South East Bicester (Wretchwick Green)	1,500	50	0	-50		<p>Developer submission (Boyer Planning for Redrow Homes) received 23 October 2023 suggests that development will not commence until 2029.</p> <p>However, it has been assumed that some dwellings would be delivered at the end of the 5 year period based on the adopted overall 5 year land supply methodology of outline permissions coming forward at the end of the 5 year period.</p>
Bicester Gateway Business Park, Wendlebury Road	273	50	0	-50		<p>The representation to the Regulation 18 Cherwell Local Plan Review consultation submitted on behalf of Thomas Homes Ltd affirms their commitment to bringing the site forward as a mixed employment / residential site. It also commits to delivering the housing permitted through application 20/00293/OUT.</p> <p>It has been assumed that some dwellings will be delivered at the end of the 5 year period based on the adopted overall 5 year land supply methodology of outline permissions coming forward at the end of the 5 year period.</p>

Address	Capacity (Net)	Council 5YHLS	Appellant 5YHLS	Difference	AMR Notes	Indicators of Firm Progress and Clear, Relevant Information in Support of the Council's Assessment
Canalside, Banbury	63	63	0	-63	Outline permission for 63 dwellings expired in June 2022. A new outline application for 63 dwellings (22/01564/OUT) at Station Road was approved in July 2023 subject to signing of a section 106 agreement. Site is part of a wider allocation in the adopted Cherwell Local Plan and the wider site is proposed to be allocated for mixed use development in the draft Local Plan Review 2040. Projection allows sufficient time (circa 3 years) for reserve matters submission and determination.	<p>Named Housebuilder? No.</p> <p>S106 progress?</p> <ul style="list-style-type: none"> <li>- Chased by agent on behalf of applicant to move drafting of S.106 forward.</li> <li>- A formal extension of time sought and agreed between parties.</li> <li>- Lack of resource within Legal Services slowed progress initially. However, the drafting work has been outsourced to 3<sup>rd</sup> party legal firm.</li> <li>- Terms of agreement and associated costs have been agreed and is to be based upon previously agreed (but never implemented) permission and associated S.106 agreement.</li> <li>- Confirmation of legal representatives acting for applicant have also been provided.</li> </ul> <p>Promoter engagement? Not aware of any.</p> <p>Infrastructure / enabling works provided by surrounding sites? None undertaken.</p> <p>There are no major viability or infrastructure issues affecting the deliverability of this site. It is not reliant on other sites coming forward.</p> <p>It has been assumed that some dwellings will be delivered at the end of the 5 year period based on the adopted overall 5 year land supply methodology of outline permissions coming forward at the end of the 5 year period.</p>

Address	Capacity (Net)	Council 5YHLS	Appellant 5YHLS	Difference	AMR Notes	Indicators of Firm Progress and Clear, Relevant Information in Support of the Council's Assessment
Bankside Phase 2 (Banbury 4)	350	50	0	-50	<p>Planning application for 700 dwellings (17/01408/OUT) was received in June 2017. A new application (19/01047/OUT) for a residential development of up to 825 dwellings (with 700 on Banbury 4 and 125 more on Banbury 12 allocations) was resolved to be approved subject to legal agreement in July 2021. It is assumed that 2 housebuilders will be on site at a peak of 50 homes per year per developer. The expected delivery rates allow sufficient lead-in time for Outline and Reserved Matters approvals and construction time. Five years from the base date is considered sufficient time for the first dwellings to come forward.</p>	<p>Named Housebuilder(s) Hallam / Henry Box</p> <p>S106 progress? Meeting with LPA and applicant and legal representatives (Minutes attached). August 2023. Following on from this a S.106 agreement has been drafted and is broadly agreed between LPA, OCC and Hallam. Correspondence on the matter last provided Nov 2023 whereby a further EoT has been requested to bring matters to a close (informally agreed at meeting in Nov 23 – awaiting written confirmation. Conditions agreed between parties.</p> <p>Promoter engagement? Hallam Land Management</p> <p>Infrastructure / enabling works provided by surrounding sites? Within S.106/S.278 - Provision of new link road between Oxford Road and Bankside/Longford Park by end of 2025.</p> <p>Developer submission (Framptons) received on 30 October 2023.</p> <p>It states that the Council's trajectory is unduly pessimistic and should be updated.</p> <p>Their representation to the Local Plan regulation 18 consultation supports the continued allocation of this site which shows their ongoing commitment to the delivery of this site.</p> <p>It has been assumed that some dwellings will be delivered at the end of the 5 year period based on the adopted overall 5 year land supply methodology of outline permissions coming forward at the end of the 5 year period.</p>

						Dwellings delivered in the 5 year period based on overall 5 year land supply methodology of full permissions coming forward within the 5 year period.

### Sites with Pending or Further RM Submission Required

LPA ref:	Address	Capacity (Net)	Council 5YHLS	Appellant 5YHLS	Difference	AMR Notes	Indicators of Firm Progress and Clear, Relevant Information in Support of the Council's Assessment
18/00825/HYBRID 22/02255/REM	Former RAF Upper Heyford	1,175	488		TBC	<p>A new Hybrid application for 1175 dwellings was approved in September 2022. Reserved matters (22/02255/REM) is approved for phase 10 for 138 dwellings. The Councils latest monitoring shows that foundations are in place for the majority of the homes with some near completion. Recent history of delivery on the site with 250 dwellings completed in 2022/3. Dorchester is a long standing and active developer on the site and there are two developers at Heyford Park. Dorchester Living are in partnership with Picture Living who will deliver private rented dwellings. Over the last five years an average of 100 new homes per year were built at Heyford Park. It is anticipated that this level of delivery will continue. Dorchester anticipate that they will deliver over 150 dwellings per year going forward including delivering phase 10 at the same time as future phases. They do not identify any infrastructure constraints to delivery. Discussions are occurring with the developer concerning future reserved matters applications which are expected shortly. Dorchester's website indicates a range of new homes for sale.</p>	<p>What is the clear evidence for timeframes for next RM submissions for +350 units from year 3. Is this agreed with Dorchester in terms of infrastructure timings for the Heyford Park Inquiry?</p> <p>Developer Submission (Dorchester) received on 3 November 2023. Dwellings delivered during the 5 year period.</p> <p>It should be noted that the developers are projecting a faster rate of delivery than assumed by the Council.</p> <p>Dorchester's committed new build completions to end Q1 2028 = 23 dwellings (built and occupied in the last 6 months at Phase 9A approved under 16/02446/F) + 270 (approved and under construction in Phases 9B – 9G also approved under 16/02446/F) + 5 (new occupations at Phase 8C under 19/00446/F in last 6 months) + 9 (built but not yet occupied at Phase 8C) + 34 (built and occupied in last 6 months in Phases 5C and 7A approved under 10/01642/OUT, 19/00439/REM &amp; 19/00440/REM) + 138 (currently under construction at Phase 10 and approved under 22/02255/REM) = 479 dwellings.</p>

							<p>In addition, Dorchester also anticipate the following additional completions within the next five years based on their phasing plan submission under 22/03016/DISC:</p> <p>6 dwellings (at Phase 13) + 114 (Phase 11) + 62 (Phase 17) which are all due to be the subject in new reserved matters application submissions in Feb. 2024 and with construction expected Q1/Q2 2025 = 182.</p> <p>These additional occupations all appear quite likely to the LPA.</p> <p>Dorchester also suggest that:  100 dwellings (at Phase 23A) + 100 (56% of Phase 16) + 16 (Phase 39) + 62 (62% of Phase 23B) + 42 (42% of Phase 12) = 320 dwellings could all come forward over the next 5 years.</p> <p>That would bring construction and occupation rates up to almost 200dpa, which is not considered likely by the LPA so have not been included in the Council's supply calculations.</p>
--	--	--	--	--	--	--	---

18/01882/OUT	Drayton Lodge Farm	320	250		TBC	<p>Outline permission for up to 320 dwellings is secured. The site was acquired by Vistry Group which consist of Bovis Homes and Linden Homes in November 2020. Reserved matters application (22/02357/REM) has now been approved in May 2023. Most conditions have now been discharged. Projection is consistent with build rates in Banbury generally in recent years. Developer has estimated that the majority of the site will be built out in 5 year period and they will start on site in early 2024.</p>	<p>Correspondence from Vistry informing CDC of Management Company to transfer for areas of open space including play areas, sports pitches, all ecological areas and potentially the SUDs features (email attached March 23). CDC advised that such details would need to form a DISC application and required prescribed info contained within schedule 3 (April 23).</p> <p>Construction vehicle routing discussed in July 2023 following complaints from residents about traffic through Hanwell village. Email sent to applicant confirming approved routing with the CTMP.</p> <p>Developer Submission (Vistry Homes) received 10 November 2023. Generally supports the Council's assumptions.</p>
14/01932/OUT	Banbury 17 South of Salt Way East	1000	400		TBC	<p>RM for 273 by Persimmon on Phases 1 &amp; 3, with 70 units currently under construction alongside the construction of the spine road and all internal loop roads that have separate reserved matters consents</p> <p>Next application expected by Charles Church for Phase 3 110 for 122 dwellings</p>	<p>This is generally fine but do we have any confirmed correspondence with the promoter for the next RM submission?</p> <p>Developer Submission (Persimmon homes) received on 10 November 2023. This assumes a delivery of 250 within the next 5 years.</p> <p>However, looking at historic delivery in Banbury this appears to be unduly pessimistic projection.</p>

EP1B

GREENCORE  
HOMES

## Land to the North West of Station Road, Launton

### Development Benefits

The proposals include a number of benefits for the community including:

Providing 65 new Climate Positive market and affordable rate homes to meet growing demand for homes in the District;

Creating a variety of open spaces accessible to the public via the existing PRoW and new footpaths;

Retaining and enhancing the existing PRoW including increasing the safety of the route through passive surveillance from new homes;

Reducing our impact on the planet through sustainable strategies including construction & energy supply as part of Greencore's One Planet Living commitment;

Reducing the speed limit along Station Road to 20mph to create a safer environment for pedestrians and cyclists;

Providing a new play area set within landscape, easily accessible from the village via the existing PRoW;

Dedicating an area of land for biodiversity to ensure the proposals have a positive impact on local ecology; and

Contributions through a S106 agreement for improvements within the community.

HOMES

GREENCORE  
HOMES

## Land to the North West of Station Road, Launton

### Landscape & Biodiversity

A dedicated area of the site, outlined in blue on the Illustrative Masterplan, will be enhanced and managed in the long term for biodiversity net gain. Species-rich grassland, hibernacula, and native hedgerows form part of the proposals in this area.

Within the development site itself, existing hedgerows and woodland features will all be retained and new habitats and wildlife corridors will be created in the form of wildflower meadows, scrub planting and sustainable urban drainage. The proposals will include enhancements for wildlife including bats, birds, barn owls, hedgehogs and insects.

GRENCORE  
HOMES

## Land to the North West of Station Road, Launton

### A Range of Dwellings

The proposals include a range of dwelling types and sizes. Homes include detached, semi-detached, terraced and maisonette homes across different tenures. Example floor plans and elevations are shown below, with an indication of a materials palette.

Example 1 Bedroom Maisonette:

Example 2 Bedroom Terrace:

Example 4 Bedroom Detached:

GREENCORE  
HOMES

## Land to the North West of Station Road, Launton

### New Climate Positive Homes

The new homes on this site will be designed and constructed to be Climate Positive. This is achieved through a combination of locking up carbon in construction and renewable energy provision in use. The following principles further explain what we mean by Climate Positive:

Simple, compact building forms with a good 'form factor' (the efficiency relationship between floor area and extent of external thermal envelope).

Materials like cement, steel and bricks will be minimised so each timber superstructure locks up more carbon than it emits.

Building orientation and using (controlled) solar gain to assist with energy balance of the dwelling. Integrated PV system to increase energy generation.

Homes constructed with closed timber panels made in Greencore's factory, meaning homes can be erected on site in a matter of days.

Areas of glazing on each elevation carefully considered to minimise heat loss and to maximise (controlled) solar gain. Triple glazing throughout will reduce heat loss and thermal comfort for occupants.

High levels of airtightness - used in conjunction with fully openable windows and an MVHR system.

Homes orientated east to west on the site to maximise south facing living spaces, and bedrooms and service spaces to the north.

Hot water and space heating are highly energy efficient and powered by electricity (rather than gas).

With high levels of thermal insulation to the building fabric and continuity of insulation - minimising thermal bridging.

[www.greencorehomes.co.uk](http://www.greencorehomes.co.uk)

GREENCORE  
HOMES

## Land to the North West of Station Road, Launton

### The Masterplan

The proposed development will deliver 65 new homes, including 23 affordable homes, and 8 Live-Work units, set within new landscape and public open space. Homes will be Climate Positive, targeting Passivhaus standards of energy efficiency. The landscape-led site layout has been sensitively designed to incorporate existing mature landscape features and the Public Right of Way, and includes an additional Biodiversity Area to ensure the proposals have a positive impact for ecology.

[www.grencorehomes.co.uk](http://www.grencorehomes.co.uk)

GRENCORE  
HOMES

## Land to the North West of Station Road, Launton

Key:					
	Site boundary (5.8ha)		Surface water flooding		Telephone mast
	Municipality area (2.8ha)		Existing bund (to be removed)		Noise
	Existing built form		Existing tree/vegetation		Overhead powerlines
	Proposed new building		Existing road area		Existing building
	Existing pond		Tree protection area		Proposed site access
	Existing road		Adopted road		Proposed access to telephone mast
	Proposed new building		Proposed		Proposed new development

## Constraints & Opportunities

The proposals will seek to:

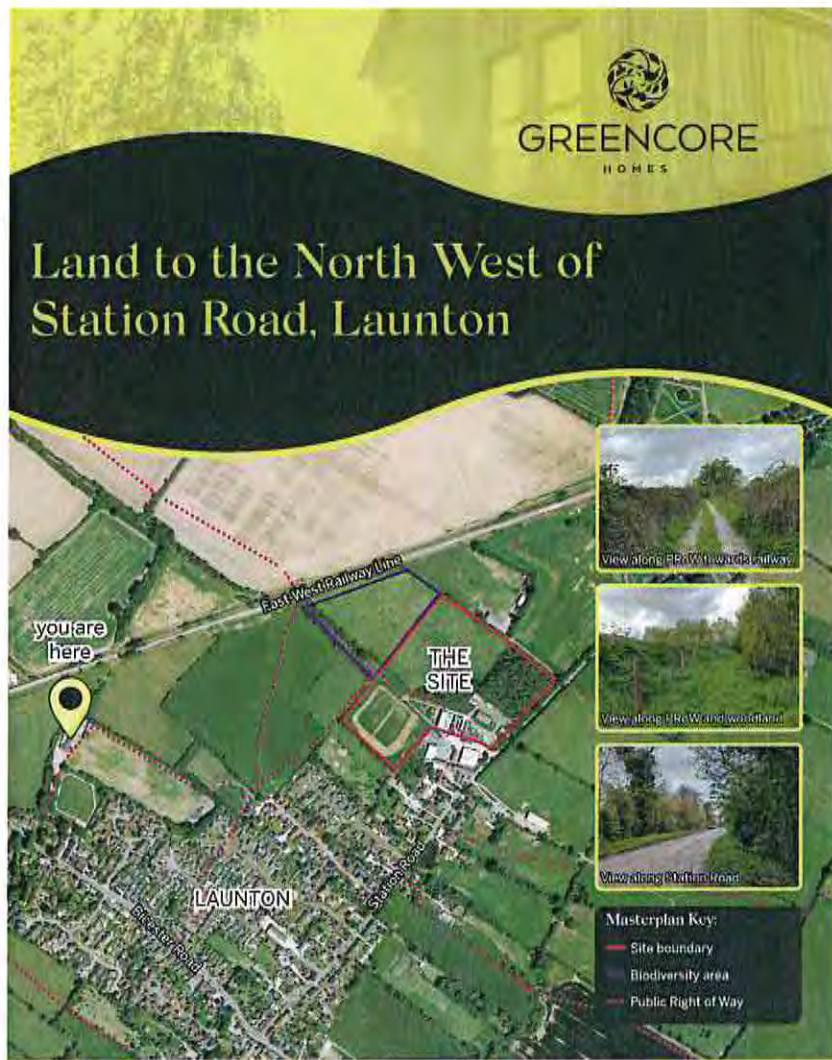

- Retain and minimise the impact on green/blue infrastructure and integrate these features into the landscape and drainage strategy;
- Retain existing PRow connectivity through the Site and improve the environment for pedestrians and cyclists along Station Road;
- Improve biodiversity on the Site by protecting priority habitats and creating a dedicated Biodiversity Area adjacent to the development;
- Minimise the impact on existing residential properties and businesses by respecting boundaries; and
- Manage the demolition of existing buildings carefully to prepare the site for delivering new homes and open space.

GRENCORE  
HOMES

## The Site

The Site is located on the north western edge of the village of Launton, and is accessed from Station Road. The Site comprises 5.8 hectares of land and currently consists of greenfield, alongside an open storage area and a large yard which is utilised for car and bus parking.

Within the Site there are several mature landscape features including two woodland areas a drainage ditch and a network of hedgerows along the boundaries to fields. A Public Right of Way also runs through the woodland and crosses the Site in the centre, before heading north over the railway line via a new pedestrian bridge.

## Planning History

An Outline Planning Application for the Site was submitted to Cherwell District Council in 2021 and allowed at appeal in November 2022. Greencore Homes acquired the Site in May 2023 and have instructed an experienced project team to prepare a masterplan and house type designs in line with the Outline Planning Approval. Greencore Homes will be aiming to submit a Reserved Matters Application to Cherwell District Council in the Autumn.

## Land to the North West of Station Road, Launton

### Welcome

Welcome to our exhibition about the proposed residential development at Land to the North West of Station Road, Launton.

### About Greencore Homes

At Greencore, we have harnessed our vast experience and knowledge to champion the groundbreaking concept of a Climate Positive home. Our factory manufactures closed timber frame panels which are insulated with natural materials and are built into a timber frame superstructure that locks up more carbon than it emits.

Our homes are also highly energy efficient and powered by electricity rather than gas. We utilise renewable energy sources for every home and target these supplying 100% of the energy required in use. We are creating communities where people can live low carbon, healthy and active lives.

**NEWTON**  
LAND • DEVELOPMENT • PROPERTY

# Land at Dukes Meadow Drive, Banbury

Oxfordshire, OX16 1ER

- Outline Planning Application (21/03426/OUT)
- Up to 78 dwellings
- Gross site area circa. 3.6 hectares (8.9 acres)
- 30% affordable housing

## Description

The planning application boundary extends to approximately 3.6 hectares (8.9 acres). Part of the application area may be retained by the vendor, with rights granted to enable the delivery of associated infrastructure.

The northern, western and eastern boundaries of the principal application site are defined by existing hedgerows beyond which is further agricultural land. The southern boundary is defined by a post and rail fence and swale, beyond which is an embankment and verge associated with Dukes Meadow Drive, which is characterised by amenity grass and trees.

The site is sloping and falls from c133m AOD on the western edge to around 105 AOD on the eastern side. Means of access was established as part of the outline planning application and includes a fourth arm from the existing roundabout on Dukes Meadow Drive at the intersection with Lapsley Drive.

## Location

The site is located on the northern edge of Banbury, adjacent to the established Hanwell Fields development built out along the Dukes Meadow Drive corridor. Hanwell Fields is approximately 1.8 miles (2.9km) from Banbury town centre and 2.6 miles (4.2km) from Banbury Railway Station, providing regular services to London Marylebone (approx. one hour), Oxford (approx. 20 mins), Birmingham (approx. 50 mins), Coventry (approx. 30 mins), Leamington Spa (approx. 17 mins) and further afield.

As well as being located to the north edge of the major

service centre of Banbury, the site benefits from good access to a range of services and facilities within the Hanwell Fields scheme. On the opposite side of Dukes Meadow Drive is the Hanwell Local Centre which comprises of a range of small retail including inter alia, a restaurant, Co-op food store, hair salon, The Hanwell Arms pub and Hanwell Community Centre.

Further to the south of the Hanwell Local Centre is the Hanwell Fields Community School (OFSTED: GOOD) which is a primary school that services the local area, there is

also Cherry Fields Primary school which was built as part of the Hanwell View development on the Southam Road, which opened in 2020 and also services the area. There are several secondary schools located within Banbury, the closest being the North Oxfordshire Academy.

Dukes Meadow Drive benefits from an active bus service with multiple stops throughout Banbury and further afield. A new bus stop adjacent to the site is to be delivered as part of this scheme.

### Planning

An outline planning application (21/03426/OUT) was submitted by Manor Oak Homes on 6th October 2021 for 'up to 78 dwellings and associated open space, with all matters reserved apart from access'.

Cherwell District Council Planning Committee resolved to grant planning permission on 7th April 2022, subject to completion of a S106 Agreement.

A draft schedule of conditions is included within the Sales & Technical Pack. It should be noted that draft Condition 2 reduces the period within which the final application for reserved matters approval shall be made to no later than the expiration of 18 calendar months from the date of the permission. Heads of Terms for the Section 106 Agreement are included within the Sales & Technical Pack.

### Sales & Technical Pack

A comprehensive pack of legal, planning and technical information is available upon request. In addition to the information submitted to the Local Authority as part of the planning application process, Manor Oak Homes has commissioned an Air Quality Assessment, Noise Survey, Phase II Ground Investigation and Utilities Appraisal.

### Method of Sale

The site is being offered for sale on a freehold basis with offers subject to contract and the grant of outline planning permission (21/03426/OUT) only.

All offers are to be submitted via email to Newton LDP and must accord with the timescales guidance set out in the covering letter.

### Tenure

The site will be sold freehold, with vacant possession on completion.

### Liability

All Section 106 costs and contributions are the responsibility of the purchaser upon completion. The Purchaser is to indemnify the Vendor in respect of any requirements of the Planning Permission or obligations and liabilities under the Section 106 Agreement.

### VAT

The Vendor has made an election in respect of VAT, which will be payable in addition to the purchase price.

## PARTIES

- (1) **CHERWELL DISTRICT COUNCIL** of Bodicote House White Post Road Bodicote Banbury in Oxfordshire OX15 4AA ("**District Council**")
- (2) **OXFORDSHIRE COUNTY COUNCIL** whose main office is at County Hall New Road Oxford OX1 1ND ("**County Council**")
- (3) **THE WARDEN AND SCHOLARS OF SAINT MARY COLLEGE OF WINCHESTER IN OXFORD** of Oxford OX1 3BN ("**Owner**")
- (4) **HALLAM LAND MANAGEMENT LTD** of Banner Cross Hall, Ecclesall Road South, Sheffield, S11 9PD, company no. 02456711 ("**Developer**")

## INTRODUCTION

- (A) The District Council is the local planning authority for the purposes of the Act for the area in which the Site is situated.
- (B) The County Council is the county planning authority for the purposes of the Act for the area in which the Site is situated and has powers and duties in respect of education, highways, transport and the regulation of traffic
- (C) The Owner is the freehold owner of the Site, being the land registered at HM Land Registry under title number ON243345 free from encumbrances.
- (D) The Developer has the benefit [a] [promotion agreements] entered into in respect of the Site dated [1 February 2013 and 13 February 2001 and 17 August 2018]
- (E) The Application has been submitted by the Developer to the District Council and the District Council has resolved to grant planning permission for the Development subject to the prior completion of this Deed which is necessary to mitigate the impact of the Development and make it acceptable in planning terms.
- (F) The District Council resolved on 15 July 2021 to grant the Planning Permission subject to the prior completion of this Deed.

- (G) The Owner, Developer, the District Council and the County Council have agreed that it is necessary in planning terms to enter into this Deed to mitigate the impact of the Development and make it acceptable in the event that the Planning Permission is granted.

**NOW THIS DEED WITNESSES** as follows:

## OPERATIVE PART

### 1. **DEFINITIONS**

- 1.1 For the purposes of this Deed the following expressions shall have the following meanings:

<b>Expression</b>	<b>Meaning</b>
<b>“Act”</b>	the Town and Country Planning Act 1990 (as amended);
<b>“Allotment Scheme”</b>	a scheme submitted to and agreed by the District Council pursuant to paragraph 3 of the Third Schedule which shall comprise: <ul style="list-style-type: none"><li>• The plan and layout of the allotments and associated paths that will be Constructed on Site; and</li><li>• The Allotment Specification;</li></ul>
<b>“Allotment Specification”</b>	means the specification and standards to which the allotments shall be Constructed as set out at Annex [ ] to this Deed;
<b>“Allotment Works”</b>	means the allotments to be provided on the Site in the location shown on the Parameters Plan and being an area of 0.75 ha in the north east corner of the Site, as referred to in the Third Schedule of this Deed

<b>Expression</b>	<b>Meaning</b>
<b>“Application”</b>	the application for outline planning permission submitted to the District Council for the Development and allocated reference number 19/01047/OUT;
<b>“Cemetery Contribution”</b>	means the sum of £10,122.00 (ten thousand, one hundred and twenty two pounds) (Index Linked) being a contribution towards the provision and/or improvement of cemetery facilities serving Banbury.
<b>“Community Development Contribution”</b>	<b>Fund</b> means the contribution of £4,000.00 (four thousand pounds) to be paid towards supporting the activities of the Community Development Worker
<b>“Community Development Worker”</b>	means an officer with responsibility for the development and co-ordination of activities to establish and strengthen the community created by the Development and support the management of the community centre at Longford Park
<b>“Community Development Contribution”</b>	<b>Worker</b> means the contribution of £65,941.26 (sixty five thousand nine hundred and forty one pounds and twenty six pence) to facilitate the integration of the new community to the application Site with the existing community in the local area
<b>“Commencement of the Development”</b>	occurs on and means the carrying out of any material operation (as defined in Section 56(4) of the Act) forming part of the Development on a Phase (whether or not such operation is a lawful commencement of the Development) other than (for the purposes of this Deed and for no other purpose) operations consisting of: <ul style="list-style-type: none"> <li>• site clearance and earthworks and ground remodelling;</li> <li>• demolition work;</li> <li>• archaeological investigations;</li> </ul>

## Expression

## Meaning

- investigations for the purpose of assessing ground conditions;
- remedial work in respect of any contamination or other adverse ground conditions;
- diversion and laying of services;
- erection of any temporary means of enclosure;
- the temporary display of site notices or advertisements;
- works to existing water courses;
- construction of access roads for construction traffic;

and “**Commence**” “**Commenced**” and “**Commencing**” or any other derivation of this term shall be construed accordingly

## “Construction”

means in relation to buildings the construction of any building forming part of the Development including footings or foundations and in relation to elements of the Development such as the Open Space Play Facilities Allotment Works and Sports Facilities the laying out of such areas for the designated purpose and “**Construct**” and “**Constructed**” shall be construed accordingly;

## “Development”

the development of the Site as set out in the Application and as may be permitted by any Qualifying Permission;

## “Due Date”

if the provisions of clause 14 are complied with is the date on which any sum payable hereunder is required to be paid or if any sum is to be paid before an event the day before that event occurs but otherwise is the date hereof

<b>Expression</b>	<b>Meaning</b>
<b>“Dwelling”</b>	<p>a building (including a house flat or maisonette) Constructed or proposed to be Constructed on the Site as part of the Development or part of such building designed for residential Occupation by a single household pursuant to the Planning Permission and</p> <ul style="list-style-type: none"> <li>• Affordable Housing Dwellings are those Dwellings provided and whose occupancy and ownership is restricted as set out in the Second Schedule);</li> <li>• Market Dwellings are those Dwellings that are not Affordable Housing Dwellings</li> </ul>
<b>“Financial Contributions”</b>	<p>means Indoor Sports Contribution, Community Development Fund Contribution, Community Development Worker Contribution, Waste and Recycling Contribution, Cemetery Contribution being financial contributions payable to the District Council as set out in the Fourth Schedule to this Deed</p>
<b>“Indexation”</b>	<p>means in respect of the Financial Contributions index linked in accordance with clause 15 of this Deed;</p>
<b>“Indoor Contribution”</b>	<p><b>Sports</b> means a contribution of £688,831.11 (six hundred and eighty eight thousand, eight hundred and thirty one pounds and eleven pence (index linked) towards improvements at the Spiceball Leisure Centre and/or the development of a new indoor tennis centre at Banbury</p>
<b>“Interest”</b>	<p>Interest at the rate of 4% above the base lending rate of Lloyds Bank PLC from time to time calculated daily and compounded annually in arrears;</p>

<b>Expression</b>	<b>Meaning</b>
<b>“LEAP(s)”</b>	means means the 2 (two) Locally Equipped Areas of Play to be provided in the locations shown on the Parameters Plan and provided in accordance with the Third Schedule;
<b>“Managed Land”</b>	means the Open Space Play Facilities Allotment Works and Sports Facilities which are to be transferred to the Management Company
<b>“Management Body”</b>	means a limited company registered at Companies House and formed for the purposes inter alia of carrying out ongoing maintenance of the SuDS and which has been approved by the District Council PROVIDED THAT for the avoidance of doubt the Management Body may be the same the entity as the Management Company;
<b>“Management Company”</b>	means a limited company registered at Companies House (or more than one company where a different Management Company is to be set up in respect of a different Phase) and formed for the purposes inter alia of carrying out ongoing maintenance of the Open Space Play Facilities Allotment Works and Sports Facilities and which has been approved by the District Council;
<b>“Management Company Structure”</b>	<p>means a scheme that addresses the following in relation to the Management Company:</p> <ul style="list-style-type: none"> <li>(i) details of the proposed constitution of the Management Company;</li> <li>(ii) proposed banking arrangements of the Management Company;</li> <li>(iii) details of and arrangements of the maintenance of such insurances as shall be appropriate in respect of the use of the Managed Land;</li> <li>(iv) details of initial funding arrangements and mechanisms for securing future financial resources for the maintenance of the Managed Land</li> </ul>

<b>Expression</b>	<b>Meaning</b>
<b>“Management Scheme”</b>	means written scheme(s) for the ongoing management and maintenance of Managed Land which shall set out the frequency and standard of maintenance of the relevant parts of the Managed Land that are the subject of the relevant scheme and the relevant parts of the “Open Space Scheme” concerning maintenance shall be construed as the relevant Management Scheme for the Open Space.
<b>“MUGA”</b>	means a Multi-Use Games Area to be provided for in accordance with the Third Schedule;
<b>“NEAP”</b>	means a Neighbourhood Equipped Area for Play to be provided in the location shown on the Parameters Plan and provided in accordance with the Third Schedule;
<b>“Notice of Defect”</b>	means a notice issues by the District Council confirming that the Sports Facilities have not been completed to the required standards and setting out the requirements that the Owner must comply with in order to complete the Sports Facilities or Allotments Works (as the case may be) to the required standards;
<b>“NPPF”</b>	the National Planning Policy Framework (as amended from time to time) or any Planning Policy Statement, Guidance Notes or Circulars which may amend, supplement or supersede it;
<b>“Occupation”</b>	means the occupation for the purposes permitted by the Planning Permission but not including occupation by personnel engaged in construction, fitting out or decoration or occupation for marketing or display or occupation in relation to security operations and in the context of Dwellings shall mean the first such occupation and

Expression	Meaning
	<p><b>“Occupied”</b> and <b>“Occupy”</b> shall be construed accordingly;</p>
<b>“Open Space”</b>	<p>means the area shown coloured green on the Parameters Plan which is to be provided and laid out as open space for public use in accordance with the provisions set out in the Third Schedule of this Deed.</p>
<b>“Open Space Scheme”</b>	<p>means a scheme to be submitted to and approved by the District Council setting out the provision for maintenance of the Open Space which shall include (but not be limited to) the following:</p> <ul style="list-style-type: none"> <li>• frequency of maintenance;</li> <li>• measures to replace any trees shrubs or turf which may die or become diseased following implementation of the Open Space Scheme;</li> <li>• measures to maintain and repair hardstanding, facilities, equipment and means of enclosure and the standard of maintenance and repair to be achieved; and</li> <li>• public access arrangements</li> </ul>
<b>“Parameters Plan”</b>	<p>means plan being drawing number 6394-P-01 rev [AX] attached to this Deed at the Annex to the Third Schedule</p>
<b>“Parcel”</b>	<p>means a parcel of residential development within a Phase identified on a Phasing Plan or such alternative part of a Phase as may be proposed by the Owner and approved by the Council as being categorised as a Parcel for the purposes of this Deed</p>

<b>Expression</b>	<b>Meaning</b>
<b>“Phase”</b>	one or more of the phases of Development as shown on the Phasing Plan;
<b>“Phasing Plan”</b>	the phasing plan approved under condition [4] of the Planning Permission and any reference to a Phase in this Deed shall be a reference to that Phase shown on the Phasing Plan;
<b>“Plan”</b>	the plan being drawing number 6394-P-08 rev K attached to this Deed at the Annex to the First Schedule;
<b>“Planning Permission”</b>	the outline planning permission subject to conditions to be granted by the District Council pursuant to the Application which where the context admits shall include each and every Qualifying Permission;
<b>“Play Facilities”</b>	means LEAPs, NEAPs and MUGAs to be provided on the Site in accordance with the Third Schedule of this Deed and <b>“Play Facility”</b> shall be construed accordingly
<b>“Practical Completion Notice”</b>	means a notice issued by the District Council confirming that the Open Space Play Facilities Sports Facilities or Allotments Works (as the case may be) have been completed to the required standards
<b>“Qualifying Applications”</b>	an application for approval of Reserved Matters or any separate application(s) for full planning permission for the Development or any part of the Development or any application under Sections 73 or 96A of the Act relating to the Planning Permission or any application for approval of Reserved Matters relating to such permission further to an application under Sections 73 and/or 96A of the Act;

<b>Expression</b>	<b>Meaning</b>
<b>“Qualifying Permissions”</b>	any approval of Reserved Matters or full planning permission or approval to a non-material change pursuant to Section 96A of the Act as the case may be issued pursuant to a Qualifying Application;
<b>“Relevant Dispute”</b>	means any dispute or difference between the District Council and the Owners touching or cornering matters arising out of this Deed
<b>“Reserved Matters”</b>	details of any one or more of access, appearance, landscaping, layout and scale reserved under the terms of the Planning Permission for subsequent approval;
<b>“Site”</b>	means the land at the north east of Oxford Road, West of Oxford Canal & East of Bankside, Banbury against which this Deed may be enforced as described in the First Schedule and as shown edged red on the Plan;
<b>“Sports Facilities”</b>	means the Sports Pitches and Sports Pavilion and Car Park constructed to Sport England Standards as further described in the Third Schedule of this Deed
<b>“Sports Pavilion and Car Park”</b>	means a four team changing room pavilion with separate officials changing room all with showers and toilets, kitchen, toilets, office, external store room, external toilets, cleaners cupboard and suitable car park to be provided within the 2.73ha allocated land shaded [       ] on the Parameters Plan

<b>Expression</b>	<b>Meaning</b>

<b>“Trigger Event”</b>	<p>And any other matters as requested by the District Council.</p> <p>any event that when it occurs requires any party to this Deed to pay any sum or carry out any works or take (or desist from taking) any other action including service of any notice.</p>

Expression	Meaning
<b>“Waste and Recycling Contribution”</b>	£111 (one hundred and eleven pounds) per Dwelling towards the provision of waste receptacles plus the provision of land for and the provision of a recycling bank;
<b>“Working Days”</b>	Mondays to Fridays (excluding bank and other public holidays) and any day which is on or between 27 <sup>th</sup> and 31 <sup>st</sup> December in any Calendar Year.

## 2. **CONSTRUCTION OF THIS DEED**

- 2.1 Where in this Deed reference is made to any clause, paragraph or schedule or recital such reference (unless the context otherwise requires) is a reference to a clause, paragraph or schedule or recital in this Deed.
- 2.2 Words importing the singular meaning where the context so admits include the plural meaning and vice versa.
- 2.3 Words of the masculine gender include the feminine and neuter genders and words denoting actual persons include companies, corporations and firms and all such words shall be construed interchangeably in that manner.
- 2.4 Wherever there is more than one person named as a party and where more than one party undertakes an obligation all their obligations can be enforced against all of them jointly and severally unless there is an express provision otherwise.
- 2.5 **“Including”** means including without limitation or prejudice to the generality of any preceding description defined term phrase or word(s) and **“include”** shall be construed accordingly.
- 2.6 Words denoting an obligation on a party to do any act or matter or thing include an obligation to procure that it is done and words placing a party under a restriction include an obligation not to cause, permit or allow infringement of that restriction.
- 2.7 Any reference to an Act of Parliament shall include any modification, extension or re-enactment of that Act for the time being in force and shall include all instruments,

orders, plans, regulations, permissions and directions for the time being made, issued or given under that Act or deriving validity from it.

2.8 References to any party to this Deed shall include the successors in title to that party and to any person deriving title through or under that party and in the case of the District Council and County Council the successors to their respective statutory functions.

2.9 The headings and contents list are for reference only and shall not affect construction.

### **3. LEGAL BASIS**

3.1 This Deed is made pursuant to Section 106 of the Act Section, 111 of the Local Government Act 1972, Section 1 of the Localism Act 2011 and all other enabling powers.

3.2 The covenants, restrictions and requirements imposed upon the Owner under this Deed create planning obligations pursuant to Section 106 of the Act

3.3 The covenants, restrictions and requirements set out generally herein are enforceable by the District Council and the County Council but

3.3.1 those set out in clause 8.1.1, clause 8.1.3(a), clause 16.1, the Second Schedule, the Third Schedule and Fourth Schedule and Sixth Schedule are only enforceable by the District Council as local planning authority, and

3.3.2 those set out in clause 8.1.2, clause 8.1.3(b), clause 16.2, Fifth Schedule and Seventh Schedule are only enforceable by the County Council as County planning authority

against the Owner and in accordance with Section 106(3)(b) of the Act against any person deriving title from the Owner .

3.4 Nothing in this Deed restricts or is intended to restrict the proper exercise of any statutory power, function or discretion in relation to the Site at any time by the District Council and County Council.

#### **4. CONDITIONALITY**

4.1 Save as set out below this Deed is conditional upon:

4.1.1 the grant of the Planning Permission; and

4.1.2 the Commencement of the Development,

4.2 The provisions of Clauses 10.1.1, 10.1.3, 14, 19 and 2020 (legal costs, monitoring and administering, notifications, jurisdiction and delivery) shall come into effect immediately upon completion of this Deed and:

4.2.1 Paragraphs [ ] of the [ ] Schedule which shall come into effect immediately on grant of Planning Permission.

#### **5. THE COVENANTS by Owner**

5.1 The Owner covenants with both the District Council and the County Council as set out herein and covenants with

5.1.1 the District Council as set out in the Second Schedule, the Third Schedule and the Fourth ScheduleSecond ScheduleThird ScheduleFourth Schedule; and

5.1.2 the County Council as set out in the Sixth Schedule, Seventh Schedule, Ninth Schedule, Tenth Schedule and Eleventh Schedule.

#### **6. THE DISTRICT COUNCIL'S COVENANTS**

The District Council covenants with the Owner as set out in the Fifth Fifth Schedule.

#### **7. THE COUNTY COUNCIL'S COVENANTS**

The County Council covenants with the Owner as set out in the Eighth Schedule.**Error! Reference source not found.**

#### **8. THE DEVELOPER'S COVENANTS**

8.1 The Developer acknowledges that the Owner has entered into this Deed with its consent and that the Site and the Secondary School Site is bound by the obligations contained in this Deed and that this Deed will be binding on successors in title to the

Owner PROVIDED THAT the Developer shall have no liability under this Deed (save for clause 10.1) unless it takes ownership or possession of the Site in which case it too will be bound by the obligations as if it were a person deriving title from the Owner

**9. BOND**

**10. MISCELLANEOUS**

10.1 The Developer shall pay or secure the payment:

10.1.1 to the District Council on the execution and completion of this Deed of the reasonable legal costs of the District Council incurred in the negotiation of the Deed and the preparation and execution of this Deed;

10.1.2 to the County Council on the execution and completion of this Deed of the reasonable legal costs of the County Council incurred in the negotiation of the Deed and the preparation and execution of this Deed

10.1.3 on completion of this Deed pay

(a) to the District Council the sum of **£5,000.00** (five thousand pounds): and

(b) to the County Council the sum of **£[XX]** (XX pounds)

as a contribution towards the cost of monitoring and administering compliance with the obligations in this Deed.

10.2 The Owner shall reimburse the District Council and the County Council in respect of all legal and administrative costs reasonably and properly incurred in connection with any enforcement of any of the provisions in this Deed should the need for enforcement arise in the reasonable opinion of the District Council or the County Council

10.3 Without prejudice to the District Council's or the County Council's statutory rights of entry the Owner shall comply with any reasonable and proper requests of the District Council or County Council to have access to any part of the Site (other than completed Dwellings) and the Secondary School Site upon giving the Owner reasonable notice for the purpose of monitoring compliance with the obligations contained herein.

10.4 No provisions of this Deed shall be enforceable under the Contracts (Rights of Third Parties) Act 1999.

10.5 This Deed shall be registrable as a local land charge by the District Council.

10.6 Where the agreement, approval, consent or expression of satisfaction is required by the Owner from the District Council or County Council under the terms of this Deed such agreement, approval or consent or expression of satisfaction shall not be unreasonably withheld or delayed unless there is an express provision to the contrary and in the case of the District Council or the County Council, any such agreement, consent, approval or expression of satisfaction shall be given on behalf of:

10.6.1 the District Council by the Assistant Director: Planning and Development; and

10.6.2 the County Council by the Director for Environment and Place,

10.7 Following the District Council and the County Council being notified in writing and the District Council and the County Council being satisfied of the performance and satisfaction of all the obligations contained in this Deed (as confirmed in writing) the District Council shall forthwith effect the cancellation of all entries made in the Register of Local Land Charges in respect of this Deed.

