁷⁹.
- 7.66 The Standard Method is the Government's default methodology for arriving at a housing requirement and while it incorporates an uplift for affordability, it does not attempt to impose a requirement which incorporates full affordable housing need.

Very special circumstances and the planning balance

- 7.67 The scheme is inappropriate development in the Green Belt. Very special circumstances are required for permission to be granted. On the harm side, there is the definitional harm by reason of inappropriateness, along with the other Green Belt harm, i.e. to openness and conflict with Green Belt purposes. Substantial weight must be given to all that harm.
- 7.68 There is also non-Green Belt harm. This includes the overall landscape and visual harm, the harm by reason of poorly connected and inaccessible development, and heritage harm. In accordance with paragraph 193 of the Framework great weight must be given to the heritage harm.

⁷⁹ Paragraph 6.82 (CD10.6)

- 7.69 On the benefits side of the balance, significant weight is to be given to the affordable housing. The market housing does not attract significant weight, given the Council has a comfortable 5YHLS. The removal of the tower is a benefit. This is so in landscape, visual and Green Belt openness terms, but the Council's evidence concludes that it does not outweigh the harm caused in respect of those matters. It is less of a heritage benefit: any heritage harm that is being caused by the tower is minor and any benefit by its removal is correspondingly minor. Other heritage benefits, for example some parkland tree planting in the north-west quadrant, are also minor. There would be some sustainability benefits to residents of Wheatley as a result of the package of accessibility improvements, benefits as a result of reinvestment of funds in other OBU campuses, and some short-term construction benefits, but none of these are in the 'significant' category.
- 7.70 The 2 Green Belt Ministerial Statements⁸⁰ are highly relevant in the very special circumstances balance. The Government has made clear that unmet need is "*unlikely to outweigh harm to the Green Belt and other harm to constitute the very special circumstances justifying inappropriate development in the Green Belt*". The effect of the ministerial statements is that, when an Appellant relies on meeting housing need as the principal benefit of a scheme, as the Appellant is clearly doing in the present case, they are unlikely to be able to establish very special circumstances.
- 7.71 Paragraph 11(d) of the Framework requires it to be asked whether the policies which "*are most important for determining the application are out of date*". The most important policies are those in the RfRs. The Core Strategy policies relied on are clearly not out of date, having been adopted after the Framework and having been tested for consistency with it. The tilted balance is therefore not engaged. Even if it was, the application of Green Belt and / or heritage policies would provide a clear reason for refusing the appeal scheme in the present case.
- 7.72 There is conflict with the adopted development plan as a whole. There is conflict with the eLP, insofar as any weight can be given to it. There is conflict with national policy and therefore the appeal should be dismissed.

8. The Case for Oxford Brookes University

The case for the Appellant is summarised as follows.

Overview

- 8.1 The appeal scheme is a proposal for housing on a site proposed as a major draft housing allocation in the eLP. The site has been identified as suitable for housing, being previously developed land in the Green Belt, visually well contained, located on the edge of a large village with plenty of local services, in close proximity to Oxford, accessible by a dedicated cycle route and with good existing bus services. The proposal would also see the removal of a collection of large and unsightly institutional scale buildings including an incongruous 35m tower block.

⁸⁰ CD11.1 & 11.2

- 8.2 The proposal was recommended for approval by the professional planning officers of the Council. The site is wholly owned and promoted for development by OBU. The receipts from the land sale would be used to improve and expand the University's main Headington campus in Oxford, which would deliver a much better experience for the students who go to study there. The relocation from the appeal site has already commenced and is due to be completed by 2020/2021. After this, the site would become a large vacant and abandoned site, containing a huge mass of vacant and abandoned buildings.
- 8.3 The appeal is to be determined by the SoS who is known to support the eLP, which includes this allocation to progress and be adopted as soon as possible. The actions of the new political administration in South Oxfordshire has led directly to the SoS's intervention in the plan-making process and his expressly stated view that the plan as proposed should progress as soon as possible.
- 8.4 When OBU first notified the Council of its intention to vacate the appeal site, Officers immediately recognised its potential. The Appellant was encouraged to both pursue an allocation in the eLP and to prepare and submit a planning application for its redevelopment. Extensive pre-application discussions took place between 2016 and early 2019, which followed precisely the approach advocated in paragraphs 39-42 of the Framework. After the planning application was submitted, it was subject to detailed discussion with officers and various amendments were made including a reduction of development in the western part of the site and a reduction in volume, which the Appellant achieved not through a reduction in numbers but through a move from houses to apartments as the main form of housing. Apartments which would, of course, be much more affordable than houses. The Appellant has been on a long journey with this proposal. Always seeking to achieve a planning permission without recourse to an appeal. It has fully engaged in public consultation. Indeed, as the Council accepted at the Inquiry, there is not much more the Appellant, nor its consultants could have done in terms of seeking to positively engage and promote the proposal.
- 8.5 The Council's decision to refuse planning permission is based largely on the view that only the central and eastern parts of the site should be developed. However, that is inconsistent with the decision to remove the whole site from the Green Belt in the eLP and policy in the Framework that planning authorities should "*make as much use as possible of suitable brownfield land and underutilised land.*"
- 8.6 Once the development of the site begins, the remaining parts of the campus would self-evidently be underutilised, as indeed is the case at the moment. The north-west quadrant is not proposed for development, save originally on the south western edge of it, because of the proximity of designated heritage assets. These issues do not however apply to the south-western quadrant of the site which is currently unused and contains no heritage assets. Development in this area makes sense in order to ensure the new community is well connected, not isolated from the rest of Wheatley and that pedestrians are well overlooked in that area.
- 8.7 It is critically important to note that the concept plan in eLP Policy STRAT14 which seeks now to limit the allocation to the central and eastern parts of the site, was only issued to the Appellant and wider public on 7 January 2019, well

after the Council had issued its decision. Given its timing, it is difficult to accept that the concept plan was not influenced by the decision of Members to refuse the application citing concerns about development on the western part of the site. With a difficult decision to defend, the Council had an opportunity to put in a defensive plan to suggest the western part of the site should not be allocated. At the very least, it is possible to say that the Members had an opportunity to produce a concept plan after the refusal which would assist in defending their RfRs.

Policy context

- 8.8 The Council has cited conflict with various saved policies with the LP adopted in 2006. This was a complete local plan, as was normal before the 2004 Act. It was adopted 6 years before the Framework was published and only covered the period to 2011, meaning it was adopted in only the last 5 years of the plan period.
- 8.9 The whole planning regime in 2006 was very different to the post Framework era. The housing requirement, the key component of the plan, was based on RPG and structure plan targets from household projections which are now about two decades out of date. There was no requirement to boost significantly the supply of housing, no requirement for identifying an Objectively Assessed Need (OAN) and no presumption in favour of sustainable development. Heritage and Green Belt policy was also different.
- 8.10 When the Council failed to adopt an LDF by 2007, the policies in the LP had to be saved by the SoS. This plan does not meet the requirement for the Council to have an up-to-date local plan. The LP is a plan which is now painfully out of date both in terms of its purpose, its strategy, its content, and its policies and is not a strong foundation upon which to refuse planning permission.
- 8.11 The CS is more recent, having been adopted in 2012. Although the Examining Inspector expressly stated that he had consideration to the Framework, the Examination hearings took place mostly in 2011, with just a few days in May and June 2012⁸¹. The CS is constrained by the need to use the housing requirement in the RPG which remained in place until 25 March 2013. Paragraph 218 of Annex 1 of the 2012 Framework allowed Councils and Inspectors to give full weight to relevant policies adopted since 2004, even if there was a limited degree of conflict with the Framework. Moreover, the Examining Inspector had to rely on RPG housing requirements because he had not been presented with an OAN figure at that stage. The guidance on how to calculate OAN was not published by the Government until March 2014. The consequence of all this, is that the Council do not have an OAN figure and therefore their housing requirement is not, and never has been, compliant with the Framework.
- 8.12 The policies contained in the CS were drafted, evolved and largely examined under the previous national guidance save for some modifications in 2012. Some of the policies relied upon by the Council such as Policies CSEN2 and CSEN3, are worded to be high-level strategic policies rather than development management policies. The Council should not really be relying upon them for development management purposes. This problem with the CS stems from the

⁸¹ CD5.3

fact that it is only half a plan. Core Strategies were intended to be the strategic element of the LDF. The CS was never meant to be the full plan and was supposed to be accompanied by a development management policy document and allocations DPD. Those documents were never produced, the result being a plan which fails in its purpose and content to be up to date and most especially contains policies which offer little guidance for determining applications such as this one.

- 8.13 In a recent s78 appeal decision⁸², the Inspector found that the CS' plan strategy and a series of landscape and countryside protection policies were out of date. The eLP is designed to overcome all of the problems with the existing plans. It is intended to be Framework compliant. A brief review of its proposed policies reveals a suite of policies which seek to address the OAN for housing in South Oxfordshire, meet unmet need from Oxford, allocate the sites needed to meet these housing needs and offer development management policies which are consistent and aligned with the Framework
- 8.14 The problem is the Council is now looking to withdraw the eLP as is made clear from the resolution made by the Council's Cabinet in September. So, having finally prepared a Framework compliant, up-to-date development plan, and having submitted it to the SoS, the Council are now looking to abandon it. The Council's position is untenable. Their claim that their existing plan is not out of date is completely lacking in credibility, as evidenced by their own eLP. The eLP should have been Examined by now. Instead there is no up-to-date plan at all. That is important when considering whether this proposal should be allowed because the appeal site is a key housing allocation in the eLP.
- 8.15 The Council has referred to this as "*speculative development*". It is the antithesis of speculative development. It is a proposal on an allocation in a draft plan.
- 8.16 The Appellant has carefully considered the issue of datedness⁸³ following the Wavendon⁸⁴ approach. The Appellant's conclusions on the matter are closely aligned with those of the professional officers⁸⁵ as expressed through the Committee Report. The recommendation to approve the appeal scheme was not taken on the basis of compliance with the eLP but rather the existing development plan.
- 8.17 This is not a conclusion that was taken lightly by the professional planning officers of the Council. They know how their policies are designed to operate and the significance of compliance with the Framework and its requirements. It is not credible to suggest that Members of the Planning Committee, have the same level of understanding of planning policy as professional officers. The Council's Members who took the decision in this case were not present to give evidence at the Inquiry.

⁸² Lower Shiplake decision Ref: APP/Q3115/W/19/3220425 (ID4)

⁸³ Section 5, Gardner PoE

⁸⁴ Wavendon Properties Ltd and SoS for Housing Communities and Local Government and Milton Keynes Council [2019] EWHC 1534 Admin (CD9.15)

⁸⁵ Paragraph 7.1vii (CD4.1)

The eLP

- 8.18 The eLP proposes that the whole campus should be removed from the Green Belt and allocated for a minimum of 300 houses. The policy wording suggests the development should be focussed on the previously and eastern part of the site and that is what the appeal scheme seeks to do with the overwhelming majority of the development and the units focussed in this way.
- 8.19 The sensitive north-west quadrant would not be developed for houses, whilst the housing proposed in the south west quadrant is very much lower density, with numerous green areas proposed, as is clear from the land use parameters plan. The plan also shows that nearly half the site is proposed for green infrastructure, the overwhelming majority of which would be on the western part of the site.
- 8.20 The SoS, who is known to have reservations about the Council's intention to withdraw the eLP, will make the decision in this case. Withdrawing the plan has profound implications not just for the Council, but also for the Growth Deal which has been signed by all the local authorities in Oxfordshire. It also has profound implications for the future progress of housing in this country, as this is by far the highest profile Growth Deal, forming the first part of the Arc of Growth proposed between Oxford and Cambridge, a matter which the SoS himself has invested a huge amount of his time and effort before he was elevated to the position of SoS in July of this year.
- 8.21 On 29 March 2019, the eLP was submitted to the SoS for Examination. Following local Council elections in May, the new political administration sought to abandon the eLP, in doing so, to turn its back on the pressing need for more housing in the district and the county and significant investment which was to be made in infrastructure.
- 8.22 There was at this inquiry, a rare opportunity to cross-examine both the previous head of the planning committee who promoted the eLP and one of the new Councillors. The contrast in their approach could not be more evident. The former member spoke passionately about the plan and the Growth Deal, the need for the investment in South Oxfordshire and the county as a whole.
- 8.23 The new elected Councillor was, by contrast, concerned primarily with seeking to question the housing growth under the guise of a concern for climate change. The climate change agenda is not a sound basis for refusing to provide people with homes and the homes they can afford. In fact, it does the exact opposite. It causes such people to have to live further and further away from where they work, adding to travel distances, congestion and air pollution.
- 8.24 This is a Council where many of the new local councillors were elected on a NIMBY stop-the-plan ticket, with no sense of any wider responsibility for addressing the housing crisis in South Oxfordshire. During July and August 2019, the Council indicated their intention to review previous commitments to the eLP and OHGD. On 20 September 2019, the Ministry of Housing, Communities and Local Government's Director General for Decentralisation and Growth wrote to the Council making clear that any withdrawal "*would not be without consequences*" including putting at risk further Government investment which was dependent on providing "*certainty that the full number of houses will*

*be delivered*⁸⁶. On 9 October 2019, the Holding Direction was issued by the SoS seeking to prevent the plan from being abandoned by the Council. The Holding Direction advised the Council not to take any steps in connection with the adoption of the Plan, while he considered the matter further.

- 8.25 The Council's proposed withdrawal of the plan is a seriously retrograde step, flatly contrary to Government policy nationally and jeopardizing the position of the other Oxfordshire local planning authorities. In the prevailing development plan-led and OHGD context, the Council cannot avoid the clear national policy imperative of boosting the supply of housing, by abandoning their plan.
- 8.26 Should the SoS conduct his own examination, it is submitted that there is no prospect of the removal of Policy STRAT14. In their correspondence with him, the Council have highlighted the fact that the SoS has made clear he supports the plan. In the unlikely scenario that the plan is permitted to be withdrawn, a development plan vacuum would open in which the presumption must apply with particular force to support the grant of permission on previously allocated sites.
- 8.27 As such, in the short term, at least, those in need of housing in South Oxfordshire must again rely on the development industry and the planning appeal system to deliver new homes because as recent events testify, that is not something which this Council is well equipped to do. The University did not take the decision to appeal this proposal lightly. It spent a long time considering whether to do that in the first half of this year. But now it has, recent events suggest it was absolutely the right decision to make, as the plan may be years away, if indeed it is not abandoned.
- 8.28 Although no weight can be given to the eLP in the current circumstances, the same cannot be said for the evidence base. It is this evidence which lies behind the decision to select this site for large scale housing development and to release the site from the Green Belt. That is contained in the various reports which the Council commissioned into suitable Green Belt sites and which are set out in the SoCG on landscape.
- 8.29 This evidence base supports the development of the site for significant housing. The only real consequence for decision making at this stage is that the appeal must be approached on the basis that the site remains for now in the Green Belt, which means the policies relating to sites in the Green Belt must be addressed. That is how the Council officers approached the matter. In so doing, they reached the conclusion that the proposal met the Framework 11 c) test and therefore it was unnecessary to consider the tilted balance in paragraph 11 d).

Green Belt - Inappropriate development

- 8.30 The whole of the appeal site should be treated as PDL in light of the fact that the definition of PDL includes the land occupied not just by a permanent structure, but also the curtilage. In this way gardens around, big houses were often considered to be PDL for the purpose of what has become known as garden grabbing.

⁸⁶ CD15.15

- 8.31 'Curtilage' is not a term defined in legislation or the Framework. There is case law but it is vague in the extreme. Most of the case law relates to individual houses and the land around it. In that sense it has little currency in respect of this site. There is no case law relating to the definition of curtilage in respect of a university campus.
- 8.32 Where the case law does exist, it makes clear it is a matter of fact⁸⁷ and a matter of fact and degree⁸⁸. That makes a challenge to any decision on what is the curtilage by the decision maker very difficult to challenge.
- 8.33 A university campus is not a single house or building. In this case most of the buildings on the campus are not houses but large buildings located in close proximity together. With little space between the buildings, the open land is as much a part of the campus as the buildings. The open land around the buildings form part of the campus. The two plainly work together to create the campus and the open fields are very obviously necessary to the buildings and used in a reasonably useful way, because the open spaces and playing pitches are part and parcel of the whole composition that is a purpose build 1970s campus.
- 8.34 It is in the nature of a campus, properly understood, that the land and the buildings are intricately and inextricably linked to form the whole. The dictionary definition of campus is "*the buildings of a college or university and the land that surrounds them*"⁸⁹. That sits comfortably with the way in which the word curtilage is approached in the case law cited above.
- 8.35 On the basis that the land within the campus is PDL then its full redevelopment is to be judged not in appropriate development in the Green Belt if either of the two requirements in paragraph 145g) of the Framework are met. The first test requires the decision maker to consider whether the development would have a greater impact on the openness of the Green Belt than the existing development. The Appellant believes this test is met. The new second, and more permissive test, requires the decision maker to consider whether the development would cause substantial harm to the openness of the Green Belt, where the development would re-use PDL and contribute to meeting an identified affordable housing need within the area of the local planning authority.
- 8.36 The second test which allows the opening up of more opportunities for development in the Green Belt must be seen as a significant development, especially in the face of such strong political pressure to protect the Green Belt at a national level.
- 8.37 There is no dispute that the appeal proposal contributes to meeting an identified affordable housing need. The Council also accepts⁹⁰, that Framework paragraph 145g) applies to a significant amount of the site. The Appellant is plainly not seeking to develop any of the north-west quadrant, which is given over to sporting and recreational use, with the opportunity to enhance the area close to

⁸⁷ Methuen-Campbell v Walters [29179] QB 525. (CD19.2)

⁸⁸ Skerrits of Nottingham Ltd v SSETR [2000] 2 PLR 102 (CD19.3)

⁸⁹ Gardner PoE, paragraph 12.14

⁹⁰ Landscape SOCG (CD16.2)

the Holton Park with parkland. So the question is whether the proposal would cause substantial harm to openness. The critical issue is the effect of both the demolition of the existing built development and the effect of the new development on openness. That includes both the spatial and visual aspects of openness as set out in the PPG.

Openness

- 8.38 Whether the proposal causes harm to openness is a matter of planning judgement. The courts and now the PPG make clear that it is a matter to be looked out in both spatial and visual terms, and where volume is not the only measure.
- 8.39 The Appellant's approach to openness is two-fold. It relies on a volume analysis to demonstrate that the proposal falls within 145g) and if that fails, it seeks to demonstrate that very special circumstances exist. In *Turner v SSCLG*⁹¹ the Court of Appeal was keen to go out of its way to hold that openness is not solely about a volumetric issue but is more "*open-textured*". The Court was keen to emphasise the implicit nature of the visual amenity aspect of the issue of openness. This case was pre-dated the new second test in paragraph 145g)ii). Yet the importance and consideration of visual aspect surely lends itself more to the new test of considering whether the proposal would cause "*substantial harm to openness*".
- 8.40 The volume of the existing buildings has been calculated as 125,500 sqm and is not disputed. It is accepted by the Council that the tower has an impact on openness which is greater than merely its volume. At 35m in height that is plainly so. It has a significant impact on openness. The removal of the tower, as proposed with this scheme, is a significant benefit to improving the openness of the Green Belt in this area. There is another significant benefit associated with the removal of the other large institutional buildings around the tower, which are appropriately described as an agglomeration of buildings. The removal of all the buildings is plainly beneficial to openness.
- 8.41 It is the net effect of the proposal with this removal and its replacement by the proposed development which is important. The appeal scheme proposes a development of up to 500 homes. As this is an outline scheme the Council's professional officers accepted that "*a precise volume calculation of the proposed buildings is not available*"⁹². The parameters plans do however indicate the maximum height of the development. On the basis of that information, the officers were happy to conclude the proposal could be built so that it had no greater volume. It is of course, entirely in the gift of the Council at the reserved matters stage, to ensure the development does not result in a material increase in volume.
- 8.42 The volume is therefore assumed to be similar. The Council's volume calculation is based on unsubstantiated assumptions that the proposal would have to come forward in accordance with a SHMA compliant mix of house types. In practice the site would come forward with a proposal suitable to this site. If the Council want the volume to match that of the existing development, it would be within

⁹¹ Paragraph 14 (CD9.7)

⁹² Page 19 of Committee Report (CD4.1)

their gift to control the housing mix to that end. It should be noted that the application was amended before determination at the behest of officers to move away from a SHMA-based mix to a largely apartment-based scheme to address the officer's concerns about matching the volume of the existing built development.

- 8.43 The Council's evidence also relies on a volume calculation which assumes the maximum heights used in the parameters plan for the whole site. Similarly, control over building heights would be entirely within the gift of the Council at the reserved matters stage. They control that process and can make such decisions at that stage. The Council's arguments about needing to include lifts and extra storage space are not based on any market evidence. The Appellant has approached a major housebuilder and established that lifts would not be required for apartments which are 3 and 4 storeys in height.
- 8.44 The national space standards are not required here as there is no adopted development plan policy which requires them, and the delay in the progress in the eLP is plainly the reason that now becomes a very bad point for the Council.
- 8.45 Overall, the development would simply lower and flatten built development across the eastern and central parts of the site. The Council officers accepted this approach as is clear from the last paragraph of the conclusion⁹³. The development would cause no harm (let alone any "substantial harm") to the spatial openness of the Green Belt.
- 8.46 The eastern and central part of the site is very institutional in character and has a clear visual bulk. The removal of the 35m tower would amount to a particular positive benefit in terms of openness, which by virtue of its significant height can be observed from outside the appeal site in numerous locations. It is completely incongruous with the local landscape being unashamedly urban and modern in design. It has no place within the rural character of the local landscape, being both discordant and inappropriate. It sits uncomfortably on the edge of the village of Wheatley undermining the role played by the local church. To simply take the volume of this building as the sum total of the harm it causes to openness is to completely miss the point.
- 8.47 As clarified at the Inquiry the Council's only real dispute is in respect of impacts on openness in the south-western quadrant, in the area between the A40 and the central spine road. As the Appellant's Planning and Landscape PoEs have set out, this area does not itself serve any Green Belt purpose. In terms of the visual impact, this corner of the site is very well contained which has a significant impact on the ability to contain the visual impact on openness. Consequently, the visual impact of the low-density housing would be inconspicuous outside the site's boundaries. Overall the proposal would have a neutral effect on the visual openness within the site and a beneficial effect over a wider area. That would satisfy 145g)i) of the Framework.
- 8.48 The Council may disagree, but their evidence is predicated on erroneous assumptions about SHMA mix, the applicability of the national space standards and the need for lifts. Added to which there is an SPD which allows the University to achieve nearly 200,000m² of built development. That is an

⁹³ Paragraph 7.1vi (CD4.1)

adopted SPD and it is something which the Council has judged acceptable in terms of openness, even whilst most of existing buildings (excluding the tower) would remain in situ.

- 8.49 In looking at openness, the impact of developing the site has been the subject of 3 studies which have considered the potential for development on this site and other parts of the Oxford Green Belt area, including 2 commissioned by the Council. Key conclusions from these studies are as follows:
- (a) All consider the campus is suitable for redevelopment, and generally one of the highest scoring sites in the District in terms of landscape capacity for development;
 - (b) The studies draw a clear distinction between the character of the site and the wider landscape character;
 - (c) They note the adverse effects of the existing 12 storey tower on landscape character, and openness of the Green Belt, and the benefits of its removal;
 - (d) They suggest retaining the north western part of the site in green uses and retaining the most important trees.
- 8.50 The proposal would not cause substantial harm to the openness of the Green Belt. The proposal should therefore be judged not inappropriate development. It follows that there would be no conflict with Policies CSEN1 and GB4 and subject to consideration of the other harms (character, heritage and accessibility, other Green Belt harm if relevant), the proposal should be allowed. There is no need to consider very special circumstances.
- 8.51 If the proposal is judged not to meet the requirements of paragraph 145g) of the Framework, then it will be inappropriate development in the Green Belt. The impact of the proposal on the openness of Green Belt will need to be considered in terms of the Green Belt harm as well as the definitional harm of being inappropriate development in the Green Belt. That is why in decisions where very special circumstances has been proved the Inspector will always look specifically at openness. The same evidence and approach in terms of looking at openness, as set out above, applies and the same conclusion from the Appellant can be adopted in that analysis.

Character and appearance

- 8.52 The appeal site is not a sensitive location in landscape character terms, given its history of built development/regrading and its edge of settlement location, adjacent to the A40. It has no landscape designation and the Council accept it is not a valued landscape.
- 8.53 The site is perceived as one site and the whole site is influenced by the existing buildings. For example, the character of the area of sports pitches is plainly influenced by the buildings adjacent to it. The Council's characterisation of the different parcels of land, with and without built development does not match how the site actually reads on the ground, which is read as whole, being, rather obviously, a campus.
- 8.54 The proposed residential land uses would be significantly smaller in scale than the current educational buildings, with far less bulk and mass than the present

agglomeration of buildings at an institutional scale and would present as more appropriate to a countryside edge location. The spacing and grain of the proposal is much more consistent with the local area.

- 8.55 The north-west quadrant, currently in use as pitches, has very clearly been re-profiled for sports use and has an engineered character. The character and appearance of this north western part of the site would be significantly enhanced by smoothing the engineered slopes and converting back to parkland with additional tree planting.
- 8.56 In this context, there would only be limited and localised harmful residual effects on landscape character and identifiable positive effects. There would be no material effect on the character of the wider landscape.
- 8.57 The Council's case is centred on the claim that the site is part of a historic parkland landscape and that to build upon it would degrade it. However, this is not a parkland. What dominates the site is the agglomeration of institutional scale buildings, including the 35-metre tall concrete tower. The site has already been completely compromised as a historic parkland. And that has been a long, on-going and continually evolving process. The parkland to which the Council refers has, as the John Moore report makes clear, been "*largely degraded following development in the Second World War and after*". However, the Appellant's arboricultural assessment⁹⁴ confirms that many of the trees on site are not from the historic parkland. In any event only 2 mature trees are to be lost, as the proposal has sought to design around them.
- 8.58 The distinction between historic parkland and education campus is plain and obvious. It was brought sharply into focus by the Council's landscape character assessments of 2003 and 2017⁹⁵. These documents locate the appeal site within the Semi-enclosed Farmed Hills and Valley's Character Type within the Mid-vale ridge landscapes. That is in direct contrast to the Parkland and Estate Farmlands character area which lies very clearly on the other side of the A40.
- 8.59 There can be no doubt that the Semi-enclosed Farmed Hills and Valley's Character Type is most appropriate to the appeal site: it specifically describes as part of this character type the area around Wheatley. It does so in these terms "*landscape typically fragmented and intruded upon by roads and built development.*" That description could be written for the appeal site and the area to the west. The A40, the new road system and roundabout by the school and the sheer extent of built development in the area are plain to see. What remains undeveloped land is largely in the form of playing pitches on engineered terraces. 'Terracing' being the word used by the Council's heritage consultants to describe the character and nature of the sports pitches.
- 8.60 This is a University campus and there will be no harm to the character and appearance of the area arising from this development, when one looks at the fact it largely replaces the extent of the built development on site, but with far less height than the tower and no institutional scale buildings.

⁹⁴ CD1.9

⁹⁵ South Oxfordshire Landscape Assessment SPG (2003) (Appendix 4 to CD16.2) & Landscape Character Assessment for the Local Plan 2033 (Appendix 5 to CD16.2)

Heritage

- 8.61 There is one listed building, variously known as Holton Hall, Old Hall, Holton Park which is Grade II and faces directly onto the appeal site, and other such buildings located behind. There is also an on-site SM, which is designated under the Scheduled Ancient Monuments and Archaeological Areas Act 1979.
- 8.62 The appeal scheme does not involve any change to the listed buildings themselves nor the SM. There is however no disagreement that the appeal site falls within the setting of both Holton Park and the SM. The setting of heritage asset is defined in the Framework which makes clear it can change over time as has happened here.
- 8.63 The appeal site, in its current state, reflects the development of the campus from the 1960s onwards. The western part of the site retains little evidence today of its former character as historic parkland associated with the early 19th Century Holton Park. This is due to:
- (a) the extensive groundworks carried out to provide the existing sports pitches and tennis courts on the western part of the site; and
 - (b) its relationship with the developed central & eastern parts of the site, including the tower.
- 8.64 The park is not included on the HE Register of Parks & Gardens and does not have any other form of national or local heritage protection. As a result of the extensive alterations made to the landscape of the campus site in the late 20th Century, the contribution that it makes to the designated heritage assets most affected (Holton Park and the SM) is of a minimal nature.
- 8.65 The John Moore report identifies a brown area which is concerned with the setting of the heritage assets. The proposal does not seek to place development in that area and instead would return much of that area and more to a parkland setting as it has previously been. That is relevant to the listed buildings. It has less relevance to the SM because no one really knows what the SM is and therefore judging what its setting is relies largely on guess work. Nonetheless the Appellant acknowledges the designation and has carefully designed the scheme to leave an open area around the SM so that it can be appreciated by the public who will enjoy full access to the site.
- 8.66 The 2017 Heritage Impact Assessment⁹⁶, seeks to ensure no development takes place *"at the north-western boundary of the site, as this would visually separate the earlier moated settlement site from its successor"* right next to where Holton Park was located. It was not a concern about building on any of the western part of the appeal site.
- 8.67 The SM on the appeal site is almost certainly of post-medieval date, rather than being the site of an early medieval manor. Its setting is fairly described as "bleak and forlorn". Nothing has been done to celebrate it or to interpret it to the public. Again, the area to the south makes a minimal contribution to its setting.

⁹⁶ The South Oxfordshire Local Plan 2033 Heritage Impact Assessment (Oxford Archaeology, September 2017) (CD13.2)

8.68 Both the Council's Conservation Officer and HE recognized the considerable improvements made to the scheme during the determination process. The refusal of the appeal scheme was contrary to the recommendation for approval made the professional planning officers of the Council whose job it is to balance the competing interests in this case, and who expressly stated in the Report to Planning Committee that,

"Having had careful regard to the 'less than substantial' harm (alleged by the Council's Conservation Officer & Historic England), there are insufficient grounds to insist on further revisions, a larger retention of open space or a reduction in unit numbers, on heritage grounds. The location of the residential development (particularly on the western edge), by virtue of the revised layout, would not adversely affect the historic significance to a degree that would warrant refusal, and would not conflict with the Framework or Development Plan in terms of heritage and conservation policy."

8.69 The Council's expert heritage witness fails to give proper weight to the heritage benefits of the appeal scheme which include:

- Reinstatement of a more parkland-like landscape in the vicinity of Holton Park and the SM on the appeal site than that which currently exists, and
- removal of the tower block and the benefits that this will bring to the settings of the designated heritage assets affected.

8.70 These should both be seen as significant heritage benefits of the scheme. The Council's heritage witness suggests the harm is the highest below substantial. That is his explanation of moderate in his proof. That is simply not tenable. And as he accepted his whole approach to that level of harm ignores all the positive benefits to heritage. HE has objected but their opinions are only provided in writing. They cannot be challenged including the assertion about what the SM actually is. Their views must be taken into account. The officers were aware of HE's comments but nonetheless found the public benefits outweighed the harm.

8.71 The public benefits of the proposal outweigh any possible heritage harm. The Council's approach to consider heritage benefits as public benefits rather than reduce the heritage harm seems erroneous when one is tasked with assessing the impact of the proposal on the significance of the heritage asset. The correct approach is to look at the impact on the significance of the asset in terms of the effect of the scheme. Even if the Council is right that simply means there are more public benefits even if there is a degree of heritage harm and it makes no real difference either way. The proposal is said to have no harm on the Grade I listed church. But the heritage benefit is surely taken into account anyway even if that is not the case. Failing that the benefit of removing the tower from the view through the lychgate is a real public benefit⁹⁷.

8.72 In summary, the appeal proposals will not cause harm to what is significant about the setting of any of the designated heritage assets affected.

⁹⁷ Plate 20 Doggett PoE

Accessibility

- 8.73 The appeal site's proposed allocation in the eLP is a direct acknowledgment by the Council that the site is sustainably located. The evidence base undertaken as part of the eLP process further acknowledges "*Wheatley provides a number of services and facilities within walking distance from the site*".⁹⁸
- 8.74 LP Policy T7 states that the District Council will seek to encourage walking as the predominant mode of transport for journeys up to 1 mile, as they recognise that walking and cycling has the potential to replace car use for short trips. The former Planning Policy Guidance Note 13 advised that "*walking is the most important mode of transport at the local level and offers the greatest potential to replace short car trips, particularly those under 2km*". Whilst the PPG has been withdrawn, the advice is retained in paragraph 4.41 of the Department for Transport's Manual for Streets. The eLP evidence base concludes that "*over one third of all journeys to work originating in Wheatley are between 0-5km – a distance which could be made on foot or cycle by most residents*", therefore the site is already well placed for travel by sustainable modes.
- 8.75 There is a very good range of day-to-day facilities nearby, including both primary and secondary schools. Almost all lie within 1-mile walking distance of the site, including the primary and secondary schools, local shops (such as the Co-op foodstore, butchers, bakers), doctors, dentist, pharmacy, leisure facilities, library and post office. These walk distances have been agreed by the Council. Therefore, walk distances accord with local and national policy.
- 8.76 The appeal site has comparable or better accessibility when compared against 2 preferred residential sites in the eWNP. The site is also better located in terms of accessibility when compared to other residential developments which have either been granted planning permission or allowed at appeal. Many of these sites are located a considerable distance from secondary schools⁹⁹.
- 8.77 The Appellant has worked with OCC to develop improvements to the key facilities for pedestrians and cyclists and this demonstrates that the Highway Authority consider that walking and cycling is a realistic transport mode for future residents of the development. A package of improvements to the walk and cycle network have subsequently been agreed with the Highway Authority. These measures include provision of new footways, widening existing footways, provision of cycle lanes, provision of dropped kerbs and tactile paving, provision of formal crossing points, signage and resurfacing of 2 cycle crossing points/ cycleways along the A40. These improvements would benefit future residents of the development as well as existing residents in the village.
- 8.78 The development would also fund a new bus service, serving the site and Wheatley. A financial contribution of £720,000 is to be provided which would fund an additional bus in the commercial fleet for eight years, with a frequency of 30 minutes; this is the highway authority's desired position for this scheme. This has a significant potential to reduce car journeys, by providing an alternative and sustainable means of transport for future residents of the appeal site. The service would also be routed so that it would serve Wheatley village to

⁹⁸ Page 9 South Oxfordshire Local Plan 2034: Strategic Site Selection Background Paper Part 2 (CD 6.3)

⁹⁹ Section 6, Ubhi PoE

the benefit of existing residents, also increasing patronage and therefore viability.

- 8.79 A Travel Plan¹⁰⁰ has been prepared as part of the planning application and agreed by the Highway Authority. Travel Plans are strongly encouraged in both national and local transport policies and seek to change people's travel behaviour.
- 8.80 OCC did not ask for access improvements between the site and Holton. There are evidently very few destinations in Holton and therefore that calls in question why improvements are necessary to make the development acceptable. The Council's case is limited to the church and the village hall. It is also said that because this is a strategic-scale development then one needs to put some infrastructure there.
- 8.81 The Council's case rests to some extent on the fact that the site is in Holton parish. However, the site was selected because it is on the edge of Wheatley. The schools might be in Holton parish but they function as schools for Wheatley.
- 8.82 The Council's case on the footbridge remains unclear and unconvincing. It is said that the bridge road serves as a barrier. However, the site and pathway are at grade. Roads are entirely normal features. Schoolchildren regularly use the bridge without any obvious issue. There is no evidence of pedestrian accidents in this area.
- 8.83 The real nub of the issue is the allocation. The Council have agreed that the south-west quadrant is their main cause of objection. The balance of all destinations is close to that end of the site, and those houses would have the shortest walk, save for Asda. The Council's planning witness accepted that the western end of the village is better located.
- 8.84 Context is everything. This is not an urban area, it is a rural area. Therefore, what might be achieved in London is not applicable in rural Oxfordshire. Paragraph 77 of the Framework states that decisions should be responsive to local areas whilst paragraph 78 emphasises that development may support the vitality of rural communities and services. The Council accept that the development would support these services.
- 8.85 Accessibility is a factor which weighs significantly in favour of this scheme, notably at the south-west quadrant. It is not a proper basis for refusal.

Affordable Housing

- 8.86 The SHMA identifies an annual requirement of 331 dwellings pa between 2013-2031. The Sedgefield method seeks to address the backlog of 713 dwellings in the next 5 years. This equates to an annual figure of 474 affordable homes between 2019/20 and 2023/24¹⁰¹. The Sedgefield approach was endorsed by the Inspector in the Davenham appeal¹⁰² in 2016 who concluded:

¹⁰⁰ CD1.14

¹⁰¹ Pages 57-60, Stacey PoE

¹⁰² PINS ref: APP/A0655/W/15/3005148 (Appendix JS30)

“The Strategic Housing Market Assessment 2013 identified a need for an additional 714 net affordable dwellings per annum between 2013 and 2018 if the backlog for such dwellings are included and delivered within 5 years. Whilst I understand this figure would be considerably less if the backlog of affordable housing demand were to be cleared over a longer time period, I do not understand the Council’s justification for adopting such an approach, especially since it has adopted the ‘Sedgefield’ method in relation to dealing with its overall housing shortfall requirement.”

8.87 The development would provide up to 327 market homes and 173 affordable homes (34.57%). Those in most need should be dealt with in quickest possible time. It is agreed that the existence of either a 5YHLS or (if applicable) a 3YHLS cannot amount to any kind of cap on development. The Council consequently accept that the provision of market housing (irrespective of the 5YHLS position) is a benefit to which “significant weight” must be attached. They further accept that “significant weight” should be attached to affordable housing.

Housing requirement

8.88 The Appellant puts forward 4 possible scenarios:

- 1) Scenario A (the Council’s position) the Standard Method (632dpa from 2019)¹⁰³;
- 2) Scenario B based on the Growth Deal (Oxfordshire SHMA OAN plus South Oxfordshire’s contribution to meeting Oxford City’s unmet need (775dpa from 2011 plus 495 homes per year from 2021))¹⁰⁴;
- 3) Scenario C the Oxfordshire SHMA OAN (775dpa from 2011)¹⁰⁵, and
- 4) Scenario D the South Oxfordshire Local Housing Need (1,035dpa from 2019)¹⁰⁶.

8.89 Scenario A is not appropriate and the Council should not be permitted to rely upon the Standard Methodology figure for the following reasons:

- i. Paragraph 73 of the Framework and Footnote 37 have been amended by the Written Ministerial Statement, following agreement of the OHGD;
- ii. The Council’s acceptance of the OHGD expressly entails acceptance of a higher requirement, and
- iii. Application of the standard methodology would cause the Council to fall significantly behind the necessary growth figures.

8.90 The Council’s case is premised on a narrow reading of paragraph 73 and Footnote 37 of the Framework that local housing need must be calculated using the standard method set out in national guidance.

¹⁰³ Table 2, Appendix E

¹⁰⁴ Table 3, Appendix E

¹⁰⁵ Table 4, Appendix E

¹⁰⁶ Table 5, Appendix E

8.91 Both paragraph 73 and Footnote 37 must be read in the context of the Framework as a whole. Paragraph 59 sets out the national policy imperative of “*significantly boosting the supply of homes*”. Paragraph 60 provides that in determining the minimum number of homes required, it is permissible to use an alternative approach to the standard methodology. This is supported by PPG 2a-010 “*When might it be appropriate to plan for a higher housing need figure than the standard method indicates?*” which identifies the following as “*situations where increases in housing need are likely to exceed past trends*”:

- “*growth strategies for the area that are likely to be deliverable, for example where funding is in place to promote and facilitate additional growth;*
- *strategic infrastructure improvements that are likely to drive an increase in the homes needed locally; or*
- *an authority agreeing to take on unmet need from neighbouring authorities, as set out in a statement of common ground;*”

8.92 Each of these apply directly to the position in Oxfordshire generally and in South Oxfordshire specifically as a constituent authority, as set out below under Scenario B. Paragraph 6 of the Framework further makes clear that its text can be supplemented by further statements of government policy (i.e. of equivalent force), in 2 specific forms:

“Other statements of government policy may be material when preparing plans or deciding applications, such as relevant Written Ministerial Statements and endorsed recommendations of the National Infrastructure Commission.”

8.93 The 12 September 2018 WMS altered the wording of paragraph 11d of the Framework, by reference to the then provisions of paragraph 73. It was clearly the intention of both the Oxfordshire authorities and the Government that the 100,000 homes figure would form the basis for all calculations of housing land supply in Oxfordshire. The Technical Consultation on Updates to National Policy and Guidance did not alter the effect of the WMS, as it was intended to relate to the use of the standard methodology in general: i.e. outside the Growth Deal authorities. Furthermore, the Government had expressly endorsed the NIC Recommendation¹⁰⁷.

8.94 Scenario B is the housing requirement figure which is most consistent with national planning policy as expressed in the WMS. As set out in the Appellant’s evidence¹⁰⁸, the OHGD¹⁰⁹ links the time-limited planning flexibilities which support a 3YHLS threshold to the delivery of 100,000 homes across Oxfordshire between 2011-31, stating: “*any potential flexibility would be granted specifically to support delivery of the ambitious Oxfordshire housing deal to plan for and support the delivery of 100,000 new homes by 2031, and to submit and adopt a joint statutory spatial plan.*”

8.95 The Council’s attempts to argue that a) the OHGD commitments are not relevant to decision-making; and b) decouple the planning flexibilities from the OHGD commitment to higher housing numbers are unfounded. The OHGD and

¹⁰⁷ See CD20.5 & CD20.6

¹⁰⁸ Ireland PoE

¹⁰⁹ CD10.4

the flexibilities come as a package. This is clear from the NIC Report and the Government's response. The Government expressly endorsed the NIC recommendation that to maximise the economic potential of the Cambridge-Milton Keynes-Oxford Arc, current rates of housebuilding need to double to build up to one million homes by 2050. South Oxfordshire sits within the Arc.

- 8.96 The Government's mechanism for achieving this was, and remains, through Housing and Growth Deals of which that with Oxfordshire is the first within the Arc. Recommendation 6 in the NIC Report was that the Government should consider the need for extending flexibilities in the application of 5YHLS requirements but *"only in cases where local authorities agree deals to accommodate significantly higher levels of housing growth."* Such agreements, the NIC said, should be kept under review and *"subject to local areas demonstrating progress in the delivery of major housing growth."* It set out that *"in all cases, agreement must preserve the requirement for local authorities to maintain a supply of land sufficient to enable house building at a rate that would have been required in the absence of any deal to support additional housing growth."*
- 8.97 These recommendations were expressly endorsed by the Government in its response, which in respect of flexibilities in the application of 5YHLS requirements which stated that *"Government would work with local areas on a case by case basis to negotiate bespoke arrangements in exchange for commitment to substantial housing growth, which will ensure that overall land supply will increase despite flexibilities applied to the application of the 5YHLS requirement. The government has done this through the Oxfordshire Housing and Growth Deal, where local authorities are planning for significantly greater levels of housing growth than their Local Housing Need Assessment."*¹¹⁰
- 8.98 This therefore constituted a clear endorsement of the NIC recommendations that would thus be material to deciding planning applications. Indeed, the Government were not merely endorsing the recommendation, they were and remain in the process of actually implementing it in Oxfordshire. As examined in evidence, the application of the 3YHLS together with the standard method would result in a threshold deliverable supply of just 1,896 dwellings above which the tilted balance is not engaged. This falls substantially below the position in which a standard method is used with a 5-year threshold¹¹¹ clearly showing that the Council's position is not consistent with the statements above.
- 8.99 The rationale for the OHGD figure is set out across a series of documents. Each point to particular factors which ensure that the actual housing need is far higher in Oxfordshire than could be provided for under the standard method.
- 8.100 The Oxfordshire Baseline Economic Review¹¹² identified that Oxfordshire is one of the strongest economies in the UK. It is in a strategic location, forming an integral part of the Golden Triangle. It has a series of keystone assets in addition to the globally recognised universities, including two high-level research facilities and major funds of this ensures strong growth. Recent economic performance has been very robust: jobs growth has been 1,400 jobs

¹¹⁰ Pages 16-17, CD20.6

¹¹¹ Table 2, CD16.5

¹¹² CD10.12

per annum since 2011 and within Oxfordshire, 8,650 jobs per annum since 2011. Those are very substantial scales of job growth, absolutely and comparatively. There remains substantial future growth potential.

- 8.101 At the same time, there has been a major affordability problem. House prices are well above regional and national averages. South Oxfordshire's house price stand at 63% above national average. The National Housing Federation report¹¹³ finds that the average house prices in South Oxfordshire stand at 14 times average income. Between 2013 and 2018 average house prices increased in South Oxfordshire by 41%. There is a stronger relative supply/demand imbalance in South Oxfordshire which is already leading to a significant long-term strategic imbalance. Households on lower-quartile earnings are spending 44% gross earnings on rent such that affordability issues exist in both rental and sales market. Poor housing affordability acts as a deterrent to young professionals hoping to live in Oxfordshire. Without these workers the area's ability to fill positions in high tech and innovative business sectors would be hampered weakening Oxfordshire's competitiveness: Businesses already say that housing affordability is having a material impact, impacting upon innovation, research and productivity and threatening growth potential¹¹⁴.
- 8.102 The OHGD therefore commits Oxfordshire to planning for and support the delivery of 100,000 homes based upon the SHMA to a figure which was recognised as significantly in excess of the Local Housing Need. It is pertinent to consider the implications of South Oxfordshire's withdrawal from the OHGD.
- 8.103 The SHMA was identified as the only evidenced approach for the 100,000 target and accordingly it has been treated by the Council as a sound justification for an uplift consistent with the PPG¹¹⁵. The Scenario C figure does not make provision for the unmet need, it would fall short of meeting the Growth Deal target. However, it is a useful illustration of the extent of the housing need and the inadequacy of the standard method in this context.
- 8.104 Chapter 6 of Mr Ireland's PoE sets out the wider housing needs evidence in the context of the PPG's recognition that the standard method is merely a baseline and the Oxford authorities have recognised the need to plan for a higher growth figure. It considers more recent evidence than was available to the authors of the SHMA. Having adjusted for migration and household formation rates in younger households, it considers the severe affordability issues. It then considers the economic position and identifies that there is abundant supporting evidence of the need to accommodate employment growth. This identifies an incremental growth rate of 1.1% pa in jobs and transformational growth at 1.3 – 1.4% pa. The Appellant has modelled 1.3% in line with Transformational Growth. On this basis, it identifies the realistic Assessment of Local Housing Need as 1035dpa from 2019 onwards¹¹⁶.
- 8.105 The Appellant's housing supply scenarios are set out in Appendix E to this report.

Planning balance and Green Belt balance

8.106 If the proposal is inappropriate development in the Green Belt then the Appellant must prove very special circumstances. The factors which go into making very special circumstances do not have to be rare or uncommon to be special and there is no restriction on what might be considered as "other considerations"¹¹⁷.

8.107 There is clearly a general need for housing given the shortage and affordability problems which is directly impacting on the economy and the social dimension of sustainable development in Oxfordshire and the acute need for affordable housing. The Ministerial statement from Greg Clark¹¹⁸ and Brandon Lewis¹¹⁹ make clear that housing need will not normally or usually be sufficient to demonstrate very special circumstances. These statements are acknowledged, and the Appellant's case is not predicated solely on the basis of just housing need. The Appellant has sought to focus on 6 key factors, which is a list similar in extent to that adopted by the Inspectors in Effingham¹²⁰ and West Malling¹²¹. They are in summary:

- 1) the shortage of housing in the area and serious affordability problems affecting the local economy and the delivery of to 327 market houses;
- 2) the acute need for affordable housing and the delivery of 173 units with this scheme;
- 3) the use of an extensive area of PDL in the Green Belt;
- 4) removal of a huge quantum unsightly buildings which are agreed to measure 125,500m³ which is the same volume as what is proposed. And replace it with a similar volume of built development, with in particular without the tall 35m tower and the agglomeration of institutional scale buildings which are completely alien in the Green Belt;
- 5) OBU is a charity and therefore the revenues from the land sale would fund the improvements to the University which is recognised to be a major contributing or part of the economy of Oxford, and
- 6) the fact the site has been identified in the evidence base to the eLP as a suitable location for at least 300 houses and removal of the site from the Green Belt.

8.108 Based on the above it is clear that the Appellant's case does not rely solely on housing need. However, if there is a shortfall in the 5YHLS or 3YHLS then that would be an additional 'other consideration'.

8.109 The purpose of including land in the Green Belt are concerned with designation of the site. The various Green Belt studies in the Landscape SoCG¹²² show that the degree of harm to the purpose of including land in the Green Belt is limited.

¹¹⁷ Wychavon DC v SSCLG and Butler [2008] EWCA Civ 692 & Brentwood BC v SSE [1996] 72 P&CR 61

¹¹⁸ CD11.01

¹¹⁹ 11.02

¹²⁰ CD8.6

¹²¹ CD7.35

¹²² CD16.2

One needs to be careful with the unit of analysis in these cases as sometimes it is an area larger than the site and sometimes it is not entirely clear where the area extends to. In the 2014 study¹²³ the site scored poorly against the purposes and only gave a high score on the assumption that Wheatley and Holton were settlements, but as they are not towns that is not consistent with paragraph 134b) of the Framework. The purposes were again examined in both the 2015 Kirkham Study in 2015 and the LUC report. With the removal of the tower the site is given a low moderate rating in terms of the harm, which was the lowest category applied to any of the sites in the study. This is entirely supportive of the Appellant's case. It followed on from the Kirkham Study in 2015 and is clear that the LUC report "*builds on the 2015 study and takes it to the next level of detail in terms of assessing the harm to the Green belt from the potential release of sites*".

- 8.110 To show very special circumstances the benefits need to outweigh the harm by reason of inappropriateness and any other harm. The Council say this includes harm to the purpose of including land in the Green Belt and harm to openness.
- 8.111 The Appellant's position is that there is no other harm here. There is no harm to openness, no harm to the purpose of including land in the Green Belt, no harm to heritage assets, the local character of the area or landscape harm and no harm in terms of accessibility. The Appellant says there is no harm but if there is harm then the 'other considerations' are so significant that such harm would be outweighed thus amounting to the very special circumstances.
- 8.112 Inspectors in other Green Belt cases have not felt the need to explore the issue of the tilted balance in their decisions when they have found there are very special circumstances. That is because all the harm will have been considered in the very special circumstances test: And if it passes that high hurdle, then surely planning permission should be granted.
- 8.113 But those were Inspectors' own decisions and this is a SoS case, so there is a basis for needing to explore this in case the SoS wishes to go on to consider the case against the tilted balance. The tilted balance here could be triggered by 2 events. The first is the shortfall in the 5YHLS, which is addressed in the evidence above. The second is if the policies most important for determining the application are out-of-date. The University argues both, but either is sufficient. As noted above the shortfall in the 5YHLS would also amount to an additional part of the University's case on very special circumstances.
- 8.114 On the assumption that the most important policies are out of date, then in this case one must turn to paragraph 11d(i) of the Framework because the site is affected by 2 of the policies identified in Footnote 6. The approach to take to this is set out in Monkhill¹²⁴. Sites in the Green Belt and affecting heritage assets are not automatically excluded from the tilted balance. It is just that such sites must pass the policy tests in those parts of the Framework, such that there is not a clear reason for refusing permission. In this case that requires the proposals to pass the test of being not inappropriate development in the Green Belt or that very special circumstances are proven, and that the test in

¹²³ OCC Investigation into the potential to accommodate urban extensions in Oxford's Green Belt: Informal Assessment 2014 (Appendix 8 CD16.2)

¹²⁴ Monkhill Ltd v SSHCLG [2019] EWHC 1993 (Admin) (CD9.16)

paragraph 196 of the Framework is passed as regards the heritage assets. If that occurs then as per paragraph 45 of the Monkhill case then the tilted balance should be applied.

8.115 Even if the tilted balance does not apply, planning permission should be granted here under the conventional statutory test of Section 38(6) of the 2004 Act because other material considerations plainly outweigh the development plan, which is out-of-date and inconsistent with the Framework such that its policies should be given reduced weight. This was the approach taken by the Inspector at paragraph 81 of the Lower Shiplake decision¹²⁵.

8.116 The basic planning merits of the case are straightforward. When viewed on the basis of "need" vs "harm" there is a clear and demonstrable need for new dwellings in South Oxfordshire. In contrast, there is very little, if anything, in the way of harm to suggest that that need should not be satisfied. Indeed, there are many improvements to the environment and amenities of the village arising as a result of the proposals as set out above.

8.117 The implications of not proceeding with the appeal scheme are that the site would ultimately fall into disuse, once vacated. The site would continue to present as an incongruous element, visible through the vacant tower on the horizon. This is a far cry from the obvious beneficial use of the site through housing development.

9. The Case for Interested Persons

9.1 The following paragraphs summarise the statements made by interested parties and their answers to questions. The full texts used by interested persons are within the Inquiry Documents. Points already covered by another interested party have not been repeated.

Cllr Sarah Gray

9.2 The proposed development is inappropriate due to its impact on the openness of the Green Belt. It spreads significantly beyond the curtilage of the existing buildings and its scale and form would be permanently detrimental in nature.

9.3 The Council is committed to a radical reduction in carbon emissions by 2030. This development would fail to meet the demands of 21st Century living within our ever more crowded district.

9.4 On the 11th April 2019, under its previous administration, the Council declared a climate emergency. In September 2019, the Council formed a Climate Emergency Advisory Committee with the responsibility to identify means of ensuring that SODC is carbon neutral within its own operations by 2030. To understand the environmental impact of this proposal, the following need to be considered:

- Climate change – How will the development improve air quality in the area (under cross examination Cllr Gray conceded that she had not read the relevant chapter of the ES which deals with Air Quality). How will the development reduce the contribution to climate change made by its buildings

¹²⁵ ID4

and other infrastructure? It must also support the resilience of the area to climate change including flooding.

- Transport –Currently the development has no real connectivity to either Holton or Wheatley. Wheatley already experiences traffic congestion and there is no scope to increase parking spaces. Sustainable transport measures are required (under cross examination Cllr Gray welcome the infrastructure improvements being proposed as part of the appeal scheme).
- Biodiversity – This requires that the development enhances the current open space to ensure it meets its full potential to supports flora and fauna. Extending the built-up area into existing open spaces is not an option.
- Landscape and heritage – Those open spaces that are vital to the character of the site and the historic environment must be protected.
- Land and resources – The development needs to ensure the efficient and effective use of land. Sustainable waste management solutions that encourage a reduction in waste and an increase in recycling should be promoted.
- Community and affordable housing – The development should cater for the needs of existing and future residents as well as the needs of different age groups in the community and improve access to local community services and facilities (under cross examination Cllr Gray accepted that there is a real need for housing in the area). Affordable housing of an appropriate mix and tenure needs to be provided (under Cross examination Cllr Gray accepted that the development would provide suitable levels of affordable housing and that the SoS should give weight to that benefit). The Council supports measures to address the shortfall of affordable and social housing in the area. There is no evidence that increasing the supply of houses reduces the cost.

9.5 Cllr Gray advocated a new Local Plan that prioritises the building of more social housing and cited examples from Eastleigh and Hampshire. It was estimated that it would take approximately 3 years to adopt a new plan.

Mr Kevin Heritage

9.6 Mr Heritage is a Wheatley Park School Manager and raised some legal issues relating to the western site access. There was also a request for new fencing along the school's southern boundary to assist with security.

Mr John Fox

9.7 Mr Fox is Chairman of the eWNP Committee and a former district Councillor who lost his seat in the May 2018 local elections.

9.8 The eWNP Committee has consistently supported the Council's allocation of 300 homes on the built form of the appeal site. The site is separated from Wheatley by the A40 and the lack of connectivity has been raised as a concern. Wheatley has been described by OCC as a 'rat-run' and congestion is a problem. The first draft of the eWNP in January 2018 looked at infrastructure challenges in the village. A new bridge over the A40 was ruled out at that stage.

9.9 The eWNP Committee opposes the current proposal for 500 homes. The area map was drawn up in November 2015 by Holton and Wheatley Parish Councils. In seeking to influence development outside the area boundary the eWNP may have strayed beyond its remit at times but that was in good faith.

Mr Roy Gordon

9.10 Mr Gordon is Vice-Chair of the eWNP Committee. Policy STRAT14 of the eLP is reflected in the eWNP. OBU has made representations on the eWNP that Policy SPOBU – WHE25 attempts to deal with matters outside the eWNP designated area. The wording in the latest draft has been amended to reflect this.

9.11 The walk into Wheatley from the appeal site is a lengthy one and takes approximately 25 minutes from the bus terminus. Such a distance will be a barrier to integration. This will lead to car dependency.

9.12 Previous development proposals on the appeal site have only been supported on the basis that they do not exceed 10% of the existing built form. The removal of the tower is welcomed as it is detrimental to many views in the area. However, this should not be used to justify volume dispersal across the site which simply transfers the negative vertical features into horizontal ones. Development should be contained to the existing built-up area.

Mr Robert Barter

9.13 Mr Barter is Chair of Holton Parish Council and states that less than half of the site is PDL. The development is therefore inappropriate development in the Green Belt. There are no very special circumstances.

9.14 The allocation in the eLP offers no help as that plan has caused so much uproar that it will not be allowed to proceed in its current form. An additional 500 dwellings would adversely transform the rural character of the village and the whole area. Because of its location it would be an isolated settlement where almost all journeys would be made by car.

9.15 In the words of the Council "*additional school capacity will be difficult if not impossible in the early years*". An influx of 1500 new patients would overload the doctors' surgery.

9.16 The status of the Appellant is irrelevant and any benefits to the education sector carry no weight.

Mr Smith

9.17 Mr Smith is a resident of Holton. He argues that cycling and walking will not happen and that the decision should be taken by local people. The SoS should not decide the outcome of the appeal.

10. Witten Representations

10.1 The officer report¹²⁶ does not record the number of representations received but does summarise the issues raised:

Objections

- Insufficient justification to build on undeveloped Green Belt land;
- The development will have an unacceptable visual impact on the open nature of the Green Belt;
- The development should be constrained to the eastern section, replacing the existing buildings only;
- 500 houses will significantly change the character;
- Proposal for 4-storey dwellings are completely out of character with the neighbouring villages;
- Scale of development is excessive – the eLP suggests 300, not 500;
- Development at this elevated end of the site will compromise the parkland setting of the listed building;
- Roads are already too congested, resulting in a displacement of traffic through Holton (creation of rat-runs etc). This would result in further congestion and risk to highway safety as there is a lack of pedestrian footpaths/pavements;
- Access roads are unlikely to be able to cope with the increased traffic - the centre of the village of Wheatley is extremely congested already, and parking is already an issue in Wheatley;
- The proposal has made no attempt to integrate Holton and Wheatley, despite the fact that the future residents will be using Wheatley for daily errands;
- Lack of infrastructure to support a development of such a scale;
- Facilities are too far from the site, meaning residents will be dependent on cars to drive into Wheatley and use services;
- There should be a footbridge over the A40;
- GP and other services will struggle to meet needs of more households;
- There are no additional services (shops, pubs etc) being provided and these would need to be created to serve the extra residents;
- Insufficient parking proposed to serve the new sports facilities and pavilion;
- Lack of information on who will provide and maintain the proposed onsite re-provision of sporting facilities;

¹²⁶ CD4.1

- The removal of sports facilities is unacceptable;
- Compatibility of proposed facilities with existing pitches;
- Security of school site, in light of proposed western access;
- Loss of important trees which were planted by the community;
- Risk of harm to protected species;
- This proposal only benefits Brookes and not any of the local residents, and
- Even with amenity space, the wildlife will be diminished and will suffer.

In support

- Building on a previously developed site is supported, over greenfield development, subject to the relevant infrastructure being provided;
- Affordable housing is needed and being provided as part of the proposal; thereby meeting the housing needs of young people and providing local families the opportunity to stay in the village;
- The buildings are in poor repair, and housing is needed in the local area;
- It is closer to city than other proposed sites, as well as facilities such as the hospital, employment and leisure;
- Oxford Brookes are already planning to relocate, so if the site isn't developed it would leave a vacant site as an eyesore;
- The location is close to good services and the site has easy access to the A40/M40 and the Oxford park and ride, and
- The development is located close to Wheatley and will therefore support the local economy, business and trade.

11. Conditions

11.1 A schedule of conditions¹²⁷ to be imposed should planning permission be granted, was discussed at the Inquiry. These are generally agreed between the parties. I raised the possibility of an additional condition relating to the SM and subsequently wrote to the main parties after the close of the Inquiry seeking their views. I have taken the responses into account¹²⁸.

11.2 The list of conditions that I recommend should be attached to the outline permission in the event that the SoS concludes that the appeal should be allowed is set out at Appendix D. In some instances, I have amended or combined the agreed conditions in the interests of brevity and to ensure compliance with the PPG.

11.3 Conditions 1-3 are standard conditions for outline planning permissions. The Council had sought to halve the standard time limits for the permission but in

¹²⁷ ID25

¹²⁸ See ID30

view of the advice in the PPG¹²⁹ and the complexity of the development including the amount of site clearance, I do not consider that would be appropriate in this instance. Condition 4 is imposed for the avoidance of doubt and to ensure that the development is carried out in general accordance with the approved plans and details.

- 11.4 A site-wide phasing plan is necessary to ensure the development comes forward in a coherent and planned manner (Condition 5). I have amended some of the wording around affordable housing to ensure sufficient flexibility to enable the development to respond to changing market conditions and housing needs. I have also incorporated the requirements of other suggested conditions into Condition 5 to avoid the need for multiple phasing plans and other strategies. Condition 6 is necessary in the interests of highway safety. A construction method statement (Condition 7) is necessary to protect the amenity of nearby residents. A drainage condition is necessary to ensure satisfactory drainage of the site in the interests of flood prevention (Condition 8). An archaeology condition is necessary to protect any archaeological assets that may be present (Condition 9). A land contamination condition is necessary to ensure the land is suitable for a residential use (Condition 10).
- 11.5 A significant amount of ecological information was submitted with the EIA¹³⁰. The scope of the various wildlife surveys was agreed with the Council's Countryside Officer beforehand. Those surveys confirm that some parts of the site support protected species including bats, great crested newts, reptiles, badger and nesting birds. These habitats would be retained, recreated and enhanced through management delivered through measures set out in a Construction and Demolition Environmental Management Plan (CEMP) (Condition 11). As the presence of protected species on the site has already been established and given that there is no suggestion from the Council that the surveys are out of date or deficient in any other way, I have omitted the requirement for updated surveys to be submitted. A biodiversity enhancement plan is necessary to avoid a net-loss to biodiversity (Condition 12).
- 11.6 A condition relating to tree protection measures is necessary to ensure trees are not damaged during the construction period (Condition 13). A condition is necessary to ensure the requisite parking and access arrangements for each dwelling are provided prior to occupation (Condition 14). A Travel Plan condition is necessary to promote sustainable travel habits (Condition 15). To assist the move to a low carbon future, conditions regarding electric vehicle charging points and super-fast broadband are necessary (Conditions 16 and 17). A noise mitigation strategy is necessary to protect future occupiers from road noise (Condition 18). Finally, to secure the heritage mitigation, a condition relating to the SM is necessary (Condition 19).
- 11.7 A condition restricting the development to no more than 500 dwellings is unnecessary as this development concerns operational development rather than a change of use and the application description explicitly limits the permission to '*up to 500 dwellings*'. The suggested condition relating to gas boilers is not supported by a development plan policy. Moreover, I am not aware there is a

¹²⁹ Paragraph: 027 Reference ID: 21a-027-20140306

¹³⁰ CD1.15

designated Air Quality Management Area covering the site. I am therefore satisfied that the specification of the boilers is a matter that would be dealt with by other legislation. I have omitted those conditions accordingly. The requirements of several of the suggested conditions are repetitious and/or are covered by Condition 5 or the S106.

