

The development of the above site has already been dismissed twice and as resident of Sibford Ferris I object strongly to Blue Cedar's appeal . We have a development in progress which is already large for a village of our size and the building is causing noise pollution, road damage, mess , ground shake and distress. Further development will put massive pressure on our village infrastrure and our patient frustrated village population. We have narrow roads in a terrible pot holed state, poor public transport and already find that the promises made to us about developments are not kept . This further development is beyond the built up limits and is threatening open country side and the nature life and character of Sibford Ferris . Pleasant dismiss the above appeal .