10.8 Insofar as any clause or clauses of this Deed are found (for whatever reason) to be invalid illegal or unenforceable then such invalidity illegality or unenforceability shall not affect the validity or enforceability of the remaining provisions of this Deed and insofar as reasonably practicable the parties shall amend that clause or clauses in such reasonable manner as achieves the intention of the parties without illegality.

10.9 This Deed shall cease to have effect (insofar only as it has not already been complied with) if the Planning Permission shall be quashed, revoked or otherwise withdrawn or (without the consent of the Owner ) it is modified by any statutory procedure or expires prior to the Commencement of the Development.

10.10 No person shall be liable for any breach of any of the planning obligations or other provisions of this Deed after it shall have parted with its entire interest in the Site but without prejudice to liability for any subsisting breach arising prior to parting with such interest Provided Always that the Owner shall remain liable for any breach of those

provisions and obligations contained in the [school site Schedules] to this Deed insofar as they do not constitute planning obligations within the ambit of Section 106 of the Act that occurs after he has parted with the whole of his interest in the Site unless and until there has been delivered to the County Council without expense to the County Council a deed of covenant duly executed as a deed in the form attached at Appendix [ ] to this Deed by a successor in title who is the owner of a substantial part of the Site with sufficient interest and control to secure compliance with such provisions.

10.11 Except for any provision hereof that restricts or prevents any Dwelling being occupied or prevents a number of Dwellings being occupied until another provision hereof is complied with this Deed shall not be enforceable

10.11.1 against owner-occupiers or tenants of any Dwelling nor any mortgagee or chargee of the interest of any such owner-occupier nor against those deriving title from them;

10.11.2 any statutory undertaker whose interest in the Site derives from having equipment necessary to carry out their undertaking on the Site or on adjoining land

10.12 Neither the District Council, the County Council nor the successors in title and assigns of either of them in so far as it holds an interest in any part of the Site as a result of the operation of this Deed shall be liable for any breach of this Deed but without prejudice to any liability of the District Council or as applicable the County Council to comply with any obligations expressly given by the District Council or as applicable the County Council in this Deed PROVIDED THAT this clause 10.12 shall not apply in relation to land and/or buildings transferred to the District Council pursuant to the provisions relating to Affordable Housing in the Second Schedule**Error! Reference source not found..**

10.13 Any obligation for the payment of money attaches to each and every part of the Site subject to the provisions of clauses **Error! Reference source not found.** and 10.11

10.14 Nothing contained or implied in this Deed shall prohibit or limit the right to develop any part of the Site in accordance with a planning permission other than the Planning

Permission and/or a Qualifying Permission granted (whether or not on appeal) after the date of this Deed.

10.15 If the District Council consents pursuant to a Qualifying Application to any variation or release of any condition contained in the Planning Permission (or a previous Qualifying Permission) or if any such condition is varied or released following an appeal under section 78 of the Act the covenants and provisions of this Deed shall be deemed to bind the Qualifying Permission and to apply in equal terms to that Qualifying Permission save that where a different section 106 obligation is agreed by the District Council and/or the County Council as being binding on any Qualifying Permission this obligation shall not apply to that permission if that separate section 106 obligation expressly states that it is in substitution for the obligations in this obligation.

10.16 Any mortgagee shall be liable only for any breach of the provisions of this Deed during such period as he is a mortgagee in possession of the Obligations Area.

#### **11. WAIVER**

No waiver (whether expressed or implied) by the District Council or the County Council of any breach or default in performing or observing any of the covenants terms or conditions of this Deed shall constitute a continuing waiver and no such waiver shall prevent the District Council or the County Council from enforcing any of the relevant terms or conditions or for acting upon any subsequent breach or default.

#### **12. NO FETTER**

Nothing in this Deed shall prejudice or affect the rights powers duties and obligations of the District Council or the County Council in the exercise of their respective functions in any capacity.

#### **13. CHANGE OF OWNERSHIP**

The Owner agrees with the District Council and separately with the County Council to give each written notice of any change in the ownership of any of their interests in the Site within 10 working days and in any event before the next Trigger Event that arises following such change in ownership if sooner occurring before all the obligations under this Deed have been discharged such notice to give details of the transferee's full

name and registered office if a company or usual address if not together with the area of the Site or unit of occupation purchased by reference to a plan provided that this clause shall not apply to:

13.1 the sale of individual Dwellings on the Development; or

13.2 any disposal of any part or parts of the Site for servicing or utility requirements or to a statutory body or service supply company for the purpose of carrying out their undertaking

#### **14. NOTIFICATIONS**

The Owner agrees with the District Council and the County Council:

14.1 to notify the District Council and the County Council in writing no later than 5 Working Days prior to the anticipated date of each of the following:

14.1.1 Commencement of the Development;

14.1.2 first Occupation of each Phase of the Development;

14.1.3 Occupation of [XX]% (XX per cent) of the Dwellings Constructed on each Phase of the Development; and

14.1.4 Occupation of [XX]% (XX per cent) of the Dwellings Constructed on each Phase of the Development

and not to Commence Occupy or cause or permit Occupation until the appropriate notice has been given and five Working Days have elapsed since it was served;

14.2 to notify the District Council and the County Council in writing of the actual date of each such event referred to in clause 14.1 above no later than 10 Working Days after the event occurs;

14.3 to notify the District Council and the County Council within ten Working Days of the each of the usual quarter days (25 March, 24 June, 29 September and 25 December) the number of Dwellings on each Phase of the Development which have been

Occupied on that quarter day and their addresses/plot numbers together with a plan showing plot numbers

**15. INTEREST**

- 15.1 If any payment due under this Deed is paid after the Due Date, Interest will be payable on the amount owed from the Due Date to the date of full payment.
- 15.2 Interest shall be calculated and accrue daily and shall be compounded monthly if any payment is made more than three months after the Due Date

**16. VAT**

- 16.1 All consideration given in accordance with the terms of this Deed shall be exclusive of any value added tax properly payable and the Owner shall pay to the District Council and separately to the County Council any value added tax properly payable on any sums paid to the District Council and/or the County Council or works undertaken under this Deed upon presentation of any appropriate value added tax invoice addressed to the Owner .

**17. INDEXATION**

- 17.1 The Owner hereby agrees that any payment of District Council Contributions including commuted sums due shall be subject to indexation so that such sums or values shall be increased by the percentage change in the BCIS All-in Tender Price Index from time to time in force from the date of this Deed until the date of receipt of the payment by the District Council, unless express provision is made elsewhere in this Deed.

**18. NOTICES**

- 18.1 Any notice or notification to be given to the District Council under this Deed shall be sent to the District Council attention of the Assistant Director Planning and Development at Bodicote House, Bodicote, Banbury, Oxfordshire, OX15 4AA or to such other person at such other address as the District Council shall direct from time to time.

- 18.2 Any notice or notification to be given to the County Council under this Deed shall be sent to the Director of Environment and Place, Oxfordshire County Council, County Hall, New Road, Oxford, OX1 1ND (quoting reference 19/01047/O) or to such other person at such other address as the County Council shall direct from time to time.
- 18.3 Any notice to be given to the Owner shall be sent to the address for service of the Owner set out at the beginning of this Deed or to such other person at such address as the Owner shall notify to the District Council and separately to the County Council from time to time.
- 18.4 Unless the time of actual receipt is proved, a notice, demand or communication sent by the following means is to be treated as having been served:
- 18.4.1 if delivered by hand, at the time of delivery;
  - 18.4.2 if sent by post, on the second Working Day after posting; or
  - 18.4.3 if sent by recorded delivery, at the time delivery was signed for.
- 18.5 If a notice, demand or any other communication is served after 16:00 on a Working Day, or on a day that is not a Working Day, it is to be treated as having been served on the next Working Day.
- 18.6 For the avoidance of doubt, where proceedings have been issued in the Courts of England and Wales, the provisions of the Civil Procedure Rules must be complied with in respect of the service of documents in connection with those proceedings.
- 18.7 Any notice or notification to be given pursuant to this Deed shall be in writing and shall, unless otherwise agreed, be delivered by hand or sent by first class post, pre-paid or recorded delivery.

## **19. GOVERNING LAW AND JURISDICTION**

This Deed is governed by and interpreted in accordance with the law of England and Wales and the parties submit to the exclusive jurisdiction of the courts of England and Wales.

## **20. DELIVERY**

The provisions of this Deed (other than this clause which shall be of immediate effect) shall be of no effect until this Deed has been dated.

## **21. DATA PROTECTION**

The parties to this Deed acknowledge and agree that information as to compliance with obligations pursuant to this Deed (including as to whether or not contributions have been paid) may be passed to:

- 21.1 persons who make enquiries on such matters and who advise that they or their clients are proposing to acquire an interest in the Site and it is acknowledged that the recipients of such information may then disseminate it further
- 21.2 any person when so required in order to comply with statutory requirements including the Freedom of Information Act 2000 and/or the Environmental Information Regulations 2004

## **22. Disputes**

- 22.1 This clause shall apply only to a Relevant Dispute
- 22.2 A Relevant Dispute in the context of this agreement arises where any party requires or seeks the approval or consent of another party pursuant to any provision of this Deed and that approval or consent is refused or is not given within 20 Working Days but FOR THE AVOIDANCE OF DOUBT:
  - 22.2.1 disputes relating to the construction, interpretation and/or the application of this agreement shall only be determined by an Expert (as defined in this clause 20) with the express further agreement of all other parties and in the absence of such agreement can only be determined by a Court of competent jurisdiction;
  - 22.2.2 any dispute relating to a refusal or failure to determine any application (whether pursuant to section 106A of the Act or otherwise) to modify or

discharge any provision hereof shall not constitute a dispute to be determined pursuant to this clause but in accordance with section 106B of the Act or section 84A of the Law of Property Act 1925 or otherwise as appropriate.

22.3 Any party may by serving notice on all the other parties (the Notice) require a dispute to be referred to an Expert (as hereinafter defined) for determination.

22.4 The Notice must:

22.4.1 specify the nature, basis and brief description of the dispute;

22.4.2 identify the clause or paragraph of a Schedule or Appendix pursuant to which the dispute has arisen; and

22.4.3 propose a person to determine the dispute ('the Expert').

22.5 The Expert may be agreed upon by the parties and in the absence of such agreement within one month of the date that the Notice is issued pursuant to clause 22.1 either party may request that the following nominate the Expert at their joint expense:

22.5.1 if such dispute relates to matters requiring a specialist chartered surveyor, the President of the Royal Institute of Chartered Surveyors to nominate the Expert;

22.5.2 if such dispute relates to matters requiring a specialist chartered civil engineer or specialist transport advice, the President of the Institution of Civil Engineers to nominate the Expert;

22.5.3 if such dispute relates to matters requiring a specialist chartered accountant, the President of the Institute of Chartered Accountants in England and Wales to nominate the Expert;

22.5.4 if such dispute relates to Affordable Housing the Expert shall be nominated by the President of the Royal Town Planning Institute; and

22.5.5 in all other cases, the President of the Law Society to nominate the Expert as he thinks appropriate

- 22.6 The parties may agree to appoint joint Experts or (in default of agreement) invite joint Experts to be nominated pursuant to clause 22.4.3 and in which case 'Expert' shall mean both or all of them.
- 22.7 If an Expert (including one or more jointly nominated experts) nominated or appointed pursuant to this clause shall die or decline to act another Expert may be appointed in his place in accordance with the provisions of clause 22.4.3.
- 22.8 The Expert will be appointed subject to an express requirement that he reaches his decision and communicates it to the parties within the minimum practicable timescale allowing for the nature and complexity of the dispute and in any event not more than 20 Working Days from the date of the notice of his appointment given pursuant to paragraph 22.8.
- 22.9 Notice in writing of the appointment of an Expert pursuant to this Schedule shall be given by the Expert to the parties and he shall invite each of the parties to submit to him within ten Working Days written submissions and supporting material and will afford to each of the said parties an opportunity to make counter submissions within a further five Working Days in respect of any such submission and material.
- 22.10 The Expert shall act as an expert and not as an arbitrator but shall consider any written representation submitted to him within the period specified in this Schedule although he shall not be in any way limited or fettered thereby and shall determine the dispute in accordance with his own judgement.
- 22.11 The Expert shall give notice of his decision in writing.
- 22.12 If the Expert consists of more than one person the decision shall be a joint decision approved by all such persons and the decision will (in the absence of manifest error) be final and binding on the parties hereto.
- 22.13 If for any reason the Expert fails to make a decision and give notice thereof in accordance with this clause the party or parties may apply to the President of the Law Society for a substitute to be appointed in his place (which procedure may be repeated as many times as necessary).

22.14 The Expert's costs shall be in the Expert's award or in the event that no determination as to costs is made, such costs will be borne by the parties to the dispute in equal shares.

22.15 Nothing in this clause shall be taken to fetter the parties' ability to seek legal redress in the Courts (or otherwise) for any breach of the obligations in this Deed.

**IN WITNESS** whereof the parties hereto have executed this Deed on the day and year first before written.

## **FIRST SCHEDULE**

### **DETAILS OF THE OWNER'S TITLE, AND DESCRIPTION OF THE SITE**

1. the land at the North East of Oxford Road, West of Oxford Canal & East of Bankside, Banbury shown edged red on the Plan attached at the Annex to this Deed.
2. the Owner is the freehold owner of the Site, being the land registered at HM Land Registry under title number ON243345.

**ANNEX**

**THE PLAN**

## SECOND SCHEDULE AFFORDABLE HOUSING

### COVENANTS WITH THE DISTRICT COUNCIL - AFFORDABLE HOUSING

#### 1. DEFINITIONS

1.1 In this Schedule the following additional definitions shall apply (for the avoidance of doubt any definition which does not appear below shall be given the meaning allocated to it in the main body of this Deed):-

Expression	Meaning
<b>"Affordable Housing"</b>	housing for sale or rent that will be available for those whose needs are not met by the market (including housing that provides a subsidised route to home ownership and/or is for essential local workers) and which meets the definition in Annex 2 of the NPPF
<b>"Affordable Housing Dwellings"</b>	those Dwellings comprised in the Development and provided in accordance with the appropriate Affordable Housing Parcel Scheme and the agreed Affordable Housing Tenure Mix
<b>"Affordable Housing Parcel Scheme"</b>	<p>a scheme submitted to and agreed by the District Council pursuant to paragraph <b>Error! Reference source not found.</b> of this Schedule in relation to the Parcel to which the scheme relates which sets out:</p> <ul style="list-style-type: none"><li>• details of the number and locations of the Affordable Housing Dwellings within the Parcel (such number to be no less than 30% of all Dwellings within the Parcel unless otherwise agreed in writing between the Owner and the District Council and PROVIDED THAT for all</li></ul>

Expression	Meaning
	<p data-bbox="671 264 1375 358">Parcels across the Site this shall be between 25% and 35% of the Dwellings for each Parcel);</p> <ul data-bbox="624 403 1375 1008" style="list-style-type: none"> <li data-bbox="624 403 1375 616">• details of the types and size of the Affordable Housing Dwellings provided that the Affordable Housing Dwellings shall be in a range of unit types and sizes;</li> <li data-bbox="624 660 1375 817">• confirmation of tenures of the Affordable Housing Dwellings to which the scheme relates which shall reflect the Affordable Housing Tenure Mix;</li> <li data-bbox="624 862 1375 1008">• confirmation of the Affordable Housing Standards arrangements for the Affordable Housing Dwellings to which the scheme relates.</li> </ul>
<b>"Affordable Housing Site"</b>	<p data-bbox="624 1052 1375 1534">that part or parts of the Site or any building or any buildings on the Site upon or within which there will be provided Affordable Housing Dwellings together with full rights of access to each Affordable Housing Site from the Site and the provision of all necessary Infrastructure and connections thereto and the necessary installations thereof for the Affordable Housing Dwellings to be constructed on the Affordable Housing Site</p>
<b>"Affordable Housing Standards"</b>	<p data-bbox="624 1579 1375 1668">the design criteria with which the Affordable Housing Dwellings shall comply namely:</p> <ul data-bbox="624 1724 1375 1926" style="list-style-type: none"> <li data-bbox="624 1724 1375 1926">• the Affordable Housing Dwellings shall be constructed in accordance with the relevant Building Regulation standards applicable at the time of Construction;</li> </ul>

## Expression

## Meaning

- shall be designed to the same external design as the Market Dwellings so as to be indistinguishable from the Market Dwellings;
- shall be located in clusters of no more than 15 Affordable Housing Dwellings, with no more than 10 units of Affordable Rented Housing in any one cluster unless otherwise agreed in writing with the District Council or permitted pursuant to any Qualifying Application but only where such alternative clustering is considered not to have adverse impacts on community cohesion or visual amenity;
- 50% of the Affordable Rented Housing shall comply with Building Regulations Optional Requirement M4(2) Category 2: Accessible and adaptable dwellings;
- 1% of the Affordable Housing Dwellings on the whole Development to be provided as fully wheelchair accessible and built in accordance with Building Regulations Optional Requirement M4(3) Category 3: Wheelchair user dwellings.

## "Affordable Housing Tenure Mix"

the mix of tenure and dwelling types of the Affordable Housing Dwellings whereby 70% (seventy per cent) shall be Affordable Rented Housing and 30% (thirty per cent) shall be Social Rented Housing and/or Shared Ownership Housing or such alternative mix of tenure as at any time may be submitted to the District Council for approval in writing

<b>Expression</b>	<b>Meaning</b>
<b>"Affordable Rented Housing"</b>	rented housing provided by Registered Providers to Qualifying Persons which is not subject to the national rent regime but shall be in line with HCA's Rent Standard Guidance for Affordable Rent and the rents shall be no more than 80% of the local market rent (including service charge) or the relevant Local Housing Allowance rate in force at the time the property is advertised for letting whichever is the lower
<b>"Allocate"</b>	any procedure whereby there are conferred or transferred rights of residential occupation in respect of an Affordable Housing Dwelling which could for the avoidance of doubt include the first occasion on which an Affordable Housing Dwelling is occupied and any subsequent changes in the occupier and 'allocating' 'allocated' and 'allocations' should be construed accordingly
<b>"Allocations Scheme"</b>	the District Council's allocation policy from time to time which determines the District Council's priorities and procedures when allocating accommodation in accordance with the requirements of Section 166A of the Housing Act 1996 (and any amendment, re-enactment or successor provision)
<b>"Chargee"</b>	any mortgagee or chargee of the Registered Provider of the Affordable Housing Site or any part of it and includes any receiver (including an administrative receiver), manager or administrator (including a Housing Administrator under the provisions of the Housing and Planning Act 2016)

<b>Expression</b>	<b>Meaning</b>
	howsoever appointed or any person appointed under any security documentation to enable such mortgagee or chargee to realise its security
<b>“HCA”</b>	means the Homes and Communities Agency also known as Homes England and any successor body carrying on substantially the same functions
<b>"Help to Buy Agent"</b>	that organisation which is appointed by the HCA to assess eligibility for and market low cost home ownership products
<b>"Infrastructure"</b>	<p>in relation to each Affordable Housing Site:</p> <ul style="list-style-type: none"> <li>• roads and footpaths to serve the Affordable Housing Site;</li> <li>• temporary services for contractors and a haul road for the use of contractors;</li> <li>• adequate inverts for the foul and surface water drains sufficient to serve the drainage requirements of the Affordable Housing Site;</li> <li>• pipes sewers and channels sufficient to serve the Affordable Housing Site;</li> </ul>

## Expression

## Meaning

- spur connections to agreed inverts (to be available at a time or times to be agreed with the Registered Provider) from the Owner's foul and surface water drain run serving the Development up to the boundaries of the Affordable Housing Site such spur connections to be to a specification agreed with the Registered Provider;

and the following services:

- a standard fire hydrant supply and fire hydrants in the public highway or in any other readily accessible positions such positions to be agreed with the Registered Provider;
- a water supply connection from the mains (size and termination position to be agreed with the Registered Provider);
- an electricity supply (size and termination position to be agreed with the Registered Provider);
- a gas supply (size and termination position to be agreed with the Registered Provider) (should it be required for the Affordable Housing Dwellings);
- a telephone spur (terminating in a junction box at a location agreed with the Registered Provider);

Expression	Meaning
	<ul style="list-style-type: none"> <li>• if digital communication systems (for example cable television or fibre optic broadband) are provided to the Development to provide a spur to the Affordable Housing Site (final locations to be agreed with the Registered Provider);</li> </ul>
	<p>PROVIDED THAT the Owner shall not be responsible for incurring the costs of any connection charges or actual supply for such Infrastructure to the Affordable Housing Site nor to the Affordable Housing Dwellings</p>
<b>"Mortgage Land"</b>	<p>the Affordable Housing Site or any part of it which is mortgaged or charged to the Chargee</p>
<b>"Nominations Agreement"</b>	<p>an agreement which shall be entered into between the District Council and the Registered Provider, both parties acting reasonably, in relation to the Affordable Housing Dwellings on the Site and which shall guide in conjunction with the Allocations Scheme those persons eligible to be nominated to the Affordable Housing Dwellings</p>
<b>"Qualifying Persons"</b>	<p>those persons who are assessed by the District Council under its current Allocations Scheme and are nominated to Affordable Rented Housing and Social Rented Housing in accordance with this Allocations Scheme and the Nominations Agreement</p>
<b>"Registered Provider"</b>	<p>a private provider of Affordable Housing which is designated in the register maintained by the Regulator or any similar future authority carrying on substantially the same regulatory or supervisory</p>

## Expression

## Meaning

functions pursuant to section 111 of the Housing and Regeneration Act 2008 as a non-profit organisation under sub-sections 115(1)(a) or 278(2) of the Act or which is designated in that register as a profit-making organisation under section 115(1)(b) of the Housing and Regeneration Act 2008 and which is EITHER on the District Council's list of preferred partners OR has been approved in writing by the District Council having regard to the performance criteria applicable to an organisation with preferred partner status [(and where such request has been submitted it shall be deemed approved where there is no response from the District Council within 6 weeks of receipt of such request by the District Council)]

## "the Regulator"

the Regulator of Social Housing constituted pursuant to the Housing and Regeneration Act 2008 (as amended) and any successor or successors for the time being and any similar future authority responsible for the regulation of social housing

## "Shared Ownership Housing"

housing offered via the Registered Provider under the terms of a lease which accords with the HCA Shared Ownership Model Lease by which a lessee may acquire an initial share or shares of between 25% - 75% of the equity in an Affordable Housing Dwelling from the Registered Provider who retains the remainder and may charge a rent of up to 2.75% on the unsold equity and **"Shared Ownership Dwelling"** shall be construed accordingly

Expression	Meaning
<b>“Social Rented Housing”</b>	Affordable Housing occupied as rented housing owned and managed by Registered Providers for which guideline target rents are determined though a national rent regime as described in Annex 2 of the NPPF and <b>“Social Rented Unit(s)”</b> shall be construed accordingly
<b>“Staircasing”</b>	the exercise by the owner-occupier of a Shared Ownership Dwelling of the right to purchase additional equity shares up to 100% of the entire interest in the Dwelling after which the rent payable on any equity share retained by the Registered Provider shall be reduced proportionally and ‘Staircases’ or any other derivative thereof shall be construed accordingly

## **2. AFFORDABLE HOUSING PARCEL SCHEME**

2.1 The Owner covenants with the District Council that it shall not Commence Development or cause or permit the Commencement of Development of any Parcel of the Development until the Affordable Housing Parcel Scheme for that Parcel has been submitted to and approved by the District Council in writing (and where such scheme has been submitted it shall be deemed approved where there is no response from the District Council within 6 weeks of receipt of the scheme by the District Council SAVE THAT where such the Affordable Housing Parcel Scheme has been submitted to the District Council as part of a Qualifying Application for any Parcel such scheme shall not be deemed approved unless and until the Affordable Housing Parcel Scheme has been listed as approved as part of a Qualifying Permission issued pursuant to the Qualifying Application).

2.2 The Owner shall be permitted to seek to amend any approved Affordable Housing Parcel Scheme at any time following the initial approval of the relevant Scheme and nothing in this Deed shall prevent the Owner from providing a Dwelling as Affordable Housing

in addition to the Affordable Housing Dwellings that the Owner is required to provide under this Deed SAVE THAT in seeking to vary the Affordable Housing Parcel Scheme in any way the Owner shall submit such amendments to the District Council in writing for approval (and where such amended scheme has been submitted it shall be deemed approved where there is no response from the District Council within 6 weeks of receipt of the scheme by the District Council SAVE THAT where such the Affordable Housing Parcel Scheme has been submitted to the District Council as part of a Qualifying Application for any Parcel such scheme shall not be deemed approved unless and until the Affordable Housing Parcel Scheme has been listed as approved as part of a Qualifying Permission issued pursuant to the Qualifying Application) IT BEING AGREED THAT the Council shall not be obliged to accede to any such request provided such action would not be unreasonable.

### **3. PROVISION AND USE**

#### **3.1 The Owner covenants with the District Council:**

3.1.1 not to Occupy or cause or permit the Occupation of more than thirty five per cent (35%) of the Market Dwellings on any Parcel until there has been provided the Infrastructure to serve the Affordable Housing Site on that Parcel; and

3.1.2 not to Occupy or cause or permit the Occupation of more than sixty six per cent (66%) of the Market Dwellings on any Parcel (or such higher percentage trigger as may be agreed in writing by the District Council) until the Affordable Housing Dwellings on that Parcel have been Constructed and made ready for Occupation and either the freehold or long leasehold interest in the Affordable Housing Site together with the Affordable Housing Dwellings Constructed thereon have been transferred to a Registered Provider on terms to be agreed between the Owner and the Registered Provider together with all rights for Infrastructure and other rights reasonably necessary for the beneficial enjoyment of the Affordable Housing Dwellings Constructed thereon and with a good and marketable title and with vacant possession and capable of being fully serviced and properly connected to the public highway.

#### **3.2 Subject to paragraph 4.1 below the Owner covenants with the District Council:**

3.2.1 not to use or cause or permit the use of the Affordable Housing Site or any part thereof or the Affordable Housing Dwellings erected thereon for any purpose other than for the provision of Affordable Housing in accordance with this Deed;

3.2.2 not without the consent in writing of District Council to transfer the freehold interest or the long leasehold interest in the Affordable Housing Site or any part thereof or the Affordable Housing Dwellings erected thereon except to a Registered Provider provided that consent shall not be required for any mortgage or charge of the freehold interest and provided that this shall not apply to the tenancies being granted to any of the occupiers of individual Affordable Housing Dwellings within either the Affordable Rented Housing, Social Rented Housing or the Shared Ownership Housing to occupiers of individual Affordable Housing Dwellings;

3.2.3 to provide the Affordable Housing Dwellings in accordance with the Affordable Housing Tenure Mix and the Affordable Housing Standards.

#### **4. CHARGEES OWNER/OCCUPIER AND UTILITY EXEMPTIONS**

4.1 It is hereby agreed and declared that Paragraph 3.2 above will not be binding on a bona fide purchaser for value from a Chargee exercising its power of sale (other than a purchaser which is a Registered Provider) or the successors in title of such purchaser or persons deriving title therefrom provided that the Chargee:

4.1.1 has first served written notice on the District Council of its intention to exercise its power of sale or other power or right conferred upon it, in its mortgage, charge or other security; and

4.1.2 has used reasonable endeavours over a period of three months from receipt of notification pursuant to paragraph 4.1.1 above to dispose of the Mortgage Land subject to any leases and tenancies then subsisting and to the terms of this Deed to a Registered Provider or the District Council; but

4.1.3 notwithstanding the reasonable endeavours of the Chargee no transfer of the Mortgage Land to either the District Council or a Registered Provider has been completed within those 3 months then the Chargee shall be able to sell the Mortgage Land free from

the restrictions in paragraph 3.2 above with the effect that they shall cease to bind any person obtaining title to the Mortgage Land.

PROVIDED ALWAYS that nothing herein shall require the Chargee to dispose of the Mortgage Land at a price which is less than the greater of the open market value of the Mortgage Land (subject to the restrictions contained within this Schedule) or all sums due under the terms of the Chargee's mortgage or charge together with costs and expenses of the sale of the Mortgage Land and interest due under the mortgage

4.2 The provisions of paragraph 3.2 will not be binding on:

4.2.1 any purchaser pursuant to the exercise of a statutory or voluntary right to buy, preserved right to buy or right to acquire or any owner of Shared Ownership Housing who has staircased up to 100% (or any successor in title thereto) or to any completed Affordable Housing Dwellings where a Registered Provider sells to a tenant through Social Homebuy funded pursuant to Section 19(3) of the Housing and Regeneration Act 2008 or any amendment or replacement thereof or any mortgagee or chargee of any such purchaser nor any administrator, administrative receiver, fixed charge receiver including any receiver appointed under the Law of Property Act 1925 or any other person appointed under any security documentation by such mortgagee or any person deriving title through such persons; or

4.2.2 any statutory undertaker in respect of any part of the Site which the statutory undertaker occupies as part of its undertaking.

## **5. ALLOCATION**

5.1 The Owner will not Allocate or cause or permit to be Allocated any of the Affordable Housing Dwellings other than as follows:

5.1.1 the Affordable Housing Dwellings shall only be Allocated to Qualifying Persons in accordance with the District Council's Allocations Scheme and in accordance with the terms of the Nominations Agreement;

5.1.2 the Shared Ownership Housing shall be marketed through the Registered Provider's website or other marketing media used by the Registered Provider or where possible the Help to Buy Agent or such other appointed body for the region and only

those deemed eligible under the Help to Buy Agent's criteria shall be considered for the Shared Ownership Housing.

## **6. TRANSFER TO OTHER REGISTERED PROVIDERS**

For the avoidance of doubt, if the Affordable Housing Dwellings are vested or transferred to another Registered Provider pursuant to a proposal made by the HCA pursuant to Sections 143A-169 of the Housing and Regeneration Act 2008 (or any statutory provision amending or replacing the same) then the provisions of this Deed shall continue in respect of such other Registered Provider.

**THIRD SCHEDULE**  
**PUBLIC OPEN SPACE, SPORTS FACILITIES, ALLOTMENTS, AND PLAY FACILITIES**  
**PROVISIONS**

**1. SUDS**

1.1. The Owner hereby covenants with the District Council

1.1.1 Not to cause or permit the Commencement of the Development on a Parcel until a SuDS Scheme for that Parcel has been submitted to and approved in writing by the District Council.

1.1.2 To implement the SuDS in accordance with the SuDS Scheme approved by the District Council under paragraph 1.1.1 of this Third Schedule and the Phasing Plan.

1.1.3 Following the completion of the works for the provision of the SuDS on a Parcel in accordance with the SuDS Scheme for that Parcel the Owner covenants to maintain and manage or to procure that a Management Body manages and maintains the SuDS on that Parcel in perpetuity.

1.1.4 In the event that the maintenance of the SuDS on a Parcel is to be carried out by a Management Body the Owner covenant to submit details of the appointed Management Body to the Council in writing within 7 Working Days of the appointment of the Management Body.

**2. Sports Facilities**

2.1 The Owner hereby covenants with the District Council as follows:

2.1.1. to submit the Sports Provision Scheme to the District Council for written approval prior to the Occupation of the [200]<sup>th</sup> Dwelling.

2.1.2. Not to Occupy or permit Occupation of more than the [200]<sup>th</sup> Dwelling until the Sports Provision Scheme has been submitted and approved in writing by the District Council

- 2.1.3. To Construct and fit out the Sports Facilities in accordance with the Sports Provision Scheme approved by the District Council prior to the Occupation of the [500]<sup>th</sup> Dwelling.
- 2.1.4. Not to Occupy or permit the Occupation of more than the [500]<sup>th</sup> Dwelling until the Sports Facilities have been Constructed and fitted out in accordance with the Sports Provision Scheme approved by the District Council.
- 2.1.5. Once the Sports Facilities have been Constructed in accordance with the Sports Provision Scheme the Owner shall invite the District Council (or such other appropriate body that may be approved in writing by the District Council) to inspect the Sports Facilities
- 2.1.6. Upon the receipt of an invitation to inspect the Sports Facilities in accordance with paragraph 2.1.5 above, the District Council will carry out an inspection of the Sports Facilities within 10 Working Days of receipt of the request (or unless otherwise agreed between the Owner and the District Council);
- 2.1.7. Following the completion of the inspection in accordance with paragraph 2.1.6 above, the District Council shall issue a Practical Completion Notice or a Notice of Defect within 10 Working Days of the inspection (unless otherwise agreed between the Owner and the District Council);
- 2.1.8. If a Notice of Defect is issued in accordance with paragraph 2.1.7 above, the Owner shall carry out remedial works to the Sports Facilities in accordance with the requirements of the Notice of Defect to the District Council's satisfaction and invite the District Council to re-inspect the Sports Facilities in accordance with paragraphs 2.1.5. to 2.1.6. of this Schedule until the District Council is satisfied and issues a Practical Completion Notice in relation to the Sports Facilities;
- 2.1.9. Prior to the operation of the Sports Facilities the Owner shall have:
- 2.1.9.1. Obtained a Practical Completion Notice from the District Council in accordance with paragraph 2.1.7 above; or

2.1.9.2. Complied with the Notice of Defect issued by the District Council in accordance with paragraph 2.1.8 above and shall have obtained a Practical Completion Notice evidencing this.

2.1.10. The Sports Facilities shall not become operational until:

2.1.10.1. The Owner has been issued with a Practical Completion Notice in accordance with paragraph 2.1.7; or

2.1.10.2. The Owner has complied with the Notice of Defect in accordance with paragraph 2.1.8 above and shall have obtained a Practical Completion Notice evidencing this

### **3. ALLOTMENTS**

3.1.. The Owner hereby covenant with the Council as follows:

3.1.1. Prior to the Construction of the Allotment Works not to build nor erect any buildings upon the land for the Allotment Works.

3.1.2. to submit the Allotment Scheme to the District Council for written approval prior to the Occupation to the 100<sup>th</sup> Dwelling;

3.1.3. Not to Occupy or permit the Occupation of more than the 100<sup>th</sup> Dwelling until the Allotment Scheme has been submitted and approved in writing by the District Council.

3.1.4. To Construct the Allotment Works in accordance with the Allotment Scheme approved by the District Council prior Occupation of the 300<sup>th</sup> Dwelling.

3.1.5. Not to Occupy or permit the Occupation of more than the 300<sup>th</sup> Dwelling until the Allotment Works have been Constructed in accordance with the Allotment Scheme approved in writing by the District Council.

- 3.1.6. Once the Allotment Works have been Constructed in accordance with the Allotment Scheme the Owner shall invite the District Council (or such other appropriate body that may be approved in writing by the District Council) to inspect the Allotment Works;
- 3.1.7. Upon the receipt of an invitation to inspect the Allotment Works in accordance with paragraph 3.1.6 above, the District Council will carry out an inspection of the Allotment Works within 10 Working Days of receipt of the request (or unless otherwise agreed between the Owner and the District Council);
- 3.1.8. Following the completion of the inspection in accordance with paragraph 3.1.7 above, the District Council shall issue a Practical Completion Notice or a Notice of Defect within 10 Working Days of the inspection (unless otherwise agreed between the Owner and the District Council);
- 3.1.9. If a Notice of Defect is issued in accordance with paragraph 3.1.8 above, the Owner shall carry out remedial works to the Allotment Works in accordance with the requirements of the Notice of Defect to the District Council's satisfaction and invite the District Council to re-inspect the Allotment Works in accordance with paragraphs 3.1.6.. to 3.1.7. of this Schedule until the District Council is satisfied and issues a Practical Completion Notice in relation to the Allotment Works;
- 3.1.10. Prior to the operation of the Allotment Works the Owner shall have:
- 3.1.10.1. Obtained a Practical Completion Notice from the District Council in accordance with paragraph 3.1.8 above; or
- 3.1.10.2. Complied with the Notice of Defect issued by the District Council in accordance with paragraph 3.1.9 above and shall have obtained a Practical Completion Notice evidencing this.
- 3.1.11. The Allotment Works shall not become operational until:
- 3.1.11.1. The Owner has been issued with a Practical Completion Notice in accordance with paragraph 3.1.8; or

3.1.11.2. The Owner has complied with the Notice of Defect in accordance with paragraph 3.1.9 and has obtained a Practical Completion Notice evidencing this;

3.1.12. Following the completion of the Allotment Works as a result of either:

3.1.12.1. The receipt of a Practical Completion Notice from the District Council;  
or

3.1.12.2. Compliance with a Notice of Defect issued by the District Council;

and until such time as the Allotment Works are transferred to a Management Company, the Owner covenants to the District Council to keep the Allotment Works in a clean and tidy condition and free from rubbish and maintain the Allotment Works.

## **NEAP/LEAP AND MUGA**

### **5. LEAPs**

5.1 The Owner shall Construct the first LEAP on Site prior to Occupation of the 300<sup>th</sup> Dwelling and the second LEAP on Site prior to the Occupation of the 600<sup>th</sup> Dwelling.

5.2 The Owner shall not allow Occupation of more than 300 of the Dwellings until it has constructed the first LEAP on Site and not allow Occupation of more than 600 of the Dwellings until it has Constructed the second LEAP on Site.

5.3 Once a LEAP has been Constructed the Owner shall invite the District Council (or such other appropriate body that may be approved in writing by the District Council) to inspect the LEAP;

5.4 Upon the receipt of an invitation to inspect the LEAP in accordance with paragraph 5.3 above, the District Council will carry out an inspection of the LEAP within

10 Working Days of receipt of the request (or unless otherwise agreed between the Owner and the District Council);

5.5 Following the completion of the inspection in accordance with paragraph 5.4 above, the District Council shall issue a Practical Completion Notice or a Notice of Defect within 10 Working Days of the inspection (unless otherwise agreed between the Owner and the District Council);

5.6 If a Notice of Defect is issued in accordance with paragraph 5.5 above, the Owner shall carry out remedial works to the LEAP in accordance with the requirements of the Notice of Defect to the District Council's satisfaction and invite the District Council to re-inspect the LEAP in accordance with paragraphs 5.3 and 5.4 of this Schedule until the District Council is satisfied and issues a Practical Completion Notice in relation to the LEAP;

5.7 Prior to the operation of the LEAP the Owner shall have:

5.7.1 Obtained a Practical Completion Notice from the District Council in accordance with paragraph 5.5 above; or

5.7.2. Complied with the Notice of Defect issued by the District Council in accordance with paragraph 5.6 above and shall have obtained a Practical Completion Notice evidencing this.

5.8 A LEAP shall not become operational until:

5.8.1 The Owner has been issued with a Practical Completion Notice in accordance with paragraph 5.5; or

5.8.2 The Owner has complied with the Notice of Defect in accordance with paragraph 5.6 and has obtained a Practical Completion Notice evidencing this;

## **6. NEAP**

6.1 The Owner shall Construct the NEAP on Site prior to Occupation of the 200<sup>th</sup> Dwelling.

6.2 The Owner shall not allow Occupation beyond the 200<sup>th</sup> Dwelling until it has constructed the NEAP on Site.

6.3 Once the NEAP has been Constructed the Owner shall invite the District Council (or such other appropriate body that may be approved in writing by the District Council) to inspect the NEAP;

6.4 Upon the receipt of an invitation to inspect the NEAP in accordance with paragraph 6.3 above, the District Council will carry out an inspection of the NEAP within 10 Working Days of receipt of the request (or unless otherwise agreed between the Owner and the District Council);

6.5 Following the completion of the inspection in accordance with paragraph 6.4 above, the District Council shall issue a Practical Completion Notice or a Notice of Defect within 10 Working Days of the inspection (unless otherwise agreed between the Owner and the District Council);

6.6 If a Notice of Defect is issued in accordance with paragraph 6.5 above, the Owner shall carry out remedial works to the NEAP in accordance with the requirements of the Notice of Defect to the District Council's satisfaction and invite the District Council to re-inspect the NEAP in accordance with paragraphs 6.3 and 6.4 of this Schedule until the District Council is satisfied and issues a Practical Completion Notice in relation to the NEAP;

6.7 Prior to the operation of the NEAP the Owner shall have:

6.7.1 Obtained a Practical Completion Notice from the District Council in accordance with paragraph 6.5 above; or

6.7.2. Complied with the Notice of Defect issued by the District Council in accordance with paragraph 6.6 above and shall have obtained a Practical Completion Notice evidencing this.

6.8 The NEAP shall not become operational until:

6.8.1 The Owner has been issued with a Practical Completion Notice in accordance with paragraph 6.5; or

5.8.2 The Owner has complied with the Notice of Defect in accordance with paragraph 6.6 and has obtained a Practical Completion Notice evidencing this;

## **7. MUGA**

**7.1** The Owners shall submit the layout of the MUGA for the written approval of the District Council with the submission of the first reserved matters application made in relation to the Phase of Development in which the MUGA is located

**7.2** The Owner shall Construct the MUGA on Site prior to Occupation of [500] of the Dwellings.

**7.3** The Owner shall not allow Occupation of more than [500] of the Dwellings until it has constructed the MUGA on Site.

**7.4** Once the MUGA has been Constructed the Owner shall invite the District Council (or such other appropriate body that may be approved in writing by the District Council) to inspect the MUGA;

**7.5** Upon the receipt of an invitation to inspect the MUGA in accordance with paragraph 7.4 above, the District Council will carry out an inspection of the MUGA within 10 Working Days of receipt of the request (or unless otherwise agreed between the Owner and the District Council);

**7.6** Following the completion of the inspection in accordance with paragraph 7.5 above, the District Council shall issue a Practical Completion Notice or a Notice of Defect within 10 Working Days of the inspection (unless otherwise agreed between the Owner and the District Council);

**7.7** If a Notice of Defect is issued in accordance with paragraph 7.6 above, the Owner shall carry out remedial works to the MUGA in accordance with the requirements of the Notice of Defect to the District Council's satisfaction and invite the District Council to re-inspect the MUGA in accordance with paragraphs 7.4 and 7.5 of

this Schedule until the District Council is satisfied and issues a Practical Completion Notice in relation to the MUGA;

7.8 Prior to the operation of the MUGA the Owner shall have:

7.8.1 Obtained a Practical Completion Notice from the District Council in accordance with paragraph 7.6 above; or

7.8.2. Complied with the Notice of Defect issued by the District Council in accordance with paragraph 7.7 above and shall have obtained a Practical Completion Notice evidencing this.