11.8 Conditions 5, 6, 7, 8, 9, 10 and 13 are pre-commencement form conditions and require certain actions before the commencement of development. In all cases the conditions were agreed by the Appellant and address matters that are of an importance or effect and need to be resolved before construction begins.

12. Planning Obligations

12.1 I have assessed the S106 in light of the CIL Regulations 2010 and paragraph 56 of the Framework which state that planning obligations must only be sought where they meet the following tests:

- Necessary to make the development acceptable in planning terms;
- Directly related to the development; and
- Fairly and reasonably related in scale and kind to the development.

12.2 Although the obligations are not in dispute, the agreement¹³¹ provides that if the decision letter concludes that any provision of the agreement is incompatible with any one of the statutory tests then the relevant obligation shall cease to have effect. The obligations contained in Schedules 1-4 relate to SODC and those in Schedule 5-7 to OCC.

12.3 Schedule 1 is concerned with affordable housing and would bind the site owners to ensure that 34.57% (172 units) of all dwellings constructed comprise affordable homes in accordance with the affordable housing mix of 75% Affordable Rent and 25% Shared Ownership. The Council has sought to secure 40% affordable housing in compliance with CS Policies CSH3 and CSH4. However, due to the existing buildings on site the scheme qualifies for a small reduction through the Vacant Building Credit. I am satisfied the affordable housing obligation meets the relevant tests.

12.4 Schedule 2 sets out the financial contributions to SODC and include the following:

- An off-site artificial football pitch (to be provided in the local area) contribution of £985,000;
- An off-site tennis court (to be provided in the local area) contribution of £365,000;
- An active communities contribution of £96,001 to fund a new member of staff at SODC;
- A public art contribution of £300 per dwelling. How this would be spent would be determined through a public art strategy which would need to be submitted to and approved in writing by the Council;

¹³¹ Paragraph 6.12, Page 9 (ID26)

- A recycling contribution of £170 per dwelling to provide each dwelling with the necessary bins;
- A street naming contribution of £134 per 10 dwellings, and
- A monitoring fee of £5,190

12.5 I am satisfied that the football pitch, tennis court, public art, recycling and monitoring contributions all meet the statutory tests. However, I have concerns in respect of the 'active communities' contribution. According to the Council's Compliance Statement¹³² the contribution would fund a 2-year post at SODC the purpose of which would be to "secure the provision and management of sports facilities both on and off site. The replacement sports facilities are required directly as a result of the loss of sports facilities on this site". However, it is not clear on the evidence before me what actual work would be involved.

12.6 A number of facilities are to be provided on-site as part of the development including a new cricket pitch and pavilion, a bowling green and a running route. These facilities would be designed and delivered by the developer as part of the reserved matters applications. Consequently, their delivery would not require a significant amount of additional work on the Council's part.

12.7 The off-site provision is to be dealt with by way of 2 financial contributions. Whilst there would inevitably be some work to identify suitable sites for these facilities, the evidence suggests that sites have already been identified at Holton Playing Field Association site or Wheatley Park school. Whilst some further feasibility work might be required, it is not reasonable to suggest that this would require a 2-year, full-time post holder. In any event, the build costs provided by Sport England for the football pitch and tennis courts, include an allowance of 6% for project management and other fees. That amounts to a sizeable sum which in my view would be more than sufficient to cover the Council's costs. I therefore conclude that the 'active communities' contribution fails the 3 statutory tests.

12.8 Street naming is an activity which usually falls within the normal, day-to-day functions of the Council. On the information before me it is not clear what additional work or expense would be incurred or exactly how the money would be spent. I am not therefore persuaded that this contribution is necessary to make the development acceptable in planning terms.

12.9 Schedules 3 and 4 secure the on-site LEAP, a marked 'active route' within the development, public open space covering a minimum of 10.69ha, a bowling green, cricket pitch and pavilion as well as maintenance and sinking fund contributions for their future maintenance. I am satisfied that these obligations and contributions meet the statutory tests.

12.10 Schedule 4 includes a £70,000 contribution towards the provision of 'expert advice' in relation to the construction of the sports pavilion, bowling green and cricket pitch. The evidence supporting the contribution is scant. The Council's CIL Compliance Statement states that the costs have been calculated following quotes from relevant experts. However no further information is provided. In my view the construction of a bowling green and cricket pitch are not large and

¹³² Page 10, ID29

complex projects. The latter is to be provided in approximately the same location as the existing pitch. The areas would need to be laid out to certain standard specifications, but such information is relatively easy to obtain and certainly would not require the services of an expert. The pavilion would of course require more assessment but again I do not see the construction of a sports pavilion as an overly complex project that would require specialist advice to be engaged.

12.11 It is also pertinent that these facilities are to be designed and delivered by the developer who would bring their own experience to bear on these matters. Finally, it is also not clear to me why Sport England could not be consulted on the relevant reserved matters applications. Based on the foregoing the 'expert evidence' contribution does not meet the relevant statutory tests.

12.12 The obligations to OCC in Schedule 5 comprise:

- £105,705.73 towards the provision of 3 pairs of bus stops within the site;
- A public transport contribution of £720,000;
- A Travel Plan monitoring fee of £2,040.

12.13 I am satisfied that these contributions are necessary to encourage non-car modes of travel and meet the statutory test. Schedules 6 and 7 deal with the agreed on and off-site highway works which are set out in paragraph 3.1. These would be delivered by the Appellant through the appropriate legal agreements with the Highway Authority. I am again satisfied that these obligations meet the statutory tests.

12.14 A request was made by the NHS Oxfordshire Clinical Commissioning Group for a developer contribution of £432,000 to support the improvement of local health care infrastructure. The Council has confirmed that 'increasing capacity at existing health services/local surgeries' is covered by its CIL Regulation 123 list¹³³.

13. Inspector's Conclusions

13.1 On the evidence before me, the written representations, and my inspection of the appeal site and its surroundings, I have reached the following conclusions. References in square brackets [] are to earlier paragraphs in this report.

Main issues

13.2 The main parties hold differing views regarding the degree of heritage, landscape and Green Belt harm, the weight to be attributed to the various benefits of the scheme, the consistency of the relevant development plan policies with the Framework, whether the Council has a 5YHLS and the resulting planning balance. Against this background, and in view of the evidence submitted in writing and presented orally at the Inquiry, I consider the main issues are:

1. Whether the most important policies are out of date;

¹³³ See Page 10, CD4.1

2. Whether the development is inappropriate development in the Green Belt for the purposes of the Framework;
3. The effect of the development on the character and appearance of the area;
4. The effect of the development on the setting on heritage assets;
5. Whether the location of the development would be sustainable in transport terms;
6. Whether the Council can demonstrate a 5YHLS, and
7. If the development is inappropriate development, whether the harm by reason of inappropriateness, and any other relevant harm, is clearly outweighed by other considerations, so as to amount to the very special circumstances necessary to justify it.

Most Important Policies

- 13.3 Section 38(6) of the 2004 Act requires that this application be determined in accordance with the development plan unless material considerations indicate otherwise. One such material consideration is the Framework, which can override development plan policy if it is not consistent with the Framework's provisions. I therefore summarise the national planning policy context first, before turning to look at relevant development plan policies.
- 13.4 Section 3 of the Framework stresses the desirability of local planning authorities having up to date development plans, paragraph 213 states that the weight to be given to relevant policies will depend on the degree of consistency with the Framework. The closer the policies in the plan to those in the Framework, the greater the weight that may be given.
- 13.5 Paragraph 11 of the Framework explains that there is a presumption in favour of sustainable development which comprises economic, social and environmental objectives. It goes on to indicate that where the development plan is absent, silent or relevant policies are out-of-date, planning permission should be granted unless any adverse effects of doing so would significantly and demonstrably outweigh the benefits when assessed against the policies of the Framework as a whole; or unless specific policies in the Framework indicate that development should be restricted. [3.3]
- 13.6 There are differing views on which are the most important policies for determining the application. Whilst I have had regard to the list of relevant policies contained in the SoCG, I have exercised my own judgement following the approach set out in Wavendon which confirms that "*an overall judgment must be formed as to whether or not taken as a whole these policies are to be regarded as out-of-date for the purpose of the decision.*" [3.13,6.2,7.12,8.16,8.115]
- 13.7 The first point to make is that the LP is now of some vintage as the Council accepted at the Inquiry. [3.10-2.13,8.8-8.10] However, as paragraph 213 makes clear, policies should not be considered out of date simply because they were adopted prior to the publication of the Framework. The CS contains policies that are high-level and strategic in nature. Accordingly, they lack the kind of detail one would normally expect to see in development management policies. This is because the CS was always intended to be supplemented by a DPD containing

detailed development management policies. [3.15,8.11-8.13] The consequence of this is that many of the CS policies cited in the RfRs are of little assistance in determining this appeal. [8.12]

- 13.8 The appeal site lies within the parish of Holton and is washed over by the Oxfordshire Green Belt. CS Policies CSS1 and CSH1 set out the overall amount and spatial distribution of housing for the district to deliver the CS housing target. They seek, among other things, to support and enhance the larger villages as local service centres, while focusing major development at Didcot and the market towns. The appeal site is located outside the built limits of Wheatley and Holton where large-scale development would not normally be appropriate.
- 13.9 However, the housing target identified in the CS is manifestly out of date being based on a constrained supply set out in the revoked RPG. [3.11-3.14,8.11] Existing settlement boundaries across the district reflect the need to deliver this constrained supply. The CS does not accord with the objectives of the Framework to meet a full OAN for housing. [8.9-8.11] Therefore, whilst the overall strategy and settlement boundaries may have been appropriate to guide the quantum of development envisaged in the CS back in 2006, they are clearly not appropriate today. I therefore consider that Policies CSH1 and CSS1 are out of date where they are used to restrict development outside settlement boundaries.
- 13.10 Although CS Policy CSEN1 is not referred to in the RfRs it is relevant inasmuch as it refers to the protection of landscapes against inappropriate development. Whilst its broad aims are agreeable with those of Section 15 of the Framework, it runs into the same problem as LP Policy G2 in seeking blanket protection for the natural environment. Apart from 'valued landscapes', paragraph 170 of the Framework entertains no such protection instead referring only to the need to recognise the intrinsic character and beauty of the countryside. In my view 'recognition' and 'protection' are not the same. They are clearly distinguishable terms and accordingly I consider that Policies CSEN1 and G2 are inconsistent with the Framework and cannot be seen as being up to date. I note the Lower Shiplake Inspector came to a similar view in paragraph 77 of his decision in relation to Policy G2. [8.13]
- 13.11 CS Policy CSEN2 is a strategic Green Belt policy that recognises the OBU campus as a key previously developed site but defers to the Framework in terms of decision taking. Whilst the policy is not technically out of date, it offers little assistance to the assessment of the appeal scheme and instead it is the Framework that becomes the determinative document. To that end, I conclude that Policy CSEN2 is not one of the 'most important' policies for determining the application.
- 13.12 LP Policy GB4 is a more detailed Green Belt policy that reflects the wording in Planning Policy Guidance Note 2 revoked in 2012. It refers to "*rural character or visual amenity*" and applies a design test to development all of which are inconsistent with the Framework. Its language is also couched in very different terms to the Framework and does not refer to inappropriate development or very special circumstances. I therefore conclude that Policy GB4 is out of date.
- 13.13 CS Policy CSEN3 is a strategic heritage policy that states that historic heritage assets will be conserved and enhanced for their historic significance. However,

the requirement to maintain and enhance the historic environment goes beyond the statutory duty and paragraph 185 of the Framework, the latter of which requires decision makers to *"take account of the desirability of sustaining and enhancing the significance of heritage assets"*. Blanket protection for the historic environment cannot therefore be seen as being consistent with the Framework. Policy CSEN3 is thus out of date.

13.14 In a similar vein, LP Policy CON5 states that *"proposals for development which would adversely affect the setting of a Listed building will be refused"*. Whilst the general thrust of this policy might well be consistent with the Framework, that is not enough in my view. The policy does not allow for the weighing of public benefits against heritage harm and therefore cannot be seen as being in conformity with the Framework. I therefore consider Policy CON5 is out of date. For similar reasons the approach to archaeological remains advocated by Policy CON11 is also inconsistent with the cost/benefit approach set out in the Framework.

13.15 CS Policy CSM1 is a strategic omnibus transport policy that includes various items most of which have no relevance to the appeal scheme. Insofar as it 'encourages' the use of sustainable modes of transport, it can be seen as being consistent with the Framework. However, there is no recognition in the policy that the opportunities to maximise sustainable transport solutions will vary between urban and rural areas, as advised in paragraph 103 of the Framework. Despite that, I consider the policy is up to date insofar as it relates to the appeal scheme.

13.16 Finally, Policy CSM2 establishes that proposals for major development must be accompanied by a Travel Plan and a Transport Assessment. There is no suggestion that these documents have not been provided in the case. Accordingly, I do not consider Policy CSM2 passes the 'most important' test.

13.17 Based on the above exercise I consider that the majority of those policies which are most important for determining the application are out of date. As a result, the weight that can be attributed to these policies has to be commensurately reduced and irrespective of the Council 5YHLS position, the default position identified in paragraph 11 d) of the Framework is engaged. [6.9] This is a matter I will return to later in my report.

Inappropriate development in the Green Belt

13.18 Although the site is proposed to be removed from the Green Belt and allocated for development, as things currently stand the site remains in the Green Belt. As with the Officer's Committee Report, my assessment is therefore made on the basis of the existing Green Belt status of the site. [7.1,8.16,8.29] I have found that the Development Plan does not contain any up to date Green Belt development management policies, I have therefore defaulted to advice in the Framework, which both parties have referred to extensively in their evidence.

13.19 Paragraph 133 of the Framework states that the Government attaches great importance to Green Belts, with the fundamental aim of Green Belt policy being to prevent urban sprawl by keeping land permanently open. It goes on to confirm that the essential characteristics of Green Belts are their openness and their permanence, with paragraph 134 explaining that Green Belt serves 5 purposes:

- a. to check the unrestricted sprawl of large built-up areas;
- b. to prevent neighbouring towns merging into one another;
- c. to assist in safeguarding the countryside from encroachment;
- d. to preserve the setting and special character of historic towns; and
- e. to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.

13.20 In paragraph 145 of the Framework gives various exceptions of where the construction of new buildings in the Green Belt would not be inappropriate. One such exception is:

“limited infilling or the partial or complete redevelopment of previously developed land, whether redundant or in continuing use (excluding temporary buildings), which would:

– not have a greater impact on the openness of the Green Belt than the existing development; or

– not cause substantial harm to the openness of the Green Belt, where the development would re-use previously developed land and contribute to meeting an identified affordable housing need within the area of the local planning authority”

13.21 In order for the appeal scheme to benefit from this exemption, it must first be demonstrated that it is PDL. Annex 2 to the Framework provides the following definition of PDL:

“Land which is or was occupied by a permanent structure, including the curtilage of the developed land (although it should not be assumed that the whole of the curtilage should be developed) and any associated fixed surface infrastructure. This excludes: land that is or was last occupied by agricultural or forestry buildings; land that has been developed for minerals extraction or waste disposal by landfill, where provision for restoration has been made through development management procedures; land in built-up areas such as residential gardens, parks, recreation grounds and allotments; and land that was previously developed but where the remains of the permanent structure or fixed surface structure have blended into the landscape.”

13.22 The determinative issue in this case is whether the appeal site is PDL in the terms set out in the Framework. As much of the western part of the site is devoid of permanent structures, the PDL question principally turns on whether the whole campus falls within the curtilage of those permanent structures on the site. [8.30]

13.23 The Courts have consistently held that the extent of a curtilage will be a matter of fact and degree and will depend on the particular circumstances of a case. [7.5,8.31,8.32] There is broad agreement that the central and eastern parts of the site, currently occupied by the university buildings and dwellings, are curtilage. [7.5]

13.24 The western half of the site is however appreciably more open and contentious. [7.21]. A significant portion of it along with a strip of land along the southern site

boundary comprises the university's sport pitches. [2.3,4.3,8.33,8.53,8.55,8.59] These pitches and the circulation areas around them clearly perform an important functional purpose related to the campus buildings. [8.34] Cognisant of the Sinclair-Lockhart judgement¹³⁴ and the dictionary definition of a "*campus*", I am satisfied that these areas fall within the curtilage of the university buildings. [8.34] Whilst the Council has drawn my attention to the brownfield register plan, there are very few details before me as to how or when this plan was drawn up. [7.4] On its face, the plan that simply reflects those parts of the site that are occupied by permanent structures. It does not purport to be a detailed examination of the site under the Framework definition of PDL.

- 13.25 There would be no development in the north-west quadrant and therefore, as clarified at the Inquiry, the Council's Green Belt objection principally relates only to the south-west quadrant. [4.3,7.31,8.6,8.19,8.37] This area accounts for approximately 14% of the site. [2.3] The illustrative masterplan indicates this area would be reserved for low-density housing complimented by areas of open space such that not all of the area would be developed. [4.1,4.3,8.19,8.47,8.54]
- 13.26 Whilst historical aerial photographs indicate buildings once stood on this part of the site, there is no meaningful evidence before me as to what these were or looked like. They were evidently removed at some point during the 1950s and any remains have since blended into the landscape. Much the same applies to the golf course that was said to once occupy this part of the site. Today much of the south-west quadrant is covered in a dense scrub and is largely inaccessible save for a mown path which runs parallel to the existing surfaced footpath through the site. The presence of a maintained path is suggestive of some kind of functional link and physical relationship to the wider campus, most probably as part of a circular walk. That could be considered sufficient to bring the south-west quadrant within the definition of curtilage. In my view however the link is a tenuous one. Beyond the mown path, there is little to suggest the area serves a useful purpose to the permanent structures. On balance, I consider that the south-west quadrant is not curtilage and cannot be PDL in the terms set out in the Framework.
- 13.27 Returning to the approach set out in paragraph 145g), it is common ground that the development would address an affordable housing need. [7.63,7.69,8.37,8.87,8.107,9.4,10.1] The next step for those areas that are PDL is to consider whether the development would cause substantial harm (my emphasis) to the openness of the Green Belt. [7.7,8.35-8.38]
- 13.28 To answer that question, much time was spent at the Inquiry discussing the possible implications of the appeal scheme on building volumes. Other than agreeing that the existing buildings total 125,500m³, there is little common ground on the issue. [7.16, 8.40, 8.107] What can be deduced from the competing calculations is that any approach relies on a large amount of guesswork as to what would come forward at the reserved matters stage. This was expressly acknowledged in the Officer's committee report. [8.41] Therefore, trying to determine the exact impact on volume now is a somewhat futile task.
- 13.29 Nonetheless, the Appellant has demonstrated that it would be possible to bring the site forward in a manner that broadly adheres to the existing amount of

¹³⁴ Sinclair- Lockhart Trustees v Central Land Board [1950] 1 P & CR 195, (CD19.4).

volume on the site. [7.18] At the other extreme, the Council argued there could be a significant increase in volume if the site were to be developed in accordance with the maximum limits shown on the parameter plans. [7.16, 7.17, 8.40-8.43]

- 13.30 Even if the maximum permissible volumes were to be pursued and one prefers the Council's 203,500m³ figure, the Appellant rightly points out that the increase in volume would be broadly consistent with the 195,995m³ contained in the Council's SPD. [7.20,8.48]. The Council's 'bottom-up' calculation of 170,000m³ would result in a generous reduction of volume compared to the SPD allowance. [7.18]
- 13.31 The Appellant amended the scheme during the determination period to reduce its potential volume. That indicates to me a willingness to work with the Council on this matter. [1.7,5.2,5.3,7.18,8.4,8.16] It is of course possible that a different developer might pursue a different agenda. If that did happen, I am satisfied that it would be within the Council's gift to control these matters at the reserved matters stage. [8.41-8.43]
- 13.32 Of course, as the PPG acknowledges, openness is multi-faceted and there is clearly a visual aspect also. [7.13,8.38,8.39] There would undoubtedly be significant benefits associated with the removal of the existing agglomeration of large educational buildings including the tower, which is visible over a large swathe of the surrounding Green Belt. [6.3,7.14,7.26,7.35,7.69,8.1,8.40,8.46,8.57,8.69,8.71,8.107,9.13] Although some 4-storey development is proposed in the eastern/central part of the site, I am not persuaded that this would be readily visible from vantage points outside the site. [2.4,7.35] The Council point to the possibility of glimpses from the A40 at night. [7.25] However, I find that unlikely given that the existing boundary landscaping is to be retained and strengthened particularly along the A40 frontage. Even if the occasional glimpse were possible, I do not consider this can reasonably be described as harmful given the current situation where there are floodlit pitches very close to the A40 boundary.
- 13.33 Beyond the 4-storey development in the south-east quadrant, there is no suggestion from the Council that any other parts of the development would be visible outside the site's boundaries. This is because the site undoubtedly has a very high level of visual containment. [2.4,6.3,7.35,8.47] Overall, I consider the development would have a broadly neutral effect on openness as experienced from within the appeal site. However, there would be a significant net-beneficial effect on the openness of the wider Green Belt through the removal of the tower. In conclusion, save for the south-west quadrant, the development would not be inappropriate development in the Green Belt. In view of the wording in paragraph 145g) of the Framework, there is no need to undertake a separate assessment in relation to the 5 Green Belt purposes.
- 13.34 The proposed development in the south-west quadrant would be inappropriate development. The Framework states that such development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances. I will return to this matter in due course. Should the SoS take the view that the whole of the site can be considered PDL then it will not be necessary to consider whether very special circumstances exist.

Character and appearance

- 13.35 Most of the appeal site was formerly part of the historic parkland of Holton Park which survived intact until the early part of the 20th Century. The western part of the site was used as a military hospital during the Second World War and the historical maps provided show a proliferation of roads and buildings during that time. In the 1960s the A40 was constructed along the southern edge of the park. At the same time the site began to be developed for educational purposes and has grown and evolved incrementally ever since.
- 13.36 The site is considered in national, regional, county and local landscape character assessments. However, owing to the site's level of containment and its specific landscape characteristics, these broad-brush studies are of little assistance as the site does not readily conform strongly to any of the key characteristics of the various landscape types. [6.3,7.22,8.58,8.59]
- 13.37 The application was accompanied by a detailed Landscape and Visual Impact Assessment which assesses the likely landscape and visual effects of the development. [8.68] This was supplemented at the appeal stage by a suite of photomontages. Whilst I have had regard to these documents, my assessment is primarily informed by my observations on the numerous site visits undertaken before and during the Inquiry, the latter with the benefit of having heard the evidence of the relevant landscape witnesses.
- 13.38 The site is well contained behind modern fencing and substantial belts of landscaping such that its current visibility within the wider landscape is limited. The site is not a designated or a 'valued' landscape in the terms set out in the Framework. It is common ground that the removal of the tower and other dilapidated structures would be beneficial in landscape terms. [6.3,7.14,7.26,7.35,7.69,8.1,8.40,8.46,8.57,8.69,8.71,8.107,9.13]
- 13.39 The appeal site, although in the countryside for planning purposes, does not possess a strong rural character. The existing buildings including parking areas, footpaths, lighting, engineered sports pitches and the A40 dual-carriageway exert an urbanising influence which extends over most of the site including those undeveloped areas. Given the extensive landscape changes that have taken place over the last 80 years, the 'historic/relic parkland' argument has little resonance to what is seen on the ground today. [7.21-7.23,7.35,8.57-8.58,8.63] That is supported by the John Moore report which found that the former parkland is now "*degraded and "truncated"*". Consequently, even from those open, western areas there is an ever-present feeling of being on a university campus. I therefore consider that the Appellant's description of the site as "institutional" is apt. [7.23,8.1,8.40,8.46,8.60]
- 13.40 The main parties concur that the appeal site is of medium landscape value. In addition to the evidence submitted as part of this appeal, the site has also been considered in a range of reports that form the evidence base to the eLP. The Kirkham Study found that the landscape has overall medium/low landscape sensitivity and that the site should be considered further as a Potential Strategic Allocation on landscape and visual grounds, focussing development around the previously developed area. [7.10,7.12,8.109] A number of recommendations were subsequently made:

- north-western part of potential allocation as open parkland to improve the setting of Holton Park, protect the SM and contribute to the separation of Wheatley and Holton.
- the tower block to be removed and building heights kept to a more domestic scale (2-3 storeys high).
- The developable area should include green links, open space and SUDS features.
- Heights of new buildings should be such that they are not visible above tree lines from adjacent countryside, settlement and roads.
- Create substantial new woodland planting to contain housing and create a new countryside edge, and to link existing woodland to the north-east of the potential allocation with enhanced woodland in the south-western part of the potential allocation.
- Retain and protect valuable specimen and avenue trees and native vegetation, within potential allocation and to outer boundaries.
- Protect and frame views towards the north.
- Preferred access point via existing drive off of Waterperry Road, minimising impact on the rural character of the road.

13.41 The illustrative masterplan shows the probable layout. [4.2] It indicates that the majority of the houses would be located on the currently built-up eastern and central parts of the site. Accordingly, and whilst there would be encroachment into the south-west quadrant, I do not consider that the layout necessarily conflicts with the requirement to “focus” development on the previously developed area. [3.19,3.23,7.1,7.24,8.18,8.5] If it was the case that no development outside built up area would be acceptable, then it is reasonable to conclude that alternative, more definitive, wording would have been used. The fact that the eLP evidence base supports the removal of the whole site from the Green Belt is also inconsistent with the Council’s view that no development should take place outside the built-up area. [3.19,8.18] I have noted submissions about the concept plan to Policy STRAT14 of the eLP. [8.7] However, that plan only appeared after the Council’s decision and in any event carries no weight in view of the Holding Direction.

13.42 The appeal scheme keeps the north-west part of the site as sports field/open parkland. [4.3,7.31,8.6,8.19,8.37] Approximately half the site would be given over to green infrastructure. [4.1,12.9] The tower block would be removed. The 4-storey development would be confined to those parts of the site that currently accommodate substantial built development and where the visual and landscape effects would be minimised. [4.3] As the photomontages demonstrate the heights of buildings would not be visible outside the boundaries of the appeal site above existing trees. New woodland and tree planting would take place, and most of the best trees would be retained. [2.4,4.2] Open green space within the north-western part of the site would retain views towards the north. Accordingly, I am satisfied that the scheme before me is in general accordance with the recommendations of the Kirkham Study.

- 13.43 The Kirkham Study was followed by the SODC-Landscape Assessment Update which reviewed the findings of the Kirkham Study. [7.23] It found that the site (with the exception of the existing tower block) is well contained and inward looking and has no discernible connection to the wider landscape. The conclusion was that the site could accommodate development in landscape terms.
- 13.44 It should be borne in mind that the Council's landscape objections, as clarified at the Inquiry, relate only to the south-west quadrant. I therefore turn to look solely at this area, which the Council describes as "*relict parkland containing trees and shrubs*" with an attractive wooded character. [7.21] The area accounts for approximately 14% of the appeal site and abuts the A40 to the south and the Wheatley Park school site to the west. [2.1-2.4] It appears to have little or no current use beyond an informal footpath across its northern portion. Much of the land is inaccessible and covered in a thick scrub interspersed by a range of deciduous and evergreen trees. The site is well screened from within and outside the appeal site. [2.4,7.35,8.47] Unlike other southern areas, the south-west quadrant sits at a higher level than the A40 and therefore has very little visual exposure from it.
- 13.45 The south-west quadrant has a character that is distinct from the rest of the campus. Nonetheless, I would be hard pushed to describe in quite the same terms as the Council's landscape witness. Whilst it undoubtedly has some landscape and visual value as a parcel of undeveloped green land, that is about as far as it goes. Traffic noise and the modern housing development on the south side of the A40 are both readily apparent. Despite it forming the highest part of the site, outward views are restricted by the mature landscaping both within and along the site boundaries. The trees, some of which might loosely be described as "parkland trees", have some amenity value particularly the "*spreading oak tree*". However, most of these specimens would be retained. The majority of the trees in this area are self-seeded and of little amenity value. There is currently no formal public access and therefore it is difficult to argue that the wider public derive any significant value from this part of the site. Overall, I do not consider the south-west quadrant is particularly sensitive in landscape or visual terms such that it should be excluded from development. The Council's own Landscape Architect concluded that the proposed homes in the south-west part of the site would result in a minor impact to the landscape character and visual quality of that area of the site.
- 13.46 I have noted the Council's view that regard should be had to the "*designed landscape setting*" in the John Moore report. [7.30] This encompasses a wide area that includes most of the north and south-west quadrants of the site. However, the report offers no meaningful explanation as to what the term actually means or how the authors arrived at the area drawn in Figure 4.7.4 which is both excessively large and bears no relationship to the distinct parcels of land that make up the campus. [6.3] Moreover, when assessing how much weight should be given to this and other reports forming the evidence base of the eLP, it needs to be remembered that these are high-level assessments forming the evidence base for the eLP. Their purpose is therefore to highlight heritage and landscape issues rather than to determine what response should be made to those issues. I do not believe the John Moore report was ever intended to be treated as a determining factor in development management decisions without a further, detailed landscape/heritage assessment, which the Appellant has

undertaken. For the above reasons I am giving very little weight to the “*designed landscape setting*” designation.

13.47 Overall, the proposed dwellings would be smaller in scale than the current educational buildings and would be more appropriate to a countryside edge location. Notwithstanding the increased footprint and encroachment into areas that are currently open, the Masterplan and photomontages demonstrate that the spacing and scale of the dwellings would be appropriate to the site’s rural setting and clearly preferably to the existing scenario. [4.2,8.117] All the housing especially that in the south-west quadrant would be visually contained with little impact on the wider landscape. [8.47] The development would read as a logical northern extension to Wheatley albeit separated from it by the A40. There would be a significant visual benefit from the removal of the existing buildings. These benefits along with on-site mitigation in the form of additional planting and landscaping and large areas of open space would be in my view be sufficient to secure an overall net-gain in landscape and visual terms over the wider area. [4.3,6.3,7.14,7.26,7.35,7.69,8.1,8.40,8.46,8.57,8.69,8.71,8.107,9.13]

13.48 Based on the above, I do not consider that the development would harm the character and appearance of the area. Accordingly, I conclude that there would be no conflict with CS Policy CSEN1 or LP Policies G2, C4 and C9 insofar as they seek to protect the district’s countryside and settlements from adverse development.

Heritage assets

13.49 The duty under Section 66 of the 1990 Act requires special regard to be paid to the desirability of preserving a listed building or its setting or any features of special architectural or historic interest which it possesses. The Heritage SoCG confirms that this section is clearly engaged insofar as the Holton Park (Grade II), and St Bartholomew’s Church in Holton (Grade I) are concerned. [6.4]

The SM

13.50 The records held by HE describe the SM as the site of an early moated manor. However, the Appellant’s own archaeological analysis casts considerable doubt on that interpretation highlighting that its size would be insufficient to support such a building and is more likely to have been a windmill platform or parkland feature. HE themselves acknowledge the inability to be certain as to the nature of the monument but judged that “*in all of the possible interpretations of this feature, there is a connection with the earthwork and the relatively open and rural spaces surrounding it.*” [7.29,8.65] HE was not present at the Inquiry and therefore their evidence could not be tested. [8.70]

13.51 The only thing that is known with any degree of certainty is that the site accommodated a statue which is shown on the 1880 OS map. What is abundantly clear today is that the SM strikes a rather forlorn, neglected and uninspiring feature. [8.67] Nothing has been done in recent years to interpret, celebrate or even maintain it. It has been overrun by brambles, nettles and self-seeded trees. Given its current predicament, it is not unreasonable to suggest that the SM goes largely unnoticed and unappreciated by the public at large.

- 13.52 The setting of a heritage asset is defined in the Framework as *“the surroundings in which a heritage asset is experienced. Its extent is not fixed and may change as the asset and its surroundings evolve. Elements of a setting may make a positive or negative contribution to the significance of an asset, may affect the ability to appreciate that significance or may be neutral”*. [8.62] There is no dispute that the SM currently has a fairly open setting and as much as possible this should be retained. [7.29,8.65] The appeal scheme was amended at the application stage to provide additional breathing space for the SM with HE recognising the improvements made [5.2,8.68] The Council point out based on the illustrative masterplan, that the nearest houses would come within 50m of the SM resulting in a high degree of *“less than substantial harm of moderate extent”*. [7.31,7.34]
- 13.53 The uncertainty over exactly what the SM is or was, makes the task of assessing its setting all the more difficult. Nonetheless, it is apparent that its setting has changed dramatically over the last 80 years or so. The deer park and *“open parkland setting”* referred to by the Council are all but gone and all that remains are a few parkland trees dotted around the site, nearly all of which would be retained. [2.4,4.2] The immediate context of the SM are the levelled sports pitches and a bank of mature trees to the south beyond which the land falls away to the footpath and tennis courts. [8.55,8.59]
- 13.54 Adding credence to that view is the John Moore report which states: *“Much of the site has been considerably damaged as a result of modern development and the archaeological remains, if any, presumably considerably degraded. There are one or two areas where the ground surface survives in its pre-20th century level, which includes the scheduled monument and the surrounding features”*.
- 13.55 Insofar as it can be said that the SM derives any of its significance from its setting, I consider that the immediate open area to the north, west and north-west has a moderately positive contribution. This area performs the important role of maintaining indivisibility between the SM and Holton Park and also corresponds to the *“SM and listed building setting implication”* area shown in Figure 4.7.4 of the John Moore report. [7.29-7.30] However, no built development is proposed in this area and on the contrary, the area would be subject to a detailed landscaping scheme intended to restore the original parkland character and appearance. [4.3,7.31,8.6,8.19,8.37,8.69]
- 13.56 I have noted the Council’s view that regard should be had to the *‘designed landscape setting’* in the same report. [7.30] This encompasses a much wider area than the *‘SM and listed building setting implication’* that includes most of the north and south-west quadrants of the site. However, the report offers no meaningful explanation as to what the term actually means or how the authors arrived at the area drawn in Figure 4.7.4 which is both excessively large and bears no relationship to the distinct parcels of land that make up the campus. [6.3]
- 13.57 Moreover, when assessing how much weight should be given to this and other reports forming the evidence base of the eLP, it needs to be remembered that these are high-level assessments forming the evidence base for the eLP. Their purpose is therefore to highlight heritage and landscape issues rather than to determine what response should be made to those issues. I do not believe the John Moore report was ever intended to be treated as a determining factor in development management decisions without a further, detailed

landscape/heritage assessment, which the Appellant has undertaken. For the above reasons I am giving very little weight to the “designed landscape setting” designation

- 13.58 Although the Council’s Heritage witness did not retreat from his view that there would be overall harm to the SM, it was accepted that a carefully designed landscaping scheme could be beneficial. [7.35,8.55,8.65] Moreover, and perhaps more significantly, it would also be possible to secure a comprehensive improvement scheme for the SM by condition. The wording of the condition agreed by the parties would include maintenance and the provision of features such as public seating, an information board and research into the SM’s origins. Given the current state of the SM, I consider this to be a significant heritage benefit which would enable the general public to appreciate and understand the asset in a way that is far removed from today’s underwhelming experience.
- 13.59 The area to the south which includes the south-west quadrant has been remodelled over the last 80 years. Beyond the bank of trees, the land drops away to a parking area and a timber building beyond which is a lit footpath and tennis courts. Evidently the setting to the south has changed significantly over the years and now contains those urbanising influences. Although the south-west quadrant is undeveloped, views over the area from the SM are obscured by the bank of trees and the tennis courts. There is hence little visual relationship between the SM and the south-west quadrant. Whilst the houses would be visible from the SM, based on the distance of separation, the potential for additional landscaping and the careful placement of the dwellings, I do not consider they would be unduly prominent.
- 13.60 Nonetheless, there would be some limited harm arising from the encroachment of housing and the spine road to the SM’s southern flank. [7.32] However, for the reasons given above, this would be towards the bottom end of the ‘less than substantial’ range and would be clearly outweighed by a combination of the proposed landscape improvements in the north-west quadrant, the SM improvement scheme and also the removal of the existing university buildings which form a stark backdrop in eastward views of the SM. Accordingly, there would be an overall heritage benefit to the SM.

Holton Park

- 13.61 This is the other heritage asset cited to in the Council’s RfR. The Council’s Heritage witness alleges that there would be noticeable changes to its setting through the introduction of housing on the appeal site. The level of harm is hence judged to be “*less than substantial of minor extent*”. [7.34]
- 13.62 Holton Park is located just beyond the north-western site boundary but nonetheless visible from a variety of vantage points within the appeal site. Holton Park also known as ‘Old House’, was the replacement manor house for Holton Park constructed around 1815. Bearing in mind the history of the appeal site there can be little doubt that Holton Park was located for a direct visual, physical and historical connection with the surrounding deer park setting. [7.28,7.29]
- 13.63 Despite the amount of change that has occurred over the last century including its physical severance from the appeal site, a visual connection is still evident and important to understanding the history and evolution of Holton Park. Whilst

remnants of the deer park remain on the adjacent Wheatley school site, I do not accept that Holton Park can be said to possess an 'open parkland setting'. [7.21,8.65] Instead its setting is currently dominated by 2 large education campuses. I do however agree with the Council that the open nature of the north-western quadrant of the appeal site, albeit dominated by the engineered sports pitches, is an important component to understanding the manorial story of Holton Park and therefore makes a positive contribution to its setting. [7.32]

13.64 Whilst the appeal scheme would undoubtedly bring built development closer to Holton Park, the plan submitted at the Inquiry shows that the nearest houses would be approximately 175 metres away. [7.33] In my view that cannot reasonably be considered as close. Those dwellings in a more direct line of sight from the rear of Holton Park would be over 300m away. In both cases, the houses would not encroach into the sensitive open area between Holton Park and the SM. Instead they would be positioned on the far side of the reinstated parkland area. Once established, it is likely based on the submitted photomontages, that landscaping would provide a high degree of screening, such that the dwellings would only be visible in long distance and heavily filtered, seasonal views from a small number of viewpoints from upper floor windows in the rear elevation of Holton Park. [4.2]

13.65 As discussed above, the appeal scheme would retain and enhance the openness of the north-west quadrant through a landscaping scheme that would return this part of the site to something more akin to its original parkland setting as opposed to the heavily engineered landscape that is seen today. [8.55,8.59] As I saw when I visited the site, the tower features prominently in the background of angled views of the façade. Its removal would also be a benefit in the context of Holton Park.

13.66 Based on the foregoing, I consider the appeal scheme would lead to an enhancement to the setting of Holton Park.

St Bartholomew's Church

13.67 St Bartholomew's Church in Holton is a Grade I Listed building, meaning it is of the highest significance and of exceptional interest. The existing 12 storey tower on the appeal site is seen in the distance in seasonal views through the lych-gate thus harming the church's isolated, rural setting. [7.35,8.71]

13.68 The removal of the tower would improve views southwards from the churchyard when the intervening tree cover is not in leaf. This would represent a heritage benefit which given the building's status in the top 2.5% of all listed buildings nationally attracts weight in its own right.

13.69 I have noted the Council's view that the removal of the tower represents a landscape rather than a heritage benefit. However, that view appears to be underpinned by advice in HE's Good Practice in Planning Advice Note 3. However, that document and advice therein relate to situations where new development might impinge upon designed views of a church tower or spire. The circumstances here are different.

Heritage conclusions

13.70 After carefully considering all the evidence, I have found a small degree of harm in relation to the on-site SM arising from the encroachment of

development on its southern flank. However, I consider this harm would be outweighed by the benefits arising from the proposed mitigation.

13.71 There would be ample separation between Holton Park and the proposed areas of housing such that its setting would be adequately preserved. Factoring in the mitigation specifically the on-site parkland landscaping scheme would lead to an overall enhancement to the setting of Holton Park. There would also be an enhancement to the setting of St Bartholomew's Church through the removal of the tower. Accordingly, I consider the development would result in overall heritage betterment. This is something that weighs in favour of the scheme in the overall planning balance.

13.72 In coming to that view, I am mindful of the comments of HE, the Council's Conservation Officer and heritage witness all of whom found 'less than substantial' harm to the setting of the SM. [7.34] I do not disagree, but where I depart from those assessments is with regard to the heritage benefits, which in my view have been significantly underplayed. [8.69]

13.73 As I have found no overall heritage harm, it is not necessary to undertake the heritage balancing exercise required by paragraph 196 of the Framework. I have considered the Council's submissions that heritage benefits should properly be considered as 'public benefits' and only introduced at the paragraph 196 balancing stage. [7.36,8.71] However, I can find no explicit support for that approach in the Framework and as the Palmer Judgement makes clear¹³⁵, the decision maker may legitimately conclude that although each of the effects has an impact, taken together there is no overall adverse effect on the listed building or its setting. In effect the exercise to be undertaken is to weigh the positive and negative aspects of the scheme and to come to an overall judgement as to whether the development would harm, preserve or enhance the asset.

13.74 Even if I were to concur with the Council's approach, the question of where and when the benefits are considered makes no meaningful difference to the eventual outcome of the balancing exercise to be undertaken.

Accessibility

13.75 The Council's stance in relation to accessibility directly contradicts the eLP evidence base which acknowledges that the site is within walking distance of Wheatley which contains a number of services and facilities further details of which are provided in the eWNP. [2.1,3.20-3.24, 8.73,8.75] Because of that, the Council confirmed at the Inquiry that its objections relate to the south-west quadrant, however as discussed below that area happens to be the best located part of the appeal site. [8.83]

13.76 The Appellant met with Highway Authority Officers on several occasions during the determination period. As a result of these discussions, a package of off-site works was agreed with the aim of improving pedestrian access to key destinations namely Wheatley Primary School, the village centre and the employment areas/supermarket on the eastern fringe of Wheatley. [8.77] In addition, a financial contribution of £720,000 has been agreed to fund an

¹³⁵ Paragraph 29 Palmer v Herefordshire [2016] EWCA Civ 1061 (ID30)

additional bus in the commercial fleet for eight years, with a frequency of 30 minutes. [12.12] Both the bus service contribution and off-site highway works would benefit existing residents of Wheatley. [8.78]

- 13.77 Based on the above measures, the Highway Authority did not object to the planning application and the Officer's Committee Report concluded; "*the development represents sustainable development with bus, walking and cycling routes to key services and facilities*".
- 13.78 Para 8.24 of the LP states that "*the District Council will seek to encourage walking as the predominant mode of transport for journeys up to one mile, and cycling for journeys up to 3 miles, as far as possible within the land use planning framework*". This is reflected in advice retained in Manual for Streets which states: "*walking offers the greatest potential to replace short car trips, particularly those under 2km*". [7.39,8.74] The Appellant has conducted a detailed analysis of distances to local facilities which finds that all 14 key facilities are under 2km. Save for Asda, the facilities are also within a 1600m (or 1 mile) walk distance from the centre of the site. These distances are contained in the Accessibility SoCG. [6.5]
- 13.79 Paradoxically it is the south-west quadrant that is the best located part of the appeal site and benefits from the shortest distances to most local services and facilities. It is closest to the schools and Wheatley village centre. Only those destinations at the eastern end of the village such as the Asda supermarket would be over the recommended walk distance. [7.38] However, as the Asda site is on the eastern extent of Wheatley, a large proportion of the existing village is already over the recommended walk distance. However, in most cases, the supermarket is the one destination that future and existing residents are most likely to drive to regardless of distance. Despite that, the Appellant has agreed to deliver a footway along Old London Road (none currently exists) which would provide a continuous footway between the appeal site and Asda. [8.77]
- 13.80 The Appellant's evidence demonstrates that the appeal site has better overall accessibility than the other preferred housing sites in the eWNP as well as other large housing sites consented by the Council in recent years. [8.76] The weight of this evidence is such that it demonstrates that the Council has not approached the issue of accessibility in a consistent way.
- 13.81 The A40 overbridge has been cited as a deterrent to walking and cycling. [7.40,7.41] However, the bridge benefits from footways and from my observations appeared to be well used by the local community particularly school children. [8.82] The Highway Authority has determined that no improvements are necessary, and I have seen no compelling information that would lead me to a different conclusion.
- 13.82 I accept the Council's point that the distance to some destinations such as the primary school are over the 'acceptable' range specified in the IHT guidance. [7.39] However such distances are guidelines and should not be construed as hard and fast rules. One also has to bear in mind that this is not a large town or city, Wheatley and the appeal site are located in a predominantly rural area. This is relevant because paragraph 103 of the Framework tells us: "*opportunities to maximise sustainable transport solutions will vary between urban and rural areas, and this should be taken into account in both plan-making and decision-making*". Part of the route to the primary school passes

through the historic part of the village which is less than ideal for pedestrians. However, no history of accidents has been adduced and my observations suggest that drivers and pedestrians are aware of its limitations and take the necessary precautions.

13.83 Holton is a small rural settlement to the north of the appeal site. I walked and cycled the route from Holton to the appeal site during the Inquiry. In view of the lightly-trafficked nature of the route, I found both cycling and walking to be an enjoyable experience. To assist pedestrians the Appellant has investigated the possibility of providing a continuous footway between the site and Holton. [7.43,8.80] However with the agreement of the Highway Authority, it was concluded that one cannot be accommodated due to insufficient highway space. The Council have not pointed to any other improvements that could reasonably be undertaken by the Appellant. Even if they had, I am not persuaded that improvements in the direction of Holton would be justified. The appeal site has been identified in the eLP evidence base because of its proximity to Wheatley not Holton which beyond a village hall and church, it contains no services. [8.80,8.81] Consequently, the likelihood of significant numbers of people wanting to travel from the proposed development to Holton is remote.

13.84 As is customary for a development of this size, a Framework Travel Plan was submitted with the planning application. [8.79] This aims to encourage sustainable travel habits among future residents and includes the following measures; 1) appointment of a Travel Plan Co-ordinator 2) Travel Welcome Pack and Website, 3) Promotion of public transport journey planner information, and provision of walking and cycling information. The exact range of measures is a matter that the Council would be able to control through the discharge of the Travel Plan condition.

13.85 Overall and bearing in mind the rural nature of the area, I consider the site and particularly the south-west quadrant to be well located to services and facilities in Wheatley. Accordingly, there would be no conflict with CS Policies CS1, CSS1, CSM1 and CSM2 of the CS or Policies T1, T2 and T7 of the LP. There would also be no conflict with paragraphs 92, 102, 103, 108 and 110 of the Framework. On the contrary given the extensive nature of the off-site highway works and the bus service contribution, there would be accessibility gains to the local community. This is something that weighs in favour of the scheme in the overall planning balance.

Housing land supply – Housing need

13.86 In view of my findings on the first main issue, the question of whether the Council can demonstrate a 5YHLS becomes somewhat academic as the tilted balance in paragraph 11d) of the Framework is already engaged. Nonetheless, for completeness and given the SoS is likely to take an interest in these matters, I address the housing need issue below.

13.87 There is no dispute that the CS housing requirement is out of date, therefore the starting point in determining the housing requirement has to be the Framework. [3.14, 7.44, 8.11] Paragraph 73 advises that in circumstances where strategic policies are more than 5 years old, as is the case here, a 5-years' worth of housing should be measured against local housing need. Footnote 37 to paragraph 73, added to the February 2019 version of the Framework states:

“Where local housing need is used as the basis for assessing whether a 5-year supply of specific deliverable sites exists, it should be calculated using the standard method set out in national planning guidance.”

13.88 Annex 2 of the Framework provides further clarification that local housing need is *“The number of homes identified as being needed through the application of the standard method set out in national planning guidance”*. Beyond that for plan-making, the Framework simply does not entertain exceptional circumstances for decision-taking. The national policy context is therefore different to the Bamber Bridge appeal decision¹³⁶ which pre-dated the February 2019 changes to the Framework. [7.44,7.45,8.91]

13.89 I acknowledge that the continued use of the standard method could cause the Council to fall significantly behind the level of growth envisioned in the SHMA and OHGD. [8.89] I also consider that the Appellant’s analysis of more recent evidence strongly points to an even higher local housing need than is identified in the SHMA and eLP. [8.104] There are clearly a number of exceptional circumstances in South Oxfordshire at the current time connected to the OHGD. [3.25-3.28, 8.14, 8.21-8.28, 8.93-8.105]. Accordingly, there is considerable merit in the Appellant’s submissions on housing need. Nonetheless, the Framework is unequivocal that the standard method is to be used for the purposes of calculating the housing requirement. [7.44]

13.90 It is agreed, even on the Appellant’s supply figures, that the Council is able to demonstrate a 5YHLS against the figure which arises from the standard method (see Table 2, Annex E). [6.6,7.52,8.88] That being the case and as in the Lower Shiplake decision, there is little value in conducting a thorough examination of the competing supply arguments. [7.54]

13.91 The respective positions of the parties in relation to housing land supply are set out in Appendix E to this report.

Other Considerations

13.92 In this unusual case, the majority of the appeal site is PDL and therefore benefits from the exception in paragraph 145g) of the Framework. In other words, it would not be inappropriate development.

13.93 Only a relatively small, visually contained and underutilised parcel of land in the south-west quadrant would be inappropriate development. In accordance with paragraphs 143 and 144 of the Framework, it is necessary to consider whether the harm to the Green Belt by reason of inappropriateness, and any other harm, is clearly outweighed by other considerations so as to amount to the very special circumstances necessary to justify the appeal scheme. [7.67,8.51,8.106] I have not identified ‘any other harm’ in this case.

13.94 In support of the scheme, there are various ‘other considerations’. [8.107] I will deal with each of these in turn. Firstly, the majority of the appeal site is located on PDL specifically identified in CS Policy CSEN2. On any level, it must be preferable to develop such sites ahead of greenfield sites whether in the Green Belt or otherwise. [8.107] The Council’s own evidence base for its eLP, having carefully considered the Green Belt purposes, has recommended that the appeal

¹³⁶ Appeal Ref: APP/F2360/W/18/3198822 (Appendix 6. PoE/NI)

site in its entirety should be removed from the Green Belt and allocated for housing. [8.109]

13.95 The most recent report to have considered the site is the 2018 LUC report which built upon the 2015 Kirkham Study. This assessed the Green Belt harm that would arise from the potential release of various sites across the district against the 5 purposes. [7.12,8.109] The LUC report concluded that the appeal site is the only one of 5 sites that would result in "*low-moderate*" Green Belt harm. The conclusion of the LUC report and others clearly informed the Council's decision to remove the site from the Green Belt in the eLP.

13.96 Notwithstanding the findings of the LUC report, I have found that the development would result in an overall benefit to the visual openness of the Green Belt arising principally from the removal of the 12-storey tower, the urban scale and institutional appearance of which is unlike anything else in the locality. It is seen from public viewpoints far and wide, drawing the eye in the most grievous manner. It is difficult to envisage a building that could be more insensitive and incongruous to its surroundings. Accordingly, and even though I accept there would be a 'spreading' of development across the site, the removal of the existing buildings would have a clear and demonstrable Green Belt and landscape benefit. In my view, the openness benefits, are on their own, sufficient to 'clearly outweigh' the 'definitional' harm arising in the south-west quadrant.

13.97 Secondly, the development would make a significant contribution towards the Council's stock of market and affordable housing. [7.63-7.66,8.86,8.87] I heard much at the Inquiry about the eye-watering levels of affordability in South Oxfordshire. [3.24,7.63,8.101,8.104,8.107,9.4] This has put the aspiration of owning a home out of reach for many and is the very embodiment of the national housing crisis. The Council itself accepts the need is "*acute and pressing*". [8.107]

13.98 For South Oxfordshire, the SHMA identifies a need for 331 net affordable homes per annum to deal with the backlog using the Sedgefield approach for the period between 2013 and 2031. [8.87] In the 6-year period since this annual need figure was calculated in the SHMA, a shortfall of -713 affordable homes has accrued as a result of delivery falling substantially short of meeting identified needs. In order to address this backlog, the Council would need to deliver 2,370 net affordable homes over the course of the next 5 years.

13.99 Whilst I accept the Council can demonstrate a 5/3YHLS as required by the Framework and WMS, this is not a ceiling on the number of houses that can be provided. Moreover, there a number of forceful arguments as to why the use of the standard method is not appropriate in a district that has signed up to the OHGD and committed itself, with others, to the delivery of 100,000 homes across Oxfordshire by 2031. [3.24,3.27,6.7,7.48,8.93,8.94,8.102] The Council confirmed at the Inquiry that it is still committed to the eLP, by extension that must mean it accepts that the higher housing requirement therein is still appropriate for plan-making purposes. [3.17]

13.100 Whilst I acknowledge an uplift in the Council's delivery figures over the 2018-19 period, it is too early to say with any confidence whether this is part of a sustained upward trend. [7.65] Even if it is, there is evidently much work still to be done in view of past rates of affordable housing delivery in South Oxfordshire. It seems to me that there is little prospect of the backlog being

cleared without a substantial and sustained boost to housing delivery in the district. [7.65,8.104] In terms of Wheatley and Holton Parishes, the Appellant's figures suggest there has also been a persistent shortfall in delivery against identified needs and targets. The eWNP itself identifies that "*the main housing needs are for affordable housing, starter homes and supported housing for the elderly*". [3.21]

- 13.101 There are some 2,421 households on the Housing Register in South Oxfordshire at the present time. Of that total, 126 have an identified need for affordable housing in Wheatley Parish. It is sometimes easy to reduce arguments of housing need to a mathematical exercise, but each one of those households represents a real person or family in urgent need who have been let down by a persistent failure to deliver enough affordable houses in South Oxfordshire. It is also evident that the seriousness of the affordable housing shortage in South Oxfordshire is having wider consequences for economic growth in the area. [3.27,8.100,8101]
- 13.102 Although affordable housing need is not unique to this district, that argument is of little comfort to those on the waiting list. The proposed development would provide 173 affordable homes. [8.87,8.107] This would contribute significantly towards the Council's affordable housing shortfall. Given the importance attached to housing delivery that meets the needs of groups with specific housing requirements and economic growth in paragraphs 59 and 80 of the Framework, these benefits are considerations of substantial weight.
- 13.103 Third, there would be a range of economic benefits from the purchase of materials and services in connection with the construction of the dwellings, local employment during the construction period, an increase in local household expenditure and revenues to the Council from the New Homes Bonus. [7.69]
- 13.104 Fourth, as the eLP evidence base confirms, the appeal site is located in an accessible and sustainable location on the edge of a larger village which CS Policy CSS1 states will be supported and enhanced as a local service centre. Future residents, particularly those in the south-west quadrant would have good access to local services and facilities in Wheatley, and with sustainable transport choices that would provide access to higher order services in Oxford. There would be material benefits to the local community from the off-site highway works, increased bus frequencies and new routes across the site. The eWNP acknowledges the importance of bus services to Wheatley. [3.22]
- 13.105 Fifth, there would be an overall net-benefit to biodiversity, which would be consistent with the Framework and the requirements of the Development Plan.
- 13.106 Sixth, there is currently no formal public access to the appeal site and therefore the opportunity for the local community to use and enjoy the extensive areas of open space, heritage assets and enhanced sports facilities created by the development on and off-site would be a benefit of the scheme.
- 13.107 Seventh, I have identified benefits to all 3 heritage assets on or close to the appeal site arising from on-site mitigation and the removal of the existing buildings.
- 13.108 Finally, the Appellant (OBU) is not a housebuilder but rather a charity. Accordingly, the proceeds arising from the sale of the land would be reinvested

into the education sector in the local area. The Council accepts this would be a benefit of the development. [7.69,8.107]

Planning balance

13.109 I have found that a small proportion of the development would be inappropriate development in the Green Belt. This is the area in the south-west quadrant which equates to approximately 14% of the site. Within this area, the illustrative masterplan indicates that there would be generous areas of open space such that not all the area would be developed. Nonetheless, the harm by way of inappropriateness must be afforded **substantial weight**, and planning permission should only be granted if very special circumstances have been demonstrated. Very special circumstances can only exist if the harm I have identified is clearly outweighed by other considerations. I have not identified any other matters weighing against the proposal which could not satisfactorily be addressed by conditions or at reserved matters stage.

13.110 In favour of the scheme, I have identified 8 '*other considerations*'. A balancing exercise therefore needs to be undertaken where these are weighed against the harm. Firstly, the release of the site from the Green Belt and its allocation for a development of 'at least 300 dwellings' is supported by a significant amount of work which forms the evidence base for the eLP. The redevelopment of the site is also supported by the eWNP. Although the development would have a roughly neutral effect on spatial openness within the site itself, I have found there would be a significant visual benefit to openness over a wide area of the South Oxfordshire Green Belt resulting from the removal of the tower and other large, unsightly structures on the site. Given the importance attached to the Green Belt in the Framework I give this matter **very substantial weight**.

13.111 The Framework attaches great importance to housing delivery that meets the needs of groups with specific housing requirements. In that context and given the seriousness of the affordable housing shortage in South Oxfordshire, described as "acute" by the Council, the delivery of up to 500 houses, 173 of which would be affordable, has to be afforded **very substantial weight** irrespective of the fact that the Council can demonstrate a 3/5YHLS.

13.112 Given the scale of the development, the economic benefits collectively carry **significant weight**.

13.113 The heritage benefits arising from the on-site mitigation, the removal of the existing buildings and the opening up of the site and the SM to public appreciation, carries **significant weight**.

13.114 The enhanced sporting facilities, public access to the appeal site, off-site highway works, and the additional bus services are social benefits arising attracting **significant weight**.

13.115 The bio-diversity benefits attract **moderate weight**. Finally, the Appellant's status as a charity and major education provider in the local area is a consideration of **significant weight**.

13.116 There would be an overall benefit to the openness of the Green Belt, and this alone would, in my view, be enough to outweigh the harm by reason of inappropriateness.

13.117 Even if one takes a contrary view on that matter, collectively the 'other considerations' are of such number and force, that they clearly outweigh the 'definitional harm' identified in this case. As such, I conclude that very special circumstances exist, which would justify development in the Green Belt. Accordingly, the proposal would not conflict with CS Policy CSEN2, LP Policy GB4 or Green Belt policy in Section 13 of the Framework.

13.118 As the proposed development would not conflict with the development plan it passes the section 38(6) test and should be approved without delay in accordance with paragraph 11c) of the Framework. Consequently, and notwithstanding that I have found that the 'tilted balance' in paragraph 11d) does apply, it is not necessary for me to consider the proposal against that lower test.

13.119 Should the SoS take a contrary view on the matter of very special circumstances, then the tilted balance would be disapplied by virtue of footnote 6 to paragraph 11d)i) with protective policies providing a "*clear reason for refusing the development proposed*". The consequence of that would be that the appeal should be dismissed.

14. Recommendation

14.1 In light of all the above points, my assessment of the planning balance leads to the overall conclusion that the proposal should be allowed, subject to the imposition of a number of conditions, set out in Annex D below.

Appendix D

CONDITIONS TO BE IMPOSED IF PLANNING PERMISSION IS GRANTED

- 1) Details of the appearance, landscaping, layout, and scale, (hereinafter called "the reserved matters") shall be submitted to and approved in writing by the local planning authority before any development begins and the development shall be carried out as approved.
- 2) Application for approval of the reserved matters shall be made to the local planning authority not later than 3 years from the date of this permission.
- 3) The development hereby permitted shall begin not later than 2 years from the date of approval of the last of the reserved matters to be approved.

Reason: To comply with Section 92 of the Town and Country Planning Act 1990.

- 4) The development hereby approved shall be carried out in accordance with the following approved plans:

Site Location Plan (Drawing no: 7590-L-17RevA)

Parameters Plan 1: Land Use (Drawing no: 7590-L-18RevG)

Parameters Plan 2: Green Infrastructure (Drawing no: 7590-L19Rev F)

Parameters Plan 3: Building Heights (Drawing no: 7590-L-20RevF)

Reason: For the avoidance of doubt.

- 5) No development shall take place until a Phasing Plan has been submitted to and approved in writing by the Local Planning Authority. The plan shall provide the following information for each phase or sub phases:
 - a) The number and mix (bedroom number) of market dwellings;
 - b) The number and mix (bedroom number) and gross internal floor areas of affordable housing to meet the latest evidence of affordable housing need (the total amount of affordable housing to cumulatively be 34.57% of the total amount of housing across the site);
 - c) The tenure of each affordable unit;
 - d) The number of accessible and adaptable homes to be built to Building Regulations Part M4(2) category 2 for both market (which shall be a minimum of 10% overall) and affordable sectors;
 - e) Location and boundaries of public open space, play areas, green infrastructure, leisure and sports pitches/pavilion, associated parking areas to be provided and a scheme for their future management;
 - f) Key infrastructure including means of vehicular and pedestrian and cycle access and links to serve each phase;
 - g) Drainage and landscaping works including future management arrangements;
 - h) Existing and proposed ground and ridge levels;

An updated Phasing Plan shall be provided with each subsequent reserved matter application showing how each of these elements of the development is to be phased. The development shall be implemented in accordance with the approved Phasing Plan/s.

Reason: In order to secure the satisfactory development of the site

- 6) Prior to commencement of the development, details of the works to the site accesses onto Waterperry Road and Holton Park Drive, shall be submitted to and agreed in writing by the Local Planning Authority. The works shall be completed in accordance with the approved details and timescales.

Reason: In the interest of highway safety in accordance with Policy T1 of the Local Plan 2012.

- 7) Prior to the commencement of any development (including demolition works), a Construction Method Statement, incorporating a Construction Traffic Management Plan shall be submitted to and approved in writing by the Local Planning Authority. The Statement will have been prepared in the light of Outline Construction and Demolition Environmental Management Plan dated January 2018 and shall include details of the following:
 - a) Vehicle parking facilities for construction workers, other site operatives and visitors;
 - b) Site offices and other temporary buildings;
 - c) Loading and unloading of plant and materials;
 - d) Storage of plant and materials used during construction;
 - e) Vehicle wheel washing facilities;
 - f) Measures to control the emission of dust and dirt;
 - g) A scheme for recycling and/or disposing of waste materials arising from the demolition and construction works;
 - h) Installation and maintenance of security hoarding/fencing;
 - i) Hours of construction

The development hereby approved shall be undertaken in accordance with the details approved in accordance with this condition and complied with throughout the construction period

Reason: In the interests of visual and residential amenity and highway safety (Policies D1, and T1 of the Local Plan.

- 8) No development hereby permitted shall begin until surface and foul water drainage schemes for the site have been submitted to and agreed in writing by the Local Planning Authority. The surface water scheme shall be based on sustainable drainage principles and an assessment of the hydrological and hydrogeological context of the development. The schemes shall subsequently be implemented in accordance with the approved details.

Reason: To ensure the effective drainage of the site and to avoid flooding (Policy DC14 of the adopted Local Plan).

- 9) Prior to the commencement of the development hereby approved an Archaeological Written Scheme of Investigation, relating to the application site area, shall be submitted to and approved in writing by the Local Planning Authority.

Following the approval of the Written Scheme of Investigation and the commencement of the development (other than in accordance with the agreed Written Scheme of Investigation), a staged programme of

archaeological evaluation and mitigation shall be carried out by the commissioned archaeological organisation in accordance with the approved Written Scheme of Investigation.

The programme of work shall include all processing, research and analysis necessary to produce an accessible and useable archive and a full report for publication which shall be submitted to the Local Planning Authority.

Reason: To secure the protection of and proper provision for any archaeological remains in accordance with Policy CSEN3 of the Core Strategy and Policies CON11, CON13 and CON14 of the Local Plan.