7.9 The MUGA shall not become operational until:

7.9.1 The Owner has been issued with a Practical Completion Notice in accordance with paragraph 7.6; or

7.9.2 The Owner has complied with the Notice of Defect in accordance with paragraph 7.7 and has obtained a Practical Completion Notice evidencing this;

## **8. OPEN SPACE**

8.1 The Owner shall Construct and lay out the Open Space on each Phase prior to Occupation of 75% of the Dwellings in that Phase of the Development.

8.2 The Owner shall not Occupy or allow Occupation of more than 75% of the Dwellings in a Phase of the Development until it has Constructed and laid out the Open Space on that Phase.

8.3 Once the Open Space has been Constructed and laid out the Owner shall invite the District Council (or such other appropriate body that may be approved in writing by the District Council) to inspect the Open Space;

8.4 Upon the receipt of an invitation to inspect the Open Space in accordance with paragraph 8.3 above, the District Council will carry out an inspection of the Open

Space within 10 Working Days of receipt of the request (or unless otherwise agreed between the Owner and the District Council);

8.5 Following the completion of the inspection in accordance with paragraph 8.4 above, the District Council shall issue a Practical Completion Notice or a Notice of Defect within 10 Working Days of the inspection (unless otherwise agreed between the Owner and the District Council);

8.6 If a Notice of Defect is issued in accordance with paragraph 8.5 above, the Owner shall carry out remedial works to the Open Space in accordance with the requirements of the Notice of Defect to the District Council's satisfaction and invite the District Council to re-inspect the Open Space in accordance with paragraphs 8.3 and 8.4 of this Schedule until the District Council is satisfied and issues a Practical Completion Notice in relation to the Open Space;

8.7 Prior to the operation of the Open Space the Owner shall have:

8.7.1 Obtained a Practical Completion Notice from the District Council in accordance with paragraph 8.5 above; or

8.7.2. Complied with the Notice of Defect issued by the District Council in accordance with paragraph 8.6 above and shall have obtained a Practical Completion Notice evidencing this.

8.8 The Open Space shall not become operational until:

8.8.1 The Owner has been issued with a Practical Completion Notice in accordance with paragraph 8.5; or

8.8.2 The Owner has complied with the Notice of Defect in accordance with paragraph 8.6 and has obtained a Practical Completion Notice evidencing this;

## **9. MANAGEMENT COMPANY**

- 9.1 Prior to first Occupation of any Dwelling on the relevant Phase the Owner shall submit for approval to the District Council and obtain written approval from the District Council to the Management Company Structure and the Management Scheme for that Phase.
- 9.2 Not to cause or permit the Occupation of any Dwelling on the relevant Phase until the Management Company Structure and the Management Scheme for that Phase have been submitted to and approved by the District Council.
- 9.3 Prior to Occupation of the 100<sup>th</sup> Dwelling the Owner shall incorporate the approved Management Company
- 9.4 Not to cause or permit the Occupation of more than 100 Dwellings until the Owner has incorporated the approved Management Company.
- 9.5 The Owner shall execute a formal transfer to the Management Company of the Managed Land (or relevant part thereof) as soon as reasonably practicable and in any event within 3 months (or such longer period as may be agreed in writing with the Council) of the date of the Practical Completion Notice for the relevant part of the Managed Land in accordance with the provisions of this Schedule with all such rights as are necessary for its use and operation and such transfer (and any future transfers) shall contain covenants by the transferee to the transferor:

9.5.1 restricting the use of the land conveyed/transferred to the purpose for which it is laid out or transferred for and for no other use whatsoever; and

9.5.2 requiring the relevant part of the Managed Land to be managed and maintained in accordance with the provisions of this Agreement

PROVIDED THAT the Owner shall keep the Managed Land clean, cultivated and in good condition and shall replace any damaged or dying grass, turf, trees, shrubs or other plants until such time as the relevant part of the Managed Land has been transferred to the Management Company.

- 9.6 The Management Company shall thereafter manage and maintain the relevant part of the Managed Land for the lifetime of the Development in accordance with the approved Management Scheme
- 9.7 The Owner or the Management Company may, acting reasonably, temporarily close or deny access to such part of the Managed Land as may be necessary for emergency works, maintenance, repair, cleansing, renewal and any other necessary works including fitting out or structural or non-structural works
- 9.8 The Owner shall not wind up the Management Company or alter its constitution without the prior written consent of the District Council unless the whole of the Development shall have been demolished or unless the District Council has otherwise first agreed in writing;
- 9.9 The written agreement of the District Council shall be sought in the event that the Management Company proposes to transfer the Managed Land to another body or Management Company who is willing to accept the transfer on the condition details in paragraph 9.5 of this Schedule.

**FOURTH SCHEDULE**  
**FINANCIAL CONTRIBUTIONS PAYABLE TO THE DISTRICT COUNCIL**

The Owner covenants with the Council as follows

**1. INDOOR SPORTS CONTRIBUTION**

1.1 To pay the Indoor Sports Contribution to the District Council on first Occupation of the [600]<sup>th</sup> Dwelling;

1.2 Not to Occupy more than [600] Dwellings until the Indoor Sport Contribution has been paid to the District Council in full.

**2. COMMUNITY DEVELOPMENT WORKER CONTRIBUTION**

2.1 To pay the Community Development Worker Contribution to the District Council on first Occupation of the 1<sup>st</sup> Dwelling.

2.2 Not to Occupy the 1<sup>st</sup> Dwelling until the Community Development Worker Contribution has been paid to the District Council in full.

**3. COMMUNITY DEVELOPMENT FUND CONTRIBUTION**

3.1 To pay the Community Development Fund Contribution to the District Council on first Occupation of the 1<sup>st</sup> Dwelling.

3.2 Not to Occupy the 1<sup>st</sup> Dwelling until the Community Development Fund Contribution has been paid to the District Council in full

**4. WASTE AND RECYCLING CONTRIBUTION**

4.1 To pay the Waste and Recycling Contribution applicable to a Parcel (calculated by reference to the number of Dwellings in that Parcel) to the District Council prior to or on first Occupation of any Dwelling in that Parcel.

4.2 Not to Occupy any Dwellings in a Parcel until the Waste and Recycling Contribution applicable to that Parcel (calculated by reference to the number of Dwellings in that Parcel) has been paid to the District Council in full.

## **5. CEMETARY CONTRIBUTION**

5.1 To pay the Cemetery Contribution to the District Council on first Occupation of the 800<sup>th</sup> Dwelling.

5.2 Not to Occupy more than 800 Dwellings until the Cemetery Contribution has been paid to the District Council in full

**FIFTH SCHEDULE**  
**DISTRICT COUNCIL'S COVENANTS WITH THE OWNER**

**1. REPAYMENT OF CONTRIBUTIONS**

1. The District Council covenants with the Owner to use all sums received from the Owner under the terms of the Fourth Schedule Fourth Schedule for the purposes specified in this Deed for which they are to be paid or for such other purposes for the benefit of the Development as the Owner and the District Council shall agree in writing.
2. The District Council covenants with the Owner that following written request from the person who made the relevant payment the District Council will repay to that person the balance (if any) of any payment made by that person to the District Council under the terms of the Fourth Schedule Fourth Schedule in accordance with the provisions of this Deed which has not been expended or committed at the date of such written request together with interest which has accrued on the balance after deduction of tax where required and any other sum required to be deducted by law provided always that no such request will be made prior to the expiry of ten years of the date of receipt by the District Council of such payment If capital works have been carried out then commuted sums for maintenance will not be returnable under this paragraph AND FURTHER PROVIDED THAT the District Council shall not be obliged pursuant to this paragraph to return monies that do not relate to District Council functions or have been passed to persons/bodies other than the District Council.
3. Any payment or part thereof which the District Council has contracted to expend prior to the date of receipt of such request shall be deemed to have been expended or committed by the District Council prior to that date
4. The District Council shall provide to the Owner such evidence as the Owner shall reasonably require in order to confirm the expenditure of the sums paid under the terms of the Fourth Schedule Fourth Schedule upon a written request by the Owner such request not to be made more than once in any year.

## **2. DISCHARGE OF OBLIGATIONS**

At the written request of the Owner, the District Council shall provide written confirmation of the discharge of the obligations contained in this Deed when satisfied that such obligations have been performed.

## SIXTH SCHEDULE

### CONTRIBUTIONS PAYABLE TO THE COUNTY COUNCIL

#### 1. DEFINITIONS

1. In this Schedule the following definitions shall apply (for the avoidance of doubt any definition which does not appear below shall be giving the meaning allocated to it in the main body of this Deed):

#### **Expression**

#### **Meaning**

#### **Bedroom**

means a room in a Dwelling designed as a bedroom or study/ bedroom and

- 1 Bed Dwelling means a Dwelling with 1 Bedroom
- 2 Bed Dwelling means a Dwelling with 2 Bedrooms
- 3 Bed Dwelling means a Dwelling with 3 Bedrooms
- 4 Bed Dwelling means a Dwelling with 4 or more Bedrooms

#### **Bridge Street Junction Contribution**

means the sum of One Hundred and Fifty Thousand Seven Hundred and Fifty Pounds (£150,750) Index Linked towards a scheme to improve public transport access through the Bridge St / Cherwell St junction in Banbury or an alternative scheme of similar benefit

#### **Cycleway for Secondary School Contribution**

means the sum of Forty Seven Thousand Four Hundred and Sixty Six Pounds (£47,466.00) Index Linked towards the provision of a cycleway between the southern site access junction and Cotefield Drive on the Oxford Road

<b>Expression</b>	<b>Meaning</b>
<b>Cycleway for Secondary School Matrix Sum</b>	<p>means the sum calculated in accordance with the following formula:</p> $£(A \times W) + (B \times X) + (C \times Y) + (D \times Z)$ <p>When</p> <p>A means the number of 1 Bed Dwellings</p> <p>B means the number of 2 Bed Dwellings</p> <p>C means the number of 3 Bed Dwellings</p> <p>D means the number of 4 Bed Dwellings</p> <p>W, X, Y and Z are as set out in the line labelled 'Cycleway for Secondary School' in Annex 1 to this Schedule</p>
<b>Cycleway for Secondary School Supplemental Payment</b>	<p>means the sum calculated as follows:-</p> $£(M - P) \text{ Index Linked}$ <p>Where M is the Cycleway for Secondary School Matrix Sum applying the total number and type of Dwellings occupied at the relevant Return Date</p> <p>P is the aggregate of the payments in respect of the Cycleway for Secondary School Contribution (but disregarding adjustments for index linking)</p>
<b>Cycleway for Secondary School Supplemental Payment Return Date</b>	<p>means a Return Date where, by applying the information comprised in the Return for the Return Period ending on the day before the Return Date the Cycleway (for Secondary School) Matrix Sum exceeds £47,466</p>
<b>Education Contribution</b>	<p>means any instalment of the Primary Contribution and/or the Secondary Contribution and/or the Special Educational</p>

**Expression****Meaning**

Needs Contribution due to be paid pursuant to paragraph 2 this Schedule

**Index Linked**

means in relation to

- The Strategic Transport Contribution 1 and the Bridge Street Junction Contribution and the Public Rights of Way Contribution adjusted according to any increase occurring between December 2019 and the date when the relevant payment is made to the County Council; and
- The Cycleway for Secondary School Contribution and any supplemental payment paid further to paragraph 3.4 below adjusted according to any increase occurring between April 2020 and the date when the relevant payment is made to the County Council; and
- The Strategic Transport Contribution 2 adjusted according to any increase occurring between May 2020 and the date when the relevant payment is made to the County Council; and
- The Oxford Canal Pedestrian and Cycle Route Contribution adjusted according to any increase occurring between May 2021 and the date when the relevant payment is made to the County Council

in all cases in a composite index comprised of the following indices of the BCIS Price Adjustment Formulae (Civil Engineering) 1990 Series as made available through the Building Cost Information Services (BCIS) of the Royal Institution of Chartered Surveyors weighted in the proportions below set out against each such index namely:-

Index 1 Labour & Supervision 25%

## Expression

## Meaning

Index 2 Plant & Road Vehicles 25%

Index 3 Aggregates 30%

Index 9 Coated Macadam & Bituminous Products 20%;

- the Public Transport Services Contribution and the TRO Contribution adjusted according to any increase occurring between April 2020 and the date when the relevant payment is made to the County Council in the all Items Retail Prices Index excluding mortgage interest payments (RPIX) published by the Office of National Statistics.; and
- the Travel Plan Monitoring Contribution adjusted according to any increase occurring between December 2019 and the date when the relevant payment is made to the County Council in the all Items Retail Prices Index excluding mortgage interest payments (RPIX) published by the Office of National Statistics.; and
- the Education Contribution and any supplemental payments paid further to paragraphs 3.1 and 3.2 and 3.3 below adjusted according to any increase occurring between index value 333 and the index value for the quarter period in which the contribution is paid in the BCIS All in-Tender Price Index published by the Royal Institution of Chartered Surveyors

or if at any time for any reason it becomes impracticable to use any such index such alternative index as may be agreed between the Owner and the County Council

## Oxford Canal Pedestrian and Cycle Route Contribution

Means the sum of Three Hundred and Thirty Thousand Two Hundred and Thirty Pounds and Twenty Five Pence (£330,230.25) Index Linked towards the provision of an

<b>Expression</b>	<b>Meaning</b>
	improved pedestrian and cycle route between the development site and the town centre as identified in Local Plan policy BAN4
<b>Primary Education Contribution</b>	<p>means the sum of Two Million Seven Hundred and Seventy Six Thousand Eight Hundred and Ninety Six Pounds (£2,776,896.00) Index Linked towards the expansion of primary and nursery capacity serving the Site payable in three instalments as follows:</p> <ul style="list-style-type: none"> <li>- Primary Instalment 1 being 10% of the Primary Education Contribution and</li> <li>- Primary Instalment 2 being 45% of the Primary Education Contribution and</li> <li>- Primary Instalment 3 being the remaining 45% of the Primary Education Contribution</li> </ul>
<b>Primary Matrix Sum</b>	<p>means the sum calculated in accordance with the following formula:</p> $£(A \times W) + (B \times X) + (C \times Y) + (D \times Z)$ <p>When</p> <p>A means the number of 1 Bed Dwellings</p> <p>B means the number of 2 Bed Dwellings</p> <p>C means the number of 3 Bed Dwellings</p> <p>D means the number of 4 Bed Dwellings</p> <p>W, X, Y and Z are as set out in the line labelled 'Primary' in Annex 1 to this Schedule</p>
<b>Primary Supplemental Payment</b>	<p>means the sum calculated as follows:-</p> $£(M - P) \text{ Index Linked}$

**Expression****Meaning**

Where M is the Primary Matrix Sum applying the total number and type of Dwellings occupied at the relevant Return Date

P is the aggregate of the payments in respect of the Primary Education Contribution (but disregarding adjustments for index linking)

**Primary Supplemental Payment Return Date**

means a Return Date where, by applying the information comprised in the Return for the Return Period ending on the day before the Return Date the Primary Matrix Sum exceeds £2,776,896.00

**Public Rights of Way Contribution**

means the sum of Ninety Thousand Pounds (£90,000) Index Linked towards enhancements to the public rights of way network in the vicinity of the Site

**Public Transport Services Contribution**

means the sum of Seven Hundred and Seventy Thousand Pounds (£770,000) Index Linked towards the cost of pump-priming a public transport service between the Site and Banbury town centre or an alternative scheme of similar benefit payable in six instalments as follows:

- Public Transport Instalment 1 being 16.67% of the Public Transport Services Contribution and
- Public Transport Instalment 2 being 16.67% of the Public Transport Services Contribution and
- Public Transport Instalment 3 being 16.67% of the Public Transport Services Contribution and
- Public Transport Instalment 4 being 16.67% of the Public Transport Services Contribution and
- Public Transport Instalment 5 being 16.66% of the Public Transport Services Contribution and

<b>Expression</b>	<b>Meaning</b>
	<ul style="list-style-type: none"> <li>Public Transport Instalment 6 being the remaining 16.66% of the Public Transport Services Contribution</li> </ul>
<b>Qualifying Application</b>	an application for reserved matters approval pursuant to the Planning Permission or any application under Section 73 of the Act for the Development
<b>Qualifying Permission</b>	a reserved matters approval or planning permission issued pursuant to a Qualifying Application as may from time to time be amended by the approval of a non-material amendment pursuant to Section 96A of the Act
<b>Return</b>	<p>means a written return made by the Owner to the County Council specifying</p> <ol style="list-style-type: none"> <li>The total number of Dwellings occupied during the Return Period and separately the total number of 1 Bed Dwellings, 2 Bed Dwellings, 3 Bed Dwellings and 4 Bed Dwellings so occupied;</li> <li>The aggregate number of Dwellings which have been occupied at the end of the Return Period and separately the aggregate number of 1 Bed Dwellings, 2 Bed Dwellings, 3 Bed Dwellings and 4 Bed Dwellings comprised therein</li> </ol>
<b>Return Dates</b>	means the quarter days being the first day of January, first day of April, first day of July and first day of October in each year occurring after the Occupation of the first Dwelling until Returns have been made pursuant to paragraph [7] reporting the Occupation of all the Dwellings comprised in the Development

<b>Expression</b>	<b>Meaning</b>
<b>Return Period</b>	means the period of 3 months ending on the day before a Return Date but so that the first Return Period will be the period commencing on the occupation of the first Dwelling and ending on the day before the following Return Day and the final Return Period will be the Return Period ending on the day before the Return Day next following the occupation of the final Dwelling comprised in the Development
<b>Secondary Education Contribution</b>	<p>means the sum of Six Million Fifty Thousand Five Hundred and Seventy Six Pounds (£6,050,576.00) Index Linked towards the expansion of secondary education capacity serving the Site including the purchase of secondary school land payable in three instalments as follows:</p> <ul style="list-style-type: none"> <li>- Secondary Instalment 1 being 50% of the Secondary Education Contribution and</li> <li>- Secondary Instalment 2 being 25% of the Secondary Education Contribution and</li> <li>- Secondary Instalment 3 being the remaining 25% of the Secondary Education Contribution</li> </ul>
<b>Secondary Matrix Sum</b>	<p>means the sum calculated in accordance with the following formula:</p> $£(A \times W) + (B \times X) + (C \times Y) + (D \times Z)$ <p>When</p> <p>A means the number of 1 Bed Dwellings</p> <p>B means the number of 2 Bed Dwellings</p> <p>C means the number of 3 Bed Dwellings</p>

<b>Expression</b>	<b>Meaning</b>
	D means the number of 4 Bed Dwellings
	W, X, Y and Z are as set out in the line labelled 'Secondary' in Annex 1 to this Schedule
<b>Secondary Supplemental Payment</b>	means the sum calculated as follows:-  £(M – P) Index Linked  Where M is the Secondary Matrix Sum applying the total number and type of Dwellings occupied at the relevant Return Date  P is the aggregate of the payments in respect of the Secondary Education Contribution (but disregarding adjustments for index linking)
<b>Secondary Supplemental Payment Return Date</b>	means a Return Date where, by applying the information comprised in the Return for the Return Period ending on the day before the Return Date the Secondary Matrix Sum exceeds £6,050,576.00
<b>SEN Contribution</b>	means the sum of Four Hundred and Eleven Thousand Three Hundred and Forty Five Pounds (£411,345.00) Index Linked towards the expansion of special educational needs capacity serving the Site
<b>SEN Matrix Sum</b>	means the sum calculated in accordance with the following formula:  $£(A \times W) + (B \times X) + (C \times Y) + (D \times Z)$ When  A means the number of 1 Bed Dwellings

<b>Expression</b>	<b>Meaning</b>
	B means the number of 2 Bed Dwellings
	C means the number of 3 Bed Dwellings
	D means the number of 4 Bed Dwellings
	W, X, Y and Z are as set out in the line labelled 'SEN' in Annex 1 to this Schedule
<b>SEN Supplemental Payment</b>	<p>means the sum calculated as follows:-</p> <p><math>\pounds(M - P)</math> Index Linked</p> <p>Where M is the SEN Matrix Sum applying the total number and type of Dwellings occupied at the relevant Return Date</p> <p>P is the aggregate of the payments in respect of the SEN Contribution (but disregarding adjustments for index linking)</p>
<b>SEN Supplemental Payment Return Date</b>	means a Return Date where, by applying the information comprised in the Return for the Return Period ending on the day before the Return Date the SEN Matrix Sum exceeds $\pounds411,345.00$
<b>Strategic Transport Contribution 1</b>	Means the sum of One Hundred and Twenty One Thousand Four Hundred and Seventy Six Pounds ( $\pounds121,476$ ) Index Linked towards the Local Plan BAN1 scheme to improve traffic conditions on Hennef Way or an alternative scheme of similar benefit
<b>Strategic Transport Contribution 2</b>	Means the sum of Two Hundred and Fifteen Thousand Five Hundred and Thirty Seven Pounds and Twelve Pence ( $\pounds215,537.12$ ) Index Linked towards Local Plan BAN2 scheme to improve public transport access on Tramway Road or an alternative scheme of similar benefit

<b>Expression</b>	<b>Meaning</b>
<b>Supplemental Payment</b>	means any instalment of the Primary Supplemental Payment or the Secondary Supplemental Payment or the SEN Supplemental Payment or the Cycleway (for Secondary School) Supplemental Payment due to be paid pursuant to paragraph 2 this Schedule
<b>TRO Contribution</b>	<p>means the sum of Six Thousand Three Hundred and Eighty Pounds (£6,380) Index Linked towards the cost of promotion, advertising and if appropriate making and implementing two Traffic Regulation Orders as follows:</p> <ol style="list-style-type: none"> <li>1. To extend the 40mph speed restriction on Oxford Road beyond the southern site access</li> <li>2. To enable on-street parking restrictions along the bus route within Longford Park</li> </ol>
<b>Travel Plan Monitoring Contribution</b>	means the sum of Two Thousand Three Hundred and Forty Six Pounds (£2,346) Index Linked towards the cost of monitoring the travel plan for the Development

## 2. COVENANTS

The Owner covenants with the County Council as follows:

1. to pay the TRO Contribution and Primary Instalment 1 to the County Council prior to the Commencement of the Development
2. not to cause or permit the Commencement of the Development until it has paid the TRO Contribution and Primary Instalment 1 to the County Council
3. to pay the Bridge Street Junction Contribution and Public Transport Instalment 1 and the Travel Plan Monitoring Contribution and Primary Instalment 2 to the County Council prior to first Occupation of any Dwelling; and

4. not to cause or permit the first Occupation of any Dwelling until it has paid the Bridge Street Junction Contribution and Public Transport Instalment 1 and the Travel Plan Monitoring Contribution and Primary Instalment 2 to the County Council
5. to pay the Public Rights of Way Contribution to the County Council prior to first Occupation of more than 50 Dwellings; and
6. not to cause or permit the first Occupation of more than 50 Dwellings until it has paid Public Rights of Way Contribution to the County Council
7. to pay Primary Instalment 3 to the County Council prior to first Occupation of more than 100 Dwellings; and
8. not to cause or permit the first Occupation of more than 100 Dwellings until it has paid Primary Instalment 3 to the County Council
9. to pay Secondary Instalment 1 and the Cycleway for Secondary School Contribution and the Oxford Canal Pedestrian and the Cycle Route Contribution to the County Council prior to first Occupation of more than 200 Dwellings; and
10. not to cause or permit the first Occupation of more than 200 Dwellings until it has paid Secondary Instalment 1 and the Cycleway for Secondary School Contribution and the Oxford Canal Pedestrian and the Cycle Route Contribution to the County Council
11. to pay the SEN Contribution to the County Council prior to first Occupation of more than 300 Dwellings; and
12. not to cause or permit the first Occupation of more than 300 Dwellings until it has paid the SEN Contribution to the County Council
13. to pay Secondary Instalment 2 and Strategic Transport Contribution 2 to the County Council prior to first Occupation of more than 400 Dwellings; and
14. not to cause or permit the first Occupation of more than 400 Dwellings until it has paid Secondary Instalment 2 and Strategic Transport Contribution 2 to the County Council
15. to pay Secondary Instalment 3 and Strategic Transport Contribution 1 to the County Council prior to first Occupation of more than 600 Dwellings; and

16. not to cause or permit the first Occupation of more than 600 Dwellings until it has paid Secondary Instalment 3 and Strategic Transport Contribution 1 to the County Council
17. to pay Public Transport Instalment 2 to the County Council prior to the first anniversary of the date that Public Transport Instalment 1 becomes due for payment and not to cause allow or permit any further Occupation of the Development after the first anniversary of the date that Public Transport Instalment 1 becomes due for payment unless and until Public Transport Instalment 2 has been paid to the County Council.
18. to pay Public Transport Instalment 3 to the County Council prior to the second anniversary of the date that Public Transport Instalment 2 becomes due for payment and not to cause allow or permit any further Occupation of the Development after the second anniversary of the date that Public Transport Instalment 2 becomes due for payment unless and until Public Transport Instalment 3 has been paid to the County Council.
19. to pay Public Transport Instalment 4 to the County Council prior to the third anniversary of the date that Public Transport Instalment 3 becomes due for payment and not to cause allow or permit any further Occupation of the Development after the third anniversary of the date that Public Transport Instalment 3 becomes due for payment unless and until Public Transport Instalment 4 has been paid to the County Council.
20. to pay Public Transport Instalment 5 to the County Council prior to the fourth anniversary of the date that Public Transport Instalment 4 becomes due for payment and not to cause allow or permit any further Occupation of the Development after the fourth anniversary of the date that Public Transport Instalment 4 becomes due for payment unless and until Public Transport Instalment 5 has been paid to the County Council.
21. to pay Public Transport Instalment 6 to the County Council prior to the fifth anniversary of the date that Public Transport Instalment 5 becomes due for payment and not to cause allow or permit any further Occupation of the Development after the fifth anniversary of the date that Public Transport Instalment 5 becomes due for payment unless and until Public Transport Instalment 6 has been paid to the County Council.

### **3. PAYMENTS COVENANTS**

1. The Owner covenants to pay to the County Council within 28 days of each Primary Supplemental Payment Return Date a Primary Supplemental Payment calculated by applying the information comprised in the Return for the Return Period ending on the day before that Return Date
2. The Owner covenants to pay to the County Council within 28 days of each Secondary Supplemental Payment Return Date a Secondary Supplemental Payment calculated by applying the information comprised in the Return for the Return Period ending on the day before that Return Date
3. The Owner covenants to pay to the County Council within 28 days of each SEN Supplemental Payment Return Date a SEN Supplemental Payment calculated by applying the information comprised in the Return for the Return Period ending on the day before that Return Date
4. The Owner covenants to pay to the County Council within 28 days of each Cycleway for Secondary School Supplemental Payment Return Date a Cycleway for Secondary School Supplemental Payment calculated by applying the information comprised in the Return for the Return Period ending on the day before that Return Date

### **4. COVENANTS (NOTIFICATION AND PROVISION OF INFORMATION)**

1. The Owner covenants with the County Council that within 21 days of each Return Date it will make a Return to the County Council
2. In the event that the County Council considers that the Owner may have failed to give notification of an event taking place in accordance with clause [3] or if the Owner fails to make a Return within 21 days of any Return Date or makes a Return which appears to be incomplete:-

- 4.2.1 The County Council may investigate whether the event has taken place and/or as applicable the number and type/size of Dwelling occupied for the purpose of ascertaining whether or not any of the obligations or restrictions in this Deed has become operative and the Owner will pay to the County Council the sum of £450 in respect of the costs of each such investigation; and

- 4.2.2 The due date for any payment due at or before a relevant event specified in clause [3] takes place will be such date as the County Council reasonably selects; and
- 4.2.3 If the County Council reasonably considers that a Return Date is a Return Date for a Supplemental Payment the Supplemental Payment shall be such sum as the County Council reasonably determines and the due date for payment of the Supplemental Payment shall be the Return Date and
- 4.2.4 The provisions of this paragraph 4.2 shall be without prejudice to any other right or remedy of the County Council
- 4.2.5 if any payment to be made to the County Council further to this Deed is not paid on or before the due date for payment to pay Interest on the sum outstanding from the due date for payment to the date of payment

## SEVENTH SCHEDULE HIGHWAYS SCHEDULE

### EIGHTH SCHEDULE

#### EIGHTH SCHEDULE COUNTY OBLIGATIONS

##### 1. INTERPRETATION

In this Schedule in addition to the definitions provided in Clause 1 of this Deed the following words and phrases shall have the following meanings and where a word is defined in Clause 1 of this Deed and also in this paragraph the meaning given in this paragraph shall be applied for the purposes of this Schedule

Expression	Meaning
1. <b>“the County Contributions”</b>	means the financial contributions payable to the County Council as defined in the [ ]Schedule of this Deed;
2. <b>“First Secondary Land Contribution”</b>	<p>means the sum calculated in accordance with the following formula:</p> <ul style="list-style-type: none"><li>• (4.88 ha - CPG Land Requirement) x £375,000 per ha</li></ul> <p>towards the cost of that area of the Secondary School Site as defined in the [ ] Schedule <b>Error! Reference source not found.</b> which is not required to be delivered by the Owner in mitigation of the Development and which sum is Index Linked</p>
3. <b>CPG Land Requirement</b>	means in ha the area of land required for the delivery of secondary school education for the number of secondary school pupils generated from the mix of Dwellings constructed by the Owner on the Site in accordance with the Planning Permission provided always that the CPG Land Requirement may not be less than 1.45 ha

4. **“Supplemental Secondary Land Contribution”** means the sum of £708,750 (Index Linked) towards the cost of that area of the Secondary School Site as defined in the [ ] Schedule **Error! Reference source not found.**
- 5.
6. **“Index Linked”** means adjusted according to any increase occurring between [ ] and the date of payment in the All Items Retail Prices Index excluding mortgage interest payments (RPIX) published by the Office for National Statistics

## 2. COUNTY COUNCIL COVENANTS

The County Council covenants with the Owner:-

1. to pay the First Secondary Land Contribution to the Owner on the date of transfer of the Secondary School Site to the County Council
2. to pay the Supplemental Secondary Land Contribution to the Owner the date of transfer of the Secondary School Option Site to the County Council

Provided always that where a County Contribution is due to be paid by the Owner to the County Council within 28 days either before or after the payment under 2.1 and/or 2.2 is due the parties may agree that that the amount of the First Secondary Land Contribution and/or the Supplemental Secondary Land Contribution may be set off against the sum due to be paid by the Owner to the County Council and the amount payable may be reduced accordingly

### **Application of Monies Received**

3. The County Council shall not apply the County Contributions for any purpose other than that set out in the relevant definition in the [ ] Schedule **Error! Reference source not found.** of this Deed (or any alternative which achieves similar benefits) in such form and at such time as the County Council shall in its discretion decide

### **Virement**

4. The County Council may temporarily appropriate funds out of one or more of the County Contributions to be applied for another purpose or purposes designated under this Deed as long as appropriated funds are ultimately reallocated for their designated purpose

### **Repayment of Contributions**

5. The County Council covenants with the Owner that following written request from the Owner that it will pay to the person that made that payment to the County Council the balance (if any) of the County Contributions which at the date of receipt of such written request has not been expended provided always that no such request will be made prior to the expiry of ten years from the date of receipt by the County Council of the final instalment of such contribution (or if later ten years from the date on which the final instalment of such contribution was due). Any contribution or part of a contribution which the County Council has contracted to expend prior to the date of receipt of such request shall be deemed to have been expended by the County Council prior to that date AND FURTHER PROVIDED THAT the County Council shall not be obliged pursuant to this paragraph to return monies that have been passed to persons/bodies other than the County Council
6. The County Council shall provide to the Owner such evidence as the Owner shall reasonably require in order to confirm the expenditure of the sums paid by the Owner to the County Council under this Deed upon receiving a written request from the Owner such request not being made more than once in any year

**NINTH SCHEDULE**

## CHERWELL HOUSING DELIVERY MONITOR FORM 2023

### Applicant/Agent/Developer

Mr P M Donger, Mrs S M Donger and Manor Oak  
Homes  
Mr Geoff Armstrong (Armstrong Rigg Planning)

### Introduction

Cherwell District Council is currently preparing the 2023 Annual Monitoring Report (AMR) which includes updating of the Housing Delivery Monitor. The Government's Planning Practice Guidance recognises the importance of advice provided by developers and local agents in assessing lead-in times, build-out rates by year and deliverability. Information provided on this form will be used to help inform the AMR's Housing Delivery Monitor. This information will be considered along with other relevant information including those received from internal consultees.

Further evidence will be needed for sites without full detailed planning permission to help consider the deliverability of a site.

We would be grateful if you could complete this form to assist us with this process.

Please note that this response could be used in public documents. **Please respond by 24 October 2023.**

### Part A – Planning application information

Site Address	Land Opposite Hanwell Fields Recreation Adj To Dukes Meadow Drive Banbury
Site Area (total)	3.6

Planning Application Details (if applicable)	
Application Number(s):	21/03426/OUT
Date Application(s) Approved:	-
Number of dwellings (net):	78

Please provide any updates or corrections to the planning application information above in the following box:

Section 106 agreement drafted and discussions ongoing

## Part B – Delivery Rate

The Council published a Land Supply Statement in February 2023 which is available here <https://www.cherwell.gov.uk/info/33/planning-policy/370/monitoring-reports/3>

Please indicate if the information in the 5 year land supply statement provides a realistic assumption of the delivery rate on this site:

YES/NO (please circle)

If you have answered no, please explain why below and provide an alternative assessment in the table below explaining your reasons.

General comments/updates:

Whilst the site is technically 'developable' currently, pending finalisation of the S106, it is anticipated that this will be sealed shortly.

Upon grant of permission RMs would be submitted within 18 months and determined within 24. This would result in the delivery of the site 2025 through to 2027 completion.

### Alternative suggested build-out rate provided by applicant/developer

Any housebuilder(s) secured to develop the site? (if applicable)

**Multiple expressions of interest.**

If no housebuilder is yet in place, what progress has been made and when will one be contracted to build out the site? (if applicable)

**Upon issue of planning permission.**

Number of housebuilders currently on site?

**n/a**

Number of housebuilders expected on site in future years?

**One housebuilder anticipated, delivering the site in a single phase.**

Expected date for starting on site?

**Presuming issue of PP Winter 23/24 start on site would be expected Spring/Summer 2025.**

Any further information on build-out rates including any further general reasons for any reduction in build rates?

**We have assumed a maximum delivery of 50dpa on the basis of firstly a single developer and then reflecting recent market analysis undertaken firstly by Savills (published) in its recent paper 'A New Normal' and our own assessment of realistic delivery rates. Our additional analysis takes into account our client's own experiences when selling sites and various statements issued both publicly and privately (in discussions relating to the delivery of phase 2 of the development) by the housebuilding industry.**

Any viability or infrastructure issues that need to be overcome to enable the development to commence?

**No.**

Any ownership or access constraints that need to be overcome to enable the development to commence?

**No.**

Have pre-commencement conditions been discharged / pre-commencement assessments been carried out?

**Awaiting formal grant of PP.**

Any progress being made towards the submission of additional planning application(s) including reserved matters planning applications?

**The 78-unit scheme subject of this submission is intended to represent Phase 1 of our client's development at Hanwell Fields. Submission of an application for up to 117-**

dwellings on land immediately to the north, sharing the approved access, is imminent (likely submission early November).

Any progress with site assessment work required for a planning application(s)?

**The Phase 2 application will be accompanied by a comprehensive suite of technical information confirming the deliverability of the site in a way that is entirely sustainable.**

Linda

Yes that's correct I have a meeting with our solicitor (this week) to page turn the agreement which I am hoping is in an agreed format.

We just could not get our diary's in sink.

Kind regards,  
Will

Dear Linda,

I am writing to you with regards to the decision Vistry has made with regards to the future maintenance and management of all open spaces on the Drayton Lodge, Banbury development as detailed in the S106 agreement. As per the Third Schedule of the agreement Vistry intends to transfer all areas of open space including play areas, sports pitches, all ecological areas and potentially the SUDs features (Vistry will confirm who is taking the SUDs once we have confirmation from our Engineering team and on receipt of our Planning Approval ) into an appointed **Management Company**.

We are notifying Cherwell District Council in writing of our intention once these areas are complete. Attached is an overall Landscape Masterplan (subject to approval) which shows all the areas we intend to transfer to the Management company. Please can you confirm acceptance of this proposal as per the agreement and if you require any further information then please let me know.

Kind regards

**Subject:** FW: Access and Egress to Drayton Lodge Development Banbury

Good Afternoon Linda,

Please see the below email chain in regard to routing issues that have arisen due to confusion over the agreed routes. As my email illustrates, OCC did not approve routes that direct HGV's through Hanwell, but this has been happening in practise. The parish have identified that there may be confusion as coming from the east the route is through Hanwell Fields (Dukes Meadow Drive) and not the village itself.

Please can you inform the construction company of this information to ensure that they are using the approved routes and not travelling through the village of Hanwell. It may be that the CTMP needs to be updated.

Many thanks

**CAUTION:** This email originated from outside of the organisation. Do not click links or open attachments unless you recognise the sender and know the content is safe.

Thanks Ben

I'm pretty sure the issue is confusion caused because the map does not clearly indicate that coming from the east the route is through Hanwell Fields (Dukes Meadow Drive) and not the village of Hanwell. This needs to be clearly shown or it's likely we'll have further incidents. Can you confirm that this will be done please?

Regards

Arnold

**Subject:** RE: Web form contact from: ARNOLD BAILEY

Hi Mr Bailey,

Thanks for your email and I am sorry to hear this is going on within the village.

I have just been back through the submitted CTMP that was recently approved for the Warwick Road development, the below bullet points are the routes that were approved from this application. As my routing images show, the routes approved do not show any vehicles passing through Hanwell, meaning that OCC did not recommend or approve this.

This document is the only record I have of a CTMP for the Warwick Road development, if the construction company could provide evidence of where this has been approved, I would be happy to review it and try to come to a resolution should this be necessary. Please see below:

'HGVs with destinations to the North will turn left onto B4100 and access M40 via junction 12 at Gaydon'

'HGVs with destinations to the South or East will turn right onto B4100 and access M40 via junction 11 at Banbury via A422 or continue A422 if heading East'

'HGVs with destinations to the West will turn right onto B4100 and leave Banbury via the A361'

Hope this clears everything up.

Kind regards

Hanwell, OX17

**Your message**

At lunchtime today a low loader carrying a large earth mover drove through the village in the narrow main road.

It created a lot of traffic chaos and additionally the road is totally unsuitable for heavy vehicles, there is already a sign at the junction of the road with Southam Road saying that it is unsuitable.

I am Vice Chairman of Hanwell Parish Council and in that capacity contacted the haulage company Lynch Transport. They told me that the route had been suggested and approved by Oxfordshire Highways. They themselves agreed that it was a totally unsuitable route.

Can you please advise why OCC are telling hauliers to come through the village to access the new housebuilding sites on the Warwick Road? These must be halted as it will result in both serious road damage and major inconvenience to the village.

hi Chris,

with the market how it is, we are assuming it will be around 30 for 2024 then 50 per annum onwards.....so built out by 3030. But this may be more in line with your assumption should the market get back on track again.

thanks  
David.

**Subject:** Cherwell housing delivery monitor

**NOTE:** Email originated outside of Vistry Group.

Hi David,

I understand that you are involved in the site at Drayton Lodge farm. I have attached a form for our housing delivery monitor for our annual monitoring report.

Would you mind filling this form in with an estimated projection in terms of completions at Drayton Lodge. We are currently estimating that the site (320 dwellings) will be built out by March 2028, so therefore about 75 dwellings per year. Do you think this is achievable? A response to this email would be fine if you don't have time to fill in the form.

If you are leading on any other large sites (above 10 dwellings) in Cherwell if you could let me know or point me to one of your colleagues. We have already had a response on South West Bicester.

Grateful for a response by mid next week if possible.

Many thanks.

Chris.

Hi Simon,

Regarding the Housing Delivery Monitor Update, we also have a resolution to grant on land south of Banbury Rise. Subject to the s106 being agreed (hopefully by the end of the month) we will be delivering units from this site within the next 5 years.

Please do let me know if you require any further information on this site.

Thanks

Jon

Dear Sir/Madam,

Cherwell District Council is currently preparing its 2023 Annual Monitoring Report (AMR) which includes an update of the Housing Delivery Monitor. You are receiving this email as our records show you have an interest in one of the developments that we are monitoring. We would be grateful if you could complete the attached form and return it to us by **24 October 2023**.

If have any queries please do contact us by responding to this email or by telephone 01295 221849.

**Sent:** 28 July 2023 16:40  
**To:** Henry Venners  
**Cc:** Paul Ihringer  
**Subject:** RE: KIDLINGTON GARAGE - Planning 22/0017/F- conditions

Hi Henry,

My understanding is that your clients have now paid the undertaking of the County Council's solicitor, who has inputted the County's obligations, and the draft s106 agreement is with your client's solicitor.