- 10) Prior to the commencement of the development a phased risk Assessment shall be carried out by a competent person in accordance with current government and Environment Agency Guidance and Approved Codes of Practice. Each phase shall be submitted to and approved in writing by the Local Planning Authority. Phase 2 shall include a comprehensive intrusive investigation in order to characterise the type, nature and extent of contamination present, the risks to receptors and if significant contamination is identified to inform the remediation strategy. A remediation strategy shall be submitted to and approved by the LPA to ensure the site will be rendered suitable for its proposed use and the development shall not be occupied until the approved remediation strategy has been carried out in full and a validation report confirming completion of these works has been submitted to and approved in writing by the Local Planning Authority.

Reason: To ensure that any ground, water and associated gas contamination is identified and adequately addressed to ensure the safety of the development, the environment and to ensure the site is suitable for the proposed use.

- 11) Either prior to, or concurrent with the submission of each reserved matters application a Construction Environmental Management Plan (CEMP) shall be submitted to and approved in writing by the local planning authority. The CEMP shall include the following:
- a) Risk Assessment of potentially damaging construction activities;
 - b) Identification of biodiversity protection zones;
 - c) Practical measures (both physical measures and sensitive working practices) to avoid, reduce or mitigate the impacts on important habitats and protected species during construction;
 - d) A mitigation strategy for all protected species ensuring that each species long term conservation status is protected and enhanced;
 - e) The location and timing of sensitive works to avoid harm to biodiversity features;
 - g) The times during construction when specialist ecologists need to be present on site to oversee works;
 - g) Responsible persons and lines of communication, and
 - h) Use of protective fences, exclusion barriers and warning signs.

The approved CEMP shall be adhered to and implemented throughout the construction period strictly in accordance with the approved details.

Reason: To ensure the protection of habitats and species on the site, in accordance with Policy CSB1 of the Core Strategy and Policy C8 of the Local Plan.

- 12) Concurrent with the submission of the first reserved matters application, a Biodiversity Enhancement Plan (BEP) shall be submitted to and approved in writing by the Local Planning Authority. The plan should demonstrate how the development can achieve a no net loss of biodiversity overall compared to the biodiversity value of the site prior to development. The plan should include both habitat and species enhancements and should use a suitable form of biodiversity accounting to prove that no net loss can be achieved. The BEP should include:
- a) Details of habitat creation or enhancements (this could cross reference relevant landscape plans) and include suitably detailed drawings and cross sections as required;
 - b) Details of species enhancements including relevant scale plans and drawings showing the location, elevation and type of features such as bat and bird boxes etc. as appropriate;
 - c) Selection of appropriate strategies for creating/restoring target habitats or introducing target species;
 - d) Selection of specific techniques and practices for establishing vegetation;
 - e) Sources of habitat materials (e.g. plant stock) or species individuals;
 - f) Method statement for site preparation and establishment of target features;
 - g) Extent and location of proposed works, and
 - h) Details of the biodiversity offsetting metric calculations that clearly demonstrate that the proposals contained in the plan avoid a net loss of biodiversity.

Thereafter, the biodiversity enhancement measures shall be developed on site and retained in accordance with the approved details. All enhancements should be delivered prior to final occupation.

Reason: To avoid a net loss of biodiversity in accordance with Policy CSB1 of the Core Strategy and government guidance as stated in paragraphs 170(d) and 175 of the Framework.

- 13) No development shall take place until the tree protection measures detailed in Appendix B of the Arboricultural Assessment dated January 2018 are erected around any trees affected by construction activity.

Reason: To safeguard trees which are visually important in accordance with Policies CSEN1 and CSQ3 of the Core Strategy 2027 and Policies G2, C9 and D1 of the Local Plan 2011.

- 14) Before any dwelling hereby permitted is first occupied, the proposed vehicular accesses, driveways and turning areas that serve that dwelling shall be constructed, laid out, surfaced and drained in accordance with the specification details that have been submitted to and approved in writing by the Local Planning Authority prior to the commencement of those works.

Reason: To ensure a satisfactory residential environment in accordance with policy D1 and EP2 of the Local Plan.

- 15) Prior to the occupation of the first dwelling hereby permitted a Travel Plan in general accordance with the Framework Travel Plan dated 5 January 2018 shall be submitted to and approved in writing by the Local Planning Authority and shall be implemented in accordance with the approved details.

Reason: To promote the use of non-car modes of transport in accordance with Policy CSM2 of the Core Strategy.

- 16) Prior to first occupation of any dwelling or building to which they relate electric vehicle charging points shall be installed and be operational in accordance with details that shall previously have been submitted to and approved in writing by the Local Planning Authority.

Reason: To ensure satisfactory standards of air quality for the residents of the development and surrounding residential properties in accordance with Policies G2 and EP1 of the Local Plan, CSQ2 of the Core Strategy and paragraphs 105 and 181 of the Framework.

- 17) Prior to the occupation of the first dwelling hereby approved details of the means by which the dwellings may be connected to the utilities to be provided on site to facilitate super-fast broadband connectivity have been submitted to and approved in writing by the Local Planning Authority. The development shall be carried out in accordance with the approved details.

Reason: To facilitate homeworking and to reduce the need to travel in accordance with Policies CSM1 and CSM2 of the Core Strategy.

- 18) Prior to first occupation of any dwelling a noise mitigation strategy including full details of the proposed noise bund to be erected along the southern boundary of the site, shall be submitted to and approved in writing by the Local Planning Authority. The approved measures shall be implemented and retained thereafter.

Reason: To minimise the noise levels from the adjacent A40 and to ensure a satisfactory residential environment in accordance with policy D1 and EP2 of the Local Plan.

- 19) Prior to the occupation of the first dwelling, details of a scheme for the enhancement and protection of the on-site Scheduled Ancient Monument on the site shall be submitted to and approved in writing by the Local Planning Authority. The enhancement scheme shall include details of the following;
 - a) strimming / mowing and removal of scrub vegetation and self-set trees from the monument;
 - b) a management plan for the preservation / maintenance of the monument in the future, prepared with the objective of removing the need to secure scheduled monument consent to carry out future maintenance of the monument;
 - c) consultation with Historic England and the Local Planning Authority Archaeology Officer in respect of research into the history and the origins of the monument;
 - d) Design and location of an interpretation and information board in respect of the monument. The board shall include information in respect of the monument. It shall also include details of the statutory

- protection and security measures that the monument benefits from and the repercussions for any individuals who damage the monument through illegal or unauthorised activities, such as metal detecting, and
- e) Design and location of a seating area, comprising at least one bench and associated hard standing, adjacent to, but outside, the perimeter of the monument. The perimeter of the monument is defined as the extremities of ditch, plus an additional two metre buffer zone.

The interpretation board and seating area shall be installed and the SAM maintained in accordance with the details set out in the SAM enhancement scheme as approved by the Council and shall be maintained thereafter for the lifetime of the development unless otherwise agreed in writing by the LPA.

Reason: To ensure adequate mitigation of a designated heritage asset in accordance with Policy CSEN3 of the Core Strategy.

RIGHT TO CHALLENGE THE DECISION IN THE HIGH COURT

These notes are provided for guidance only and apply only to challenges under the legislation specified. If you require further advice on making any High Court challenge, or making an application for Judicial Review, you should consult a solicitor or other advisor or contact the Crown Office at the Royal Courts of Justice, Queens Bench Division, Strand, London, WC2 2LL (0207 947 6000).

The attached decision is final unless it is successfully challenged in the Courts. The Secretary of State cannot amend or interpret the decision. It may be redetermined by the Secretary of State only if the decision is quashed by the Courts. However, if it is redetermined, it does not necessarily follow that the original decision will be reversed.

SECTION 1: PLANNING APPEALS AND CALLED-IN PLANNING APPLICATIONS

The decision may be challenged by making an application for permission to the High Court under section 288 of the Town and Country Planning Act 1990 (the TCP Act).

Challenges under Section 288 of the TCP Act

With the permission of the High Court under section 288 of the TCP Act, decisions on called-in applications under section 77 of the TCP Act (planning), appeals under section 78 (planning) may be challenged. Any person aggrieved by the decision may question the validity of the decision on the grounds that it is not within the powers of the Act or that any of the relevant requirements have not been complied with in relation to the decision. An application for leave under this section must be made within six weeks from the day after the date of the decision.

SECTION 2: ENFORCEMENT APPEALS

Challenges under Section 289 of the TCP Act

Decisions on recovered enforcement appeals under all grounds can be challenged under section 289 of the TCP Act. To challenge the enforcement decision, permission must first be obtained from the Court. If the Court does not consider that there is an arguable case, it may refuse permission. Application for leave to make a challenge must be received by the Administrative Court within 28 days of the decision, unless the Court extends this period.

SECTION 3: AWARDS OF COSTS

A challenge to the decision on an application for an award of costs which is connected with a decision under section 77 or 78 of the TCP Act can be made under section 288 of the TCP Act if permission of the High Court is granted.

SECTION 4: INSPECTION OF DOCUMENTS

Where an inquiry or hearing has been held any person who is entitled to be notified of the decision has a statutory right to view the documents, photographs and plans listed in the appendix to the Inspector's report of the inquiry or hearing within 6 weeks of the day after the date of the decision. If you are such a person and you wish to view the documents you should get in touch with the office at the address from which the decision was issued, as shown on the letterhead on the decision letter, quoting the reference number and stating the day and time you wish to visit. At least 3 days notice should be given, if possible.

Overall Finding

This is the report of the Independent Examination of the Adderbury Neighbourhood Development Plan. The plan area comprises the entire civil parish of Adderbury within the Cherwell District Council area. The plan period is 2014-2031. The Neighbourhood Plan includes policies relating to the development and use of land. The Neighbourhood Plan does not allocate land for residential development.

This report finds that subject to specified modifications the Neighbourhood Plan meets the basic conditions and other requirements. It is recommended the Plan should proceed to a local referendum based on the plan area.

Neighbourhood Planning

1. The Localism Act 2011 empowers local communities to take responsibility for the preparation of elements of planning policy for their area through a neighbourhood development plan. The National Planning Policy Framework (the Framework) states that “*neighbourhood planning gives communities direct power to develop a shared vision for their neighbourhood and deliver the sustainable development they need.*”¹
2. Following satisfactory completion of the necessary preparation process neighbourhood development plans have statutory weight. Decision-makers are obliged to make decisions on planning applications for the area that are in line with the neighbourhood development plan, unless material considerations indicate otherwise.
3. The Adderbury Neighbourhood Development Plan (the Neighbourhood Plan) has been prepared by Adderbury Parish Council (the Parish Council). The draft Plan has been submitted by the Parish Council, a qualifying body able to prepare a neighbourhood plan, in respect of the Adderbury Neighbourhood Area which was formally designated by Cherwell District Council (the District Council) on 7 June 2013. Since January 2016 the Neighbourhood Plan has, building on the work of a previous group, been produced by a Neighbourhood Plan Steering Group (the Steering Group), made up of members of the Parish Council supported by neighbourhood representatives, with input from the District Council and supporting consultants.
4. The submission draft of the Neighbourhood Plan, along with the Consultation Statement and the Basic Conditions Statement, has been approved by the Parish Council for submission of the plan and accompanying documents to the District Council. The District Council arranged a period of publication between Thursday 12 October and Friday 24 November 2017. The District Council has submitted the Neighbourhood Plan to me for independent examination, which commenced on 1 March 2018.

¹ Paragraph 183 National Planning Policy Framework (2012)

Independent Examination

5. This report sets out the findings of the independent examination into the Neighbourhood Plan.² The report makes recommendations to the District Council including a recommendation as to whether or not the Neighbourhood Plan should proceed to a local referendum. The District Council will decide what action to take in response to the recommendations in this report.
6. The District Council will decide whether the Neighbourhood Plan should proceed to referendum, and if so whether the referendum area should be extended, and what modifications, if any, should be made to the submission version plan. Once a neighbourhood plan has been independently examined, and the decision taken to put the plan to a referendum, it must be taken into account when determining a planning application, in so far as the policies in the plan are material to the application.
7. Should the Neighbourhood Plan proceed to local referendum and achieve more than half of votes cast in favour, then the Neighbourhood Plan will be 'made' by the District Council. If 'made' the Neighbourhood Plan will come into force as part of the Development Plan for the neighbourhood area, and subsequently be used in the determination of planning applications and decisions on planning appeals in the plan area. The Housing and Planning Act requires any conflict with a neighbourhood plan to be set out in the committee report, that will inform any planning committee decision, where that report recommends granting planning permission for development that conflicts with a made neighbourhood plan. The Framework is very clear that where a planning application conflicts with a neighbourhood plan that has been brought into force, planning permission should not normally be granted³.
8. I have been appointed by the District Council with the consent of the Parish Council, to undertake the examination of the Neighbourhood Plan and prepare this report of the independent examination. I am independent of the Parish Council and the District Council. I do not have any interest in any land that may be affected by the Neighbourhood Plan and I hold appropriate qualifications and have appropriate experience. I am an experienced Independent Examiner of

² Paragraph 10 Schedule 4B Town and Country Planning Act 1990

³ Paragraph 198 National Planning Policy Framework 2012

Neighbourhood Plans. I am a Member of the Royal Town Planning Institute; a Member of the Institute of Economic Development; a Member of the Chartered Management Institute; and a Member of the Institute of Historic Building Conservation. I have forty years professional planning experience and have held national positions and local authority Chief Planning Officer posts.

9. As independent examiner, I am required to produce this report and must recommend either:

- that the Neighbourhood Plan is submitted to a referendum, or
- that modifications are made and that the modified Neighbourhood Plan is submitted to a referendum, or
- that the Neighbourhood Plan does not proceed to a referendum on the basis it does not meet the necessary legal requirements.

10. I make my recommendation in this respect and in respect to any extension to the referendum area,⁴ in the concluding section of this report. It is a requirement that my report must give reasons for each of its recommendations and contain a summary of its main findings.⁵

11. The general rule is that examination of the issues is undertaken by the examiner through consideration of written representations.⁶ The Planning Practice Guidance (the Guidance) states *“it is expected that the examination of a draft Neighbourhood Plan will not include a public hearing.”*

12. The examiner has the ability to call a hearing for the purposes of receiving oral representations about a particular issue in any case where the examiner considers that the consideration of oral representations is necessary to ensure adequate examination of the issue, or a person has a fair chance to put a case. All parties have had opportunity to state their case. As I did not consider a hearing necessary I proceeded on the basis of written representations.

⁴ Paragraph 8(1)(d) Schedule 4B Town and Country Planning Act 1990

⁵ Paragraph 10(6) Schedule 4B Town and Country Planning Act 1990

⁶ Paragraph 9(1) Schedule 4B Town and Country Planning Act 1990

Basic Conditions and other statutory requirements

13. An independent examiner must consider whether a neighbourhood plan meets the “Basic Conditions”.⁷ A neighbourhood plan meets the Basic Conditions if:

- having regard to national policies and advice contained in guidance issued by the Secretary of State, it is appropriate to make the plan;
- the making of the neighbourhood plan contributes to the achievement of sustainable development;
- the making of the neighbourhood plan is in general conformity with the strategic policies contained in the development plan for the area of the authority (or any part of that area);
- the making of the neighbourhood plan does not breach, and is otherwise compatible with, EU obligations; and
- the making of the neighbourhood plan is not likely to have a significant effect on a European site or a European offshore marine site, either alone or in combination with other plans or projects.⁸

14. An independent examiner must also consider whether a neighbourhood plan is compatible with the Convention rights.⁹ All of these matters are considered in the later sections of this report titled ‘The Neighbourhood Plan taken as a whole’ and ‘The Neighbourhood Plan policies’.

15. In addition to the Basic Conditions and Convention rights, I am also required to consider whether the Neighbourhood Plan complies with the provisions made by or under sections 38A and 38B of the Planning and Compulsory Purchase Act 2004.¹⁰ I am satisfied the Neighbourhood Plan has been prepared in accordance with the requirements of those sections, in particular in respect to the Neighbourhood Planning (General) Regulations 2012 (the Regulations) which are made pursuant to the powers given in those sections.

⁷ Paragraph 8(2) Schedule 4B Town and Country Planning Act 1990

⁸ Prescribed for the purposes of paragraph 8(2) (g) of Schedule 4B to the 1990 Act by Regulation 32 The Neighbourhood Planning (General) Regulations 2012 and defined in the Conservation of Habitats and Species Regulations 2010 and the Offshore Marine Conservation (Natural Habitats, &c.) Regulations 2007

⁹ The Convention rights has the same meaning as in the Human Rights Act 1998

¹⁰ In sections 38A and 38B themselves; in Schedule 4B to the 1990 Act (introduced by section 38A (3)); and in the 2012 Regulations (made under sections 38A (7) and 38B (4)).

16. The Neighbourhood Plan relates to the area that was designated by the District Council as a neighbourhood area on 7 June 2013. A map of the Neighbourhood Plan boundary is included as Plan A of the Submission Version Plan. The Neighbourhood Plan designated area is coterminous with the Adderbury parish boundary. The Neighbourhood Plan does not relate to more than one neighbourhood area,¹¹ and no other neighbourhood development plan has been made for the neighbourhood area.¹² All requirements relating to the plan area have been met.
17. I am also required to check whether the Neighbourhood Plan sets out policies for the development and use of land in the whole or part of a designated neighbourhood area;¹³ and the Neighbourhood Plan does not include provision about excluded development.¹⁴ I am able to confirm that I am satisfied that each of these requirements has been met.
18. A neighbourhood plan must also meet the requirement to specify the period to which it has effect.¹⁵ The front cover of the Submission Version Plan clearly states the plan period to be 2014-2031. I have noted supporting documents have different start dates on their front covers (the Consultation Statement 2015, the Basic Conditions Statement 2016). These should be adjusted to be in conformity with the Submission Plan.

Recommended Modification 1

The Plan period should be consistently stated as 2014-2031 in all Plan documents.

19. The role of an independent examiner of a neighbourhood plan is defined. I am not examining the test of soundness provided for in respect of examination of Local Plans.¹⁶ It is not within my role to examine or produce an alternative plan, or a potentially more sustainable plan, except where this arises as a result of my recommended modifications so that the Neighbourhood Plan meets the Basic Conditions and other requirements that I have identified. I

¹¹ Section 38B (1)(c) Planning and Compulsory Purchase Act 2004

¹² Section 38B (2) Planning and Compulsory Purchase Act 2004

¹³ Section 38A (2) Planning and Compulsory Purchase Act 2004

¹⁴ Principally minerals, waste disposal, and nationally significant infrastructure projects - Section 38B(1)(b) Planning and Compulsory Purchase Act 2004

¹⁵ Section 38B (1)(a) Planning and Compulsory Purchase Act 2004

¹⁶ Under section 20 of the Planning and Compulsory Purchase Act 2004 and in respect of which guidance is given in paragraph 182 of the Framework

have been appointed to examine whether the submitted Neighbourhood Plan meets the Basic Conditions and Convention rights, and the other statutory requirements.

20. A neighbourhood plan can be narrow or broad in scope. There is no requirement for a neighbourhood plan to be holistic, or to include policies dealing with particular land uses or development types, and there is no requirement for a neighbourhood plan to be formulated as, or perform the role of, a comprehensive local plan. The nature of neighbourhood plans varies according to local requirements.
21. Neighbourhood plans are developed by local people in the localities they understand and as a result each plan will have its own character. It is not within my role to re-interpret, restructure, or re-write a plan to conform to a standard approach or terminology. Indeed, it is important that neighbourhood plans are a reflection of thinking and aspiration within the local community. They should be a local product and have particular meaning and significance to people living and working in the area.
22. Apart from minor corrections and consequential adjustment of text (referred to in the Annex to this report) I have only recommended modifications to the Neighbourhood Plan (presented in bold type) where I consider they need to be made so that the plan meets the Basic Conditions and the other requirements I have identified.¹⁷

Documents

23. I have given consideration to each of the following documents in so far as they have assisted me in determining whether the Neighbourhood Plan meets the Basic Conditions and other requirements:
 - Adderbury Neighbourhood Plan 2014-2031 Submission Plan March 2017 including explanation of abbreviations, and Submission Policies Map and insets A, B, C, and D
 - Adderbury Neighbourhood Plan Basic Conditions Statement September 2017 [*In this report referred to as the Basic Conditions Statement*]

¹⁷ See 10(1) and 10(3) of Schedule 4B to the Town and Country Planning Act 1990

- Adderbury Neighbourhood Plan Consultation Statement March 2017 including Appendices A to F inclusive [*In this report referred to as the Consultation Statement*]
- Adderbury Neighbourhood Plan – Submission Plan – (updated) September 2017. Screening Statement by Cherwell District Council on the need for a Strategic Environmental Assessment (SEA) [*In this report referred to as the SEA report*]
- Adderbury Neighbourhood Plan – Pre- Submission Plan – November 2016. Screening Statement by Cherwell District Council on the need for a Strategic Environmental Assessment (SEA)
- Evidence Base documents listed in Appendix A of the Submission Neighbourhood Plan; and those available on the Neighbourhood Plan part of the Adderbury Parish Council website at www.adderburypc.co.uk/adderbury-neighbourhood-plan/ including the Green Space and Local Gaps Report, and the Local Heritage Assets Report
- Representations received during the Regulation 16 publicity period and Cherwell District Council listing and summary
- Submission of Adderbury Parish Council dated 26 January 2018 setting out a schedule of minor amendments and associated illustrative maps and numbered list of community assets and local services
- Adopted Cherwell Local Plan 2011- 2031 (Part 1)
- Cherwell Local Plan 1996 (saved policies) (Appendix 7 of the Part 1 Local Plan above includes a list of replaced and retained saved policies)
- Interactive Local Plan – policies map available at: <https://www.cherwell.gov.uk/info/83/local-plans/216/interactive-adopted-policies->
- National Planning Policy Framework (27 March 2012) [*In this report referred to as the Framework*]
- Permitted development rights for householders' technical guidance DCLG (April 2017) [*In this report referred to as the Permitted Development Guidance*]
- Planning Practice Guidance web-based resource MHCLG (first fully launched 6 March 2014) [*In this report referred to as the Guidance*]
- The Town and Country Planning (Use Classes) Order 1987 (as amended)
- The Town and Country Planning (General Permitted Development) (Amendment and Consequential Provisions) (England) Order 2014
- The Town and Country Planning (General Permitted Development) (Amendment and Consequential Provisions) (England) Order 2015
- The Town and Country Planning Act 1990 (as amended)
- The Planning and Compulsory Purchase Act 2004 (as amended)
- The Localism Act 2011
- The Housing and Planning Act 2016
- The Neighbourhood Planning Act 2017

- The Neighbourhood Planning (General) Regulations 2012 (as amended) [*In this report referred to as the Regulations*].
- The Neighbourhood Planning (General) (Amendment) Regulations 2015
- The Neighbourhood Planning (General) and Development Management Procedure (Amendment) Regulations 2016.

Consultation

24. The submitted Neighbourhood Plan is accompanied by a Consultation Statement which outlines the process undertaken in the preparation of the plan. In addition to detailing who was consulted and by what methods, it also provides a summary of comments received from local community members, and other consultees, and how these have been addressed in the Submission Plan. I highlight here a number of key stages of consultation undertaken in order to illustrate the approach adopted.
25. The plan preparation process began with public meetings held in November 2012 and February 2013 to inform villagers of the intention to prepare a neighbourhood plan and to establish a vision of what the community wanted for Adderbury over the next 20 years. During this period a steering committee was formed to manage the plan preparation process. Approximately 40 people contributed to the development of a Residents Survey which was delivered to every home in June 2013 resulting in 661 responses. Analysis of the responses are presented in appendix A of the Consultation Statement. A Business Survey in May 2013 resulted in 70 responses. The Draft Neighbourhood Plan subsequently prepared was the subject of community consultation in August and September 2013. This was followed by considerable work to produce a Pre-Submission Plan that was published for a six-week period of consultation commencing March 2015.
26. Concerns of the District Council regarding the policy content and robustness of the Plan were confirmed by an independent health check. The Steering Group was reconfigured in January 2016 which, with the support of consultants and with input from reinstated task groups, prepared revised policies in June 2016. A consultation focussed on future leisure facilities resulted in 183 responses to a

questionnaire the analysis of which is presented as Appendix C of the Consultation Statement.

27. Pre-submission consultation in accordance with Regulation 14 was undertaken in the period between 1 November 2016 and 17 December 2016, and subsequently extended to February 2017. The consultation included a four-page article as part of the Adderbury Contact magazine delivered to all households; articles in the 'Around the Villages' section of the Banbury Guardian; hard copies of the Plan deposited at Adderbury Library; and postings on the village website and on the Parish Council website. The representations arising from the consultation are comprehensively presented within the Consultation Statement where responses, and amendments to the Neighbourhood Plan, are set out. The suggestions have, where considered appropriate, been reflected in a number of changes to the Plan that was approved by the Parish Council, for submission to the District Council.
28. The Submission Version of the Neighbourhood Plan has been the subject of a Regulation 16 period of publication between 12 October and 5.00pm on 24 November 2017. Representations from 26 different parties were submitted during the period of publication. I have been provided with copies of each these representations.
29. A representation states the text of paragraph 4.7 should repeat the approach stated in paragraph 3.8. I do not consider modification is necessary in this respect as the Neighbourhood Plan should be read as a whole. Representations submitted jointly by a group of six people include comment on the text of the Neighbourhood Plan up to paragraph 5.5. This group representation, and the representations of Natural England, do not necessitate any modifications of the Neighbourhood Plan in order to meet the Basic Conditions. Where representations include comment on the policies of the Neighbourhood Plan I have taken these into consideration when considering each of the plan policies later in my report.
30. Historic England compliment many aspects of the Neighbourhood Plan and the approach adopted and state the Plan is an exemplar in the use of policies relating to character. Milton Parish Meeting acknowledge the Neighbourhood Plan is well advanced and Highways England, Scottish and Southern Electric, and National Grid confirm they have no comments on the Plan. Sport England have referred to a

number of national policies and where they can be accessed but do not make any specific recommendations in relation to the Neighbourhood Plan. The representations of Oxfordshire County Council, Network Rail, Oxfordshire Clinical Commissioning Group, and Thames Water, and a number of other representations identify matters that should be the subject of additional text or policies in the Neighbourhood Plan. There is no requirement that a neighbourhood plan should refer to particular matters or include any particular policies. My role is limited to consideration whether the Submission Plan meets the Basic Conditions and other requirements. In preparing this report I have taken into consideration all of the representations submitted during the Regulation 16 period even though they may not be referred to in whole, or in part.

31. The Regulations state that where a qualifying body submits a plan proposal to the local planning authority it must include amongst other items a consultation statement. The Regulations state a consultation statement means a document which:
- a) contains details of the persons and bodies who were consulted about the proposed neighbourhood development plan;
 - b) explains how they were consulted;
 - c) summarises the main issues and concerns raised by the persons consulted; and
 - d) describes how these issues and concerns have been considered and, where relevant, addressed in the proposed neighbourhood development plan.¹⁸
32. The Consultation Statement includes information in respect of each of the requirements set out in the Regulations. I am satisfied the requirements have been met. It is evident the Neighbourhood Plan Steering Group has taken great care to ensure stakeholders have had full opportunity to influence the general nature, and specific policies, of the Neighbourhood Plan.
33. In a letter dated 26 January 2018 Adderbury Parish Council has, following discussions with the District Council, submitted to the District Council a schedule of 'suggested Minor Amendments' in table form and supported by maps for further clarity. The Parish Council letter requests it should be passed to the Examiner. The District Council has included the letter in the bundle of documents sent to me. As the letter

¹⁸ Regulation 15 The Neighbourhood Planning (General) Regulations 2012 SI 2012 No.637

in question has been submitted after the period for representations has closed this raises a procedural matter.

34. The requirement for a local planning authority to publicise a plan proposal in Regulation 16 (a) relates to the documents referred to in Regulation 15 (1), namely the submitted Neighbourhood Plan and map or statement identifying the area to which it relates; a consultation statement; and a document commonly referred to as a basic conditions statement. Regulation 17 requires the local planning authority to send to the person appointed to carry out an examination, *“any other document submitted to the local planning authority by the qualifying body in relation to the plan proposal”*, in addition to the plan proposal; any necessary information relating to Habitats Regulations; Regulation 16 representations; and the documents referred to in Regulation 15(1). I am proceeding on the basis that *“any other document submitted to the local planning authority by the qualifying body in relation to the plan proposal”* is not limited to those submitted in respect of Regulation 15 (1).
35. In my initial letter sent to the Parish Council and the District Council on 1 March 2018 at the commencement of my examination, which I requested should be published on the Parish Council and District Council websites, I stated *“It is essential that the examination process is open and transparent to all interested parties”* and *“I request that Cherwell District Council ensure that all documents sent to me are made available on the Council’s website.”* In this Independent Examination I have taken into consideration the letter of Adderbury Parish Council dated 26 January 2018 (including the schedule of ‘suggested Minor Amendments’ in table form and supporting maps).

The Neighbourhood Plan taken as a whole

36. This section of my report considers whether the Neighbourhood Plan taken as a whole meets EU obligations, habitats and human rights requirements; has regard to national policies and advice contained in guidance issued by the Secretary of State; whether the plan contributes to the achievement of sustainable development; and whether the plan is in general conformity with the strategic policies contained in the development plan for the area. Each of the plan policies is considered in turn in the section of my report that follows

this. In considering all of these matters I have referred to the background and supporting documents and copies of the representations provided to me.

Consideration of Convention rights; and whether the making of the Neighbourhood Plan does not breach, and is otherwise compatible with, EU obligations; and the making of the Neighbourhood Plan is not likely to have a significant effect on a European site or a European offshore marine site, either alone or in combination with other plans or projects

37. The Basic Conditions Statement states “The Neighbourhood Plan has also had regard to the fundamental rights and freedoms guaranteed under the European Convention on Human Rights and complies with the Human Rights Act.” I have given consideration to the European Convention on Human Rights and in particular to Article 8 (privacy); Article 14 (discrimination); and Article 1 of the first Protocol (property).¹⁹ I have seen nothing in the submission version of the Neighbourhood Plan that indicates any breach of the Convention.
38. Whilst no analysis has been undertaken to establish the impact the objectives and policies of the Neighbourhood Plan will have on persons with protected characteristics (as identified in the Equality Act 2010). From my own examination, the Neighbourhood Plan would appear to have neutral or positive impacts on groups with protected characteristics.
39. The objective of EU Directive 2001/42²⁰ is “*to provide for a high level of protection of the environment and to contribute to the integration of environmental considerations into the preparation and adoption of plans and programmes with a view to promoting sustainable development, by ensuring that, in accordance with this Directive, an environmental assessment is carried out of certain plans and programmes which are likely to have significant effects on the environment.*” The Neighbourhood Plan falls within the definition of ‘plans and programmes’²¹ as the Local Planning Authority is obliged to ‘make’ the plan following a positive referendum result.²²

¹⁹ The Human Rights Act 1998 which came into force in the UK in 2000 had the effect of codifying the protections in the European Convention on Human Rights into UK law.

²⁰ Transposed into UK law through the Environmental Assessment of Plans and Programmes Regulations 2004

²¹ Defined in Article 2(a) of Directive 2001/42

²² Judgement of the Court of Justice of the European Union (Fourth Chamber) 22 March 2012

40. The Neighbourhood Planning (General) (Amendment) Regulations 2015 require the Parish Council, as the Qualifying Body, to submit to the District Council either an environmental report prepared in accordance with the Environmental Assessment of Plans and Programmes Regulations 2004, or a statement of reasons why an environmental report is not required.
41. The submission documents include a Screening Statement prepared by Cherwell District Council. This statement includes 'Appendix A Screening Assessment' that concludes *"As a result of the screening assessment it is considered unlikely there will be any significant environmental effects arising from Adderbury Neighbourhood Plan that were not covered/addressed in the Sustainability Appraisal of the Cherwell Local Plan. As such, it is considered that the Adderbury Neighbourhood Plan does not require a full SEA to be undertaken."* The conclusion to the Screening Statement states *"Having regard to the screening at Appendix 1, it is considered that the Pre-submission ANP is unlikely to result in any significant environmental effects. On this basis, an SEA would not be required. The draft neighbourhood plan does not allocate land for development other than proposing to allocate one site for community facilities and associated buildings. The ANP also relies upon developments with planning permission and which are under construction. Some additional development at Adderbury was provided for by adopted Cherwell Local Plan 2011-2031 Policies Villages 1 and Villages 2 which was the subject of SEA/SA"*. The District Council has confirmed the three statutory bodies: Historic England, Natural England, and the Environment Agency, were consulted on both an earlier draft and the current Screening Statement. I am satisfied that the requirements in respect of Strategic Environmental Assessment have been met.
42. The SEA Screening Statement states *"Adderbury is located more than 20 km away from European designations for the purpose of the EC Habitats Directive 1992 and the Conservation of Habitats & Species Regulations 2010. It is concluded that an HRA is not required"*. I conclude the Neighbourhood Plan meets the requirements of the EU Habitats Regulations.
43. There are a number of other EU obligations that can be relevant to land use planning including the Water Framework Directive, the Waste Framework Directive, and the Air Quality Directive but none appear to be relevant in respect of this independent examination.

44. I conclude that the Neighbourhood Plan:

- is compatible with the Convention rights
- does not breach, and is otherwise compatible with, EU obligations
- is not likely to have a significant effect on a European site or a European offshore marine site, either alone or in combination with other plans or projects.

45. The Guidance states it is the responsibility of the local planning authority to ensure that all the regulations appropriate to the nature and scope of a draft neighbourhood plan submitted to it have been met in order for the draft neighbourhood plan to progress. Cherwell District Council as local planning authority must decide whether the draft neighbourhood plan is compatible with EU obligations

- when it takes the decision on whether the neighbourhood plan should proceed to referendum; and
- when it takes the decision on whether or not to make the neighbourhood plan (which brings it into legal force).²³

Consideration whether having regard to national policies and advice contained in guidance issued by the Secretary of State, it is appropriate to make the Neighbourhood Plan; and whether the making of the Neighbourhood Plan contributes to the achievement of sustainable development

46. I refer initially to the basic condition “*having regard to national policies and advice contained in guidance issued by the Secretary of State, it is appropriate to make the plan*”. The requirement to determine whether it is appropriate that the plan is made includes the words “*having regard to*”. This is not the same as compliance, nor is it the same as part of the test of soundness provided for in respect of examinations of Local Plans²⁴ which requires plans to be “*consistent with national policy*”.

47. Lord Goldsmith has provided guidance²⁵ that ‘*have regard to*’ means “*such matters should be considered.*” The Guidance assists in

²³ Planning Practice Guidance paragraph 080 Reference ID: 41-080-20150209

²⁴ Under section 20 of the Planning and Compulsory Purchase Act 2004 and in respect of which guidance is given in paragraph 182 of the Framework

²⁵ The Attorney General, (Her Majesty’s Principal Secretary of State for Justice) Lord Goldsmith, at a meeting of the Lord’s Grand Committee on 6 February 2006 to consider the Company Law Reform Bill (Column GC272 of Lords Hansard, 6 February 2006) and included in guidance in England’s Statutory Landscape Designations: a practical guide to your duty of regard, Natural England 2010 (an Agency of another Secretary of State)

understanding “*appropriate*”. In answer to the question “*What does having regard to national policy mean?*” the Guidance states a neighbourhood plan “*must not constrain the delivery of important national policy objectives.*”

48. The Basic Conditions Statement includes at Section 3 a statement that assesses how the Neighbourhood Plan has regard to Paragraphs 16, 183, 184, and 185 of the Framework, and includes a Table that sets out a commentary how each of the Neighbourhood Plan policies have regard to identified paragraphs of the Framework. I am satisfied this assessment and the Table that follows it demonstrates how the Neighbourhood Plan has regard to relevant identified components of the Framework.
49. The Neighbourhood Plan includes a positive vision for Adderbury Parish in 2031. The vision includes economic components with reference to “thriving”, “viable”, “grown” and “investment” as well as social components concerned with “community”, “meet local housing need”, and “community facilities and services”. The vision also refers to environmental matters including “well-designed”, “rural character”, “special landscape setting” and “conservation area” These statements are consistent with the underlying principles of the Framework, specifically, the need to jointly and simultaneously seek economic, social and environmental gains through the planning system.
50. The vision is supported by four objectives of the Neighbourhood Plan, which provide a link between the vision and the policies of the plan. These objectives relate to: growth of the village in its landscape setting; sense of place; the positive transformation of community facilities; conservation of heritage character and landscape setting; and protection of the ecological value and connectivity of green infrastructure. These objectives are consistent with the Framework. Four representations suggest the first objective should exclude backland and tandem development. One of these representations, and another representation, also suggests additional wording in the introductory paragraphs to the policies of the Plan. Modification in these respects is not necessary to meet the Basic Conditions.
51. The Neighbourhood Plan includes in Section 6 a list of infrastructure projects some or all of which could benefit from future community infrastructure levy funding allocated by the local planning authority to the Parish. The Neighbourhood Plan preparation process is a

convenient mechanism to surface and test local opinion on matters considered important in the local community. It is important that those non-development and land use matters, raised as important by the local community or other stakeholders, should not be lost sight of. The Guidance states, *“Neighbourhood planning can inspire local people and businesses to consider other ways to improve their neighbourhood than through the development and use of land. They may identify specific action or policies to deliver these improvements.”* The acknowledgement in the Neighbourhood Plan of issues raised in consultation processes that do not have a direct relevance to land use planning is consistent with this guidance and represents good practice. The Guidance states, *“Wider community aspirations than those relating to development and use of land can be included in a neighbourhood plan, but actions dealing with non-land use matters should be clearly identifiable. For example, set out in a companion document or annex.”* I am satisfied that the presentation of the community actions in a separate section of the Neighbourhood Plan adequately differentiates the infrastructure projects from the policies of the Plan and has sufficient regard for national policy.

52. Apart from those elements of policy of the Neighbourhood Plan in respect of which I have recommended a modification to the plan I am satisfied that the need to *‘have regard to’* national policies and advice contained in guidance issued by the Secretary of State has, in plan preparation, been exercised in substance in such a way that it has influenced the final decision on the form and nature of the plan. This consideration supports the conclusion that with the exception of those matters in respect of which I have recommended a modification of the plan, the Neighbourhood Plan meets the basic condition *“having regard to national policies and advice contained in guidance issued by the Secretary of State, it is appropriate to make the plan.”*

53. At the heart of the Framework is a presumption in favour of sustainable development which should be seen as a golden thread running through both plan making and decision-taking.²⁶ The Guidance states, *“This basic condition is consistent with the planning principle that all plan-making and decision-taking should help to achieve sustainable development. A qualifying body must demonstrate how its plan or order will contribute to improvements in environmental, economic and social conditions or that consideration has been given to*

²⁶ Paragraph 14 National Planning Policy Framework 2012

how any potential adverse effects arising from the proposals may be prevented, reduced or offset (referred to as mitigation measures). In order to demonstrate that a draft neighbourhood plan or order contributes to sustainable development, sufficient and proportionate evidence should be presented on how the draft neighbourhood plan or order guides development to sustainable solutions”²⁷.

54. The Basic Conditions require my consideration whether the making of the Neighbourhood Plan contributes to the achievement of sustainable development. There is no requirement as to the nature or extent of that contribution, nor a need to assess whether or not the plan makes a particular contribution. The requirement is that there should be a contribution. There is also no requirement to consider whether some alternative plan would make a greater contribution to sustainable development.

55. The Framework states there are three dimensions to sustainable development: economic, social and environmental. The Table presented in section 4 of the Basic Conditions Statement confirms the approach adopted in plan preparation to align the Neighbourhood Plan policies with the aims of the Framework for each dimension of sustainability not least through the presentation of scoring of plan policies. Every Policy is found to have a positive effect in at least one of the environmental, social and economic dimensions and none of the policies is found to have a negative impact.

56. I conclude that the Neighbourhood Plan, by guiding development to sustainable solutions, contributes to the achievement of sustainable development. Broadly, the Neighbourhood Plan seeks to contribute to sustainable development by ensuring schemes are of an appropriate quality; will enhance social and economic facilities; and will protect important environmental features. In particular, I consider the Neighbourhood Plan seeks to:

- Support infill development within a defined settlement boundary;
- Protect and enhance the landscape in open countryside;
- Maintain or enhance value of defined green infrastructure;
- Designate seven Local Green Spaces;

²⁷ Planning Practice Guidance (Ref ID:41-072-20140306)

- Conditionally resist development of eighteen identified areas to be designated as Local Open Spaces;
- Define two Local Gaps where development will only be supported if it does not harm open character;
- Establish design principles for development in defined areas of the Parish;
- Resist loss or harm to the significance of ten buildings and structures identified as Locally Listed Buildings;
- Allocate identified land off Milton Road for sports and community uses;
- Conditionally support proposals to improve or extend community facilities at Lucy Plackett Fields;
- Conditionally support proposals to improve the viability of identified community assets and local services and guard against their unnecessary loss;
- Support proposals for new or expanded shops or commercial units and guard against their unnecessary loss;
- Conditionally support proposals for new employment and tourism uses, including tourism and leisure uses along the Oxford Canal, and proposals for intensification of uses on defined established business parks; and
- Resist unnecessary loss of land or buildings from business use.

57. Subject to my recommended modifications of the Submission Plan including those relating to specific policies, as set out later in this report, I find it is appropriate that the Neighbourhood Plan should be made having regard to national policies and advice contained in guidance issued by the Secretary of State. I have also found the Neighbourhood Plan contributes to the achievement of sustainable development.

Consideration whether the making of the Neighbourhood Plan is in general conformity with the strategic policies contained in the development plan for the area of the authority (or any part of that area)

58. The Framework states that the ambition of a neighbourhood plan should “support the strategic development needs set out in Local Plans”.²⁸ “Neighbourhood plans must be in general conformity with the strategic policies of the Local Plan. To facilitate this, local planning authorities should set out clearly their strategic policies for the area and ensure that an up-to-date Local Plan is in place as quickly as possible. Neighbourhood plans should reflect these policies and neighbourhoods should plan positively to support them. Neighbourhood plans should not promote less development than set out in the Local Plan or undermine its strategic policies”.²⁹

59. The Guidance states, “A local planning authority should set out clearly its strategic policies in accordance with paragraph 184 of the National Planning Policy Framework and provide details of these to a qualifying body and to the independent examiner.”³⁰

60. In this independent examination, I am required to consider whether the making of the Neighbourhood Plan is in general conformity with the strategic policies contained in the development plan for the area of the authority (or any part of that area). The District Council has informed me that the Development Plan applying in the Adderbury neighbourhood area and relevant to the Neighbourhood Plan comprises:

- a) the Adopted Cherwell Local Plan 2011-2031 Part 1 Adopted July 2015 (and incorporating Policy Bicester 13 re-adopted December 2016)
- b) Cherwell Local Plan 1996 (saved policies) (Appendix 7 of (a) above includes a list of replaced and retained saved policies)

61. The allocations from the above plans (a and b) are shown on the Interactive Local Plan – policies map available at: <https://www.cherwell.gov.uk/info/83/local-plans/216/interactive-adopted-policies-> . The District Council has confirmed to me that all the policies of the Adopted Cherwell Local Plan 2011-2031 Part 1 are considered to be strategic policies of the Development Plan, and that the Cherwell Local Plan 1996 (saved policies) are not strategic. As the Local Plan Saved Policies predate the Framework, the Framework takes precedence where there is a conflict. Cherwell District Council

²⁸ Paragraph 16 National Planning Policy Framework 2012

²⁹ Paragraph 184 National Planning Policy Framework 2012

³⁰ Planning Practice Guidance Paragraph 077 Reference ID: 41-077-20140306

submitted the Local Plan Partial Review (Oxford's Unmet Housing Need) to the Secretary of State for Housing, Communities and Local Government for formal examination on 5 March 2018, and is also currently preparing the Cherwell Local Plan 2011-2031 Part 2 which will contain non-strategic site allocations and development management policies, but neither of these Plans is not yet part of the Development Plan.

62. The Neighbourhood Plan can proceed ahead of preparation of the new Local Plan Part 2. The Guidance states: *“Neighbourhood plans, when brought into force, become part of the development plan for the neighbourhood area. They can be developed before or at the same time as the local planning authority is producing its Local Plan. A draft neighbourhood plan or Order must be in general conformity with the strategic policies of the development plan in force if it is to meet the basic condition. Although a draft Neighbourhood Plan or Order is not tested against the policies in an emerging Local Plan the reasoning and evidence informing the Local Plan process is likely to be relevant to the consideration of the basic conditions against which a neighbourhood plan is tested. For example, up-to-date housing needs evidence is relevant to the question of whether a housing supply policy in a neighbourhood plan or Order contributes to the achievement of sustainable development. Where a neighbourhood plan is brought forward before an up-to-date Local Plan is in place the qualifying body and the local planning authority should discuss and aim to agree the relationship between policies in:*

- *the emerging neighbourhood plan*
- *the emerging Local Plan*
- *the adopted development plan*

with appropriate regard to national policy and guidance. The local planning authority should take a proactive and positive approach, working collaboratively with a qualifying body particularly sharing evidence and seeking to resolve any issues to ensure the draft neighbourhood plan has the greatest chance of success at independent examination. The local planning authority should work with the qualifying body to produce complementary neighbourhood and Local Plans. It is important to minimise any conflicts between policies in the neighbourhood plan and those in the emerging Local Plan, including housing supply policies. This is because section 38(5) of the Planning and Compulsory Purchase Act 2004 requires that the conflict must be resolved by the decision maker favouring the policy which is contained in the last document to become part of the

*development plan. Neighbourhood plans should consider providing indicative delivery timetables and allocating reserve sites to ensure that emerging evidence of housing need is addressed. This can help minimise potential conflicts and ensure that policies in the neighbourhood plan are not overridden by a new Local Plan.*³¹

63. I am mindful of the fact that should there ultimately be a conflict between the Neighbourhood Plan, and the new Local Plan Part 2 when adopted; the matter will be resolved in favour of the plan most recently becoming part of the Development Plan, however the Guidance is clear in that potential conflicts should be minimised.

64. In order to satisfy the basic conditions, the Neighbourhood Plan must be in general conformity with the strategic policies of the Development Plan. The emerging Local Plan Part 2 is not part of the Development Plan and this requirement does not apply in respect of that. Emerging planning policy is subject to change as plan preparation work proceeds.³² The Guidance states *“Neighbourhood plans, when brought into force, become part of the development plan for the neighbourhood areas. They can be developed before or at the same time as the local planning authority is producing its Local Plan”*. In *BDW Trading Limited, Wainholmes Developments Ltd v Cheshire West & Chester BC* [2014] EWHC1470 (Admin) it was held that the only statutory requirement imposed by basic condition (e) is that the Neighbourhood Plan as a whole should be in general conformity with the adopted development plan as a whole.

65. In considering a now repealed provision that *“a local plan shall be in general conformity with the structure plan”* the Court of Appeal stated *“the adjective ‘general’ is there to introduce a degree of flexibility.”*³³ The use of ‘general’ allows for the possibility of conflict. Obviously, there must at least be broad consistency, but this gives considerable room for manoeuvre. Flexibility is however not unlimited. The test for neighbourhood plans refers to the strategic policies of the development plan rather than the development plan as a whole.

³¹ Paragraph: 009 Reference ID: 41-009-20160211 Planning Practice Guidance

³² The District Council has work underway to prepare The Vale of Aylesbury Local Plan. The Local Development Scheme dated December 2014 indicates adoption is intended in July/August 2017

³³ *Persimmon Homes v. Stevenage BC* the Court of Appeal [2006] 1 P & CR 31

66. The Guidance states, “When considering whether a policy is in general conformity a qualifying body, independent examiner, or local planning authority, should consider the following:

- *whether the neighbourhood plan policy or development proposal supports and upholds the general principle that the strategic policy is concerned with;*
- *the degree, if any, of conflict between the draft neighbourhood plan policy or development proposal and the strategic policy;*
- *whether the draft neighbourhood plan policy or development proposal provides an additional level of detail and/or a distinct local approach to that set out in the strategic policy without undermining that policy;*
- *the rationale for the approach taken in the draft neighbourhood plan or Order and the evidence to justify that approach.”³⁴*

My approach to the examination of the Neighbourhood Plan policies has been in accordance with this guidance.

67. Consideration as to whether the making of the Neighbourhood Plan is in general conformity with the strategic policies contained in the development plan for the area of the authority (or any part of that area) has been addressed through examination of the plan as a whole and each of the plan policies below. Subject to the modifications I have recommended I have concluded the Neighbourhood Plan is in general conformity with the strategic policies contained in the Development Plan.

The Neighbourhood Plan policies

68. The Neighbourhood Plan includes 21 policies as follows:

Policy AD1 Adderbury Settlement Boundary

Policy AD2 Green Infrastructure

Policy AD3 Local Green Spaces

Policy AD4 Local Open Spaces

Policy AD5 Local Gaps

³⁴ Planning Practice Guidance (ID ref: 41-074 201 40306)

- Twyford and Bodicote/Banbury
- West Adderbury and Milton

Policy AD6 Managing Design in the Conservation Area and its Setting: Church Quarter

Policy AD7 Managing Design in the Conservation Area: The Green

Policy AD8 Managing Design in the Conservation Area: The Manors

Policy AD9 Managing Design in the Conservation Area: The Streets

Policy AD10 Managing Design in the Conservation Area: The Lanes

Policy AD11 Managing Design in the Conservation Area: The Valley

Policy AD12 Managing Design in the Conservation Area and its Setting: Former Farm Groups

Policy AD13 Managing Design in the Crescent

Policy AD14 Managing Design in Banbury Road

Policy AD15 Managing Design in the Twyford Estate

Policy AD16 Managing Design in Berry Hill Road and St. Mary's Road

Policy AD17 Locally Listed Buildings

Policy AD18 New Community Facilities

Policy AD19 Community Assets & Local Services

Policy AD20 Promoting New Employment

Policy AD21 Community Infrastructure Levy

69. The Framework states *“Neighbourhood planning provides a powerful set of tools for local people to ensure that they get the right types of development for their community. The ambition of the neighbourhood should be aligned with the strategic needs and priorities of the wider local area. Neighbourhood plans must be in general conformity with the strategic policies of the Local Plan.”* *“Outside these strategic elements, neighbourhood plans will be able to shape and direct sustainable development in their area.”*³⁵

³⁵ Paragraphs 184 and 185 National Planning Policy Framework 2012

70. The Guidance states “A policy in a neighbourhood plan should be clear and unambiguous. It should be drafted with sufficient clarity that a decision maker can apply it consistently and with confidence when determining planning applications. It should be concise, precise and supported by appropriate evidence. It should be distinct to reflect and respond to the unique characteristics and planning context of the specific neighbourhood area for which it has been prepared.”³⁶

71. “While there are prescribed documents that must be submitted with a neighbourhood plan ... there is no ‘tick box’ list of evidence required for neighbourhood planning. Proportionate, robust evidence should support the choices made and the approach taken. The evidence should be drawn upon to explain succinctly the intention and rationale of the policies in the draft neighbourhood plan”.³⁷

72. “A neighbourhood plan must address the development and use of land. This is because if successful at examination and referendum the neighbourhood plan will become part of the statutory development plan once it has been made (brought into legal force) by the planning authority. Applications for planning permission must be determined in accordance with the development plan, unless material considerations indicate otherwise (See section 38(6) of the Planning and Compulsory Purchase Act 2004).”³⁸

73. Several policies refer to other policies of the Neighbourhood Plan. This is generally unnecessary and to a degree confusing as all of the policies of the Neighbourhood Plan apply throughout the entire plan area unless a specific area of application of a particular policy is identified. The identification of a particular policy or policies could mislead a reader to think other policies do not apply. The Neighbourhood Plan should in any case be read as a whole. I have, however, not recommended modification of policies in respect of these cross-references where there is advantage in avoiding repetition of criteria.

74. If to any extent, a policy set out in the Neighbourhood Plan conflicts with any other statement or information in the plan, the conflict must be resolved in favour of the policy. Given that policies have this status,

³⁶ Planning Practice Guidance Paragraph 041 Reference ID: 41-041-20140306

³⁷ Planning Practice Guidance Paragraph 040 Reference ID: 41-040-20160211

³⁸ Planning Practice Guidance Paragraph 004 Reference ID: 41-004-20140306

and if the Neighbourhood Plan is made they will be utilised in the determination of planning applications and appeals, I have examined each policy individually in turn. I have considered any inter-relationships between policies where these are relevant to my remit.

Policy AD1 Adderbury Settlement Boundary

75. This policy seeks to define an Adderbury settlement boundary as shown on the Policies Map and establish conditional support for infill development within it, and a presumption in favour of local landscape protection and enhancement in open countryside outside it. The policy states proposals for changes of use and development outside the settlement boundary will only be supported if it can be demonstrated they are consistent with that presumption.
76. In a representation the District Council states *“There is no objection to the principle of a settlement boundary being included in the ANP. Although there is no specific requirement for such boundaries in the adopted Development Plan, the inclusion of a boundary in itself does not conflict with Local Plan policy. However, it is considered that some further justification for the proposed boundary and explanation of how it was identified is required as set out in government guidance on defining settlement boundaries.”* I have considered Policy AD1 in these two respects, firstly the approach to identify a settlement boundary, and secondly the settlement boundary alignment.
77. A representation considers the settlement boundary should include provision for a new primary school. There is no requirement for the Neighbourhood Plan to make provision for a new primary school. Another representation includes comment on a planning appeal relating to land west of Horn Hill Road and comment on a planning appeal at Hook Norton. I do not consider these comments necessitate modification of the policy to meet the Basic Conditions.
78. A further representation states *“This policy seeks to introduce a settlement boundary for Adderbury, undermining the current approach taken by the Council in the Local Plan Part 1. Cherwell District Council have not designated settlement boundaries preferring a criterion-based approach to allow the flexibility for demonstrably sustainable development to come forward without delay. The approach taken in the ANP policy is therefore more restrictive than the adopted Local*

Plan policy and could be seen to undermine the strategic objectives of the adopted Local Plan conflicting with basic condition (e). This is because the policy seeks to introduce a presumption in favour of local landscape protection and enhancement. There is no such presumption in the Framework, the only presumption is in favour of sustainable development as set out in paragraph 14 unless specific policies in the Framework indicate development should be restricted. One of the core planning principles seeks for the intrinsic character and beauty of the countryside to be recognised but there is not a presumption in favour of its protection and enhancement. Paragraph 113 of the Framework deals with landscape protection which sets out protection should be commensurate to its status with distinctions made between international, national and local designations. For these reasons Gladman suggest this approach is deleted in favour of the District Councils approach in the Local Plan Part 1.” Another representation considers the settlement boundary will not facilitate flexibility to accommodate changing circumstances in the plan period.

79. A further representation objects to the policy requesting modification to include RSL’s land south of Milton Road as a reserve housing site. A representation submitted by the same company at the Regulation 14 consultation stage of plan preparation, and included with the current representation, had proposed further housing allocations adjacent to the existing built up area, such as RSL’s land south of Milton Road. That earlier representation had stated alternatively land could be identified as a reserve site with a view to releasing it should a need arise as a result of changes in circumstances or otherwise to meet need from outside the District.

80. A settlement boundary is used in the Neighbourhood Plan as a policy tool to define where plan policies are to apply, and in particular where development proposals will normally be supported and where proposals must meet a landscape criterion. Proposals are subject to other policies of the Neighbourhood Plan including those which establish design principles. Whilst it is not within my role to test the soundness of the Neighbourhood Plan it is necessary to consider whether the Plan meets the Basic Conditions in so far as it will not promote less development than set out in the Local Plan, as required by paragraph 184 of the Framework.

81. The District Council states *“The Council recognises the figures and assumptions provided in the Neighbourhood Plan provided in the Foreword and at paragraph 4.6 which were available when the*

Submission Plan was being finalised. The latest housing figures are available on the Council's website at <https://www.cherwell.gov.uk/monitoring>. The Council will be exploring how it can deliver the housing requirement for the rural area in Local Plan Part 1 – (Policy Villages 2) in Local Plan Part 2.” Clearly if there is a future conflict between a policy of the Local Plan Part 2 and the Neighbourhood Plan then the conflict is resolved in favour of the Plan that last became part of the Development Plan.

82. Strategic Policy Villages 1 of the Local Plan Part 1 categorises Adderbury as one of more than 20 Category A villages that are identified as the more sustainable villages in Cherwell District. Policy Villages 2 of the Local Plan provides for an additional 750 dwellings at Category A villages (2014-2031) in addition to the rural allowance for small site 'windfalls' and planning permissions as at 31 March 2014. Since 1 April 2014 a total of 664 dwellings have been identified as contributing to meeting the Policy Villages 2 requirement of 750 dwellings. These are sites with either planning permission or a resolution to approve and identified developable sites. At 31 March 2017 there are 86 dwellings remaining from the Policy Villages 2 requirement in the period to 2031.

83. *The Neighbourhood Plan states “The policy is consistent with LP1 Policies Villages 1 and Villages 2, although it makes no provision for housing site allocations over and above the current committed housing schemes on the edge of the village. Nor was there suitable land on the present edge of the village with potential for retail or employment development” and “The District benefits from having an up-to-date strategic planning policy framework and a five-year supply of housing land”. The Neighbourhood Plan states over 180 new homes have been approved since 2013 and that it will take a number of years for the effects on character and capacity to be absorbed. “The scale of those recently completed housing schemes, and of the schemes that will be built out in the next couple of years or so, is such that the District Council does not consider it desirable or necessary for any additional major contribution from Adderbury to meeting the needs of LP1 Policy Villages 2 in the plan period by way of new greenfield development on the edge of the village”.*

84. The Local Plan Part 1 does not allocate sites in the rural areas as only strategic sites were allocated in the Plan. The Local Plan Part 1 does not identify a need for a specific amount of development in the Neighbourhood Plan area. The Cherwell Annual Monitoring Report

2017 at Table 40 (which captures data relating to sites of 10 or dwellings in Category A villages) shows that together sites East of Deene Close, north of Milton Road, and off Banbury Road will accommodate, within the Neighbourhood Plan area, a total of 122 dwellings of which 61 were completed by 2017. The contribution arising from these sites amounts to a significant boost to the supply of housing. Whilst no total figure can be assumed there is undoubtedly potential for a significant number of additional dwellings to be provided on infill plots or through the redevelopment of sites within the proposed settlement boundary. The Neighbourhood Plan places no cap or limit on the number of homes that can be provided within the settlement boundary. I conclude Policy AD1 will not lead to the Neighbourhood Plan promoting less development than set out in the Local Plan, as required by paragraph 184 of the Framework.

85. Paragraph 55 of the Framework states “*Local planning authorities should avoid new isolated homes in the countryside unless there are special circumstances such as:* • *the essential need for a rural worker to live permanently at or near their place of work in the countryside; or* • *where such development would represent the optimal viable use of a heritage asset or would be appropriate enabling development to secure the future of heritage assets; or* • *where the development would re-use redundant or disused buildings and lead to an enhancement to the immediate setting; or* • *the exceptional quality or innovative nature of the design of the dwelling. Such a design should:* – *be truly outstanding or innovative, helping to raise standards of design more generally in rural areas;* – *reflect the highest standards in architecture;* – *significantly enhance its immediate setting; and* – *be sensitive to the defining characteristics of the local area.”* Policy AD1 is silent with respect to the possibility of special circumstances that would justify support of a proposal for an isolated home outside the settlement boundary. These special circumstances would have to be balanced with landscape considerations. I have recommended a modification so that the policy has sufficient regard for national policy in this respect.
86. Paragraph 54 of the Framework states “*In rural areas, exercising the duty to cooperate with neighbouring authorities, local planning authorities should be responsive to local circumstances and plan housing development to reflect local needs, particularly for affordable housing, including through rural exception sites where appropriate.”* Strategic Policy Villages 3: Rural Exception Sites states “*The Council*

will support the identification of suitable opportunities for small scale affordable housing schemes within or immediately adjacent to villages to meet specific, identified local housing needs that cannot be met through the development of sites allocated for housing development.” Policy AD1 is silent with respect to the possibility of local housing need circumstances that would justify support for an exception site proposal outside the settlement boundary. These local circumstances would have to be balanced with landscape considerations. Policy AD1 does not have sufficient regard for national policy and is not in general conformity with strategic policy relating to exception sites. I have recommended a modification so that the policy has sufficient regard for national policy in this respect.

87. I have recommended the imprecise references in the policy to *“development management policies of the development plan”* and *“relevant policies of the Neighbourhood Plan”* are deleted so that the policy provides a practical framework within which decisions on planning applications can be made with a high degree of predictability and efficiency as required by paragraph 17 of the Framework. The Development Plan should in any case be read as a whole, and similarly the Neighbourhood Plan within it should also be read as a whole.
88. I now consider issues relating to the precise alignment of the settlement boundary. A representation in two parts on behalf of two separate clients states *“It is submitted that the settlement boundary as presently defined is inappropriate in drawing a distinction between the confines of the settlement and the open countryside which have distinct land use and landscape characteristics”*. The representation proposes the settlement boundary should include identified domestic gardens in two locations on the basis they relate to domestic properties; are not open countryside; and do not justify the purpose of the policy in favour of landscape protection.
89. In the schedule of changes accompanying the letter of the Parish Council dated 26 January 2018 that I have referred to earlier in my report it is proposed *“On Policies Inset Maps A, B, C the boundary should be amended as follows: 1. To include the properties at the end of Mill Lane. 2. To exclude gardens at the end of Lambourne Way. 3. To exclude gardens behind properties on the south side of The Green”*. It is stated this proposal is *“In response to the comments of residents with regard to possible 'backland and tandem' development*

and developers /landowners with regard to consistency, and to provide further clarity and consistency. In response to CDC's comments."

90. A settlement boundary can represent the dividing line between built areas and open countryside, and can follow clearly defined features such as walls, hedgerows or water courses. Extant planning permissions and allocations can be included within the settlement boundary. The definition of the boundary however does not have to relate to some observable land use difference or dividing feature. A settlement boundary does not have to include the full extent of a settlement, and settlement boundaries do not have to reflect land ownership boundaries or the precise curtilages of properties. Settlement boundaries can be used to identify the limits to future development of a settlement. One approach is to exclude curtilages of properties which have the capacity to extend the built form of a settlement in areas where this is not considered desirable. Such areas could include parts of large residential gardens.
91. The Neighbourhood Plan states *"The Parish Council has followed the standard conventions adopted by local planning authorities for drawing boundaries of this type. The boundary therefore reflects the present observable, developed edge of the village and makes provision for the committed housing schemes approved in recent years"* and *"In some places, there are dwellings on the edge of village with long gardens extending into the countryside beyond. As the sub-division and development of such rear garden land is not considered an acceptable form of infill development in principle, they have been excluded from the Boundary"*. Representations have highlighted inconsistency in this respect and the Parish Council has proposed this error is corrected with respect to the alignment of the settlement boundary in the vicinity of Lambourne Way and south of Sir George's Lane/Lake Walk. The Parish Council has also proposed the error that excluded property in the vicinity of Mill Lane that should have been included in the settlement boundary is also corrected. I am able to recommend modification of the Neighbourhood Plan in order to correct errors. I have recommended a modification in these respects.
92. The settlement boundary proposed has been subject to community engagement and consultation during the plan preparation process. Consideration has been given to the character of the settlement and its development form. I am satisfied the settlement boundary indicates a physical limit to development over the plan period and will guide development to sustainable solutions. It is beyond my role to consider

whether any alternative alignment of the settlement boundary would offer a more sustainable solution (including those proposed in representations relating to land west of property fronting Horn Hill Road and north of the new development off Milton Road; and land east of a property fronting The Leys and south of the former railway line in the vicinity of Lucy Plackett playing fields).

93. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies. I have noted the Neighbourhood Plan states *“In the event of the District’s housing supply strategy having to change before the end of the plan period, then its implications will be considered by the Parish and District Councils and the Neighbourhood Plan may be reviewed to plan for that eventuality”*. This commitment to monitoring represents good practice.
94. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. Subject to the recommended modification the policy has regard to the components of the Framework concerned with supporting a prosperous rural economy; delivering a wide choice of high quality homes; conserving and enhancing the natural environment. Subject to the recommended modification this policy meets the Basic Conditions.

**Recommended modification 2:
In Policy AD1**

- **delete “provided they accord with the development management policies of the development plan and the relevant policies of the Neighbourhood Plan”**
- **replace the third paragraph with “Development proposals will not be supported outside the Adderbury Settlement Boundary unless it is demonstrated they will enhance, or at least not harm, local landscape character. New isolated homes in the countryside will not be supported except in the special circumstances described in paragraph 55 of the Framework. Proposals for the provision of affordable housing on rural exception sites immediately adjacent to the Adderbury Settlement Boundary will be supported**

where they meet an identified local need and relate well to the built form of the existing settlement.”

The Adderbury Settlement Boundary shown on the Policies Map and insets should be adjusted 1. To include the properties at the end of Mill Lane. 2. To exclude gardens at the end of Lambourne Way. 3. To exclude gardens behind properties on the south side of The Green” as illustrated on revised Policies Map Insets A, B, and C attached to the schedule of changes accompanying the letter of the Parish Council dated 26 January 2018.

Policy AD2 Green Infrastructure

95. This policy seeks to define the Adderbury Green Infrastructure Network which is shown on the Policies Map. Development schemes within or immediately adjoining the network must demonstrate how they maintain or enhance green infrastructure value in that location.
96. In the mid-west part of the Plan area shown on Inset A green infrastructure is indicated outside the plan area. The Neighbourhood Plan cannot relate to land outside the Plan area. I have recommended a modification in this respect.
97. A representation by Oxfordshire County Council supports this policy and states *“It would be very helpful for the Neighbourhood Plan to include a list of suggested schemes that address specific issues and could potentially be delivered by developers or for which developer contributions could be sought.”* This is not necessary to meet the Basic Conditions.
98. A representation on behalf of the Church Commissioners for England states with respect to the remaining employment development for Banbury Business Park *“The designation of the site for Green Network is at odds with the employment allocation and the previous planning permission for B1/B2, which demonstrates that employment uses are acceptable at the site”*. I agree that land with consent for business use cannot be identified as Green Infrastructure. This would not have regard for the component of the Framework concerned with building a strong, competitive economy. The policy would also undermine strategic policy that has allocated the land for employment use. I have recommended a modification in this respect

99. A representation states “*We note that upon our client's and adjacent to the public footpath running in a northerly direction from Chapel Lane a corridor has been indicated and a fairly large part of NG parcel number 0486 has also been included. Whilst this land and all land immediately adjoining it is highly unlikely to ever be developed we wish to make it clear that this land is private land with no access rights other than the footpath and the owner is not constrained with respect to his use of the land for its current agricultural use purposes.* Whilst the Guidance refers to “*safe and accessible environments*” and “*providing opportunities for recreation and exercise*” the Glossary to the Framework defines Green Infrastructure as a network of multi-functional green space, urban and rural, which is capable of delivering a wide range of environmental and quality of life benefits for local communities. I am satisfied environmental and quality of life benefits of parts of a green infrastructure network can arise without access. In accordance with paragraph 173 of the Framework I have recommended the deletion of the requirement for public open space provision as this policy obligation may threaten the ability of certain schemes to be delivered viably.

100. Two representations suggest deletion of references to footpaths, bridleways and cycleways on the basis they do not fall within the definition of green infrastructure in the Guidance and are in any case protected under other legislation. The Framework states “*to minimise impacts on biodiversity*” planning policies should identify and map components of the local ecological network including wildlife corridors. The Green Infrastructure Network identifies linear features including the Oxford Canal and towpath, and rivers and watercourses including banks, that can perform the role of wildlife corridors. I am satisfied footpaths and other rights of way can also perform the role of wildlife corridors.

101. One representation states, with respect to Policies Map Inset A, Green Infrastructure has been incorrectly included south of Adderbury Fields and a footpath is shown in the wrong position. The Parish Council and the District Council agree these are incorrectly shown. I am not satisfied representation of green areas within new developments north of Aynho Road and south of Milton Road reflect the layouts as developed. In at least one case the mapping has been overtaken by events with the development of the Gracewell care home facility. I have recommended a modification to correct these errors.

102. In a representation the District Council states the policy “*could benefit from some flexibility to allow for the re-provision of green infrastructure if this is proposed to be lost through development proposals.*” The Framework states plans should “*be a creative exercise in finding ways to enhance and improve the places in which people live*”. The Framework also recognises that if significant harm to biodiversity arising from a development cannot be avoided or mitigated, then as a last resort compensation should be considered. I am satisfied the network shown on Policies Map Inset A serves a purpose of identifying areas of alert, in and adjacent to which, development proposals should, through evidence of investigation of green infrastructure, demonstrate that the integrity and green infrastructure value of the network is not diminished. I have recommended a modification that introduces flexibility into the policy so that maintenance or enhancement of green infrastructure does not have to occur “*in that location*”.

103. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies.

104. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. Subject to the recommended modification the policy has regard to the components of the Framework concerned with promoting healthy communities; and conserving and enhancing the natural environment. Subject to the recommended modification this policy meets the Basic Conditions.

Recommended modification 3:

In Policy AD2

- **after “enhance its” insert “integrity and”**
- **delete “in that location”**
- **delete “and public open space provision” and insert “,or through equivalent alternative provision nearby”**
- **on Policies Map Inset A delete the Green Infrastructure indication on land south of Adderbury Fields**
- **on the Policies Map amend the footpath locations in the area indicated on the Policies Map included with the letter of the Parish Council dated 26 January 2018**

- on the Policies Map delete the Green Infrastructure designation on Banbury Business Park
- on Policies Map Inset A correct the location of Green Infrastructure in newly completed developments south of Milton Road and north of Aynho Road and update loss of Green Infrastructure at the Gracewell site
- Green infrastructure indicated on Policies Map Inset A that is outside the Neighbourhood Plan area must be deleted

Policy AD3 Local Green Spaces

105. This policy seeks to designate seven Local Green Spaces. The wording of the policy reflects the terms of the designation of Local Green Spaces set out in paragraph 76 of the Framework where it is stated communities will be able to rule out development other than in very special circumstances.
106. The Policy makes specific reference to the Society of Friends Meeting House. A building cannot be designated as Local Green Space. I have recommended a modification in this respect. I have noted Policy AD18 seeks to establish support for the improvement and extension of the community facilities at Lucy Plackett Fields provided they do not undermine the integrity of the Local Green Space. Any proposals would have to be assessed in terms in the context of “very special circumstances”.
107. In a representation the District Council states *some of these sites in Policy AD3 are in public and private ownership. Planning Policy Guidance requires that the qualifying body should contact landowners at an early stage about proposals to designate any part of their land as Local Green Space and states landowners will have opportunities to make representations in respect of proposals in a draft plan. Paragraph: 019 Reference ID: 37-019-20140306 Revision date: 06n 03 2014.* I am satisfied the extensive community consultation undertaken in Plan preparation is sufficient to demonstrate regard for the Guidance and that landowners have had opportunity to make representations. The Guidance states “Some areas that may be considered for designation as Local Green Space may already have largely unrestricted public access, though even in places like parks there may be some restrictions. However, other land could be considered for designation even if there is no public access (e.g. green areas which are valued because of their wildlife, historic significance

and/or beauty). Designation does not in itself confer any rights of public access over what exists at present. Any additional access would be a matter for separate negotiation with land owners, whose legal rights must be respected.”³⁹

108. The Framework states *“Local communities through local and neighbourhood plans should be able to identify for special protection green areas of particular importance to them. By designating land as Local Green Space local communities will be able to rule out new development other than in very special circumstances. Identifying land as Local Green Space should therefore be consistent with the local planning of sustainable development and complement investment in sufficient homes, jobs and other essential services. Local Green Spaces should only be designated when a plan is prepared or reviewed and be capable of enduring beyond the end of the plan period.”*

109. In a representation the District Council supports this policy and states *“in order to understand the location of the sites referred to in these policies, it is suggested that these are either numbered or labelled on the policies map.* Designation of Local Green Space can only follow identification of the land concerned. For a designation with important implications relating to development potential it is essential that precise definition is achieved. The proposed Local Green Spaces are presented on the Policy Map insets at a scale that is insufficient to identify the precise boundaries of each Local Green Space proposed for designation. When viewed digitally the scale of the map can be adjusted so that boundaries can be precisely identified. I recommend a modification such that the Plan document when printed as hard copy includes maps of each Local Green Space at a larger scale so that the boundaries of each Local Green Space can be precisely identified.

110. In respect of the areas intended for designation as Local Green Space I find the Local Green Space designations are being made when a neighbourhood plan is being prepared, and I have seen nothing to suggest the designations are not capable of enduring beyond the end of the plan period. The intended designations have regard to the local planning of sustainable development contributing to

³⁹ Planning Practice Guidance Paragraph: 017 Reference ID: 37-017-20140306

the promotion of healthy communities, and conserving and enhancing the natural environment, as set out in the Framework.

111. The Framework states that: *“Local Green Space designation will not be appropriate for most green areas or open space. The designation should only be used:*
- *where the green space is in reasonably close proximity to the community it serves;*
 - *where the green area is demonstrably special to a local community and holds a particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife; and*
 - *where the green area concerned is local in character and is not an extensive tract of land.”*⁴⁰

I find that in respect of each of the intended Local Green Spaces the designation relates to green space that is in reasonably close proximity to the community it serves, is local in character, and is not an extensive tract of land.

112. I now consider whether there is sufficient evidence for me to conclude that the areas proposed for designation as Local Green Space are demonstrably special to a local community and hold a particular local significance. The Green Spaces and Local Gaps report provides sufficient evidence for me to conclude that each of the areas proposed for designation as Local Green Space is demonstrably special to a local community and holds a particular local significance. I find that the areas proposed as Local Green Space are suitable for designation and have regard for paragraphs 76 and 77 of the Framework concerned with the identification and designation of Local Green Space.

113. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. Subject to the recommended modification the policy has regard to the components of the

⁴⁰ Paragraph 77 National Planning Policy Framework 2012

Framework concerned with promoting healthy communities. Subject to the recommended modification this policy meets the Basic Conditions.

Recommended modification 4:

In Policy AD3

- **delete reference to the Society of Friends Meeting House**
- **identify each Local Green Space on the Policies Map with a reference number and include within the Plan document a map of each Local Green Space at a sufficient scale to identify the boundaries precisely**

Policy AD4 Local Open Spaces

114. This policy seeks to designate 18 Local Open Spaces, identified on the Policies Map where development will not be permitted unless three stated criteria are met.
115. In a representation the District Council supports this policy and states *“in order to understand the location of the sites referred to in these policies, it is suggested that these are either numbered or labelled on the policies map.”* I have recommended a modification in this respect so that the policy provides a practical framework within which decisions on planning applications can be made with a high degree of predictability and efficiency as required by paragraph 17 of the Framework.
116. A representation by Oxfordshire County Council states *“It would be very helpful for the Neighbourhood Plan to include a list of suggested schemes that address specific issues and could potentially be delivered by developers or for which developer contributions could be sought.”* This is not necessary to meet the Basic Conditions.
117. A representation opposes inclusion of the *“Adderbury Fields Estate Open Space on the southern side”* as it is in long term arable use. The Parish Council has acknowledged this is an error. I am able to recommend modifications to correct errors. I have recommended a modification in this respect.
118. The policy includes the term *“permitted”*. The policy uses the term *“will be permitted”*. With regard to the issue of decision making the Framework states *“the planning system is plan-led. Planning law requires that applications for planning permission must be determined in accordance with the development plan, unless material*

considerations indicate otherwise". This basis for decision making should be made clear. Policies should use the term "will be supported" in recognition that the basis of decision making is the development plan unless material considerations indicate otherwise. The material considerations at the time of determination of a future planning application are unknown and therefore cannot be dismissed through a policy that states development will be permitted or not permitted. I have recommended a modification so that the basis of decision making on planning applications should be clarified.

119. The Framework states it is "*proper to seek to promote or reinforce local distinctiveness*". The Framework also states "*Access to high quality open spaces and opportunities for sport and recreation can make an important contribution to the health and wellbeing of communities*". Paragraph 74 of the Framework states "*Existing open space, sports and recreational buildings and land, including playing fields, should not be built on unless: • an assessment has been undertaken which has clearly shown the open space, buildings or land to be surplus to requirements; or • the loss resulting from the proposed development would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location; or • the development is for alternative sports and recreational provision, the needs for which clearly outweigh the loss.*" I have recommended a modification so that the policy has sufficient regard for national policy.
120. It is unnecessary and confusing for the policy to refer to other policies of the Neighbourhood Plan, as the Neighbourhood Plan should be read as a whole. The terms "*an essential justification*" and "*a financial contribution*" are imprecise. I have recommended a modification in these respects so that the policy provides a practical framework within which decisions on planning applications can be made with a high degree of predictability and efficiency as required by paragraph 17 of the Framework.
121. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies.
122. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. Subject to the recommended modification the policy has

regard to the components of the Framework concerned with promoting healthy communities; conserving and enhancing the natural environment; and conserving and enhancing the historic environment. Subject to the recommended modification this policy meets the Basic Conditions.

Recommended modification 5:

In Policy AD4

- **Replace the text after the list of locations with “To be supported development proposals on land within any of the Local Open Spaces must demonstrate that, unless it can be clearly shown that the land is surplus to requirements as Local Open Space, that any loss of active or passive recreational amenity will be compensated by equivalent alternative provision in a no less convenient location for users.”**
- **identify each Local Open Space on the Policies Map with a reference number**
- **on Policies Map Inset B correct the location of Green Infrastructure in newly completed developments south Milton Road and north of Aynho Road. The Local Open Space shown extending south of the most extreme south-westerly extent of the settlement boundary should be deleted.**

Policy AD5 Local Gaps

- **Twyford and Bodicote/Banbury**
- **West Adderbury and Milton**

123. This policy seeks to prevent the coalescence of Adderbury with settlements to the north and west by defining two Local Gaps, identified on the Policies Map, within which development proposals will only be supported if they do not harm, individually or cumulatively the function and open character of the defined gap.

124. In the schedule of changes accompanying the letter of the Parish Council dated 26 January 2018 that I have referred to earlier in my report it is proposed paragraph 5.22 of the Neighbourhood Plan should make reference to the Local Gaps following historic field boundaries, and paragraph 5.24 should make reference to the Local Gaps reflecting the Parish boundary. It is beyond my role to

recommend modification of the Neighbourhood Plan on this basis as the changes proposed are not necessary to meet the Basic Conditions.

125. A representation by Oxfordshire County Council states *“Highway improvements and alterations should be specifically excluded from this policy.”* In a representation the District Council states *“Saved Policy C15 of the 1996 Cherwell Plan provides protection for settlements from coalescence but does not define areas. However, the local gaps identified by Policy AD5 have to be fully justified. For Local Plan Part 2 the Council will be exploring the potential allocation of non-strategic sites in the rural areas. It is noted that Policy AD1 provides for protection of the landscape and countryside on the edge of Adderbury”*.
126. A representation by Bodicote Parish Council supports the policy with several comments including *“We do not believe that any development would be appropriate in the Twyford Gap. This gap is increasingly diminishing and the coalescence of Bodicote with Twyford is ever closer. This policy talks about ‘visual’ coalescence, but we are also concerned about actual physical coalescence”*.
127. A representation states *“This policy seeks to introduce local gaps to prevent the coalescence of Adderbury and nearby settlements. Gladman consider the introduction of a gap policy, even if labelled as a local gap, to be a strategic policy beyond the remit of neighbourhood plans. The Local Plan does not deem it necessary to introduce strategic gaps between settlements with the preferred criterion-based approach more than capable of dealing with any potential coalescence issues that may arise through a development proposal. Gladman therefore suggest this policy is deleted to ensure that the plan meets the basic conditions”*.
128. Another representation that objects to this policy and suggests it should be deleted states *“At paragraph 3.6 of the Basic Conditions Statement, it is claimed in the context of paragraph 185 of the NPPF that the Plan avoids duplicating development plan policies by focussing on policies that translate the general requirements of the development plan into an Adderbury context. With regard to Policy AD5, there appears to be some confusion between duplication and translation. Policy ESD13 of the Local Plan is suitable and sufficient, as confirmed by the Local Plan Inspector, to protect vulnerable gaps between settlements from inappropriate development and avoid*

coalescence. Policy AD5 clearly duplicates Local Plan Policy ESD13 and to introduce such a further layer of restriction would be unsound for the same reasons the Local Plan Inspector identified in respect of Draft Local Plan Policy ESD15, which was duly deleted.” The representation includes a submission made at the Regulation 14 stage of Plan preparation. This earlier submission includes references to Local Plan preparation processes where soundness is tested.

129. The representation of the District Council, and the Neighbourhood Plan itself, refer to saved CLP Policy C15 which states *“the Council will prevent the coalescence of settlements by resisting development in areas of open land, which are important in distinguishing them”*. The text supporting Policy C15 includes *“Each town or village has its own separate identity, and it is important that development on areas of open land between them is restricted to prevent their coalescence”*. The Local Gaps to which Policy AD5 relates are not specifically identified by Policy C15 but that does not prevent a policy relating to them being included in the Neighbourhood Plan. I have noted the relevance of CLP Policy C15 but also note the District Council has stated this is not a strategic policy for the purposes of neighbourhood planning. General conformity with Policy C15 is therefore not a requirement to meet the Basic Conditions. Policy AD5 is however fulfilling a role of providing an additional level of detail to Policy C15.
130. Strategic Policy ESD15 refers to the need for new development proposals to respect local topography and landscape features and Strategic Policy ESD13 provides a policy that establishes an approach to landscape protection and enhancement. Neither of these policies specifically refer to coalescence of settlements nor do they identify specific areas where those policies will be of particular relevance.
131. Paragraph 109 of the Framework states the planning system should contribute to and enhance the natural and local environment by protecting and enhancing valued landscapes. The Adderbury Neighbourhood Plan Green Space and Local Gaps Report states *“The agricultural landscape around Adderbury is recognised as contributing to the character of this very special ironstone village. At present there are two weak areas in this surrounding belt, the diminishing gaps between Adderbury and the urban sprawl of Banbury and Bodicote in the north, and Milton to the south west. It is essential that the retention and protection of this open agricultural landscape between the settlements be achieved to prevent coalescence”*. Whilst the value of

the landscape is a factor in the explanation of Policy AD5 the primary motivation for the policy is the prevention of coalescence. Local Gaps as identified in Policy AD5 are a mechanism to direct the location of new development.

132. The absence of any specific reference to Local Gaps in the Framework does not invalidate their legitimacy as a planning policy mechanism in the Neighbourhood Plan to direct development so as “to ensure local people get the right types of development for their community” in accordance with paragraph 184 of the Framework. The term “harm, individually or cumulatively, its function” would prevent any change of use regardless of whether or not the proposal represented sustainable development. I have recommended a modification in this respect as this restriction does not have sufficient regard for national policy that establishes a presumption in favour of sustainable development. Subject to this modification the policy does not prevent all development in the Local Gaps, but adds a further consideration relating to open character, to be taken into account in any development proposals, which may, in some cases, be satisfied by appropriate siting, design or landscaping rather than the refusal of planning permission.

133. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies, in particular Policies ESD13 and ESD15.

134. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. Subject to the recommended modification the policy has regard to the components of the Framework concerned with conserving and enhancing the natural environment. Subject to the recommended modification this policy meets the Basic Conditions.

**Recommended modification 6:
In Policy AD5 delete “function and”**

Policies AD6 to AD13: Heritage and Conservation

135. In a representation the District Council states “*Cherwell Local Plan Policy ESD15 protects the character of built and historic*

environment and the Adderbury Conservation Area Appraisal (CAA) provides an assessment of the character of the area. The assessments in the CAA for the character areas defined in it have formed the basis for the character areas in the ANP. As the ANP character areas are based on the CAA character areas it is suggested that all the areas from the CAA are included in the ANP character areas and illustrated accordingly on Submission Policies Map C. The ANP has included some of the assessment from the CAA in its policies AD6, AD7, AD8, AD9, AD10, AD11, AD12, and AD13 as policy. As there are no general policies that provide a baseline for development, it is suggested that a general baseline policy which covers these character areas may be useful to the Plan to guide development. Some of the information contained within the design policies is based on the existing character and in some cases the policies may be overly protective and not allow for change, positive improvements and investment.

Suggestions include:

- Materials - square and ashlar stone are formal, it might be appropriate to use coursed (rubble) ironstone.*
- Details on windows/doors could be provided if required*
- It may be helpful to define modest cottage in Policy AD10*
- It may be helpful if the buildings in Policy AD17 are defined and assessed against the Local Heritage Assets assessment process.*
- It might be problematic managing trees/planting in Policy AD6”*

Inclusion of additional character areas or changes to character areas, or inclusion of a baseline policy, are not necessary to meet the Basic Conditions. I am satisfied Policies AD6 to AD13 provide an additional level of detail or distinct local approach to that set out in strategic policy ESD15 without undermining that policy.

136. Policies AD7, AD8, AD9, AD14, AD15, and AD16 include reference to the retention or re-provision of hedges. The Hedgerow Regulations 1997 which set out requirements associated with the removal of hedgerows in the countryside do not apply to hedgerows in or marking the boundary of private gardens. Protection of garden hedges is limited to cases where there is a planning condition attached to any planning permission for the land that would prevent the hedge from being removed. This protection can be limited, for example up to 5 years after the implementation of an approved planning permission. It is only where a hedge is in place at the time of determination of a

planning proposal that retention can be required. In cases where no hedge exists new provision could be the subject of a planning condition. I have not recommended a modification in respect of references to hedges in the policies concerned.

137. In a representation Oxfordshire County Council states "*Policies AD 6, 7, 8, 9, 12, 14, 15, 16. These Managing Design policies make provision for proposals having to retain or re-provide natural verges to the highway or roadside verges. The Highway Authority has rights over verges through the Highway's Act and these policies may conflict with this. Indeed section 96(6) states: "No tree, shrub, grass verge, guard or fence shall be planted, laid out or erected under this section, or, if planted, laid out or erected under this section, allowed to remain, in such a situation as to hinder the reasonable use of the highway by any person entitled to use it, or so as to be a nuisance or injurious to the owner or occupier of premises adjacent to the highway."* The policies would not prevent the Highway Authority fulfilling its statutory functions and obligations with respect to highway land. Verges are often highway land. The carrying out of works by a local authority within the boundaries of a road is not itself development. The policies concerned are seeking to achieve specified treatment of highway frontages as part of development proposals. The policies only apply to land included within a development site. In recognition of the complexities of the interaction of different statutory provisions and the difference in circumstances that can apply from one location to another I have recommended a modification of the relevant policies so that the retention or re-provision of natural verges shall be a design principle "where possible."

138. In the schedule of changes accompanying the letter of the Parish Council dated 26 January 2018 that I have referred to earlier in my report it is proposed the key to Policies Map Inset C should explain that the non-coloured areas are 20th century infill where no vernacular design exists. The Parish Council letter also proposes insertion of text prior to Policies AD6 to AD12 making reference to the Adderbury Conservation Area Appraisal (2012), strategic policy ESD15, and the emerging District Council Design Guide. I consider the addition to the key and to supporting text will be helpful, to parties preparing development proposals and to decision makers, in interpreting the policies. I have recommended a modification in these respects so that the policies provide a practical framework within which decisions on planning applications can be made with a high degree of predictability

and efficiency as required by paragraph 17 of the Framework. The Parish Council suggest similar text should also be inserted earlier in the Plan document. Whilst I would have no objection to this I have not recommended a modification in this respect as I do not consider this to be necessary to meet the Basic Conditions.

139. Paragraph 58 of the Framework in stating planning policies should aim to ensure that developments establish a strong sense of place makes specific reference to *“streetscapes and buildings to create attractive and comfortable places to live, work and visit.”* Paragraphs 59 and 60 of the Framework state *“local planning authorities should consider using design codes where they could help deliver high quality outcomes. However, design policies should avoid unnecessary prescription or detail and should concentrate on guiding the overall scale, density, massing, height, landscape, layout, materials and access of new development in relation to neighbouring buildings and the local area more generally”* and *“Planning policies and decisions should not attempt to impose architectural styles or particular tastes and they should not stifle innovation, originality or initiative through unsubstantiated requirements to conform to certain development forms or styles. It is, however, proper to seek to promote or reinforce local distinctiveness”*. With the exception of those design principles where I have recommended a modification I am satisfied Policies AD6 to AD 13 inclusive seek to reinforce local distinctiveness whilst avoiding unnecessary prescription.

Recommended modification 7:

In the Key to Policies Map Inset C insert an explanation of non-coloured areas within the settlement boundary

Immediately before Policy AD6 insert “Managing Design Policies. The following policies AD6 to AD12 have been based on the descriptions of the characteristics provided in the Adderbury Conservation Area Appraisal (2012) and also cross reference strategic policy ESD15, and the emerging CDC Design Guide in order to reinforce the characteristics of each area”

Policy AD6 Managing Design in the Conservation Area and its Setting: Church Quarter

140. This policy seeks to establish design principles which development proposals in the Church Quarter must have full regard for

if they are to be supported. The area of application of the policy is defined on Policies Map Inset C.

141. The District Council states *“It might be problematic managing trees/planting”*. The Framework states *“planning permission should be refused for development resulting in the loss or deterioration of irreplaceable habitats, including ancient woodland and the loss of aged or veteran trees found outside ancient woodland, unless the need for, and benefits of, the development in that location clearly outweigh the loss.”* The approach of Policy AD6 does not adequately have regard for the balanced approach of national policy. Designation as a Conservation Area introduces a clear statutory framework for the control of loss or works to trees of a specific trunk dimension. The introduction of an alternative policy regime is not adequately explained. I have recommended a modification in this respect.
142. The District Council also state *“it might be appropriate to use coursed (rubble) ironstone”*. I agree alternative dressing of stonework would be appropriate and a less prescriptive approach would have greater regard for national policy. I have recommended a modification in this respect. I note the policy requirement is to *“include”* rather than require exclusive use of the specified materials. In this respect an appropriate design solution could demonstrate regard for local distinctiveness whilst also including innovative use of appropriate alternative materials.
143. In a representation Oxfordshire County Council states the policy would *“prevent provision of footways, which is not conducive to improving provision for pedestrians and may lead to a potential development being unable to provide appropriate pedestrian access to their site, a requirement all developments need to meet”*. The policy is seeking to achieve a particular design solution. The policy would not prevent the Highway Authority fulfilling its statutory functions and obligations with respect to land included within the site of a development proposal nor on any other land not included within the site of the development proposal.
144. The County Council has also stated *“To be sustainable, we suggest that any new development must be able to support the health, wellbeing and independence of all residents including those without access or unable to use motor vehicles. Where policies state or imply no pavements should be provided (AD6, 7 and 8), we strongly recommended that this is accompanied with appropriate policies to*

limit the volume and speed of traffic so that the mobility of more vulnerable road users such as children, parents with push chairs, disabled people and older people is not impaired.” It is appropriate for a Neighbourhood Plan to state design principles. The introduction of measures to limit volume and speed of traffic is not a matter that can be dealt with in a land use policy but is a matter for consideration by the Highway Authority.

145. Another representation states *“This policy will only support development if it avoids any obstruction of views from Banbury Road to the Church Quarter Character Area. This is considered to be overly restrictive and Gladman suggest a more flexible approach should be taken to accord with the Framework, where the impacts of any development in this area should be measured in the planning balance. Only where development in this area would have a significant adverse impact on the views to the Church Quarter Character Area should otherwise sustainable development be sought to be restricted. This policy also makes reference to obstructing views into the open countryside from the western end of Mill Lane. This should again be considered in the planning balance and not as restrictive as this policy is worded. It is not sufficient to seek to protect views simply for providing a nice view of the countryside and evidence is required to demonstrate how the view identified has demonstrable attributes that elevates the sites importance above the norm.”* It is appropriate for a community to identify views that are cherished locally. However, I agree that the requirement to avoid *“any obstruction”* of the defined views from the western end of Mill Lane and from Banbury Road does not have sufficient regard for national policy in favour of sustainable development and has not been sufficiently explained. I have recommended a modification in these respects.

146. Representations submitted by a group of six people includes comment on a planning appeal relating to land west of Horn Hill Road and comment on a planning appeal at Hook Norton. I do not consider the comments necessitate modification of the policy to meet the Basic Conditions.

147. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies.

148. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. Subject to the recommended modification the policy has regard to the components of the Framework concerned with requiring good design; conserving and enhancing the natural environment; and conserving and enhancing the historic environment. Subject to the recommended modification this policy meets the Basic Conditions.

Recommended modification 8:

In Policy AD6

- **after “ironstone” continue “or coursed (rubble) ironstone”**
- **delete principle v**
- **delete “do not obstruct” and insert “do not significantly harm”**
- **after “highway” insert “where possible”**
- **delete “avoid any obstruction of” and insert “do not significantly harm”**

Policy AD7 Managing Design in the Conservation Area: The Green

149. This policy seeks to establish design principles which development proposals in The Green must have full regard for if they are to be supported. The area of application of the policy is defined on Policies Map Inset C.

150. The District Council also state “*it might be appropriate to use coursed (rubble) ironstone*”. I agree alternative dressing of stonework would be appropriate and a less prescriptive approach would have greater regard for national policy. I have recommended a modification in this respect. I note the policy requirement is to “*include*” rather than require exclusive use of the specified materials. In this respect an appropriate design solution could demonstrate regard for local distinctiveness whilst also including innovative use of appropriate alternative materials.

151. In a representation the County Council states “*To be sustainable, we suggest that any new development must be able to support the health, wellbeing and independence of all residents including those without access or unable to use motor vehicles. Where policies state or imply no pavements should be provided (AD6, 7 and 8), we strongly recommended that this is accompanied with appropriate policies to limit the volume and speed of traffic so that the*

mobility of more vulnerable road users such as children, parents with push chairs, disabled people and older people is not impaired.” It is appropriate for a Neighbourhood Plan to state design principles. The introduction of measures to limit volume and speed of traffic is not a matter that can be dealt with in a land use policy but is a matter for consideration by the Highway Authority.

152. The term “*spacious nature*” is imprecise. I have recommended a modification in this respect so that the policy provides a practical framework within which decisions on planning applications can be made with a high degree of predictability and efficiency as required by paragraph 17 of the Framework.

153. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies.

154. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. Subject to the recommended modification the policy has regard to the components of the Framework concerned with requiring good design; conserving and enhancing the natural environment; and conserving and enhancing the historic environment. Subject to the recommended modification this policy meets the Basic Conditions.

Recommended modification 9:

In Policy AD7

- **delete “spacious nature of the area and” and insert “the distinctive density and layout of the area including”**
- **after “ironstone” continue “or coursed (rubble) ironstone”**
- **after “highway” continue “where possible”**

Policy AD8 Managing Design in the Conservation Area: The Manors

155. This policy seeks to establish design principles which development proposals in The Manors must have full regard for if they are to be supported. The area of application of the policy is defined on Policies Map Inset C.

156. The District Council also state *“it might be appropriate to use coursed (rubble) ironstone”*. I agree alternative dressing of stonework would be appropriate and a less prescriptive approach would have greater regard for national policy. I have recommended a modification in this respect. I note the policy requirement is to *“include”* rather than require exclusive use of the specified materials. In this respect an appropriate design solution could demonstrate regard for local distinctiveness whilst also including innovative use of appropriate alternative materials.
157. In a representation the County Council states *“To be sustainable, we suggest that any new development must be able to support the health, wellbeing and independence of all residents including those without access or unable to use motor vehicles. Where policies state or imply no pavements should be provided (AD6, 7 and 8), we strongly recommended that this is accompanied with appropriate policies to limit the volume and speed of traffic so that the mobility of more vulnerable road users such as children, parents with push chairs, disabled people and older people is not impaired.”* It is appropriate for a Neighbourhood Plan to state design principles. The introduction of measures to limit volume and speed of traffic is not a matter that can be dealt with in a land use policy but is a matter for consideration by the Highway Authority.
158. Three representations propose the policy should include *“proposals promoting back land and tandem development will not be permitted as this will have a detrimental effect on the pastoral landscape of the Manors character area.”* A modification of this nature is not necessary to meet the Basic Conditions.
159. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies.
160. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. Subject to the recommended modification the policy has regard to the components of the Framework concerned with requiring good design; conserving and enhancing the natural environment; and conserving and enhancing the historic environment. Subject to the recommended modification this policy meets the Basic Conditions.

Recommended modification 10:

In Policy AD8

- after “ironstone” continue “or coursed (rubble) ironstone”
- after “highway” continue “where possible”

Policy AD9 Managing Design in the Conservation Area: The Streets

161. This policy seeks to establish design principles which development proposals in The Streets must have full regard for if they are to be supported. The area of application of the policy is defined on Policies Map Inset C.

162. The District Council also state “*it might be appropriate to use coursed (rubble) ironstone*”. I agree alternative dressing of stonework would be appropriate and a less prescriptive approach would have greater regard for national policy. I have recommended a modification in this respect. I note the policy requirement is to “*include*” rather than require exclusive use of the specified materials. In this respect an appropriate design solution could demonstrate regard for local distinctiveness whilst also including innovative use of appropriate alternative materials.

163. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies.

164. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. Subject to the recommended modification the policy has regard to the components of the Framework concerned with requiring good design; conserving and enhancing the natural environment; and conserving and enhancing the historic environment. Subject to the recommended modification this policy meets the Basic Conditions.

Recommended modification 11:

In Policy AD9

- after “ironstone” continue “or coursed (rubble) ironstone”
- after “walls or” insert “, where possible,”

Policy AD10 Managing Design in the Conservation Area: The Lanes

165. This policy seeks to establish design principles which development proposals in The Lanes must have full regard for if they are to be supported. The area of application of the policy is defined on Policies Map Inset C.
166. In a representation Oxfordshire County Council states the policy would “*prevent provision of footways, which is not conducive to improving provision for pedestrians and may lead to a potential development being unable to provide appropriate pedestrian access to their site, a requirement all developments need to meet. Policy AD10 may also prevent bringing routes up to standard, as it requires maintaining the existing informal pattern of narrow routes with no footway*”. The policy is seeking to achieve a particular design solution. The policy would not prevent the Highway Authority fulfilling its statutory functions and obligations with respect to land included within the site of a development proposal nor on any other land not included within the site of the development proposal.
167. A representation states the policy identifies areas for views not to be obstructed. The representation raises the same points as identified in respect of Policy AD6 and suggest the same modifications are made. I agree the requirement to avoid “*any obstruction*” of the defined views from both ends of Chapel Lane does not have sufficient regard for national policy in favour of sustainable development and has not been sufficiently explained. I have recommended a modification in these respects.
168. Two other representations suggest the policy should oppose backland and tandem development as this will have a detrimental effect on the pastoral landscape of The Lanes character area. A modification of this nature is not necessary to meet the Basic Conditions. The term “*modest*” as used in paragraph 5.37 is imprecise. I have recommended a modification to make it clear the cottages in Church Lane are small and modest.
169. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies.

170. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. Subject to the recommended modification the policy has regard to the components of the Framework concerned with requiring good design; conserving and enhancing the natural environment; and conserving and enhancing the historic environment. Subject to the recommended modification this policy meets the Basic Conditions.

Recommended modification 12:

In Policy AD 10

- In principles vii and viii delete “do not obstruct” and insert “do not significantly harm”
- In supporting text paragraph 5.37 before “modest” insert “small and”

Policy AD11 Managing Design in the Conservation Area: The Valley

171. This policy seeks to establish design principles which development proposals in The Valley must have full regard for if they are to be supported. The area of application of the policy is defined on Policies Map Inset C.

172. A representation states the policy identifies areas for views not to be obstructed. The representation raises the same points as identified in respect of Policy AD6 and suggest the same modifications are made. I agree the requirement to avoid “*any obstruction*” of the defined views from both ends of Chapel Lane does not have sufficient regard for national policy in favour of sustainable development and has not been sufficiently explained. I have recommended a modification in these respects.

173. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies.

174. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. Subject to the recommended modification the policy has regard to the components of the Framework concerned with requiring

good design; conserving and enhancing the natural environment; and conserving and enhancing the historic environment. Subject to the recommended modification this policy meets the Basic Conditions.

Recommended modification 13:

In Policy AD11 delete “do not obstruct” and insert “do not significantly harm”

Policy AD12 Managing Design in the Conservation Area and its Setting: Former Farm Groups

175. This policy seeks to establish design principles which development proposals in the Former Farm Groups area must have full regard for if they are to be supported. The area of application of the policy is defined on Policies Map Inset C.
176. In a representation Oxfordshire County Council states “*this Policy may prevent developers from being able to provide appropriate access to their site, through boundary wall requirements restricting access visibility, for example.*” The policy is seeking to achieve a particular design solution. The policy would not prevent the Highway Authority fulfilling its statutory functions and obligations with respect to land included within the site of a development proposal nor on any other land not included within the site of the development proposal.
177. The Framework states “*planning permission should be refused for development resulting in the loss or deterioration of irreplaceable habitats, including ancient woodland and the loss of aged or veteran trees found outside ancient woodland, unless the need for, and benefits of, the development in that location clearly outweigh the loss.*” The approach of Policy AD12 does not adequately have regard for the balanced approach of national policy. Designation as a Conservation Area introduces a clear statutory framework for the control of loss or works to trees. The introduction of an alternative policy regime is not adequately explained. I have recommended a modification in this respect.
178. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies.

179. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. Subject to the recommended modification the policy has regard to the components of the Framework concerned with requiring good design; conserving and enhancing the natural environment; and conserving and enhancing the historic environment. Subject to the recommended modification this policy meets the Basic Conditions.

**Recommended modification 14:
In Policy AD12**

- **after “spaces and” insert “where possible”**
- **delete “as well as mature deciduous and coniferous trees within the gardens and along the roadsides, of a growth height and planting density”**

Policy AD13 Managing Design in the Crescent

180. This policy seeks to establish design principles which development proposals in the Crescent area must have full regard for if they are to be supported. The area of application of the policy is defined on Policies Map Inset C.

181. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies.

182. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. The policy has regard to the components of the Framework concerned with requiring good design; and conserving and enhancing the natural environment. This policy meets the Basic Conditions.

Policy AD14 Managing Design in Banbury Road

183. This policy seeks to establish design principles which development proposals in the Banbury Road area must have full regard for if they are to be supported. The area of application of the policy is defined on Policies Map Inset C.

184. In a representation Oxfordshire County Council states *“In terms of the retention of verges along Banbury Road, in addition to previous comments regarding verges, the A4260 is a strategic corridor and bus route and suffers severe congestion through Adderbury, which affects the reliability of bus services. This policy may affect the possibility of widening the road to increase capacity, particularly around the junction with Aynho Road. There may be other character area land use policies which affect highway verges along the A4260 and the B4100 – these should be amended to remove the requirement to retain or reinstate highway verges”*. As stated earlier in my report the policy would not prevent the Highway Authority fulfilling its statutory functions and obligations with respect to highway land. Verges are often highway land. The carrying out of works by a local authority within the boundaries of a road is not itself development. The policy is seeking to achieve specified treatment of highway frontages as part of development proposals. The policies only apply to land included within a development site. In recognition of the complexities of the interaction of different statutory provisions and the difference in circumstances that can apply from one location to another I have recommended a modification so that the retention or re-provision of natural verges shall be a design principle “where possible.”

185. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies.

186. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. Subject to the recommended modification the policy has regard to the components of the Framework concerned with requiring good design; and conserving and enhancing the natural environment. Subject to the recommended modification this policy meets the Basic Conditions.

Recommended modification 15:

In Policy AD14 after “gardens and” insert “where possible”

Policy AD15 Managing Design in the Twyford Estate

187. This policy seeks to establish design principles which development proposals in the Twyford Estate must have full regard for if they are to be supported. The area of application of the policy is defined on Policies Map Inset C.

188. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies.

189. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. Subject to the recommended modification the policy has regard to the components of the Framework concerned with requiring good design; and conserving and enhancing the natural environment. Subject to the recommended modification this policy meets the Basic Conditions.

Recommended modification 16:

In Policy AD15 after “gardens and” insert “where possible”

Policy AD16 Managing Design in Berry Hill Road and St. Mary’s Road

190. This policy seeks to establish design principles which development proposals in Berry Hill road and St. Mary’s Road must have full regard for if they are to be supported. The area of application of the policy is defined on Policies Map Inset C.

191. In a representation Oxfordshire County Council states *“Regarding the retention of verges along Berry Hill Road, in addition to previous comments regarding verges, there is currently no footway, which forces pedestrians into the carriageway on what is a busy through route to Bloxham. This policy may affect the possibility of constructing a footway along Berry Hill Road in future. The requirement to retain or re-provide highway verges should be removed.”* As stated earlier in my report the policy would not prevent the Highway Authority fulfilling its statutory functions and obligations with respect to highway land

192. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted

Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies.

193. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. Subject to the recommended modification the policy has regard to the components of the Framework concerned with requiring good design; and conserving and enhancing the natural environment. Subject to the recommended modification this policy meets the Basic Conditions.

Recommended modification 17:

In Policy AD16 after “gardens and” insert “where possible”

Policy AD17 Locally Listed Buildings

194. This policy seeks to identify ten named buildings and structures as Locally Listed Buildings on the basis that they have local architectural or historic interest.
195. In a representation Historic England suggest that the policy should include local heritage assets that have not yet been identified but may be so during the life of the Neighbourhood Plan, rather than limiting itself to those that have already been identified e.g. include the wording *“Other Local Heritage Assets may be identified during the Plan period using the criteria...”*. “In a representation Oxfordshire County Council states *“Disappointingly there is still no mention of heritage assets of archaeological interest. The historic environment, as defined by the NPPF, does not consist of built heritage only and does include archaeological sites and features as historic assets. There is therefore no proposed protection or identification of these important assets within the plan and our original advice therefore remains unchanged. This is particularly surprising as the Archaeology team have had numerous emails and phone calls from the residents of Adderbury, including the parish council, about their archaeology; it is clearly something that they consider important”*. Representations submitted by a group of six people state archaeological findings north of Milton Road should be preserved. It is not within my role to add additional assets to which the policy should apply. There is no requirement for the Neighbourhood Plan to include reference to

archaeology, or to heritage assets that may in the future be identified, in order to meet the Basic Conditions.

196. The District Council states *“It may be helpful if the buildings in Policy AD17 are defined and assessed against the Local Heritage Assets assessment process”*. The Guidance states it is the role of the local planning authority to recognise non-designated heritage assets.⁴¹ The District Council website states *“In addition to Listed Buildings, Government policy advises us to have regard to non-designated heritage assets through the planning process. In 2013 Cherwell established a programme of Local Heritage Assets, working with local communities to nominate structures which have a specific local heritage value. This register will replace the former local list. The intention of the register is to identify buildings and structures of heritage value, which while not worthy of formal listing by Historic England, still play an important role in the history and architectural heritage of a community. We have run workshops with parish councils and local amenity groups and over 40 new assets have been added to the list by the community. Structures and buildings identified on the register do not have the same statutory protection as listed buildings.”* It is appropriate for a community to use the neighbourhood plan preparation process to identify buildings and structures of local interest and to include policies to require particular consideration of those assets in the determination of planning applications. It is not appropriate to imply those assets identified will be recognised by the District Council as heritage assets. I have recommended a modification in this respect.

197. Another representation states *“This policy seeks to resist any proposal that would result in harm to the significance of a Local Heritage Asset. This does not accord with the Framework, especially paragraph 135 which seeks for any harm or loss to the significance of a heritage asset to be considered in a balanced judgement, not simply to restrict development. Gladman suggest that this policy is modified to accord with national policy regarding non-designated heritage assets.”* Paragraph 135 of the Framework states *“The effect of an application on the significance of a non-designated heritage asset should be taken into account in determining the application. In weighing applications that affect directly or indirectly non-designated heritage assets, a balanced judgement will be required having regard to the scale of any*

⁴¹ Planning Practice Guidance Reference ID 18a-041-20140306

harm or loss and the significance of the heritage asset.” I have recommended a modification in this respect so that the policy has regard for national policy and provides a practical framework within which decisions on planning applications can be made with a high degree of predictability and efficiency as required by paragraph 17 of the Framework.

198. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. Subject to the recommended modification the policy has regard to the components of the Framework concerned with conserving and enhancing the historic environment. Subject to the recommended modification this policy meets the Basic Conditions.

Recommended modification 18:

Replace Policy AD17 with “Proposals affecting the significance of the following locally important buildings and structures will be assessed having regard to the scale of any harm or loss and the significance of the locally important building or structure: (include list of properties)” and change the policy title to “Buildings and structures of local importance”

Include in ‘Chapter 6 Implementation’ of the Neighbourhood Plan a proposal that “The following buildings and structures are nominated for assessment as Local Heritage Assets: (include the list of heritage assets)”

Policy AD18 New Community Facilities

199. This policy seeks to allocate land off Milton Road, West Adderbury, as identified on the Policies Map, for sport and community uses subject to six conditions. The policy also seeks to establish support for the extension of the community facilities at the Lucy Plackett Fields provided they do not undermine the integrity of the Local Green Space.

200. In a representation the District Council states *“This policy guides the development of the new community facility which will include the provision of access, community building and sports pitches. This would form part of the planned development for the community on public owned land. The need for the leisure facility has been identified in the leisure survey, which forms part of the evidence base”*. Representations submitted by a group of six people comment on floodlighting issues. I am satisfied part vi of the policy satisfies the Basic Conditions. In a representation Oxfordshire County Council states points ii and iii *“are considered superfluous as they are as they will be assessed by the Highway Authority”*. I am satisfied points ii and iii seek to shape and guide development as envisaged in the Framework

201. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies.

202. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. The policy has regard to the components of the Framework concerned with promoting healthy communities. This policy meets the Basic Conditions.

Policy AD19 Community Assets & Local Services

203. This policy seeks to establish:

- conditional support for proposals to improve the viability of community use of named buildings and facilities through extension or partial redevelopment;
- that proposals that will result in loss or significant harm to any named facility will be resisted unless not financially viable or will be replaced;
- support for new or expanded shops or commercial uses;
- that proposals for loss of shops or commercial uses will be resisted unless commercially no longer viable.

204. In a representation the District Council states *“It would worth considering clarifying in the Policy or supporting text that new local*

shops or commercial properties should be small scale. It would be beneficial to identify the assets and local services on the policies map". The Framework sets out national policy relating to the location of new retail development. The reference to promotion of healthy communities includes the term "*local shops*". I have recommended a modification in this respect. I have recommended a modification so that the community assets and local services listed in the policy are identified on the Policies Map so that the policy provides a practical framework within which decisions on planning applications can be made with a high degree of predictability and efficiency as required by paragraph 17 of the Framework.

205. Oxfordshire Clinical Commissioning Group state "*it may relevant to also list Gracewell Nursing Home*". It is not within my role to recommend additions to the list of community assets and services that are the subject of the policy. Any addition would not have been subject to consultation. I have however referred to the desirability to update the list with respect to any assets or facilities that no longer exist. Representations submitted by a group of six people state the policy does not adequately address issues relating to the general food store. There is no requirement that the policy should address the matters raised.

206. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies.

207. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. Subject to the recommended modification the policy has regard to the components of the Framework concerned with promoting healthy communities. Subject to the recommended modification this policy meets the Basic Conditions.

Recommended modification 19:

In Policy AD19

- **after "new" insert "local"**
- **identify each community asset and local facility on the Policies Map**

Policy AD20 Promoting New Employment

208. This policy seeks to establish that proposals for new employment and tourism uses and proposals to intensify employment uses within an established business park will be conditionally supported within the settlement boundary. The policy also seeks to conditionally support proposals for tourism and leisure development along the Oxford Canal. Proposals that will result in loss of employment land or buildings will only be supported if it is clearly demonstrated the land is no longer viable for a business use.
209. In a representation the District Council states *“It is suggested, to follow the approach in Policy SLE1 of the Local Plan, that ‘business park’ is replaced by ‘employment sites’ in the policy which provides a wider definition and more flexibility”* and *“The Council supports the recognition of the Oxford Canal in the Neighbourhood Plan and in this policy. It may be of benefit for the Plan to contain a standalone policy for the part of Policy A20 that relates to leisure, tourism and the Oxford Canal. If not, the title of the policy should be amended.”* Adjustment of the policy title to reflect the policy content assists clarity as required by the Framework. Use of the term ‘employment site’ provides greater clarity, and flexibility in building a strong competitive economy as required in the Framework. I have recommended a modification in these respects.
210. Strategic Policy SLE1 includes *“In cases where planning permission is required existing employment sites should be retained for employment use unless the following criteria are met: - the applicant can demonstrate that an employment use should not be retained, including showing the site has been marketed and has been vacant in the long term. - the applicant can demonstrate that there are valid reasons why the use of the site for the existing or another employment use is not economically viable. -the applicant can demonstrate that the proposal would not have the effect of limiting the amount of land available for employment”*.
211. In order to provide a practical framework for decision-making on development proposals, as required by paragraph 17 of the Framework, it is preferable that policies should be self-contained and not include references to policies or content in other parts of the Development Plan as the Development Plan, including the Neighbourhood Plan, should be read as a whole. Self-contained neighbourhood plan policies may also avoid obsolescence resulting

from changes to, or replacement of those other documents. In this instance in order to demonstrate general conformity with strategic policy I have recommended a modification to include reference to strategic Policy SLE1 as a shorthand method of capturing content without lengthy repetition in the Neighbourhood Plan policy. This will ensure that the policy provides a practical framework within which decisions on planning applications can be made with a high degree of predictability and efficiency as required by paragraph 17 of the Framework. I have referred to necessary consequential adjustments to supporting text in the Annex to my report.

212. Strategic Policy ESD 16 states *“The Oxford Canal - We will protect and enhance the Oxford Canal corridor which passes south to north through the District as a green transport route, significant industrial heritage, tourism attraction and major leisure facility through the control of development. The length of the Oxford Canal through Cherwell District is a designated Conservation Area and proposals which would be detrimental to its character or appearance will not be permitted. The biodiversity value of the canal corridor will be protected. We will support proposals to promote transport, recreation, leisure and tourism related uses of the Canal where appropriate, as well as supporting enhancement of the canal’s active role in mixed used development in urban settings. We will ensure that the towpath alongside the canal becomes an accessible long-distance trail for all users, particularly for walkers, cyclists and horse riders where appropriate. Other than appropriately located small scale car parks and picnic facilities, new facilities for canal users should be located within or immediately adjacent to settlements. The Council encourages pre-application discussions to help identify significant issues associated with a site and to consider appropriate design solutions to these and we will seek to ensure that all new development meets the highest design standards”*. In the case of Strategic Policy ESD16 it is only necessary to capture the specific point regarding location of new facilities in order to ensure general conformity. In this case I have recommended the policy is modified to include an additional criterion in order to demonstrate conformity with strategic policy relating to development along the Oxford Canal.

213. The policy has regard for those parts of the Framework which state planning policies should *“support economic growth in rural areas in order to create jobs and prosperity by taking a positive approach to sustainable new development”* and *“support sustainable rural tourism*

and leisure developments that benefit businesses in rural areas, communities and visitors, and which respect the character of the countryside. This should include supporting the provision and expansion of tourist and visitor facilities in appropriate locations where identified needs are not met by existing facilities in rural service centres”.

214. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies.

215. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. Subject to the recommended modification the policy has regard to the components of the Framework concerned with building a strong, competitive economy; ensuring the vitality of town centres; and supporting a prosperous rural economy. Subject to the recommended modification this policy meets the Basic Conditions.

Recommended modification 20:

In Policy AD 20

- **delete “business park” and insert “employment site”**
- **add criteria vi “new facilities for canal users, other than appropriately located small scale car parks and picnic facilities, should be located within or immediately adjacent to settlements.”**
- **continue the policy after “business use” with “and subject to general conformity with the criteria set out in Strategic Policy SLE1”**

Continue the policy title with “and Tourism”

Policy AD21 Community Infrastructure Levy

216. This policy seeks to establish that five named projects are identified as priorities for investing in local infrastructure.

217. Historic England supports the use of Community Infrastructure Levy monies to fund maintenance of heritage assets as set out in Policy AD21, particularly where this includes measures that increase their use or appreciation by the public.

218. In a representation the District Council states *“The Neighbourhood Plan may need to consider other infrastructure projects to include in the list, such as public transport, highway improvements such as planting footpaths, bridleways, health, communications, etc”*.

219. The County Council considers more detail should be provided regarding the projects and how they will be implemented and in particular *“The Neighbourhood Plan identifies “improving cycle safety and connectivity of off-road cycleways” as a priority for investing future community infrastructure levy funding allocated by the local planning authority to the Parish into local infrastructure, but nothing else in transport terms. This is also not precise in terms of scheme identification. The most significant transport issue in the village is the severe congestion at the junction of the A4260 and B4100. This has a direct adverse effect on local residents in terms of journey time reliability and pollution. Previous comments from Oxfordshire County Council mentioned that ‘The NP could provide a greater emphasis on the importance of public transport and the planned improvements to local bus services ... The Plan should support the County Council’s strategy to develop these bus services, which will be of great benefit to Adderbury’s present and future residents.’ This has not been addressed within the latest version of the Plan. The importance of bus connections into Oxford and Banbury should be recognised. Enhancing the bus service between Banbury and Oxford should be mentioned within the NP, not only because this will be of immense benefit to the people of Adderbury, but also because S106 contributions towards the cost will be expected from new residential developments, on a pro rata basis. Bus stops that are required as a consequence of new developments can be requested as S106/S278 as a mitigating measure”* and *“We also recommend that pedestrian safety and the improvement of connectivity (e.g. the provision of pavements and controlled crossings) and accessibility of public footpaths (e.g. the replacement of stiles with accessible gates) are also included within Policy AD21 and section 6.5 ‘Infrastructure Projects’.*” Additions to the list of projects or more details of projects are not necessary to meet the Basic Conditions.

220. Network Rail state consideration should be given to developer contributions to fund enhancements such as car parking facilities at Kings Sutton railway station. Oxfordshire Clinical Commissioning Group suggest an addition to the list of projects named in the policy. It

is not within my role to recommend additions to the list of projects that are the subject of the policy.

221. Representations submitted by a group of six people includes comment in relation to the provision of land for use as a cemetery however this does not require any modification of the policy to meet the Basic Conditions.

222. It is appropriate to use the Neighbourhood Plan preparation process to determine community support for projects to be treated as priorities for investment in local infrastructure. Whilst parties have stated additional projects and details should be included in the policy these are not necessary to meet the Basic Conditions.

223. The policy is in general conformity with the strategic policies of the Development Plan, namely the policies included in the Adopted Cherwell Local Plan 2011-2031 Part 1 and provides an additional level of detail or distinct local approach to that set out in the strategic policies.

224. The policy seeks to shape and direct sustainable development to ensure that local people get the right type of development for their community. The policy has regard to the components of the Framework concerned with promoting sustainable transport; and promoting healthy communities. This policy meets the Basic Conditions.

Summary and Referendum

225. I have recommended 20 modifications to the Submission Version Plan. I have also made a recommendation of modification in the Annex below.

226. I am satisfied that the Neighbourhood Plan⁴²:

- is compatible with the Convention rights, and would remain compatible if modified in accordance with my recommendations; and

⁴² The definition of plans and programmes in Article 2(a) of EU Directive 2001/42 includes any modifications to them

- subject to the modifications I have recommended, meets all the statutory requirements set out in paragraph 8(1) of schedule 4B of the Parish and Country Planning Act 1990 and meets the Basic Conditions:
 - having regard to national policies and advice contained in guidance issued by the Secretary of State, it is appropriate to make the plan;
 - the making of the neighbourhood plan contributes to the achievement of sustainable development;
 - the making of the neighbourhood plan is in general conformity with the strategic policies contained in the development plan for the area of the authority (or any part of that area);
 - does not breach, and is otherwise compatible with, EU obligations; and would continue to not breach and be otherwise compatible with EU obligations if modified in accordance with my recommendations; and
 - the making of the neighbourhood plan is not likely to have a significant effect on a European site or a European offshore marine site, either alone or in combination with other plans or projects.⁴³

I recommend to Cherwell District Council that the Adderbury Neighbourhood Development Plan for the plan period up to 2031 should, subject to the modifications I have put forward, be submitted to referendum.

227. I am required to consider whether the referendum area should extend beyond the Neighbourhood Plan area and if to be extended, the nature of that extension.⁴⁴ I have seen nothing to suggest the referendum area should be extended beyond the designated Neighbourhood Area.

I recommend that the Neighbourhood Plan should proceed to a referendum based on the area that was designated by Cherwell District Council as a Neighbourhood Area on 7 June 2013.

⁴³ Prescribed for the purposes of paragraph 8(2) (g) of Schedule 4B to the 1990 Act by Regulation 32 The Neighbourhood Planning (General) Regulations 2012 and defined in the Conservation of Habitats and Species Regulations 2010 and the Offshore Marine Conservation (Natural Habitats, &c.) Regulations 2007

⁴⁴ Paragraph 8(1)(d) Schedule 4B Town and Country Planning Act 1990

Annex: Minor Corrections to the Neighbourhood Plan

228. A number of consequential modifications to the general text, and in particular the justification of policies sections, of the Neighbourhood Plan will be necessary as a result of recommended modifications relating to policies, for example, adjustment of paragraph 5.65 to refer to Strategic Policy SLE1 in order to correspond with modification of the text of Policy AD20.

229. I am able to recommend modification of the Neighbourhood Plan in order to correct errors.⁴⁵ I recommend the following minor changes only in so far as it is to correct an error or where it is necessary so that the Neighbourhood Plan provides a practical framework within which decisions on planning applications can be made with a high degree of predictability and efficiency as required by paragraph 17 of the Framework:

- The Note on the front cover of the Submission Plan relating to Pre-Submission Consultation should be updated.
- The list of land use policies presented at page 5 of the Neighbourhood Plan shows different policy titles to those in the main body of the Plan in respect of Policies AD6 and AD12. The list of land use policies should be amended.
- Representation 2 in the Schedule of Regulation 16 representations refers to archaeological remains recently found. Paragraph 2.4 should be updated to refer to *“archaeological evidence of Neolithic remains”*
- Representation 3 in the Schedule of Regulation 16 representations states the alignment of identified footpaths are incorrectly shown on the Policies Map. These should be checked and corrected as necessary.
- The list of community assets and local services in Policy AD19 should be updated to delete any facilities that now no longer exist.
- In the Glossary replace Oxford with Oxfordshire.
- Delete “Management” and insert “Managing” in the title to Policy AD9.

⁴⁵ Paragraph 10 (3)(e) of Schedule 4B to the Town and Country Planning Act 1990

**Recommended modification 21:
Modification of general text will be necessary to achieve consistency with the modified policies, and to correct identified errors including those arising from updates.**

APPENDICES

Appendix 1	Detailed Route Descriptions
------------	-----------------------------

1 BACKGROUND AND SCOPE OF REPORT

1.1 Background

1.1.1 Croft were commissioned during 2017 by Hollins Strategic Land to produce a Transport Statement to support a planning application relating to proposals to develop a site for residential use off Berry Hill Road in the village of Adderbury in the district of Cherwell in Oxfordshire.

1.1.2 Outline planning permission was originally sought in October 2017 for the construction of up to 60 residential dwellings (Use Class C3) with associated open space, landscaping, and vehicular access taken from Berry Hill Road (ref: 17/02394/OUT).

1.1.3 The location of the site is shown on **Plan 1**.

1.1.4 All highways issues relating to the original planning application were resolved to the satisfaction of the local highway authority, Oxfordshire County Council (OCC).

1.1.5 The proposals were then reduced in size and consisted of 40 residential dwellings. The vehicular access to the site will remain as previously proposed, and is shown on Plan 2 (**Drawing Number 1899-Fo1 Revision H**), enclosed with this Statement, which shows the same vehicular access as Drawing Number 1899-Fo1 Revision D, which was the last version that Oxfordshire County Council (OCC) have commented on and is referred to in the Committee Report.

1.1.6 The amended planning application (same reference as the original) was then refused for three reasons in January 2020. The first of these was as follows:

'The development proposed, by reason of its scale and siting beyond the built up limits of the village, in open countryside and taking into account the number of dwellings already permitted in Adderbury, with no further development identified through the Adderbury Neighbourhood Plan 2014-2031, is considered to be unnecessary, undesirable and unsustainable development. The site itself is in an unsustainable location on the edge of the village, distant from local services and facilities and would result in a development where future occupiers would be highly reliant on the private car for day to day needs. The proposal is therefore unacceptable in principle and contrary to Policies ESD1, BSC1, SLE4 and Villages 2 of the Cherwell Local Plan (2011-2031) Part 1, Saved Policy H18 of the Cherwell Local Plan 1996 and Government guidance contained within the National Planning Policy Framework'.

1.1.7 Part of this reason for refusal refers to the sustainability of the site and concludes that *'The site itself is in an unsustainable location on the edge of the village, distant from local services and facilities and would result in a development where future occupiers would be highly reliant on the private car for day to day needs'.*

1.1.8 Again, all highways issues were resolved to the satisfaction of OCC, subject to conditions and a range of improvements and off site contributions, which are listed later in this Section.

1.1.9 OCC made a number of conclusions within the Committee Report and Updated Committee Report, namely:

- Para 9.76 of the Committee Report - 'The Highway Authority have raised no objections to the proposed development on key matters such as the main access arrangements (vehicular and pedestrian/ cycle) and the proposal to include new bus stops on the A4260. No concerns are raised with regard to transport movements and their impact upon the local highway network'.
- Para 9.78 of the Committee Report – 'The LHA has sought contributions towards transport improvements and these would have been pursued should this site have been recommended for approval'.

1.1.10 It is also worth noting that OCC did not object to the site on the basis of its locational sustainability.

1.1.11 As part of the appeal process this Statement will provide a more detailed consideration of the sustainable credentials of the Appeal site to provide the Inspector with more comprehensive information to demonstrate that the site is indeed appropriately sustainable and will not be contrary to Policies ESD1, BSC1, SLE4 and Villages 2 of the Cherwell Local Plan (2011-2031) Part 1, Saved Policy H18 of the Cherwell Local Plan 1996 and Government guidance contained within the National Planning Policy Framework.

1.2 Site Location

1.2.1 The Appeal site is located to the south of the centre of the village of Adderbury.

1.2.2 The site is bordered to the west by existing properties off Berry Hill Road, to the north and east by various public rights of way and undeveloped land and to the south by Berry Hill Road.

1.2.3 Berry Hill Road runs along the southern boundary of the site and runs between the village centre to the north and its junction with the A4260 Oxford Road to the south-east of the site.

1.2.4 The road is around 6 to 7 metres wide with wide verges on both sides of the road. Part way along the site frontage the speed limit of the road changes from 30mph, in the northern section, to national speed limit, to the south. The road also has street lighting.

1.3 Summary of Proposals

1.3.1 It is proposed to develop the site to provide up to 40 residential dwellings, with associated car parking and landscaping.

1.3.2 Car parking across the site will comply with Oxfordshire County Council's current residential car parking standards.

1.3.3 Vehicular access is proposed directly off Berry Hill Road, as shown in **Plan 2 (Drawing Number 1899-Fo1 Revision H)**.