I also understand from speaking with our solicitor that there are a couple of technical matters that need refining:

1. "The site location plan appears to include a small area of land outside the applicant's title. I have raised this with the applicant's solicitor, and I understand the plan to be appended to the agreement will be updated. I assume the site location plan submitted with the application will also be amended but, I haven't received confirmation to that effect."
2. Your client's solicitor has confirmed that the Huggins have sold the property to Oxford Road Residences Ltd (ORRL). He will replace the Huggins with ORRL as the landowner, but our solicitor has said that we'll need confirmation that ORRL is the registered proprietor of the land before completion.

In terms of conditions, I have spoken with our Ecologist and she is happy for your suggested amendment to condition 15. She added:

*"change is reasonable as long as the biodiversity enhancement scheme is in for assessment prior to any building works commencing as it is likely that the enhancements will need to be integrated into the buildings and so they need to allow for this."*

*Not related to conditions particularly but just to note that although outside the main nesting season some birds will still nest/start nesting in August and September and are still legally protected whilst doing so. They should just be aware of this prior to the start of demolition. This may be captured in the CEMP however which is pre-commencement – has that been discharged yet?*

To this end, I would be very happy for you to submit a CEMP during this application and the condition to be discharged that way -provided Environmental Health are happy.

Finally, I would be grateful if you could forward on your email from your contaminated land expert explaining why the buildings need to be dropped first before he can provide his advice -we can then consult Environmental Health.

I will be away on annual leave for the next two weeks, returning on Monday 14<sup>th</sup> August, so it would be good if you can copy my team leader, Paul Ihringer, in to your reply.

I think it would be worth us all agreeing an Extension of time until 28<sup>th</sup> August to allow for this information to be re-submitted, consulted on, and for the s106 Agreement to be signed and sealed.

Kind regards,

Tom

Hi Henry,

Thank you for your email.

The draft S106 Agreement, prepared by Womble Bond Dickinson on behalf of Cherwell District Council, has been submitted to Oxfordshire County Council (OCC), but my understanding is that OCC have not yet received an undertaking from your clients to commence work on their part of the S106 Agreement.

Your comments on, and proposed amendments to, the conditions are noted. I will review them early next week and double check with the relevant consultees to make sure they are happy with the suggested amendments.

Kind regards,

Tom

Hi Tom

As time moves on my client is still waiting for the s106 to be progressed. We are hopeful that this will be moved soon.

With that in mind and as we had discussed previously we were looking again at conditions and triggers. I want to be sure that they have a sensible way ahead.

I will forward an email from the contamination chap which I hope helps to clarify why the buildings need to be dropped before he can confirm his contamination advice. Presently we are in a catch-22 as we need to remove the buildings for the contamination to go ahead but condition 9 prevents demolition. Please can we edit condition 9 to allow for demolition? My suggested wording is as attached.

If we do that condition 10 does not really make sense as development will have occurred indeed has to have occurred to find any contamination which might lurk unseen. Again I have edited it as showing

Condition 11 is I think wrong as it refers to itself not condition 10 so I have edited it, not least it was missing a trigger point

12 remains okay

Condition 17 warns against works during bird nesting season

My client would like to do demolition in August/September but condition 15 as worded would preclude that. I would like it please if this could be amended to allow demolition and contamination testing etc.

I really don't see any harm in allowing that to occur before the enhancement strategy is approved. can that condition please be amended to allow demolition? The site is a car lot with no present ecological interest (see ecology report), thus there is nothing to be lost by allowing demolition one stage earlier, there is only gain to be made later. I have tightened up your condition a touch.

That would leave condition 19 as the only one as a precommencement.

We have started to work on that CEMP. if we devised that CEMP scheme before the s106 was signed could we send it in for approval before decision notice issued?

Kind regards

**Henry Venners**

Dear Henry,

Thank you for your email.

Planning is very much a case of, each case on its own merits. In this instance, Members requested a viability review trigger point as late in the process as possible. Therefore, this proposed trigger point reflects the resolution of the Members.

My manager and I also think it is a very fair trigger point as it allows the applicant to construct the buildings, and sell the majority of the residential units (thereby bringing capital in), before the viability of the scheme is re-assessed. We feel this is a pragmatic, and not an unduly onerous, solution.

I look forward to hearing confirmation from your clients, so that the s106 agreement can be progressed and a decision can be issued.

Kind regards,

Tom

Thanks for these thoughts and coming back so quickly I am not sure I can respond myself this week, given time pressures of today, and being away next week. however- I did ask whether these such mechanisms had been used on any other site within CDC. Can you enlighten me please?

I have not seen such an onerous requirement previously, and fairness is important in the planning system.

Kind regards

Further to my email below.

I would also expect the viability review obligation to make it clear that the final four flats cannot be occupied until the viability review work is completed and an affordable housing contribution payment timetable has been agreed with the Council.

Our legal team have been instructed some time ago to prepare a s106 agreement. My understanding is that it is being outsourced to an external party.

**Subject:** RE: KIDLINGTON GARAGE - Planning 22/0017/F

Dear Henry,

My manager and I have given the matter some thought. Although I had suggested a trigger point of 9 months post construction in my committee report, the Members, at the 9<sup>th</sup> March Planning Committee, made it clear it they would want to see the trigger point as late as is practically possible to ensure that the most amount of up to date evidence is available.

To this end, we suggest that the viability review trigger point is as follows:

The first 11 flats can be occupied, but after that a viability review must be carried out whereby any developer profits over 15%, will be split with the Council 50/50 up until the point that the affordable housing contribution requirement of £609k, is paid.

I hope this is helpful.

Kind regards,

Tom

Hi Thomas

Is there any update? I am away next week and would like to pass on an update to my client. I must say I am still mystified as to the additional delay. I was thinking this could be passed to the lawyers still.

Even if we don't like what you are going to propose we will have to go to appeal and need to have a planning obligation for that. My client though wants to make progress with the Council and I am not sure we are making progress just now? hence my request for an update please.

Kind regards

Dear Henry,

Thank you for your email, and please accept my apologies for not being able to take your phone calls this week - I have been tied up in meetings.

Just to confirm, we cannot agree to your 12 month trigger point suggestion. I will be talking to my manager and colleagues and will respond shortly with a suggested approach to the viability review mechanism, as it is quite a delicate obligation.

Kind regards,

Tom

**Subject:** RE: Mr Rendell - 18112\_KIDLINGTON GARAGE - Planning update - 22/00047/SO and 22/0017/F

Dear Ian

Apologises, but unfortunately, I must once again write and request your intervention on the above planning application, I believe we are now dealing with the eighth planning officer in respect of this scheme.

We instructed Savills to prepare and submit an affordable housing viability report and then funded a report prepared by Bidwells on behalf of your authority, the two reports broadly agreed with each other in so far as they both concluded that the scheme could unfortunately not support any contribution towards affordable housing. However, in discussion with your officer and in order to mitigate this finding, we agreed with your officer's

suggestion that there should be a further viability test undertaken at a period of nine months following the implementation of planning.

Your officers report went to the planning committee with a recommendation for approval on the basis of no affordable housing contribution and a further viability test at a period of nine months following the implementation of planning. This was subsequently approved by the planning committee subject to more consideration of the time period for the further viability test.

Your officer has now written, asking us to fund external consultant advice regarding the timing of a further viability test. In our opinion this further engagement with external consultants is going to cause additional unnecessary delay and cost to a planning process that your authority has previously agreed already taken far too long. We have tried to engage with your officer to advise that unfortunately, we are not prepared to pay for further external consultant advice as we believe given Bidwells report this is completely unnecessary. We are however, if of assistance, prepared to agree to an extension to the period for the further viability test, from nine months to twelve months following implementation of planning.

I would please ask you to consider the above and do all you can to ensure that planning is concluded as swiftly as possible.

Kind regards

Bob Rendell  
Sweetcroft Homes

Dear Bob

Thank you for your email and I apologise for the delay and lack of response. I did speak with the planning team on this case last week and was given assurances that it was due to be reviewed shortly. We do unfortunately have a backlog in reviewing applications, compounded by a lack of resource in the planning team however I am asking that this is prioritised.

Can I suggest that we arrange a teams meeting for the week after next (Alison cc'd to arrange) by which time I am hopeful that it will have moved forward.

Regards

Ian

Dear Ian

I am writing to seek your urgent assistance in progressing our planning application.

We submitted our affordable housing viability report (copy attached) to Cherwell on the 24<sup>th</sup> October 2022 and despite repeated requests from our planning consultants for an update have heard nothing in response.

We are absolutely desperate to progress this matter and would appreciate the opportunity to discuss with you via a video call and would be grateful if you would please advise your availability.

Many thanks

Bob Rendell

Hi Ian

Many thanks for your response and continued support in regards to this matter.

I look forward to receiving a figure from your housing officer in respect of the offsite provision of affordable housing at the earliest opportunity so that the 106 agreement can be progressed.

Best regards

Bob Rendell

On 27 Jul 2022, at 07:13, Ian Boll <[Ian.Boll@cherwell-dc.gov.uk](mailto:Ian.Boll@cherwell-dc.gov.uk)> wrote:

Dear Mr Rendell

Thank you for your email of 29 June 2022 highlighting your concerns with the progress the Council had made at that time with your planning application (reference 22/00017/F) for the erection of flats at Kidlington Garage, Bicester Road, Kidlington. Thank you also for your recent email of 21 July in which you kindly acknowledged the attention the application has subsequently received.

I noted that the Team Leader within the Planning Team responded on 29 June to apologise and to undertake to pick the matter up with the case officer for the application.

I am pleased that we were then able to make swift progress and that the application was presented to the July Planning Committee. I am aware that the committee resolved to grant planning approval subject to the finalisation of the required legal agreement.

As you note, there are indeed challenges with recruitment which increases the pressure on staff to deal with our high caseloads. We are certainly seeking to address these in the interest of dealing with applications and associated matters in as timely and professional a way as we can.

Whilst the application has only recently been to Committee, I will certainly ensure that the necessary officers are sighted on the delays you have experienced in the interest of completing the legal agreement as soon as possible.

My apologies for those delays. I am pleased that we seem to have moved now to a positive outcome.

Kind regards

**CAUTION:** This email originated from outside of the Council. Do not click links or open attachments unless you recognise the sender and know the content is safe.

Morning Joel

Many thanks for your email and continued your continued chasing of the Local Authority. It is clear from the ongoing lack of response from Cherwell that the planning system within the Local Authority has failed. I don't believe that this the fault of the officers who I am sure are doing their best in difficult circumstances, however the Local Authority itself is clearly under resourced and suffering from low morale and must be held to account for its ongoing failures. Accordingly, I would be most grateful if you would please provide me with a simple timeline of events and note the numerous failures of the Local Authority to communicate, I will then take this up with the Leader of the Council Les Sibley and the Local MP Layla Moran.

Sweetcroft Homes is a well respected local business and we are finding it impossible to operate and plan our workload within the current failed planning system. The impact on our business is such that we will have to make people redundant and much needed homes will not be delivered.

Best regards

Bob Rendell  
CEO Sweetcroft Homes

Dear Andy, Nat & Paul.

Further to the continued emails can someone **please** come back to me and give us an update, where we are with this application and who is now looking after it?

We have emailed housing independently for an update given the lack of response, to which we await comments.

If my email below was not clear the lack of correspondence or update to this application and the continued mishandling is unacceptable and our clients are now rightly fed up. The extension of time that was afforded to the application to go to committee runs out in the coming days.

I await your immediate clarification as to what will be done.

**Subject:** RE: 18112\_KIDLINGTON GARAGE - Planning update - 22/00047/SO and 22/0017/F

Dear Andy,

Further to the below email thread can you please as a matter of urgency please come back to me via telecom or email to provide a comprehensive update on this application.

As can be seen from the application file this application was due for determination in April, this was not achieved due to the departure of Gavin Forrest. The application was duly then reallocated to Samantha Taylor, whereby she confirmed as per the attached that the scheme would be recommended for approval and was proposed to be heard at the June committee. Follow this despite numerous chase emails and telecom messages we have heard nothing more than confirmation they have passed on my clients solicitors details for S106 advancement.

The June committee date has now passed, we are yet to receive housing comments and no other update.

This is clearly totally unacceptable, my client has lost all patience and requires an urgent update with a clear timeline setting out how you proposed to resolve these matters

Kind Regards

---

Dear Paul,

Could you please give me a call on 07966 495 631 at your earliest convenience please?

I am concerned about our application for the Kidlington Garage site and the upcoming committee date as we are yet to receive any correspondence back from Samantha on conditions for the application, or a committee report ahead of the hearing. In addition we need comments from housing and the affordable housing contributions for the S106 – and as it stands none of the above is provided with committee this month fast approaching.

Either a call or explanation by urgent return would be appreciated as our client is understandably frustrated about the process and anxious about the committee itself in light of the above.

Kind Regards

**CHERWELL HOUSING DELIVERY MONITOR FORM 2023**

## Applicant/Agent/Developer

Hallam Land Management Ltd  
Framptons

## Introduction

Cherwell District Council is currently preparing the 2023 Annual Monitoring Report (AMR) which includes updating of the Housing Delivery Monitor. The Government's Planning Practice Guidance recognises the importance of advice provided by developers and local agents in assessing lead-in times, build-out rates by year and deliverability. Information provided on this form will be used to help inform the AMR's Housing Delivery Monitor. This information will be considered along with other relevant information including those received from internal consultees.

Further evidence will be needed for sites without full detailed planning permission to help consider the deliverability of a site.

We would be grateful if you could complete this form to assist us with this process.

Please note that this response could be used in public documents. **Please respond by 24 October 2023.**

## Part A – Planning application information

<b>Site Address</b>	Land North East Of Oxford Road West Of Oxford Canal And East Of Bankside Banbury
<b>Site Area (total)</b>	39.23

Planning Application Details (if applicable)	
Application Number(s):	19/01047/OUT
Date Application(s) Approved:	-
Number of dwellings (net):	825

Please provide any updates or corrections to the planning application information above in the following box:

--

## Part B – Delivery Rate

The Council published a Land Supply Statement in February 2023 which is available here <https://www.cherwell.gov.uk/info/33/planning-policy/370/monitoring-reports/3>

Please indicate if the information in the 5 year land supply statement provides a realistic assumption of the delivery rate on this site:

~~YES~~/NO (please circle)

If you have answered no, please explain why below and provide an alternative assessment in the table below explaining your reasons.

General comments/updates:

The trajectory is unduly pessimistic and should be updated.

### Alternative suggested build-out rate provided by applicant/developer

Year (Financial)	Number of Units (built)	Notes
2023/24		
2024/25		
2025/26	50	
2026/27	100	
2027/28	100	
2028/29	100	
2029/30	100	
2030/31	100	
2031/32	100	
2032/33	100	
2033/34	75	
2034/35		
2035/36		
2036/37		

<b>2037/38</b>		
<b>2038/39</b>		
<b>2039/40</b>		
<b>Beyond 2040</b>		
<b>Total</b>		

**In addition please provide comments on:**

Any housebuilder(s) secured to develop the site? (if applicable)

If no housebuilder is yet in place, what progress has been made and when will one be contracted to build out the site? (if applicable)

Number of housebuilders currently on site?

Number of housebuilders expected on site in future years?

Expected date for starting on site? **2025/26**

Any further information on build-out rates including any further general reasons for any reduction in build rates? **As above**

Any viability or infrastructure issues that need to be overcome to enable the development to commence?

Any ownership or access constraints that need to be overcome to enable the development to commence?

Have pre-commencement conditions been discharged / pre-commencement assessments been carried out?

Any progress being made towards the submission of additional planning application(s) including reserved matters planning applications?

Any progress with site assessment work required for a planning application(s)?

Form completed by: Name (please print)...Louise Steele.....

Position Director.....

Company Framptons

Date 30.10.23 .....

**Sent:** 28 July 2023 16:40  
**To:** Henry Venners  
**Cc:** Paul Ihringer  
**Subject:** RE: KIDLINGTON GARAGE - Planning 22/0017/F- conditions

Hi Henry,

My understanding is that your clients have now paid the undertaking of the County Council's solicitor, who has inputted the County's obligations, and the draft s106 agreement is with your client's solicitor.

I also understand from speaking with our solicitor that there are a couple of technical matters that need refining:

1. "The site location plan appears to include a small area of land outside the applicant's title. I have raised this with the applicant's solicitor, and I understand the plan to be appended to the agreement will be updated. I assume the site location plan submitted with the application will also be amended but, I haven't received confirmation to that effect."
2. Your client's solicitor has confirmed that the Huggins have sold the property to Oxford Road Residences Ltd (ORRL). He will replace the Huggins with ORRL as the landowner, but our solicitor has said that we'll need confirmation that ORRL is the registered proprietor of the land before completion.

In terms of conditions, I have spoken with our Ecologist and she is happy for your suggested amendment to condition 15. She added:

*"change is reasonable as long as the biodiversity enhancement scheme is in for assessment prior to any building works commencing as it is likely that the enhancements will need to be integrated into the buildings and so they need to allow for this."*

*Not related to conditions particularly but just to note that although outside the main nesting season some birds will still nest/start nesting in August and September and are still legally protected whilst doing so. They should just be aware of this prior to the start of demolition. This may be captured in the CEMP however which is pre-commencement – has that been discharged yet?*

To this end, I would be very happy for you to submit a CEMP during this application and the condition to be discharged that way -provided Environmental Health are happy.

Finally, I would be grateful if you could forward on your email from your contaminated land expert explaining why the buildings need to be dropped first before he can provide his advice -we can then consult Environmental Health.

I will be away on annual leave for the next two weeks, returning on Monday 14<sup>th</sup> August, so it would be good if you can copy my team leader, Paul Ihringer, in to your reply.

I think it would be worth us all agreeing an Extension of time until 28<sup>th</sup> August to allow for this information to be re-submitted, consulted on, and for the s106 Agreement to be signed and sealed.

Kind regards,

Tom

Hi Henry,

Thank you for your email.

The draft S106 Agreement, prepared by Womble Bond Dickinson on behalf of Cherwell District Council, has been submitted to Oxfordshire County Council (OCC), but my understanding is that OCC have not yet received an undertaking from your clients to commence work on their part of the S106 Agreement.

Your comments on, and proposed amendments to, the conditions are noted. I will review them early next week and double check with the relevant consultees to make sure they are happy with the suggested amendments.

Kind regards,

Tom

Hi Tom

As time moves on my client is still waiting for the s106 to be progressed. We are hopeful that this will be moved soon.

With that in mind and as we had discussed previously we were looking again at conditions and triggers. I want to be sure that they have a sensible way ahead.

I will forward an email from the contamination chap which I hope helps to clarify why the buildings need to be dropped before he can confirm his contamination advice. Presently we are in a catch-22 as we need to remove the buildings for the contamination to go ahead but condition 9 prevents demolition. Please can we edit condition 9 to allow for demolition? My suggested wording is as attached.

If we do that condition 10 does not really make sense as development will have occurred indeed has to have occurred to find any contamination which might lurk unseen. Again I have edited it as showing

Condition 11 is I think wrong as it refers to itself not condition 10 so I have edited it, not least it was missing a trigger point

12 remains okay

Condition 17 warns against works during bird nesting season

My client would like to do demolition in August/September but condition 15 as worded would preclude that. I would like it please if this could be amended to allow demolition and contamination testing etc.

I really don't see any harm in allowing that to occur before the enhancement strategy is approved. can that condition please be amended to allow demolition? The site is a car lot with no present ecological interest (see ecology report), thus there is nothing to be lost by allowing demolition one stage earlier, there is only gain to be made later. I have tightened up your condition a touch.

That would leave condition 19 as the only one as a precommencement.

We have started to work on that CEMP. if we devised that CEMP scheme before the s106 was signed could we send it in for approval before decision notice issued?

Kind regards

Dear Henry,

Thank you for your email.

Planning is very much a case of, each case on its own merits. In this instance, Members requested a viability review trigger point as late in the process as possible. Therefore, this proposed trigger point reflects the resolution of the Members.

My manager and I also think it is a very fair trigger point as it allows the applicant to construct the buildings, and sell the majority of the residential units (thereby bringing capital in), before the viability of the scheme is re-assessed. We feel this is a pragmatic, and not an unduly onerous, solution.

I look forward to hearing confirmation from your clients, so that the s106 agreement can be progressed and a decision can be issued.

Kind regards,

Tom

Thanks for these thoughts and coming back so quickly I am not sure I can respond myself this week, given time pressures of today, and being away next week. however- I did ask whether these such mechanisms had been used on any other site within CDC. Can you enlighten me please?

I have not seen such an onerous requirement previously, and fairness is important in the planning system.

Kind regards

Further to my email below.

I would also expect the viability review obligation to make it clear that the final four flats cannot be occupied until the viability review work is completed and an affordable housing contribution payment timetable has been agreed with the Council.

Our legal team have been instructed some time ago to prepare a s106 agreement. My understanding is that it is being outsourced to an external party.

**Subject:** RE: KIDLINGTON GARAGE - Planning 22/0017/F

Dear Henry,

My manager and I have given the matter some thought. Although I had suggested a trigger point of 9 months post construction in my committee report, the Members, at the 9<sup>th</sup> March Planning Committee, made it clear it they would want to see the trigger point as late as is practically possible to ensure that the most amount of up to date evidence is available.

To this end, we suggest that the viability review trigger point is as follows:

The first 11 flats can be occupied, but after that a viability review must be carried out whereby any developer profits over 15%, will be split with the Council 50/50 up until the point that the affordable housing contribution requirement of £609k, is paid.

I hope this is helpful.

Kind regards,

Tom

Hi Thomas

Is there any update? I am away next week and would like to pass on an update to my client. I must say I am still mystified as to the additional delay. I was thinking this could be passed to the lawyers still.

Even if we don't like what you are going to propose we will have to go to appeal and need to have a planning obligation for that. My client though wants to make progress with the Council and I am not sure we are making progress just now? hence my request for an update please.

Kind regards

**Henry Venners**

Dear Henry,

Thank you for your email, and please accept my apologies for not being able to take your phone calls this week - I have been tied up in meetings.

Just to confirm, we cannot agree to your 12 month trigger point suggestion. I will be talking to my manager and colleagues and will respond shortly with a suggested approach to the viability review mechanism, as it is quite a delicate obligation.

Kind regards,

Tom

**Subject:** RE: Mr Rendell - 18112\_KIDLINGTON GARAGE - Planning update - 22/00047/SO and 22/0017/F

Dear Ian

Apologises, but unfortunately, I must once again write and request your intervention on the above planning application, I believe we are now dealing with the eighth planning officer in respect of this scheme.

We instructed Savills to prepare and submit an affordable housing viability report and then funded a report prepared by Bidwells on behalf of your authority, the two reports broadly agreed with each other in so far as they both concluded that the scheme could unfortunately not support any contribution towards affordable housing. However, in discussion with your officer and in order to mitigate this finding, we agreed with your officer's

suggestion that there should be a further viability test undertaken at a period of nine months following the implementation of planning.

Your officers report went to the planning committee with a recommendation for approval on the basis of no affordable housing contribution and a further viability test at a period of nine months following the implementation of planning. This was subsequently approved by the planning committee subject to more consideration of the time period for the further viability test.

Your officer has now written, asking us to fund external consultant advice regarding the timing of a further viability test. In our opinion this further engagement with external consultants is going cause additional unnecessary delay and cost to a planning process that your authority has previously agreed already taken far too long. We have tried to engage with your officer to advise that unfortunately, we are not prepared to pay for further external consultant advice as we believe given Bidwells report this is completely unnecessary. We are however, if of assistance, prepared to agree to an extension to the period for the further viability test, from nine months to twelve months following implementation of planning.

I would please ask you to consider the above and do all you can to ensure that planning is concluded as swiftly as possible.

Kind regards

Bob Rendell  
Sweetcroft Homes

Dear Bob

Thank you for your email and I apologise for the delay and lack of response. I did speak with the planning team on this case last week and was given assurances that it was due to be reviewed shortly. We do unfortunately have a backlog in reviewing applications, compounded by a lack of resource in the planning team however I am asking that this is prioritised.

Can I suggest that we arrange a teams meeting for the week after next (Alison cc'd to arrange) by which time I am hopeful that it will have moved forward.

Regards

Ian

Dear Ian

I am writing to seek your urgent assistance in progressing our planning application.

We submitted our affordable housing viability report (copy attached) to Cherwell on the 24<sup>th</sup> October 2022 and despite repeated requests from our planning consultants for an update have heard nothing in response.

We are absolutely desperate to progress this matter and would appreciate the opportunity to discuss with you via a video call and would be grateful if you would please advise your availability.

Many thanks

Bob Rendell

Hi Ian

Many thanks for your response and continued support in regards to this matter.

I look forward to receiving a figure from your housing officer in respect of the offsite provision of affordable housing at the earliest opportunity so that the 106 agreement can be progressed.

Best regards

Bob Rendell

On 27 Jul 2022, at 07:13, Ian Boll <[Ian.Boll@cherwell-dc.gov.uk](mailto:Ian.Boll@cherwell-dc.gov.uk)> wrote:

Dear Mr Rendell

Thank you for your email of 29 June 2022 highlighting your concerns with the progress the Council had made at that time with your planning application (reference 22/00017/F) for the erection of flats at Kidlington Garage, Bicester Road, Kidlington. Thank you also for your recent email of 21 July in which you kindly acknowledged the attention the application has subsequently received.

I noted that the Team Leader within the Planning Team responded on 29 June to apologise and to undertake to pick the matter up with the case officer for the application.

I am pleased that we were then able to make swift progress and that the application was presented to the July Planning Committee. I am aware that the committee resolved to grant planning approval subject to the finalisation of the required legal agreement.

As you note, there are indeed challenges with recruitment which increases the pressure on staff to deal with our high caseloads. We are certainly seeking to address these in the interest of dealing with applications and associated matters in as timely and professional a way as we can.

Whilst the application has only recently been to Committee, I will certainly ensure that the necessary officers are sighted on the delays you have experienced in the interest of completing the legal agreement as soon as possible.

My apologies for those delays. I am pleased that we seem to have moved now to a positive outcome.

Kind regards

Morning Joel

Many thanks for your email and continued your continued chasing of the Local Authority. It is clear from the ongoing lack of response from Cherwell that the planning system within the Local Authority has failed. I don't believe that this the fault of the officers who I am sure are doing their best in difficult circumstances, however the Local Authority itself is clearly under resourced and suffering from low morale and must be held to account for its ongoing failures. Accordingly, I would be most grateful if you would please provide me with a simple timeline of events and note the numerous failures of the Local Authority to communicate, I will then take this up with the Leader of the Council Les Sibley and the Local MP Layla Moran.

Sweetcroft Homes is a well respected local business and we are finding it impossible to operate and plan our workload within the current failed planning system. The impact on our business is such that we will have to make people redundant and much needed homes will not be delivered.

Best regards

Bob Rendell  
CEO Sweetcroft Homes

Dear Andy, Nat & Paul.

Further to the continued emails can someone **please** come back to me and give us an update, where we are with this application and who is now looking after it?

We have emailed housing independently for an update given the lack of response, to which we await comments.

If my email below was not clear the lack of correspondence or update to this application and the continued mishandling is unacceptable and our clients are now rightly fed up. The extension of time that was afforded to the application to go to committee runs out in the coming days.

I await your immediate clarification as to what will be done.

Dear Andy,

Further to the below email thread can you please as a matter of urgency please come back to me via telecom or email to provide a comprehensive update on this application.

As can be seen from the application file this application was due for determination in April, this was not achieved due to the departure of Gavin Forrest. The application was duly then reallocated to Samantha Taylor, whereby she confirmed as per the attached that the scheme would be recommended for approval and was proposed to be heard at the June committee. Follow this despite numerous chase emails and telecom messages we have heard nothing more than confirmation they have passed on my clients solicitors details for S106 advancement.

The June committee date has now passed, we are yet to receive housing comments and no other update.

This is clearly totally unacceptable, my client has lost all patience and requires an urgent update with a clear timeline setting out how you proposed to resolve these matters

Kind Regards

---

Dear Paul,

Could you please give me a call on 07966 495 631 at your earliest convenience please?

I am concerned about our application for the Kidlington Garage site and the upcoming committee date as we are yet to receive any correspondence back from Samantha on conditions for the application, or a committee report ahead of the hearing. In addition we need comments from housing and the affordable housing contributions for the S106 – and as it stands none of the above is provided with committee this month fast approaching.

Either a call or explanation by urgent return would be appreciated as our client is understandably frustrated about the process and anxious about the committee itself in light of the above.

Kind Regards

JoelDay

Dear Chris

Good morning.

I have just heard that the legal cost undertakings with both CDC and OCC legal teams have been agreed, over three months after the application was resolved to be approved by the Council's Planning Committee on 13<sup>th</sup> July 2023. I do hope now that the s106 obligation – which is very similar to the previous version associated with App. No. 18/00293/OUT – can now be completed quickly.

To allow time for this to occur I agree to a further extension of time for the issuing of the permission until 27<sup>th</sup> November 2023.

Regards  
Duncan

Dear Chris

Good morning.

It appears that the s106 obligation work for my client's application at Station Approach, Banbury (App. No. 22/01564/OUT) has now been passed to Emily FitzHerbert, Solicitor at Oxfordshire County Council.

Emily has made contact and I have put her in touch with my client's solicitors. I hope that now – some 9 weeks after the Planning Committee's resolution to approve the application – progress can be made.

As the extension of time is about to expire, I will agree a further extension for a month until 20<sup>th</sup> October 2023. I hope this is acceptable.

Regards

Duncan

Hi Chris,

Thanks for your email. I have since spoken to a colleague and the 75-100 completions a year is probably optimistic at the moment. I would reduce this to 250 and we can review in a years' time.

Kind regards,

**Harriet Jarvis** | Planner

Hi Harriet,

Thank you for the phone call. We are estimating that out of the 1,000 homes in the outline that 350 homes will be built between April 2023 the end of March 2028, so between 75 and 100 a year. Would you be able to let me know whether you think this is correct.

Many thanks.

Chris.

Hi Simon,

Yes we do, we are currently building out the first phase of 14/01932/OUT which has outline planning permission for 1,000 units. Construction will begin on the second and possibly third phases within the next five years.

Kind regards,

Hi,

Further to the below. Would you be able to let me know if you have any plans to submit a Reserve Matters planning application in the next year or two for land at Deerfields farm?

Many thanks.

Chris.

Good Morning Caroline,

Further to your recent correspondence with Jon, in respect of Bicester 10, for information, please see attached plan showing the land ownerships across the site – along with the land registry titles for each parcel.

It would appear that Thomas Homes own all of the land subject to the outline planning permission and there is no indication on the land registry portal of any imminent change on the register.

All the best,

Morning John,

Please see attached here a few comments on the appendix 1 – disputed sites schedule. I've only commented on south area strategic sites – I'll leave Andy to comment on the others and also the query on Saltway (as Linda isn't working today).

@Andy Bateson – on Graven Hill, are the LDO units in addition to the 745 or included within – I thought included within but there are two rows in the table.

Hope this helps for now. I'm around all day if you need anything more.

Kind regards  
Caroline

**CAUTION:** This email originated from outside of the Council. Do not click links or open attachments unless you recognise the sender and know the content is safe.

Hi Caroline,

Attached is the latest version of the SoCG. The site comments are unchanged. Practically most of the information received today is really useful in outlining more detail to an Inspector but doesn't necessarily change the substance of the bullets. That said, if you could summarise 1 or 2 bulleted additions to each site to clarify my questions/responses to the Appellant that would be really helpful. I also need to finish my Ambrosden Proof...

I don't think we use the bullets to concede any sites though, just leave that for Inspectors to decide but we will have to be realistic.

I think unless I've missed it the only site I'm waiting for a further response on is **Salt Way and how we demonstrate clear evidence for the other 113 units** without current RM.

Assuming (as is most likely) we only have a realistic prospect of winning Salt Way, Upper Heyford and the 20 units at NW Bicester pending the 123 units RM supply would be as follows versus LHN710 or LHN742. That assumes we win windfall, small sites etc. which we should.

LPA - vs LHN 2023	LPA - vs LHN Published
3551	3710
710	742
3550	3710
3728	3896

746	779
3818	3818
5.12	4.90
90	-78

Hi Jon,

I tend to agree - @Chris Thom – would this be consistent with what you are thinking re. the AMR. Where are we ending up on the 5yr calculation if we concede this (and others...).

I don't think there is any other strategic infrastructure needed related to Wretchwick Green that would be delivered prior to REMs – I'm pretty sure that everything else will be on site itself to be delivered by the developer.

Is there anything specifically I can help with on the Hempton SOCG – sorry, just wondering if there is anything particular rather than me going through the whole thing, especially with the site updates sent?

Thanks  
Caroline

Hi Caroline,

With the best will in the world it would look better to concede this site going forward. We don't really want to air any 'dirty laundry' surrounding the utilities.

It's good to have Redrow on-board but not enough in itself. Will there be any other progress with strategic infrastructure in addition to the Pioneer Roundabout to assist with future progress before RMs are lodged/determined or even Conditions discharged?

**Importance:** High

**CAUTION:** This email originated from outside of the Council. Do not click links or open attachments unless you recognise the sender and know the content is safe.

Hi All,

I am going to send separate emails regarding individual sites disputed from the Milcombe Hearing.

The bulleted columns correspond to the positions of each parties (the Council's being essentially the NW Bicester evidence and limited updates received since.

That will be easier to review. Please consider the overarching text below and make any additions you can to the bullets or respond to the highlighted points:

We've had a very forensic look at disputed sites this afternoon. I am fairly disappointed with the Inspector giving a lot of lee-way/weight to bullets raised in their disputed matters that I think err towards certainty of delivery rather than realistic prospect.

Notwithstanding I am not wholly surprised of the close scrutiny to clear evidence given the lack of written material or approval of RM for all the forecasts we rely upon for the remainder of the five year period (3.5 years net of the 18mo. already passed).

Judgement potentially will come down negatively for several sites, but bearing in mind we are disputing small totals it is worth trying to explain where any activity post 1 April 2022 is in-line with original expectations or demonstrating how objections to applications can be overcome and when DNs might be issued because we might still align the expectations to year 5.

<p><b>Bicester 12 – South East Bicester (Wretchwick Green)</b></p> <p><b>50 dwellings disputed</b></p>	<ul style="list-style-type: none"> <li>• Outline planning permission in place for allocated site. Discharge of Conditions application relating to the Design Code in progress with active engagement to reach agreement with landowners and way forward on highways and drainage.</li> <li>• Council expect RM application in 2024. No delivery forecast until year 5 (2026/27)</li> <li>• Pioneer Roundabout now constructed.</li> <li>• Legal Agreement signed spring 2022.</li> </ul>	<ul style="list-style-type: none"> <li>- This is a large site with many dwellings</li> <li>- The Council's H... "developable" ... Nevertheless, i... the deliverable...</li> <li>- The forecast de... back each time... – the LP consid... 2031 but now e... 450 dwellings a... (a shortfall of 1...</li> <li>- The site only h... the onus is on... of deliverability...</li> <li>- There is no app... written agreem...</li> <li>- The Council's e... May was that a... in summer 202... now has pushe...</li> <li>- An application... conditions was... in November 2... objected to it.</li> <li>- The application... made in July 2... determination...</li> <li>- An application... (condition 9) h... timing and pha...</li> </ul>
--	--	---

- How is engagement with the applicant/landowner undertaken in providing the expectations for RM submissions. What evidence is there from meetings / emails etc. for the submission now being 2024? Strictly the Appellant is wrong to say RM date of 2023 or 2024 would change the forecast when you made it in the published position, but historically successive published assessments have pushed supply back 12+ months so what can we say to ensure that doesn't happen again

We are only actively considering the Design Code at the moment. This is advanced because a lot of work was done on it a few years ago but we are going to have to seek updates because it does not reflect updated guidance/ policy such as the LTN1/20 guidance.

I'm not aware of a recent communication stating REM will be submitted 2024 (@Chris Thom have they advised anything through the AMR work on this)? Redrow indicated they would have acquired the site early in 2024 so this may give some more urgency to when submissions are made.

In a meeting earlier this year they indicated they wouldn't be able to enable any delivery/ occupations until 2028/29 because of the utility capacity issues at Bicester – this may have changed or things might change (the Council is looking at utilities at Bicester given this is a huge constraint).

- Any details of the pre-commencement conditions being submitted?

We don't have any other submissions other than the design code.

- Any details of the Phasing Condition coming in? Presumably that does inform expectations for RMs?

No.

- What is the nature of objections to 22/01978/DISC for the Design Code/Masterplan. Look They don't look huge but there are still some from e.g. OCC Highways 3 October 2023. Can they be overcome?

Yes, as above, I think they are resolvable but they are related to technical matters and generally where requirements have changed since they drafted the Design Code and will be reliant on the applicant being willing to amend the Design Code (I don't see how we can accept they don't to be honest).

Best Wishes,

Jon

Schedule of disputed sites

Sites Identified by the Council as being “Severely at Risk”

Site Name:	Canalside, Banbury											
LPA ref(s):	18/00293/OUT											
Area (Hectares)	0.657											
Total Capacity (Dwellings)	63											
Location Plan attached?	Yes											
Site Plan attached?	No											
Site ownership	Multiple ownership											
Planning status of the site	The site does not have planning permission. The site previously had outline planning permission for 63 dwellings, but the permission expired in June 2022. A resolution to grant outline planning permission for 63 dwellings was made in July 2023 subject to a S106 agreement, but the S106 has not been signed.											
Site owner / promoter’s progress towards development	As above, a resubmission outline planning application for 63 dwellings was submitted in May 2022 but the decision notice has still not been issued.