1.3.4 Although the vehicular access has stayed the same as Revision D, there have been some other minor changes have been made which are listed as follows:

- Revision E – based on OS background.
- Revision F – same plan but additional OS background added.
- Revision G – amended proposed footway on Berry Hill Road.
- Revision H – proposed bus stops moved to the western side of the junction of Oxford Road/Berry Hill Road due to recent bus route changes.

- 1.3.5 As already stated, the current speed limit adjacent along Berry Hill Road is split between a 30mph and national speed limit. It is part of these proposals that the speed limit will be extended to beyond the Site Access.
- 1.3.6 The plan shows that visibility splays of 2.4 metres by 43 metres can be achieved in both directions which are commensurate with traffic speeds of 30mph, as set out in Manual for Streets. The internal layout of the site will be designed to provide a safe environment for pedestrians and cyclists with clearly defined walkways, crossing points and speed reducing features where appropriate.
- 1.3.7 The proposals will provide a new footway on the northern side of Berry Hill Road from the site access up to the junction of Berry Hill Road and Horn Hill Road. This will provide the local highway network with around 400 metres of additional footway to assist not only pedestrians travelling to and from the Appeal Site but also the existing residential properties along the northern and eastern side of Berry Hill Road. This will substantially assist in the general accessibility of this part of the village.
- 1.3.8 In addition to the above, it is worth noting that the proposed new footway along Berry Hill Road will also extend to the south-east of the site access and around the corner onto the A4260 Oxford Road, where a new crossing point with a pedestrian refuge, dropped kerbs and tactile paving will be provided. This will enhance existing pedestrian infrastructure in the area and connect the site to the existing footway provision along the southern side of the A4260 Oxford Road, thus providing a safe continuous walking route to local employment opportunities, such as Twyford Mill and Station Yard Industrial Estate, located approximately 400 metres to the north of the Berry Hill Road junction.

1.3.9 The proposals will also provide the following contributions to improve the sustainability of the site:

- Section 106 contribution of £60,000 for improvements to local bus services, which will benefit local residents.
- Section 106 contribution of £20,000 for improvements to local public rights of way and bridleways, which will benefit existing residents.
- Section 106 of £10,000 for the provision of two new bus stops, with shelters, on Berry Hill Road to serve the proposed development, which will benefit existing residents.

1.4 Scope of Report

1.4.1 This Statement will deal specifically with the issues of transport sustainability relating to the appeal proposals.

1.4.2 Section 2 considers in detail the accessibility of the Appeal Site by non-car modes, including walking, cycling and public transport. Section 3 of the Transport Statement that accompanied both planning applications also considered this issue but this Statement will provide more detail and information to assist the Inspector at the forthcoming Hearing.

1.4.3 Section 3 draws together the findings and conclusions of this Statement.

2 ACCESSIBILITY BY NON CAR MODES

2.1 Introduction

2.1.1 In order to accord with the aspirations of the National Planning Policy Framework (NPPF), any new proposals should extend the choice in transport and secure mobility in a way that supports sustainable development.

2.1.2 The presumption in favour of sustainable development is a central theme running through the framework and transport planning policies are seen as a key element of delivering sustainable development as well as contributing to wider sustainability and health objectives. One of the core principles of the NPPF is to *'ensure opportunities to promote walking, cycling and public transport use are identified and pursued.'*

2.1.3 To achieve this objective, paragraph 108 of the NPPF states when making decisions it should be ensured that:

"Appropriate opportunities to promote sustainable transport modes can be - or have been - taken up given the type of development and its location."

2.1.4 New proposals should therefore attempt to influence the mode of travel to the development in terms of gaining a shift in modal split towards non-car modes, thus assisting in meeting the aspirations of current national and local planning policy.

2.1.5 As detailed above, the amended planning application (same reference as the original) was then refused for three reasons in January 2020. The first of these, listed in the previous section of this Statement, included the following:

2.1.6 To confirm that the Appeal Site is sustainable in transport terms this section will consider its accessibility by the following modes of transport:

- Accessibility on foot.
- Accessibility by cycle.
- Accessibility by bus.
- Accessibility by rail.

2.2 Pedestrian Routes

2.2.1 As shown on **Plan 4**, there are existing public right of way (PRoW) routes for pedestrians to travel to and from the Appeal Site. These are also being supplemented by improvements to existing infrastructure to ensure residents and visitors can travel between the site and the surrounding area both safely and directly.

2.2.2 These proposed improvements to pedestrian infrastructure improvements included in Section 1.3 of this Statement.

2.3 Accessibility on Foot

2.3.1 It is important to create a choice of direct, safe and attractive routes between where people live and where they need to travel in their day-to-day life. This philosophy clearly encourages the opportunity to walk whatever the journey purpose and also helps to create more active streets and a more vibrant neighbourhood.

2.3.2 The Chartered Institute of Highways and Transportation (CIHT) published in 2015 a document entitled 'Planning for Walking' (CD6.2). In paragraph 2.1, it states that in 2012 that 79% of all journeys made in the UK of less than a mile (1.6 kilometres) are carried out on foot.

2.3.3 The Institute of Highways and Transportation (IHT) document 'Guidelines for Providing for Journeys on Foot', provides information on acceptable walking distances. Table 3.2 suggests distances for desirable, acceptable and preferred maximum walks to 'town centres', 'commuting/schools' and 'elsewhere'. The 'preferred maximum' distances are shown below in Table 3.1.

Suggested Preferred Maximum Walk		
Town Centre	Commuting/School	Elsewhere
800m	2,000m	1,200m

Table 2.1 - IHT 'Providing for Journeys on Foot' Walk Distances

2.3.4 The Government introduced advice on walking distances in the 2001 revision to Planning Policy Guidance (PPG) 13 Transport, now withdrawn, which advised that *'Walking is the most important mode of travel at the local level and offers the greatest potential to replace short car trips, particularly those under two kilometres.'*

2.3.5 Manual for Streets (MfS) continues the theme of the acceptability of the 2,000 metre distance in paragraph 4.4.1. This states that *'walkable neighbourhoods are typically characterised by having a range of facilities within 10 minutes' (up to about 800m) walking distance of residential areas which residents may access comfortably on foot. However, this is not an upper limit and PPS13 states that walking offers the greatest potential to replace short car trips, particularly those under 2 km'.*

2.3.6 Table 2.2 below summarises this guidance in tabular form.

'Comfortable' Walk	'Preferred Maximum' Walk
800m	2,000m

Table 2.2 Manual for Streets Walk Distances

2.3.7 More specific guidance on the distances that children will walk to school is found in the July 2014 document published by the Department for Education (DfE) entitled 'Home to School Travel and Transport' statutory guidance document. This suggests that the maximum walking distance to schools is 2 miles (3.2 kilometres) for children under 8 and 3 miles (4.8 kilometres) for children over the age of 8. This is summarised below in Table 2.3.

Children under 8 Walk Distances	Children over 8 Walk Distances
3,200m	4,800m

Table 2.3 DfE Walk Distances to Schools

2.3.8 Further evidence that people will walk further than the suggested 'preferred maximum' distances in the IHT 'Providing for Journeys on Foot' is contained in a WYG Report entitled 'Accessibility – How Far Do People Walk and Cycle'. This report refers to National Travel Survey (NTS) data for the UK as a whole, excluding London, and confirms the following 85th percentile walk distances:

- All journey purposes – 1,930 metres;
- Commuting – 2,400 metres;
- Shopping – 1,600 metres;

- Education – 3,200 or 4,800 metres;
- Personal business – 1,600 metres.

2.3.9 Overall, in Table 5.1, the document states that 1,950 square metres is the 85th percentile distance for walking as the main mode of travel. Table 2.4 below summarises the various 85th percentile walk distances suggested as guidelines in the WYG Study.

85 th Percentile Walk Distances					Overall Recommended Preferred Max
All Journeys	Commuting	Shopping	Education	Personal	
1,950m	2,100m	1,600m	3,200m/4,800m	1,600m	1,950m

Table 2.4 WYG Report/NTS Data Walk Distances

2.3.10 In summary, the distance of 1,950 metres, or around 2 kilometres, represents an acceptable maximum walking distance for the majority of land uses although clearly the DfE guidance for walking to school is up to 3.2 kilometres.

2.3.11 Section 3.1 of the CIHT guidance 'Planning for Walking' mentioned earlier in this report provides a useful reminder of the health benefits of walking. This states that:

'A brisk 20 minute walk each day could be enough to reduce an individual's risk of an early death.'

2.3.12 A 20-minute walk equates to a walking distance of around 1,600 metres.

- 2.3.13 In light of the above review, a pedestrian catchment of 2 kilometres from the centre of the developable site, using all usable pedestrian routes, has been provided in **Plan 3** and provides an illustrative indication of the areas that can be reached based on a leisurely walk from the site.
- 2.3.14 In addition to the pedestrian catchment plan, a review of the proximity of local facilities has been undertaken. The locations of such facilities in relation to the site are also shown in **Plan 3**.
- 2.3.15 The 2,000 metre pedestrian catchment includes numerous local amenities such as a local recreational park/play area, Lucy Plackett Playing Fields, Adderbury Stores, The Coach and Horses public house, The Bell Inn public house, Adderbury Library, Adderbury Post Office, The Church of St Mary, Christopher Rawlins Church of England Primary School, Adderbury Parish Institute, Adderbury Day Nursery and local employment areas such as the Twyford Mill Estate.
- 2.3.16 Table 2.5 below, shows the walking distance from the centre of the developable site to several of the local key amenities in the vicinity of the site.

Amenities within 2,000m using Footways					
Shops & Day to day facilities	(m)	Education/Community	(m)	Health/Leisure/ Employment	(m)
New Bus Stops	350	Adderbury Day Nursery	710	Antycip Simulation	740
Existing Bus Stop	480	Recreational Park/Play Area	630	Fired Earth	780
Post Box	510	Lucy Plackett Playing Fields	990	Trade Secret	780
Adderbury Stores	1,520	The Church of St Mary	1,300	Motec Europe	800
Adderbury Post Office	1,530	Adderbury Library	1,410	The Bell Inn	1,510
		Adderbury Parish Institute	1,470	The Coach and Horses	1,600
		Christopher Rawlins Church of England Primary School	2,000 1,680 (Oxford Road)	Squires Hairdressers	1,650
				Banbury Westend Tennis & Squash Club	1,740

Table 2.5 Distance from Centre of the developable Site to Local Facilities

- 2.3.17 As can be seen, there are a number of 'local facilities' within 2 kilometres of the site, these include Adderbury Post Office, Adderbury Stores, Adderbury Library, The Church of St Mary and Adderbury Parish Institute. Various distances above have been measured using the footways along Berry Hill Road, Horn Hill Road, Cross Hill Road, New Road and Water Lane.

- 2.3.18 Included within the 2,000 metre catchments are education facilities, such as Adderbury Day Nursery and Christopher Rawlins Church of England Primary School. It is also worth noting that despite Blessed George Napier Roman Catholic School (Secondary School & Sixth Form) being located outside of the 2km pedestrian catchment, it is accessible via an 11 minute journey on bus service S4 and a short walk, equating to a total time of approximately 17 minutes.
- 2.3.19 As mentioned above, various distances have been measured by using the footways along Berry Hill Road, Horn Hill Road, Cross Hill Road, New Road and Water Lane. As shown on **Plan 4**, existing Public Right of Way routes surround the site and the likelihood is residents would use these routes to get to their 'day to day' amenities.
- 2.3.20 However, there are a number of existing PRowS in the area that provide a more direct and shorter route to some of the amenities in daylight and dry weather and these are shown in Table 2.6 below, using a combination of footways and existing and improved PRowS.

Amenities within 2,000m using Footway and PRoWs					
Shops & Day to day facilities	(m)	Education/Community	(m)	Health/Leisure/ Employment	(m)
New Bus Stops	350	Adderbury Day Nursery	710	Antycip Simulation	740
Existing Bus Stop	480	Recreational Park/Play Area	630	Fired Earth	780
Post Box	510	Lucy Plackett Playing Fields	700	Trade Secret	780
Adderbury Stores	920	The Church of St Mary	730	Motec Europe	800
Adderbury Post Office	930	Adderbury Library	810	The Bell Inn	900
		Adderbury Parish Institute	1,200	The Coach and Horses	1,130
		Christopher Rawlins Church of England Primary School	1,390	Squires Hairdressers	1,050
				Banbury Westend Tennis & Squash Club	1,130

Table 2.6 Distance from Site to Local Facilities using Footway and PRoW Routes.

2.3.21 As can be seen, the distances are much shorter when using the existing Public Right of Way routes for the majority of the amenities, namely Adderbury Post Office, Adderbury Stores, Adderbury Library, The Church of St Mary, The Bell Inn, Christopher Rawlins Church of England Primary School and Lucy Plackett Playing Fields.

2.3.22 To further consider the accessibility of the site for pedestrians, the walking routes to a selection of destinations has also been provided, as follows;

- Schools (primary);
- Local retail facilities;

- Healthcare and Leisure;
- Employment opportunities; and
- Transport Nodes.

2.3.23 The walking route for each of the above routes are provided in the following plans;

- Schools (primary and secondary) - **Plan 5**;
- Local retail facilities - **Plan 6**;
- Healthcare and Leisure Facilities - **Plan 7**;
- Employment opportunities - **Plan 8**; and
- Transport Nodes - **Plan 9**.

2.3.24 These are also described in more detail, based on footway routes, rather than using the PRowS in **Appendix 1**.

2.4 Assessment of Distances to Amenities Against Guidance

2.4.1 To provide some qualitative analysis to the exercise set out in the previous section and to consider the Appeal Site when judged against the guidance contained in the various reference documents, **Table 2.7** sets out a number of local facilities and assesses against the walking distance criteria detailed in the previous paragraphs.

2.4.2 For ease of reference the compliance with the various guidance documents is shown in green for 'complies with', orange for 'just outside' and red for 'outside guidance distance'.

Facility	Name	Walk Distance	Walk Time	Compliance with...
Nursery	Adderbury Day Nursery	710m	8.5 mins	IHT – complies with 2km distance MfS - complies with 2km distance DfE - complies with 3.2km distance WYG – complies with 3.2km distance
		2,000m	24.2 mins	IHT – complies with 2km distance MfS - complies with 2km distance DfE - complies with 3.2km distance WYG – complies with 3.2km distance
Primary School	Christopher Rawlins Church of England Primary School	1,680m (Oxford Road)	20 mins	IHT – complies with 2km distance MfS - complies with 2km distance DfE - complies with 3.2km distance WYG – complies with 3.2km distance
		1,390m (PRoW)	16.5 mins	IHT – complies with 2km distance MfS - complies with 2km distance DfE - complies with 3.2km distance WYG – complies with 3.2km distance
Local Services	Adderbury Library	1,410m	17.2 mins	IHT – outside 1.2km distance MfS - complies with 2km distance WYG - complies with 1.6km distance
		810m (PRoW)	10 mins	IHT – complies with 1.2km distance MfS - complies with 2km distance WYG - complies with 1.6km distance
Local Services	Adderbury Stores	1,520m	18.1 mins	IHT – outside 1.2km distance MfS - complies with 2km distance WYG – complies with 1.6km distance
		920m (PRoW)	11.1 mins	IHT – complies with 1.2km distance MfS - complies with 2km distance WYG – complies with 1.6km distance
Post Office	Adderbury Post Office	1,530m	18.2 mins	IHT – outside 1.2km distance MfS - complies with 2km distance WYG – complies with 1.6km distance
		930m (PRoW)	11.2 mins	IHT – complies with 1.2km distance MfS - complies with 2km distance WYG – complies with 1.6km distance
Amenity/Open Space	Recreational Play Area	630m	7.5 mins	IHT – complies with 1.2km distance MfS - complies with 2km distance WYG - complies with 1.6km distance
Key Employment Area	Twyford Mill Estate	680m	8.1 mins	IHT – complies with 1.2km distance MfS - complies with 2km distance WYG - complies with 2.1km distance

Table 2.7– Distance/Journey from Centre of Site and Comparison to Guidance

- 2.4.3 As can be seen from the above table, the Appeal Site complies with the distances to each of the key amenities 'areas' contained within the various guidance documents.
- 2.4.4 The table also confirms that there are numerous local facilities within a 15 minute walk of the centre of the Appeal Site, including Twyford Mill Estate (8 minutes), Adderbury Day Nursery (8 minutes), a Local Recreational Park/Play Area (8 minutes), Adderbury Stores (11 minutes using PRoW), Adderbury Library (10 minutes using PRoW) and Adderbury Post Office (11 minutes using PRoW). As such, there are a number of local services around a 15 minute walk which meets with the 'broad accessibility target' of the various guidance reference documents.
- 2.4.5 The above table demonstrates that the Appeal Site complies with the various distances contained within IHT, MfS, DfE and WYG.
- 2.4.6 Those amenities that fall outside these guidance distances are out of the village of Adderbury and are all located within either Banbury or Deddington, such as the nearest Secondary Schools, doctor's surgeries and dental practices, for example.
- 2.4.7 Clearly, pedestrians will travel further to get to a specific destination but generally, it could be considered that Deddington would be accessible by cycle and certainly by bus, thus enabling the level of vehicular travel to be minimised.
- 2.4.8 Banbury and Deddington can be accessed via a short bus journey from the site, as detailed below. The S4 service stops, for example, in the centre of Deddington, across the road from the Co-operative food store and a short walk to other day to day amenities and is around a 6 minute bus journey from the Appeal site.

- 2.4.9 Both Banbury and Deddington are also a short drive from the Appeal Site and as all of the other key amenities listed in the above table are within Banbury or Deddington these can all be visited as part of the same trip, even if it is by car, which is sustainable in itself.
- 2.4.10 Additionally, the main 'day to day' amenities such as schools, shops, bus stops, post boxes and employment opportunities are all within the 'preferred maximum' distances (2 kilometres) from the centre of the Appeal Site.
- 2.4.11 The above confirms that the site benefits from good accessibility when judged against these widely accepted walking distances criteria. Walking and cycling will be promoted and encouraged through the Travel Plan which will assist in delivering a sustainable development. Furthermore, as already stated, additional pedestrian links and off site works and contributions will be implemented as part of the Appeal proposals.

2.5 Suitability of Walking Routes

- 2.5.1 Within the CIHT document entitled 'Planning for Walking', there is reference within this document to the '5Cs of Good Walking Networks' that were defined by Transport for London (TfL) in their document entitled 'Improving Walkability' from 2005. These are as follows:
- 1. *Connected: Walking routes should connect all areas with key "attractors" such as public transport stops, schools, work and leisure destinations. Routes should connect locally and at district level, forming a comprehensive network.* The location of the existing and proposed pedestrian routes to and from the Appeal Site are 'connected' as they ensure that pedestrians can walk reasonably directly from the site to the nearby bus stops, schools and shops, for example.

- 2. *Convivial: Walking routes and public spaces should be pleasant to use and allow walkers and other road users to interact. They should be safe, inviting and enlivened by diverse activities. Ground floors of buildings should be continuously interesting. In terms of 'conviviality', the existing and proposed routes will be pleasant to use and will be, generally, lit to ensure a safe passage for all pedestrians.*
- 3. *Conspicuous: Routes should be clear and legible, if necessary, with the help of signposting and waymarking. Street names and property numbers should be comprehensively provided. The routes proposed are clear and legible to allow easy choices to be made at key junction points.*
- 4. *Comfortable: Comfortable walking requires high-quality pavements, attractive landscapes and buildings and as much freedom as possible from the noise, fumes and harassment of vehicles. Opportunities for rest and shelter should be provided. Each of the walking routes to and from the site will offer 'comfortable' routes. The surfacing of the existing routes is of a good standard and the new routes will be surfaced with high quality materials. Some of the pedestrian routes to and from the site are also free from 'noise, fumes and harassment of vehicles' as they are lightly trafficked.*
- 5. *Convenient: Routes should be direct and designed for the convenience of those on foot, not those in vehicles. This should apply to all users, including those whose mobility is impaired. Road crossings should be provided as of right and on desire lines. Each of the routes are reasonably direct and follow mostly existing roads within the village. The improvements proposed will ensure that the routes are designed as safe routes for all users.*

2.5.2 As such, the existing and proposed pedestrian routes meet the aspirations of each of these criteria and ensuring that the pedestrian routes to and from the Appeal Site are connected, convivial, conspicuous, comfortable and convenient.

- 2.5.3 In light of the above, it has been demonstrated that the Appeal proposals and associated footpath linkages will be in line with the guidance contained within local and national guidance and allow pedestrian travel to and from the site to be maximised.

2.6 Accessibility by Cycle

- 2.6.1 An alternative mode of travel to the site could be achieved by bicycle.
- 2.6.2 An acceptable and comfortable walk distance for general cycling is referenced as being up to 5 kilometres in the DfT Local Transport Note 2/08. The same guidance also includes a reference to commuting cycling with distances of up to 8 kilometres. A cycle route plan is enclosed as **Plan 10**.
- 2.6.3 A distance of 5 kilometres is generally accepted as a distance where cycling has the potential to replace short car journeys. This distance equates to a journey of around 25 minutes based on a leisurely cycle speed of 12 kilometres per hour and would encompass the whole of Adderbury, Banbury, Bloxham, Bodicote, Kings Sutton and Deddington.
- 2.6.4 National cycle route 5 is located approximately 4 kilometres west from the centre of the site, this cycle route runs through local surrounding areas such as Bloxham, Bodicote, Barford St Michael and Banbury. This cycle route also runs further south and into Oxford City Centre. The route to the NCR5 from the site travels along Berry Hill Road and Milton Road.
- 2.6.5 The Appeal site can, therefore, be considered as being accessible by cycle.
- 2.6.6 To consider the Appeal Site's accessibility by cycle, **Table 2.8** sets out a number of local facilities and assesses against the cycling distance criteria detailed in paragraph 2.6.2 above.

Facility	Name	Cycle Distance	Journey Time	Compliance with...
Nursery	Adderbury Day Nursery	710m	4 mins	Complies with 5km LTN and 8km NTS distances
Primary School	Christopher Rawlins Church of England Primary School	2,000m	10.1 mins	Complies with 5km LTN and 8km NTS distances
		1,680m (Oxford Road)	8.5 mins	Complies with 5km LTN and 8km NTS distances
Secondary School	Blessed George Napier Catholic School	5,750m	29 mins	Outside the 5km LTN Complies with 8km NTS distance
Local Services	Adderbury Stores	1,520m	8.1 mins	Complies with 5km LTN and 8km NTS distances
Local Services	Adderbury Library	1,410m	7.1 mins	Complies with 5km LTN and 8km NTS distances
Post Office	Adderbury Post Office	1,530m	8.1 mins	Complies with 5km LTN and 8km NTS distances
Supermarket	Co-operative	3,450m	17.4 mins	Complies with 5km LTN and 8km NTS distances
Doctor's Surgery	Deddington Health Centre	3,330m	17.1 mins	Complies with 5km LTN and 8km NTS distances
Pharmacy	Delmergate Pharmacy	3,450m	17.4 mins	Complies with 5km LTN and 8km NTS distances
Dentist	Deddington Dental	3,520m	18.2 mins	Complies with 5km LTN and 8km NTS distances
Amenity/Open Space	Recreational Play Area	630m	3.2 mins	Complies with 5km LTN and 8km NTS distances
Key Empl Area	Twyford Mill Estate	720m	4 mins	Complies with 5km LTN and 8km NTS distances
Key Empl Area	Deddington Fire Station	3,040m	15.4 mins	Complies with 5km LTN and 8km NTS distances
Key Empl Area	Banbury Business Park	3,100m	16 mins	Complies with 5km LTN and 8km NTS distances

Key Empl Area	Johnsons & Co (Deddington)	3,700m	19.1 mins	Complies with 5km LTN and 8km NTS distances
Key Empl Area	Bloxham Mill Business Centre	5,000m	25.3 mins	Complies with 5km LTN and 8km NTS distances
Key Empl Area	RAF Barford St John	5,550m	28.2 mins	Outside the 5km LTN Complies with 8km NTS distance

Table 2.8 -Distance from Site and Cycle Times to Local Facilities

2.6.7 As can be seen above, the Appeal Site has been demonstrated to be accessible by cycle. The above table shows that the site lies well within accepted cycle distance criteria to all nearby 'day to day' amenities and employment areas.

2.7 Accessibility by Bus

2.7.1 An effective public transport system is essential in providing good accessibility for large parts of the population to opportunities for work, education, shopping, leisure and healthcare in the town and beyond.

2.7.2 As part of the development, two new bus stops are proposed as an improvement along the A4260 Oxford Road, approximately 350 metres south from the centre of the developable site, and therefore within a 5 minute walk.

2.7.3 The nearest existing bus stops are located to the west of the site on Horn Hill Road, with an approximate walking distance of 480 metres from the centre of the developable site, around a 6 minute walk.

2.7.4 The nearest bus stops to the Appeal site and their associated walking distances and times are summarised in **Table 2.9** below;

Bus Service	Location	Distance	Walk Time
S4	Hill Horn Road	480m	6.1 mins
S4	A4260 Oxford Road (Proposed)	350m	4.1 mins

Table 2.9 –Bus Stop Distances and Walking Times from Centre of Appeal Site

- 2.7.5 The above bus stops and walking routes are also identified in **Plan 9**, which show the walking routes to all local transport nodes.
- 2.7.6 The existing bus stops are accessed via Berry Hill Road and Hill Horn Lane, to the north west of the Appeal site whilst the proposed bus stops will be accessed via the proposed footway on Berry Hill Road and Oxford Road, using the proposed pedestrian crossing points, including a formal one across Oxford Road with a pedestrian refuge island to provide a safer crossing of the carriageway.
- 2.7.7 A summary of the services available from the nearest bus stops from the development site is provided in **Table 2.10** below.

Service No	Route	Monday – Friday Frequency per hour				Sat	Sun
		AM Peak	Midday	PM Peak	Eve		
S4	Oxford City Centre – Banbury Town Centre	1	1	1	1	1 every 1 hour 30 mins	1 every 1 hour 30 mins

Table 2.10 Existing Bus Provision in the Vicinity of the Appeal Site

- 2.7.8 As can be seen from Table 2.9, the nearest bus stops to the site provide services to and from Banbury and Oxford City Centre which are likely to be the main area of employment for potential residents of the development
- 2.7.9 The first northbound bus service from the bus stops on Horn Hill Road between Monday to Saturday departs at 08:07 and arrives in Banbury Town Centre at 08:28, whilst the first bus services travelling southbound depart at 06:11 and 07:24 and arrive in Oxford City Centre at 07:05 and 08:24 hours respectively. The last bus to depart Banbury Town Centre Monday to Saturday is at 18:50 whilst the last bus to depart Oxford City Centre is at 20:20.
- 2.7.10 Based on this, it can be concluded that the local bus service provides an appropriate option for commute trips to and from Banbury and Oxford, which are the main areas of employment for potential residents of the development.
- 2.7.11 This provides a good level of bus provision to allow all residents at the Appeal Site to travel to and from the area by bus, and in particular those visiting the town centre and city centre which could include all types of journey purpose but in particular commuting.

- 2.7.12 The Appeal Site is just a 20 minute bus journey from Banbury Town Centre and a 55 minute bus journey from Oxford City Centre.
- 2.7.13 It is important to note that as part of the appeal proposals the Appellant is proposing to provide two new bus stops with road markings and bus shelter provided along Oxford Road, shown on **Plan 2**. It is also worth noting that these bus stops could also include some cycle parking to encourage the potential for linked sustainable trips using both cycle and bus travel.
- 2.7.14 With the provision of these improvements, this will further improve the existing bus service provision in the vicinity of the site and it can be concluded that the site is highly accessible by bus.

2.8 Access by Rail

- 2.8.1 The nearest train station to the Appeal Site is Banbury train station, although this is located outside of the recommended 2 kilometre walking distance, it is accessible via a 4 minute walk to the nearest bus stops, a 20 minute bus journey from the site to Banbury bus station and a 4 minute walk, equating to a combined journey time from the site of around 28 minutes.
- 2.8.2 Banbury rail provides frequent, regular and direct services to destinations such as Oxford, Birmingham New Street, London Marylebone and Manchester Piccadilly (Via Coventry and Stoke-on-Trent) throughout the week.
- 2.8.3 The station provides 6 services per hour to Oxford (approx. 29 minute journey), Coventry (approx. 29 minute journey), Birmingham New Street (approx. 51 minute journey) and London Marylebone (approx. 59 minute journey).

2.8.4 It is also worth noting that the station provides a car park with 978 spaces and 14 accessible spaces, this provides opportunities to park and ride from the station. Additionally, Banbury train station also offers 63 cycle storage spaces.

2.8.5 It is therefore concluded that the proposed development site is accessible by rail.

2.9 Compliance with Policies included Within Reason for Refusal

2.9.1 The proposals are consistent with NPPF as follows:

- Paragraph 34 states that 'developments that generate significant movement are located where the need to travel will be minimised and the use of sustainable transport modes can be maximised'. The Appeal proposals include a substantial level of sustainable transport improvements to ensure that the use of sustainable transport modes are maximised and the need to travel by car minimised.
- Paragraph 38 states that within large scale developments 'Where practical...key facilities such as primary schools and local shops should be located within walking distance of most properties'. The improvements proposed for the Appeal Site will ensure that the 'key facilities' detailed in Paragraph 38 of the NPPF will be located 'within walking distance of most properties'.

- Paragraph 70 states that planning policies and decisions should, amongst other things, 'ensure an integrated approach to considering the location of housing, economic uses and community facilities and services'. This Statement has demonstrated that this will be the case.
- Paragraph 72 states that '*The Government attaches great importance to ensuring that a sufficient choice of school places is available to meet the needs of existing and new communities. Local planning authorities should take a proactive, positive and collaborative approach to meeting this requirement, and to development that will widen choice in education*'. This Statement has demonstrated that the Appeal Site has been demonstrated to be within the various national guideline walking distances and well within the DfE maximum walking distances for primary schools.

2.9.2 In terms of the local policy referred to in the first reason for refusal this relates to Policies ESD₁, BSC₁, SLE₄ and Villages 2 of the Cherwell Local Plan (2011-2031) Part 1 and Saved Policy H18 of the Cherwell Local Plan 1996.

2.9.3 In relation to new development, the pertinent section of Policy ESD₁ is enclosed below:

'Policy ESD₁: Mitigating and Adapting to Climate Change

Measures will be taken to mitigate the impact of development within the District on climate change. At a strategic level, this will include:

- *Distributing growth to the most sustainable locations as defined in this Local Plan.*
- *Delivering development that seeks to reduce the need to travel and which encourages sustainable travel options including walking, cycling and public transport to reduce dependence on private cars.*

- *Designing developments to reduce carbon emissions and use resources more efficiently, including water (see Policy ESD 3 Sustainable Construction).*
- *Promoting the use of decentralised and renewable or low carbon energy where appropriate (see Policies ESD 4 Decentralised Energy Systems and ESD 5 Renewable Energy).*

2.9.4 The Appeal proposals have been demonstrated within this Statement as being development that reduces the need to travel and which encourages sustainable travel options and they therefore accord with Policy ESD1 in terms of transport and accessibility.

2.9.5 Policy BSC1 refers to the 'District Wide Housing Distribution' and contains no pertinent transport policies therein.

2.9.6 Policy SLE4 is as follows:

'Policy SLE4: Providing Travel Choice

The Council will support the implementation of the proposals in the Movement Strategies and the Local Transport Plan to deliver key connections, to support modal shift and to support more sustainable locations for employment and housing growth.

We will support key transport proposals including:

- *Transport Improvements at Banbury, Bicester and at the Former RAF Upper Heyford in accordance with the County Council's Local Transport Plan and Movement Strategies.*
- *Projects associated with East-West rail including new stations at Bicester Town and Water Eaton.*
- *Rail freight associated development at Graven Hill, Bicester.*
- *Improvements to M40 junctions.*

Consultation on options for new link and relief roads at Bicester and Banbury will be undertaken through the Local Transport Plan (LTP) review process. Routes identified following strategic options appraisal work for LTP4 will be confirmed by the County Council and will be incorporated in Local Plan Part 2.

New development in the District will be required to provide financial and/or in-kind contributions to mitigate the transport impacts of development.

All development where reasonable to do so, should facilitate the use of sustainable modes of transport to make the fullest possible use of public transport, walking and cycling. Encouragement will be given to solutions which support reductions in greenhouse gas emissions and reduce congestion. Development which is not suitable for the roads that serve the development and which have a severe traffic impact will not be supported.

- 2.9.7 The last paragraph of this Policy is the only pertinent part of this particular policy with regards to this Appeal Site. As has been demonstrated earlier in this Statement, the Appellant will provide off site improvements and contributions to additional off site works to mitigate transport impacts of the development.
- 2.9.8 Furthermore, this Statement has demonstrated that the proposals facilitate the use of public transport, walking and cycling which support reductions in greenhouse gas emissions and reduce congestion.
- 2.9.9 Policy Villages 2 of the Cherwell Local Plan is as follows:

Policy Villages 2:

Distributing Growth across the Rural Areas A total of 750 homes will be delivered at Category A villages. This will be in addition to the rural allowance for small site 'windfalls' and planning permissions for 10 or more dwellings as at 31 March 2014.

Sites will be identified through the preparation of the Local Plan Part 2, through the preparation of Neighbourhood Plans where applicable, and through the determination of applications for planning permission.

In identifying and considering sites, particular regard will be given to the following criteria:

- *Whether the land has been previously developed land or is of lesser environmental value.*
- *Whether significant adverse impact on heritage or wildlife assets could be avoided.*
- *Whether development would contribute in enhancing the built environment.*
- *Whether best and most versatile agricultural land could be avoided.*
- *Whether significant adverse landscape and impacts could be avoided.*
- *Whether satisfactory vehicular and pedestrian access/egress could be provided*
- *Whether the site is well located to services and facilities.*
- *Whether necessary infrastructure could be provided.*
- *Whether land considered for allocation is deliverable now or whether there is a reasonable prospect that it could be developed within the plan period.*
- *Whether land the subject of an application for planning permission could be delivered within the next five years.*
- *Whether the development would have an adverse impact on flood risk.*

- 2.9.10 As has been demonstrated with this Statement, the Appeal Site 'is well located to services and facilities' and will provide the 'necessary infrastructure' can be provided through a range of off site highways works and contributions, as agreed with OCC.
- 2.9.11 Saved Policy H18 of the Cherwell Local Plan 1996 is as follows:
- 'Planning permission will only be granted for the construction of new dwellings beyond the built-up limits of settlements other than those identified under policy h1 when (i) it is essential for agriculture or other existing undertakings, or (ii) the proposal meets the criteria set out in policy h6; and (iii) the proposal would not conflict with other policies in this plan.'*
- 2.9.12 Policy H6 does not consist of any transport based elements and as such this policy is irrelevant to the transport and sustainability issues relating to the Appeal proposals.
- 2.9.13 In light of the above, it is clear that the Appeal Site is appropriately accessible and will cater for needs of the development's residents and visitors and assist in promoting a choice of travel modes other than the private car. The proposals, therefore, accord with the relevant parts of Policies ESD₁, BSC₁, SLE₄ and Villages 2 of the Cherwell Local Plan (2011-2031) Part 1 and Saved Policy H18 of the Cherwell Local Plan 1996 and the National Planning Policy Framework.

3 CONCLUSIONS

3.1.1 This Statement has considered the sustainable credentials of the Appeal Site. The following lists the conclusions of this Statement:

- The Appeal Site has good accessibility on foot and by cycle and the proposals will provide a substantial level of additional links and contributions to improve the accessibility of the proposals on foot and by cycle.
- The Appeal Site is within a short walk of a number of local services and day to day amenities such as shops, schools and other 'day to day' facilities.
- The Appeal Site meets with the walking distance criteria set out in the various guidance documents.
- The Appeal Site will also be accessible by public transport and the provision of two new bus stops on Oxford Road will enable residents to access the bus services which operate in the vicinity of the site and serve areas including Banbury Town Centre and Oxford City Centre.
- The Appeal Site provides potential for travel by rail, with the nearest bus services traveling into Banbury Town Centre, just a short walk from Banbury train station.
- The Appeal Site accords with the general principles of the pertinent local and national planning policies specifically referred to in the first reason for refusal.
- The Appeal proposals will also improve the general accessibility of Adderbury as a village with the improvements proposed which can be enjoyed by all residents, current and future.

3.1.2 This Statement has confirmed that the site is in a sustainable location, is reasonably close to local services and facilities and would result in a development where future occupiers would have access to a range of sustainable alternatives to the private car for day to day needs.

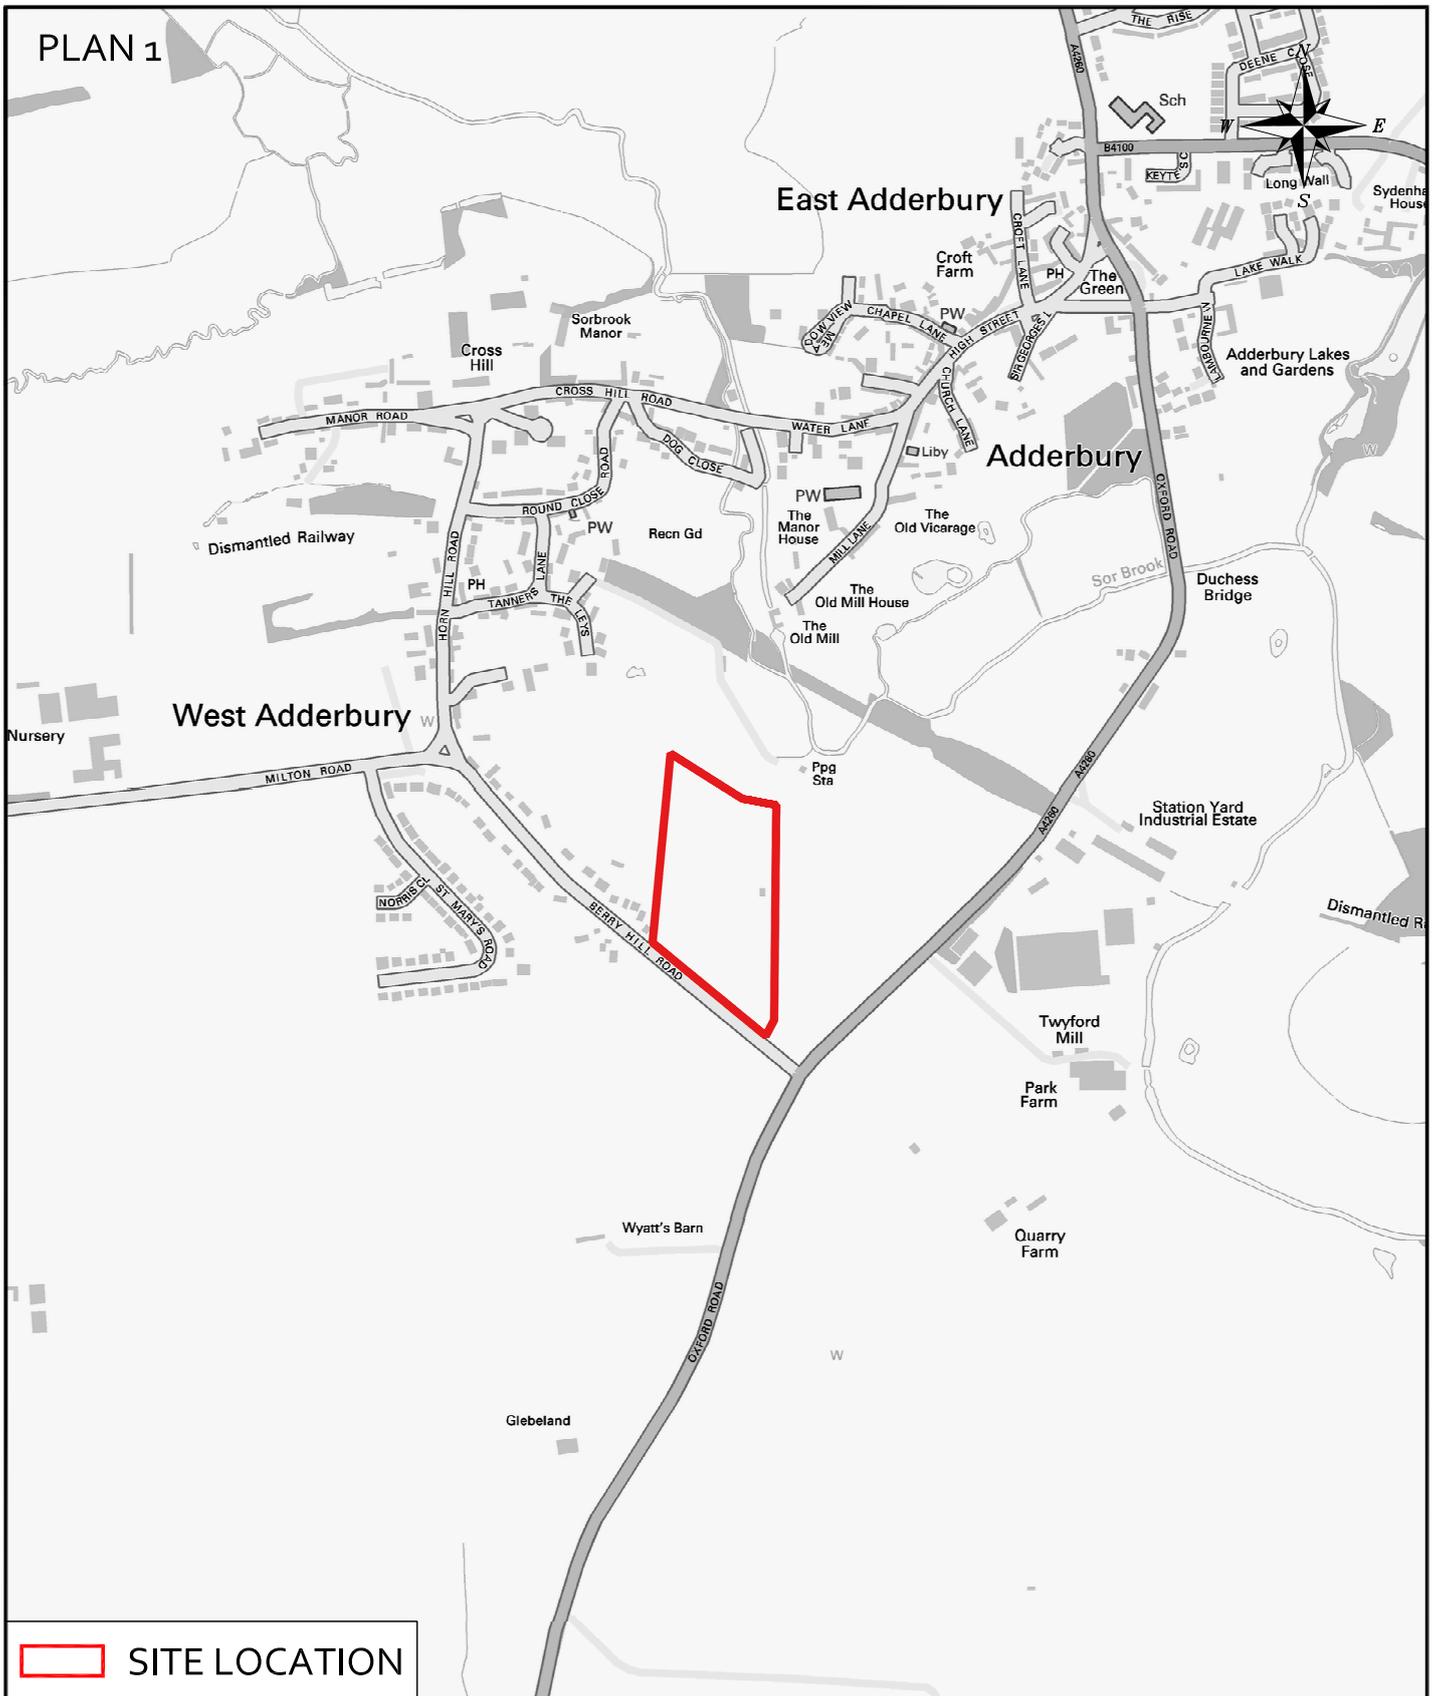

3.1.3 Furthermore, there are two sites located in western Adderbury, north and south of Milton Road. The centre of the site to the south of Milton Road was allowed at appeal. The Inspector addressed locational sustainability briefly in their paragraph 14:

'It is said that it is about 1km from the centre of the village by existing footpaths. The village of Adderbury contains a number of facilities including a shop, a post office, churches, a public house, recreation and sports grounds and primary and secondary schools are in nearby settlements. In this sense it was generally agreed that the village is a sustainable one where new development could be accommodated.'

3.1.4 The centre of the site to the south of Milton Road is around 370 metres from the junction between Milton Road/Horn Hill Road/Berry Hill Road; the centre of the developable area of the Appeal Site is around 460 metres from the junction. From the junction, journeys to services/facilities in the centre of the village would be the same distance. The difference in getting to the junction is only around 90 metres, around a minute's walk, which is not significant, particularly as the Appeal proposals incorporate a new footway along Berry Hill Road. If the sites north and south of Milton Road were deemed locationally sustainable, so too should the appeal site. It is also relevant that the appeal site would be closer to some services/facilities than the Milton Road sites. For example, it would be a shorter walk to the Adderbury Day Nursery and employment at Twyford Mill Estate, east of Oxford Road.

APPENDICES

APPENDIX 1

Detailed Route Descriptions

APPENDIX 1 – WALKING ROUTE DESCRIPTIONS

Walking Routes to Schools/Nurseries

The following tables below detail the walking route to a local primary school and nursery, including;

- Adderbury Day Nursery;
- Christopher Rawlings Church of England Primary School;

In addition to the walking route descriptions, consideration has also been given to the 'attractiveness' of the routes, whether they are considered safe and pleasant. This will assist in determine the usability of the routes and likelihood for encouraging trip on foot between the site and neighbouring facilities and amenities.

These are also shown on **Plan 5. Table 1** shows the walking route to Adderbury Day Nursery.

Walking Route to Adderbury Day Nursery		Footway	Lit	Surface
1	From within the site, walk in a south eastern direction towards Berry Hill Road	2m	Y	Tarmac
2	Turn left onto Berry Hill Road and continue along the proposed footways in an eastbound direction for approximately 100m	1.5m	Y	Tarmac
3	Turn left onto Oxford Road and continue in a north bound direction for around 70m	1.5	Partially	Tarmac
4	Cross Oxford Road using the proposed refuge crossing and continue to walk northbound along Oxford Road	1.5m	Partially	Tarmac
5	Continue walking in a northbound direction, using the footways on the eastern side of Oxford Road for approximately 330m	1.5m	Partially	Tarmac
6	Turn right into the Twyford Mill Estate and continue to walk for around 50 metres	-	Partially	Shared Surface
7	Arrive at Adderbury Day Nursery	-	Y	Tarmac
-	Total Distance – 710m	-	-	-

Table 1 – Walking Route to Adderbury Day Nursery

Route Conditions and Attractiveness

The walking route along Oxford Road is identified in **Photograph 1** below.

Photograph 1 – A section of the walking route along Oxford Road to Adderbury Day Nursery

As shown above, the walking route along Oxford Road is quite pleasant for pedestrians. There is an adequate footway on the eastern side, along with partial street lighting.

Table 2 below shows the walking route to Christopher Rawlings Church of England Primary School.

Walking Route to Christopher Rawlings Church of England Primary School		Footway	Lit	Surface
1	From within the site, walk in a south western direction towards Berry Hill Road using the pedestrian link	2m	Y	Tarmac
2	Turn right onto Berry Hill Road, using the proposed footways, continue walking in a north western direction for approximately 410 metres.	1.5m	Y	Tarmac
3	Cross over Horn Hill Road, and join the footpath provided on the western side	1.5m	Y	Tarmac
4	Continue to walk in a northbound direction for around 370m	1.5m	N	Tarmac
5	From here, follow the alignment of the road using the grass verge (around 40m) and rejoin the footpath on the Northern side of Cross Hill Road.	-	Y	-
6	Walk along Cross Hill Road in an eastbound direction for around 530m onto High Street	1.5m	Y	Tarmac
8	From here, walk in a northern direction on High Street for approximately 360m until you reach the High Street/A4260 Oxford Road Junction	1.5m	Y	Tarmac
9	Continue to walk in a northern direction to for around 80m until you reach the signalised pedestrian crossing point	1.5m	Y	Tarmac
10	From here, cross over Adderbury Court using the pedestrian crossing facilities and then cross again over the A4260 Oxford Road	2m	Y	Tarmac
11	Follow the footway along to the B4100 Aynho Road for around 50m	2m	Y	Tarmac
12	Arrive at School gates	-	-	-
-	Total Distance – 2000m	-	-	-

Table 2 – Walking Route to Christopher Rawlins Church of England Primary School

Route Conditions and Attractiveness

The pedestrian crossing facilities at the Adderbury Court/Oxford Road/B4100 Aynho Road junction is identified in **Photograph 2** below.

Photograph 2 – Pedestrian crossing point on Oxford Road used for the walking route to Christopher Rawlins Primary School

As shown above, the pedestrian crossing point is of good standard, with dropped kerbs and tactile paving, enhancing pedestrian safety.

Table 3 below shows the walking route to Christopher Rawlings Church of England Primary School using the A4260 Oxford Road.

Walking Route to Christopher Rawlings Church of England Primary School (Using Oxford Road)		Footway	Lit	Surface
1	From within the site, walk in a south eastern direction towards Berry Hill Road	2m	Y	Tarmac
2	Turn left onto Berry Hill Road and continue along the proposed footways in an eastbound direction for approximately 100m	1.5m	Y	Tarmac
3	Turn left onto Oxford Road and continue in a north bound direction for around 70m	1.5	Partially	Tarmac
4	Cross Oxford Road using the proposed refuge crossing and continue to walk northbound along Oxford Road	1.5m	Partially	Tarmac
5	Continue walking in a northbound direction, using the footways on the eastern side of Oxford Road for approximately 660m	1.5m	Partially	Tarmac
6	Follow the footpath around the bend and over the footbridge, for around 190m	-	Partially	Tarmac
7	Rejoin the footpath and continue to walk in a northbound direction for approximately 460m	1.5m	Partially	Tarmac
8	At the Oxford Road/Aynho Road junction, use the pedestrian crossing point to cross the road	2m	Y	Tarmac
9	From here, walk in an eastbound direction for around 30m	2m	Y	Tarmac
10	Arrive at School gates	-	-	-
-	Total Distance – 1680m	-	-	-

Table 3 – Walking Route to Christopher Rawlins Church of England Primary School using the A4260 Oxford Road.

Route Conditions and Attractiveness

The walking route along Oxford Road footbridge is identified in **Photograph 3** below.

Photograph 3 – A section of Oxford Road used for the walking route to Christopher Rawlins Primary School (Oxford Road footbridge)

As shown above, the walking route along this section of Oxford Road is of good standard, with a footway and footbridge along the eastern side and street lighting.

Walking Routes to Local Retail Facilities

The following table includes the detailed walking routes from the Appeal Site to the local retail facilities. This is also shown on **Plan 6**.

Table 4 shows the walking route to Adderbury Stores on High Street.

Walking Route to Adderbury Stores (High Street)		Footway	Lit	Surface
1	From within the site, walk in a south western direction towards Berry Hill Road using the pedestrian link	2m	Y	Tarmac
2	Turn right onto Berry Hill Road, using the proposed footways, continue walking in a north western direction for approximately 410 metres.	1.5m	Y	Tarmac
3	Cross over Horn Hill Road, and join the footpath provided on the western side	1.5m	Y	Tarmac
4	Continue to walk in a northbound direction for around 370m	1.5m	N	Tarmac
5	From here, follow the alignment of the road using the grass verge (around 40m) and rejoin the footpath on the Northern side of Cross Hill Road.	-	Y	-
6	Walk along Cross Hill Road in an eastbound direction for around 520m	1.5m	Y	Tarmac
8	From here, walk north on High Street for approximately 50m and cross	1.5m	Y	Tarmac
9	Arrived at Adderbury Stores	1.5	Y	Shared Surface
-	Total Distance – 1520m			

Table 4 – Walking Route to Adderbury Stores

Route Conditions and Attractiveness

The walking route along Horn Hill Road located to the north west of the site is identified in **Photograph 4** below.

Photograph 4 – A section of the walking route along Horn Hill Road to Adderbury Stores

As can be seen above, pedestrians would walk along the western side of Horn Hill Road, which has a good standard footway, it is overlooked by properties on both sides of the road, enhancing the safety of pedestrians.

Walking Routes to Leisure Facilities

Table 5 shows the walking route to the local Recreational Park/Play Area, as shown on Plan 7.

Walking Route to Recreational Park/Play Area	Footway	Lit	Surface
1 From within the site, walk in a south western direction towards Berry Hill Road using the pedestrian link	2m	Y	Tarmac
2 Turn right onto Berry Hill Road, using the proposed footways, continue walking in a north western direction for approximately 340 metres.	1.5m	Y	Tarmac
3 From here, cross Berry Hill Road and walk along the wide grass verge for around 50m	-	Y	-
4 Join the footpath on Milton Road and walk in a western direction for approximately 60m	1m	Y	Shared Surface
5 Cross St Marys Road and continue to walk for 50m.	1m	Y	Shared Surface
6 Arrive at destination	-	-	-
- Total Distance – 630m	-	-	-

Table 5 – Walking Route to Recreational Park/Play Area

Route Conditions and Attractiveness

The walking route to Recreational Park/Play Area involves walking along Berry Hill Road and then continuing along Milton Road, as illustrated in **Photograph 5** below.

Photograph 5 – A section of Milton Road used as the walking route to local Recreational Park/Play Area

As can be seen above, the walking route along Milton Road is quite pleasant, it is lit, lightly trafficked and is overlooked on both sides.

Table 6 shows the walking route to Lucy Plackett playing Fields.

Walking Route to Lucy Plackett playing fields		Footway	Lit	Surface
1	From within the site, walk in a south western direction towards Berry Hill Road using the pedestrian link	2m	Y	Tarmac
2	Turn right onto Berry Hill Road, using the proposed footways, continue walking in a north western direction for approximately 410 metres.	1.5m	Y	Tarmac
3	Cross over Horn Hill Road, and join the footpath provided on the western side	1.5m	Y	Tarmac
4	Continue to walk in a northbound direction for around 270m	1.5m	N	Tarmac
5	From here, turn right and continue to walk down Round Close Road for approximately 180m	-	Y	Tarmac
6	Arrive at destination	-	-	-
-	Total Distance – 990m	-	-	-

Table 6 – Walking Route to Lucy Plackett Playing Fields

Route Conditions and Attractiveness

The walking route to Lucy Plackett playing fields involves walking along Horn Hill Road and turning right on to Round Close Road, as illustrated in **Photograph 6** below.

Photograph 6 – A section of Round Close Road used as a walking route to Lucy Plackett Playing Fields

As can be seen from the above, although there's no footways along Round Close Road, this is lightly trafficked with good visibility, enhancing safety for pedestrians.

Walking Routes to Employment Opportunities

This section will consider the walking routes to the Twyford Mill Estate as this is the main employment area close to the Appeal Site. This route is also shown on **Plan 8**.

Table 7 shows the walking route to Twyford Mill Estate.

Walking Route to Twyford Mill Estate		Footway	Lit	Surface
1	From within the site, walk in a south eastern direction towards Berry Hill Road	2m	Y	Tarmac
2	Turn left onto Berry Hill Road and continue along the proposed footways in an eastbound direction for approximately 100m	1.5m	Y	Tarmac
3	Turn left onto Oxford Road and continue in a north bound direction for around 70m	1.5	Partially	Tarmac
4	Cross Oxford Road using the proposed refuge crossing and continue to walk northbound along Oxford Road	1.5m	Partially	Tarmac
5	Continue walking in a northbound direction, using the footways on the eastern side of Oxford Road for approximately 330m	1.5m	Partially	Tarmac
6	Turn right into the Twyford Mill Estate, 20m.	-	Partially	Shared Surface
7	Arrive at Twyford Mill Estate.	-	Y	Tarmac
-	Total Distance – 680m	-	-	-

Table 7 – Walking Route to Twyford Mill Estate.

Route Conditions and Attractiveness

The walking route to the Twyford Mill Estate includes a walk along Oxford Road.

Photograph 7 – A section of the walking route along Oxford Road to Twyford Mill Estate

As shown above, the walking route along Oxford Road is quite pleasant for pedestrians. There is an adequate footway on the eastern side, as well as partial street lighting.

Walking Routes to Transport Nodes

The local transport nodes are located at the nearby bus stops on Horn Hill Road and Oxford Road (Proposed bus stops). These are described in the following tables and also shown on **Plan 9**.

Table 8 shows the walking route to the bus stops serving the number S4.

Walking Route to Bus Service S4		Footway	Lit	Surface
1	From within the site, walk in a south western direction towards Berry Hill Road using the pedestrian link	2m	Y	Tarmac
2	Turn right onto Berry Hill Road, using the proposed footways, continue walking in a north western direction for approximately 350 metres.	1.5m	Y	Tarmac
3	Arrive at destination	-	-	-
-	Total Distance – 480m	-	-	-

Walking Route to Bus Service S4		Footway	Lit	Surface
1	From within the site, walk in a south eastern direction towards Berry Hill Road	2m	Y	Tarmac
2	Turn left onto Berry Hill Road and continue along the proposed footways in an eastbound direction for approximately 70m	1.5m	Y	Tarmac
3	Cross Berry Hill Road via the proposed pedestrian crossing point	-	Y	Tarmac
4	Follow the new footway in a southbound direction for approximately 80m	1.5m	Y	Tarmac

5	Arrive at destination	-	-	-
-	Total Distance – 350m	-	-	-

Table 8 – Walking Route to Bus Service S4 Stops

Summary

All of the above amenities are within the 2 kilometre catchment, thus demonstrating that the site is within walking distance of a large number of key every day facilities.

It is therefore considered that the existing and proposed pedestrian infrastructure will facilitate safe and direct pedestrian linkages between the site and local destinations.

Appendix 39

Appeal Decision – South of Milton Road, Adderbury

Appeal Decision

Inquiry held on 20 and 21 November 2013

Site visit made on 27 November 2013

by Tim Wood BA(Hons) BTP MRTPI

an Inspector appointed by the Secretary of State for Communities and Local Government

Decision date: 23 January 2014

Appeal Ref: APP/C3105/A/13/2200827

OS Parcel 4100, Adjoining South of Milton Road, Adderbury, Banbury OX17 3HD

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant outline planning permission.
 - The appeal is made by Berkeley Homes (Oxford and Chiltern) Ltd against the decision of Cherwell District Council.
 - The application Ref 13/00456/OUT, dated 25 March 2013, was refused by notice dated 18 June 2013.
 - The development proposed is the erection of 65 dwellings with associated access, open space and structural landscaping.
-

Decision

1. The appeal is allowed and planning permission is granted for the erection of 65 dwellings with associated access, open space and structural landscaping at OS Parcel 4100, Adjoining South of Milton Road, Adderbury, Banbury OX17 3HD in accordance with the terms of the application, Ref 13/00456/OUT, dated 25 March 2013, subject to the conditions set out in Schedule 1 of this decision.

Preliminary Matters

2. The appeal relates to an application for outline planning permission with access and layout to be determined at this stage.
3. The Inquiry was not formally closed on the final sitting day but was kept open in order to receive written comments from the main parties in relation to the then outstanding *Hunston* case. However, as part of its final comments the Council submitted their most recent Annual Monitoring Report (AMR) which was approved by the Council on 6 January 2014. The Council now adopt the Sedgefield approach to dealing with a backlog in housing supply and state that they can only demonstrate 4.7 years of housing land supply. As a result, and notwithstanding the evidence previously submitted to the Inquiry, the Council conclude that they cannot demonstrate a 5 year supply of housing land and so the requirements of paragraph 14 of the National planning Policy Framework (the Framework) apply, ie that planning permission should be granted unless the adverse effects of doing so would significantly and demonstrably outweigh the benefits when assessed against the policies of the Framework as a whole. The Council conclude that, in the circumstances, any comments on the *Hunston* case are irrelevant.

Main Issues

4. As a result of the above and the Council's acceptance that it is now common ground that they cannot show a 5 years supply of housing land, the main issues in this appeal are;
 - Whether the proposal is appropriate and sustainable, having regard to policies for residential development, the countryside and landscape
 - Whether the proposal would be premature having regard to the emerging Local Plan and the Adderbury Neighbourhood Plan.

Reasons

Whether the proposal is appropriate and sustainable, having regard to policies for residential development, the countryside and landscape

5. The appeal site is a broadly rectangular parcel of land sitting adjacent to the edge of the village, outside its current bounds. It is said that it is about 1km from the centre of the village by existing footpaths. The village of Adderbury contains a number of facilities including a shop, a post office, churches, a public house, recreation and sports grounds and primary and secondary schools are in nearby settlements. In this sense it was generally agreed that the village is a sustainable one where new development could be accommodated.
6. The Adopted Cherwell Local Plan (LP) was adopted in 1996 and had an end date of 2001. Policy H6 permits small scale low cost housing adjacent to settlements to meet identified local need; Policy H12 states that new housing in the rural areas will be permitted within existing settlements. Policy H13 identifies Adderbury as a category 1 settlement where residential development within the village will be restricted to infilling, minor development of small groups and conversions of non-residential buildings. Policy H18 restricts new housing within the open countryside to those essential for agriculture or other undertakings. Policy C8 resists sporadic development in the open countryside in order to maintain its rural character. I agree that the proposal would give rise to conflict with a number of these policies in the LP. However, as the Secretary of State concluded at a recent appeal at Bourne Lane, Hook Norton (Ref APP/C3105/A/12/2184094), these policies do not provide for an up-to-date provision of housing land and so full weight can no longer be given to these policies.
7. The Cherwell Proposed Submission Local Plan 2013 (PSLP) contains Policy Villages 1, which identifies Adderbury as a Category A settlement where minor development, infilling and conversions will be allowed. Policy Villages 2 relates to the distribution of new housing over the rural areas and states that a number of dwellings will be directed to Adderbury and 5 other settlements in the period 2011 to 2031. The PSLP has yet to be submitted to the Secretary of State and will then be the subject of examination. I note that there are objections to it, including ones to the figure given in Policy Villages 2. Taking account of the early stage in its preparation and the fact that there are outstanding objections, I attach only limited weight to the PSLP. Notwithstanding this, it is notable that within it the Council acknowledges that 55% of new homes will need to be on green-field sites, and the inclusion of Adderbury as a Category 1 village acknowledges a level of sustainability.

8. The proposal would sit adjacent to the existing housing on St Mary's Road. This existing edge of the village presents a rather harsh edge which does not blend with the adjacent countryside. The proposal would be set back from Milton Road behind the open play area, and to the west would be set behind amenity and open areas; beyond that the opportunity exists to add to the visual screening along the land boundaries. I acknowledge that there may often be some amount of harm arising from the development of land that is currently open; however, in this case, taking account of the above factors, I see this as only limited harm which is outweighed by the beneficial effects of providing a softer edge to the village which provides for a more satisfactory transition to open countryside.
9. In respect of this main issue, I consider that the proposal represents sustainable development as envisaged by the Framework. In the context of an out of date LP and the PSLP, to which I attach limited weight, the proposal accords with the provisions of the Framework.

Whether the proposal would be premature having regard to the emerging Local Plan and the Adderbury Neighbourhood Plan

10. The Council state that the approval of this proposal would be premature to the adoption of the PSLP as it would make a decision of the location and amount of development in Adderbury outside the development plan system. It also states that the proposal would prejudice the emerging Adderbury Neighbourhood Plan.
11. The Government document *The Planning System: General Principles* sets out the approach to questions of prematurity, stating that it may be justifiable to refuse planning permission where a DPD is being prepared if a proposal is so substantial or the cumulative effect would be so significant that granting planning permission would pre-determine decisions about the scale, location or phasing of new development. In this context, although the proposal is not one which I would consider to be substantial, the approval of this appeal scheme would have some effect on future decisions about the location and scale of future housing development in Adderbury. However, the adoption of the PSLP is some way off and it may well be the subject of change through the examination process. Furthermore, the small effect that I envisage is far outweighed by the assistance that the proposed development would bring to the aim of providing a suitable supply of new homes in the near future.
12. The Adderbury Neighbourhood Plan is at a very early stage in its preparation. It was stated that a sustainability appraisal/strategic environmental assessment has not yet been prepared; there has been no pre-submission consultation. Even after these processes it would need to be submitted to the district council, publicised and submitted for examination. The examiner would have to consider if it is in conformity with the strategic policies in the development plan; there is no up to date plan for the area. In these circumstances I consider that dismissal of the appeal on the grounds of prematurity in relation to either the PSLP or the Adderbury Neighbourhood Plan is not justified.

The Planning Agreement

13. A completed Agreement has been provided which overcomes the Council's concerns as set out in the relevant reason for refusal. However,

notwithstanding that they have entered into the Agreement, the appellants contest a number of the matters included in it and I shall concentrate on the contested elements below.

Admin/Monitoring

14. Costs would be involved to the Council and County Council in administration and monitoring of this agreement. However, I consider this to be one of their functions and do not consider it is necessary to make the proposed development acceptable in planning terms and I shall not take this into account.

Community Projects

15. The proposed amount is said to be for activities including a newsletter, meet and greet events and provision of general information. The appellant notes that the Council already publish a quarterly newsletter and a number of events already take place in the village. It is far from clear what the contribution would be used for and how the amount has been arrived at. Therefore, it is not related in scale and nature to the proposed development and I shall not take it into account.

Commuted Sums for Maintenance

16. Contributions are included which cover the costs of future maintenance and management of open spaces and play areas. This includes 10% of the maintenance costs as a management element. The information before me does not indicate that such an amount will necessarily be incurred by the Council. Whilst I accept that the maintenance element is justified, the management element is not taken into account in my decision.

Refuse Bin Contribution

17. I judge that it is not necessary in planning terms, for the developer to purchase refuse bins, rather than either the Council or the householder. The acceptability of the proposal does not rest on this matter; therefore, I shall not take it into account in my decision.

Adult Learning

18. The contribution is sought by the County Council to go towards improved facilities as part of a wider town centre redevelopment, as the County Council considers that the existing facilities at Grimsbury are relatively inaccessible. There is no evidence before me that indicates that the existing facilities are at capacity or would be as a result of the proposal and there is no detail of the problems of accessibility or of any proposed new scheme. In this context there can be no clear link between the proposal and the contribution. As a consequence, I shall not take it into account.

Secondary School/Sixth Form education

19. The appeal site is within the catchment area for the Warriner Secondary School. Figures supplied by the County Council state that 38.4% of pupils at the school live outside the catchment; they also confirm that Warriner School is at or very close to capacity and that there are spare places at Banbury secondary schools. It is suggested that the proposed development would be likely to give rise to 15 secondary school age people and 2 sixth form aged

people. I consider that the fact that such a large percentage of pupils at the local school are from outside the catchment is significant. In this context, I consider that it would be unreasonable to require the developers of this scheme to contribute towards secondary education. I do not consider that the likely gradual effects of the proposed development on pupil numbers would be likely to lead to an unacceptable displacement of pupils from the local school. Therefore, I shall not take account of this contribution.

Library Contribution

20. The library which serves the area is that at Banbury. The County Council states that the library is currently significantly under-sized in relation to the population that it serves, when compared to their standard of floor-space per person. The contribution sought seeks an amount per projected head of new population likely to be generated by the development. I consider that this fairly reflects the cost of providing for the additional population which cannot be satisfactorily accommodated within the existing library. Therefore, this contribution satisfies the requirements of Regulation 122 of the CIL Regs and I shall take it into account in my decision.

Elderly Day-Care

21. It appears that the contribution would be, at least partly, for a provision that has already been made at Stanbridge Hall. Therefore, the level of the contribution is unclear and the need questionable. As a consequence, I shall not take account of this in my decision.

Waste Recycling

22. The County Council state that the contribution is to be applied to the existing Alkerton site which, it states, has limited capacity and its planning permission is due to expire in 2014. However, the cost relates to the provision of a new site. I consider that, in the absence of a clear cost for a specific project, the scale of the proposed contribution cannot be said to be clearly related to the proposed development. Therefore, this does not meet the relevant tests and I shall not take it into account. The amount was subsequently reduced by the County Council to about one third of the previous request, however there is no indication of how this is arrived at and so I cannot take it into account.

The other provisions

23. On the basis of the evidence before me I am satisfied that the other provisions contained in the Agreement satisfy the tests in Regulation 122 of the CIL Regs and I shall take them into account in arriving at a decision.

Conditions

24. I have considered the conditions suggested by the parties having regard to the advice in Circular 11/95 '*The Use of Conditions in Planning Permissions*'. I shall include the standard conditions in relation to the submission of reserved matters and the commencement of development but agree that shortened time-scales are appropriate in this case in order to promote speedy delivery. In order that access and parking is provided in a safe and timely manner it is necessary to include conditions relating to traffic calming measures, visibility splays, the timing of the provision of the access and the provision of a suitable amount of car parking.

25. So that the appeal site is adequately drained I shall include conditions relating to the provision of agreed means to dispose of surface and foul drainage. For the sake of biodiversity it is necessary to prevent any removal of hedges, trees or shrubs within the nesting season of birds and also to agree the implementation of a plan for enhancing biodiversity.
26. In order to comply with the provisions of Policy C28 of the Local Plan a condition requiring public art is acceptable. In order to give an acceptable appearance to the development when seen from Milton Road I agree that a restriction on means of enclosure of those properties facing Milton Road is necessary; I do not consider it necessary to widen the extent of this restriction. In order to ensure a sustainable form of construction and development I shall include a condition requiring achievement of Level 4 of the Code For Sustainable Homes.
27. So that any garages and car ports are retained for use as described a condition preventing their use or conversion to living space is included. A construction and traffic management plan is necessary to make sure that the construction does not have an unacceptable impact on the locality. A right-of-way crosses part of the site and I agree that a condition preventing this from being blocked or otherwise affected during construction works is necessary. For the sake of proper planning and for the avoidance of doubt, a condition requiring construction in accordance with the submitted plans is included.
28. Conditions relating to landscaping, including a Landscape and Ecology Management Plan, the use of native species and the design of the open space areas, are more appropriately matters for inclusion in a reserved matters approval (if found necessary) and not at this stage.

Conclusion

29. In the absence of a demonstrable 5 years housing land supply, significant weight is attached to the contribution that the proposal would make in this respect. The appeal site is in a relatively sustainable location where residents would have access to shops, services and employment opportunities. I have found that dismissal of the appeal on prematurity grounds in relation to the PSLP or the Adderbury Neighbourhood Plan is not justified. I find that the benefits of the scheme are not outweighed by any other matters; as a consequence, the appeal is allowed.

- 8 Further submissions of the Council
- 9 Revised further submissions on behalf of the appellant

SCHEDULE 1, Conditions (19 in number)

- 1) Details of the appearance, landscaping and scale, (hereinafter called "the reserved matters") shall be submitted to and approved in writing by the local planning authority before any development begins and the development shall be carried out as approved.
- 2) Application for approval of the reserved matters shall be made to the local planning authority not later than one year from the date of this permission.
- 3) The development hereby permitted shall begin not later than one year from the date of approval of the last of the reserved matters to be approved.
- 4) Except where otherwise stipulated by conditions attached to this permission or submissions required thereto, the development hereby permitted shall be carried out in accordance with the following approved plans: 2587.106 Rev D; 2587.102; MRA 2.
- 5) No other part of the development shall take place until the proposed means of access, including vision splays onto Milton Road and any ancillary works have been formed, laid out and constructed in accordance with specifications which have firstly been submitted to and approved in writing by the local planning authority.
- 6) The agreed vision splays shall not be obstructed by any object, structure or planting of a height greater than 0.6 metres.
- 7) Prior to work starting on the site a traffic calming scheme shall be submitted to the Local Planning Authority for written approval.
- 8) Prior to the first occupation of any part of the development, the approved traffic calming scheme shall be constructed in accordance with the agreed details and thereafter retained.
- 9) Before any of the dwellings are first occupied, the proposed vehicular accesses, driveways, turning areas and footpaths that serve those dwellings shall be constructed, laid out, surfaced, drained and lit, in accordance with the specification details to be submitted to and approved in writing by the local planning authority prior to the commencement of the development.
- 10) Prior to the commencement of development details of the proposed car parking provision including surfacing and drainage shall be submitted to and approved in writing by the local planning authority. The development shall be carried out in accordance with the approved details and shall be retained in that form and the car parking spaces shall be used for no other purpose.
- 11) No development shall take place, including any works of demolition, until a Construction Method and Traffic Statement has been submitted to, and approved in writing by, the local planning authority. The approved Statement shall be adhered to throughout the construction period. The Statement shall provide for:
 - i) phasing of the development
 - ii) an agreed route for construction and delivery vehicles to the site

- iii) the parking of vehicles of site operatives and visitors
 - iv) loading and unloading of plant and materials
 - v) storage of plant and materials used in constructing the development
 - vi) wheel washing facilities
 - vii) measures to control the emission of dust and dirt during construction
 - viii) a scheme for recycling/disposing of waste resulting from demolition and construction works.
- 12) The garage/car ports shall be retained as such and shall not be adapted for living accommodation unless otherwise agreed in writing by the local planning authority.
- 13) No materials, plant, temporary structures or excavations shall be placed/undertaken on or immediately adjacent to the Public Right of Way that may obstruct or prejudice its use by the public, while the development takes place.
- 14) No development shall take place until detailed schemes, including a timetable for their implementation, for surface water and foul drainage of the development has been submitted to and approved in writing by the local planning authority. The development shall be undertaken in accordance with the approved details and thereafter retained in the agreed form. The surface water drainage scheme shall be based on the agreed Flood Risk Assessment entitled *Land South of Milton Road, Adderbury, site Specific Flood Risk Assessment, X-213089/TB/SK/BEM/March 2013, Revision C*.
- 15) No removal of hedgerows, trees or shrubs shall take place between 1 March and 31 August inclusive, unless the Local Planning Authority has confirmed in writing that such works can proceed, based on the submission of a recent survey (no older than one month) that has been undertaken by an ecologist to assess the nesting bird activity on site, together with details of measures to protect the nesting bird interest on site.
- 16) Prior to the commencement of development, including works of ground preparation, a plan for enhancing biodiversity on the site shall be submitted to and approved in writing by the Local Planning Authority. Thereafter, the agreed enhancement measures shall be carried out in accordance with an agreed timetable, and retained in the agreed form.
- 17) No development shall take place until details of the public art scheme, including siting, have been submitted to and approved in writing by the Local Planning Authority. The development shall be carried out in accordance with the approved details and retained in that form.
- 18) Notwithstanding the provisions of the Town and Country Planning (General Permitted Development) Order 1995 (or any order revoking, re-enacting or modifying that Order), no fences, gates or walls shall be erected within the curtilage of any dwellinghouse forward of any wall of that dwellinghouse. This shall only relate to those dwellings which face directly towards Milton Road.
- 19) The dwellings shall achieve Level 4 of the Code for Sustainable Homes. No dwelling shall be occupied until a final Code Certificate has been issued for it certifying that Code Level 4 has been achieved.

Committee Report 18/00220/F

Applicant:	Adderbury Parish Council		
Proposal:	Change of use of agricultural land to sport/recreation and community use		
Ward:	Adderbury, Bloxham And Bodicote		
Councillors:	Cllr Mike Bishop Cllr Chris Heath Cllr Andrew Mchugh		
Reason for Referral:	Major Application – site area over 1ha		
Expiry Date:	22 June 2018	Committee Date:	23 August 2018
Recommendation:	Approval		

EXECUTIVE SUMMARY OF PROPOSALS AND RECOMMENDATION

The application is reported to the Planning Committee, as it is a major application.

Proposal

Planning permission is sought to change the use of the agricultural land to sport/recreation and community use. The land is to the North of Milton Road, Adderbury. The proposals include the access to the site from the Milton Road, the provision of parking and landscaping and the general layout of the site.

Consultations

The following consultees have raised no objections to the application (subject to the imposition of conditions to address some outstanding concerns):

- Adderbury Parish Council
- CDC – Recreation and Leisure, Landscape, Environmental Protection, Planning Policy, Ecology, Conservation
- OCC – Transport, Drainage, Archaeology, Minerals and Waste
- Sport England
- Oxfordshire Playing Fields Association

28 letters have been received, 17 in support, 7 in objection and 4 raising comments

Planning Policy

The application site is located outside the Adderbury Settlement Boundary but it is allocated for the proposed use. The site has some naturally occurring contamination, is within a minerals consultation area and there are records of notable and protected species within vicinity of the site. The site is close to the edge of the Adderbury Conservation Area and it has potential for archaeology on site. The land slopes from south west to north east.

The application has also been assessed against the relevant policies in the NPPF, the adopted Local Plan and other relevant guidance.

Conclusion

The key issues arising from the application details are:

- Principle of development
- Landscape impact and site layout
- Neighbouring amenity
- Transport
- Drainage and Flood Risk
- Ecology
- Heritage

The report looks into the key planning issues in detail, and officers conclude that the proposal is acceptable against the relevant policies for the following reasons:

1. The site is allocated for sports and community uses by Policy AD18 of the Adderbury Neighbourhood Plan subject to a number of criteria
2. The proposal can be accommodated without causing undue harm to the landscape and the development proposed can be accommodated on the site with any refinements secured by condition
3. The proposal can be accommodated without causing serious harm to the amenity of residential properties nearby.
4. The site is within a sustainable location in transport terms. It can be appropriately accessed and there is sufficient space to provide onsite transport infrastructure including parking and connections can be provided to the rest of the village to encourage the use of sustainable modes of transport to access the site.
5. The development would be at low risk from flooding and there are opportunities for surface water management that would ensure that surface water is appropriately dealt with.
6. It is possible to secure a net biodiversity gain providing a calculation accompanies future detailed landscape proposals.
7. There would be no unacceptable impacts upon the setting of the Adderbury Conservation area and impacts upon potential archaeological interest can be further assessed via the provision of information to satisfy planning conditions.

RECOMMENDATION - GRANT PERMISSION SUBJECT TO CONDITIONS

Members are advised that the above is a summary of the proposals and key issues contained in the main report below which provides full details of all consultation responses, planning policies, the Officer's assessment and recommendations, and Members are advised that this summary should be read in conjunction with the detailed report.

Main Report

1. APPLICATION SITE AND LOCALITY

- 1.1. The application site sits to the west of Adderbury and to the north of the Milton Road. The land is currently agricultural surrounded by field hedgerows and is accessed by a field gate to the western side of the southern boundary. To the east of the site is a residential site, currently under construction by Nicholas King Homes, to the west is Ball Colegrave, a horticultural business, to the north is open countryside and to the south is open countryside and a new residential development.
- 1.2. The land gently slopes down from south to north with a maximum drop of approximately 5m across the site. Third party representations have identified that the site is used informally by local residents. In terms of recorded site constraints,

the land is close to the Adderbury Conservation Area boundary, there is potential for archaeology, there are some records of biodiversity in the local area and naturally occurring contaminants are also recorded. The land is also identified within the Adderbury Neighbourhood Plan.

2. DESCRIPTION OF PROPOSED DEVELOPMENT

- 2.1. The application seeks full planning permission to change the use of the current agricultural land for sport/ recreation and community use. Following the receipt and validation of the application, additional information has been submitted on two occasions including a site location plan, a Transport Statement, a Travel Plan Statement and a Flood Risk Assessment. As an application for full planning permission, proposals for the site in terms of how it is to be used are required to be considered and in this regard, a plan has been provided to demonstrate a proposed site layout. This demonstrates the site can provide space for sports pitches (two adult football pitches, one of which could be used as two smaller pitches), a MUGA, landscaping and parking (for up to 141 car spaces). Space is also demonstrated for a building (potential for a new village hall/ pavilion type accommodation) that is not part of the current application but the future intention is likely to include a building on the land and so it is important to understand whether sufficient room is available for this for the future.

3. RELEVANT PLANNING HISTORY

- 3.1. The following planning history is considered relevant to the current proposal:

<u>Application Ref.</u>	<u>Proposal</u>	<u>Decision</u>
10/00508/F	Change of use from agricultural use to recreational use.	Application Permitted
18/00015/SO	Screening Opinion to 18/00220/F - Change of use of agricultural land to sport/recreation and community use	Screening Opinion not requesting EIA

4. PRE-APPLICATION DISCUSSIONS

- 4.1. Some informal discussions were undertaken with the Parish Council prior to the submission of the application which was generally supportive of the principle of the development.

5. RESPONSE TO PUBLICITY

- 5.1. This application has been publicised by way of a site notice displayed near the site, by advertisement in the local newspaper, and by letters sent to all properties immediately adjoining the application site that the Council has been able to identify from its records. The final date for comments was 06.08.2018, although comments received after this date and before finalising this report have also been taken into account.
- 5.2. 28 third party comments have been received all from the village to three consultations that have been undertaken (some of which are therefore from the same individuals). 17 comments are in support, 4 raise comments and 7 object (including two letters from four Parish Council Members). The comments raised by third parties are summarised as follows:

- The land was secured for the benefit of the whole village. To maximise its potential as a location for amenities for the village, the proposal is supported.
- Adderbury needs these facilities – the village is expanding but the current amenities are poor. Adderbury Park football club will be able to accommodate a fuller range of teams and training facilities.
- The current facilities cause dangerous parking situations on narrow residential roads. There is no meeting place for large groups and this proposal is long overdue and will provide much needed facilities.
- The proposed site will have good access for vehicles and for pedestrians and cyclists.
- The recent referendum in the village was supported by the majority.
- The proposal should just be for change of use at this stage because the village is being consulted on what facilities they wish to see on the land and the eventual layout and details are to be agreed.
- The lack of detail and transparency makes it hard to assess the implications of the proposal. It appears to cater solely for sport and therefore takes no account of those who wish to have a recreation area but who would not use football pitches. Its potential would therefore not be maximised for all in the community.
- It appears that the land would be used by a third party denying the wider public its use.
- The application is not supported sufficiently by detail as to how the scheme will be delivered and funded.
- The site could have potential for archaeology and this has not been adequately assessed. There were records found on land adjoining the site.
- An impact assessment of land drainage proposals on surrounding properties at risk of being flooded should be required. Field drains are referred to but there is no detail.
- Any levelling of the site is also important to be considered and the Parish Council have received assessments suggesting that a comprehensive earthworks operation would be required.
- Concern regarding the detail and amount of parking.
- Concern regarding noise impacts to the nearby residential dwellings on match days. There are now close by residential properties and noise and nuisance will be an issue for local residents. There are a number of properties that are not yet occupied and they may have concerns. The travel statement suggests the land could be used in the evenings until 11pm – this could have a significant impact.
- There are already sports facilities at the Lucy Placket fields and these are centrally located so accessible by all. The site should not be restricted to pitches alone
- Other uses for the site could include a small country park or a burial ground.

- Some concerns with how the proposals are being approached by the Parish Council. It would appear the application has been applied for without addressing all of the issues. Is sufficient parking provided?
- Floodlighting could damage the rural nature of the conservation area and could encourage use of the site until late in the evening disturbing residents.
- No traffic survey data has been provided. The Milton Road is busy and there should be provision for traffic calming and a pedestrian crossing.
- The travel statement now provided has increased concerns about the safety of road users and pedestrians.
- Residents currently use the land and it is of concern that public access will not be allowed for two years after the grass is seeded. Access should continue to be provided.
- The hall is not part of the application and this was seen as desirable. The hall would need to include changing facilities.
- Concern that there is no proven demand for the facilities.
- The construction of the development will cause noise, traffic inconvenience and pollution.
- The Working for Adderbury Community group has progressed work and a vision has been established and provided.
- There should be consideration as to limiting or maintaining the height of any new trees planted, in particular those close to the new neighbouring properties in Henge Close to prevent loss of light and views.
- What is the plan for boundary fencing to neighbouring properties?
- Concern regarding light pollution and the impact this could have on plants growing in the nurseries at Ball Colegrave. Concerns also regarding the impact of straying balls onto their site. The plan submitted is concerning with the proximity of the development and impacts upon security, stray balls and light pollution.
- Ball Colegrave also wish to retain use of the access track and field gate alongside their boundary which is used on a one off annual basis. Ball Colegrave has requested to APC that a secure fence is provided, along with additional planting to screen the fence.

5.3. The comments received can be viewed in full on the Council's website, via the online Planning Register.

6. RESPONSE TO CONSULTATION

6.1. Below is a summary of the consultation responses received at the time of writing this report. Responses are available to view in full on the Council's website, via the online Planning Register.

6.2. ADDERBURY PARISH COUNCIL: **supports** the application. This follows a number of consultations and conforms to policy AD18 of the Adderbury Neighbourhood Plan

as well as providing new leisure facilities for the village. In their second and third responses Adderbury Parish Council continues to express their support.

- 6.3. CDC RECREATION AND LEISURE: the team fully **support** the application.
- 6.4. CDC LANDSCAPE TEAM: **No Objection** to the change of use of the land on landscape and visual impact grounds. However, concerns are raised with regard to the layout and the lack of a clear development process. Care needs to be taken to retain existing boundary vegetation, consideration of links to the adjacent housing development, to design the car parking with planting and the position of the building to relate to the sports uses proposed. Resolution of the site layout is important before undertaking any work so that piecemeal development is avoided. In respect of the plan submitted, the advice is that it is poor and lacking in detail and that the parking arrangement can only be indicative. No information about retention of existing vegetation – can the roadside hedge be retained and provide sufficient visibility? No surfaces are shown. There are concerns about proximity of overflow parking adjacent to the hedge due to compaction of roots. There is not much space for a swale. No lighting is indicated and there may need to be some.
- 6.5. CDC ENVIRONMENTAL PROTECTION: **No comments or objections.**
- 6.6. CDC PLANNING POLICY: **No objection** to the use of the land for playing fields, however there is insufficient information to determine whether the full range of proposed uses could be appropriately provided.
- 6.7. CDC ECOLOGY: **No objections** to the change of use on ecological grounds. If the change in the existing access position is part of the application, then any works to the vegetated boundary to the South should take place outside of the bird nesting season and remove as little vegetation as possible. There is also the potential for badgers to use vegetated areas. No further comments were made in respect of the amended documents.
- 6.8. CDC CONSERVATION: The application site lies a short distance to the west of the conservation area. The impact on setting is likely to be minimal providing parking and any buildings are located along the Milton Road. No need for further input at this stage based on the proposed layout plan submitted.
- 6.9. OCC TRANSPORT: Initially provided an **objection** due to the lack of details of the layout and facilities of the site including access and parking. It was confirmed that there was **no objection** to the principle of the change of use but detail is needed to ensure that communal functions can only take place with appropriate access, car parking and footways being available. A full application needs to also include an FRA, a Transport Statement and a Travel Plan Statement. In a second response OCC Transport made the same comments. In a third response OCC have withdrawn their objection advising that the transport statement is comprehensive and is based on detailed assumptions which are robust. 141 parking spaces are shown as being able to be accommodated along with a 2m wide footway link to the footways into the village and an informal crossing point on Milton Road is required to improve connectivity from the site to the south.
- 6.10. In terms of DRAINAGE: OCC advised that the drainage arrangements include SUDs proposals. The drainage design details are at an outline stage of detail with no detailed design proposals submitted. A condition regarding surface water is required. Only a single test pit has been provided, OCC would expect additional test pits to confirm the potential and to inform detailed design. No indication has been provided as to the seasonal high ground water level at the site. It would appear that no design has been undertaken for the car parking areas and the design should

ensure that sufficient subbase for storage of run off is provided so no flooding occurs. A SUDs management and maintenance plan must also be provided. There should also be a qualitative examination of what would happen if any part of the drainage/ SUDs system fails, to demonstrate that floor water will have flow routes through the site without endangering property and where possible maintaining emergency access/ egress routes which should be supported by a flood exceedance plan.

- 6.11. OCC ARCHAEOLOGY: **No objection** subject to the imposition of planning conditions because the site is located in an area of archaeological potential. The plans submitted do not provide detail on the level of ground disturbance involved (i.e. from drainage works) and therefore this development could encounter further aspects of archaeological features recorded on the site immediately east. In a second response, OCC Archaeology made the same comments.
- 6.12. In a third response OCC ARCHAEOLOGY have noted the geophysical survey report that has been submitted with the application which highlights a number of possible archaeological features across the site. These cannot be dated from geophysical survey alone and may be related to the adjacent site. It is also possible that further archaeological features not identified from the geophysical survey could survive on the site. The proposed works, including the drainage scheme, may impact on these features and a programme of archaeological evaluation and mitigation will be required ahead of the commencement of the development. Conditions are required to be imposed and are recommended.
- 6.13. OCC MINERALS AND WASTE: **No comments** as the development would not adversely affect significant mineral resources and there would be no strategic waste planning implications.
- 6.14. SPORT ENGLAND: initially submitted a **holding objection** due to insufficient information being provided. In a second response, Sport England confirmed that they offered their **support** to the application as it is considered to provide new opportunities for sport to meet the needs of current and future generations. Sport England advised that the layout has some built in flexibility for pitch movement to avoid heavy wear and tear on the pitches. This response was provided after some direct contact with the Parish Council regarding their plans around pitch preparation and drainage. In a third response, Sport England continued to express their **support**.
- 6.15. OXFORDSHIRE PLAYING FIELDS ASSOCIATION: **supports** this application for change of use to sports/ recreation and community use.

7. RELEVANT PLANNING POLICY AND GUIDANCE

- 7.1. Planning law requires that applications for planning permission must be determined in accordance with the development plan unless material considerations indicate otherwise.
- 7.2. The Cherwell Local Plan 2011-2031 - Part 1 was formally adopted by Cherwell District Council on 20th July 2015 and provides the strategic planning policy framework for the District to 2031. The Local Plan 2011-2031 – Part 1 replaced a number of the ‘saved’ policies of the adopted Cherwell Local Plan 1996 though many of its policies are retained and remain part of the development plan. Adderbury has a Neighbourhood Plan and this is also part of the Development Plan. The relevant planning policies of Cherwell District’s statutory Development Plan are set out below:

CHERWELL LOCAL PLAN 2011 - 2031 PART 1 (CLP 2031 Part 1)

- PSD1 – Presumption in Favour of Sustainable Development
- BSC10 – Open Space, Outdoor Sport and Recreation Provision
- BSC12 – Indoor Sport, Recreation and Community Facilities
- ESD13 – Local Landscape Protection and Enhancement
- ESD15 – The Character of the Built and Historic Environment
- ESD17 – Green Infrastructure
- Policy Villages 4 – Meeting the need for open space, sport and recreation

CHERWELL LOCAL PLAN 1996 SAVED POLICIES (CLP 1996)

- C28 – Layout, design and external appearance of new development

Adderbury Neighbourhood Plan 2014-2031

- AD1 – Adderbury Settlement Boundary
- AD2 – Green Infrastructure
- AD3 – Local Green Spaces
- AD4 – Local Open Spaces
- AD18 – New Community Facilities

7.3. Other Material Planning Considerations

- National Planning Policy Framework (NPPF)
- Planning Practice Guidance (PPG)

8. APPRAISAL

8.1. The key issues for consideration in this case are:

- Principle of development
- Landscape impact and site layout
- Neighbouring amenity
- Transport
- Drainage and Flood Risk
- Ecology
- Heritage

Principle of the development

- 8.2. Section 38(6) of the Planning and Compulsory Purchase Act 2004 requires that any application for planning permission must be determined in accordance with the Development Plan unless material considerations indicate otherwise. The NPPF confirms that the presumption in favour of sustainable development does not change the statutory status of the development plan as the starting point for decision making.
- 8.3. The Development Plan for Cherwell includes the Cherwell Local Plan Part 1 2011-2031, the saved policies of the Cherwell Local Plan 1996 and any Neighbourhood Plans which have been adopted. Adderbury has a Neighbourhood Plan – 2014 – 2031 and it was adopted on the 16 July 2018 so it forms part of the development plan and it is material to the consideration of this application.
- 8.4. Whilst the land is not allocated for development by the Cherwell Local Plan Part 1, and it sits outside the settlement boundary identified by Policy AD1 of the Neighbourhood Plan, Policy AD18 of the Adderbury Neighbourhood Plan allocates

land off Milton Road, West Adderbury (this site) for sports and community uses. There are a number of criteria to be met in assessing proposals for the land in order for development to be supported and these will be discussed later in this appraisal.

- 8.5. The land itself was transferred to the Parish Council's ownership for the purpose of sports and community uses for the benefit of the local community through a S106 agreement relating to the completed development site at Aynho Road, Adderbury. In addition, S106 agreements from other sites in the locality have sought contributions towards the provision and enhancement of local outdoor sport facilities.
- 8.6. It is also relevant to note that planning permission has previously been granted for the use of the land for recreational use (10/00508/F). The plans accompanying that permission identified a slightly larger area of land because an area of land on the adjacent housing site (currently under construction by Nicholas King Homes) was secured for transfer to the Parish Council. In 2017 planning permission was granted for additional housing on this small area of land, with a contribution secured towards the provision of sports and community facilities specifically on the land subject to the current planning application. That proposal was supported by the Parish Council. That application plan identified the use of the current application site for the provision of two full size football pitches, with the land on the Nicholas King site (now housing), proposed to accommodate a sports pavilion and car parking as well as a landscape buffer.
- 8.7. In addition to the above, the Cherwell Local Plan, in particular Policy BSC10 supports the provision of sufficient quantity and quality of, and convenient access to open space, sport and recreation provision. This includes addressing existing deficiencies in provision through qualitative enhancement of existing provision, improving access to existing facilities or securing new provision. Policy ESD17 also seeks to maintain and enhance the district's green infrastructure network. Policy Villages 4 advises that the Playing Pitch and Green Space Strategy estimated that additional provision is required in the Rural North of the District (which includes Adderbury), including junior pitches, cricket pitches and other amenity/ open space to address existing deficiencies and future predicted shortfalls.
- 8.8. The Adderbury Neighbourhood Plan Policies also defines the green infrastructure network around and within the village (AD2) and it confirms that any development proposals on land within or immediately adjoining the defined network must demonstrate how they maintain or enhance its integrity and green infrastructure value. It also defines local green spaces (AD3) and local open spaces (AD4), which includes the current development site.
- 8.9. Given the above, the general principle of the development in terms of the use of the land for sport/ recreation and community use is considered to be acceptable. The details of the scheme and how the proposal meets the criteria of Policy AD18 of the Adderbury Neighbourhood Plan are therefore important to be considered.
- 8.10. The Parish Council have explained that their intention for the delivery of the site is to prepare the field for sports use by seeding during 2018 so that the pitches will have two or more years to establish before being played on. A project to involve residents is then intended to continue to establish exactly what facilities are required and supported and for detailed plans to be submitted, potentially in the form of a new planning application but for this work to continue whilst the site preparation (including the provision of drainage) is being undertaken. Ongoing management would be required for the first two years of growth and during this time, no public access in using the site for the purposes proposed would be allowed. Contractors would use the existing field gate.

Landscape impact and site layout

- 8.11. Policy ESD13 of the Cherwell Local Plan advises that development will be expected to respect and enhance local landscape character and a number of criteria are highlighted including that development is expected not to cause visual intrusion into the open countryside, must be consistent with local character and must not harm the setting of settlements, buildings or structures. Policy C28 of the Cherwell Local Plan 1996 exercises control over all new developments to ensure that the standards of layout, design and external appearance are sympathetic to the character of the context. The Adderbury Settlement Boundary defined by Policy AD1 aims to avoid harm to local landscape character. In the policy wording for the site (AD18), the countryside location of the site is recognised by requiring that buildings are ancillary to the use of the site and designed to have regard to their location. In addition, it requires that the layout and any lighting has regard to the proximity of the adjoining residential and employment uses.
- 8.12. The site is located on the edge of the village and it is an existing agricultural field surrounded by field hedgerows. The development of the site will change the setting of the village and the street scene, by virtue of the provision of a vehicular access and the proposed development on site; however the land is between a new residential site and Ball Colegrave therefore within this context the impact is unlikely to be significant. In terms of access arrangements, Policy AD18 requires vehicular access from the Milton Road, with minimum losses of the boundary hedgerow therefore the provision of an access from this boundary has been accepted in principle. The proposed means of access has been proposed at 6m width with a section of hedgerow loss that accommodates this, the required footpath link to the village and some verge space to create an appropriate access point. The hedge line is relatively dense in this location, but the principle of the access is accepted.
- 8.13. Otherwise, the proposed development includes sports pitches (one of which is sized to be used as two pitches), a cricket pitch, a MUGA and associated parking (including overflow) and turning space as well as landscaping. It is understood that the future plan is to provide a building/ pavilion on the site so space has been identified for where such a building could be accommodated (and as this is not part of the current application, it is not necessary to consider this point of Policy AD18 further in terms of impact upon the countryside location of the site).
- 8.14. The arrangement of the pitches to the north of the site, with other supporting facilities such as the MUGA (and its associated fencing etc), car parking and the building close to the southern boundary of the site, therefore in proximity to the access point and landscaping is acceptable as it ensures that built development has a closer relationship with the village and the new development adjacent to it. The position of the MUGA and a future building to the eastern side of the site is also likely to be the most appropriate location for those features so that they do not appear isolated being close to other built development and for the ease of use of villagers walking/ cycling to the site. However, it is clear that the Parish Council wish to refine their proposals with community input through the period whilst the land is being prepared and in this regard, a planning condition is recommended to secure details of the final layout of the site for the development demonstrated now. No other development is approved and in this regard, a condition is recommended to restrict all other engineering operations/ physical development including a building.
- 8.15. The proposal does not provide details of landscaping, other than the suggestion of new tree planting to part of the eastern boundary. There are however opportunities to provide landscaping as part of the site layout and these can be sought via condition (and this is necessary in order to demonstrate net gains for biodiversity as will be discussed later).

- 8.16. Policy AD18 states that the landscape scheme should contribute to the delivery of Policy AD2 by making provision for ecological connectivity from Milton Road to the proposed local green space off Horn Hill Road in Policy AD3. The Policies map indicates a potential route along the eastern site boundary, which could extend beyond the site boundary to continue offsite to the Local Green Space. Whilst the proposal does not provide for a formal route, the land would be open and there would be opportunities to provide access from the site to the north to allow the link to be provided along the northern boundary. The position of a swale in the north eastern corner is also identified on the proposed plan (albeit the FRA suggests an alternative feature) and the drainage scheme is not yet fully concluded. The proposed change of use of the site for the type of development proposed could accommodate a link to the north in compliance with Policy AD18.
- 8.17. Overall, the proposal as it stands is considered to be acceptable as there would be no significant impact upon visual amenity. In terms of site layout, the development proposed now can be accommodated and any refinements to the positioning can be secured via condition. The proposal complies with the Policies outlined above.

Neighbouring amenity

- 8.18. Policy ESD15 advises of the need for new development to consider the amenity of both existing and future development. The NPPF advises that places should be created that have a high standard of amenity for existing and future users.
- 8.19. The site is allocated for use for sport/ recreation and community use and therefore the principle of the development is acceptable adjacent to the surrounding uses and it was secured for this purpose. Policy AD18 of the Adderbury Neighbourhood Plan requires that the layout and any lighting have regard to the proximity of the adjoining residential and employment uses. No lighting is proposed as part of the current application, however the layout can be considered now. Generally, it reflects what would be expected, with the pitches arranged at the north of the site, with built infrastructure (including parking, a future building and the MUGA) arranged to the south. This ensures that these elements relate to the village and are accessible. Officers have some concerns regarding the position of the MUGA having visited the site and assessing the proximity to the adjacent properties on the Nicholas King Homes site (these have gardens of approximately 12-14m). Additional planting is shown as being proposed (although no detail is provided of what this could be and this would need to be secured via condition), however to avoid concerns regarding noise and nuisance, a condition is recommended to reconsider the location of the MUGA. There appears to be sufficient space for this to be moved to continue to achieve the same aims for the site. Based on this, it is considered that the proposal can be accommodated without causing serious harm to the amenity of residential properties nearby.
- 8.20. In terms of the neighbour to the west, Ball Colegrave, some concerns have been raised regarding the impact of the use upon their business activities. Concern is raised with regard to lighting, however this does not form part of the current application and its impacts could be considered in the future if this forms part of the plan in the future. Concern is also raised with regard to stray balls – the plan demonstrates that there could be some distance between the features on the site and the boundary and in addition, the boundary itself is a well-established dense treeline that would assist in protecting the site. A condition is however recommended to secure details of boundary fencing, should this form part of the Parish Council's plan in the future (on any area of the site). The continued use of an access track could be discussed with the Parish Council however this is a land ownership issue rather than something needing to be secured through the planning application.

Transport

- 8.21. The application is accompanied by a Transport Statement. In terms of traffic impact, this has tested two scenarios which are based on assumptions regarding how the site could be used (one at its maximum and a second at a more realistic level). In addition, trip rates are added for a building on the site, however this is not part of the current proposal, therefore the impacts are worse case and likely to be less for the current proposal. This does however mean the results are robust. This has demonstrated that the proposed uses on the site would not have a severe impact on the highway.
- 8.22. Vehicular access is proposed from the Milton Road, 50m west from the edge of the site. In addition, a pedestrian link to the village is required – a pedestrian link is already secured between the existing footway network and the entrance to the adjacent residential development. An extension to this would be required to link to the site access to give access to the site from the village for pedestrians and this is proposed to be 2m wide and to be accommodated on the highway. A drawing of the access arrangement has been provided and tracking has been undertaken to demonstrate that this is suitable.
- 8.23. The application documentation demonstrates that up to 141 parking spaces can be provided (including some within an overflow area and a proportion for disabled users), as well as spaces for minibuses, motorcycles and bicycles. This level of parking has been proposed based upon the potential user demand assumed from the maximum use scenario tested with 53 of these provided less formally as overflow parking. This would ensure no overspill outside of the site.
- 8.24. The application is also accompanied by a Travel Plan, which provides some information regarding how sustainable transport would be encouraged. The measures suggested, including the promotion of sustainable options via the Parish website and by notices at the site seem sensible and proportionate to the development proposed.
- 8.25. Oxfordshire County Council as Highway Authority has confirmed that they have no objections in principle to the change of the use of the site. In terms of the transport statement, it has been confirmed that this is comprehensive and is based on detailed assumptions which are robust. Reference is made to the onsite and offsite infrastructure including the parking, footway link and to the need for an informal crossing point on the Milton Road to improve connectivity from the site to St Mary's Road (in the form of dropped kerbs and tactile paving). This could be picked up through the S278 process, which is also required for the junction and any other required changes on the highway, including a gateway feature and speed limit signs.
- 8.26. Overall, it is considered that the site is within a sustainable location in transport terms. It can be appropriately accessed and there is sufficient space to provide onsite transport infrastructure including parking and connections can be provided to the rest of the village to encourage the use of sustainable modes of transport to access the site.

Drainage and Flood Risk

- 8.27. A flood risk assessment and drainage management strategy is submitted with the application in line with the requirements of Policy ESD6 of the Local Plan and the Framework, given the site extends to over 1ha in area and is predominantly in Flood Zone 1. Policy ESD7 of the Local Plan requires the use of Sustainable Urban Drainage Systems to manage surface water drainage systems. This is all with the aim to manage and reduce flood risk in the District. A number of comments have

been provided raising concerns that there have been flooding issues in the vicinity in the past. It is important that the proposal provides for an adequate drainage arrangement that does not increase flood risk off site.

- 8.28. The flood risk assessment finds that the site is within flood zone 1 and that the development proposed is classified as water compatible development. The site is at low risk of fluvial flooding from main rivers and from other potential forms of flooding. The FRA has anticipated the total impermeable area proposed (including a building which is not proposed as part of this application) and has found that approximately 3% of the total site would be impermeable. The SUDs techniques proposed include permeable hardstanding and to maximise soft permeable landscaped areas as well as soakaways and pervious paving to manage surface water runoff from roofs and roads at their source. The assessment considers the potential size for a soakaway for a building on the site as well as for any impermeable areas of the access road. In terms of the pitch land, the proposal is for perforated pipe land drainage below ground to maintain a useable pitch surface all year round. Alongside this, an infiltration strip should be provided along the northern boundary. The SUDs proposed have been sized to cope with the 1 in 100 year flood event plus a 40% allowance for climate change. In addition, the proposals result in some betterment of the existing situation as less water would be discharged to the existing drainage ditches and main rivers which would result in a reduction in flood risk overall.
- 8.29. Overall and based upon the assessment submitted, the development would be at low risk from flooding and there are opportunities for surface water management that would result in improvements over the existing green field run off rate. The Drainage Authority has confirmed that the drainage design details are at an outline stage of detail and no detailed designs have been provided. A condition is recommended to request further detail following the grant of planning permission as outlined above. Officers are considering the condition and whether there can be a staged approach to the provision of information to enable the Parish Council to complete elements of the work they wish to early (supported by sufficient information) with other elements following later.

Ecology

- 8.30. The Framework sets out that Planning should contribute to and enhance the natural and local environment by minimising impacts on biodiversity and provide net gains in biodiversity where possible. Policy ESD10 reflects the requirements of the Framework to ensure protection and enhancement of biodiversity. Policy AD18 of the Adderbury Neighbourhood Plan seeks to secure a net biodiversity gain. The Authority also has a legal duty set out at Section 40 of the Natural Environment and Rural Communities Act 2006 (NERC 2006) which states that “every public authority must in exercising its functions, must have regard ... to the purpose of conserving (including restoring / enhancing) biodiversity”.
- 8.31. No ecological assessment has been submitted with the application, however given the nature of the proposal this was not required. The Council’s Ecologist has not objected to the application providing the works to create the access are undertaken outside of the bird nesting season. A net gain calculation has not been provided and therefore it is difficult to judge, at this stage, whether a net biodiversity gain can be achieved in accordance with Policy AD18 of the Adderbury Neighbourhood Plan. The proposal does however involve landscaping and these details have not, at this stage been submitted. As such and in the circumstances of this case whereby the land remains generally open and therefore it is possible to ensure that a net biodiversity gain is achieved, it is considered that a condition can be imposed to secure, alongside a landscaping scheme, a calculation to demonstrate that a net

biodiversity gain will be achieved. This can ensure that the biodiversity elements of Policy AD18 can be achieved.

Heritage

- 8.32. The site sits close to the Adderbury conservation area boundary. The land is allocated for the proposed use and the development proposed at this stage in terms of changing the use of the land, the provision of an access and the layout of the site would unlikely be harmful to the character and significance of the conservation area in the view of Officers. The Conservation Team have confirmed that providing parking and any buildings are located along the Milton Road, which they are, that there are only likely be minimal impacts therefore the proposal is considered to be acceptable in terms of the impact upon the setting of the conservation area.
- 8.33. The application site has also been identified as being important for archaeology by the OCC Archaeology team. Their advice is that the site is located in an area of archaeological potential 300m to the south east of a possible Roman building. It is noted that a programme of archaeological investigation has recently been undertaken immediately east of the proposed site, which recorded a number of possible prehistoric features including a possible henge site and a Bronze age posthole structure. The post excavation analysis of this site is still underway, but initial results would suggest that these features are of some significance. A geophysical survey has been submitted with the application, and this identified the possibility for archaeological features, including the possibility of the continuation of features found on the site to the east.
- 8.34. In response to the Archaeological survey, OCC have advised that the proposed works, including the drainage scheme, may impact on the potential archaeological features identified (and potentially other features that have not been identified). A programme of archaeological evaluation and mitigation is recommended ahead of the commencement of the development and conditions are therefore recommended. The conditions as worded are recommended and these being imposed should ensure that the importance of these archaeological matters are understood and mitigated for.

Planning Conditions

- 8.35. Given the intentions of the Parish Council as have been explained earlier in this report, the trigger for compliance with the planning conditions have been considered. Officers have been mindful that pre-commencement conditions can cause delays and therefore should be minimised unless absolutely necessary. As such the timing for the compliance of conditions has been considered, with most proposed to be 'prior to the first use by the public...' or 'Prior to the laying out of the site for pitches...' Only where absolutely necessary have pre-commencement conditions been recommended.

Other matters

- 8.36. A number of comments have been made raising concerns about the current proposal. The proposal does not include a proposal for flood lights or for a building and a condition is recommended to restrict these features so that they would be subject to a new planning application. A full assessment of these proposals would be undertaken at that time. Concern is also raised in relation to the hours of use of the site. The application does not provide this detail, although the transport statement does test a scenario with potential use until 11pm. This is for the purpose of testing a robust, worst case scenario and is not necessarily what is proposed. A condition to seek a management plan, to include details of hours of use of the site is

recommended. In terms of the use of the site, it is considered that public use of the development proposed should not occur until the required access and footways to it have been provided so as to ensure that the land can be safely accessed and that it does not cause problems (for example parking) elsewhere off site. A condition is recommended to ensure that the use applied for is not commenced until the site has been provided with its access and parking arrangements. Comments have also been raised that the proposal does not reflect what the community wants. The role of the Planning Authority is to consider the proposal put to it.

- 8.37. There is reference within the comments and between correspondence between the Parish Council and Sport England to potential minor re-levelling. No information is provided regarding the work involved and so a condition is recommended to secure information about the extent of levelling if this is required (and this matter will be discussed with the Parish Council in advance of the Committee meeting). The site only has a minor slope and so it is not expected that any such levelling would be significant but the detail of any such work should be understood. In terms of landscaping, it is noted that proposals could be within proximity to neighbouring properties and therefore a management plan would be helpful to understand how this would be maintained.

9. PLANNING BALANCE AND CONCLUSION

- 9.1. As discussed, the principle of the change of use is considered to be acceptable in accordance with Policy AD18 of the Adderbury Neighbourhood Plan, which effectively allocates the land for sports and community uses. There are a number of criteria to consider such a proposal against and these have been assessed through this appraisal. It is considered that the proposal meets the requirements, or information to be sought via planning condition can secure additional detail to ensure that the proposal is accommodated appropriately. Overall, the proposal is considered to be sustainable and can meet the economic, social and environmental roles of sustainable development.

10. RECOMMENDATION

That permission is granted, subject to conditions:

The exact conditions and the wording of those conditions are delegated to the Assistant Director for Planning Policy and Development, the conditions will cover:

1. Time limit – to commence within 3 years
2. Compliance with the approved plans
3. Notwithstanding the submitted layout plan, a plan to be sought with the final layout proposed including a reconsideration of the position of the MUGA and the demonstration of links to the local green space off Horn Hill Road
4. Details of Landscaping, a biodiversity calculation to demonstrate a net gain and a management plan for it
5. Retention of the approved landscape scheme
6. Details of any proposed boundary treatments
7. Details of any proposed change in levels
8. A scheme for surface water drainage to be submitted
9. Full details of the means of access
10. The restriction of the provision of any other means of access and closure of the existing field entrance
11. The protection of vision splays at the entrance
12. Details of the turning area and car parking
13. The provision of the new footpath linking the site to the village prior to the first public use of the site

14. Details of covered cycle parking facilities
15. The requirement for an archaeological written scheme of investigation
16. A staged programme of archaeological evaluation and mitigation
17. Hedgerow works outside of the bird nesting season
18. No public use of the site for the use approved until the site is laid out.
19. A management plan for the site including hours of use
20. A condition to restrict any flood lighting on the site
21. A condition to restrict the provision of a building on the site

Planning note

1. The applicant's attention to the need for a S278 agreement to be highlighted

Foreword

A safe and secure home that is suitable for our family is something we all have a right to. A home is essential and provides the foundation for everything we do – work, play, raising children, forming and maintaining relationships, participating in our community and building a good quality of life. Some of us will spend most of our time in our home as we get older and our health and care needs change. All the more reason for our home to be a place of refuge and relaxation.

This is the point of the Housing Strategy – to address the current and anticipated housing needs of people in our district and set out our priorities for improving access to affordable and suitable housing and for building healthy communities.

In the strategy we are focussing on people but also recognising the importance of place. Housing exists in the context of places that people want to live in and we need to consider the wider infrastructure when developing, improving and allocating housing. This includes access to jobs, transport, shops, community facilities, green spaces and play parks. It means designing in opportunities for walking and cycling and for engagement with neighbours. It means living in a place that promotes good health, where the air is clean and where the housing is good quality and energy efficient.

We want to enable and deliver new affordable housing but also address issues in the existing stock. The majority of homes in the district are in good condition but there is a significant number that are below acceptable standard, both private rented sector homes and owner occupied. We want to tackle this issue robustly by identifying the minority of bad landlords who take advantage of their tenants and against whom enforcement action is necessary.

Much of what is in the strategy is aspirational and can only be delivered with our partners and with investment. Cherwell District Council aims to be forward thinking and is well placed to deliver given the track record of affordable housing development, the willingness to innovate and the strong partnership working. Access to affordable housing is the second top priority for people in our district. We also have over a thousand low income households waiting for affordable housing. These facts together point to how proactive and relentless we need to be in the pursuit of new housing solutions. Housing is also at the top of the national agenda. At county level we are a lead authority in the delivery of housing through Oxfordshire Growth Deal. This sets a positive context for driving our ambitions forward and demonstrates the commitment we have to always doing the best for our communities.

We look forward to working with partners and communities to deliver on our commitments and to making sure Cherwell is a place where people can prosper.

Councillor John Donaldson, Lead Member Housing

Introduction

This Housing Strategy sets out Cherwell District Council's plans for the housing service for the period 2019-2024. The previous Housing Strategy was a combined Housing and Homelessness Strategy that covered the period 2012-2017. This is a standalone Housing Strategy as we published a new Homelessness Strategy in July 2018, in recognition of the significant shift in homelessness legislation with the implementation of the Homelessness Reduction Act 2017 (HRAct).

Our 2019-2024 strategy has been shaped by national policy and local context and is informed by data and information about our local housing market. A strong evidence base is essential to ensure that key strategic priorities and action plans are intelligence led. A key source of evidence for this housing strategy is Cherwell District Council's "State of the District's Housing Report 2018". This strategy should be read in conjunction with this report. Other evidence for the strategy includes Oxfordshire Strategic Housing Market Assessment (SHMA) 2014, data from our internal housing register/housing advice and private sector housing databases and the Cherwell Local Plan 2015.

In July 2017 we became a shared housing service with South Northamptonshire Council. However, local government reorganisation in Northamptonshire has prompted a termination in the partnership between Cherwell District Council and South Northamptonshire Council. There is currently a programme of work taking place that will culminate in the separation of the 2 councils. This programme is expected to be completed in mid-2019. We have also formed a new partnership with Oxfordshire County Council and with effect from 1 October 2018 we have a shared Chief Executive with the county council. From January 2019 we have a shared Assistant Director for Housing and Social Care Commissioning. This arrangement is new and the strategy recognises that the relationship between the two organisations will grow and develop. There will be lots of opportunities to work together over the lifetime of the strategy to join up pathways and improve housing solutions for our residents.

The Housing Strategy has three strategic priorities, these are:

- Increase the supply and diversity of affordable housing to ensure the right types of housing are available in the right places
- Improve the quality and sustainability of our homes and build thriving, healthy communities.
- Enhance opportunities for people to access suitable homes and have housing choices

Taking into account the level of change anticipated in national policy, the housing market, the local government sector and our communities we felt the housing strategy needed a degree of flexibility. The structure of the strategy is unlikely to change over the course of its life and will remain focused on the 3 key themes. But we will review regularly with the aim of producing an annual action plan which will enable us to respond to the changing environment. The action plan 2019-20 sets out year 1 delivery.

Key Achievements

Our key housing achievements over the course of our 2012-2017 strategy include:

- Between April 2012 and March 2018 over 1,500 new affordable homes were provided in the district. Each year since 2014/15 we exceeded our target of enabling 150 new affordable homes to be built per year; in 2017/18 this rose to 443.
- We secured the Graven Hill Military Base site which will eventually provide up to 1,900 homes. 72 units were completed by July 2018 of which 36 were self-build, 11 were custom build and 25 were affordable housing.
- Build!® have produced a total of 258 affordable homes including 65 self-build/custom build or self-finish units and working with a developer to convert office space in Banbury into affordable rented accommodation for singles and couples.
- We helped more than 640 disabled residents with Disabled Facilities Grants (DFGs) and a further 18 households via discretionary grants through our Home Improvement Agency.
- We provided direct practical help to over 2,200 residents through our Small Repairs Service
- We helped 1,058 vulnerable and older people with home improvements through discretionary grant funding
- We concluded 708 statutory interventions including improvement notices (both formal and informal) and prohibition orders, and resolved serious health hazards in 581 homes.
- We have inspected 438 houses in multiple occupation (HMOs) to ensure appropriate standards are achieved and maintained.
- 77 home improvement grants were issued to bring private rented sector properties up to decent standard and these were then let to local households in housing need at an affordable rent.
- We worked with regional partners to secure total funding of £412k from the Department of Energy and Climate Change (DECC); and were able to use £58k of this to improve 28 homes in the district.
- We conducted a review and produced a new homelessness strategy and action plan for the period 2018-2020: [<https://www.cherwell.gov.uk/info/55/strategy-policy-and-development/544/homelessness-review-and-strategy>]. This will be actively monitored through the period.

A full list of our achievements over the period 2012-2017 can be found on the council website.

Strategic Context

Legislation and policies at a national, regional and local level have an impact on the content and delivery of the housing strategy. There have been considerable changes to the national policy framework for both housing and planning since the last housing strategy document was produced in 2012. The key legislation and policies that relate to the housing strategy are listed below:

National	
	Welfare Reform Act 2012
	The Care Act 2014
	Housing and Planning Act 2016
	Welfare Reform Act 2016
	The Housing White Paper 2017 "Fixing our broken housing market"
	The Homelessness Reduction Act 2017
	The National Planning Policy Framework 2018
	The Social Housing Green Paper 2018
	The Licensing of Houses in Multiple Occupation (Prescribed Description) (England) Order 2018
Regional	
	Oxfordshire Health and Wellbeing Strategy 2015-2019
	Oxfordshire Housing and Growth Deal 2018
Local	
	Cherwell District Council Business Plan 2018-2019
	Homelessness Strategy 2018-2020
	Cherwell District Council's Tenancy Strategy 2017
	Cherwell District Council's Housing Allocations Scheme 2018
	Cherwell Local Plan 2011-2031

A summary of the key legislation and policies outlined is available on the council website.

Cherwell – People & Place

Cherwell district lies at the north-western edge of Oxfordshire. It covers an area of 277 square miles and includes the towns of Banbury and Bicester, Kidlington (a large village) and 72 smaller villages. The M40 passes through the district and there are good rail connections to London and Birmingham. Cherwell also has a close relationship with the world class university city of Oxford. The city's successful economy built around the universities and high tech industries and businesses combined with the attractiveness of the surrounding countryside make the county a highly desirable place to live which influences the housing market.

Cherwell has an estimated population of 147,602 (2017). Over 60% of residents live in one of the districts main urban centres, Banbury (32%), Bicester (21%) and Kidlington (9%), with the remainder living in the rural areas (38%). The population is growing, it increased by 0.7% in the last year, this is above the UK growth rate and the rate of population growth in Oxfordshire as a whole. International migration does contribute to the increase in the population locally, however a key driver of population growth is in-migration from Oxford probably related to acute housing affordability issues in the City. Cherwell is expected to continue to grow with the population forecast to be 203,900 in district by 2031.

The district has a total of 66,693 dwellings, of which 66% are owner occupied, 22% private rented and 12% social housing. The levels of home ownership and private renting in Cherwell are now ahead of national levels and the amount of social housing falling behind. The number of detached and semi-detached properties in the district is ahead of national averages whilst the number of terraced properties and flats is below.

Although the majority of homes in the district are warm and safe a significant minority (11%) have serious hazards including risk of falls and being cold. 3% suffer from more general disrepair. There is also double the proportion of homes with an 'excess cold' hazard than in England as a whole (6% compared to 3%).

The life expectancy of people in Cherwell is higher than the national average and the district is expected to see a substantial increase in the older person population. The age group that that will see the greatest increase is people over 85, with an increase of 142% resulting in a significant increase in the demand for accommodation that is suited to an older population and the need for associated care and support services. The majority of our residents are in good health while 14.1% have a long term limiting health problem or disability (17.6% nationally).

Housing Strategy Priorities

Priority 1:

Increase the supply and diversity of affordable housing to ensure the right types of housing are available in the right places

Our objectives are to:

- 1.1 Understand the need for the full range of affordable and specialist housing in the district, including type, tenure and location
- 1.2 Deliver a range of affordable homes that meet the needs of local residents and workers
- 1.3 Work in partnership with private developers, registered providers and local landowners to gain greater control over the delivery of housing, including new affordable housing
- 1.4 Maximise and make best use of financial assets and resources, including those of the Council, Registered Providers and Homes England, to deliver affordable housing in the district

Why is this important?

- We need 1,140 new homes in Cherwell per year until 2031 with 35% of this being affordable
- We need to respond to diverse needs ranging from smaller homes for young people and people looking to downsize through to larger family homes
- We have a growing population of older people whose housing needs need to be anticipated and planned for
- Home ownership is out of reach for households on low and average incomes
- Social rent is the only truly affordable housing option for many people and there is a lack of supply in this area
- Cherwell has a strong track record of housing delivery and has exceeded new build targets. But the market on its own does not deliver the volume and range of affordable products that our communities need
- New build housing has been concentrated in the main towns of Banbury and Bicester and there is a need to increase delivery of affordable housing in rural areas of the district
- We have also committed to helping Oxford city meet its need for 1,400 new homes per year

What we plan to do

1.1 Understand the need for the full range of affordable and specialist housing in the district, including type, tenure and location

- Improve our understanding of specific housing needs by drawing on our own internal data and intelligence and that of our partners
- Work with parish councils, community groups and residents in rural parts of the district to identify and respond to housing needs in the villages
- Join up with Oxfordshire County Council and health partners to understand and respond to the current and future housing needs of older people and other vulnerable groups that require specialist housing e.g. people with learning disabilities
- Ensure that the development of new housing contributes to vibrant and sustainable town centres
- Ensure that we listen to the people whose housing needs we are trying to meet by consulting and checking back that we are delivering the right types of housing

1.2 Deliver a range of affordable homes that meet the needs of local residents and workers

- Explore the viability of delivering homes for social rent within new developments
- Increase the supply and uptake of affordable housing for keyworkers
- Diversify the provision of affordable housing through innovation and partnership working i.e. shared ownership, self-build, custom build and community-led schemes
- Ensure that the delivery of new housing is supported by and integrated with community facilities, businesses and employment, schools, transport and health and other services
- Work alongside landowners and house builders, including the University of Oxford, to develop affordable housing on allocated sites for households and key workers from Oxford with unmet housing need
- Contribute to the Oxfordshire Growth Deal programme to ensure affordable housing targets are met
- Work with existing Cherwell residents and partners to ensure the housing needs of expanding communities are met as well as the needs of Oxford residents
- Work within Local Plan parameters to increase the delivery of affordable housing within rural areas where unaffordability and the constraints on development are often a challenge

1.3 Work in partnership with private developers, registered providers, landowners and local communities to gain greater control over the delivery of housing, including new affordable housing

- Continue to seek the maximum amount of affordable housing when negotiating with developers on new schemes¹
- Take a more proactive approach to working with registered providers to encourage them to come forward with land-led development proposals
- Work closely with Homes England and other partners to pursue and bring forward public sector land for development
- Explore the potential for the council to take a lead role in land assembly
- Undertake social value assessments to enable decisions to be made about whether council land should be disposed of at or below market value – for the development of housing including affordable housing

1.4 Maximise and make best use of financial assets and resources, including those of the Council, Registered Providers and Homes England, to deliver affordable housing in the district

- Work with Build!², registered providers and community led developers to maximise grant funding that can be used for affordable housing development, including homes for social rent
- Raise the profile of our affordable housing needs and ambitions with Homes England in order to maximise the amount of funding we can access from the Shared Ownership and Affordable Homes Programme 2016-21
- Identify land in our ownership that can be considered for affordable housing development
- Lever Oxfordshire Growth Deal funding to support housing delivery in Cherwell
- Review our internal resources and structures to ensure we have the expertise and capacity in place to deliver on our affordable housing ambitions

¹ Local Plan affordable housing requirements are 30% in Banbury and Bicester and 35% in the rest of the district

² Build! is Cherwell District Council's in-house housing development and management company

Priority 2:

Improve the quality and sustainability of our homes and build thriving, healthy communities

Our objectives are to:

- 2.1 Improve the energy efficiency of the housing stock and reduce fuel poverty for low income and vulnerable households
- 2.2 Support residents to have a suitable home where they can live independently
- 2.3 Ensure the efficient use of the housing stock and maximise opportunities to meet housing needs
- 2.4 Improve the quality of new homes and the existing housing stock
- 2.5 Ensure effective enforcement action is taken to improve unsatisfactory rented accommodation
- 2.6 Demonstrate a corporate commitment to sustainable, healthy and thriving communities

Why is this important?

- An estimated 6,638 (11%) owner occupied and private rented homes have a serious health hazard as defined by the Housing Health and Safety Rating System
- Our owner occupied and private rented dwellings have a lower energy efficiency rating than the national average
- Just over 900 (6.2%) private rented dwellings in the district are estimated to have an Energy Performance Certificate rating below band E. This is below the rating now required, for a landlord to grant a new tenancy to new or existing tenants
- It is estimated that 8% of all households (over 3,000 owner-occupied households and 1,777 private rented households) experience fuel poverty, although this is lower than the national average of 11% of households. The highest concentrations of fuel poverty are in the rural areas of our district
- As of March 2018 there were 495 properties that had been empty for more than six months
- Due to new licensing requirements the number of licensable HMOs has increased from 84 to an estimated 431
- Oxfordshire is expected to see a substantial increase in the population of older people with the total number of people aged 55 and over expected to increase by 49% over 20 years
- Older people are more likely to live in owner-occupied and social rented accommodation than the private rented sector
- 22% of households in Cherwell include someone with a long term health problem or disability

- There is a correlation between age and long term health conditions or disability with 83% of persons aged 85 or older having a disability
- There is an evidenced need for a diverse range of supported housing including learning disabilities, people with physical disabilities and vulnerable young people including young parents
- The district is going through a period of high growth, with this rate of increase we must ensure the community infrastructure is in place to support sustainable communities
- Where we have achieved impact with our existing programmes we have the opportunity to expand on this good practice e.g. Graven Hill, Bicester Healthy New Town and Bicester Eco Town
- There is growing evidence that significant benefits for local people can be achieved by joining up the planning of housing, infrastructure and the economy with planning for residents' health and wellbeing

What we plan to do

2.1 Improve the energy efficiency of the housing stock and reduce fuel poverty for low income and vulnerable households

- Increase awareness of council services and initiatives in relation to warm homes, energy efficiency and retro-fit technologies
- Work in a coordinated way with local health partners to ensure residents in most need receive support to make their homes warmer (making every contact count)

2.2 Support residents to have a suitable home where they can live independently

- Continue to support and meet the demand for adaptations to assist older and disabled people to remain living independently in their own homes
- Support the delivery of new build adapted properties
- Provide supported housing as identified through Oxfordshire County Council's commissioning plans for Adult's and Children's Services
- Promote use of technology to enable disabled and older people to live independently
- Deliver the Government's Vulnerable Persons Relocation Scheme in Cherwell

2.3 Ensure the efficient use of the housing stock and maximise opportunities to meet housing needs

- Reduce the number of empty properties in the district, including refurbishment of flats above shops and conversion of commercial space to residential.