Comments on Deliverability	The AMR states:  “Outline permission for 63 dwellings expired in June 2022. A new outline application for 63 dwellings (22/01564/OUT) at Station Road was approved in July 2023 subject to signing of a section 106 agreement. Site is part of a wider allocation in the adopted Cherwell Local Plan and the wider site is proposed to be allocated for mixed use development in the draft Local Plan Review 2040. Projection allows sufficient time (circa 3 years) for reserve matters submission and determination.”  The Council’s document “Sites Appellant Claims Lack Clear Evidence” states:  “Named Housebuilder? No.  S106 progress? - Chased by agent on behalf of applicant to move drafting of S.106 forward. - A formal extension of time sought and agreed between parties. - Lack of resource within Legal Services slowed progress initially. However, the drafting work has been outsourced to 3rd party legal firm. - Terms of agreement and associated costs have been agreed and is to be based upon previously agreed (but never implemented) permission and associated S.106 agreement.						<b>Current planning status?</b> <ul style="list-style-type: none"><li>The site does not have planning permission. Whilst an outline planning application for 63 dwellings was approved on 25 June 2019, no reserved matters applications were made and the consent expired in June 2022 (ref: 18/00293/OUT).</li><li>A resubmission outline application for 63 dwellings was submitted on 25 May 2022 and is pending determination (ref: 22/01564/OUT). The application was considered at planning committee on 13 July 2023 where it was resolved that approval be granted subject to the signing of a Section 106 agreement to secure the following:<ul style="list-style-type: none"><li>35% affordable housing provision.</li><li>Canal towpath contribution of £57,750.</li><li>Cemetery contribution (to be determined).</li><li>Community hall contribution of £8,673.78.</li><li>Footbridge contribution of £39,462.</li><li>Health and wellbeing contribution of £54,432.</li><li>Offsite indoor sports facility contribution of £52,601.56.</li><li>Offsite outdoor sports facility contribution of £127,072.89.</li><li>Waste contribution of £6,678.</li><li>LEAP offsite contribution of £20,779.15.</li></ul></li><li>However, the S106 has not been signed to date and therefore the decision notice has not been published.</li><li>The Council’s evidence does not indicate that the S106 agreement is imminent.</li></ul>					

	<p>- Confirmation of legal representatives acting for applicant have also been provided.</p> <p>Promoter engagement? Not aware of any.</p> <p>Infrastructure / enabling works provided by surrounding sites? None undertaken.</p> <p>There are no major viability or infrastructure issues affecting the deliverability of this site. It is not reliant on other sites coming forward.</p> <p>It has been assumed that some dwellings will be delivered at the end of the 5 year period based on the adopted overall 5 year land supply methodology of outline permissions coming forward at the end of the 5 year period.”</p>	<ul style="list-style-type: none"> <li>At the Heyford Park Inquiry, the Council explained that an extension of time to agree the S106 expired w/e 8<sup>th</sup> December 2023</li> </ul> <p><b>Firm progress being made towards the submission of an application?</b></p> <ul style="list-style-type: none"> <li>There is no clear evidence to demonstrate that progress is being made towards the submission of a reserved matters application. This is not surprising given the outline planning permission has not been issued and the previous consent expired.</li> </ul> <p><b>Written agreement between the LPA and the developer confirming their anticipated start and build-out rates?</b></p> <ul style="list-style-type: none"> <li>A written agreement between the Council and the developer has not been provided.</li> <li>The Council’s evidence confirms that there is no housebuilder.</li> </ul> <p><b>Firm progress with site assessment work?</b></p> <ul style="list-style-type: none"> <li>No clear evidence of firm progress with any site assessment work has been provided.</li> </ul> <p><b>Clear relevant information about viability, ownership constraints or infrastructure provision?</b></p> <ul style="list-style-type: none"> <li>No evidence has been provided.</li> </ul> <p><b>Summary</b></p> <ul style="list-style-type: none"> <li>The site does not have planning permission. An outline planning application has been pending determination for over 1.5 years. The application was approved at planning committee in July 2023 subject to the signing of a Section 106 agreement, however, the s106 has not been signed to date. Even if the S106 is signed and consent is granted, the site will remain a category b) site and the Council would need to provide clear evidence for its inclusion.</li> <li>The evidence the Council has provided is not “clear evidence that housing completions will begin on site within five years.”</li> <li>The site fails to meet the definition of “deliverable” as set out on page 69 of the Framework and should be removed from the supply. This results in a reduction of <b>63 dwellings</b> from the Council’s supply.</li> </ul>

Comments on Deliverability	<p>The AMR states:</p> <p>“Planning application for 700 dwellings (17/01408/OUT) was received in June 2017. A new application (19/01047/OUT) for a residential development of up to 825 dwellings was approved subject to legal agreement in July 2021. It is assumed that 2 housebuilders will be on site at a peak of 50 homes per year per developer. The expected delivery rates allow sufficient lead-in time for Outline and Reserved Matters approvals and construction time. Five years from the base date is considered sufficient time for the first dwellings to come forward.”</p> <p>The Council's document “Sites Appellant Claims Lack Clear Evidence” states:</p> <p>“Named Housebuilder(s) Hallam / Henry Box [Henry Boot]</p> <p>S106 progress? Meeting with LPA and applicant and legal representatives (Minutes attached). August 2023. Following on from this a S.106 agreement has been drafted and is broadly agreed between LPA, OCC and Hallam. Correspondence on the matter last provided Nov 2023 whereby a further EoT has been requested to bring matters to a close (informally agreed at meeting in Nov 23 – awaiting written confirmation. Conditions agreed between parties.</p> <p>Promoter engagement? Hallam Land Management</p> <p>Infrastructure / enabling works provided by surrounding sites? Within S.106/S.278 - Provision of new link road between Oxford Road and Bankside/Longford Park by end of 2025.</p> <p>Developer submission (Framptons) received on 30 October 2023.</p>						<p><b>Current planning status?</b></p> <ul style="list-style-type: none"> <li>The site does not have planning permission.</li> <li>An outline planning application for up to 700 dwellings was submitted on 30 June 2017, however this was withdrawn on 09 September 2021 (ref: 17/01408/OUT).</li> <li>A further outline planning application for up for 825 dwellings; green infrastructure including formal (playing fields with changing rooms, allotments) and informal open space; landscaping and associated infrastructure including a balancing pond; on land off the A4260, with access off the existing Longford Park access off the A4260 (Oxford Road), and a new access off the A4260 (Banbury Road) was submitted on 05 June 2019 by Hallam Land Management and is still pending determination, over 4.5 years later (ref: 19/01047/OUT). The application was considered at planning committee on 15 July 2021 where it was resolved that approval be granted subject to the signing of a Section 106 agreement to secure the following: <ul style="list-style-type: none"> <li>30% on site affordable housing.</li> <li>Play spaces to include a MUGA, NEAP and 2 LAP/LEAPS with commuted sums for ongoing management.</li> <li>Open space of approx. 5.98 hectares.</li> <li>Allotment site with pathways to and within the site.</li> <li>Outdoor sports provision to include sports pitches and community pavilion/changing rooms.</li> <li>Indoor sports contribution of £688,831.11.</li> <li>Community development worker contribution of £65,941.26.</li> <li>Community development fund contribution of £400.</li> <li>Wase and recycling contribution of £111 per dwelling.</li> <li>Cemetery contributions (TBC).</li> <li>Strategic transport contribution of £121,476 towards BAN1 Hennef Way improvements.</li> <li>Strategic transport contribution of £215,537.12 towards Ban 2 Tramway Road improvements.</li> <li>Bridge Street junction improvement contributions of £150,750.</li> </ul> </li> </ul>					

	<p>It states that the Council's trajectory is unduly pessimistic and should be updated.</p> <p>Their representation to the Local Plan regulation 18 consultation supports the continued allocation of this site which shows their ongoing commitment to the delivery of this site.</p> <p>It has been assumed that some dwellings will be delivered at the end of the 5 year period based on the adopted overall 5 year land supply methodology of outline permissions coming forward at the end of the 5 year period."</p> <p>The Council has also provided a draft S106 agreement, minutes of a meeting between Hallam and the Council in August 2023 and an email from the planning agent to the Council in response to a request for a proforma and the proforma is completed</p>	<ul style="list-style-type: none"> <li>- Oxford Road cycleway contributions of £47,466.</li> <li>- Oxford Canal Pedestrian and Cycle Route contribution of £610,000.</li> <li>- Public transport service contributions of £770,000.</li> <li>- Traffic Regulation Order contribution of £6,380.</li> <li>- Travel Plan monitoring contribution of £2,346.</li> <li>- PROW contribution of £90,000.</li> <li>- Nursery and Primary Education contribution of £2,776,896.</li> <li>- Secondary education contributions of £6,050,576.</li> <li>- SEN contributions of £411,345.</li> <li>- Land reservation of 4.88ha to supply a 600-place secondary school to be provided at no cost to the County Council.</li> <li>- Land option of 1.89ha for a potential future expansion if required.</li> </ul> <ul style="list-style-type: none"> <li>• However, the Section 106 has still not been signed to date.</li> <li>• It is almost 2.5 years since a resolution to grant permission was made.</li> <li>• Despite meetings and the Council's comments, the S106 has not been signed. Indeed, a further extension of time has been requested in November.</li> <li>• At the Heyford Park Inquiry, the Council explained that there was an outstanding "thorny issue" in relation to the need to relocate a football club (BUFC) but an application has not been made for the relocation and a legal agreement is not in place.</li> </ul> <p><b>Firm progress being made towards the submission of an application?</b></p> <ul style="list-style-type: none"> <li>• No clear evidence has been provided to demonstrate that firm progress is being made towards the submission of a reserved matters application.</li> <li>• This is not surprising given that the outline permission is yet to be issued.</li> </ul> <p><b>Written agreement between the LPA and the developer confirming their anticipated start and build-out rates?</b></p> <ul style="list-style-type: none"> <li>• The planning agent's proforma is scant in detail. It provides build rates from 2025/26 but no timescales for when the S106 is going to be signed and outline permission issued, detail on the conditions that will require discharging and how and when that will happen, when the first RM application will be made and what that will be for, when infrastructure is to be put in place, when a start on site is going to be made and how long the construction will take.</li> <li>• I respectfully invite the Inspector to consider this proforma alongside those proformas which Braintree provided and were rejected as clear evidence by the Secretary of State (appendix EP2). The Braintree proformas provide much more information than the proforma provided here but were not considered to represent clear evidence in that case.</li> <li>• Similarly, the emails provided by South Oxfordshire and West Oxfordshire also provide much more information than Cherwell have provided in this case and they were rejected by Inspectors as being clear evidence.</li> <li>• Securing the trajectory from the owner's planning agent is not clear evidence.</li> </ul> <p><b>Firm progress with site assessment work?</b></p> <ul style="list-style-type: none"> <li>• No clear evidence has been provided.</li> <li>• This is a very large site and there will be a lot of planning and construction work before any dwellings would be delivered. Despite this, the Council has provided no clear evidence of any such site assessment work.</li> <li>• The S106 agreement refers to condition 4 of the draft outline planning permission requiring a phasing plan. This has not been provided. It is not known what the phasing will be.</li> </ul> <p><b>Clear relevant information about viability, ownership constraints or infrastructure provision?</b></p> <ul style="list-style-type: none"> <li>• No evidence has been provided.</li> </ul> <p><b>Summary</b></p> <ul style="list-style-type: none"> <li>• The site does not have planning permission. An outline planning application has been pending determination for over 4.5 years. The application was</li> </ul>
--	---	---

		<p>recommended for approval at planning committee in July 2021 subject to the signing of a Section 106 agreement, however, the s106 has been signed to date and the latest position is that another . Even if the S106 is signed and outline planning permission is granted, the site will remain as a category b) site and the Council will need to provide clear evidence for the inclusion of this site in the 5YHLS.</p> <ul style="list-style-type: none"><li>• The relocation of BUFC is also a constraint to development</li><li>• Within this context, it is not surprising that the previous 5YHLS position at 1<sup>st</sup> April 2022 did not include the site in the 5YHLS and concluded: “This is a developable site as outline permission has yet to be secured”. This remains the case, yet the Council now claims the site is deliverable. It is not clear why the Council’s position has changed.</li><li>• The evidence the Council has provided is not “clear evidence that housing completions will begin on site within five years.”</li><li>• The site fails to meet the definition of “deliverable” as set out on page 69 of the Framework and should be removed from the supply. This results in a reduction of <b>50 dwellings</b> from the Council’s supply.</li></ul>

Comments on Deliverability	<p>The AMR states:</p> <p>“Outline planning application (21/03426/OUT) for up to 78 dwellings and associated open space was approved subject to legal agreement in April 2022. The application was submitted on behalf of a housebuilder, Manor Oak Homes, who will be developing the site. Signing of section 106 agreement is imminent. Projection is consistent with build rates in Banbury generally in recent years”</p> <p>The Council's document “Sites Appellant Claims Lack Clear Evidence” states:</p> <p>“Named Housebuilder Manor Oak Homes</p> <p>Confirmation of Legal Agreement, DOC and RM timeframes? S.106 has been drafted by CDC and has been passed to applicant and their legal representative for comment/assessment. This was due to be undertaken towards end of Nov 23. Awaiting further comments from the applicant.</p> <p>Build trajectory? Currently being advertised. REM no later than 18 months with occupations through 2027 &amp; Q1 '28</p> <p>Any infrastructure or viability constraints? No</p> <p>Developer Submission (AR Planning for Manor Oak) received on 23 October 2023 which supports the trajectory proposed.</p> <p>The developer has also responded to the regulation 18 consultation on the Cherwell Local Plan Review and affirmed that in addition to the 78 dwellings currently granted subject to legal agreement a further submission of 117</p>						<p><b>Current planning status?</b></p> <ul style="list-style-type: none"> <li>The site does not have planning permission. An outline planning application for up to 78 dwellings was submitted on 06 October 2021 by Manor Oak Homes and is still pending determination (ref: 21/03426/OUT).</li> <li>The application was considered at planning committee on 07 April 2022 where it was resolved that approval be granted subject to the signing of a Section 106 agreement to secure the following: <ul style="list-style-type: none"> <li>Provision of and commuted sum for maintenance of open space.</li> <li>Provision of Local Area of Play and LEAP and commuted sum for maintenance,</li> <li>Off-site outdoor sports facilities enhancement of up to £157,328.34.</li> <li>Off-site indoor sports facilities improvements of up to £65,125,85.</li> <li>Community hall facility enhancements of up to £89,178.26.</li> <li>£106 per dwelling for bins.</li> <li>30% affordable housing provision.</li> <li>Provision of public art – up to £17,472.</li> <li>Public transport contribution of £117,156.</li> <li>Public transport infrastructure contribution.</li> <li>Travel Regulation Order of £2,250 to accommodate new bus stop.</li> <li>Travel Plan monitoring.</li> <li>PROW improvements of £10,000.</li> <li>Strategic Highway contribution of £70,000 towards active travel improvements.</li> <li>Obligation to enter into a S278 agreement to secure a bus stop, dropped kerb facilities and pedestrian paths.</li> <li>£631,503 towards secondary education capacity.</li> <li>£63,327 towards secondary school land contribution.</li> <li>£37,757 contribution to SEN school capacity.</li> <li>£7,329 contribution towards expansion and efficiency of household waste recycling centres.</li> </ul> </li> </ul>					

	<p> dwellings would shortly be submitted. The developer can therefore be demonstrated to be committed to bringing this scheme forward.</p> <p>It has been assumed that some dwellings will be delivered at the end of the 5 year period based on the adopted overall 5 year land supply methodology of outline permissions coming forward at the end of the 5 year period.”</p> <p>The Council has also provided the sales particulars – they confirm that Manor Oak Homes is the promoter and they have no right to bid or match the sale price, an email from the planning agent and the proforma. The proforma states “Section 106 agreement drafted and discussions ongoing”. The proforma states:</p> <p>“Whilst the site is technically ‘developable’ currently, pending finalisation of the S106, it is anticipated that this will be sealed shortly.</p> <p>Upon grant of permission RMs would be submitted within 18 months and determined within 24. This would result in the delivery of the site 2025 through to 2027 completion”</p> <p>The Council also provides email correspondence between Manor Oak Homes and the Council dated 15<sup>th</sup> November. The Council states that the S106 has been with the promoter’s solicitor for some time. The promoter states that they are meeting their solicitor in mid November to review the S106 with a view to agreeing it.</p>	<ul style="list-style-type: none"> <li>• The S106 has still not been signed.</li> <li>• The Council has not provided any explanation why this remains the case</li> <li>• The latest position was that it was to be agreed in the middle of November, but that did not happen.</li> <li>• A further outline planning application for Phase 2 of the development comprising 176 dwellings was submitted by Manor Oak Homes on 06 October 2022. However, the application was withdrawn on 14 June 2023 (ref: 22/03064/OUT).</li> </ul> <p><b>Firm progress being made towards the submission of an application?</b></p> <ul style="list-style-type: none"> <li>• There is no evidence to demonstrate that firm progress is being made towards the submission of a reserved matters application.</li> <li>• This is not surprising because the planning permission has not yet been issued and the site has not been sold to a developer.</li> </ul> <p><b>Written agreement between the LPA and the developer confirming their anticipated start and build-out rates?</b></p> <ul style="list-style-type: none"> <li>• A written agreement between the Council and the developer has not been provided. It is not known who the developer will be.</li> <li>• At the Heyford Park inquiry, the Council still claimed that Manor Oak Homes are the developer of the site, but they are the promoter and do not build homes.</li> <li>• Whilst a proforma from the planning agent on behalf of the promoter has been provided, this confirms (contrary to what is suggested in I12A) that the site is to be sold to a housebuilder and that will happen when the outline planning permission has been issued.</li> <li>• The timescales provided by the planning agent presume the issuing of the planning permission in winter 2023/24 and a start on site in spring / summer 2025 and assumes build rates. But this has not been confirmed by a developer.</li> </ul> <p><b>Firm progress with site assessment work?</b></p> <ul style="list-style-type: none"> <li>• No clear evidence has been provided.</li> <li>• The proforma explains that work on the pre-commencement conditions is awaiting the formal grant of the permission</li> </ul> <p><b>Clear relevant information about viability, ownership constraints or infrastructure provision?</b></p> <ul style="list-style-type: none"> <li>• The proforma explains that there are no issues with viability or infrastructure.</li> </ul> <p><b>Summary</b></p> <ul style="list-style-type: none"> <li>• The site does not have planning permission. An outline planning application has been pending determination for over 2 years. The application was recommended for approval at planning committee in April 2022 subject to the signing of a Section 106 agreement, however, the s106 has still not been signed over 1.5 years later.</li> <li>• Even if the S106 is signed and outline planning permission is granted, the site will remain a category b) site and the Council will need to provide clear evidence for the inclusion of this site.</li> <li>• The council did not consider the site was deliverable at 1<sup>st</sup> April 2022 or when it published its previous position in February 2023.</li> <li>• The evidence the Council has provided is not “clear evidence that housing completions will begin on site within five years.”</li> <li>• The site fails to meet the definition of “deliverable” as set out on page 69 of the Framework and should be removed from the supply. This results in a reduction of <b>78 dwellings</b> from the Council’s supply.</li> </ul>

Comments on Deliverability	<p>The AMR states:</p> <p>“Outline planning application for a residential development comprising up to 250 dwellings was permitted in February 2023 subject to the signing of a section 106 agreement which is expected imminently. Developer (Bloor homes) anticipates delivery of homes within the next 5 years and reserve matters application to be submitted imminently. Site is identified in the draft Local Plan Review 2040. Projection is consistent with build rates in Banbury generally in recent years.”</p> <p>The Council's document “Sites Appellant Claims Lack Clear Evidence” states:</p> <p>“Named Housebuilder Bloor Homes</p> <p>Confirmation of Legal Agreement, DOC and RM timeframes? S106 now agreed and being circulated for signing prior to sealing next week. PPA sought by developer for REM application submission intended for Jan. '24.</p> <p>Reasons for any S106 delay? Legal resources</p> <p>Build trajectory? Bloor's currently building phase 2 to north from which this site will gain access. Intend construction start as early as Q2/Q3 '24, upon completion of 2nd phase.</p> <p>Any infrastructure or viability constraints? No, all issues resolved in S106.</p> <p>Developer submission (Bloor Homes) received on 13 October 2023 confirming delivery within the five years.</p>						<p><b>Current planning status?</b></p> <ul style="list-style-type: none"> <li>The site does not have planning permission.</li> <li>An outline planning application for up to 250 dwellings, public open space, landscaping and associated supporting infrastructure was submitted by Bloor Homes on 14 July 2022 and is still pending determination, almost 1.5 years later (ref: 22/02101/OUT). The application was considered at planning committee on 09 February 2023 where it was resolved that approval be granted subject to the signing of a Section 106 agreement to secure the following: <ul style="list-style-type: none"> <li>Community Hall facilities improvement of £285,827.12.</li> <li>Outdoor sports provision contribution of £504,257.50.</li> <li>Indoor sport provision contribution of £208,736.70.</li> <li>Public art/public realm contribution of £56,000.</li> <li>Community development worker contribution of £16,938.68.</li> <li>Community development fund contribution of £11,250.</li> <li>Provision of and commuted sum for maintenance of open space.</li> <li>Public transport services contribution of £262,750.</li> <li>Highway works contribution of £224,358.97.</li> <li>PROW contribution of £60,000.</li> <li>Travel Plan monitoring of £1,558.</li> <li>Secondary education contribution of £1,994,220.</li> <li>Secondary school land contribution of £199,980.</li> <li>Special education contribution of £134,611.</li> <li>Household waste recycling centres contribution of £23,490.</li> <li>Thames Valley Police contribution of £44,482.20.</li> </ul> </li> <li>However, the S106 agreement has not been signed.</li> </ul> <p><b>Firm progress being made towards the submission of an application?</b></p> <ul style="list-style-type: none"> <li>The Council's evidence states that a reserved matters application is going to be submitted next month but it has not provided any details such as the layout, draft reports, statements, etc.</li> </ul>					

	<p>In their response to the regulation 18 Cherwell Local Plan Review consultation, the developer suggests that the development of the site will commence in the first quarter of 2024 and yield the following completions:</p> <p>2024 – 48 dwellings  2025 – 63 dwellings  2026 – 63 dwellings  2027 – 63 dwellings  2028 – 13 dwellings</p> <p>It has been assumed that some dwellings will be delivered at the end of the 5 year period based on the adopted overall 5 year land supply methodology of outline permissions coming forward at the end of the 5 year period.”</p> <p>The Council also provides is a site layout plan for the developer’s current development in Banbury. It does not relate to this phase and an email from the developer dated 13<sup>th</sup> October which explains that subject to the S106 being agreed (hopefully by the end of October) they will be delivering units from this site within the next 5 years</p>	<p><b>Written agreement between the LPA and the developer confirming their anticipated start and build-out rates?</b></p> <ul style="list-style-type: none"> <li>• A written agreement between the Council and the developer has not been provided. The email from the developer simply states that subject to the signing of a S106 hopefully by the end of October (which did not happen), then dwellings will be delivered within this site in the 5YHLS period.</li> <li>• The site does not have outline planning permission yet, there have been no applications to discharge conditions or applications for reserved matters. Within this context, a start on site in Q2/Q3 2024 is unrealistic.</li> </ul> <p><b>Firm progress with site assessment work?</b></p> <ul style="list-style-type: none"> <li>• No evidence of firm progress with any site assessment work has been provided.</li> </ul> <p><b>Clear relevant information about viability, ownership constraints or infrastructure provision?</b></p> <ul style="list-style-type: none"> <li>• No evidence has been provided.</li> </ul> <p><b>Summary</b></p> <ul style="list-style-type: none"> <li>• The site does not have planning permission. An outline planning application has been pending determination for 1.5 years. The application was recommended for approval at planning committee in February 2023 subject to the signing of a Section 106 agreement, however, the s106 has not been signed to date.</li> <li>• Even if the S106 is signed and outline planning permission is granted, the site will remain as a category b) site and the Council will need to provide clear evidence of deliverability. .</li> <li>• The Council has not provided any “clear evidence that housing completions will begin on site within five years.”</li> <li>• The site fails to meet the definition of “deliverable” as set out on page 69 of the Framework and should be removed from the supply. This results in a reduction of <b>50 dwellings</b> from the Council’s supply.</li> </ul>

Comments on Deliverability	<p>The AMR states:</p> <p>“Application for 15 flats was granted planning permission in March 2023 subject to the signing of a section 106 agreement. Sweetcroft Homes are the developer. This is a full application and expected to be built out well within the five year period.”</p> <p>The Council's document “Sites Appellant Claims Lack Clear Evidence” states:</p> <p>“Housebuilder – Sweetcroft Homes.</p> <p>Full planning app, so no RM required.</p> <p>The timescales condition will be the usual 'build within three years' of permission. However, no details on build out rate provided.</p> <p>The delay in the S.106 agreement has been to do with refinement to various obligations. Case officer anticipates a revised draft s.106 agreement from the applicant by 30th Nov 23 with both the applicant and council working towards issuing planning permission before Christmas 2023.</p> <p>There is a viability mechanism. The Council's developer contributions have been agreed but a viability review mechanism is needed to try and secure some affordable housing before all the flats are occupied.</p>						<p><b>Current planning status?</b></p> <ul style="list-style-type: none"> <li>The site does not have planning permission.</li> <li>A full planning application for 15 dwellings was submitted on 05 January 2022 and is still pending determination, over 1.75 years later (ref: 22/00017/F). The application was recommended for approval at planning committee on 14 July 2022 subject to the signing of a Section 106 agreement to secure the following: <ul style="list-style-type: none"> <li>Off-site affordable housing equivalent to 35% (approx. £609,000).</li> <li>Off-site outdoor sports facilities contribution of £5,557.76.</li> <li>Off-site indoor sports facilities contribution of £3,160.56.</li> <li>Community hall facilities contribution of £11,128.</li> <li>Waste and recycling facilities contribution of £1,665.</li> <li>Traffic Regulation Order contribution of £6,225.</li> <li>CDC monitoring fees of £1,500.</li> </ul> </li> <li>However, the S106 was not signed, and the application was taken back to planning committee on 09 March 2023 due to the applicant submitting a viability assessment in November 2022 which concluded that the off-site affordable housing contribution would not be viable.</li> <li>The application was again recommended for approval on 09 March 2023 subject to the signing of an S106 agreement to secure the above heads of terms, excluding the affordable housing provision but subject to a viability review mechanism.</li> <li>However, the S106 agreement has still not been signed to date.</li> <li>In addition, the LLFA issued an objection to the application on 29 September 2023, which states that the following have <u>not</u> been provided: a flood risk assessment; a detailed drainage strategy; a surface water catchment plan;</li> </ul>					

	<p>Dwellings delivered in the 5 year period based on overall 5 year land supply methodology of full permissions coming forward within the 5 year period.”</p> <p>The Council also provides email correspondence between the agent and the Council in relation to the S106 agreement. It refers to the viability mechanism described above. The latest email in the correspondence is dated July 2023.</p>	<p>technical approval from public sewer undertaker; a flow exceedance plan; or a detailed maintenance schedule. None of this information has been provided to date.</p> <p><b>Firm progress being made towards the submission of an application?</b></p> <ul style="list-style-type: none"><li>• As above, an application has been pending determination for over 1.75 years.</li></ul> <p><b>Written agreement between the LPA and the developer confirming their anticipated start and build-out rates?</b></p> <ul style="list-style-type: none"><li>• No evidence has been provided.</li></ul> <p><b>Firm progress with site assessment work?</b></p> <ul style="list-style-type: none"><li>• No evidence has been provided.</li></ul> <p><b>Clear relevant information about viability, ownership constraints or infrastructure provision?</b></p> <ul style="list-style-type: none"><li>• No evidence has been provided.</li></ul> <p><b>Summary</b></p> <ul style="list-style-type: none"><li>• The site does not have planning permission. A full planning application for 15 dwellings has been pending determination for over 1.75 years. Whilst the application was recommended for approval at planning committee on 14 July 2022 and again on 09 March 2023, the S106 has been signed to date. There is no clear evidence to demonstrate that firm progress is being made towards the signing of a Section 106 agreement.</li><li>• The Council has not provided any “clear evidence that housing completions will begin on site within five years.” The site fails to meet the definition of “deliverable” as set out on page 66 of the Framework and should be removed from the supply. This results in a reduction of <b>15 dwellings</b> from the Council’s supply.</li></ul>

Comments on Deliverability	<p>The AMR states:</p> <p>“A new Hybrid application for 1175 dwellings was approved in September 2022. Reserved matters (22/02255/REM) is approved for phase 10 for 138 dwellings. The Councils latest monitoring shows that foundations are in place for the majority of the homes with some near completion. Recent history of delivery on the site with 250 dwellings completed in 2022/23. Dorchester is a long standing and active developer on the site and there are two developers at Heyford Park. Dorchester Living are in partnership with Picture Living who will deliver private rented dwellings. Over the last five years an average of 100 new homes per year were built at Heyford Park. It is anticipated that this level of delivery will continue. Dorchester anticipate that they will deliver over 150 dwellings per year going forward including delivering phase 10 at the same time as future phases. They do not identify any infrastructure constraints to delivery. Discussions are occurring with the developer concerning future reserved matters applications which are expected shortly. Dorchester's website indicates a range of new homes for sale.”</p> <p>The Council's document “Sites Appellant Claims Lack Clear Evidence” states:</p>						<p><b>Current planning status?</b></p> <ul style="list-style-type: none"><li>• A hybrid planning application seeking outline planning permission for a large mixed-use development including up to 1,175 dwellings, retail and employment buildings, a new medical centre, a new primary school, community buildings, open space, sports facilities, public park, buildings for filming activities and associated infrastructure was submitted on 10 May 2018 by Dorchester Living Ltd and approved on 09 September 2022, over 4 years later (ref: 18/00825/HYBRID).</li><li>• A reserved matters application for 138 dwellings was submitted on 27 July 2022 by Heyford Park Developments Ltd and approved on 27 February 2023 (ref: 22/02255/REM).</li><li>• No further reserved matters applications have been made to date.</li><li>• The Council relies on the submission of a phasing plan by Dorchester Living. However, at the Heyford Park inquiry, the Council explained that on 4<sup>th</sup> December 2023, the developer (Dorchester Living) had withdrawn the application to discharge the condition relating to the phasing plan (LPA ref: 22/03016/DISC). Dorchester are a rule 6 party to the Heyford Park appeal.</li></ul> <p><b>Firm progress being made towards the submission of an application?</b></p> <ul style="list-style-type: none"><li>• The Council’s trajectory states that discussions are occurring with the developer concerning future reserved matters applications which are expected shortly.</li></ul>					

	<p>“What is the clear evidence for timeframes for next RM submissions for +350 units from year 3. Is this agreed with Dorchester in terms of infrastructure timings for the Heyford Park Inquiry?</p> <p>Developer Submission (Dorchester) received on 3 November 2023. Dwellings delivered during the 5 year period.</p> <p>It should be noted that the developers are projecting a faster rate of delivery than assumed by the Council.</p> <p>Dorchester’s committed new build completions to end Q1 2028 = 23 dwellings (built and occupied in the last 6 months at Phase 9A approved under 16/02446/F) + 270 (approved and under construction in Phases 9B – 9G also approved under 16/02446/F) + 5 (new occupations at Phase 8C under 19/00446/F in last 6 months) + 9 (built but not yet occupied at Phase 8C) + 34 (built and occupied in last 6 months in Phases 5C and 7A approved under 10/01642/OUT, 19/00439/REM &amp; 19/00440/REM) + 138 (currently under construction at Phase 10 and approved under 22/02255/REM) = 479 dwellings.</p> <p>In addition, Dorchester also anticipate the following additional completions within the next five years based on their phasing plan submission under 22/03016/DISC: 6 dwellings (at Phase 13) + 114 (Phase 11) + 62 (Phase 17) which are all due to be the subject in new reserved matters application submissions in Feb. 2024 and with construction expected Q1/Q2 2025 = 182.</p> <p>These additional occupations all appear quite likely to the LPA.</p> <p>Dorchester also suggest that: 100 dwellings (at Phase 23A) + 100 (56% of Phase 16) + 16 (Phase 39) + 62 (62% of Phase 23B) + 42 (42% of Phase 12) = 320 dwellings could all come forward over the next 5 years. That would bring construction and occupation rates up to almost 200dpa, which is not considered likely by the LPA so have not been included in the Council’s supply calculations.”</p>	<ul style="list-style-type: none"> <li>• However, the Council has not provided any clear evidence to demonstrate that firm progress is being made on these further reserved matters applications.</li> <li>• As above, the Inspector required that by 30<sup>th</sup> November the Council needed to provide the Appellants with all the clear evidence it relied on for sites that fall in category b) such as this site. The Council did not provide us with any information. Reference is made to a response by the developer on 3<sup>rd</sup> November, but this has not been provided.</li> </ul> <p><b>Written agreement between the LPA and the developer confirming their anticipated start and build-out rates?</b></p> <ul style="list-style-type: none"> <li>• The Council’s evidence refers to a submission dated 3<sup>rd</sup> November 2023, but that has not been provided.</li> </ul> <p><b>Firm progress with site assessment work?</b></p> <ul style="list-style-type: none"> <li>• No evidence has been provided.</li> </ul> <p><b>Clear relevant information about viability, ownership constraints or infrastructure provision?</b></p> <ul style="list-style-type: none"> <li>• No evidence has been provided.</li> </ul> <p><b>Summary</b></p> <ul style="list-style-type: none"> <li>• The site has outline planning permission for a large mixed-use development including up to 1,175 dwellings. A reserved matters application for 138 dwellings was approved in February 2023.</li> <li>• The 138 dwellings are included along with the other phases at Heyford Park.</li> <li>• The Council’s case is unclear: <ul style="list-style-type: none"> <li>- It refers to 293 dwellings at phase 9 (i.e. 270 + 23) (the AMR shows only 218 of these were left to be built at the base date - page 15)</li> <li>- It refers to 14 dwellings at phase 8C (the AMR shows that phase 8C had completed before the base date – page 15);</li> <li>- It refers to 34 dwellings at phases 5C and 7A (the AMR shows that phase 7A had been completed by the base date and the other reference to 19/004400/REM refers to phase 8A rather than 5C but in any case it was completed before the base date as shown in the AMR)</li> <li>- It refers to the 138 dwellings on this site, which are included in the 5YHLS</li> <li>- The Council then accepts the 182 dwellings on phases 11, 13 and 17 but reject Dorchester’s suggestion of any other phases in the 5YHLS period.</li> <li>- Therefore, the Council accepts 320 dwellings on this part of the site, not 488</li> </ul> </li> </ul> <p>• In summary, the Council has not provided clear evidence for an additional <b>350 dwellings to the 138 figure</b>. The evidence it has provided is unclear and only supports an additional 182 dwellings rather than 350.</p> <p>• In addition, the phasing plan the Council relies on has been withdrawn.</p>

	0	50	50	75	75	320	0	30	50	50	50	250
Comments on Deliverability	<p>The AMR states:</p> <p>“Outline permission for up to 320 dwellings is secured. The site was acquired by Vistry Group which consist of Bovis Homes and Linden Homes in November 2020. Reserved matters application (22/02357/REM) has now been approved in May 2023. Most conditions have now been discharged. Projection is consistent with build rates in Banbury generally in recent years. Developer has estimated that the majority of the site will be built out in 5 year period and they will start on site in early 2024..”</p> <p>The Council's document “Sites Appellant Claims Lack Clear Evidence” states:</p> <p>“Correspondence from Vistry informing CDC of Management Company to transfer for areas of open space including play areas, sports pitches, all ecological areas and potentially the SUDs features (email attached March 23). CDC advised that such details would need to form a DISC application and required prescribed info contained within schedule 3 (April 23).</p> <p>Construction vehicle routing discussed in July 2023 following complaints from residents about traffic through Hanwell village. Email sent to applicant confirming approved routing with the CTMP.</p> <p>Developer Submission (Vistry Homes) received 10 November 2023. Generally supports the Council's assumptions.”</p> <p>The Council also provides detail on the landscape plan and construction traffic as referred to above.</p>						<ul style="list-style-type: none"> <li>The site has detailed consent for 320 dwellings</li> <li>The developer has responded to a recent request by the Council in relation to the delivery of this site to explain that 30 dwellings should be included in the first year, followed by 50 dwellings.</li> <li>This means 250 dwellings should be included in the 5YHLS period; a reduction of <b>70 dwellings</b> from the Council's position.</li> </ul>					

	<p>The Council also provided email correspondence between the developer and the Council.</p> <p>The email from the Council dated 10th November 2023 states:</p> <p>“We are currently estimating that the site (320 dwellings) will be built out by March 2028, so therefore about 75 dwellings per year. Do you think this is achievable?”</p> <p>The response from the developer also dated 10th November 2023 states:</p> <p>“with the market how it is, we are assuming it will be around 30 for 2024 then 50 per annum onwards.....so built out by 3030. But this may be more in line with your assumption should the market get back on track again.”</p>

	50	75	75	100	100	400	Clear evidence of 237 dwellings across the 5YHLS period					237
Comments on Deliverability	<p>The AMR states:</p> <p>“Outline permission for the 1000 homes is secured. This covers the remaining area of the site which is the majority of the strategic allocation. Reserved matters for two of the development parcels (22/02068/REM) were permitted in April 2023 for 237 dwellings. Reserved matters has also been granted for a spine road (20/03702/REM) and link road (20/03724/REM) serving the school and a foul water pumping station (21/03950/REM). No known delays in developers starting on site, conditions discharged, S106 obligations varied to allow early road construction to facilitate speedier development (21/00653/M106), ground works in place. Infrastructure will be delivered based on the number of occupations meaning that there will be no significant delays in delivering the homes permitted. Persimmon homes are developing the 237 homes in Phases 1 &amp; 3. Discussions are underway on reserve applications for further phases. Charles Church is currently preparing an application (anticipated Dec. '23) for the Phase 2 land (south of Phases 1 &amp; 3 – zoned for 110-122 dwellings). Projection is consistent with build rates on this site and in Banbury generally in recent years. There are two house builders on site. A significant proportion of the site is forecast to be completed within the 5 year period. Developer has indicated that development is likely to be delivered in line with the projection.”</p> <p>The Council's document “Sites Appellant Claims Lack Clear Evidence” states:</p> <p>“This is generally fine but do we have any confirmed correspondence with the promoter for the next RM submission?</p> <p>Developer Submission (Persimmon homes) received on 10 November 2023. This assumes a delivery of 250 within the next 5 years.</p>						<p><b>Current planning status?</b></p> <ul style="list-style-type: none"> <li>An outline planning application for a mixed-use development including up to 1,000 dwellings was submitted on 17 November 2014 and approved on 19 December 2019 (ref: 14/01932/OUT).</li> <li>A reserved matters application for 237 dwellings was submitted by Persimmon Homes on 11 July 2022 and was approved on 20 April 2023 (ref: 22/02068/REM).</li> </ul> <p><b>Firm progress being made towards the submission of an application?</b></p> <ul style="list-style-type: none"> <li>As above, a reserved matters application for part of the site has been approved. No clear evidence of firm progress being made towards the submission of other reserved matters applications has been provided.</li> </ul> <p><b>Written agreement between the LPA and the developer confirming their anticipated start and build-out rates?</b></p> <ul style="list-style-type: none"> <li>A written agreement between the Council and the developer has not been provided.</li> <li>The developer has explained to the Council that the build rate of 75-100 dwellings per annum is optimistic and indicated that 250 dwellings should be included.</li> <li>Whilst the AMR states that the developer has indicated that development is likely to be in line with the projection, this is not the case. The Council has included 400 dwellings instead.</li> </ul> <p><b>Firm progress with site assessment work?</b></p> <ul style="list-style-type: none"> <li>No clear evidence of firm progress on site assessment work has been provided. Whilst some site assessment work has been undertaken as part of the recently approved reserved matters application, some conditions on the outline planning permission have not been discharged.</li> </ul> <p><b>Clear relevant information about viability, ownership constraints or infrastructure provision?</b></p>					

	<p>However, looking at historic delivery in Banbury this appears to be unduly pessimistic projection.”</p> <p>The Council also provided email correspondence between the Council and Persimmon.</p> <p>The email from the developer on 23<sup>rd</sup> October states:</p> <p>“we are currently building out the first phase of 14/01932/OUT, which has outline planning permission for 1,000 units/ Construction will begin on the second and possibly third phases within the next five years”.</p> <p>The response from the Council dated 10th November 2023 refers to a phone call and then states:</p> <p>“We are estimating that out of the 1,000 homes in the outline that 350 homes will be built between April 2023 the end of March 2028, so between 75 and 100 a year. Would you be able to let me know whether you think this is correct”</p> <p>The reply from Persimmon, also dated 10th November 2023 states:</p> <p>“I have since spoken to a colleague and the 75-100 completions a year is probably optimistic at the moment. I would reduce this to 250 and we can review in a years’ time”</p>	<ul style="list-style-type: none"><li>• Reserved matters consent has been granted for a spine road and link road serving the school, as well as a foul water pumping station. No information has been provided regarding viability or ownership constraints.</li></ul> <p><b>Summary</b></p> <ul style="list-style-type: none"><li>• The site has outline planning permission for up to 1,000 dwellings and detailed consent for 237 dwellings.</li><li>• 237 dwellings are deliverable in the five year period. However, no clear evidence of firm progress towards the submission of any other reserved matters applications has been provided. Indeed the evidence the Council has provided would only support 250 dwellings in the 5YHLS period.</li><li>• The Council has not provided any “clear evidence that housing completions will begin on site within five years.” The site fails to meet the definition of “deliverable” as set out on page 66 of the Framework and should be removed from the supply. This results in a reduction of <b>163 dwellings</b> from the Council’s supply.</li></ul>

Comments on Deliverability	<p>The AMR states:</p> <p>“Outline planning permission for 1700 homes on land to the north of Middleton Stoney Road, forming part of the wider North West Bicester strategic allocation was secured by P3EcoLtd on 30 January 2020. A Reserved Matters application (21/02339/REM) for 500 of the 1700 homes (forming phase 1) was submitted on behalf of Countryside Properties in July 2021 and was subsequently withdrawn. Applications continue to be submitted for Discharge of Conditions (including Phasing Plan and Design Code) and Reserved Matters for access arrangements, road layouts and a first residential phase of 123 dwellings (23/00214/REM, 23/00170/REM, 23/01493/REM and 23/01586/REM and 23/00207/DISC, 23/01496/DISC and 23/01558/DISC). The active engagement between developer (Cala homes) and Council relating to delivery of Reserved Matters are separate to restrictions imposed by infrastructure delivery as 500 dwellings are permitted on the site for 1700 dwellings prior to strategic infrastructure needing to be in place. Cala homes have submitted a phasing plan which indicates development will start in 2024. Due to the absence of reserved matters permission the site will not deliver homes before 2026/27.”</p>						<p><b>Current planning status?</b></p> <ul style="list-style-type: none"> <li>An outline planning application for 1,700 dwellings was submitted on 19 December 2014 and approved on 30 January 2020 (ref: 14/02121/OUT).</li> <li>A reserved matters application for 500 dwellings was submitted on 05 July 2021 however the application was withdrawn on 03 November 2022 (ref: 21/02339/REM).</li> <li>A reserved matters application for 123 dwellings was submitted on 09 June 2023 by Cala Homes and is pending determination (ref: 23/01586/REM). The application is subject to objections from statutory consultees as follows: <ul style="list-style-type: none"> <li>Environment Agency comment (dated 31 August 2023) - detailed information regarding the hydrological and hydro-geological context of the development needs to be provided.</li> <li>Oxfordshire County Council objection (dated 27 July 2023) - Layout relative to spine roads will need to be reviewed because of changes needed to those roads to provide cycle facilities on both sides; amount of car parking is in excess of Oxfordshire Parking Standards; amount of cycle parking is insufficient to meet Oxfordshire Parking Standards; and improvements needed to maximise cycle and pedestrian connectivity.</li> <li>Thames Valley Police holding objection (dated 21 July 2023) – “have some concerns with the proposals in terms of the potential for crime and disorder, and for that reason I am unable to support this application in its current form.” – multiple amendments required.</li> <li>Strategic Housing objection (dated 25 October 2023) – the affordable housing mix is not in accordance with S106 requirements or the Council's suggested revised mix and the design and layout does not promote adequate tenure distribution or integration.</li> </ul> </li> <li>It is unknown whether these outstanding issues will be resolved or when.</li> <li>Two identical reserved matters applications for Phase 1A infrastructure comprising two junctions and two sections of internal road were submitted on</li> </ul>					

		<p>23 and 24 January 2023 and are pending determination (refs: 23/00214/REM and 23/00170/REM). The applications are subject to an objection from Oxfordshire County Council (dated 01 March 2023) on the basis that the secondary access is insufficiently wide.</p> <p><b>Firm progress being made towards the submission of an application?</b></p> <ul style="list-style-type: none"><li>• As above, a reserved matters application is pending determination subject to outstanding objections.</li></ul> <p><b>Written agreement between the LPA and the developer confirming their anticipated start and build-out rates?</b></p> <ul style="list-style-type: none"><li>• No written agreement with the developer has been provided.</li></ul> <p><b>Firm progress with site assessment work?</b></p> <p>No clear evidence of firm progress with site assessment work has been provided.</p> <p><b>Clear relevant information about viability, ownership constraints or infrastructure provision?</b></p> <ul style="list-style-type: none"><li>• The Council's trajectory states: "The active engagement between developer (Cala homes) and Council relating to delivery of Reserved Matters are separate to restrictions imposed by infrastructure delivery as 500 dwellings are permitted on the site for 1700 dwellings prior to strategic infrastructure needing to be in place."</li></ul> <p><b>Summary</b></p> <ul style="list-style-type: none"><li>• The site only has outline planning permission. Whilst a reserved matters application for 500 dwellings was made in July 2021, the application was subsequently withdrawn. A revised reserved matters application for 123 dwellings was submitted in June 2023 and is pending determination. However, the application is subject to several outstanding objections. It is unknown whether the application will be approved.</li><li>• The Council has not provided any "clear evidence that housing completions will begin on site within five years." The site fails to meet the definition of "deliverable" as set out on page 69 of the Framework and should be removed from the supply. This results in a reduction of <b>100 dwellings</b> from the Council's supply.</li></ul>

Location Plan attached?	No											
Site Plan attached?	No											
Site ownership	The site has not been sold to DWH											
Planning status of the site	The site has outline planning permission. A reserved matters application has not been made. Instead a new planning application has been made for 126 dwellings but that remains undertermined.											
Site owner / promoter's progress towards development	As above, a full planning application has been made, but this is not determined. It was validated in October 2022 (LPA ref: 22/03063/F)

Comments on Deliverability	<p>The AMR states:</p> <p>“An outline application for 31 homes on land within the allocation by Pye Homes was approved in September 2023. The expected delivery rates allow sufficient lead-in time for Reserved Matters approvals and construction time. Application (22/03063/F) now submitted by David Wilson homes resulting in additional dwellings and expected to be determined shortly. Anticipated legal agreement in line with existing agreement. Further developer interest indicates delivery within the 5 year period.”</p>						<ul style="list-style-type: none"> <li>Outline planning permission was granted for Pye Homes but they are no longer taking the site forward.</li> <li>The Milcombe Inspector did not consider the site was deliverable. Paragraph 42 of the appeal decision states:</li> </ul> <p>The allocated site has extant planning permission although this is unlikely to be implemented following the submission of a separate planning application for David Wilson Homes which has not yet been granted with unresolved objections related to biodiversity net gain. The Council expect the planning application to go to committee before the end of 2023 with David Wilson starting on site in early 2024. However, David Wilson do not currently own the site and so I consider this timescale to be ambitious given the processes involved in completing the acquisition. I consequently deduct 30 of the projected dwellings for 2024-2025.</p> <p>Consequently, we remove this site from the deliverable supply.</p>					

Partial Review sites

## 1 Introduction

### What is the Annual Monitoring Report?

- 1.1 The Cherwell District Council AMR reviews progress in preparing the Council's planning policy documents and assesses whether its existing development plan policies are effective. It provides monitoring information, amongst other things, on employment, housing, and the natural environment.
- 1.2 This AMR covers the period 1 April 2022 – 31 March 2023. A base date of 31 March 2023 is used for monitoring performance against specified indicators. The AMR also includes an up-to-date report on Local Plan progress when measured against the Local Development Scheme (LDS) (September 2023).
- 1.3 The Cherwell Local Plan 2011-2031 Part 1 was formally adopted by Cherwell District Council on 20 July 2015. The Local Plan provides the strategic planning policy framework for the District. Policies within the Plan replace some of the saved policies of the previously adopted Cherwell Local Plan 1996. Policy Bicester 13 of the Local Plan was re-adopted on 19 December 2016 following the outcome of a legal challenge. The re-adopted policy is identical to that originally adopted by the Council on 20 July 2015, other than the deletion of the words, '*That part of the site within the Conservation Target Area should be kept free from built development*' from the third bullet point of the policy's key site-specific design and place shaping principles.
- 1.4 This is the ninth AMR to monitor against the indicators and targets from the adopted Local Plan 2011-2031 Part 1. However, as the Plan was adopted on 20 July 2015 which is partly through the monitoring period of 2015/16 this is the seventh AMR that fully reports on these indicators. Some data is unavailable therefore not all indicators can be reported.
- 1.5 The Cherwell Local Plan 2011-2031 Part 1 Partial Review – Oxford's Unmet Housing Need was adopted by Cherwell District Council on 7 September 2020. The Plan provides the strategic planning framework and sets out strategic site allocations including a housing trajectory to provide Cherwell District's share of the unmet housing needs of Oxford to 2031.
- 1.6 This is the third AMR to monitor against the indicators and targets from the adopted Local Plan 2011-2031 (Part 1) Partial Review – Oxford's Unmet Housing Need. However, as the Plan's adoption on 7 September 2020 was partly through the monitoring period of 2020/21, this is the second AMR to report on these indicators.