2.4 Improve the quality of new homes and the existing housing stock

- Improve conditions in the private rented sector by implementing actions arising from HMO licencing responsibilities, our formal and informal enforcement interventions and our grant and loan work

Increase our enforcement profile and interventions so that non-compliant landlords do not profit from providing poor quality accommodation

- Take a leadership role to influence developers and demonstrate that increased standards in new build housing are deliverable

2.5 Demonstrate a corporate commitment to sustainable, healthy and thriving communities

- Identify key partnerships that require housing representation and influence to deliver healthy communities, including establishment of a Cherwell Housing Board
- Increase corporate coordination in relation to housing activities across the council
- Implement a framework of engagement with RP partners to deliver thriving, healthy communities
- Adopt a corporate approach to commissioning services to support sustainable communities
- Use the learning from Bicester Healthy New Town to roll out new approaches to promoting health and wellbeing and tackling deprivation in other parts of the district

Priority 3: Enhance opportunities for residents to access suitable homes and have housing choices

Our objectives are to:

- 3.1 Provide an enhanced housing options service
- 3.2 Keep the Allocations Scheme under review to ensure it meets housing needs
- 3.3 Increase opportunities for people to access low cost home ownership and good quality private rented accommodation

Why is this important?

- Cherwell is a high growth area and the demand for housing is unlikely to subside in the foreseeable future
- Our customer base is expanding with more households, including working households, needing advice and help to access housing. This is because household income has not kept up with house prices and market rents in the private rented sector
- Housing Options services have traditionally worked with vulnerable people and those threatened with homelessness. As more households experience affordability issues with housing we need to offer advice to a wider group of people
- Housing needs outweigh supply of social and affordable rented housing so we need to widen the housing options on offer, this could include self-build opportunities at Graven Hill, shared ownership, rooms in shared houses and private rented sector properties
- The need for keyworker housing is high across the county, particularly for those working in Oxford city, and the Housing Options service needs to reflect this

What we plan to do

3.1 Provide an enhanced Housing Options service

- Provide a Housing Options service that responds to the diversity of need
- Promote a personalised approach which helps customers identify housing solutions that will meet their needs and aspirations
- Support customers to make positive and realistic choices about the type of housing they want to live in
- Ensure staff have the skills and training to offer good quality advice

- Ensure that good quality information on the housing opportunities in the district is made available across a range of media including comprehensive information on the web
- Increase opportunities to work with partner organisations to ensure residents get good quality housing advice when they need it

3.2 Keep the Allocations Scheme under review to ensure it meets housing needs

- Review our Allocations Scheme to ensure it continues to meet the needs of our communities

3.3 Increase opportunities for people to access low cost home ownership and good quality private rented accommodation

- Improve our relationships with the local private rented sector to increase innovation and support development of the market
- Work with Graven Hill to review the self-build mortgage pilot and establish how this and other council-led initiatives can help local people choose self and custom build to meet their housing needs
- Broaden the housing choices for older people including co-housing, shared ownership and smaller homes for open market sale³

³ In line with the Older People's Strategy 'Living Longer, Living Better' – Oxfordshire Health and Wellbeing Board

Resources

The resources available to deliver the housing strategy in Cherwell are as follows:

Council Resources

Staff Resources - The main staff resource is the Housing Team which consists of:

- The Housing Development and Strategy Team
- The Housing Options Service – focused on homelessness, providing general housing advice and maintaining the Council's housing register
- The Private Sector Housing Team

We will draw on officer time and expertise from other teams within the council as well including Build!, the Bicester Team, Planning Policy and Development Management, Transformation Team, Property and Investment Team and Communities Team. We will also consider the potential for council-owned land and other assets to be used to help meet local housing needs.

We are also sharing resource with Oxfordshire County Council at Assistant Director level to enable us to deliver our joint housing priorities and deliver better housing outcomes for older people, disabled people and other vulnerable groups.

Commuted Sums - Off-site contributions in lieu of affordable housing are provided by developers in exceptional circumstances where affordable housing is not provided on site. In these circumstances developers are required to pay a commuted sum which can then be used as an additional source of funding for affordable housing delivery.

New Homes Bonus - New Homes Bonus (NHB) is a grant paid by Central Government to local authorities to incentivise housing growth in their areas. Under the scheme Central Government matches the council tax raised on new build homes, conversions and long term empty homes brought back into use. The development of each additional affordable home attracts an enhancement of £350 per annum (over the period which the NHB is payable). Local authorities are not obliged to use the funding for housing purposes but we have set the enhanced payments (£350 per property per annum) aside to fund new affordable homes or services.

Private Sector Housing Grants and Loans

The Council received Disabled Facilities Grant funding of £1.012 million from the Better Care Fund (a programme seeking to join up health and care services) for 2018-19 and expects a similar or increased level of funding in future years. Alongside this there is a proposed budget of £150,000 in 2019-20 for discretionary private sector housing grants (including essential repairs, energy efficiency and landlord home improvement grants). We also have access to loan funding for improvements to private sector housing as we are members of Flexible Home Improvement Loans Limited.

Partners' Resources

In order to enable the delivery of new affordable housing we work in partnership with Registered Providers, who use their staff time to facilitate new development and invest their own financial resources to fund new build affordable housing. They also provide resources such as staff time to manage housing stock in our district and staff time and financial investment in community development activities.

Growth Deal

In March 2018 the Oxfordshire Authorities were successful in securing Housing and Growth Deal funding of up to £215 million from the Government to support the delivery of around 100,000 new homes across Oxfordshire between 2011 and 2031. This includes £60 million to deliver additional affordable housing and £150 million to deliver the infrastructure needed to accelerate the delivery of 100,000 homes across the County by 2031, both market and affordable. We wish to maximise the amount of funding from this source into the district. Currently £3,250,000 is allocated for 106 affordable housing units to be provided in Cherwell.

Homes England Funding

In April 2016 bidding was opened to the Homes England Shared Ownership and Affordable Homes Programme (SOAHP) 2016 to 2021. Initial allocations of capital grant for new affordable housing schemes were announced in January 2017 but this did not allocate the total budget, with £1.3 billion remaining available. This is being allocated through Continuous Market Engagement together with a share of the £1.4 billion announced in the Autumn Statement for new affordable homes outside London. In addition, in June 2018, an addendum to the SOAHP prospectus was published. This addendum invited bids against the available funding for a range of housing tenures, including social rent, which had previously not been funded.

Other Funding

There are additional sources of funding allocated to the council specifically for homeless work. These include:

Homelessness Prevention Grant - Central Government gives local housing authorities funding for homelessness prevention work (Homelessness Prevention Grant) within the council's wider local government settlement. This funding has been used by the Housing Team to support a range of community and voluntary sector groups to provide services within the district that are focused on supporting the prevention of homelessness. For example, the provision of drop in centres for people who are homeless or unsuitably housed, outreach and verification for rough sleepers and outreach for low to medium level victims of domestic abuse. The Homelessness Prevention Grant allocation for Cherwell District Council is as follows:

Homelessness Prevention Grant		
2017/18	2018/19	2019/20
£99,869	£100,211	£100,712

Flexible Homelessness Support Grant - The Ministry of Housing, Communities and Local Government (MHCLG) also provides Flexible Homelessness Support Grant (FHSG) to local housing authorities. FHSG is paid to local housing authorities as a grant and can be used in any way a local authority sees fit, to better manage temporary accommodation pressures. The grant is ring-fenced for activities to prevent and deal with homelessness.

Flexible Homelessness Support Grant Allocation		
2017/18	2018/19	2019/20
£178,538	£205,425	£265,225

Homelessness Reduction Act: New Burdens Funding - The government is providing funding to local authorities to help meet the new burdens costs associated with the additional duties contained within the Homelessness Reduction Act 2017. The local authority allocations cover: 2017/18; 2018/19; and 2019/20 and Cherwell District Council will receive the following:

Homelessness Reduction Act: New Burdens Funding			
2017/18	2018/19	2019/20	Total Allocation
£47,246	£43,277	£45,747	£136,270

In addition, to the above, all local housing authorities were allocated £9,200 as a one-off payment towards new ICT costs in relation to the new legislation. We used this money to pay for new homelessness ICT software.

Consultation

We consulted on the draft strategy for 7 weeks from December 2018 – January 2019.

We held a consultation event with Elected Members and our Portfolio Holder in October 2018, and have consulted widely with the public, internal stakeholders, public and voluntary sector partners and registered providers on the production of this revised version.

We consulted with partners as the strategy was being developed. Specific partners have also contributed data and verified findings as relevant.

HSL Track Record

Hollins Strategic Land – Delivery Track Record

August 2019

The table below shows HSL sites with outline consent which are completed or under construction:

SITE	HOUSEBUILDER	STATUS	OUTLINE CONSENT	RM APP SUBMITTED	BUILD START
Oxford Road, Calne, Wiltshire (83 units)	David Wilson Homes	Under construction	04/7/16	8/7/17	JUNE 18
Hill Lane, Blackrod, Bolton (110 units)	Rowland Homes	Under construction	26/4/16	19/12/16	NOV 17
The Street, Bramley, Hampshire (65 units)	Taylor Wimpey	Under construction	25/5/16	05/02/18	SEP 18
Southwell Road, Farnsfield (48 units)	Bellway	Under construction	12/4/16	24/2/17	DEC 17
Hoyles Lane, Preston (48 units)	Jones Homes	Under construction	02/10/15	03/01/17	OCT 17
Chester Road, Whitchurch (57 units)	Hollins Homes	Under construction	17/12/14	10/12/15	APR 18
Kepple Lane, Garstang (130 units)	Barratt	Under construction	11/12/14	11/08/15	DEC 16
Hathern Road, Shepshed (270 units)	Persimmon	Under construction	07/11/14	12/04/17	OCT 17
Cookes Lane, Northwich (74 units)	Stewart Milne	Completed	23/10/13	03/11/14	NOV 17
Forest Grove, Barton, Preston (65 units)	Rowland Homes	Completed	13/7/13	05/12/13	OCT 14
North of Eastway, Preston (140 units)	Barratt	Completed	13/03/14	10/06/16	JUL 17
Eastway, Fulwood, Preston (22 units)	Hollins Homes	Completed	5/12/13	29/10/14	JAN 16
Lightfoot Lane, Preston (70 units)	Persimmon (Charles Church)	Completed	27/10/11	06/07/12	APR 14
Crewe Road, Alsager, Cheshire (65 units)	Miller Homes	Completed	18/01/13	28/3/13	MAY 15
Wheelock, Sandbach (41 units)	Taylor Wimpey	Completed	-	-	-
Hesketh Bank, Lancashire (35 units)	Rowland Homes	Completed	-	-	-
Grove Farm, Chorley (75 units)	Bellway	Completed	-	-	-

It takes on average around 12 months to submit a reserved matters (RM) application from outline consent, but in some instances only 2 or 5 months. On average, more recently, building is starting within 2 years from outline consent.

In addition, HSL can contractually oblige housebuilders to submit RM much quicker than would normally be the case if the housebuilder gained the outline consent themselves. This can be for several reasons: open marketing is a much more competitive process, with various housebuilders trying to outbid each other, as well as landowner seeking a return sooner. It is in HSL's interest to have reserved matters submitted as quickly as possible, either ourselves through our sister company Hollins Homes or a contractual arrangement to the housebuilder. HSL will also oversee and input our expertise into any RM application so the process is smoother and faster.

						Percentage	5%	22%	20%	54%
SHMA Table (policy BSC4)						Percentage	15%	30%	40%	15%

Note: 4-bed figures also include 5-bedroomed dwellings

Note: Site 4 provides 44 dwellings (RM for 45 and demolition of existing dwelling (existing dwelling size unknown))

Note: AMR states site 6 provides 61 dwellings but RM approval for 58

Note: Site 11 is McCarthy and Stone scheme (AMR states 20 dwellings, RM approval secures 30 net)

Note: total figure of 593 does not match with 39 + 190 + 138 + 223 – to be checked # (Now checked and sorted)

Extract from site 4 off report –

The development proposes a range of 2, 3, 4 and 5 bedroom dwellings which in officers' view constitutes a suitable mix. Whilst the scheme features a relatively high proportion of 3 bedroom dwellings, the Oxfordshire SHMA concluded that Cherwell District had a greater proportionate need for 3 bedroom dwellings than the rest of the county and so officers consider the mix and type of housing provided to be appropriate and in general accordance with the requirements of Policy BSC4.

State of District Housing

Cherwell

DISTRICT COUNCIL
NORTH OXFORDSHIRE

Cherwell District Council

State of the District's Housing 2018

CONTENTS

- 1. Introduction 3
- 2. People: our population, housing demand and local housing need..... 4
- 3 Place: Our housing stock and housing supply 20
- 4. Conclusion..... 37
- Appendix 1: 2017/18 Lettings by location and property size..... 38

1. Introduction

Cherwell district lies in the South East of England at the north-eastern edge of Oxfordshire. The district is predominantly rural in character covering an area of 227 square miles. There are two major towns, Banbury and Bicester, Kidlington (a large village) and 72 smaller villages.

This State of the District's Housing Report provides an evidence base regarding housing issues across the district. It outlines some of the key findings about housing needs in the district and informs our new Housing Strategy.

The report covers the main aspects of the local housing market, including housing need and demand, the condition of the housing stock and affordability issues. It sets out the housing challenges, threats and opportunities for the district. The report presents various data sets and provides a commentary to illustrate what the data means in terms of future planning and housing delivery.

This report does not include detailed homelessness data as this area was covered in a comprehensive review of homelessness undertaken between December 2017 and April 2018. This homelessness review informed our new Homelessness Strategy 2018-2020 and can be found at <https://www.cherwell.gov.uk/info/55/strategy-policy-and-development/544/homelessness-review-and-strategy>

2. People: our population, housing demand and local housing need

2.1 Population and migration

Changes in population can occur either naturally (births and deaths) or through migration into and out of the area. Population growth and composition are important as they influence the amount, type and tenure of housing required in an area. This section uses data from the Office for National Statistics (ONS) mid-year population estimates 2017 (unless stated otherwise).

2.1.1 National Context

Before considering local data for Cherwell it is useful to look at the national trends, which can provide a useful baseline and additional context.

- The population of the UK at 30 June 2017 exceeded 66 million people (66,040,229), an increase of 392,000 people since mid-2016. This represents a growth rate of 0.6% per year, the lowest since mid-2004. The trend of decreasing national growth is expected to continue, as household size and fertility rates are expected to reduce over time. However, the population will continue to grow as life expectancy increases.
- 41% of the population growth occurred from natural change (births minus deaths) and 59% through net internal migration¹.

2.1.2 Local Context – Population Change

The current population of Cherwell district is estimated at 147,602. Since last year it is estimated that the population of Cherwell district increased by 967 (0.7% - this is above the 0.6% UK growth rate) from 146,635 to 147,602. By comparison the population growth for Oxfordshire over the last year was 0.6% (Oxfordshire's population is now 682,444). In the last year:

- There were 1,768 births and 1,256 deaths in Cherwell. This makes natural change (the difference between births and deaths) 512.
- There were 8,681 internal in-migrants and 8,397 internal out-migrants. This makes net internal migration 284.
- There were 1,054 international in-migrants and 936 international out-migrants. This makes net international migration 118.
- Changes to special populations (home armed forces, foreign armed forces and the prison population) increased the population of Cherwell by 59.
- 38% of the population of Cherwell live in the rural areas

For the first time since 2004 Cherwell has seen a net gain (+284) in the number of internal migrants (people moving from other districts within the UK). According to the ONS data, the majority of internal migrants in 2015/16 moved from Oxford. As Oxford is experiencing extremely high levels of housing unaffordability (among the highest in the country), this could be a significant driver.

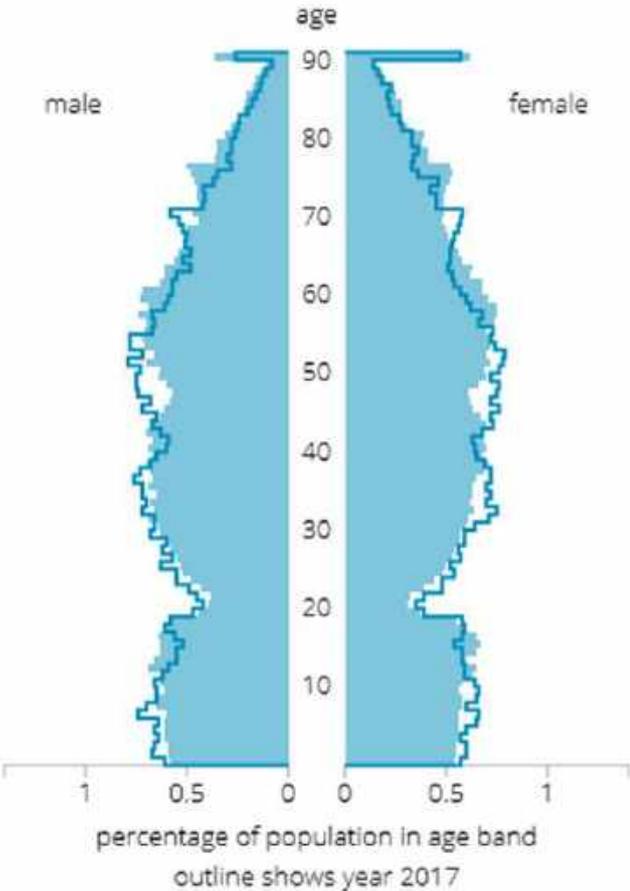

Net international migration is also a significant driver of population growth in Cherwell, and for 2017 it has been at its lowest levels (+118) since the ONS started publishing this statistic (2001-02). Nationally there has been a reduction in net international migration too. This is the first year where we have seen the potential effects of the Brexit vote in both local and national population statistics.

¹ *Internal migration definition* - Migration within the UK - Residential moves between different geographic areas within the UK sourced from the NHS Patient Register, the NHS Central Register (NHSCR) and the Higher Education Statistics Agency (HESA).

There are some notable changes relating to surrounding districts. Cherwell has a close economic relationship with Oxford City, so it is interesting to note that the population of Oxford has decreased by 710 (less than -0.5%). This is largely due to high levels of internal and international out migration from younger age groups (less than 30 years old).

2.1.3 Local Context - Population Age Profile - Population pyramids are an easy and simple way of viewing the internal distributions of gender and age characteristics within an area.

Population age structure by single year of age and sex for Cherwell, mid-2017 to mid-2023.
Source: Subnational population projections for England: (2016-based)

Cherwell’s population pyramid has some interesting features. In the higher age bands, there is a noticeable larger proportion of females than males. This is largely due to differences in life expectancy. However over time the ratio of males to females is expected to increase, reflecting a fall in the proportion of males who smoke or hold a higher risk occupation. There is also a significant (although historically consistent) decrease in the number of younger people aged 18-23. This is mainly due to further education students moving to university towns.

The 2017 median age of the population of Cherwell was 40.9 years compared to a national median of 39.8.

2.1.4 Population distribution - the population of Cherwell of 147,602, is located across the district as follows:

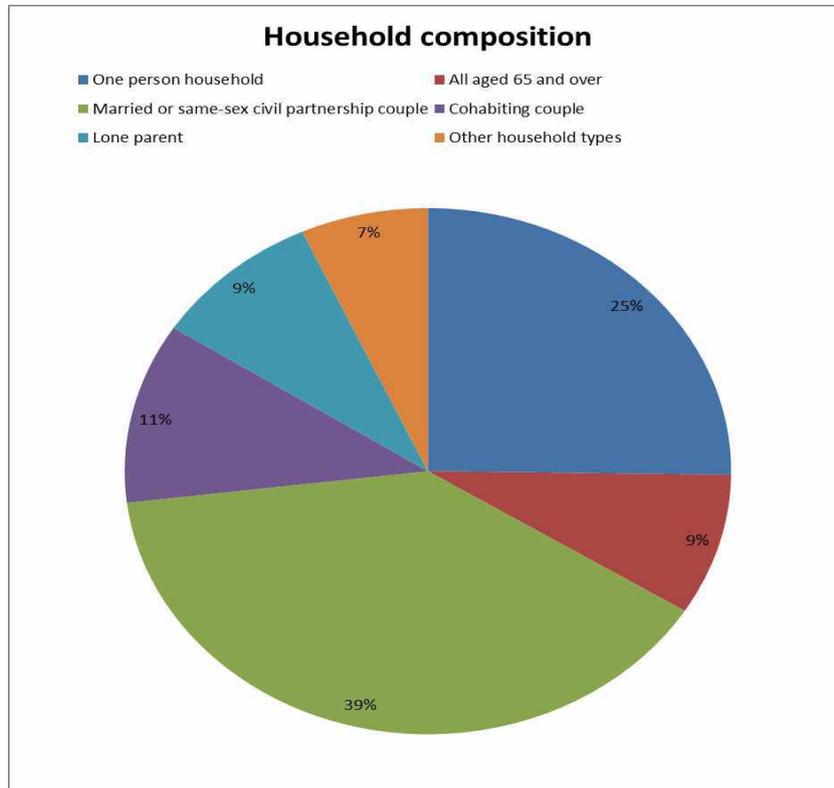

- Banbury: 47,710 (32%)
- Bicester: 30,910 (21%)
- Kidlington: 13,790 (9%)

- Other rural settlements: 55,192 (38%)

The population for Bicester has not fallen since the Census 2011 as the figure above suggests. The increase in housebuilding on the perimeter of Bicester is not included within the Census boundary definition, hence the apparent reduction in population.

2.1.5 Resident Population - Household Composition

The household composition of the district's population (Census 2011) is outlined below:

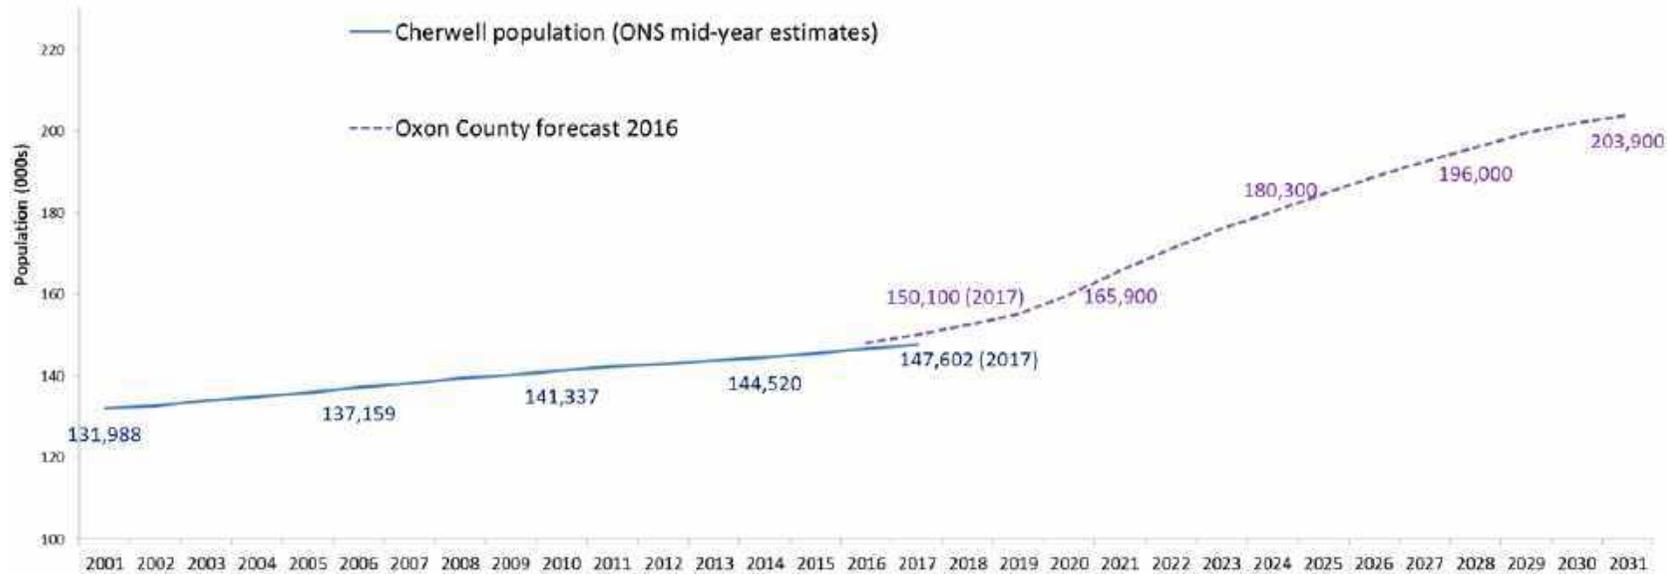

Half of the population are either married or co-habiting households under 65 years of age, and 25% (14,307 households) of the population are single person households under 65 years of age. The remaining 25% comprise lone parents (4,930 households), persons over 65 years of age (5,122 households) and other household types (3,858). Approximately half of married couples in the district have dependent children.

2.1.6 Future trends – Population and migration

There are different data sources we can refer to in relation to population forecasts: ONS mid-year population estimates; and Oxfordshire County Council figures. Both of these data sources predict that the population will grow but they differ in terms of the amount of population growth expected (see graph below).

Population time series - Cherwell population: estimates and forecast

Sources used:

Oxfordshire County Council Forecasts - <http://insight.oxfordshire.gov.uk/cms/population-0> - This forecast comes from Oxfordshire County Council's Research and Intelligence Unit. Unlike the SHMA figures, these include the population effects of the reallocation of Oxford City's unmet housing need. This incorporation makes the figures vary from the SHMA population forecast which were undertaken prior to work around the unmet housing need.

ONS Mid year estimates - The mid-year estimates use the 2011 Census for the population base and the ONS then apply a method which incorporates natural change (births and deaths), net international migration and net internal migration, and other adjustments (for example, changes in armed forces numbers) to produce the annual estimates.

Oxfordshire County Council forecasts a population of 203,900 in Cherwell by 2031, an increase of 38%. These population forecasts take into account the ambitious homebuilding outlined in the Local Plan for the council, which is the main driver for the forecast increase in population.

The Office for National Statistics (ONS) population projections which are entirely based on trend data and do not take into consideration the housebuilding of local authorities, predicts growth for the next 25 years will be approximately 8.7%. This means the population would be 160,443 in 2043.

2.1.7 Indices of Multiple Deprivation

Cherwell is a relatively affluent district which ranks positively for many socio-economic measures, for instance unemployment, life expectancy, and homelessness. However, these district wide statistics often stand in contrast with pockets of deprivation found within Cherwell; these geographical areas of inequality are highlighted by the Indices of Multiple Deprivation 2015², with the highest areas of deprivation particularly focused in the Banbury area. Banbury contains 4 Local Super Output Areas (LSOAs) in the highest quintile (20%) of deprivation nationally. These LSOAs are clustered within the “Brighter Futures in Banbury” wards of Ruscote, Neithrop and Grimsbury & Castle.

Bicester also contains areas of deprivation; however these LSOAs are not as concentrated as in Banbury, making a directed ward-centric approach to address the deprivation (similar to that of “Brighter Futures in Banbury”) more difficult.

2.2 Local Housing Demand and Need

2.2.1 Demand

Historically there has been strong demand for housing in Cherwell district. The growing population and decreasing household sizes is set to increase demand further.

2.2.2 Need for affordable housing

The main source for identifying housing demand and need in Cherwell district is the Oxfordshire Strategic Housing Market Assessment. This provides projected annual need for market and affordable housing in the area.

In the urban areas (mainly Banbury and Bicester) this, together with housing register data (house type/size requirements for a specific area) is generally sufficient as a guide to housing need.

In the rural areas a variety of sources will be considered to determine an appropriate affordable need/housing mix. This includes looking at:

- The existing affordable homes stock profile
- The housing register
- Neighbourhood plans
- Parish level housing need surveys

Currently, parish level housing need surveys are usually parish/developer led, that is they are carried out by the council on request, rather than the council initiating the work. This happens

² The English Indices of Deprivation 2015 is the most recent official measure of relative deprivation across small areas of England (LSOAs are used). A higher score indicates that an area is experiencing high levels of deprivation. It is important to note that the IMD is primarily designed to compare rankings between LSOAs, and as such there are some limitations when using it to measure deprivation. An area may have become less deprived in absolute terms, but more deprived relative to other areas in England so may show as being more deprived in the IMD scores.

to either support or refute a perceived need for affordable housing in the local community and are a material consideration in determining the outcome of planning applications.

2.2.3 Strategic Housing Market Assessment

The Oxfordshire Strategic Housing Market Assessment (SHMA) is a crucial part of the evidence base that informs policy and helps strategic thinking in housing and planning. The SHMA provides an assessment of the future need for housing based on facts and unbiased evidence. The latest version was published in 2014 and identified a need for between 93,560 and 106,560 additional homes across Oxfordshire over the period 2011–2031. This overall need for new homes has been broken down at a local authority level.

Housing Needed per Year (2011-31)	Housing Need per year (net)	Midpoint of Range
Cherwell	1090-1190	1140
Oxford	1200-1600	1400
South Oxfordshire	725-825	775
Vale of White Horse	1028	1028
West Oxfordshire	635-685	660
Oxfordshire	4678-5328	5003

As well as considering the overall need for housing, the SHMA considers what mix of housing is needed. It assesses the need for different types of affordable housing, for different sizes of homes (both market and affordable) and the needs of specific groups in the population, including older people.

The SHMA indicates a need to deliver 2,370 affordable homes a year across Oxfordshire on the basis that all households who cannot meet their needs in the housing market are allocated an affordable home (assuming that households will spend up to 35% of their gross income on housing costs). At a district level the amount of affordable housing necessary to meet the affordable housing need identified is 407 units per annum (this equates to 35% of overall delivery).

The assessment also indicates that the mix of affordable housing sought on development sites should be 25% intermediate housing³ and 75% rented. The rented affordable housing should be focused slightly more towards social rent than affordable rent. However, the assessment highlights that in setting policies and negotiating affordable housing provision on development sites the council needs to consider development viability, national affordable housing policy and funding availability. The Council therefore requires that 30% of the affordable housing on development sites should be for intermediate housing and 70% should be for rented.

As well as the type of housing required, the assessment concludes that the following size of homes across the housing market area is appropriate:

	1 bed	2 bed	3 bed	4 bed
Market	5%	25%	45%	25%
Affordable	25-30%	30-35%	30-35%	5-10%
All dwellings	15%	30%	40%	15%

³ The term 'intermediate housing' describes a range of homes for sale and rent provided at a cost above social rent, but below market levels subject to the criteria in the National Planning Policy Framework's affordable housing definition. These can include shared equity (shared ownership and equity loans), and intermediate rent. Homes that do not meet the National Planning Policy Framework definition of affordable housing such as 'low cost market' housing, may not be considered as affordable housing for planning purposes.

At an individual local authority level, there is a greater need for three bedroom properties in Cherwell. The assessment emphasises that it is expected that developers will deliver a balanced profile of market homes of different sizes including two and three bedroom homes for younger households and those looking to downsize, alongside larger family homes. It also highlights that affordable housing negotiations should be informed by the findings of the SHMA together with other evidence.

Unmet housing need – Following publication of the SHMA, Oxfordshire councils have collectively accepted that Oxford City cannot fully meet its own future housing needs. The other district councils in Oxfordshire (West Oxfordshire, South Oxfordshire, Vale of the White Horse and Cherwell) have committed to discussions on how that need might be sustainably met in their districts. This means that Cherwell district has to plan for its own housing need as well as a proportion of Oxford City’s housing need of 1400 dwellings per year.

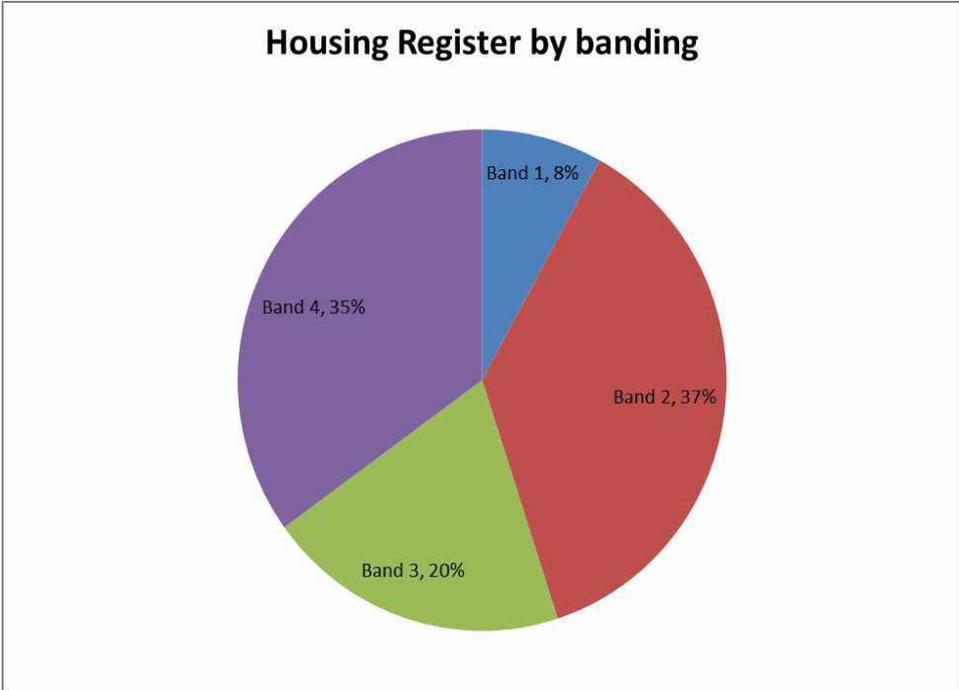

2.2.4 Housing Register

The number of active applications on the housing register fluctuates at around 1,000. This is a consistent trend that reflects how the housing register is replenished with new applications as applicants are rehoused. As at April 2018 there were 1,044 active housing register applications.

Applicants fall into one of four housing needs categories:

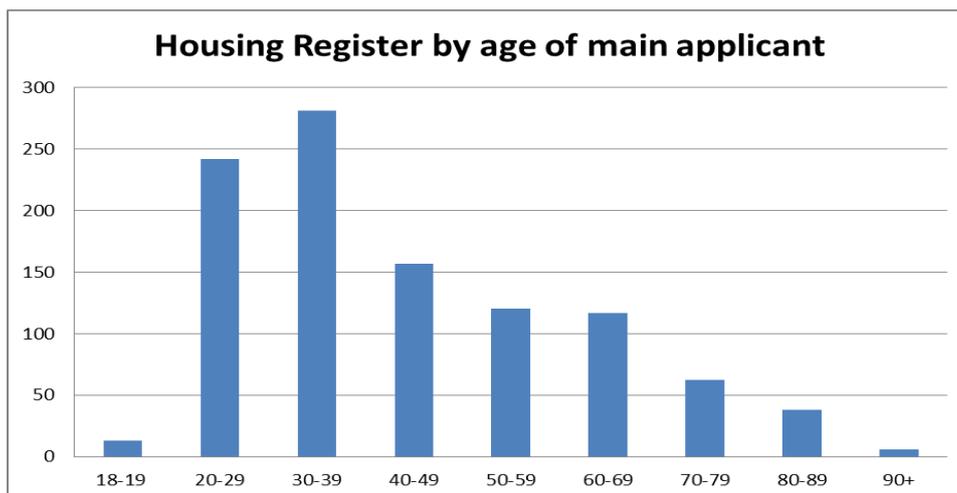

- Band 1 (Urgent need)
- Band 2 (Significant need)
- Band 3 (Moderate need)
- Band 4 (Low housing need)

Banding - all applicants accepted onto the housing register are assigned one of the four bands available, based upon an applicant’s housing and other relevant circumstances. The breakdown of applicants by banding is shown below:

The majority of applicants (65%) are in Bands 1 to 3. These are households assessed as being in priority housing need. The remainder (35%) are in band 4 (low housing need). These are households assessed as being adequately housed but are on a low income and would find it difficult to meet their needs on the open market.

Age - The age profile of lead applicants on the housing register is shown below:

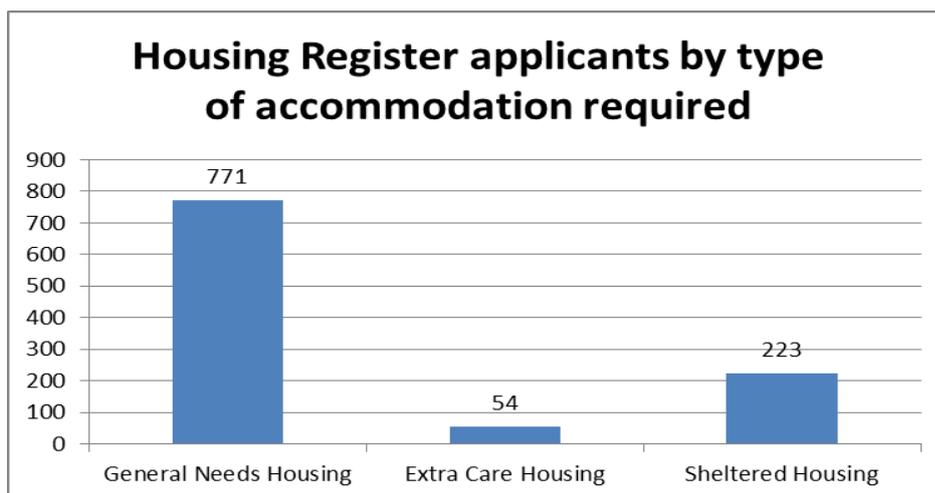

As at April 2018, there were relatively few lead/main applicants on the register under 20 years of age. There are significant numbers of applicants between the ages of 20-39. Beyond 40 years of age the number of applicants falls progressively with age.

Size & Type of housing need - The type of households on the housing register and the size of properties they require are as follows:

Household Type	Current Bedroom Need				Grand Total
	1	2	3	4	
Couple	36	3	0	0	39
Disabled	22	5	6	2	35
Family	6	332	142	37	517
Older Persons	243	12	4	0	259
Single	188	6	0	0	194
Grand Total	495	358	152	39	1044

The predominant households on the housing register are families (requiring two and/or three bedroom properties) and older people (requiring one bedroom properties). Over 80% of the properties needed by applicants are one or two bedroom.

The majority of housing register applicants (74%) require 'general needs' housing, but there is also significant need for supported housing with 26% of applicants needing either sheltered or extra care housing. Further information on the needs and availability of accommodation for older people is included later in this section.

Where do applicants want to live? – housing register applicants are able to specify as many areas as they wish for potential re-housing and there is no limit to the number of locations that they can select. The current system does not allow applicants to select a preferred village for re-housing. Therefore the ability to use the housing register to inform affordable housing location requirements on new developments is limited.

The most requested places to be re-housed are Banbury, Bicester and Kidlington. The village locations in the district which are most requested are:

- Adderbury
- Ambrosden
- Arncott
- Bloxham
- Bodicote
- Deddington
- Drayton
- Launton
- Upper Heyford
- Yarnton

2.2.5 Requirement for Intermediate Housing

Shared ownership is the predominant intermediate product in the district. Shared ownership is available to people who cannot afford to buy a home on the open market and can help to make home ownership affordable for people on lower incomes. Purchasers buy a share of between 25-75% of a property with the opportunity to purchase further shares over time, known as 'staircasing' (restricted to 80% share in some rural areas). The remaining share is owned by a housing association (Registered Provider) and a subsidised rent is charged on the retained share of the property.

A register of people interested in shared ownership and other intermediate products is held by the "Help to Buy" agent for the South of England Region. There are currently 982 registered applicants for shared ownership properties in Cherwell district.

2.2.6 Self Build Register

The Self-Build and Custom Housebuilding Act 2015 places a duty on local councils in England to keep a register of people who are interested in self-build or custom-build projects in their area. This register will help us to understand the level of demand for self-build and custom-build plots in the district and enable us to develop a strategy for delivering serviced plots for self-build and custom-build projects. The register is split into two parts; Part 1 and Part 2.

Part 1 of the register is the number of suitable serviced plots that we must grant development permission for. As of October 2018 there are 18 households registered on Part 1 of our register.

Part 2 does not count towards demand for the purpose of the 2015 Act (as amended) but we must have regard to these entries when carrying out their planning, housing, land disposal and regeneration functions. There are 549 households registered on Part 2 of our register.

2.3 Housing Needs of Specific Groups in the Population

2.3.1 Older People

The SHMA considers the housing needs of specific groups within the population whose needs may differ from those of the wider population. This section uses data in the SHMA 2014 unless stated otherwise. When looking at the needs of older people the SHMA focuses on age groups from 55 upwards. Although in reality those aged 55 might not be considered 'old' the SHMA started the analysis from this age group due to the fact that some housing developments are specifically targeted at the over 55 age group.

Oxfordshire is expected to see a substantial increase in the population of older people with the total number of people aged 55 and over expected to increase by 49% over 20 years. A particularly high increase is expected in Cherwell. This to some degree is related to the higher overall population growth projected for the district. All areas of the county including Cherwell are expected to see the number of people over 85 increase significantly by 2031.

Projected Change in Population of Older People (2011 to 2031)

Age group	Cherwell	Oxfordshire
Under 55	21.2%	28.7%
55-64	32.4%	25.5%
65-74	61.6%	49.7%
75-84	76.7%	66.4%
85+	142.8%	126.8%
Total	31.1%	34.3%
Total 55+	58.0%	49.3%

Source:Oxfordshire SHMA 2014

The SHMA looks at the tenure of older person households. In Cherwell pensioner households are more likely to live in owner-occupied accommodation (71.5%). They are also more likely than other households to be in the social rented sector. The proportion of pensioner households living in the private rented sector is relatively low. Across all tenures older persons are more likely to under-occupy homes.

There are higher levels of disability and health problems amongst older people. The Joint Strategic Needs Assessment 2018 (JSNA) for Oxfordshire states that 83% of persons aged 85 or over have a disability and the highest rate in Oxfordshire is in Kidlington North. Attendance Allowance is a good indicator of disability and/or mobility problems. The JSNA highlights that in May 2017 38% of Cherwell residents aged 85 and over were receiving Attendance Allowance. The growing older population and the fact that these residents have higher levels of disability and health problems is likely to lead to an increased requirement for specialist housing options.

The SHMA analysis indicates a potential need for between 280-450 additional housing units of specialist accommodation across Oxfordshire each year to meet the needs of the older person population through to 2031.

The council's housing register also provides information on the level of need for specialist housing options. 21% of households on the housing register need sheltered accommodation, of which 94% require one bedroom properties. There is also a very small

need (5%) amongst households on the housing register for Extra Care accommodation. The level of support in Extra Care accommodation is greater than that for sheltered accommodation and the eligibility criteria includes passing a three way assessment process including the council's Housing Options Team, Social Care and the individual scheme manager. The low level of need for Extra Care retirement housing is surprising given the ageing population, but could be a reflection of the lack of awareness of the availability of this type of accommodation and who is eligible for it.

2.3.2 Disability

Disabled people often have housing needs that differ from those of the wider population. It should be noted that an analysis of disabled people is very strongly linked with the above analysis of older people. The SHMA states that 13.7% of the population in Oxfordshire have a long-term health problem or disability. It also shows that 21.7% of households in Oxfordshire contain someone with a long-term health problem or disability. Both of these figures are below the regional and national averages.

Households and people with a long-term health problem or disability (2011)

Area	Households containing someone with a health problem		Population with a health problem	
	Number	%	Number	%
Cherwell	12,522	22.1	20,072	14.1
Oxfordshire	56,264	21.7	89,756	13.7
South East	839,086	23.6	1,356,204	15.7
England	5,659,606	25.7	9,352,586	17.6

The SHMA compared age with the prevalence of a long-term health problem or disability, and clearly showed the correlation between the two. The assessment then went on to consider age specific prevalence rates with population projections. This showed the number of people with a long-term health problem or disability will increase by 50% by 2031. The vast majority of this increase (76%) is expected to be in age groups 65 and over.

Disabled Facilities Grants and Discretionary Grants and Loans - Perfectly good homes can be quite unsuitable for occupants with mobility needs, to the extent that they can be dangerous and isolating. Adaptations are needed by many disabled people so that they can remain safe and independent.

A Disabled Facilities Grant (DFG) is a 'means-tested' financial grant that helps meet the cost of adapting a disabled person's home. An occupational therapist from the county council will usually decide what adaptations are necessary and appropriate to meet the disabled person's needs.

In 2017/18, 90 'mandatory'⁴ DFGs were completed using the in-house Home Improvement Agency, at a total cost of £771,000. Assistance was provided across a wide range of age groups, although over half (61%) of the grants provided were to those over 65 years of age:

⁴ Mandatory DFGs are those that the council are obliged to provide in accordance with the Housing Grants, Construction & Regeneration Act 1996. This is when works are judged necessary and appropriate to meet as disabled person's needs, if those works are reasonable and practicable. Grants are subject to a means-test (except in the case of children) up to a maximum of £30,000 and must be approved within set timescales.

Mandatory DFG recipients by age 2017/18

Age	Number
18 and under	7
19 - 65	28
66 - 79	28
80 and above	27
Total	

The type of adaptation carried out varies. The cost of each adaptation can also vary significantly depending on the nature of the property and the person's needs. The table below provides a summary of the works completed for 2017/18 and the typical amount of grant paid per adaptation. Grants are capped at a maximum of £30,000 and so a financial contribution is required from the applicant in some cases where the cost of works exceed this amount.

Type of work	Number*	Typical grant contribution
Level access showers	48	£4,500
Internal/external access (including ramps)	22	£5,000
Straight stairlift	14	£2,000
Major adaptations (including 1 through floor lift)	10	£30,000
Curved stairlift	6	£4,000
Specialist WCs	2	£4,000
Cubical shower	2	£7,000
Adapted kitchen	2	£8,000
Over bath showers	1	£1,000
Ground floor WC	1	£3,000
Shower pressure	1	£1,000

*the number of individual works is likely to exceed the total number of grants as each grant may contain multiple works.

Comparison of timescales to complete different works can be difficult. There can be a number of factors which might cause delay that are outside the control of the local authority and/or Home Improvement Agency. Multiple adaptations can also be installed which affects timescales. However, where single adaptations were installed during 2017/18, the time taken from application to completion was generally under two months for level access showers and stair lifts. Adaptations relating to access, including ramps, were generally quicker and usually took less than one month from application to completion.

Discretionary Grants and Loans – As well as mandatory DFGs the council also provides discretionary DFGs. These are primarily provided in urgent, end-of-life cases or relocations where the mandatory DFG system would not meet the applicant's needs. In 2017/18 the council completed 18 discretionary DFGs at a total cost of £73,000.

2.3.3 Supported Housing Requirements

Cherwell has a diverse range of supported accommodation for different client groups. The breakdown of accommodation by client group (not including older persons housing) is as follows:

Client group	Number of units in District	Percentage of supported housing stock	Comments
Learning Disability	82	29%	Commissioned provision
Single Homeless People	13 plus 11 additional units in Oxford City	10%	These are district local units. Additional units commissioned for Cherwell residents are situated in Oxford City
People with mental health issues	31	13%	These are beds within the mental health transitional pathway
People with physical disabilities	33	13%	Schemes with on-site support
People with drug and alcohol needs	14	6%	Although this is situated in Cherwell it takes referrals from all over the country
Vulnerable young people including young parents	61	24%	Young people's pathway
Domestic Abuse (Refuge)	12	5%	Commissioned provision
Total Provision	257		

Supported housing for people with Learning Disabilities - Housing for people with learning disabilities is commissioned by the county council and mostly provided by registered providers. It is the primary responsibility of the Adult Services Team but they work closely with the Children's Services Team to plan for children with a learning disability as they reach 18. There is a need for a diverse range of accommodation, including provision for complex needs and autism and accommodation for people with lower support needs. There is a move away from the shared house arrangement to clusters of self-contained housing which enables greater independence and efficiencies in the way care is delivered. This means that there is a need to recommission a number of units as well as provide for new needs:

	Total	18/19	19/20	20/21
Current provision	82			
Re-provision requirements	26	12	12	12
New requirements	4	4	0	0
Total requirements	30	16	12	12
Pipeline	6	16	0	0
Current shortfall	24	0	12	12

Single Homeless Provision - The pathway now consists of 11 beds in an Oxford hostel for people with complex needs and 13 beds situated within Cherwell for people ready to move-on but which includes one bed for emergency assessment for people who have been verified as rough sleeping.

In 2020 the funding for this current pathway comes to an end and work is on-going to consider how the service can be funded moving forwards.

There remains a small but entrenched group of rough sleepers who are not engaging with services.

Supported housing for people with Mental Health issues - There is a clear link between mental health issues and poor housing provision. Research has shown that those who are homeless, or at risk of homelessness, are much more likely to experience mental distress. Provision of the right housing with the right support can help to reduce homelessness. Mental ill health is different for each individual, and problems can occur at any point in our lives. As a consequence of these diverse needs, housing solutions must be equally diverse. This requires taking into account the different types of support that people need and how that changes over time.

Most mental health services are delivered outside of a supported housing setting. However some people need supported accommodation. The district is part of a countywide mental health project. There are 31 bedspaces in Cherwell commissioned by the Oxfordshire Clinical Commissioning Group and Oxfordshire County Council. These are predominantly shared housing with more self-contained accommodation at Palm Court in Bicester. Current provision consists of the following units

Scheme	Number of places
Easington Gardens, Banbury	3
Springfield Avenue, Banbury	3
Gillet Road, Banbury	3
Whykham Place, Banbury	2
Oxford Road, Banbury	9
Palm Court, Bicester	8
Tweed Crescent, Bicester	3
TOTAL	31

These units meet a variety of needs but with a view that people will eventually move through the pathway to general needs accommodation with support as required.

There is a shortfall in mental health provision for specific groups. These include:

- people with challenging behaviour
- people with complex needs/dual diagnosis
- older people with mental health issues

The Clinical Commissioning Group and Oxfordshire County Council are currently working on a five year plan looking at the future requirements of mental health services.

Supported housing for people with Physical Disabilities - the majority of people with a physical disability can be housed in general needs accommodation with appropriate adaptations and accessibility standards. However there is a need for provision for people with greater care and support needs. The district currently benefits from the following provision:

- Agnes Court, Banbury (23 units)
- Hanwell Chase, Banbury (5 units)
- Old Place Yard, Banbury (5 units)

The current provision for people with physical disabilities is now adequate but we will continue to work with the county council on emerging new needs.

Provision for those with drug and alcohol issues - In general, admissions to hospital for alcohol related issues are below the national average.

General support services for residents with drug and alcohol issues are provided through Turning Point hub in Banbury.

There is a therapeutic community situated within Cherwell called The Ley Community. This takes residents from across the county and beyond and is not specific provision for Cherwell residents.

Supported housing for Vulnerable Young People - Cherwell provides three pathways with accommodation in the district:

- Young parents
- Single young people
- Young people with more complex needs

Young people are encouraged to remain at home and therefore the pathway caters for those who are most need in terms of their needs and housing situation. The current provision is as follows:

	Young Parents	Single Young People (shared accommodation)	Young people with complex needs
Rachel House, Banbury	11 rooms		
Lucan House, Bicester	3 flats		
Dashwood House, Banbury (Step down from Rachel House)	9 units		
The Foyer, Banbury		26 units (shared)	
Oxford House, Bicester		9 units (shared)	
Key 2 units, Banbury			3 units (self-contained)

In general the provision is adequate to meet the need, however some residents currently become stuck in accommodation that they no longer need due to lack of suitable move-on provision. Oxfordshire County Council are currently working on a strategy in conjunction with the district councils to improve housing for young people. This should identify any gaps for vulnerable young people.

Refuge provision for domestic abuse services - In 2015/16 11% of people seeking housing advice in Cherwell had experienced domestic abuse. Following a review of the domestic abuse service in Oxfordshire services have been recommissioned with a total of 21 bed spaces being required including five dispersed units. At present Cherwell has 12 units within a refuge. Work needs to continue to identify the required accommodation provision for the service.

Gypsies & travellers - a joint accommodation assessment for gypsies, travellers and travelling show people was undertaken in June 2017 across all the district councils in Oxfordshire. This took account of a change in the planning definition (PPTS 2015) which no longer includes people who have ceased to travel permanently. The results of the needs assessment were recorded in the Annual Monitoring Report for 2016/17.

There are currently 57 Gypsy and Traveller pitches in the district, with a requirement for 29 additional pitches to be delivered from 2017 to 2031. Sites will be identified as part of Local Plan Part 2. Five additional pitches already have planning permission and a further two applications for eight pitches at Chesterton and for six pitches at Piddington are awaiting determination.

There are currently 14 plots for travelling show people, with a further 19 plots required between 2017 and 2031. There are no new plots currently identified and this work will need to be carried out as part of Local Plan Part 2.

Key Workers - The need for key worker housing is high across the county, particularly in Oxford City. There is a particular need for workers in Health & Adult Social Care. A survey was carried out in 2017 which found that 79% of the workforce in these areas is female and 53% are in the 35-54 age group, 40% of Health Staff and 30% of staff in Adult Social Care stated that they needed to move house within the next 2 years, of these 39% wanted a 2 bedroom property and 32% wanted a 3 bedroom property. The survey also found that 60% of respondents were interested in home ownership but in reality only 13% would be able to afford the monthly mortgage payments.

The existing and emerging Local Plans across Oxfordshire do not include a definition of key worker and rely on Housing policy documents. Cherwell's Housing Allocations Scheme has a definition and allocates 1% of housing to this group on an annual basis.

Given the different stages of Local Plans and the adopted allocations schemes in each of the Oxfordshire authorities it is not possible to achieve an Oxfordshire-wide standard definition of key workers. However the housing that is required to meet Oxford's unmet need will be expected to include specific provision for key workers using Oxford City's definition.

3 Place: Our housing stock and housing supply

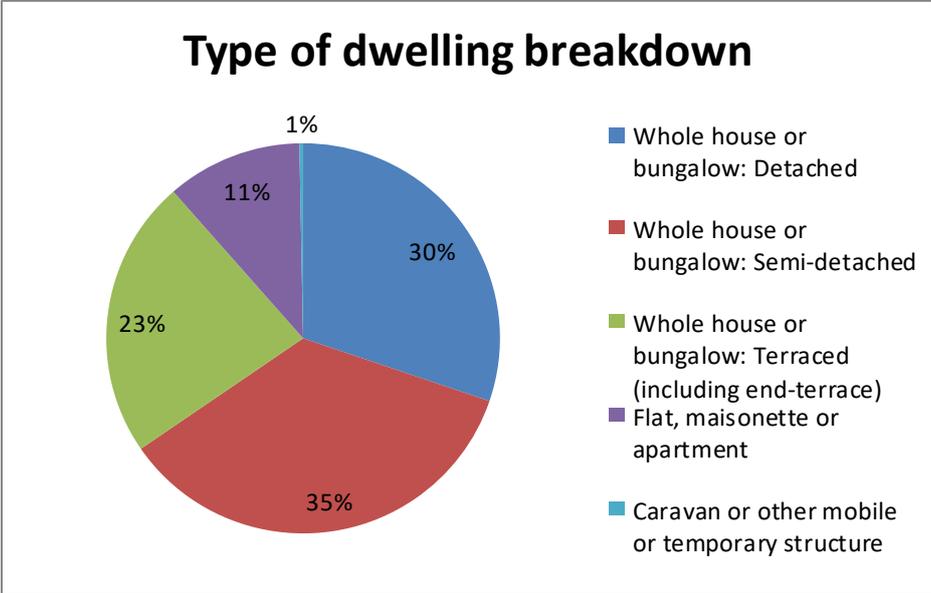

3.1 Existing Housing Stock

In 2017 Cherwell District Council commissioned the Building Research Establishment (BRE) to complete a stock modelling survey and this was published in March 2018. This section refers to the findings of the survey unless stated otherwise.

3.1.1 General characteristics of the existing housing stock

The total number of dwellings in Cherwell is 66,693. The tenure of these dwellings is 66% owner occupied, 22% private rented and 12% social rented. This compares to 63% owner occupied, 20% private rented and 17% social rented at a national level (English Housing Survey 2016-17).

The Census 2011 provides data on house types. The most common dwelling type in Cherwell district is semi-detached houses, followed by terraced houses and then detached houses. Flats account for (15%) of the total stock.

Source: Census 2011

3.1.2 House prices and affordability

Affordability is an issue across many parts of the country, particularly the south of England. The latest English Housing Survey states that in 2016/17 the average age of a first time buyer was 33 years. The average deposit for a first time buyer was £48,591 and 35% of first time buyers funded their deposit from financial help from friends and family.

The attractiveness of Cherwell district as a location means that house prices are high and affordability of housing is a key issue. The housing market in Oxford has a significant impact on Cherwell’s housing market with housing being less affordable in the south of the district (parts of the district closest to Oxford e.g. Kidlington).

Average House Prices		
Year	Average House Price	% increase from previous year
2014	£236,590	6.00%
2015	£261,262	10.43%
2016	£285,349	9.22%

2017	£287,476	0.75%
2018 (as at December)	£288,573	0.38%

Source: HM Land Registry

The average house price in Cherwell as at December 2018 was £288,573. The average house price has increased steadily during the past five years and by 22% since 2014. Some local people experience significant affordability issues as a result. One of the key issues affecting affordability of housing is the gap between household incomes and house prices. The table below shows the lower quartile average house prices for the district. Lower quartile house prices are a good measure of affordability as they indicate the price of an entry level property into the housing market (the type that young people may purchase as their first property).

Lower Quartile Average House Prices		
Year	Lower Quartile Average House Price	% increase from previous year
2013	£181,829	2.16%
2014	£192,500	5.87%
2015	£207,493	7.79%
2016	£230,052	10.87%
2017	£248,379	7.97%

Source: ONS

An accepted measure of affordability is to observe the relationship between the house prices and income. The median house price in Cherwell in 2016 was £292,250 (HM Land Registry). In 2016 the median gross annual workplace based earning for Cherwell residents was £31,599 (Nomis Annual Survey of Hours and Earnings, Office for National Statistics 2016). Therefore, the ratio of median house price to median gross annual workplace based earnings is 9.25. Another measure of affordability is access to mortgage finance, the industry standard is that lender will provide up to 3.5 times a household income as a mortgage. Based on the average earnings outlined above, a single person household would only be able to raise £110,597 mortgage finance which would mean without assistance homeownership is unattainable. A double income household on average earnings (i.e. 2 x £31,599) would still only be able to raise £221,193 mortgage finance which would mean accessing homeownership even for properties at the lower end of the market would be challenging. Over recent years, a lack of availability of mortgages and the high levels of deposits required has further hampered first time buyers. Although lenders now appear more willing to provide access to finance purchasing a house is still beyond the reach of many people in the district.

3.1.3 Stock Condition and Housing Standards

Health and Safety Hazards - The council has a statutory duty to take action in response to a range of hazards identified as 'Category 1 hazards' by means of the Housing Health and Safety Rating System (HHSRS). Category 1 hazards are considered to be serious health hazards. The Council has also determined that it will use its discretionary powers to take action in relation to certain Category 2 hazards as well. The Private Sector Housing (PSH) Team undertakes both pro-active and reactive work and hazards are addressed using both enforcement powers and by provision of grants and loans in some cases.

The BRE reported in March 2018 that in Cherwell an estimated 6,638 dwellings in the private sector (owner occupied and private rent) have a Category 1 hazard, this equates to 11% of all private sector properties in the district. 1,347 dwellings in the private rented sector are estimated to have a Category 1 hazard, this equates to 9% of properties in the private rented

sector. The highest concentrations of all HHSRS hazards in the private sector are found in the wards of:

- Cropedy, Sibford and Wroxton
- Deddington
- Launton and Otmoor

In 2017/18 the Private Sector Housing Team resolved serious health hazards (Category 1 hazards) in 49 homes. In 27 of these cases the team took enforcement action to resolve the hazards and the other 22 hazards were resolved by means of various grants such as the 'Cherwell Energy Efficiency Project' grant and 'Landlord Home Improvement' grant. 14 homes with other hazards (Category 2) were also resolved.

Hazard resolution delivers measurable financial savings to both the NHS and society as a whole by reducing the need for acute health services that result from poor housing conditions. These savings can be quantified using the Housing Health Cost Calculator software produced by BRE.

In 2016/17 the PSH Team resolved 78 Category 1 hazards and 16 Category 2 hazards. This equates to annual cost savings of £116,000 to the NHS and £1,987,000 to society more generally.

Energy Efficiency – The Government's Standard Assessment Procedure (SAP) is used to monitor the energy efficiency of homes. It is an index based on calculating annual space and water heating costs for a standard heating regime and is expressed on a scale of 1 (highly inefficient) to 100 (highly efficient with 100 representing zero energy costs).

The average SAP rating for all private sector dwellings in Cherwell is estimated to be 59 which is worse than the average SAP rating of 62 for English dwellings (English Housing Survey 2016/17). In Cherwell the estimated average rating for owner occupied stock is 57 and for private rented stock 62. The average rating for all private sector dwellings in Cherwell district is 59 which equates to an Energy Performance Certificate (EPC) rating of D.

The EPC rating is another measure of a property's energy efficiency. An EPC is needed whenever a property is built, sold or rented. The Energy Efficiency (Private Rented Property) (England and Wales) Regulations 2015 establish a minimum level of energy efficiency for privately rented property in England and Wales. This means that, from April 2018, landlords of private rented domestic properties in England and Wales must ensure that their properties reach at least an EPC rating of E before granting a new tenancy to new or existing tenants. These requirements will then apply to all private rented properties in England and Wales even where there has been no change in tenancy arrangements from 1 April 2020. 9.5% (5,547) of all private sector dwellings and 6.2% (904) of private rented dwellings in Cherwell are estimated to have an EPC rating below band E (BRE stock modelling report 2018).

Loft and cavity wall insulation – Cherwell's private sector housing stock has an estimated 13,547 dwellings with un-insulated cavity walls and 8,565 dwellings with less than 100mm of loft insulation (BRE stock modelling report 2018).

As well as using enforcement powers, Cherwell's Private Sector Housing Team has other initiatives to help improve the energy efficiency of homes. During 2017/18 the council provided 15 Cherwell Energy Efficiency Project (CHEEP) grants to landlords at a cost of £8,000 to improve the energy efficiency of private rented accommodation. These grants usually contribute 25% (up to an agreed maximum) towards the cost of energy efficiency improvements such as upgrading heating systems, windows and insulation. In all cases where grant funding is agreed, adequate loft and cavity-wall insulation must be installed (unless certain exceptions apply).

In 2017/18 the council also contributed £7,000 towards joint funding the Oxfordshire Affordable Warmth Network (shared by all Oxfordshire authorities). This project provided telephone and email advice to 111 Cherwell residents (478 for the whole county) to help reduce their energy bills, improve the energy performance of their homes and discuss any financial help that may be available. In addition, 91 'interventions' took place including more in depth support and assistance or the provision of basic energy efficiency measures. £63,000 of funding for Cherwell residents was levered in through the network by signposting and direct referrals to a host of suitable grants and financial assistance schemes.

Fuel poverty - Since 2011 the 'Low Income High Costs' definition of fuel poverty has been used. This means that a household is considered to be in fuel poverty if they have to incur fuel costs that are above the national median level, which would leave them with a residual income below the official poverty line. The figures used to calculate fuel poverty take into account low income, high fuel prices, poor energy efficiency and under occupancy.