## Purpose of the Annual Monitoring Report

- 1.7 The purpose of the AMR is to:
- Monitor the preparation of Cherwell's Local Plan against timetables in the Local Development Scheme (LDS);
  - Assess the extent to which policies are being achieved; and
  - Review key actions taken under the duty to co-operate.

## Legislative Background

- 1.8 The Council has a statutory obligation to produce an authority monitoring report which monitors the implementation of the Local Development Scheme and the extent to which the policies in Local Plans are being achieved. Subject to these requirements, it is a matter for individual Councils to decide the content on their monitoring reports.

## Structure of the Cherwell Annual Monitoring Report

- **Section 2** reports on the delivery of Cherwell District's Local Plan and other supporting documents, providing a review of progress against the targets and milestones set out in the Local Development Scheme.
  - **Section 3** looks at the progress made on neighbourhood planning within the district.
  - **Section 4** sets out detailed monitoring results using specific indicators from the adopted Local Plan 2011-2031 Part 1.
  - **Section 5** sets out detailed monitoring results using specific indicators from the adopted Local Plan 2011-2031 (Part 1) Partial Review – Oxford's Unmet Housing Need.
  - **Section 6** looks at progress on infrastructure delivery.
- 1.9 For further information relating to the AMR, please contact the Council's Planning Policy and Conservation team:

Tel: 01295 221779

Email [planning.policy@cherwell-dc.gov.uk](mailto:planning.policy@cherwell-dc.gov.uk)

## 2 Cherwell Planning Policy Documents

- 2.1 The existing statutory Development Plan comprises:
- Cherwell Local Plan 2011-2031 Part 1 (July 2015 incorporating Policy Bicester 13 re-adopted December 2016);
  - Cherwell Local Plan 2011-2031 (Part 1) Partial Review – Oxford’s Unmet Housing Need;
  - The saved policies of the adopted Cherwell Local Plan 1996; and
  - The made (adopted) Neighbourhood Plans for:
    - Adderbury;
    - Bloxham;
    - Hook Norton;
    - Mid Cherwell; and
    - Weston-on-the-Green
- 2.2 The Development Plan also includes the saved policies of the Oxfordshire Minerals and Waste Local Plan 1996, the production of which is a Oxfordshire County Council function. A new Minerals and Waste Core Strategy Part 1 was adopted on 12 September 2017. Progress on the Minerals and Waste Local Plan Part 2 – Site Allocations is reported by Oxfordshire County Council.

### Local Development Scheme Progress

- 2.3 The Local Development Scheme (LDS) is a rolling business plan for the preparation of key planning policy documents relevant to future planning decisions. An updated LDS was published in September 2023, reflecting revisions to the timetable of the Cherwell Local Plan Review. However, this annual monitoring report covers the period from 1 April 2022 to 31 March 2023 which predates the publication of this revised LDS, and therefore the LDS that this AMR reports on is the version that was published in September 2021, and was revised in December 2022 to reflect the cessation of the Oxfordshire Plan 2050. It provides for:
- **Cherwell Local Plan Review** – a review of the adopted Cherwell Local Plan 2011-2031 to ensure key planning policies are kept up to date for the future, to assist implementation of the Oxfordshire Plan 2050 and to update the 2015 Cherwell Local Plan 2011-2031 (Part 1) and replace the remaining saved policies of the 1996 Local Plan.
  - **Community Infrastructure Levy Charging Schedule** which would (if implemented) raise funds to deliver off-site infrastructure that will support the development proposed within Cherwell and alter the Council’s approach to only asking for ‘Section 106’ developer contributions.
  - **Oxfordshire Plan 2050** – a countywide strategic plan to be prepared jointly on behalf of the five district local planning authorities, with the support of the County Council through the Oxfordshire Growth Board.

### **Cherwell Local Plan Review**

- 2.4 Progress on the preparation of the Cherwell Local Plan Review continued in the 2022/23 monitoring year. At the start of the monitoring year, it was envisaged that the Local Plan would assist in the implementation of the Oxfordshire Plan and align with the overarching vision and framework set by that plan.
- 2.5 Following the formal decision to cease work on an Oxfordshire wide plan, the Council has revisited elements of the evidence base. The preparation of these documents, which are crucial to the preparation of a “sound” plan which will pass examination, inevitably delayed the programme.
- 2.6 Since 1 April 2023, a regulation 18 consultation on the draft Cherwell Local Plan Review has taken place. This occurred between 22 September and 3 November 2023.

### **Community Infrastructure Levy (CIL) Charging Schedule**

- 2.7 The Council previously consulted upon a Preliminary Draft (Feb – March 2016) and a Draft CIL Charging Schedule (Nov 2016 – Jan 2017). Work on a potential CIL was put on hold while a national policy review was undertaken and in anticipation of further Government guidance which has since been published.
- 2.8 In the 2022/23 monitoring year, preliminary work was carried out with a view to bringing forward a Community Infrastructure Levy charging schedule. It is anticipated that a new Draft CIL Charging Schedule will be consulted on during the 2023/24 monitoring year.
- 2.9 On 17 March 2023, the government published a consultation on potential reforms to the system of developer contributions in England. The Council will continue to monitor the progress of these proposed reforms and take stock of the government’s proposals when more information becomes available.

### **Oxfordshire Plan 2050**

- 2.10 Work on the joint plan for Oxfordshire ceased in August 2022, following a failure to reach agreement on the approach to planning for future housing needs within the framework of the Oxfordshire Plan. The framework for long-term and growth is through local plans including the Cherwell Local Plan Review 2040. A revised Local Development Scheme was prepared in December 2022 and was subsequently updated in September 2023, reflecting the cessation of the Oxfordshire Plan 2050 and consequential delays to the programme for the Cherwell Local Plan Review 2040.

### **Supplementary Planning Documents**

- 2.11 No work on Supplementary Planning Documents (SPDs) was undertaken during the 2022/23 monitoring year.

**Duty to Co-operate**

- 2.12 Local Councils are expected to consider strategic issues relevant to their areas through a statutory 'Duty to Co-operate' established by the Localism Act (2011) and described in the National Planning Policy Framework (NPPF).
- 2.13 During the monitoring period 2022/23 the Council:
- Continued to work with the Oxfordshire authorities as part of the Future Oxfordshire Partnership to implement the Oxfordshire Housing and Growth Deal 2018.
  - Supported the preparation of the Oxfordshire Plan 2050 which included attendance at regular officer liaison meetings and evidence base steering groups.
  - Following the cessation of the Oxfordshire Plan, jointly commissioning a Housing and Employment Needs Assessment (HENA) with Oxford City Council.
  - Continued to meet its statutory obligations under the Duty to Cooperate as set out in the formal Duty Cooperate Statement accompanying the Consultation Draft Cherwell Local Plan Review 2040.

### 3 Neighbourhood Planning

- 3.1 Neighbourhood Development Plans (“Neighbourhood Plans”) were introduced in 2011 as a way for communities to decide the future of the places where they live and work. They are intended as a tool for communities to come together and say where they think new houses, businesses and shops should go, and what they should look like.
- 3.2 A Neighbourhood Development Plan that has been adopted as a part of the development plan for a local authority’s area is known as a “made” Neighbourhood Plan. As indicated in paragraph 2.1 above, there are currently five “made” Neighbourhood Plans in Cherwell District:

**Table 1 "Made" Neighbourhood Development Plans in Cherwell District**

Neighbourhood Plan Area	Designated Date	Date plan “made”	Monitoring Year
Adderbury	3 June 2013	16 June 2018	2018/19
Bloxham	3 June 2013	19 December 2016	2016/17
Hook Norton	3 June 2013	19 October 2015	2015/16
Mid Cherwell	7 April 2015	14 May 2019	2019/20
Weston-on-the-Green	2 November 2015	19 May 2021	2021/22

- 3.3 In addition to the made neighbourhood plans listed at Table 1 above, eight Parish Councils have had their administrative areas designated as Neighbourhood Areas. During the monitoring period from 1 April 2022 to 31 March 2023, two new neighbourhood areas have been designated: Hampton Gay & Poyle and Bletchingdon was designated in October 2022 and Milcombe in January 2023. No further neighbourhood areas have been designated since 1 April 2023.

**Table 2 Designated Neighbourhood Area in Cherwell District**

Neighbourhood Plan Area	Designated Date	Monitoring Year
Bodicote	04 January 2016	2015/16
Deddington	02 December 2013	2013/14
Hampton Gay & Poyle, and Bletchingdon	25 October 2022	2022/23
Islip	17 February 2022	2021/22
Merton	02 December 2013	2013/14
Milcombe	03 January 2023	2022/23
Stratton Audley	03 June 2013	2013/14
Shipton on Cherwell & Thrupp	11 February 2019	2018/19

Deddington Neighbourhood Plan

- 3.4 Deddington Parish Council is progressing the preparation of its new neighbourhood plan. A pre-submission (regulation 14) plan was published in late 2022 and was consulted on between 22 November 2022 and 11 January 2023. A further Regulation 14 consultation was held between late March 2023 and 6 May 2023 on the draft Neighbourhood Plan's Strategic Environment Assessment.
- 3.5 Following the end of the AMR monitoring period, the draft Deddington Neighbourhood Plan was submitted to Cherwell District Council in May 2023, and a consultation on the submission Neighbourhood Plan (Regulation 16) was held between 9 June 2023 and 21 July 2023. The Deddington Neighbourhood Plan proceeded to examination in August 2023. At the time of writing this AMR, (October 2023) the Neighbourhood Plan examination is ongoing.

Mid-Cherwell Neighbourhood Plan

- 3.6 The Mid-Cherwell Neighbourhood Plan covering the parishes of Duns Tew, North Aston, Somerton, Fritwell, Ardley with Fewcott, Upper Heyford, Middle Aston, Steeple Aston, Lower Heyford, Middleton Stoney, Kirtlington and Heyford Park) is currently under the early stages of a review.

## 4 Monitoring Results – Cherwell Local Plan 2011-2031 Part 1

- 4.1 For each policy in the Cherwell Local Plan 2011-2031 (Part 1), there is an indicator and a target used to measure the policy's effectiveness. This section sets out the detailed monitoring results using indicators from the adopted Local Plan 2011-2031 (Part 1). The Monitoring Framework is included at Appendix 5.

### Theme One: Developing a Sustainable Local Economy

- 4.2 Cherwell Local Plan 2011-2031 (Part 1) Policy SLE 1 seeks to protect existing employment land and buildings for employment (B class) uses. The Policy supports the delivery of employment development on allocated sites. Since the adoption of the Local Plan, there have been changes to the use classes order. As of 1 September 2020 'Class E' has replaced those uses in Classes A1, A2 and A3, B1 (Office) and D1a-b (Classes B2 and B8 remain valid). As applications are determined using the use class in effect at the point the application was submitted, there is now an increasing number of Class E applications. This has an impact on the effectiveness and accuracy of the monitoring for office accommodation (new floorspace and floorspace lost).
- 4.3 The strategic employment allocations (including mixed-use sites for housing and employment) in the 2015 Local Plan, as well as development on non-allocated sites, are monitored. Employment (non-commercial) monitoring for 2022/23 was only carried out on sites where more than 200 sqm of employment floor space is proposed.

**Table 3 Employment completions on allocated land during 2022/23 (sqm)**

Location	B1	B2	B8	Mixed B Use	E	Total

Employment Completions

4.4 Table 7 shows the total employment floorspace completed during 2022/23 (net). The 'net' figures reflect the overall completion totals considering any losses which include redevelopments and changes of use away from commercial use.

4.5 Tables 3 – 7 include commitments and completions which have been made within Class E. This may include non-traditional employment uses (such as retail and leisure) and are included for indicative purposes.

**Table 7 Employment completions during 2022/23 (sqm)**

Employment Commitments

4.6 Table 8 shows the total employment commitments at 31/03/2023. Employment commitments include sites which have been granted planning permission in the past and remain extant, this includes development on allocated and non-allocated sites.

- 4.7 As of 31 March 2023, there was outstanding employment floorspace to be implemented equating to 451,283.16 sqm. Development at Bicester contributed to most of the total commitment for employment floorspace (81%), followed by the Rural Areas (15%), Banbury (4%), and Kidlington (less than 0.1%).

**Table 8 Employment commitments at 31 March 2023 (sqm)**

Location	B1	B2	B8	Mixed B Use	E	Total
Banbury	-410	823	2,079	16,340	0	18,832
Bicester	249,358.46	20,784	83,699	1,194	321	355,356.46
Kidlington	0	362	0	0	0	362
Rural Areas	22,634.50	9,427	8,616.50	1,022	35,032.70	76,732.70
<b>Cherwell Total</b>	<b>271,582.96</b>	<b>31,396</b>	<b>94,394.50</b>	<b>18,556</b>	<b>35,353.70</b>	<b>451,283.16</b>

- 4.8 **Banbury** – 2 of the commercial buildings at Banbury 15 adjacent to the M40 were delivered and DPD moved into one early 2023. The other unit is being built now and will be completed in next year's allocation. There are two losses of employment space in High Street and Ruscote Avenue, totalling 410 sqm.
- 4.9 **Bicester** – Bicester Heritage delivered 3 employment commitments this year with the delivery of an hotel/conference facility and 2 other buildings. The delivery of the next phase of Symmetry Park has been completed and Syncreon Technology UK Ltd occupied this building.
- 4.10 **Kidlington and Rural Areas** – There were more deliveries at Oxford Technology Park. These premises were mainly built and occupied immediately, showing there is a constant requirement for this type of employment premises. There was one loss of employment space in Cropredy from Office to residential of 387.3 sqm. A wide range of employment completions have occurred in the year 22/23 applications with 6 of these being conversions from agricultural/horticulture to B2, B8 or E planning categories.

**Table 9 Land on Local Plan Employment Allocations without planning permission on 31 March 2023 (ha)**

Location	Remaining Allocated Area (ha)
Banbury	5.87
Bicester	26.40
Rural Areas	0
<b>Total</b>	<b>32.27</b>

- 4.11 Table 9 shows the total remaining allocated land available in the district (32.27ha) excluding land with planning permission (on Local Plan allocations). However, sites

‘committed’ for development (i.e. with planning permission) are still ‘available’ since it is possible that the permission may expire unimplemented or may be superseded by another planning permission.

- 4.12 The employment trajectory in the Local Plan 2011-2031 shows how strategic sites will be delivered and the Council continues to work with promoters and others to bring forward strategic sites. Table 10 provides details of the status of each of the strategic sites in the Local Plan employment trajectory. The Council is exploring the potential and suitability of sites for employment through the next Local Plan process.

**Table 10 Status of Local Plan Employment Allocations**

Location	Comments
<b>Banbury</b>	<p><u>Banbury 6: Employment Land West of the M40</u></p> <ul style="list-style-type: none"> <li>- This strategic site provides for 35 ha of mixed employment generating development.</li> <li>- 29.1 ha of development (units 1-5, 6, 7, 8 and 9) has been completed under various planning permissions.</li> <li>- Planning permission was granted for the construction of two new logistics warehouses (units 9 and 10) (20/00608/F) in August 2020. Land within CDC amounts to 4.4 ha. Development has been completed.</li> <li>- There is no planning permission in place for the remaining area of 5.87 ha.</li> </ul> <p><u>Banbury 15: Employment Land Northeast of Junction 11</u></p> <ul style="list-style-type: none"> <li>- This strategic site comprises 13 ha of land for mixed employment generating development.</li> <li>- Planning permission was granted in July 2020 for commercial development (19/00128/HYBRID) divided by part A and B. Part A, which has an area of 3.31 ha is completed. Development on Part B has not yet started.</li> </ul>
<b>Bicester</b>	<p><u>Bicester 1: Northwest Bicester</u></p> <ul style="list-style-type: none"> <li>- A new zero-carbon mixed-use development totaling 390 ha of land. 10 ha of total land allocated is expected to provide for employment uses within the Plan period. All of the allocated land for employment development has planning permission and has been completed.</li> </ul>

Bicester 2: Graven Hill

- This predominantly brownfield site is proposed for a mixed-use development totaling 241 ha of land. 26 ha of the total land allocation is expected to provide for employment uses within the Plan period.
- Planning permission (11/01494/OUT) for all 26 ha of employment provision was granted in August 2014 and this was subsequently amended by a section 73 application (19/00937/OUT), approved in January 2020.
- The Primary school which was 3.3365ha has been built. The row of local centre units has been built with some occupied. The area allocated to a pub/restaurant community centre and fulfilment centre have not been completed to date. No significant employment development has started on site in the D site which is South-East of the site behind Graven Hill hill/woods.

Bicester 4: Bicester Business Park

- 29.5 ha of land to the southwest of Bicester proposed for employment-generating development.
- Part of the site was granted outline planning permission in 2010 for the construction of a B1 business park and a hotel (07/01106/OUT) but this has lapsed and was superseded by 17/02534/OUT which has now also lapsed, and a new application 23/01080/OUT was submitted in April 2023 but has not been determined yet.
- There is no planning permission in place for the remaining area of 5.387.80 ha

Bicester 10: Bicester Gateway

- A strategic development site totaling 18 ha of land for the provision of business uses.
- The allocation has been brought forward in parts.
- The land to the west of Wendlebury Road comprises two parcels of land. Phase 1a which is related to a hotel is completed. The southern parcel (phase 1b) has a reserved matters permission for B1 employment development. A planning outline 20/00293/OUT was granted in April 2021 but this site has not been commenced.
- Phase 2 comprising the remainder of the Bicester 10 allocation, located to the east of Wendlebury Road was granted planning permission for B1 development and a health and racquets club on 15.8 ha of land in September 2020 (19/01740/HYBRID).

Location	Comments
	<ul style="list-style-type: none"> <li>- Reserved matters consent for phase 1 of the employment development, comprising 4no. units within two separate buildings, was granted in December 2020</li> <li>- 22/01632/REM covers 9 units 11,309 sqm of employment land approved on 13 October 2022.</li> <li>- 22018945/REM was granted 12<sup>th</sup> October 2022 consent for a further 4 units with 10,195sqm was passed.</li> <li>- All 18 ha of the land allocated for employment development has planning permission.</li> </ul> <p><u>Bicester 11: Employment Land at North-East Bicester</u></p> <ul style="list-style-type: none"> <li>- A strategic employment development site of 15 ha.</li> <li>- Outline planning permission (15/01012/OUT) was granted in May 2016 and various reserved matters have been approved pursuant to this outline consent.</li> <li>- Development of the northern part of the allocation – 10.5 ha of land – is complete.</li> <li>- There is no planning permission in place for the remaining 4.5 ha of the allocation. A new planning application has been submitted on this site since 1<sup>st</sup> April 2023 and is still to be approved. (21/02286F)</li> </ul> <p><u>Bicester 12: Southeast Bicester</u></p> <ul style="list-style-type: none"> <li>- A mixed-use site for employment and residential development totaling 155 ha of land. 40 ha of total land allocated expected to provide for employment uses within the Plan period. However, it is unlikely that this will be implemented in full as the consented schemes have a lower employment floorspace.</li> <li>- Units A1, A2 and B (16/00861/HYBRID and 18/00091/F) to the south-east of the allocation adjacent to the A41 are complete and cover 11.01 ha of land. A further 5.47 ha of land has planning permission for the development of Unit C (19/00388/F). This has been completed.</li> <li>- 7 ha employment provision (60% B1 40% B8) (16/01268/OUT) was approved on 20<sup>th</sup> May 2022 to the north of Units A1, A2, B and C. The remaining Local Plan employment land allocation without planning permission is 16.52 ha. The land will be reviewed as part of the preparation of the Draft Local Plan.</li> </ul>

Location	Comments
<b>Rural Areas</b>	<p><u>Former RAF Upper Heyford</u></p> <ul style="list-style-type: none"> <li>- Mixed use land allocation of 520 ha in the Local Plan (Policy Villages 5). Approximately 120,000 sqm of the land area is for employment provision.</li> <li>- Outline planning permission (10/01642/OUT) was granted in 2011 for the proposed new settlement 'Heyford Park' comprising residential and employment uses, and a school. The application site measures approximately 76.3 ha in total.</li> <li>- A Hybrid application (18/00825/HYBRID) for 1,175 dwellings, retail uses, a medical centre, employment uses, a new school, a community building, areas for indoor and outdoor sports, and additional education facilities was approved subject to legal agreement on 5 November 2020. The application was subsequently approved on 09 September 2022 yielding 8.3ha of employment floorspace with up to 35,175 sqm of new build employment in the proposed Creative City area.</li> </ul>
<b>Kidlington</b>	<ul style="list-style-type: none"> <li>- 14/02067/OUT was approved 10<sup>th</sup> October 2016 for a new build Technology Park South of Oxford Airport comprising 40,362 sqm of research and development laboratory storage and ancillary space. To date they are all being brought forward by a phasing application 17/00559/F for 14 units within 10 buildings.</li> </ul>

Table 11 Employment Permissions at 31 March 2023 (ha)

Extant permissions on allocations		Extant Permissions on Non-Allocations		Total Extant Permissions	
Location	Site Area (ha)	Location	Site Area (ha)	Location	Site Area (ha)
Banbury	14.12	Banbury	2.44	Banbury	16.56
Bicester	48.41	Bicester	3.03	Bicester	51.44
Kidlington	6.14	Kidlington	0.04	Kidlington	6.18
Rural Areas	77.8	Rural Areas	37.89	Rural Areas	115.69
<b>Total</b>	<b>146.47</b>	<b>Total</b>	<b>43.36</b>	<b>Total</b>	<b>189.83</b>

4.13 Table 11 shows the amount of land with planning permissions at 31 March 2023<sup>1</sup>. A total of 189.83 ha has been permitted with 77% being at strategic allocations. In terms of the planning permissions in Table 11, only new build employment development is shown, not changes of use between employment uses since this would result in no overall gain in employment land.

<sup>1</sup> In the 2021-22 Annual Monitoring Report, the calculations presented in table 11 were presented using a gross value for site areas. For this Annual Monitoring Report, the methodology has reverted to the net areas of extant employment permissions, in line with the approach taken in the 2021-22 Annual Monitoring Report.

**Table 12 Total Employment Land Available on Allocations (adopted Local Plan 2011-2031 and Non-Statutory Local Plan 2011) at 31 March 2023 (ha)**

Location	Total Area (ha)
Banbury	19.99
Bicester	74.81
Kidlington	6.14
Rural Areas	77.8
<b>Total</b>	<b>178.7</b>

- 4.14 Table 12 shows the total employment land available on Local Plan allocations is 178.7 ha (this includes the remaining undeveloped land within allocated sites, a proportion of which will have planning permission). Planning permissions are in place on 146.47 ha of this allocated land. A large proportion of this is located at Bicester where there are six strategic allocations for employment and mixed-use development, and in the Rural Areas where there is a substantial allocation for employment provision at the Former RAF Heyford development.

**Table 13 Loss of employment land to non-employment use (includes completions on allocations and non-allocations) during 2022/23**

Location	Land Area (ha)
Banbury	0.17
Bicester	0.02
Kidlington	0.04
Rural Areas	0.09
<b>Cherwell Total</b>	<b>0.32</b>

- 4.15 During 2022/23, 0.32 ha of employment land was lost to other uses. This is an increase from 2021/22 where total losses equated to 0.22ha.

### Town Centres

- 4.16 Policy SLE 2 Securing Dynamic Town Centres sets out the policy relating to retail development and confirms that main town centre uses in out-of-centre locations will only be supported if no central or edge-of-centre sites are suitable or available, with preference given to accessible sites, well connected to the centre. The target is for no net loss of town centre use floorspace within town centres. Policy SLE 2 also sets out local thresholds for the retail impact test. The Monitoring Framework indicator and target requires a Retail Impact Assessment to be submitted with 100% of applications over the thresholds set out in Policy SLE 2.

- 4.17 During 2022/23, no planning applications submitted to the Council exceeded the thresholds set out in Policy SLE 2, and therefore no retail assessments were submitted to the Council.

### Tourism

- 4.18 The amount of completed tourism developments (including D use class uses and Sui Generis) is an indicator used to measure the effectiveness of Policy SLE 3 Supporting Tourism Growth. The target is for an annual increase in completed tourism developments over the plan period.
- 4.19 In September 2020, the Use Classes Order was reformed to introduce new use classes E and F, which replaced most of the former A, B1, and D use classes. For the purposes of this annual monitoring report, applicable uses permitted and completed under the new E and F use classes will be recorded against the Former D1 use class.
- 4.20 During 2022/23, 1,020 sqm of D use class uses (or equivalent class E / F1 developments) and Sui Generis were completed, made up of the completion of a multi-use hall and associated facilities. There was a loss of 237 sqm of sui generis uses due to the conversion of D uses to a class E use, and a small net loss at an existing site in sui generis uses due to renovation works.

**Table 14 Completed tourism developments during 2022/23**

Use Class	Net floorspace completions (sqm) 2022/23
Former D1 (now E(d) and F1)	1,020
Former D2 (now Sui Generis)	0
Sui Generis	-237
<b>Total</b>	<b>783</b>

- 4.21 The effectiveness of Policy SLE 3 is also measured by the number of visitors to tourist attractions in the district with the target being an annual increase over the plan period. There is no comparable data for this indicator.

### Transport

- 4.22 Policy SLE 4 Improved Transport and Connections states that the Council will support key transport proposals. In respect of transport, Policy SLE 4 requires new development to provide financial and/or in-kind contributions to mitigate the transport impacts of development. This will support delivery of the infrastructure and services needed to facilitate travel by sustainable modes, whilst also enabling improvements to be made to the local and strategic road and rail networks.

- 4.23 Progress of transport schemes is recorded in the IDP Update. Section 6 of this AMR monitors the implementation of Policy INF 1 and contains a summary of completed and new transport infrastructure projects.
- 4.24 Policy SLE5 of the Local Plan sets out the Council's relevant policy in relation to the London to Birmingham high speed railway link and states that "Cherwell District Council will work with High Speed 2 Ltd, with the aim of influencing the design and construction of the route through Oxfordshire". A breakdown of progress on the scheme to date is summarised below.
- 4.25 As per the 2022 AMR:
- Phase One was issued with "Notice to Proceed" by the Department for Transport on 15 April 2020 and contracts for the detailed design and construction work have now been signed.
  - HS2 made two applications to Oxfordshire County Council under Schedule 17 of the HS2 Act for the use of lorry routes to compounds in Oxfordshire. Both routes (M40 Junction 9 via the A41 and A4421) have been approved and are "live".
- 4.26 Since the publication of the 2022 AMR:
- A Schedule 17 Construction Lorry Route to the A4421 Site Compounds just north of Newton Purcell has been approved. This will be from the north via the M40 J10, the A43, and A421 to ease traffic volumes from the south via the A4421.
  - An application was made for a Schedule 17 approval for the building works and other construction works (earthworks, fencing, lighting, accesses etc.) required for the construction of the HS2 line at Mixbury, taking in the disused railway northeast of The Oaks Farm, Finmere and including Westbury Viaduct, Westbury Embankment, Mixbury Cutting, Mixbury Embankment, Featherbed Lane Overbridge, and associated earthworks, drainage ditches and other mitigation measures.
  - An application was made for a Schedule 17 approval for fencing and maintenance gate as part of the ancient woodland translocation at the Hollow Barn Mossycorner receptor site at land 600m west of Fulwell Road, Brackley.
  - An application was made for a Schedule 16 approval for the restoration of land at Warren Farm in Finmere following works to the Tower Line.

## Theme Two: Building Sustainable Communities

Five-year housing land supply

- 4.27 A land supply update has been produced with a base date of 31 March 2023 for permissions and completions, and informed by developer expectations as of November 2023. The land supply update forms part of this AMR and is included at Appendix 1. Using the latest Standard Method calculation there is a need to provide 710 dwellings per annum to meet Cherwell's needs.
- 4.28 The district can demonstrate a 5-year housing land supply of 5.5 years for Cherwell's requirements. It cannot yet demonstrate a five-year supply for the district's contribution to Oxford's unmet needs requirement, but the sites identified in the Cherwell Local Plan 2011-2031 (Part 1) Partial Review are progressing through the planning system.

Housing Completions

- 4.29 Table 15 shows the annual housing completions in Cherwell since 2011. The total number of housing completions (net) between 2011 and 2023 is 12,312 dwellings. During 2022/23, 1,318 (net) housing completions were recorded, an increase of 143 from the 2021/22 monitoring year.
- 4.30 Since 2015 in six out of seven years housing completions in the district have remained higher than the annualised planned requirement of 1,142 per annum. Completions from 2015 to 2023 total 10,247, or an average of 1,281 per annum.

**Table 15 Housing completions from 1 April 2011 to 31 March 2023**

- 4.31 In 2022/23, 34% of completions were at Bicester, 36% at Banbury and 30% elsewhere. 32% of the 1,318 homes delivered during the monitoring year were on previously developed land. Of the 12,312 homes built since 2011, 37% have been at Banbury, 30% at Bicester and 33% elsewhere in the district.
- 4.32 There were 10 self-build dwellings completed at Graven Hill during 2022/23.
- 4.33 Table 16 shows the progress being made on strategic sites (100 or more dwellings) that were under construction at 31 March 2023.

Table 16 Progress of Strategic Sites

Site	No. of developers (May 2022)	Completions								
		2022/23	2021/22	2020/21	2019/20	2018/19	2017/18	2016/17	2015/16	2014/15

Kingsmere, South West Bicester Phase 1	1 (two sales outlets)	100	128	95	110	205	196	231	210	179
Kingsmere, South West Bicester Phase 2	4	251	147	155	12	0	0	0	0	0
North West Bicester Eco-Town Exemplar Project, Bicester (Local Plan Site Bicester 1) (now complete)	2	0	32	46	41	29	65	0	90	0
Former RAF Upper Heyford (Local Plan Site Villages 5)	2	250	19	76	58	97	103	106	166	46

- 4.34 Table 17 shows the housing completions recorded since 2011 for strategic sites (100 or more), non-strategic sites (10-99) and windfall development (<10 homes). Table 18 shows this data for permissions (note this includes all permissions not all will be considered “deliverable” supply for the purposes of calculating the five-year land supply).

**Table 17 Breakdown of Housing Completions (net) from 1 April 2011 – 31 March 2023**

	Banbury	Bicester	Elsewhere	District
<b>Strategic Sites</b>	3,510	2,960	802	7,272
<b>Non-Strategic Sites</b>	590	461	2,355	3,406
<b>Windfalls (&lt;10)</b>	504	255	875	1,634
<b>Totals</b>	<b>4,604</b>	<b>3,676</b>	<b>4,032</b>	<b>12,312</b>

**Table 18 Breakdown of sites with extant permission (net) 2011 – 2023**

	Banbury	Bicester	Elsewhere	District
<b>Strategic Sites</b>	1,508	3,851	1,376	6,735
<b>Non-Strategic Sites</b>	300	228	429	957
<b>Windfalls (&lt;10)</b>	62	45	202	309
<b>Totals</b>	<b>1,870</b>	<b>4,124</b>	<b>2,007</b>	<b>8,001</b>

### Housing Density

- 4.35 The indicator looks at net housing density of completions. However, due to the way in which data is recorded in planning applications, only the gross site area is available. As such, the housing density is reported lower than has actually been achieved.

**Table 19 Gross housing density of large, completed sites during 2022/23 (10 or more dwellings)**

	2022/23
<b>Total Site area (gross)</b>	<b>68.44</b>
<b>No. of dwellings on large sites</b>	<b>1,930</b>
<b>Gross housing Density</b>	<b>28.20</b>

- 4.36 The housing density of large, completed sites (10 or more dwellings) during 2022/23 is 28.20 dwellings per hectare (dph) which is a decrease from the previous year (38.96). Of the 43 large, completed sites in 2022/23, five have a gross site area in excess of 5 ha, collectively accounting for 45.64 ha of the total site area and 1,309 of the dwellings in the reported figures. The net developable area has been calculated

for these sites, where the respective developers have made sufficient information available to do so.

### Affordable Housing

**Table 20 Net Affordable Housing Completions**

Year	Affordable housing completions (net)
2011/12	204
2012/13	113
2013/14	140
2014/15	191
2015/16	322
2016/17	278
2017/18	426
2018/19	510
2019/20	400
2020/21	295
2021/22	178
2022/23	181
<b>Totals</b>	<b>3,238</b>

4.37 There were 181 net affordable housing completions during 2022/23 which is broadly in line with the previous year (178). This is below the Council's target of 190 affordable housing completions pa.

4.38 From the 181 affordable housing completions there were 117 affordable rented tenure and 64 shared ownership.

### Housing Mix

4.39 Policy BSC4 Housing Mix reports completions by number of bedrooms. This data is not readily available due to the way in which it is not consistently recorded on planning applications. Therefore, no reporting is available for this indicator.

### Area Renewal

4.40 Policy BSC 5 states that the Council will support area renewal proposals that direct investment to improve the physical and community fabric of the district to improve social outcomes, improve health and well-being, educational attainment, and employment outcomes. Monitoring indicator targets are for improvements in levels of deprivation in the district and positive trends across all the Brighter Futures in Banbury programme indicators.

- 4.41 Brighter Futures in Banbury is a strong long term partnership programme delivering new opportunities, innovative projects and high-quality focussed services in Ruscote, Neithrop and Grimsbury and Castle Wards.
- 4.42 The Brighter Futures in Banbury Programme Annual Report is available to view on the Council's website  
<https://www.cherwell.gov.uk/info/118/communities/483/brighter-futures-in-banbury/2>.

### Travelling Communities

- 4.43 The Government's overarching aim is to ensure fair and equal treatment for travellers, in a way that facilitates the traditional and nomadic way of life of travellers whilst respecting the interests of the settled community.
- 4.44 Policy BSC 6: Travelling Communities of the adopted Cherwell Local Plan 2011-2031 (Part 1) provides a sequential and criteria-based approach for considering opportunities and planning applications. The Policy sets a requirement of 19 (net) additional pitches to meet the needs of Gypsies and Travellers from 2012 to 2031. It also requires 24 (net) additional plots for Travelling Showpeople from 2012 to 2031.
- 4.45 Since the adoption of the Local Plan Part 1, a Gypsy, Traveller and Travelling Showpeople Accommodation Assessment (GTAA) for Cherwell, Oxford, South Oxfordshire and Vale of White Horse Councils was published in June 2017. It identifies a new objectively assessment of need for each authority based on the definitions of Gypsies and Travellers and Travelling Showpeople for planning purposes (Annex 1 of the Government's Planning Policy for Traveller Sites (PPTS), 2015). The 2017 GTAA has informed the examination and adoption of Local Plans covered by the study's area, and is the most up to date assessment of need available.

**Table 21 Existing Supply of Gypsy and Traveller Pitches at 31 March 2023**

Site	Supply at 31 March 2017	Net Loss / Gain						Net Running Totals
		17/18	18/19	19/20	20/21	21/22	22/23	
Bicester Trailer Park, Chesterton	8	0	0	0	0	0	0	8
Corner Meadow, Farnborough Road, Mollington	15	0	0	0	0	0	6*	21
Horwood Site, Ardley Road, Ardley	1	0	0	0	0	0	0	1
Land adjoining A34 by Hampton Gay and Poyle	8	3	0	0	0	0	0	11

Site	Supply at 31 March 2017	Net Loss / Gain						Net Running Totals
		17/18	18/19	19/20	20/21	21/22	22/23	
Land North East of HM Bullington Prison, Widnell Lane, Piddington	0	0	0	6	0	0	0	6
Land South West of Woodstock Road, Yarnton	3	0	0	0	0	0	0	3
Land West of M40, Kirtlington Road, Chesterton	0	0	0	3	0	0	0	3
Lower Heyford Road, Caulcott	5	0	0	0	0	0	0	5
Station Caravan Park, Banbury	10	-10	0	0	0	0	0	0
Summer Place, Blackthorn Road, Launton	2	2	0	4	0	0	0	8
The Stable Block, Farnborough Road, Mollington	5	0	0	0	0	0	0	5
<b>Totals</b>	<b>57</b>	<b>-5</b>	<b>0</b>	<b>13</b>	<b>0</b>	<b>0</b>	<b>6</b>	<b>71</b>

\* Retrospective planning permission was granted for nine additional pitches at this site, but whether there were 12 or 15 extant pitches on site at 31 March 2017 is disputed. As the planning permission allows a total of 21 pitches on the site, the net gain is reported as six additional pitches for consistency with previously recorded / reported data.

- 4.46 At 31 March 2023, the total supply of Gypsy and Traveller pitches was 71 therefore there has been a net gain of 14 pitches since 1 April 2017.
- 4.47 The assessment identifies a need for 7 additional pitches for households for Cherwell by 2032 where it is known that they meet the planning definition. It also highlights that there are many households where it is 'unknown' whether the new planning definition of Gypsies and Travellers is met. Should further information arise, it states that the overall need could increase by up to 12 pitches. Additionally, a potential need for 8 pitches is highlighted due to the closure of the Smiths Caravan Park.
- 4.48 The Assessment advises that for 'unknown' travellers 'it would not be appropriate when producing a robust assessment of need to make any firm assumptions about whether or not they meet the planning definition...' based on interviews that have taken place (paragraph 7.28 of the assessment).

4.49 Table 22 shows the remaining 2017 GTAA requirement for Gypsy and Traveller sites.

**Table 22 Planned requirements for Gypsy and Traveller Pitches (source: Gypsy & Traveller Accommodation Assessment, 2017)**

2017 GTAA Requirements	
No. of additional pitches required 2017-2032	15 (7+8)
Completions (2017-2020)	14
Remaining Requirement 2019-2032	1 pitch (15-14)

- 4.50 As of 31 March 2023 there was one planning application pending determination, and one scheme which has appealed against refusal of permission. As of the time of writing in October 2023, both cases remain undetermined. If permission is granted for both pending applications, then five additional pitches may come forward.
- 4.51 Table 23 provides the five-year supply calculation based on the 2017 GTAA requirements. It does not include an allowance for 'unknown' need but which includes the potential need for 8 pitches arising from the Smiths Caravan Park site (a site that was previously included in the district's supply).
- 4.52 Taking into account the pitches delivered during the period 1 April 2022 to 31 March 2023, there is a surplus of 8 pitches from recent completions, leading to a base requirement of -3 over the next five years, which is treated as 0 for the purposes of calculating the five-year supply needs for the period 2023-28. Therefore there is no need for additional pitches to be delivered over the next five years. Nonetheless, needs may arise due to unforeseen circumstances such as a need for intensification of existing sites to accommodate growing families.

**Table 23 Calculation of 5 Year Land Supply for Gypsy and Traveller Pitches (Using methodology from GTAA, June 2017)**

		<b>Five Year Period 2023 - 28 (from 1 April 2023)</b>
<b>a</b>	Objective Assessment of Need (2017 - 2032) (meeting the Planning Definition)	15 (7+8)
<b>b</b>	Annual Requirement (a/15)	1
<b>c</b>	Requirement to date (b x years)	6
<b>d</b>	Completions	14*
<b>e</b>	Surplus at 31/3/23 (c-d)	-8
<b>f</b>	Base Requirement over next 5 years (b x 5)	5
<b>g</b>	Base Requirement over next 5 years plus shortfall (f + e)	-3
<b>h</b>	Revised Annual Requirement over next 5 years (g/5)	-0.6
<b>i</b>	Deliverable Supply over next 5 Years	0
<b>j</b>	Total years supply over next 5 years (i/h)	<b>0</b>
<b>k</b>	Shortfall (g- i)	0

\* There is no projected completion for 2022/23 added to roll forward to 2023-2028

4.53 Table 24 shows the current supply position for plots for Travelling Showpeople. Table 26 shows the five-year supply calculation based on 2017 GTAA requirements and a need for 12 plots from 2017-2032. The 'unknown' need from Travelling Showpeople (not included in the calculation) is only 1 plot. There remains a five-year land supply of zero years as no new supply has yet been identified.

**Table 24 Existing Supply of Travelling Showpeople Plots at 31 March 2023**

Site	No. of Pitches in 2017	Net Loss / Gain						Net Running Totals
		17/18	18/19	19/20	20/21	21/22	22/23

### Education

4.54 The effectiveness of Policy BSC 7 Meeting Education Needs is measured by the timely provision of education infrastructure to meet development needs in accordance with strategic site delivery and as set out in the IDP.

4.55 Progress of education schemes is recorded in the IDP Update.

Health and Well Being

- 4.56 The effectiveness of Policy BSC 8 Securing Health and Well Being is measured by the timely provision of health infrastructure to meet development needs in accordance with strategic site delivery and as set out in the IDP.
- 4.57 Progress of health and wellbeing schemes is recorded in the IDP Update.

Public Services and Utilities

- 4.58 The effectiveness of Policy BSC 9 Public Services and Utilities is measured by the timely provision of public services and utilities infrastructure to meet development needs in accordance with strategic site delivery and as set out in the IDP.
- 4.59 Progress of public services and utilities infrastructure schemes is recorded in the IDP Update.

Open Space, Sport, Recreation and Community Facilities

- 4.60 Provision of open space, sport, recreation, and community facilities is managed by Cherwell Local Plan 2011-2031 (Part 1) Policies BSC 10, BSC 11 and BSC 12. Policies BSC 11 and BSC 12 set qualitative and local standards of provision for outdoor and indoor recreation. Progress of open space, sport, recreation, and community facilities schemes is recorded in the IDP Update. Section 6 of this AMR monitors the implementation of Policy INF 1 and contains a summary of open space and recreation infrastructure projects.
- 4.61 An open space audit was undertaken as part of the Cherwell Open Space, Sport and Recreation Assessment and the emerging Open Space and Play Areas Strategy and the updated Playing Pitch and Sports Facilities Strategies (2018) contain baseline information on deficiencies in recreation provision. The findings of the 2018 studies informed the Active Communities Strategy 2019-2023 approved by the Council in June 2019.
- 4.62 To date progress against policies BSC 10, BSC 11 and BSC 12 have not been reported. These indicators will not be monitored in future AMRs as the policies will be superseded by the Cherwell Local Plan Review 2040.

## Theme Three: Ensuring Sustainable Development

### Mitigating and Adapting to Climate Change

- 4.63 Several indicators have been developed to measure progress towards achieving the targets for Policy ESD 1 Mitigating and Adapting to Climate Change. There is some overlap with regards to the monitoring of Policy ESD 1 and other policies in the Plan. Indicators that are reported under Policy ESD 1 are: carbon emissions in the district per capita, permissions granted contrary to Environment Agency advice on flood risk grounds, and access to services and facilities by public transport, walking and cycling.
- 4.64 Carbon emissions per capita in the District were 10.4 tonnes in 2010. In 2021, the latest year for which data is available, estimates place the figure at approximately 7 tonnes.
- 4.65 The number of permissions granted contrary to Environment Agency advice on Flood Risk grounds is reported under Policy ESD 6.
- 4.66 The Monitoring Framework lists former National Indicator (NI) 175 'access to services and facilities by public transport, walking and cycling' as an indicator of whether the aims of Policy ESD 1 are being achieved. The NI framework was set up as a way of standardising local authority progress against set targets. However, since NI was made voluntary in 2010, the Council does not routinely collect data to report on NI 175. Without broad NI reporting mechanisms, the Council, performance against them is not reported in this AMR.

### Energy and Sustainable Construction

- 4.67 Policies ESD 2 – 4 of The Cherwell Local Plan (Part 1) 2011-2031 seek to address energy and climate considerations. Policy ESD 2 supports an 'energy hierarchy' – reducing energy use, promoting energy efficiency, and making use of renewable energy and allowable solutions. Policy ESD 3 encourages the use of sustainable design and construction measures and Policies ESD 4 and ESD 5 focus on developing the capacity to generate renewable energy within the district, setting out the policy requirements for such projects.
- 4.68 Several indicators and targets have been developed to measure the effectiveness of Policies ESD 2 – 4; these are addressed in turn below. However, monitoring progress against some of the indicators is not currently feasible. One of the indicators listed in the Monitoring Framework, linked to Policy ESD 3 is '% of new dwellings completed achieving water use below 110 litres /person/day'. All new dwellings are required to meet the mandatory national standard set out in the Building Regulations of 125 litres/person/day. Policy ESD 3 seeks a reduced level of water use in recognition of the district being in an area of water stress. The reduced limit of 10 litres/person/day is not currently monitored and requires further liaison with Development Management and water utility companies to identify how to achieve this target.

- 4.69 Another indicator listed in the Monitoring Framework, linked to Policy ESD 3 is 'completed non-residential development achieving BREEAM Very Good, BREEAM Excellent'. All non-residential development is typically required by condition to be constructed to achieve at least a BREEAM 'Very Good' rating based on the relevant BREEAM standard for that building type applicable at the time of the decision. There is however currently no requirement for developers to provide evidence that the development has achieved the required BREEAM rating.
- 4.70 The Council does not currently record the number of energy statements submitted or the number of district heating feasibility assessments submitted with planning applications. As this has not been monitored to date, it will not be reported in future AMRs. Suitable indicators will be considered through the Cherwell Local Plan Review.
- 4.71 In relation to monitoring of Policy ESD 4, no district heating schemes were permitted during 2022/23.

**Table 27 Permitted renewable energy capacity by type**

Type	No. of applications granted permission in 2022/23
Wind	0
Solar PV	36
Solar thermal	1
Ground source	0
Air source	5
Biomass	0
<b>Total</b>	<b>42</b>

- 4.72 During 2022/23, 42 planning applications were approved for renewable energy schemes which is an increase from 27 in 2021/22. The renewable energy schemes approved were mostly small-scale domestic installations. A small number of larger renewable schemes were permitted, such as the installation of solar photovoltaic equipment on the roofs of business premises such as garden centres and supermarkets. Two permissions granted for installation of ground mounted solar panel systems in fields at Glebe Farm, Sibford Gower and Leadenporch Farm, Deddington.
- 4.73 The majority of small-scale energy schemes, especially solar PV schemes, benefit from permitted development rights and do not require planning permission. Whilst it is not possible to identify and record these installations from planning application data, the Department for Business, Energy and Industrial Strategy have published renewable electricity data. The latest data confirms that at the end of 2022, there had been 3,547 photovoltaic installations in Cherwell. This is an increase of 381 installations since the end of 2021.

Flooding

- 4.74 Two indicators and targets have been developed to measure the effectiveness of Policy ESD 6 in seeking to manage and reduce flood risk in the district: the number of permissions granted contrary to Environment Agency advice on flood risk grounds and Flood Risk Assessments received for development proposals within Flood Zones 2 & 3, within 1 ha of Flood Zone 1, or 9m of any watercourse.
- 4.75 The Environment Agency publishes a list of applications they have lodged objections to on flood risk grounds to assist Local Authorities who are completing their annual monitoring reports. The list is designed to be as inclusive as possible and produced yearly and provides a starting point for Local Planning Authorities to check their own records.
- 4.76 During 2022/23, the Environment Agency lodged objections on flood risk grounds to six planning applications<sup>2</sup> that were submitted for development proposals in Cherwell. Of these, the Council permitted two planning applications and four are currently not determined. The two applications that were granted planning permission were granted permission following submission of further documents to resolve initial Environment Agency objections. For one application, following further discussion the Environment Agency conditionally withdrew their objection subject to the inclusion of six planning conditions as a part of the decision. The Council included the conditions on the decision notice and planning permission was granted for the proposed development. One permission was granted with unresolved objections from the Environment Agency during 2022/23; in this case the further information requested by the Environment Agency was submitted by the developer, however no response was received from the Environment Agency following a request for further comment.

**Table 28 Planning applications received during 2022/23 for development proposals within Flood Zone 1, 2 or 3, or within 9m of any watercourse.**

Development Location	Applications Received
Flood Zone 1 exceeding 1 ha in area	72
Flood Zones 2 or 3	100
Within 9m of any watercourse	37
<b>Total</b>	<b>209</b>

<sup>2</sup> Seven planning applications are shown in the list published by the Environment Agency, however one of these is a duplicate of another entry recorded for the 2022/23 period, meaning there are six unique entries.

- 4.77 During 2022/23, there were 209 planning applications for development proposals within Flood Zones 2 and 3, 9m of any watercourse or greater than 1 ha in area and located within Flood Zone 1.

***Note: This data contains duplicate entries where a development proposal is located in more than one development location. For example, if a development proposal is located in Flood Zone 2 and is also within 9m of a watercourse then it will be counted twice, once per development location.***

- 4.78 Policy ESD 7 sets out the Council's approach to Sustainable Drainage Systems (SuDS). The Monitoring Framework target is for an annual increase in completed SuDS schemes in the district over the plan period. The Council does not currently record the number of completed SuDS schemes in the district.

### Water Resources

- 4.79 Alongside other policies in the Plan, Policy ESD 8 seeks to reduce the impact of development on the water environment, maintain water quality, ensure adequate water resources, and promote sustainability in water use. Data published by the Environment Agency confirms that the monitoring target for Policy ESD 8 has been achieved – there have been no planning permissions granted during 2022/23 contrary to an Environment Agency objection on water quality grounds.

### Biodiversity and the Natural Environment

- 4.80 Through policies ESD 9 – 11 of The Cherwell Local Plan (Part 1) 2011-2031, the Council seeks the protection of the Oxford Meadows SAC (Policy ESD 9), protection and enhancement of biodiversity and the natural environment (Policy ESD 10) and Conservation Target Areas (Policy ESD 11).
- 4.81 There were no planning permissions granted within 1000m of the Oxford Meadows SAC contrary to consultee advice during 2022/23.
- 4.82 Information on biodiversity has been provided by the Thames Valley Environmental Records Centre (TVERC) in their Biodiversity Annual Monitoring Report.

**Table 29 Designated sites of intrinsic environmental value**

Designated Site	Area in hectares (2020)	Area in hectares (2021)	Area in hectares (2022)	Area in hectares (2023)	As % of Cherwell (2023)
Local Wildlife Sites (LWS)	1,469.48	1,460.93	1,457.73	1457.77	2.47%
Local Geological Sites (LGS)	139.46	139.46	139.53	139.53	0.23%

- 4.83 Local sites are non-statutory areas designated at local level for their significant nature conservation value. They include both local wildlife sites (designated for significant biodiversity value) and local geological sites (designated for their significant geological value). There are 89 Local Wildlife Sites and 12 Local Geological Sites within Cherwell. The data in Table 29 shows that the area of LWS has increased very slightly since last year whilst the area of LGS has remained the same.
- 4.84 The Single Data List 160-00 (SDL160) aims to measure the performance of local authorities at protecting their local biodiversity and geodiversity, by assessing the implementation of positive conservation management on Local Sites. The implementation of positive conservation management, defined as management which contributes to maintaining or enhancing the features of interest for which a site has been selected, is widely used for assessing improvements in biodiversity and geodiversity.
- 4.85 Due to a variety of restrictions relating to the COVID-19 pandemic, Natural England did not produce a SDL160 dataset for 2019/20 or 2020/21. The most recent SDL160 dataset was published in January 2023 and provides information for the 2021/22 monitoring period (no information has been published for the 2022/23 monitoring period as of the time of writing). The most recent SDL160 dataset shows that in 2021/22 there was a slight increase in the condition of Local Wildlife Sites compared to 2018/19 (the last year prior to 2021/22 for which data is available). The majority of Local Geological Sites across Oxfordshire were deemed to be in good condition in 2021/22.
- 4.86 Table 30 provides details of the 41 UK priority habitats which have been identified within Cherwell. The area of priority habitats has increased from 3,780 ha in 2022 to 3,863 ha in 2023. The changes in the UK priority habitats largely represent an improved understanding of the habitat resource in Cherwell, rather than the creation or loss of habitat. For example, from 2020/21 there has been a reclassification of 'Ponds' to 'Eutrophic Standing Waters', and for 2023 'possible priority grassland habitat' has been reclassified as 'Hedgerow (priority habitat)' which is reflected in the data.

**Table 30 Changes in priority habitats by number and type**

UK priority habitat type	Area (ha) 2020	Area (ha) 2021	Area (ha) 2022	Area (ha) 2023
Coastal and floodplain grazing marsh	1,401.67	1,400.51	1,400.51	1,409.04
Eutrophic standing water	110.76	121.47	121.47	240.84
Lowland calcareous grassland	97.84	97.84	97.41	95.12
Lowland dry acid grassland	7.34	7.34	7.34	7.76
Lowland fens	41.81	41.70	39.07	39.62

UK priority habitat type	Area (ha) 2020	Area (ha) 2021	Area (ha) 2022	Area (ha) 2023
Lowland meadows	518.71	515.55	510.08	509.44
Lowland mixed deciduous woodland	983.28	982.85	988.07	978.21
Lowland wood pasture and parkland	438.46	438.46	438.46	437.22
Open mosaic habitats on previously developed land	56.34	56.34	56.34	57.16
Ponds	2.80	0	0	0
Possible priority grassland habitat	41.63	41.63	41.63	0
Purple moor grass and rush pasture	5.57	4.78	4.78	4.78
Reedbeds	17.50	17.50	17.50	17.46
Rivers	0.94	0.94	0.94	0.92
Traditional orchards	26.79	26.79	26.79	26.79
Wet woodland	29.35	29.61	30.18	28.92
Hedgerow (Priority Habitat)	0	0	0	9.83
Lowland Heathland	0	0	0	0.20
<b>Total area of priority habitat</b>	<b>3,780.78</b>	<b>3,783.29</b>	<b>3,780.56</b>	<b>3,863.33</b>

4.87 Table 31 provides details of the number of UK priority species which have been identified within Cherwell. The number of UK priority species listed in Cherwell is 130. Two species have been removed from the list as no new records have been added to the TVERC database within the last ten years:

- Grayling
- Large Garden Bumblebee

**Table 31 Change in numbers of UK priority species**

	2012-2022	2013-2023
<b>Number of UK priority species</b>	132	130

4.88 There are 50 SSSI's wholly or partly within Cherwell covering approximately 1.17% of the District. These sites are of national importance for nature conservation and are protected from damaging activities. Summary data for SSSI condition is provided in Table 32, based on condition assessments carried out by Natural England from 2003 to 2023.

Table 32 SSSI condition for 2022-2023

Condition	No. of units or part units 2022/23	Sum of hectares 2022/23	% in Cherwell
Favourable	33	537	77.9%
Unfavourable/Declining	2	5	0.7%
Unfavourable/No change	1	6	0.9%
Unfavourable/Recovering	12	132	19.2%
Destroyed	2	9	1.3%
<b>Total</b>	<b>50</b>	<b>689</b>	

Table 33 Distribution and Status of Farmland Birds

(Mean counts per squares (i.e. density per square kilometre) of farmland birds in Cherwell. Results generated from data supplied by the BTO/JNCC/RSPB Breeding Bird Survey)

Species	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022
Corn Bunting	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.20
Goldfinch	6.20	3.29	2.40	4.33	8.43	6.00	7.43	11.62	1.60	4.00	4.80
Greenfinch	2.40	1.29	3.80	1.67	1.71	0.71	0.29	0.38	0.40	0.80	0.10
Grey Partridge	0.00	0.00	0.00	0.00	0.14	0.00	0.00	0.00	0.00	0.00	0.20
Jackdaw	5.60	4.00	3.60	3.83	13.14	5.57	5.71	25.62	3.40	31.80	11.10
Kestrel	0.40	0.71	1.80	0.50	0.00	0.57	0.29	0.50	0.00	0.10	0.40
Lapwing	7.40	2.57	2.00	1.00	0.57	2.43	5.14	3.75	0.00	6.20	2.20
Linnet	5.00	3.00	6.40	8.33	7.57	15.14	7.43	3.75	1.20	9.10	11.60
Reed Bunting	2.40	4.00	3.80	4.33	2.00	3.43	3.00	1.50	0.40	2.20	1.50
Rook	49.20	29.86	12.80	13.67	9.57	15.71	17.00	14.00	8.20	4.70	4.80
Skylark	14.40	11.86	11.80	15.67	13.29	13.71	15.71	14.38	7.60	15.00	16.50
Starling	19.60	26.14	7.60	0.00	27.14	6.43	1.86	6.12	2.40	2.70	5.20
Stock Dove	0.80	0.71	1.20	0.50	1.29	3.29	3.71	1.75	1.00	3.90	3.10
Tree Sparrow	0.00	0.00	1.20	0.00	2.14	0.00	0.00	0.00	0.00	0.00	0.00
Turtle Dove	0.00	0.43	0.00	0.00	0.00	0.14	0.00	0.00	0.00	0.00	0.00
Whitethroat	4.00	6.43	4.20	3.33	2.86	3.86	3.43	3.50	3.80	2.20	4.40
Woodpigeon	35.40	46.86	50.40	28.83	37.14	40.57	39.43	23.75	21.80	27.50	54.30
Yellow Wagtail	0.00	0.43	0.00	0.00	0.14	0.14	0.29	0.12	0.00	0.20	0.50
Yellowhammer	21.40	6.29	9.00	8.33	6.00	6.29	7.00	3.50	3.00	8.30	5.50
<b>Index</b>	<b>1.00</b>	<b>0.85</b>	<b>0.70</b>	<b>0.54</b>	<b>0.77</b>	<b>0.71</b>	<b>0.68</b>	<b>0.66</b>	<b>0.31</b>	<b>0.68</b>	<b>0.73</b>

4.89 This indicator uses an established list of 19 species, identifiable as farmland birds, compiled by the RSPB. The Tree Sparrow has been excluded from this in Oxfordshire due to a lack of data. Survey data were generated by the British Trust for Ornithology (BTO), survey volunteers and compiled by BTO officers from the BTO/JNCC/RSPB Breeding Bird Surveys, in specific 1km by 1km squares and then used to determine a

farmland bird index. These records were then made available to TVERC for processing at a district-specific level, using the methodology established by RSPB Central England Office staff. To establish a timeframe from which any kind of meaningful trend can be identified, a shifting baseline has been used. Changes in bird populations in subsequent years (over a 10-year period) are then stated relative to that baseline. This latest assessment of the farmland bird index uses a baseline of 2012.

- 4.90 Farmland bird density and the index are given in Table 33. There was a change in the index compared with 2021. The data provided this year includes new data for previous years, based on new survey information. Therefore, the index values reported this year are slightly different to those reported last year. The farmland bird index for Cherwell for 2022 (the most recent year for which data is available) is 0.73, which shows the index increased by 0.05 compared to 2021.

**Table 34 Distribution and Status of Water Voles**

Year	Number of sections surveyed along the Oxford Canal (per 500m stretch)	Positive surveys	% positive
2019	14	1	7
2020	17	4	24
2021	13	0	0
2022	13	1	8

- 4.91 Thirteen surveys for water voles were carried out along the Oxford Canal in 2022 (the most recent year for which surveys were conducted), with one positive sighting. This is a greater number of positive surveys than in 2021.

**Table 35 UK priority habitat resource in CTAs in Cherwell**

Priority Habitat	Total area (ha) 2020	Total area (ha) 2021	Total area (ha) 2022	Total area (ha) 2023
Coastal and floodplain grazing marsh	935.90	935.90	1,138.27	1,146.98
Eutrophic standing waters	83.59	83.36	92.62	130.75
Lowland calcareous grassland	73.80	73.80	73.31	71.01
Lowland dry acid grassland	7.33	7.33	7.34	7.34
Lowland fens	36.08	36.80	34.74	34.81
Lowland meadows	497.09	492.83	486.85	493.52
Lowland mixed deciduous woodland	353.66	355.04	373.53	364.23

Priority Habitat	Total area (ha) 2020	Total area (ha) 2021	Total area (ha) 2022	Total area (ha) 2023
Lowland wood pasture and parkland	280.17	280.17	279.59	278.37
Open mosaic habitats on previously developed land	0.11	0.11	0.11	0.11
Ponds	1.35	0.00	N/A	N/A
Possible priority grassland habitat	14.22	14.22	27.95	0
Purple moor grass and rush Pasture	5.57	4.78	4.78	4.78
Reedbeds	17.19	17.19	17.19	17.05
Rivers	0.35	0.35	0.34	0.32
Traditional orchards	4.61	4.61	4.65	4.65
Wet woodland	19.01	19.27	20.90	19.63
Hedgerow (Priority Habitat)	0	0	0	9.73
<b>TOTAL</b>	<b>2,330.04</b>	<b>2,327.77</b>	<b>2,562.16</b>	<b>2,583.27</b>

- 4.92 Table 35 details the UK priority habitats within Conservation Target Areas (CTAs) in Cherwell. CTAs identify some of the most important areas for biodiversity, where targeted conservation action will have the greatest benefit. The total area of UK priority habitat within Conservation Target Areas in Cherwell has increased from 2,562 ha in 2022 to 2,583.27 ha in 2023. The changes in the UK priority habitats are mostly attributable to new information such as confirmation of boundaries of habitat types.

### Landscape

- 4.93 The Monitoring Framework identifies the indicators and targets to consider when determining the effectiveness of Policy ESD 12 Cotswold AONB: built development permitted in the AONB and permissions granted contrary to the advice of the AONB Management Board. Targets for both indicators have been met – no planning permissions were granted for major development within the AONB and no permissions were granted for development within the AONB contrary to the advice of the AONB Management Board during 2022/23.
- 4.94 Policy ESD 13 seeks to conserve and enhance the distinctiveness and highly valued landscape character of the District. It has not been possible to gather data in relation to the monitoring indicators/targets for Policy ESD 13: the number and location of completed urban fringe restoration/improvement schemes or the number of permissions granted contrary to Landscape Officer advice in order to consider the effectiveness of the policy for this year's report.

### Oxford Green Belt

- 4.95 Part of Cherwell District falls within the Oxford Green Belt and Policy ESD 14 seeks the protection of the Green Belt in accordance with national planning policy. The indicator for this policy is completed development in the Green Belt complying with Policy ESD 14. This policy has not previously been monitored due to the availability of data. The Cherwell Local Plan Review 2040 will review how development in the Green Belt is recorded and analysed to ensure future indicators are effective.

### The Built and Historic Environment

- 4.96 Several indicators and targets have been developed to measure the effectiveness of Policy ESD 15 The Character of the Built and Historic Environment. Due to the way in which data has been collected over the plan period it has not been possible to gather data regarding the number of permissions granted contrary to consultee advice on heritage or design grounds. Nor has it been possible to collect data on the percentage of permitted and completed developments with Design and Access Statements that address the criteria of Policy ESD 15. The Cherwell Local Plan Review 2040 will review how development which impacts the historic environment is recorded and analysed to ensure future indicators are effective.
- 4.97 A post 2005 appraisal and management plan for all 60 conservation areas in the district was achieved in 2018/19. No new conservation area appraisals were adopted in 2022/23. Two conservation area appraisals were in progress at 31 March 2023: Bloxham and Grimsbury.

### The Oxford Canal

- 4.98 A target in relation to measuring the effectiveness of Policy ESD 16 The Oxford Canal is for an increase in completed transport / recreation / leisure / tourism uses within 1km of the Oxford Canal over the plan period. During 2022/2023, there are no completed developments related to transport/recreation/leisure/tourism within 1 km of the Oxford Canal.
- 4.99 There were no planning permissions granted contrary to consultee advice on heritage grounds.

### Green Infrastructure

- 4.100 Policy ESD 17 sets out the Council's approach to ensure the maintenance and enhancement of the District's green infrastructure network. The Monitoring Framework target is for a net gain in green infrastructure provision over the plan period. Progress of green infrastructure schemes is recorded in the IDP Update. Section 6 of this AMR monitors the implementation of Policy INF 1 and contains a summary of completed and new green infrastructure projects.

## Cherwell's Places

4.101 Housing and Employment completions at strategic allocations for Bicester, Banbury and Former RAF Heyford are reported elsewhere in this report (Theme 2) which provides a comprehensive overview of the status of the main allocations. For succinctness these findings are not repeated here.

### Other Indicators – Policy Bicester 5 Strengthening Bicester Town Centre

4.102 Policy Bicester 5 is concerned with strengthening the town centre. Several indicators and targets have been developed in the Monitoring Framework to measure the effectiveness of this Policy: permitted residential development at ground floor level in Bicester town centre, town centre vacancies, diversity of uses, and completed town centre uses within and outside of Bicester town centre.

4.103 As noted in Theme 2, the indicators associated with floorspace have become more challenging due to the introduction of Class E. As such, one figure is now reported (previously uses A1-5, B1a and D2)

4.104 Vacancy rates within Bicester town centre were assessed as part of the Retail Needs Study to accompany the Local Plan Review.

**Table 36 Net gain in town centre uses in Bicester (sqm)**

Location	E	Total
Within Bicester town centre	-100.6	<b>-100.6</b>
Outside Bicester town centre	9,502.66	<b>9,502.66</b>
<b>Bicester Total</b>	<b>9,402.06</b>	<b>9,402.06</b>

4.105 There were no town centre uses completions within Bicester town centre in 2022/23. 9,502.66 sqm of floor space falling into town centre uses was completed outside of Bicester Town Centre in 2022/23, and 100.6 sqm of class E floorspace was lost within Bicester Town Centre through the conversion of office space to residential use.

### Other Indicators – Policy Bicester 7 Meeting the Need for Open Space, Sport & Recreation

4.106 Policy Bicester 7 sets out how the Council will seek to address current and future deficiencies in open space, sport and recreation provision in Bicester. However, it has not been possible to obtain data for the monitoring indicators: community woodland provision in Bicester; and type of permitted/completed development at Stratton Audley Quarry. For details of urban edge park schemes in Bicester refer to Policy BSC 10.

Other Indicators – Policy Bicester 8 Former RAF Bicester

- 4.107 Policy Bicester 8 relates to Former RAF land in Bicester of 141.5 ha for the provision of heritage tourism uses, leisure, recreation, employment, and community uses. There is a planning application of 2.23 ha of employment uses (21/01224/OUT) which was granted planning permission in March 2023. There is no planning application or permission in place for the remaining area.

Other Indicators – Policy Bicester 9 Burial Site Provision in Bicester

- 4.108 Policy Bicester 9 is concerned with burial site provision in Bicester. No developer contributions data for burial site provision is available at this time. However, an update will be provided in future AMRs if data becomes available.

Other Indicators – Policy Banbury 1 Banbury Canalside

- 4.109 Policy Banbury 1 relates to Banbury Canalside – land between Banbury Town Centre and Banbury Railway Station. The Council's December 2022 Local Development Scheme (LDS) and the subsequent update published in September 2023 removed the Banbury Canalside SPD from the LDS, and it is not the Council's intention to progress the preparation of a Banbury Canalside SPD at this time.
- 4.110 In taking this decision, the Council acknowledges that Banbury Canalside remains a key priority. The Cherwell Local Plan Review retains a strong focus on regeneration for this area, with a different policy mix to the adopted local plan. As SPDs are required to expand on adopted policies, the Council considered that an SPD that could not reflect the proposed changes set out in the Local Plan Review would not be an effective tool to guide the development of the local area. Other work, such as understanding the viability of the area, improvements to the area around the station and master planning will continue to be undertaken.

Other Indicators – Policy Banbury 7 Strengthening Banbury Town Centre

- 4.111 Policy Banbury 7 is concerned with strengthening the town centre. Several indicators and targets have been developed in the Monitoring Framework to measure the effectiveness of this Policy: permitted residential development at ground floor level in Banbury town centre, town centre vacancies, diversity of uses, and completed town centre uses within and outside of Banbury town centre. These are dealt with in turn below.
- 4.112 As noted in Theme 2, the indicators associated with floorspace have become more challenging due to the introduction of Class E. As such, one figure is now reported (previously uses A1-5, B1a and D2)
- 4.113 Data on vacancy rates within Banbury town centre was collated in 2021 as part of the Retail Needs Study to accompany the Local Plan Review.

**Table 37 Town Centre uses completions within and outside of Banbury town centre (sqm)**

Location	E	Total
<b>Within Banbury town centre</b>	-1,808	<b>-1,808</b>
<b>Outside Banbury town centre</b>	-2,232.4	<b>-2,232.4</b>
<b>Banbury Total</b>	<b>-4,040.4</b>	<b>-4,040.4</b>

4.114 During 2022/23, 1,808 sqm of Class E floor space was lost within Banbury town centre. This was mostly through the conversion of office space above retail units into residential uses. Outside of the town centre a further 43.4 sqm of office space was converted to residential use, 4,415 sqm of class E(g) office floor space was demolished, and 2,226 sqm of new class E floorspace was created (comprising new retail floorspace and day nursery / creche floorspace) – a net loss of 2,232.4 sqm outside of the town centre area.

**Other Indicators:**

- **Policy Banbury 11 Meeting the need for Open Space, Sport & Recreation**
- **Policy Banbury 12 Land for the Relocation of Banbury United FC**
- **Policy Banbury 13 Burial Site Provision in Banbury**
- **Policy Banbury 14 Cherwell Country Park**

4.115 Since the 2021/22 AMR there has been no further updates to these indicators

**Other Indicators – Policy Kidlington 1 Accommodating High Value Employment Needs**

4.116 The Cherwell Local Plan recognises that London-Oxford Airport and Langford Lane industrial estate in Kidlington and Begbroke Science Park play an important role in the District's wider employment context and Policy Kidlington 1 seeks to reinforce and strengthen the emerging cluster of high value industries in this area.

4.117 6,575 sqm of employment development was completed at the Oxford Technology Park in 2022/23. The location of the development falls within Green Belt land in Kidlington beyond the Local Plan review areas. The completed floor space comprises 3,796 sqm of office floor space (formerly use class B1a) and 2,779 sqm of research and development floor space (formerly use class B1b).

**Other Indicators – Policy Kidlington 2 Strengthening Kidlington Village Centre**

4.118 Policy Kidlington 2 is concerned with supporting the village centre and ensuring that the everyday shopping needs of residents are met. Several indicators and targets have been developed in the Monitoring Framework to measure the effectiveness of this Policy: permitted residential development at ground floor level in Kidlington village

centre, village centre vacancies, diversity of uses, and completed town centre uses within and outside of Kidlington village centre.

- 4.119 There were no permissions granted for residential development at ground floor level in Kidlington village centre during 2022/23. The monitoring target for this indicator was therefore met in 2022/23. Data on vacancy rates within Kidlington village centre was collated in 2021 as part of the Retail Needs Study to accompany the Local Plan Review

**Table 38 Town Centre uses completions within and outside of Kidlington Village Centre**

Location	E	Total
Within Kidlington village centre	0	0
Outside Kidlington centre	3,395.8	3,395.8
<b>Kidlington Total</b>	<b>3,395.8</b>	<b>3,395.8</b>

- 4.120 There were no town centre uses completions within Kidlington village centre in 2022/23. Outside Kidlington village centre, 3,796 sqm of office space was created, and 400.2 sqm of D2 floor space was converted to sheltered housing, representing a net gain of 3,395.8 sqm of E class uses in 2022/23.

#### Other Indicators – Policy Villages 1 Village Categorisation and Policy Villages 2 Distributing Growth Across the Rural Areas

- 4.121 The Cherwell Local Plan 2011-2031 (Part 1) directs the majority of development to the two main towns in Cherwell with a proportion of the overall growth expected to come forward in the rural areas. Policy Villages 1 is intended to manage small-scale development in the built-up limits of villages while Policy Villages 2 identifies 750 dwellings to be delivered in Category A villages on sites of 10 or more dwellings. It was intended that sites would be allocated in an emerging Local Plan Part 2 (now Local Plan Review).
- 4.122 Policy Villages 1 provides a categorisation of villages to guide the consideration of small-scale proposals for residential development within the built-up limits of settlements.
- 4.123 Policy Villages 2 of the adopted Local Plan 2011-2031 provides for an additional 750 dwellings at Category A villages (2014-2031) in addition to the rural allowance for small site 'windfalls and planning permissions as at 31 March 2014. Therefore, new planning permissions given at the Category A villages from 1 April 2014 and completions on those sites will contribute to the requirement of 750 dwellings.

- 4.124 Table 39 shows dwellings that are either completed or under construction on sites with within the rural area. During 2022/23 there were 86 dwellings completed at Category A villages that contribute to the Policy Villages 2 requirement of 750 dwellings. Between 1 April 2014 and 31 March 2023 there have been a total of 792 completions, with a further 100 dwellings under construction but not completed at 31 March 2023, totalling 892 dwellings.
- 4.125 Table 40 shows there are an additional 303 dwellings with planning permission on sites with planning permission but construction has not yet started.
- 4.126 Since 1 April 2014 a total of 1,195 dwellings have been identified for meeting the Policy Villages 2 requirement of 750 dwellings, including 792 completions. The requirement to deliver 750 new dwellings at Category A villages set out in Policy Villages 2 has therefore been met. However, rural sites are likely to continue to be an important source of supply in the district.
- 4.127 There is one rural strategic allocation namely the Former RAF Upper Heyford included in the adopted Local Plan 2011-2031. The completion figure for Policy Villages 2 excludes any completions at this strategic allocation.

**Other Indicators – Policy Villages 3 Rural Exception Sites**

- 4.128 Policy Villages 3 sets out the Council’s planning policy in regard to rural exception sites. No affordable homes on exception sites were completed during 2022/23, and none are in the process of coming forward at the time of writing (October 2023)

**Other Indicators – Policy Villages 4 Meeting the Need for Open Space, Sport & Recreation**

- 4.129 Policy Villages 4 seeks to address existing open space, sport and recreation deficiencies in Kidlington and the rural areas. Monitoring targets for Policy Villages 4 are as set out in Policy BSC 11 and BSC 12 and the Infrastructure Delivery Plan and progress of open space, sport and recreation facilities schemes in the rural areas is recorded in the IDP Update. Section 6 of this AMR monitors the implementation of Policy INF 1 and contains a summary of new open space, sport and recreation facilities schemes.

**SA/SEA Adoption Statement – Cherwell Local Plan 2011-2031 Part 1 (July 2015)**SA Objectives and Suggested Indicators

- 4.130 The SA/SEA Adoption Statement (July 2015) sets out the monitoring indicators for monitoring the effects of the Cherwell Local Plan 2011-2031 Part 1 on the SA objectives. The majority of the suggested indicators have already been included in the Monitoring Framework of the adopted Local Plan Part 1. However, there were three not included which related to SA Objectives 5 (crime) and 14 (waste).
- 4.131 SA Objective 5 seeks “To reduce crime and disorder and the fear of crime.” The suggested indicator for this objective is by recorded crime levels in Cherwell District and data for 2022/23 is presented in Table 42. During 2022/23 there were a total of 14,560 recorded crimes in the district which is an increase of 771 from the previous

year (13,789). The majority of crimes recorded were violent (36%), followed by public order (10%), other crimes (10%), anti-social behaviour (9%) and shoplifting (9%).

- 4.132 SA Objective 14 seeks “To reduce waste generation and disposal and achieve the sustainable management of waste.” The latest data published by DEFRA which is presented in Table 41 confirms that in 2021/22 (the most recent year for which data is available), 55.30% of Cherwell’s household waste was sent for reuse, recycling and compost. This broadly maintains the levels achieved in 2019/20 and 2020/21, and is higher than the England average of 42.50% in 2021/22. Oxfordshire County Council is responsible for minerals and waste and progress on achieving this objective will be recorded on the County’s website:  
<https://www.oxfordshire.gov.uk/cms/content/new-minerals-and-waste-local-plan>.

**Table 41 Percentage of household waste sent for reuse, recycling and composting (annual) in Cherwell District during 2013/14 – 2022/23 (Source: [lginform.local.gov.uk](http://lginform.local.gov.uk))**

## 5 Monitoring Results – Cherwell Local Plan 2011-2031 (Part 1) Partial Review

- 5.1 For each policy in the Cherwell Local Plan 2011-2031 (Part 1) Partial Review – Oxford’s Unmet Housing Need, there is an indicator and a target which will be used to measure the policy’s effectiveness and to assess whether or not the objectives are being met. This section sets out the detailed monitoring results using specific indicators from the adopted Local Plan 2011-2031 (Part 1) Partial Review. The detailed Monitoring Framework is included at Appendix 6.
- 5.2 This is the third AMR to monitor against the indicators and targets from the adopted Local Plan 2011-2031 (Part 1) Partial Review – Oxford’s Unmet Housing Need.

### Housing Completions

- 5.3 To date there has been no housing completions at the Partial Review sites. Residential completions will be reported in future AMRs. However, progress is being made with development briefs either now either published or nearing completion.
- 5.4 At 31 March 2023, there were no extant planning permissions in place for any of the Partial Review sites. Planning applications have been submitted for three of the partial review sites. They are detailed in Table 43. None of these planning applications had been determined by 31 March 2023.

**Table 43 Pending planning applications for the Partial Review sites**

Partial review site allocation	Planning application number	Site address	Date submitted	Number of dwellings
PR7a	22/00747/OUT	Land At Bicester Road Kidlington	11/3/22	370
PR7b	22/01611/OUT	Stratfield Farm 374 Oxford Road Kidlington	30/5/22	118
PR9	21/03522/OUT	Os Parcel 3673 Adjoining And West Of 161 Rutten Lane Yarnton	14/10/21	540

- 5.5 Since 31 March 2023, two further planning applications have been submitted for the PR6a and PR8 partial review site allocations. All five planning applications were pending determination at 1 October 2023.

### Housing Mix, Tenure and Size

- 5.6 Policy PR2 Housing Mix, Tenure and Size sets out that the strategic developments provided for under Policies PR6 to PR9 will be expected to meet specific requirements to help meet Oxford’s housing needs in terms of use, tenure (including affordable

housing), dwelling size, key worker provision and self-build or self-finish housing. The Monitoring Framework target is to deliver the requirements of Policy PR2.

- 5.7 Due to there being no housing completions at the Partial Review sites to date, this indicator will be reported in future AMRs.

### Transport

- 5.8 Policy PR4a Sustainable Transport states that strategic sites are to provide proportionate financial contributions directly related to the development for:
- Highways improvements to infrastructure and services for public transport;
  - Provision of land to support implementation of schemes in LTP4, A44/A4260 and other transport mitigation assessment; and
  - Improved bus service
    - A44/A4144 corridor
    - A4260/A4165
    - Cross corridors: Langford Lane, Frieze Way
- 5.9 Progress of transport schemes is recorded in the IDP Update. Section 7 of this AMR monitors the implementation of Policy PR1, Policy PR11 and delivery of the Infrastructure Schedule requirements and contains a summary of completed and new transport infrastructure projects.

### Kidlington Centre

- 5.10 Policy PR4b sets out the Council's approach to sustainable transport improvements and associated infrastructure to reduce private motorised through traffic along the A4260 in Kidlington and improve the built and natural environment along this corridor. The Monitoring Framework target is to delivery Policy PR4b requirements and Kidlington Masterplan.
- 5.11 Progress of transport schemes is recorded in the IDP Update. Section 7 of this AMR monitors the implementation of Policy PR1, Policy PR11 and delivery of the Infrastructure Schedule requirements and contains a summary of completed and new transport infrastructure projects.

### **Green Infrastructure**

- 5.12 Policy PR5 sets out that the strategic developments provided for under Policies PR6 to PR9 will be expected to protect and enhance green infrastructure and incorporate green assets and the water environment into the design approach for each site. The Monitoring Framework target is to deliver the policy requirement to secure green infrastructure improvements.
- 5.13 Progress of green infrastructure schemes is recorded in the IDP Update. Section 7 of this AMR monitors the implementation of Policy PR1, Policy PR11 and delivery of the

Infrastructure Schedule requirements and contains a summary of completed and new green infrastructure projects.