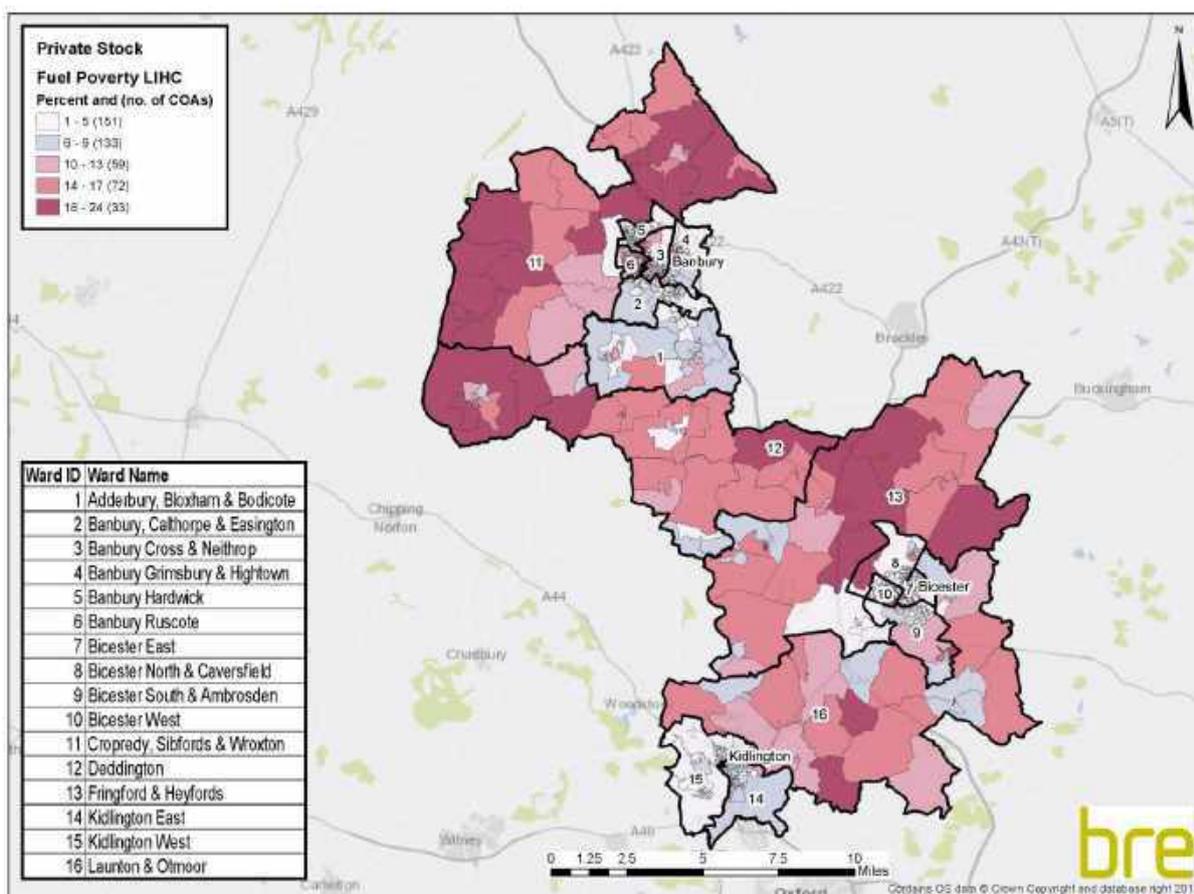

National data is produced by the Department for Business, Energy and Industrial Strategy (DBEIS), but fuel poverty is difficult for local authorities to determine at a local level because of practical problems of obtaining fuel use, fuel cost and income data. The latest fuel poverty statistics report from DBEIS published in 2018 refers to data from 2016. Headline figures include that:

- The average fuel poverty gap (the amount needed to meet the fuel poverty threshold) in England was estimated at £326.
- The proportion of households in England in fuel poverty was estimated to have increased by 0.1% from 2015 to 11.1% in 2016.
- Households with insulated cavity walls are least likely to be in fuel poverty.
- Older dwellings tend to have a higher proportion of households in fuel poverty.
- The level of fuel poverty is highest in the private rented sector.
- Those living in 'multi-person (adult) households' are deepest in fuel poverty with an average fuel poverty gap of £413 compared to a single person under 60 (£208).
- However, the highest prevalence of fuel poverty is seen for lone parents with dependent child(ren) (26.4%).

The BRE stock modelling survey 2018 estimates that 8% of all households are experiencing fuel poverty in the Cherwell district. This is less than the reported average of 11% for England as a whole. The estimates by tenure are presented in the table below. Whilst the private rented tenure shows the highest levels of fuel poverty (12% of all private rented households), because of the far greater number of owner-occupied dwellings overall (43,737) there are more owner-occupier households estimated to be in fuel poverty:

	Private sector stock				Social stock	
	Owner occupied		Private rented		No.	%
	No.	%	No.	%		
No. of dwellings	43,737	-	14,663	-	8,293	-
Fuel Poverty (Low Income High Cost)	3,162	7%	1,777	12%	631	8%

As shown on the map below, the highest concentrations of fuel poverty in the private sector are reported to be in the rural areas of Cropedy, Sibfords & Wroxton, Fringford & Heyfords and Deddington.

(BRE stock condition report 2018)

The source of heating can contribute towards fuel poverty. Whilst Banbury, Bicester and the area closest to Oxford have connections to mains gas, significant parts of the rural areas of district are not on the mains gas network. This means they have to rely on more expensive types of fuel such as oil, liquid petroleum gas (LPG) or electricity.

The typically lower energy efficiency ratings of private sector dwellings in some of the urban areas also further contributes to the higher levels of fuel poverty (BRE).

3.1.4 Empty homes

As of March 2018 there were 495 'long-term' empty homes in the Cherwell district. These are homes that had been vacant for more than 6 months, as presented in the table below:

Time empty	No.
> 10 years	3
5-10 years	37
2-5 years	49
1-2 years	225
6-12 months	180
Up to 6 months	693
Total empty	1187
Total long-term (>6m)	495

The majority of empty homes (approaching 60% in Cherwell) are brought back into use before they have been empty for six months, which means they are not considered to be 'long-term' empty properties. The work of the council's Empty Property Officer (a shared post with South Northamptonshire District Council) is focussed on these long-term empty

properties, which includes those that have been empty for a considerable time or have become problematic.

The table below details how many empty properties were brought back into use as a result of direct intervention by the council. These figures only include those cases where the council has provided specific help and assistance, undertaken enforcement, or has engaged with the owners over a period of time that has resulted in action:

	2016-17	2017-18	Total
Long-term empties returned to use	12	7	19

There are a variety of reasons why homes become empty, including death, inheritance, abandonment, relationship breakdown and/or lack of resources to tackle major repairs. The council has a range of financial measures to support owners, including Landlord Grants, Flexible Empty Homes Loans and a Leasing Scheme (in partnership with registered providers).

Many 'long-term' empty properties are returned to use through negotiation and persuasion; the key to this being establishing how the property became empty and determining what the barriers are to bringing it back into occupation. In some cases, enforcement action (including Empty Dwelling Management Orders) can also be considered, targeting properties causing most concern to neighbours and in areas of housing need.

3.1.5 Houses in Multiple Occupation (HMO)

The 2018 BRE stock modelling survey estimates there are 1,994 HMOs in Cherwell and 431 of these will now fall under the mandatory licensing requirements. On 1 October 2018 mandatory HMO licensing requirements widened to include all HMOs let to five or more occupants who form two or more households. Previously, these HMOs would only require a licence where the property was three or more storeys high (an estimated 84 properties). The number of storeys is no longer relevant in determining whether a licence is required.

In order to obtain an HMO licence the council must first be satisfied that the management arrangements for the HMO are suitable and the property meets the required health and safety standards. Failure to licence a licensable HMO is an offence and the council has a range of enforcement powers.

3.1.6 Discretionary grants and loans

The council offers a number of discretionary grants and loans to assist householders to improve the condition of their property. Details of the different grants and loans and usage of these in 2017/18 is outlined below:

Landlord Home Improvement Grants – grants of up to £15,000 are provided to contribute to a wide range of repairs and improvements, in return for the council receiving nomination rights to the properties. In 2018/19, 11 properties were improved at a cost of £83,000. As well as improving the housing stock these grants help provide suitable housing for statutory homeless households or those threatened with homelessness.

Flexible Home Improvement Loans (FHIL) – These loans are available to homeowners aged 60 or over to be used for a wide range of eligible improvements such as essential repairs and maintenance, central heating, replacement bathroom suites and kitchens, rewiring, burglar alarms and home security.

The loans are flexible because they can be repaid at any point, without penalty, with either regular or occasional payments. But they do not have to be repaid until the home is sold or

the owner ceases to occupy it. A low rate of interest is charged, linked to the Bank of England rate. The minimum interest rate is 3.5 percent and the maximum 7 percent.

In 2018/19, six homes were improved through FHIL at a cost of £53,000. This capital is not provided by the council but by FHIL which is a separate company of which the council is a member.

Small Repairs Service – Our small repairs service is available to owner-occupiers and tenants who are aged 60 or more, are registered disabled, or are suffering from long-term ill-health. We can help with a wide variety of small general repairs, such as fitting shelves, smoke detectors, key safes, grab rails or security locks. Or we can carry out minor electrical or plumbing work. Only small repairs up to two hours work can be completed and the cost of the service is £20 per hour, plus the cost of any materials.

In 2017/18, 247 households were assisted by the Small Repairs Service, with 130 key-safe jobs saving the NHS an estimated 910 bed-days to a value of £364,000.

3.1.7 Enforcement activity and complaints about landlords

During 2017/18 the Private Sector Housing Team:

- Received 423 enquiries which were responded to and/or referred to other sources. These enquiries were variable in nature, but typically included emails and phone calls seeking information about tenancy rights, property standards and grant availability.
- Dealt with 410 service requests that including ongoing case work and investigation. These are typically complaints about property hazards or disrepair, HMO standards, or issues relating to tenancy rights such as unlawful eviction.
- Carried out 84 HMO inspections, issued 24 HMO licences and accepted 34 landlord self-certified HMO reviews.
- Issued 66 formal or informal enforcement notices in relation to inadequate property standards.
- Undertook work-in-default in three cases.

3.2 Housing Supply

The district is currently going through a period of high growth, with a large number of strategic sites now under construction.

3.2.1 Overall numbers of housing completions

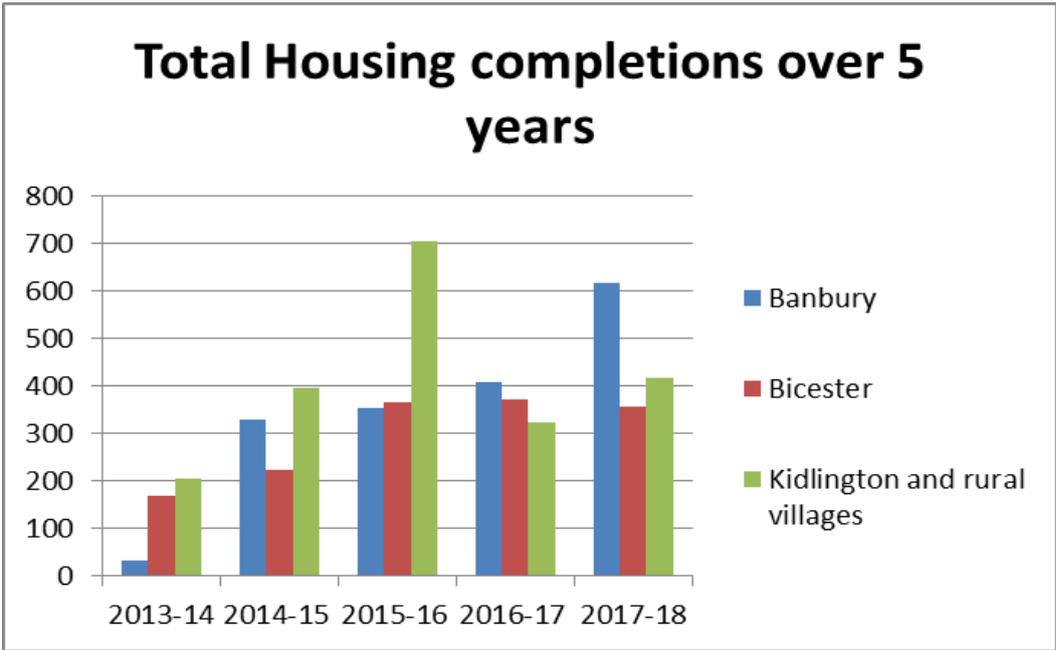

The table below shows the number of market and affordable dwellings that have been completed in the last five years (all figures are gross ie: do not take account of demolitions and sales disposals). As outlined earlier, the SHMA states the target for additional new homes in Cherwell per year is 1140, of this 407 should be affordable homes.

	2013/14	2014/15	2015/16	2016/17	2017/18	TOTAL
All dwellings	410	946	1425	1102	1387	4223
Affordable Housing	145	195	322	312	443	1417
% of affordable to market	35%	21%	22.2%	28.3%	32%	33%

The delivery of affordable housing has been strong and the number of additional new affordable homes built has increased year on year. Virtually all sites have delivered the full policy requirement of 30% affordable housing on sites of 11 homes or more in Banbury and Bicester and 35% affordable housing in the rest of the district. The high levels of delivery are due to the fact that affordable housing continues to be viable on S106 sites and most of the delivery takes place on larger sites where the provision of affordable housing is a policy requirement.

3.2.2 Location of housing completions

The majority of recent delivery has been on larger sites allocated within the local plan located in Banbury and Bicester. A total of 616 new homes were completed in Banbury in 2017/18. In 2015/16 there was a spike in rural delivery with 700 new homes completed in Kidlington and other villages in rural parts of the district.

3.2.3 Type/Size of housing completions

In recent years the council has started to record the type/size of homes build in the district. The most common type of dwelling built in the district in 2017/18 was four bedroom houses. There is an emphasis on larger properties as 34% of all new homes had four bedrooms or more (contrary to the 15% target for homes with four bedrooms or more in the SHMA).

Location	Completed dwellings by bedroom size (2017/18)				Total
	1 Bedroom	2 Bedroom	3 Bedroom	4 Bedroom +	
District wide SHMA target	15%	30%	40%	15%	
Banbury	66	85	113	132	396
Bicester	40	116	82	105	343
Elsewhere	40	80	79	133	332
TOTAL	146 (13%)	281 (25%)	274 (25%)	370 (34%)	1102* (3% unknown)

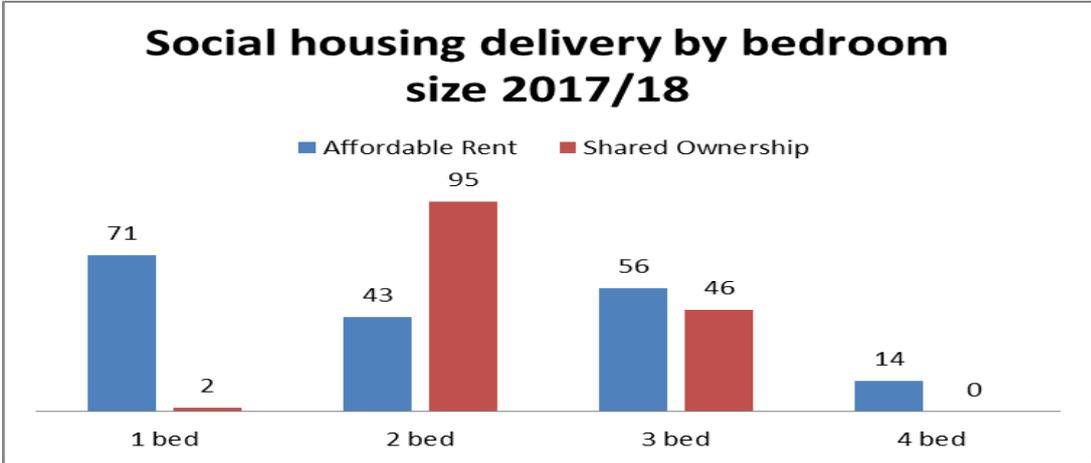

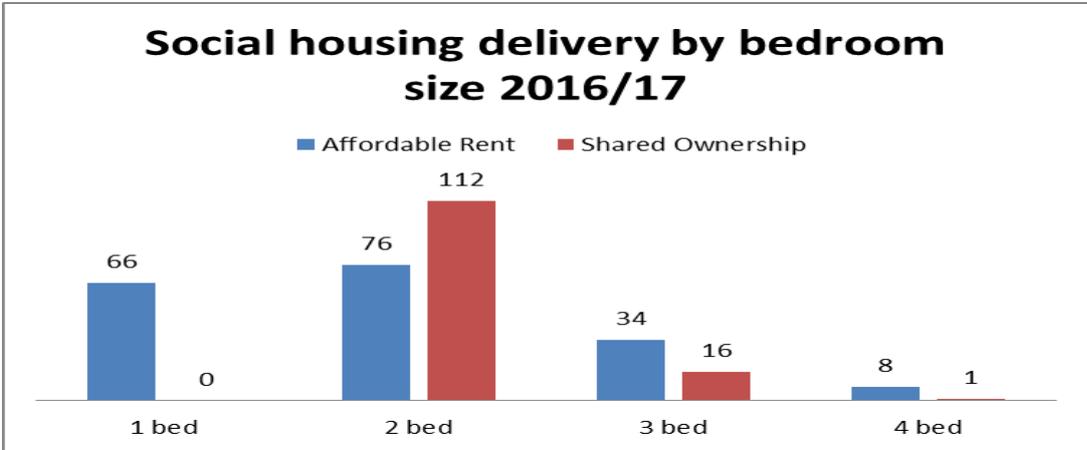

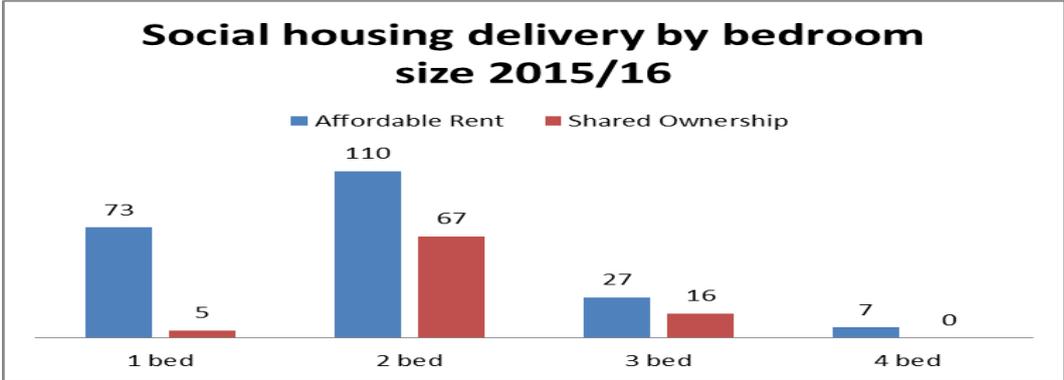

*There were 31 housing completions where the numbers of bedrooms were unknown

3.2.4 Tenure of affordable housing delivery

The council’s policy position is that new affordable housing will be 70% rented and 30% other forms of intermediate tenure. Over the past five years new delivery of affordable housing (1,417 units) has closely matched the council’s policy position with 67% of new affordable homes being affordable rent and 33% shared ownership .

3.2.5 Type/Size of affordable housing delivery

The graphs below show the type/size of new affordable housing that has been completed over the last three years (1 April 2015 to 31 March 2018). The delivery has been separated into rented and shared ownership.

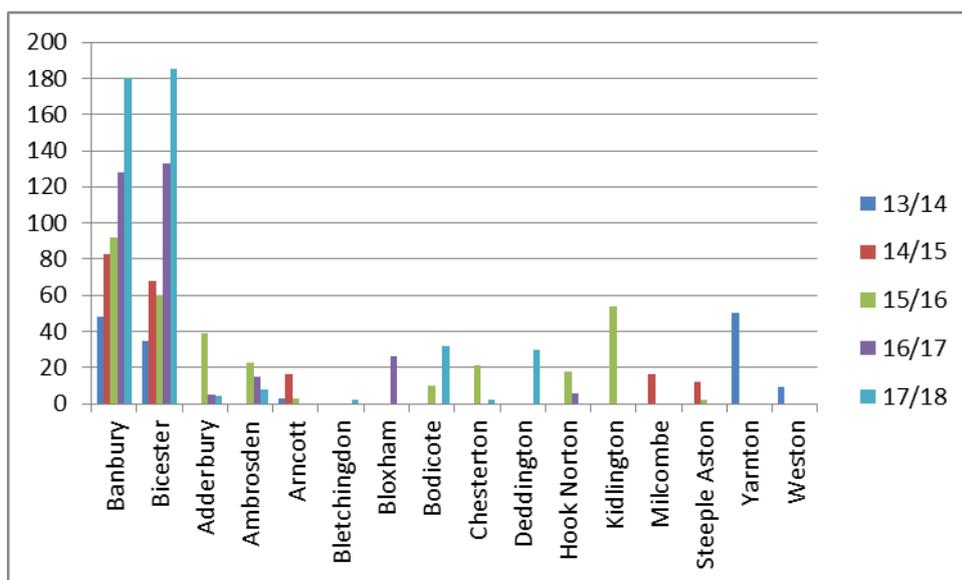

The table below summarises the delivery within Cherwell against the SHMA targets. There is some difference between the SHMA targets and delivery in Cherwell as this reflects local housing need. In particular there has been an emphasis on new provision of two bedroom homes to reflect the greatest need of those on the housing register and attempt to provide greater balance to the affordable housing stock which is predominantly three bedroom properties.

	SHMA figures	CDC provision
1 beds	25-30%	23%
2 beds	30-35%	53%
3 beds	30-35%	21%
4 beds	5-10%	3%

3.2.6 Location of affordable housing delivery

The bar chart below shows the location of affordable housing delivery over the period 2013 – 18. As expected this is predominantly in the larger areas of Banbury and Bicester. The areas of development broadly reflect the housing need hot spots identified in section 2.2.4 which suggests a direct correlation between demand and supply.

3.2.7 Affordability of shared ownership

The demand for shared ownership remains very strong, with average initial shares of 44% being purchased.

Shared Ownership sales		
Year	No of Shared Ownership sales	% share of property purchased
2014	16	47%
2015	38	54%
2016	155	49%
2017	24	50%
2018	125	44%

3.2.8 Standard of new affordable housing

The council normally requires the following standards on new developments:

- 100% of all rented units to be built to the government's Nationally Described Space Standard (Technical Housing Standards)
- 50% of the affordable rented units to meet the Building Regulations Requirement M4(2) Category 2: Accessible and Adaptable Dwellings requirement.
- 1% of new housing to be at wheelchair accessible standards (Building Regulations Part M (4)3)

3.2.9 Future housing delivery

There is a strong pipeline of housing delivery over the next few years. It is worth noting that future delivery is reliant on large strategic sites with planning permission being built out. These key strategic sites are outlined below:

Site	Total number of homes	Number of affordable homes
Heyford Park	1600	480
Kingsmere	1670	503
Southam Road East	533	173
Hanwell Fields	510	123
Warwick Road	300	90
Longford Park	1024	318
Graven Hill	1741	521

Anticipated overall housing delivery over the next three years is as follows:

	2018/19	2019/20	2020/21
Market housing	1,576	1,934	1,653
Affordable housing	585	457	478
TOTAL	2,161	2,391	2,131

It is anticipated that future new housing will be built in the following locations:

Location/Site	2018/19		2019/20		2020/21	
	Market housing	Affordable housing	Market housing	Affordable housing	Market housing	Affordable housing
Banbury	640	224	810	236	803	347
Bicester	396	188	710	87	665	54
Kidlington	13	0	40	0	0	0
Rural Areas	527	173	374	134	185	77

3.2.10 Innovation in new delivery

Build! – Build! is a team within Cherwell District Council that has registered provider status with Homes England.

Build! was created in 2012 with the aim of looking at alternative ways to deliver affordable homes for local people. To date Build! has provided over 248 homes including 146 rented and 102 shared ownership properties. Approximately 40 further homes are in the pipeline. Build! has used a variety of construction methods to achieve cost effective developments. The team has also converted a number of empty town centre properties.

Build! has a small housing management team that currently manages the rental properties, 60 of which are specialist supported housing units developed with support from Oxfordshire County Council.

Build properties currently in management

Scheme	Total units	Scheme type	Affordable Rent	Shared Ownership
Banbury	126	General Needs	85	41
Banbury	44	Supported	44	0
Bicester	62	General Needs	3	59
Bicester	11	Supported	11	0

Villages	5	General needs	3	2
TOTAL	248		146	102

Graven Hill – Graven Hill is the UK’s largest self and custom-build development and is located just south of Bicester. Over the next ten years the vision is to create a community which includes 1,900 unique homes, a primary school, pre-school and nursery, community centre and local amenities including shops, cafes and a local pub.

With over 20 households now living on the site, the Graven Hill community is starting to take shape. Over 30% of their bespoke homes are now sold or reserved on Phase 1a and they have just released 16 brand new designs for terraced and detached homes. In addition to this they have recently released one and two-bedrooms apartments which adds to the diversity of the housing provision available.

3.2.11 Affordable housing stock – General Needs

There are approximately 8,790 affordable homes owned by registered providers in Cherwell. Most of these properties (8,110 - 92%) are rented with a small proportion (680 – 8%) being shared ownership. The majority of stock in the district is owned by Sanctuary Housing, following two Large Scale Voluntary Transfers of former local authority stock in 2004 and 2005. Other large stockholders are Bromford, Paradigm, BPHA and Stonewater. The breakdown of bedroom sizes of the rental stock within the district is as follows:

Bedrooms	No of properties	% of total
1 bed	1,867	23%
2 bed	2,865	35.2%
3 bed	3,134	38.8%
4 bed	238	2.8%
5 bed	4	0.1%
6 bed	2	0.1%

The tenancy type of most of these properties is social rent (87%), with the remainder affordable rent (13%). The table below shows the location of these within the district:

Breakdown of rented properties by location		
Location	No of social rented properties	No of affordable rented properties
Banbury	3,563	335
Bicester	1,456	277
Kidlington	614	7
Rural Villages	1,435	423

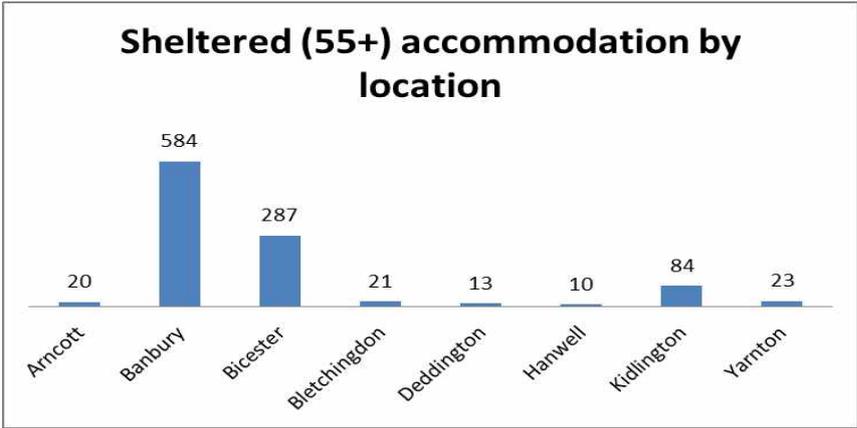

It is important to consider the affordability of rented affordable housing in the district. Rent level data has been collated for Sanctuary properties during the period April – October 2018. The average rent levels are shown in the table below:

Location	Weekly Rent Levels by Property size			
	1 bed	2 bed	3 bed	4 bed
Social Rent	£95.58	£104.65	£107.01	£127.96
Affordable Rent	£129.68	£155.49	£174.22	n/a
Percentage difference	26%	33%	39%	n/a

All of these rents are below BRMA levels, however there is a stark contrast between social and affordable rent levels, with the difference increasing with property size.

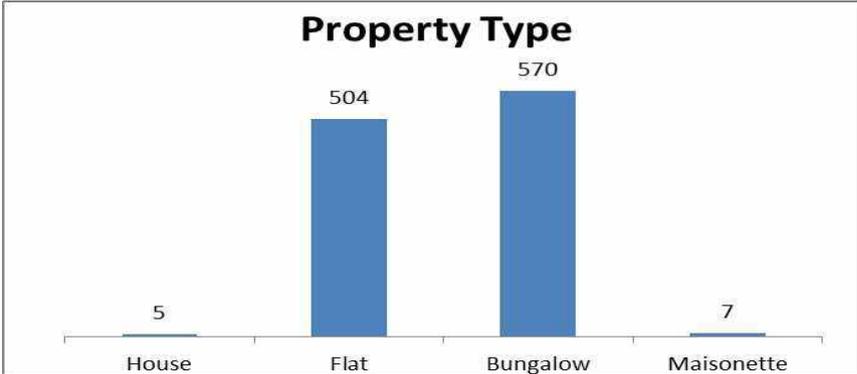

3.2.12 Affordable housing stock – sheltered and extra care housing

There are a total of 1042 units of sheltered housing accommodation across the district situated in eight locations, as shown in the chart below:

The majority (84%) of this type of accommodation is in Banbury and Bicester, with the remainder predominantly in the larger villages. It is clear that this accommodation is being provided in locations with good access to local services.

Property type/size – there are 752 one bedroom properties. These account for 72% of the total sheltered housing stock. Of the remainder, 278 (27%) are two bedroom properties and 12 (1%) are three bedroom properties. The majority are flats and/or bungalows.

Tenure – all of the sheltered accommodation is provided as social rented.

Extra Care - there are a total of 233 units of extra care accommodation in four locations across the district, as follows:

Extra Care Housing Stock	
Location	Number of units
Banbury	110
Bicester	20
Kidlington	54
Yarnton	49
Total	233

All of this accommodation is in locations with/close to local services, either Banbury/Bicester (55%) or Kidlington/Yarnton (outskirts of Oxford) (45%).

Property type/size – the Extra Care housing stock comprises 95 one bedroom flats and 138 two bedroom flats.

Tenure – the tenure of the Extra Care stock is as follows:

Tenure	Number of units
Affordable Rent	104
Social Rent	59
Shared Ownership	70
Total	233

3.2.13 Right to Buy

In 2012 the government introduced changes to the Right to Buy policy to encourage more tenants into home ownership, which included raising the discount cap to £75,000. The average number of these sales over the past five years is 13. During 2004 the council undertook a Large Scale Voluntary Transfer and therefore a number of Sanctuary's tenants have the Preserved Right to Buy. There is a contractual obligation that whenever Sanctuary sells a property under the Preserved Right To Buy, the council will be entitled to a proportion of the value of the sold property.

These funds that the council receives count as capital receipts and go on to fund many of the council's capital programme investments.

Further detail is provided in the table below:

Right to Buy sales				
Year	No of RTB sales		Property Type	Receipt
2012-13	10	10	3 bed house	£490,703.91
2013-14	15	2	2 bed house	£781,515.49
		12	3 bed house	
		1	4 bed house	
2014-15	8	1	2 bed house	£554,876.62
		7	3 bed house	
2015-16	8	2	2 bed house	£508,971.85
		6	3 bed house	
2016-17	15	1	1 bed house	£1,381,989.69
		2	2 bed house	
		12	3 bed house	
Grand Total	56			£3,718,057.40

A total of 56 properties have been lost from the affordable housing stock due to Right to Buy over the last five years. These were predominantly larger family homes, with three and four bedroom properties accounting for 86% of sales. The breakdown by property size was as follows:

- 1 x 1 bed house
- 7 x 2 bed houses
- 47 x 3 bed houses
- 1 x 4 bed house

Whilst it is beneficial for individual tenants who have purchased their properties, the impact of losing affordable housing stock should not be underestimated. It is critical that new delivery of affordable housing is maintained to offset these losses.

3.2.14 Nominations and Lettings – General Needs

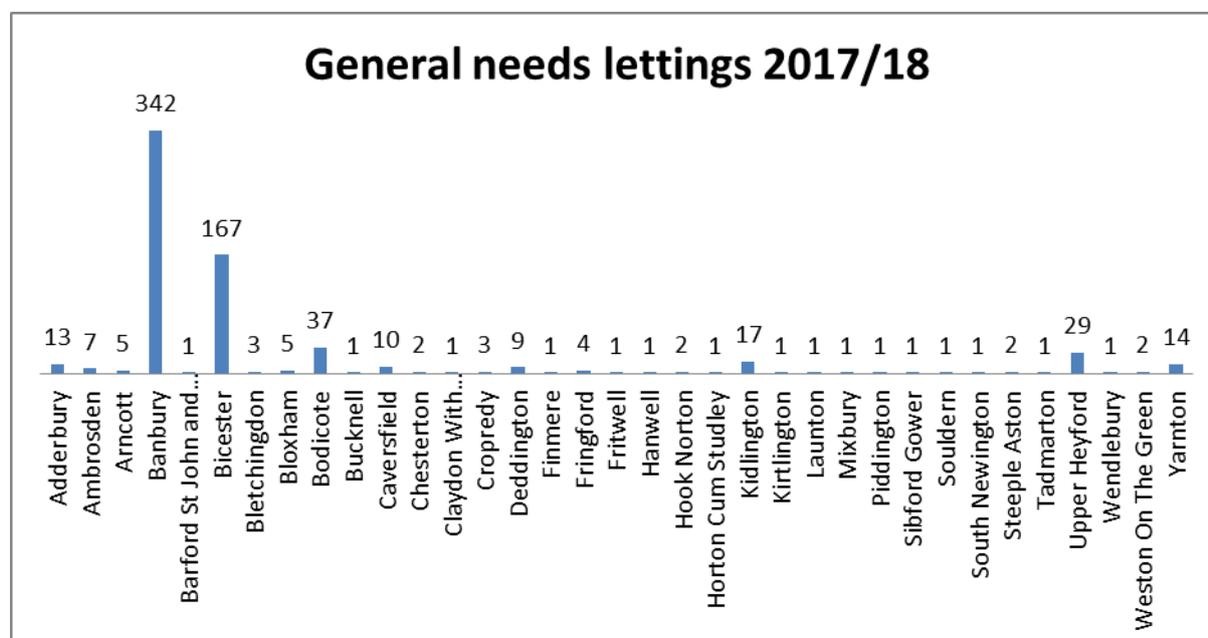

As well as new build affordable housing, an important way of meeting housing need is through re-lets within the social housing stock. The council’s lettings software was upgraded in December 2013, so only the past three years records are available. The number of nominations over recent years has been fairly consistent, the details are as follows:

Year	Nominations
2014/15	748
2015/16	775
2016/17	782
2017/18	689

Of the 689 nominations made in 2017/18, 454 (66%) were re-lets whereas only 235 (34%) were new build properties. The 689 nominations were made to 649 (94%) general needs, 11 (2%) sheltered and 29 (4%) Extra Care.

It is useful to consider the location of lets of social housing that took place in 2017/18.

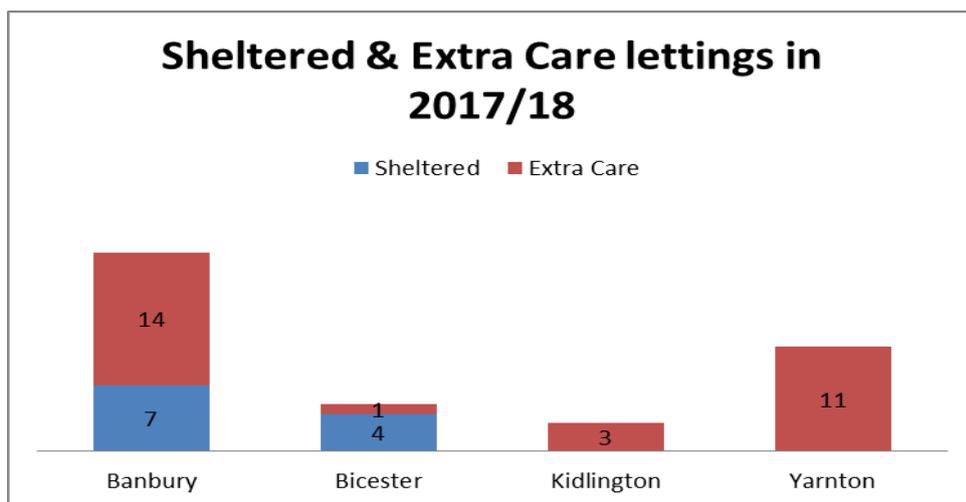

The location of the re-lets of general needs social housing were in the following locations

The majority of general need lets (74%) took place in Banbury and Bicester, with the remainder in the villages.

3.2.15 Nominations and Lettings – Sheltered and Extra Care Housing

The location of the re-lets of sheltered and extra care housing were in the following locations

The majority of extra care lettings took place in Banbury and Yarnton, whilst the majority of sheltered lettings were in Banbury.

3.2.16 Private rented sector

The private rented sector can be a realistic housing option for households in housing need. Private rented properties are generally more expensive and offer shorter tenancies than the social sector, but can respond more quickly to need and provide more flexibility. However, for those on lower incomes, the choice of suitable private rented accommodation can be limited.

The tables below outline the average private rent levels compared with the maximum local housing allowance available.

Rent levels in the private rented sector in Banbury

	Property Size			
	1 bedroom	2 bedroom	3 bedroom	4 bedroom
Average Rent per month	£568	£813	£984	£1,162
LHA Rate	£565.14	£705.19	£816.34	1,079.14
Difference between average rent level and LHA rate	£2.86	£107.81	167.66	£82.86
Rent as % of average income	20%	31%	37%	44%

Source: Zoopla

Rent levels in the private rented sector in Bicester

	Property Size			
	1 bedroom	2 bedroom	3 bedroom	4 bedroom
Average Rent per month	£734	£1,103	£1,223	£1,798
LHA Rate	£565.14	£705.19	£816.34	£1,079.14
Difference between average rent level and LHA rate	£168.86	£397.81	£406.66	£718.86
Rent as % of average income	28%	42%	46%	68%

Source: Zoopla

Rent levels in the private rented sector in Kidlington

	Property Size			
	1 bedroom	2 bedroom	3 bedroom	4 bedroom
Average Rent per month	£835	£1,161	£1,307	£1,769
LHA Rate	£690.46	£836.37	£1,000.01	£1,300.01
Difference between average rent level and LHA rate	£144.54	£324.63	£306.99	£468.99
Rent as % of average income	32%	44%	50%	67%

Source: Zoopla

The tables clearly show that affordability in Cherwell is a major issue, with the average rent exceeding the LHA rate at every single bedroom size in every location in the district. Additionally, if using a 35% guide of rent as a proportion of total income, then only one bed and two beds in Banbury, one beds in Bicester and one beds in Kidlington would be affordable in Cherwell.

Another reason that private rented housing can be unaffordable is that many letting agents require a deposit of 1.5 times the monthly rent and an administration charge of between £50 and £200, in addition to the first month's rent in advance. These upfront charges make it difficult for households on low incomes to access private sector rental accommodation.

4. Conclusion

By considering the current housing situation in Cherwell District, the evidence leads us to consider a number of approaches and recommendations to ensure future housing supply can meet the strategic needs of the district.

Intelligence through evidence gathering and interaction with market stakeholders is important to understand the local housing market and to support the continuation and implementation of new initiatives to ensure the housing service provided remains robust and receptive to changes to the housing market .

The evidence within the report will help formulate actions to be incorporated into the council's latest Housing and Homelessness strategy.

To: Christian Orr
Subject: RE: 19/00963/OUT - Berry Hill Road Adderbury

Hi Christian

Good to talk to you earlier.

I've put the answers to your questions below in blue. As I said when we spoke, we have no influence over the LPA in regard to permissions, but are happy to advise what our (hypothetical) Affordable requirements are.

Kind regards,

Natalie

To: Paul France <Paul.France@Cherwell-DC.gov.uk>
Subject: 19/00963/OUT - Berry Hill Road Adderbury

Hi Paul

I'm writing to you as you are the Housing Strategy Officer for Cherwell and you responded to our application back in October (see attached). I welcome your comments which we are reviewing. In light of your response, and our desire to work with you flexibly and agree the absolute best housing mix and tenure split for this location for current needs, I have a few questions that I hope you will be able to help with to better understand the local circumstances.

1. Do you know how many people are currently on the housing register in Cherwell and how many of those people chose Adderbury as a preferred location to live?

The number currently on the housing register is 1303. However, Cherwell covers 3 main areas - Banbury, Bicester and Kidlington so this information may not be relevant to you for a site in Adderbury. We generally look at people with a village connection – on the Register (and this is a snapshot for this point in time) we have 17 applicants who have a local connection to Adderbury. Their needs are:

7 need 1-bed
6 need 2-beds
3 need 3-beds and
1 needs a 4-bed property.

2. In terms of percent, what is the demand for each number of bedrooms in Cherwell for affordable properties (e.g. x% of people require 1-bed, y% of people require 2-beds, etc)? It would be of interest to see has this changed since the SHMA.

The percentage demand for properties overall in the whole District is:

	1 bed	2 bed	3 bed	4 bed
--	-------	-------	-------	-------

Housing Register	50%	30%	13%	7%
------------------	-----	-----	-----	----

The SHMA is a county-wide document – the above is what we need in Cherwell.

3. You have said in your October response that there is a greater need for smaller accommodation as well as a need for more affordable rents, especially with 2-bed properties it seems? Are you able to quantify this at all for the district, or provide evidence, to better understand how this need has changed significantly over recent years?

The demand changes with supply. Because developments can take a few years to deliver, there is a time delay with supply catching up with need, so at any point in time we may end up with a plentiful supply of say, 3-bed houses, and an undersupply of say, 1-bed accommodation, which is what we have now, so will try to adjust.

4. Has there been a change more generally with housing needs since the SHMA (2014)? i.e. is there now a greater need for smaller homes?

As mentioned earlier, the SHMA is a county-wide document from 2014 and does not quite correspond to what Cherwell District needs in 2020. I think generally we are seeing lesser demand for larger homes, market housing included.

5. Is there any local knowledge of Adderbury or wider area that you could share in regards to the changing needs for affordable properties. Is there demand for any specific size/tenure that isn't currently being met by other developments in Cherwell?

We always ask for a mix of house types. The only way to determine exact need it to undertake a Parish Needs Survey as this may highlight people who are not on the housing register. The one thing that we do want is for properties to be built to Technical Housing Standards – NDSS. As I mentioned on the phone, unlike a lot of market housing, affordable housing is occupied to it's maximum capacity and adequately sized homes are likely to be occupied for longer, so the community is more stable.

6. We have researched what has been provided on other developments in Adderbury and other villages. There appears to have been a below-policy provision for 1, 2 and 3 beds, and an overprovision of 4 and 5 beds. Do you know why this was and do you think this has meant a greater need of smaller properties now?

For Affordable housing at the moment, there is certainly greater need for 1 & 2-bed properties over 3-bed, but there is also an acute need for some 5 & 6-bed properties which we are aware of for certain areas. 4-bed need is currently about 5% and tends to be stable around this figure. The market housing often has the larger homes but we'd prefer a mix of sizes on a site i.e. not for all the smaller properties to be Affordable, whilst the larger ones are all Market – it is hard to make developments tenure blind if this is the case.

7. Are there any registered providers that you think would be a good suit for this scheme in a village location?

We work with a number of RP's and are happy to send you contact details.

8. Do you know why there has been no delivery of social rented properties? Has this meant a greater demand for social rent?

We haven't specifically asked for it, so it has all defaulted to affordable rent. However, we are now asking for social rent as we have not had delivery of this for nearly 4 years. It needs to be incorporated into the S106.

9. Are there any other intermediate housing, instead of Shared Ownership, that may be acceptable to you, e.g. discount-market housing (Starter Homes/First Homes)?

Possibly – this is something we could discuss. Some of the RP's have suggested Rent-to-buy if they can't sell the Shared Ownership units. However, personally, I think with the end to Help-to-Buy in March 2023, people who would have previously only looked at market sale may consider Shared Ownership as an affordable alternative (albeit the Government could come up with a similar scheme to prevent a crash), so the demand for Shared Ownership could be sustained with a new type of buyer.

10. Would the development be an appropriate location for the allocation of homes for Key Workers, in your view?

There isn't anything in Adderbury village that would be an obvious fit with key workers although there is employment close-by, such as the Hospital in Banbury (but that may come under Banbury?) or the school in Bloxham (Primary & Warriner secondary)

11. In light of any information on the above and the fact we are 7 months on since your response, would you wish to update the mix you suggested in October and negotiate something more bespoke and up-to-date?

If you submit another Planning Application, we would be asked to comment on that. At the moment though, the house types/bedroom numbers would remain the same as per Paul's comments in October.

I would be grateful for your knowledge on the above queries (and anything else you think is relevant). We would like to begin discussions on defining a sensible mix for the proposal. Whilst the application is in outline, we would be keen to fix an agreed mix/tenure in a S106 Agreement to give you and the authority certainty going forward. **That would be helpful!** Perhaps we could set up a virtual meeting in due course? **Let me know if you need any further information. My number is 01295 227931.**

I look forward to hearing from you soon.

Kind regards,
Christian

SUBJECT TO CONTRACT

Dear Christian

Berry Hill Road, Adderbury OX17 3HF

Thank you for getting in touch with Sanctuary regarding the proposed development at Berry Hill Road in Adderbury.

Sanctuary Homes owns and manages a large portfolio of affordable housing in the Cherwell District. We are also pursuing various new opportunities for our future development programme to deliver a range of housing options including affordable rent, shared ownership and market sale.

We understand there is a continued demand for affordable housing across the District, for both rental and intermediate housing.

Sanctuary Homes would be very keen to further discuss the delivery of the site including both the open market homes as well as the affordable homes.

Yours sincerely

Sophie Bell
Senior Development Manger

10 June 2020

Subject to Contract

Dear Christian,

Berry Hill Road, Adderbury, OX17 3HF

Thank you for your recent correspondence sharing your proposals for the residential development of the site known as Berry Hill Road in Adderbury.

Paradigm Housing Group own and manage a large portfolio of affordable homes in Cherwell District Council. Our homes are for rent, at a rent less than market rent, to nominations of Cherwell Council. Typically to those on the housing register who cannot afford to buy or rent a home locally. We also offer an affordable shared ownership product, where people part own their own home and pay a small rent to the housing association.

At the time of writing this letter I understand there are approximately 1,300 people on the Cherwell DC housing register in need of an affordable, good quality, home. The majority of these people require a one, or two bedroom home. A smaller number require three bedrooms.

We would be delighted to work with the local community and Hollins Strategic Land to bring forward the Berry Hill Road site for affordable housing.

Yours sincerely

1.0 Introduction

1.1 This note has been produced by Lichfields on behalf of Hollins Strategic Land in relation to Berry Hill Road, Adderbury – a proposed residential development in Cherwell District, northern Oxfordshire.

1.2 The following paragraphs provide an overview of the methodological approach and key assumptions that underpin the economic benefits summarised in the supporting infographic. The figures are underpinned by Lichfields' eVALUATE framework. eVALUATE is regularly used by local authorities to assess the economic impact of development, as well as many of the UK's leading developers, investors and house builders.

The Proposed Development

1.3 It is understood that Hollins Strategic Land is seeking outline planning permission for up to 40 dwellings with associated landscaping, open space and vehicular access off Berry Hill Road, Adderbury. The proposed housing mix responds to affordability issues in the Borough as set out in Table 1.1, with **35% of dwellings being affordable**.

Table 1.1 Proposed Housing Mix

Residential Units	Market	Affordable
1 Bedroom	0	4
2 Bedroom	2	6
3 Bedroom	18	4
4 Bedroom	6	0
Total	26	14

Source: Hollins Strategic Land

2.0 Construction Benefits

Capital Investment

2.1 In the absence of indicative build costs provided by Hollins Strategic Land, a number of Lichfields' standard assumptions have been employed in order to estimate the capital investment supported by the construction phase of the proposed development. Applying median build cost per sqm estimates by BCIS¹ to average floorspace estimates based on research by POD Architects² is used to provide average unit costs for units of 1 to 5 bedrooms in size.

2.2 To this, a 15% uplift is applied to account for external costs, whilst a regional adjustment factor (based on BCIS³ research of 1.13) is applied to account for regional cost differences. When applied to the 40 dwellings of the proposed development, these assumptions lead to an estimated total build cost in the region of **£5.5 million**.

Direct Construction Employment

2.3 Using labour coefficients from the HCA Calculating Cost per Job Best Practice Note (2015), it is possible to calculate the number of direct construction jobs supported by the proposed development over the course of the construction phase. Taking account of the composition of

¹ BCIS 2018 (35th Edition) Section 29 page 9

² POD Architects - based on experience of unit types for 4/5 house builders

³ BCIS 2019 (36th Edition) Section 29 - Q1 2018 Estimates

the proposed development, a new housing coefficient is considered appropriate when calculating the number of direct construction jobs. This coefficient assumes that 19.9 direct FTE jobs per £1 million of construction value in 2011 prices will be supported over the course of a year.

- 2.4 To use the coefficient, the construction cost of c.£5.5 million has been deflated from 2020 to 2011 prices using the latest UK Government GDP Deflator (2019). Applying the new housing coefficient to the deflated construction cost of c.£4.7 million and then dividing the result by the length of the construction phase (18 months), leads to the proposed development supporting **62 gross direct FTE jobs** annually over the construction phase⁴.
- 2.5 Although national and regional construction firms often use their own labour on projects, it is typical that a share of the contractors employed is drawn from the local labour pool. However, it is difficult to determine the likely source of labour to fill these jobs before contracts have been let. It is reasonable to expect a proportion of the construction jobs to be taken up by local workers, particularly if measures are in place to raise local skill levels and encourage local recruitment (e.g. through apprenticeships).
- 2.6 Following the uplift in construction activity nationally in recent years, it is likely there will now be a sufficient supply of local workers with construction skills and businesses which have developed to support/supply this activity.

Indirect and Induced Employment

- 2.7 Construction also involves acquisitions from a number of suppliers, who in turn purchase from their suppliers through the supply chain. The relationship between the initial direct spending and total economic effects is known as the ‘multiplier effect’, which demonstrates that an initial investment can have much greater indirect effects as this spending is diffused through the economy.
- 2.8 In addition, local businesses would be expected to benefit to some extent from a temporary increase in expenditure from the direct and indirect employment effects of the construction phase. Although only a proportion of these benefits would be felt in the local area, it would be expected that the local economy would gain a sizeable temporary boost from the wage spending of workers in shops, bars and restaurants, and other services and facilities. Such effects are typically referred to as ‘induced effects.’
- 2.9 Research undertaken on behalf of the National Housing Federation indicates the construction industry has an indirect and induced employment multiplier of 2.51⁵. Applying this multiplier to the 62 direct construction FTE jobs p.a. indicates an **additional 94 FTE jobs** p.a. would be supported by the proposed development in sectors across the UK economy. This is in addition to the 62 direct construction FTE jobs discussed earlier.

Gross Value Added

- 2.10 GVA is a measure of the difference between what is produced as outputs (goods and services) and the inputs (raw materials, semi-finished products etc.) used in the production of those outputs. It represents the additional value that is added through economic activity.

⁴ Homes and Communities Agency (HCA), Calculating Cost per Job: Best Practice Note (2015)

⁵ CEBR report for National Housing Federation (2013)

Direct Gross Value Added

- 2.11 Through an analysis of Experian data (March 2019) it is estimated that the average FTE construction worker in the South East region generates £71,489 of GVA per annum. On the basis of the above, it is assumed that the 62 construction jobs could generate c.£4.46 million in GVA during each year of construction.

Indirect and Induced Gross Value Added

- 2.12 2013 research⁶ commissioned by the National Housing Federation concluded that the house building industry has a GVA multiplier equivalent to 2.41. This means that every £1 of direct GVA supported by the industry is worth £2.41 in total. Applying this multiplier figure to the direct GVA impacts derived above indicates that the development proposals could support c.£6.28 million of indirect GVA per annum in total.
- 2.13 This equates to around **£10.74 million direct, indirect and induced GVA** in total per annum. It should be noted that not all of this will be retained locally.

1.0 Expenditure Benefits

First Occupation Expenditure

- 2.14 It is commonly accepted that households embark on a period of increased expenditure once they move into a new property in order to put their stamp on the house and make it 'feel like home'. Recent research by OnePoll⁷ suggested that this initial injection of expenditure could average approximately £5,500 per home. Applying this to the proposed development of 40 new homes would suggest that first occupation expenditure associated with the site could be in the order of **£220,000**. It is estimated – based upon the assessment of shopping patterns in the local area outlined in the narrative below – that a proportion of this expenditure is likely to be retained locally.

Net Additional Local Expenditure

- 2.15 The ONS Family Expenditure Survey (2019 Edition) provides a breakdown of household expenditure, at the national level, for a series of Output Area Classification (OAC) supergroups – defined according to their socio-economic characteristics. The predominant OAC supergroup within the existing residential areas surrounding the proposed development site is classified as 'suburbanites'. It has therefore been assumed that the residents of the market housing would also be suburbanites. Those occupying the affordable homes on site are considered more likely to fall into the 'Hard-pressed living' category.
- 2.16 The ONS Family Expenditure Survey indicates that there is variance between the average weekly household expenditure for 'suburbanites' and 'hard-pressed living' classifications (£656.20 and £479.60 per week respectively). These figures are expressed at the national level and therefore require regional adjustments. The ONS Family Expenditure Survey indicates that the weekly expenditure of the average household in the South East region stands at 119% of the UK average. Having regard to the above, the total gross expenditure expected from new residents at Berry Hill Road is estimated to be in the region of £1.46 million per annum.

⁶ CEBR report for National Housing Federation (2013)

⁷ <https://www.barratthomes.co.uk/the-buying-process/home-buying-advice/>

- 2.17 The expenditure estimates should be presented on a net additional basis, and therefore there is a need to make suitable allowance for the fact that not all spend will be new to the area, whilst some new expenditure may not be retained within the Cherwell District Council area. Data from the DTLR's English Housing Survey-Tenure by Distance moved (2013/14) has been used to estimate the proportion of households at the site that are likely to be new to the local area. For the purposes of this analysis, this has been defined as those households moving a distance greater than 10 miles. An analysis of the Council's most recent retail study⁸ has been used to estimate the percentage of new resident spend on both convenience and comparison goods likely to be retained with the Cherwell District Council area. It is estimated that an overall expenditure retention rate of 37% would be realistic.
- 2.18 Having regard to the methodological approach outlined above, it is estimated that the net additional expenditure to be generated by the scheme could be in the order of **£372,000** per annum.

FTE Jobs Supported by Net Additional Expenditure

- 2.19 It is estimated that the total net additional expenditure per annum, combined with the first occupation expenditure, could support the creation of **4 new FTE jobs** in the local area (primarily in the retail, leisure and hospitality and catering sectors). This has been calculated having regard to ONS data sets which provide a breakdown of: the proportionate share of the average household's weekly expenditure; and 'cost per job' estimates by sector.

3.0 Local Authority Revenue Benefits

New Homes Bonus

- 3.1 From 2018/19 changes to the New Homes Bonus [NHB] meant that payments match, for a four-year period, the increase in Council Tax income from new homes or homes brought back into use⁹. Local authorities will only receive New Homes Bonus payments on any housing delivered above a baseline level of growth equivalent to 0.4% of the dwelling stock.
- 3.2 Having defined an indicative Council Tax Band profile for the site, the potential New Homes Bonus payments have been estimated using the Ministry of Housing, Communities and Local Government's [MHCLG's] New Homes Bonus Calculator. This indicates that the delivery of 40 new homes (including 35% affordable) on site could generate **c.£279,000 in New Homes Bonus payments over four years**.
- 3.3 It is recognised that payments will be profiled to reflect the build period of the development and are contingent upon Cherwell District Council delivering total housing growth in excess of the 0.4% threshold.

Council Tax

- 3.4 The proposed development would generate an increase in council tax receipts. This would provide an additional boost to the revenue base of Cherwell District Council, over and above the impact of the NHB payments in the long-term. Drawing upon the assumptions and analysis presented in relation to NHB (and having regard to levels of council tax levied by the local

⁸ Cherwell Retail Study (2012)

⁹ New Homes Bonus is calculated on the basis of national average Council Tax charges. Council Tax, however, differs from one authority to the next. In addition, New Homes Bonus provides an additional allowance for the provision of affordable housing. As such, the New Homes Bonus payments to be generated by the scheme do not correspond precisely to four times the value of projected Council Tax revenues.

authority in the 2020/21 financial year), it is estimated that the development could generate around **£74,000 per annum** in additional council tax payments in perpetuity.

Section 106 Contributions

- 3.5 It is understood that Hollins Strategic Land has agreed in principle with Cherwell District Council a series of developer contributions, to be delivered via Section 106. It should be noted that some of these figures are subject to change at the Reserved Matters stage as they will be based on the final housing mix.
- 3.6 Berry Hill Road will deliver the following (costed) Section 106 contributions:
- Open space provisions to include the laying out and regulation of such areas and arrangements for the long term management and maintenance including the provision of commuted sums towards surface water drainage features, public open space and hedgerows. Contribution of £22,328.74.
 - Contribution towards the enhancement of public transport services serving the site to pump prime bus services on the A4260. Contribution of £40,000 index (linked from January 2018).
 - Contribution towards the provision of two sets of bus stop pole and premium route standard flags and a bus shelter, plus a commuted sum for long term maintenance. Contribution of £10,000 (index linked from January 2018).
 - Contribution towards access mitigation measures on local public rights of way to the east and north of the site (Footpaths 13, 6, 5 and 24 and bridleway 9). This would fund surface improvement, signing and furniture along the routes. Contribution of £20,000 (index linked from January 2018).
 - Administration costs towards a Traffic Regulation Order to enable the relocation of the existing 30mph speed signage from its current location to a point further east close to the junction with the A4260 to bring the entire Berry Hill Road to 30mph. Contribution of £3,120 (index linked from January 2019).
 - Contribution towards Nursery and Primary education to be used towards expanding nursery and primary provision at Christopher Rawlins CE (VA) Primary School of £331,593 (index linked from 2Q17).
 - Contribution towards Secondary education to be used towards expanding secondary provision at The Warriner School of £200,771 (index linked from 2Q17).
 - Contribution towards offsite outdoor sports towards the development of sports pitches and changing facilities off Milton Road in Adderbury CDC Recreation and Leisure response of £80,681.80 (index linked from 2Q17)
 - Contribution towards off-site indoor sports towards the expansion of/ improvements at Spiceball Leisure Centre in Banbury (which will serve the new residents) CDC Recreation and Leisure response of £33,397.87 (index linked from 2Q17)
 - Contribution towards the development of community hall facilities off Milton Rd in Adderbury CDC Recreation and Leisure response of £51,792 (index linked from 2Q17).
 - Contribution towards the improvement of local primary medical care facilities of £34,560.
 - Contributions towards waste and recycling bins of £4,440.
- 3.7 Having regard to the above, it is estimated that Hollins Strategic Land could contribute a total around £833,000 in S106 payments.

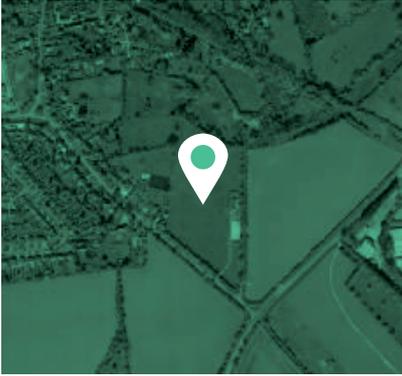

The economic benefits of Berry Hill Road, Adderbury

The proposed development in Adderbury will deliver up to 26 market and 14 affordable new homes, contributing towards Cherwell District's housing requirements.

The proposal

40 New homes **35%** Affordable homes

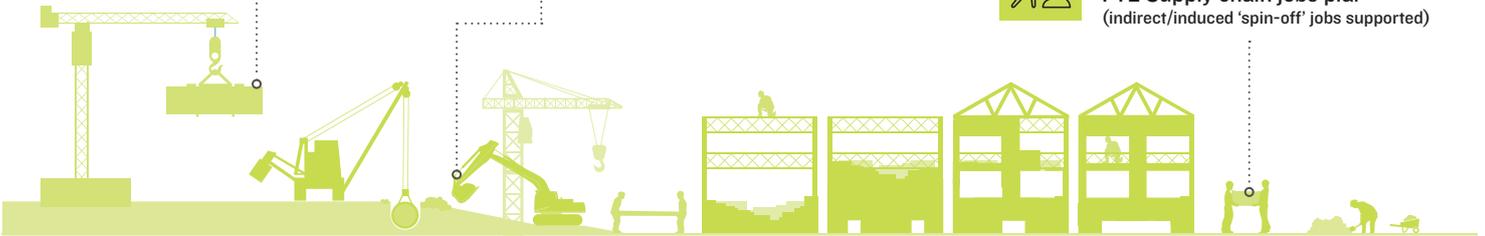

Construction benefits

£5.5m
Construction value
(total construction cost)

£10.7m GVA
Economic output
(additional GVA p.a.)

62 Jobs
FTE Construction jobs p.a.
(Over the 18 month build period)

94 Jobs
FTE Supply chain jobs p.a.
(indirect/induced 'spin-off' jobs supported)

Operational and expenditure benefits

£220,000
First occupation expenditure
(spending to make a house 'feel like a home')

£372,000
Resident expenditure
(within local shops and services p.a.)

4 Supported jobs
(from increased expenditure in local area)

Local Authority revenue benefits

£279,000
New Homes Bonus payments
(over a 4 year period)

£74,000
Council Tax revenues (p.a.)

c.£833,000
Planning contributions
(s106 to be confirmed at RM stage)

Biodiversity Metric 2.0 Calculations

Hannah Wild

From: Celia Barlow <cbarlow@e3p.co.uk>
Sent: 30 June 2020 15:04
To: Matthew Symons
Subject: Berry Hill Road- biodiversity Net Gain Results
Attachments: Biodiversity Metric 2.0 Calculation Tool Beta Test - December 2019- Berry Hill Road, Adderbury.xlsm

Hi Matthew,

As discussed I have undertaken the Biodiversity Metric calculation using Defras Biodiversity Metric 2.0 December 2019 version.

The results show that the baseline habitat units were 18.86, which have been increased by 9.38 units. This is a 98.91% biodiversity net gain on site. This is an excellent result, and goes far beyond the 10% requirement.

The baseline hedgerow units on site were 9.68, which have been increased by 2.33 units. This is a 24.03% gain. Again this is a great result.

Kind Regards

Celia Barlow

APC Traffic Calming Update

Traffic Calming Update

Posted 1 week ago (24/06) by Theresa Goss

At its meeting on 23 June 2020, the Parish Council's Environment Committee received useful updates from the County Council on proposed traffic calming measures in the village. The Committee hopes these will be implemented in the village over the coming months.

There have been slight delays with the proposals due to the Covid-19 Pandemic and a subsequent shortage of staff at the County Council, but the following were confirmed:

1. additional road markings around the village were in the County Council schedule and would be progressed shortly;
2. they have received from the Parish Council, the design brief for the chicanes on Milton Road and Berry Hill Road and the design would be progressed; and
3. the proposal to close the western arm of the oak tree junction was in initial consultation with transport companies. Once the feasibility had been confirmed, the design brief would be finalised by the volunteers assisting the Committee, and the design would be progressed too.

The Committee had asked for feedback from WARA and residents with regard to the additional signage they would like for Horn Hill Road through to Water Lane, but this was yet to be received, so had not yet been progressed.

Adderbury Speedwatch had been paused due to the Covid-19 Pandemic, but it was hoped that this could get back up and running shortly. Interestingly, the majority of those who had been caught speeding by Adderbury Speedwatch were either local to Adderbury or lived in surrounding villages.

If any residents would like to join the Adderbury Speedwatch volunteer group, they should contact the Clerk to the Parish Council. adderburypc@hotmail.com