### **SA/SEA Adoption Statement – Cherwell Local Plan 2011-2031 (Part 1) Partial Review (September 2020)**

#### SA Objectives and Suggested Indicators

- 5.14 The SEA Directive requires monitoring of the significant environmental effects of the implementation of a plan or programme and this monitoring framework is set out in the Sustainability Appraisal accompanying the Local Plan Partial Review. The SA lists a number of 'significant effects indicators'. The majority of the suggested indicators have already been included in the Monitoring Framework of the adopted Local Plan Part 1 and the Partial Review.

## **6 Monitoring progress of infrastructure provision**

- 6.1 The Infrastructure Delivery Plan (IDP) contains the infrastructure required to support the adopted Cherwell Local Plan 2011-2031 Part 1 (July 2015) and the Cherwell Local Plan 2011-2031 (Part 1) Partial Review – Oxford’s Unmet Housing Need.
- 6.2 The IDP is a live document adjusted over time to reflect changes in circumstances and strategies alongside the annual monitoring of Local Plan infrastructure Policy INF1 and Policy PR11.
- 6.3 This AMR update includes summary tables of infrastructure progress. The IDP Update for November 2023 can be viewed in appendix 3.

## 7 Future Monitoring

- 7.1 The Local Plan 2011-2031 Part 1 was adopted in July 2015 which means that this is the sixth AMR to cover the full monitoring year. There are still several indicators from the Monitoring Framework within the Plan that cannot be monitored but which will be explored in future AMRs.
- 7.2 The Cherwell Local Plan 2011-2031 Part 1 Partial Review – Oxford’s Unmet Housing Need was adopted in September 2020. This is the second AMR to monitor against the indicators and targets from the Monitoring Framework within the Plan.
- 7.3 Monitoring is important to ensure the successful delivery and implementation of the Cherwell Local Plan 2011-2031 and in preparing future evidence and policy documents. Monitoring highlights good and poor performance, where action might be necessary and ultimately where policies might need to be reviewed.
- 7.4 The Local Plan Monitoring Framework is closely linked to the monitoring framework developed for the Local Plan Sustainability Appraisal, which sets out the monitoring indicators for monitoring the effects of the Cherwell Local Plan 2011-2031 Part 1 on the SA objectives.

# **Appendix 1 - Cherwell District Council Housing Land Supply Statement**

**December 2023**

## **Introduction**

1. Following the decision of the Council's Executive in February 2023 the Council published a Land Supply Statement (February 2023) which adopted a district local housing need figure as calculated by the Standard Method for the purpose of assessing housing land supply for Cherwell's needs. The Housing Land Supply position statement concluded that the district had a five year supply of 5.4 years.
2. This Housing Land Supply Statement (December 2023) was prepared in November 2023 and is an appendix to the Council's 2023 Annual Monitoring Report. It replaces the February 2023 statement. The review of the projections for future delivery was undertaken in November 2023 informed by consultations with the development industry, development management colleagues, infrastructure providers and historic information. The housing completion and permission data it relies upon is that verified at 31 March 2023.
3. This statement assesses the housing land supply position for Cherwell for the five-year period 1 April 2023 to 31 March 2028. Separate Housing Land Supply Statements may be published from hereon to provide flexibility in when the Council produces its statement in response to significant changes of circumstance and to enable reporting earlier in the calendar year following the verification of housing completion and permission data.

## **National Policy Context**

4. The five-year housing land supply (or '5YHLS') is an important 'test'. Where authorities fall below 5 years the 'tilted balance' in the National Planning Policy Framework (NPPF) applies with the presumption in favour of sustainable development.
5. The NPPF (paragraph 74) requires local planning authorities to:

"identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old."
6. Footnote 39 to paragraph 74 explains that the housing requirement in adopted strategic policies may continue to be used if the policies have been reviewed and found not to require updating. This is known as a regulation 10A review (under regulation 10A of the Town and Country Planning (Local Planning) (England) Regulations 2012).
7. Footnote 39 states:

"Unless these strategic policies have been reviewed and found not to require updating. Where local housing need is used as the basis for assessing whether a five-year supply of specific deliverable sites exist, it should be calculated using the standard method set out in national planning guidance".
8. Accordingly, where adopted strategic policies are five years old and in the absence of a review finding them to be up to date, LPAs should use their Standard Method figure for monitoring purposes.

## **Current Circumstances**

### **Cherwell Local Plan 2011-2031**

9. Since the publication of the 2021 AMR, there has been a material change in circumstances to warrant a change to the standard method for the purpose of assessing housing land supply for Cherwell.
10. In December 2022 the Council published a Housing and Economic Needs Assessment (HENA) produced jointly with Oxford City Council to inform their respective Local Plan processes. THE HENA considers the Oxfordshire's Functional Economic Market Area (FEMA) and the Oxfordshire Housing Market Area (HMA).
11. The HENA is new up to date evidence of housing need, which provides an assessment of housing need which is materially different to that in the 2014 SHMA. It indicates that the 2014 SHMA is now out of date. This is the conclusion of a 'Regulation 10A' review of the strategic policies in the Cherwell Local Plan 2011-2031 presented to the Council's Executive on 6 February 2022. As the housing requirement in the adopted strategic policies in the 2015 Local Plan is based on the 2014 SHMA, it further indicates that these strategic policies do, in the words of NPPF para 74 and footnote 39, require updating.
12. In view of these circumstances, it is appropriate to apply the standard methodology for the assessment of local housing need for Cherwell for the purpose of calculating the five-year housing land supply.

### **Cherwell Local Plan 2011-2031 Partial Review – Oxford's Unmet Housing Needs**

13. A partial review of the Local Plan to meet Oxford's unmet needs was adopted in September 2020. The Partial Review makes provision for 4,400 homes over the plan period of which 1,700 are to be delivered 2021-2026 and the remaining homes by 2031 (i.e. over a 10-year period). This results in a stepped housing requirement as follows:

Year	2021/22 – 2025/26	2026/27 – 2030/31	Total
Housing requirement	340 x 5 years	540 x 5 years	4400

14. Policy 12a of the Partial Review states:  
"The Council will manage the supply of housing land for the purpose of constructing 4,400 homes to meet Oxford's needs. A separate five-year housing land supply will be maintained for meeting Oxford's needs".
15. As the Partial Review Plan is not yet five years old (adopted in 2020), there is no justification to change the approach to monitoring land supply associated with this plan.
16. Furthermore, the unmet need figure is fixed, following agreement through a duty-to-cooperate process, and has recently been found sound and adopted after examination of Oxford City's Local Plan and Cherwell's Partial Review Plan (amongst others), and so the reliance on the 2014 SHMA is less important. As the adopted strategic policies (which contain the unmet need component of the housing requirement) in the Partial Review Plan are less than five years old, the Standard Method does not apply for the purposes of calculating unmet need for Oxford.

17. The evidence provided by the 2022 HENA will update the quantum of unmet need to be planned for in Cherwell, but this will not apply until the emerging Cherwell 2040 Local Plan Review has been subject to Examination and is adopted. In view of these circumstances, the housing requirements of the Partial Review of the Local Plan will be applied for the purpose of calculating the five-year housing land supply for Cherwell's contribution to Oxford's unmet housing need.

### **Five Year Housing Land Supply Assessments**

18. The standard method local housing need figure for Cherwell District is presently 710 dwellings per annum (dpa). This figure has been calculated using the Government's Planning Practice Guidance, in accordance with NPPF paragraph 74 footnote 39. A requirement of 710 homes per annum will therefore be applied to assessing the five year supply of deliverable housing sites for Cherwell. This figure has been used at recent appeals, for example in relation to a site in Finmere, and accepted by Inspectors. The latest government standard method figure for Cherwell will be used in any future updates on supply.
19. The NPPF defines the word 'deliverable':  
"Deliverable: To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years.
20. In particular:  
  
<https://www.gov.uk/guidance/housing-and-economic-development-needs-assessments>  
a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).  
b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years."  
Paragraph 74 also states that: "The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:  
a) 5% to ensure choice and competition in the market for land; or  
b) 10% where the local planning authority wishes to demonstrate a five year supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or  
c) 20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply."
21. Footnote 40 does not apply as the Local Plan Part 1 is not recently adopted. It should also be noted that at the present time the Council has not decided to submit an annual position statement on its five-year supply to the Planning Inspectorate for consideration for the Partial Review.
22. Footnote 41 cross-refers to the Government's Housing Delivery Test results whereby if delivery is under 85% then the Council needs to apply a 20% buffer to the

deliverable supply. The most recent Housing Delivery Test result for Cherwell is 153% therefore the 5% buffer under paragraph 74 a) should be applied to the five-year supply calculation.

### **Cherwell's Five Year Housing Land Supply**

23. A Housing Delivery Monitor is below setting out the district's position in relation to housing completions, permissions, and housing supply from deliverable and other sites.
24. The AMR contains the details of housing completions since the base date of the Local Plan (1 April 2011).
25. Under the Government's standard method there is no need to take any shortfall prior to the base date of the five-year housing land supply calculation into account.
26. Cherwell has a range of small and strategic sites which are being built out. As reported in the AMR there were 1,318 completions in the 2022/23 monitoring year from a range of sites including small rural sites and large, strategic allocations.
27. The Housing Delivery Monitor details the sources of supply for the period from April 2023 to align with the monitoring year and historic monitoring data.
28. Evidence on the deliverability of sites including information on anticipated buildout has been recorded as of November 2023. This is reflected in the commentary that accompanies all deliverable and developable supply included within the Housing Delivery Monitor to provide an accurate picture of available supply.
29. Sources of evidence include:
  - Questionnaires sent to all known agents/developers requesting updates on projected buildout
  - Discussions with Development Management Officers and other council departments engaged in the delivery of sites
  - A review of Building Control Records to establish if notices have been received to indicate that developers are aligning the necessary additional consents ahead of construction.

30. A summary of supply from deliverable sites over the five year period is shown below:

	Projection 23/24	Projection 24/25	Projection 25/26	Projection 26/27	Projection 27/28	5 year Supply	Projection 28/29	Projection 29/30	Projection 30/31	Post 2031	Total Completions and Projected Completions
<b>CDC Total Supply</b>	<b>853</b>	<b>761</b>	<b>703</b>	<b>890</b>	<b>914</b>	<b>4121</b>	<b>969</b>	<b>1049</b>	<b>1033</b>	<b>9457</b>	<b>7172</b>
Banbury Supply	275	286	282	285	355	1483	395	485	460	1147	<b>2823</b>
Bicester Supply	231	86	110	199	175	801	300	300	273	7923	<b>1674</b>
Other Areas	347	389	311	281	259	1587	74	64	100	387	<b>1825</b>
Windfall	0	0	0	125	125	250	200	200	200	0	<b>850</b>

31. Developers have told us that challenging market conditions may result in a slight drop off in supply in the short term but towards the middle and end of the 5 year period delivery is expected to pick up as conditions improve. Inflation is likely to have peaked meaning that the cost of lending is likely not to increase further and may come down. Market conditions, such as increased build costs, also do not necessarily mean that delivery will be slow just that the margins achieved by developers for sales are lower in some cases.
32. None of projected supply figures in the years within the 5 year period are higher than the number of completions achieved in Cherwell District in recent years, for example 1318 in 2022/23 and 1175 in 2021/22. The Council's latest monitoring for 2023/24 shows that sites continue to deliver new homes and there are a significant number of planning permissions in place. The 5 year projection is considered reasonable and robust on this basis.

### **Banbury**

33. Strategic allocations in Banbury account for most of the supply in Banbury over the next 5 years (1483 dwellings). These are predominantly from South of Salt Way (Banbury 17), Drayton Lodge Farm (Banbury 18) and land west of the Southam Road (Banbury 2) dwellings. Most of the remaining supply is from a mixture of smaller allocated sites in the urban area and unallocated sites with planning permission.
34. Strategic sites in Banbury have a recent history of development starting within 5 years of an outline permission being granted. For example at land east of the Southam Road (Banbury 2), the outline permission was initially granted in December 2013, development started in 2015, completions were being recorded by 2016 and the site was completed in 2022. At land west of Bretch Hill (Banbury 3), the outline permission was initially granted in March 2016, development started in 2016, completions were recorded in this same year and the site is almost complete in 2023.

At Salt Way (Banbury 17), outline permission was granted for part of the site in 2018, development started in 2021 and completions recorded in 2022. The Council expects this trend of speedy delivery from the grant of outline permission to continue going forward with often the same house builders remaining in the town and on sites.

35. Strategic housing sites at Banbury, including Longford Park, West of the Warwick Road, east of the Southam Road, Saltway and north of Hanwell Fields have delivered on average 85 dwellings per annum between 2018 and 2023. On sites in Banbury that provide for the future supply there is more than one developer/promoter which is likely to lead to faster delivery.

### **Bicester**

36. Delivery at Bicester has been somewhat slower than at Banbury with many of the allocations still only at Outline stage. Whilst the projection for delivery is still significant at some 851 homes over 5 years this is substantially below that envisaged in the 2015 plan.
37. There are several reasons for this including the delivery of essential infrastructure to deliver growth. Cherwell District Council is working proactively with partners including Homes England to unlock development. As of November 2023 when updating the Housing Delivery Monitor a cautious approach has been taken in assessing delivery. For example, it is anticipated that delivery from Northwest Bicester will be around 100 dwellings in the proceeding 5 year period with the remainder expected to come forward in years 6-9 and beyond the plan period. Progress is being made towards granting reserve matters consent for outline permissions at North West Bicester. Planning permission was also granted on appeal for 530 dwellings at North West Bicester. Dwellings permitted from this site have not been included within the 5 year period despite it being within the Local Plan allocation as its granting was relatively recent. However, dwellings may be delivered at the end of the 5 year period. Bicester is a sustainable location for development and has a record of delivery more generally with over 1700 dwellings at South West Bicester being delivered in the last circa 20 years.

### **Other Areas**

38. Other Areas are expected to deliver 1587 homes over the next 5 years. The majority of the supply will come from Heyford Park. There are three developers/promoters at Heyford Park on sites that will contribute to future supply. Most of the site will be developed by Dorchester who is a long standing and active developer on the site. Dorchester Living are in partnership with Picture Living who will deliver private rented dwellings. An average of 100 new homes a year have been built on the site over the last 5 years. It is anticipated that this level of delivery will continue, including within the 5 year period. Dorchester actually anticipate that they will deliver 200 dwellings per year in the medium term. Discussions are occurring with the developer concerning future reserved matters applications which are expected shortly. Smaller sites in Cherwell generally have a history of being built out within 5 years of the grant of permission.

## Windfalls

39. No windfall allowance is included within the deliverable supply for the first 3 years. This is to avoid double counting as the known sites are included within the allowance for small sites (sites less than 10 dwellings) or, where they are larger than 10 dwellings are included within the monitor. After year 3 an allowance of 125 dwellings is included. This reflects past trends. Windfall completions on small sites have averaged 140 per year since 2011.

## Calculation of Cherwell's five year housing land supply

40. Using the standard method local housing need figure as the requirement and the projected supply for the period 2023-28, the five-year housing land supply calculation for the district is set out below.
41. The five-year housing land supply position in the district excluding the Partial Review area is **5.5** years.

Step	Description	Five year period 2023 to 2028
a	Requirement (2023 – 2031) Standard Method	5680 (710x8)
b	Annual Requirement (latest standard method)	710
c	5 year requirement (b x years)	3,550
d	5 year requirement plus 5% buffer (C + 5%)	3,728
e	Revised annual requirement over next 5 years (d/5)	745.6
f	Deliverable supply over next 5 years	4121
g	Total years supply over next 5 years (f/e)	<b>5.53 years</b>
h	Surplus (f-d)	393

## Partial Review five housing land supply – Oxford’s unmet housing needs

42. There has been progress on the allocated sites within the Partial Review area since the last monitoring update with several of the development briefs now adopted, applications submitted and some approved. With the Partial Review adopted recently in September 2020, a legal challenge taking place into 2021, and development briefs required to be completed, significant progress on these sites has been achieved. 80 homes in total is considered to be a reasonable assumption based on discussions with case officers and information received from the development industry and promoters. Nevertheless, this leaves a land supply in the partial review area as **0.1** years or a shortfall of some 2,839 dwellings. Discussions are continuing with promoters and developers on submitting further applications shortly.

Step	Description	Five year period 2023 to 2028
a	Partial Review requirement 2021-26	1,700
b	Annual Requirement (a / 5)	340
c	Partial Review requirement 2026-31	2,700
d	Annual Requirement (c / 5)	540
e	Requirement to date (b x years)	680
f	Completions 2021-23	0
g	Shortfall at 31/3/23 (f - e)	680
h	Base requirement over next 5 years ((b x 3) + (d x 2))	2100
i	Base requirement over next 5 years ((b x 3) + (d x 2) plus shortfall	2780
j	Base requirement over next 5 years plus 5% buffer (i x 1.05)	2919
k	Revised Annual Requirement over next 5 years (j / 5)	584
l	Deliverable Supply over next 5 Years	80
m	Total years supply over next 5 years (l / k)	<b>0.1</b>
N	'Shortfall' (f – d)	2,839

Appendix 1 - Five Year Land Supply Position Statement - (Excluding sites completed at 31 March 2022)																				
Area	Category	Site name and address	Planning application reference	Permission type (Allocation, Full, Outline, Reserved Matters)	Available and achievable evidence	Scheme status at 01/04/23	Conclusion	Planning Permissions at 31/03/23 minus units built & recorded at 31/03/23 (net)	Completions to 31/03/23 - land supply sites (excludes historic completions)	Projection 23/24	Projection 24/25	Projection 25/26	Projection 26/27	Projection 27/28	Projection 28/29	Projection 29/30	Projection 30/31	Post 2031	Total Completions and Projected Completions to 2031	
Banbury	BANBURY 1 - BANBURY CANALSIDE	Canalside	18/00293/OUT Caravan site, Station Road	Allocation	Outline permission for 63 dwellings expired in June 2022. A new outline application for 63 dwellings (22/01564/OUT) at Station Road was approved in July 2023 subject to signing of a section 106 agreement. Site is part of a wider allocation in the adopted Cherwell Local Plan and the wider site is proposed to be allocated for mixed use development in the draft Local Plan Review 2040. Projection allows sufficient time (circa 3 years) for reserve matters submission and determination.	Lapsed	Deliverable	0	0	0	0	0	33	30	0	0	0	0	0	63
Banbury	BANBURY 1 - BANBURY CANALSIDE	Canalside	18/01569/F Robert Keith Car Sales	Allocation	Previous application has lapsed. However work has started on site with former buildings set to be demolished. A new application (23/00276/F) received in February 2023 to vary a condition was permitted in May 2023. This is a full application, allowing development to commence towards the beginning of the 5 year period.	Lapsed	Deliverable	0	0	0	9	10	0	0	0	0	0	0	0	19
Banbury	BANBURY 1 - BANBURY CANALSIDE	Canalside	Remainder of the Banbury 1 Allocation	Allocation	This is the remainder of the strategic allocation in the adopted Local Plan 2011-2031 for 700 homes (Banbury 1). Work on the Supplementary Planning Document has been put on hold . This is a developable site as planning permission has yet to be secured. Site to be kept under review through the Draft Local Plan Review. However, at the current time it remains allocated and developable should an application come forward.	Allocation	Developable	0	0	0	0	0	0	0	0	100	100	372	200

Banbury	BANBURY 2 - HARDWICK FARM, SOUTHAM ROAD (EAST AND WEST)	Land West of Southam Road	18/00273/OUT 19/02226/RE M	Allocation Reserved matters	One part of a strategic allocation in the adopted Local Plan 2011-2031 (Banbury 2). Reserved Matters for 90 dwellings is secured by Sanctuary Housing. All conditions discharged. Section 73 application being considered regarding lighting impact during development on ecology but expected to be resolved shortly. Ground works have started on site in 2023 and are continuing. Beechgrove homes are the developer and are advertising the opportunity to purchase the homes.	Granted	Deliverable	90	0	0	45	45	0	0	0	0	0	0	90	

Area	Category	Site name and address	Planning application reference	Permission type (Allocation, Full, Outline, Reserved Matters)	Available and achievable evidence	Scheme status at 01/04/23	Conclusion	Planning Permissions at 31/03/23 minus units built & recorded at 31/03/23 (net)	Completions to 31/03/23 - land supply sites (excludes historic completions)	Projection 23/24	Projection 24/25	Projection 25/26	Projection 26/27	Projection 27/28	Projection 28/29	Projection 29/30	Projection 30/31	Post 2031	Total Completions and Projected Completions to 2031	
Banbury	BANBURY 3 - WEST OF BRETCH HILL	West of Bretch Hill	13/00444/OUT 17/00189/F	Allocation Full	The site is currently under construction by Bloor Homes with the majority of the homes already built. Developer remains on site with no known significant barriers to the remainder of the dwellings being completed.	Under construction	Deliverable	35	445	35	0	0	0	0	0	0	0	0	0	480
Banbury	BANBURY 4 - BANKSIDE PHASE 2	Bankside Phase 2	19/01047/OUT	Allocation Outline	Planning application for 700 dwellings (17/01408/OUT) was received in June 2017. A new application (19/01047/OUT) for a residential development of up to 825 dwellings was approved subject to legal agreement in July 2021. It is assumed that 2 housebuilders will be on site at a peak of 50 homes per year per developer. The expected delivery rates allow sufficient lead-in time for Outline and Reserved Matters approvals and construction time. Five years from the base date is considered sufficient time for the first dwellings to come forward.	-	Deliverable	0	0	0	0	0	0	50	100	100	100	475	350

Banbury	BANBURY 17 - SOUTH OF SALT WAY	South of Salt Way - East	15/01326/OUT 19/00895/RE M	Allocation Reserved matters	Reserved Matters is secured and the site is being developed by David Wilson Homes and Barrett. 131 completions were recorded in 2022/3 and the Council's latest monitoring identifies further completions during 2023/24. Two house builders on site means that the site will be delivered early within the 5 year period. Projection is consistent with build rates on this site and in Banbury generally in recent years.	Under construction	Deliverable	101	179	75	26	0	0	0	0	0	0	0	280
Banbury	BANBURY 17 - SOUTH OF SALT WAY	South of Salt Way - East	21/03639/F	Allocation	Planning application 21/03639/F for a re-plan of the western parcel of 19/00895/REM for 107 dwellings, that is an additional 23 dwellings to the 84 already consented for this part of the site, was approved subject to legal agreement in May 2022. Two house builders on site means that the site will be completed within the 5 year period.	Granted	Deliverable	0	0	0	0	23	0	0	0	0	0	0	23

Area	Category	Site name and address	Planning application reference	Permission type (Allocation, Full, Outline, Reserved Matters)	Available and achievable evidence	Scheme status at 01/04/23	Conclusion	Planning Permissions at 31/03/23 minus units built & recorded at 31/03/23 (net)	Completions to 31/03/23 - land supply sites (excludes historic completions)	Projection 23/24	Projection 24/25	Projection 25/26	Projection 26/27	Projection 27/28	Projection 28/29	Projection 29/30	Projection 30/31	Post 2031	Total Completions and Projected Completions to 2031	
Banbury	BANBURY 17 - SOUTH OF SALT WAY	South of Salt Way - East	14/01932/OUT	Allocation Outline	Outline permission for the 1000 homes is secured. This covers the remaining area of the site which is the majority of the strategic allocation. Reserved matters for two of the development parcels (22/02068/REM) were permitted in April 2023 for 237 dwellings. Reserved matters has also been granted for a spine road (20/03702/REM) and link road (20/03724/REM) serving the school and a foul water pumping station (21/03950/REM). No known delays in developers starting on site, conditions discharged, S106 obligations varied to allow early road construction to facilitate speedier development (21/00653/M106), ground works in place. Infrastructure will be delivered based on the number of occupations meaning that there will be no significant delays in delivering the homes permtted. Persimmon homes are developing the 237 homes in Phases 1 & 3. Discussions are underway on reserve applications for further phases. Charles Church is currently preparing an application (anticipated Dec. '23) for the Phase 2 land (south of Phases 1 & 3 – zoned for 110-122 dwellings). Projection is consistent with build rates on this site and in Banbury generally in recent years. There are two house builders on site. A significant proportion of the site is forecast to be completed within the 5 year period. Developer has indicated that development is likely to be delivered in line with the projection.	Granted	Deliverable	1000	0	50	75	75	100	100	100	100	100	100	300	700
Banbury	BANBURY 18 - DRAYTON LODGE FARM	Drayton Lodge Farm	18/01882/OUT	Allocation Outline	Outline permission for up to 320 dwellings is secured. The site was acquired by Vistry Group which consist of Bovis Homes and Linden Homes in November 2020. Reserved matters application (22/02357/REM) has now been approved in May 2023. Most conditions have now been discharged. Projection is consistent with build rates in Banbury generally in recent years. Developer has estimated that the majority of the site will be built out in 5 year period and they will start on site in early 2024.	Granted	Deliverable	320	0	0	50	50	75	75	70	0	0	0	320	

[illegible]

[illegible]

Area	Category	Site name and address	Planning application reference	Permission type (Allocation, Full, Outline, Reserved Matters)	Available and achievable evidence	Scheme status at 01/04/23	Conclusion	Planning Permissions at 31/03/23 minus units built & recorded at 31/03/23 (net)	Completions to 31/03/23 - land supply sites (excludes historic completions)	Projection 23/24	Projection 24/25	Projection 25/26	Projection 26/27	Projection 27/28	Projection 28/29	Projection 29/30	Projection 30/31	Post 2031	Total Completions and Projected Completions to 2031	
Bicester	BICESTER 1 - NORTH WEST BICESTER	North West Bicester Eco-Town Exemplar Project	19/01036/HYB RID Mixed use centre	Allocation Hybrid	Full planning permission for 16 flats above the local centre units is secured. The Council's latest monitoring information shows that construction of the local centre units has started. Delivery is currently expected in 2024.	Granted	Deliverable	16	0	0	16	0	0	0	0	0	0	0	0	16
Bicester	BICESTER 1 - NORTH WEST BICESTER	North West Bicester Eco-Town Exemplar Project	21/01227/F Elmsbrook phase 4 partial replan	Allocation Full	This is a partial re-plan of the western part of phase 4 and proposes an additional 3 dwellings to the 54 originally approved on this part of the site under 10/01780/HYBRID. The site is being developed by Crest Nicholson and the Council's latest monitoring information shows that the site is almost complete.	Under construction	Deliverable	25	32	25	0	0	0	0	0	0	0	0	57	
Bicester	BICESTER 1 - NORTH WEST BICESTER	North West Bicester Phase 2	14/02121/OUT	Allocation Outline	Outline planning permission for 1700 homes on land to the north of Middleton Stoney Road, forming part of the wider North West Bicester strategic allocation was secured by P3EcoLtd on 30 January 2020. A Reserved Matters application (21/02339/REM) for 500 of the 1700 homes (forming phase 1) was submitted on behalf of Countryside Properties in July 2021 and was subsequently withdrawn. Applications continue to be submitted for Discharge of Conditions (including Phasing Plan and Design Code) and Reserved Matters for access arrangements, road layouts and a first residential phase of 123 dwellings (23/00214/REM, 23/00170/REM, 23/01493/REM and 23/01586/REM and 23/00207/DISC, 23/01496/DISC and 23/01558/DISC). The active engagement between developer (Cala homes) and Council relating to delivery of Reserved Matters are separate to restrictions imposed by infrastructure delivery as 500 dwellings are permitted on the site for 1700 dwellings prior to strategic infrastructure needing to be in place. Cala homes have submtted a phasing plan which indicates development will start in 2024. Due to the absence of reserved matters permission the site will not deliver homes before 2026/27.	Granted	Deliverable	1700	0	0	0	0	50	50	50	50	50	1450	250	

Area	Category	Site name and address	Planning application reference	Permission type (Allocation, Full, Outline, Reserved Matters)	Available and achievable evidence	Scheme status at 01/04/23	Conclusion	Planning Permissions at 31/03/23 minus units built & recorded at 31/03/23 (net)	Completions to 31/03/23 - land supply sites (excludes historic completions)	Projection 23/24	Projection 24/25	Projection 25/26	Projection 26/27	Projection 27/28	Projection 28/29	Projection 29/30	Projection 30/31	Post 2031	Total Completions and Projected Completions to 2031	
Bicester	BICESTER 1 - NORTH WEST BICESTER	North West Bicester Phase 2 (Remainder)	17/00455/HYB RID 21/01630/OUT 21/04275/OUT Hawkwell Village	Allocation Outline	Outline application 14/01675/OUT for employment development and 150 dwellings on land to the south west of the railway line was allowed at appeal in November 2017. Application 17/00455/HYBRID for highways and residential development (150 dwellings), submitted on behalf of Albion Land was approved on 7 August 2017. Application for employment uses (21/3177/F) was approved in July 2022. Employment development has been built in the south east corner of the north west Bicester site. Application 14/01641/OUT for 900 dwellings was approved subject to legal agreement in October 2015. Application made by Hallam land management in December 2021 for 3100 homes but has yet to be determined. To support NW Bicester, 2 bridges were installed under the railway at the start of April 2021. The delivery of roads is to follow and work is ongoing to resolve any funding gaps. The Council is working closely with the promoters of the site and other agencies to move the site forward and provide the necessary infrastructure and funding to unlock the remaining phases. However, this site can only be considered developable at this stage. Part of the wider site granted at appeal for 530 dwellings in July 2023 could also be delivered prior to strategic infrastructure being in place and there is some prospect that this could see delivery starting within 5 years.		Developable	0	0	0	0	0	0	0	0	50	50	50	3738	150
Bicester	BICESTER 2 - GRAVEN HILL	Graven Hill	16/01802/OUT Outline remainder	Allocation Outline	Outline application has lapsed meaning that dwellings are not expected to be delivered during the 5 year period.	Lapsed	Developable	0	0	0	0	0	0	0	0	50	50	50	945	150
Bicester	BICESTER 2 - GRAVEN HILL	Graven Hill	20/02345/LDO (expired) 20/02345/LDO Local Development Order variuos confirmations of compliance 22/02312/RE M	Allocation Local Development Order	A revised Local Development Order for 276 plots was adopted in November 2020 which, along with 17/02107/LDO (now expired), helped facilitate the delivery of initial self-build dwellings on the site. This is a self-build development with primarily 1 housebuilder. Several of these plots are now under construction. The current LDO will remain in force until December 2023. Existing permissions expected to be delivered over the next 5 year period based on past site delivery rates and some short term uncertainty on delivery mechanisms.	Under construction	Deliverable	141	135	25	25	25	25	41		0	0	0	276

## **Context to the Cherwell Local Plans Infrastructure Update 2023 (01/04/2022 – 31/03/2023)**

Infrastructure is an essential part of sustainable development supporting increased housing provision and economic growth, mitigating against climate change and facilitating improved quality of life within communities.

The Infrastructure Delivery Plan (IDP) contains the infrastructure required to support Cherwell Local Plan Part 1 adopted in July 2015 and it is set out in Appendix 8 of the Plan.

The Cherwell Local Plan Partial Review was adopted in September 2020. It is a focused Plan addressing Cherwell's apportionment of Oxford's unmet housing needs in the southern part of Cherwell. The infrastructure required to support the Local Plan Partial Review is detailed in Appendix 4 of that Plan.

The IDP and Infrastructure Schedule are live documents adjusted overtime to reflect changes in circumstance and strategies alongside the yearly monitoring of both Plans and infrastructure Policies INF1 and PR11 Infrastructure Delivery.

The Infrastructure Update, December 2023 reports on both Local Plans. It lists schemes for Bicester, Banbury, Kidlington and Rural areas identified by infrastructure providers to support the Plans' proposals. It follows from the previous update published in February 2022 and covers the Annual Monitoring Report (AMR) period: 1 April 2022 to 31 March 2023.

It includes adjusted phasing periods to reflect project updates as the plan period progresses and projects are completed: short term 2021-2025, medium term 2025-2029 and long term 2029-2031.

The Update provides a renumbering of schemes following completion of numerous infrastructure projects to date.

The infrastructure tables include information on known schemes, their main aim, priority, phasing, delivery partners, costs, delivery status and links to the local plan policies including site policies. This helps monitoring the delivery of the Local Plans and guide infrastructure investment over the adopted Plan periods to 2031. The information could assist prospective developers identifying potential planning obligations but does not confine negotiations at development management level for specific development proposals.

Section 1 of the Infrastructure Update shows all known scheme completions and new projects since the first publication of the LP 2015 IDP and LPPR 2020 Infrastructure Schedule as well as schemes which have undergone substantial changes. Schemes completed or added new in this monitoring period are shaded grey for ease of reference. The summary tables also show pipeline projects, those known to be at early project development stage. These pipeline projects are not part of the IDP or Infrastructure Schedule but could be included in future updates subject to their progression as part of infrastructure providers' plans and programmes.

Section 2 contains the infrastructure tables for both Plans' areas, updated to include changes to existing infrastructure schemes and new schemes to be delivered to 2031.

More detailed information on infrastructure provision will arise through the progression of new Local Plans and Neighbourhood Plans. This includes the emerging Local Plan Review 2040.

## **Section 1 – Infrastructure Update 2023 Summary Tables**

1.1 IDP Update Bicester Projects				
No. Project	BICESTER Projects	Main aim	Priority Critical Necessary Desirable	Update
Transport and movement				
2a (New)	Bicester North Station Forecourt - Parking Capacity Improvements	Supporting economic growth and new homes with better access to the national rail network.	Necessary	Upper deck of car park is life expired, survey work commissioned with a view to agreeing a work programme in 2024. Potential options for additional parking on adjacent land being explored.
Comp (3)	Charbridge Lane crossing- Conversion of current level crossing of A4144 Bicester eastern perimeter road with Oxford- Bletchley Railway line into grade separated overbridge.	Supporting economic growth and new homes with better access to the national rail network.	Critical	Project complete
Comp (9d)	Improvements to A41 corridor: Ploughley Road junction with the A41 – signalisation.	Improvements to strategic highways capacity To improve journey time reliability and traffic flow while improving access for all forms of transport.	Necessary	Project complete
Comp (13)	Pioneer Roundabout.	To improve journey time reliability and traffic flow while improving access for all forms of transport.	Necessary	Scheme complete
Comp (14a)	Park & Charge infrastructure at Cattle Market and Claremont Car Parks	To reduce pollution from road traffic.	Desirable	Project complete
Education				
No new projects or completions				
Utilities				
Comp (30a)	Bicester STW Upgrade.	Ensure utilities infrastructure grows at the same rate as communities.	Critical	Upgrades to Bicester STW completed in 2022, providing increased treatment capacity, reducing the need for untreated discharges in wet weather.
Flood risk				
No new projects or completions				
Emergency and rescue services				
No new projects or completions				
Health				
No new projects or completions				

## 1.1 IDP Update Bicester Projects

No. Project	BICESTER Projects	Main aim	Priority Critical Necessary Desirable	Update
<b>Community Infrastructure</b>				
45 (New)	Expansion and operation of the Museum Resource Centre at Standlake	To provide sufficient storage for archeological finds from development and ensure its safekeeping	Necessary	TBC
<b>Open space, recreation and biodiversity</b>				
Comp (48a)	Elmsbrook Forest School/Pocket Park.	Provision of open space and green infrastructure to meet Eco Town standards.	Necessary	Project delivered
Comp (55)	Dangerfields/Kings End Conservation Area/Shakespeare Drive Access improvements (including board walk) and potential for nature and habitat projects.	To improve the management of habitat/green spaces and the connection of people with nature.	Desirable	Project delivered
Comp (58)	North West Bicester Nature Reserve.	Enhance natural environment by maximising opportunities for improving biodiversity; including maintenance, restoration and creation of s41 NERC Act habitats; opportunities for green infrastructure improvements along watercourse.	Desirable	Project delivered
60 (New)	Enhancement of Local Wildlife sites	Restoration, maintenance and new habitat creation associated with Local Wildlife Sites. The network of local wildlife sites is vital to sustaining populations of the UK's wildlife, and appropriate land management is often essential to enable this wildlife to survive and flourish.	Necessary	New project to meet the objectives of the Local Nature Recovery Strategy being developed by Oxfordshire County Council.

1.2 IDP Update Banbury Projects				
No. Project	BANBURY Projects	Main aim	Priority Critical Necessary Desirable	Update
Transport and movement				
Comp (22)	Cycle route improvements at Waterloo Drive, between Fraser Close and Middleton Road.	Improving cycling and walking routes Provide sustainable movement routes for pedestrians and cyclists.	Desirable	Scheme complete
Education				
Comp (31)	Expansion of William Morris Primary School by 35 places (to serve Warwick Rd & Bretch Hill and Drayton Lodge Farm).	Expand the schools and colleges provision to match the needs of residents and businesses.	Critical	Scheme complete
Utilities				
35 (New)	Banbury Sewage Treatment works upgrade programme to increase capacity from 266 to 490 liters per second, reducing the need for untreated discharges in wet weather and providing a higher quality of treated effluent going to watercourses.	Ensure utilities infrastructure grows at the same rate as communities.	Critical	Work is planned to be completed during the 2025-2030 regulatory period.
Flood risk				
No new projects or completions				
Emergency and rescue services				
No new projects or completions				
Health				
No new projects or completions				
Community Infrastructure				
60 (New)	Expansion and operation of the Museum Resource Centre at Standlake	To provide sufficient storage for archeological finds from development and ensure its safekeeping	Necessary	TBC
Open space, recreation and biodiversity				
77 (New)	Enhancement of Local Wildlife sites	Restoration, maintenance and new habitat creation associated with Local Wildlife Sites. The network of local wildlife sites is vital to sustaining populations of the UK's wildlife, and appropriate land management is often essential to enable this wildlife to survive and flourish.	Necessary	New project to meet the objectives of the Local Nature Recovery Strategy being developed by Oxfordshire County Council.

1.3 IDP Update Kidlington and Rural Areas Projects				
No. Project	Kidlington and Rural Areas Projects	Main aim	Priority Critical Necessary Desirable	Update
<b>Transport and movement</b>				
Comp (6)	A34 on-slip improvements to the Pear Tree and Botley junction interchanges to the immediate south of the district.	Support delivery of strategic development with sufficient upgrades to road and active travel infrastructure.	Desirable	A scheme of various highway improvements on the Botley Road corridor was completed in 2023. No further phases of work planned.
<b>Education</b>				
No new projects or completions				
<b>Utilities</b>				
No new projects or completions				
<b>Flood risk</b>				
No new projects or completions				
<b>Emergency and rescue services</b>				
No new projects or completions				
<b>Health</b>				
No new projects or completions				
<b>Community Infrastructure</b>				
38 (New)	Reconfiguration and refurbishment of Kidlington Library to provide additional capacity for growth	Ensure social infrastructure grows at the same rate as communities and there are opportunities for culture and leisure.	Necessary	TBC
39 (New)	Expansion and operation of the Museum Resource Centre at Standlake	To provide sufficient storage for archeological finds from development and ensure its safekeeping	Necessary	TBC
<b>Open space, recreation and biodiversity</b>				
62 (New)	Enhancement of Local Wildlife sites	Restoration, maintenance and new habitat creation associated with Local Wildlife Sites. The network of local wildlife sites is vital to sustaining populations of the UK's wildlife, and appropriate land management is often essential to enable this wildlife to survive and flourish.	Necessary	New project to meet the objectives of the Local Nature Recovery Strategy being developed by Oxfordshire County Council.

## 1.4 LPPR Oxford Unmet Needs

No.	Projects	Main aim	Priority Critical Necessary Desirable	Update
<b>Transport and movement</b>				
6d (New)	Bus service improvement to Eastern Arc	Reduce the proportion and overall number of car journeys and help deliver the transport changes provided for by the Oxford Transport Strategy.	Critical	Financial contributions to support public transport connectivity between PR6/7 sites and Eastern Arc – notably major employment sites – are being sought.
<b>Education</b>				
No new projects or completions				
<b>Utilities</b>

GB1	Saved Policy of the Central Oxfordshire Local Plan (Cherwell) 1992 - Development in the Green Belt	replaced	ESD 14	Yes
H2	Saved Policy of the Oxfordshire Structure Plan 2005 - Upper Heyford	replaced	Villages 5	Yes

## **Appendices**

### **Appendix 5: Adopted Local Plan 2011-2031 Part 1 Monitoring Framework**

## Appendix 5: Adopted Local Plan 2011-2031 Monitoring Framework

### A Strategy for Development in Cherwell

Policy Reference	Policy Title	Local Plan Indicators	Target
PSD 1	Presumption in favour of Sustainable Development	Monitoring of PSD1 is undertaken by Sustainability Indicators	Monitoring of PSD1 is undertaken by Sustainability Indicators

### Policies for Development in Cherwell

#### Theme One: Policies for Developing a Sustainable Local Economy

Policy Reference	Policy Title	Local Plan Indicators	Target
SLE 1	Employment Development	Employment commitments and completions on allocated employment land per sub area (Banbury, Bicester, Kidlington, Rural Areas)	100% take up of allocations by the end of the plan period
SLE 1	Employment Development	Employment commitments and completions on non-allocated employment land per sub area (Banbury, Bicester, Kidlington, Rural Areas)	Yearly increase in employment use class commitments and completions
SLE 1	Employment Development	Completions resulting in a loss of employment use to non employment use per sub area (Banbury, Bicester, Kidlington, Rural Areas)	No overall net loss of employment land
SLE 2	Securing Dynamic Town Centres	Town centre use (including use classes A1-A5, B1a, D2) completions within and outside of each of the town centres	No net loss of town centre use floor space within town centres
SLE 2	Securing Dynamic Town Centres	No. of retail impact assessments submitted with planning applications	100% of applications over the thresholds set out in Policy SLE2
SLE 3	Supporting Tourism Growth	Completed tourism developments (including D use class uses, Sui Generis uses)	An annual increase in completed tourism developments over the plan period
SLE 3	Supporting Tourism Growth	Number of visitors to tourist attractions in the District	An annual increase over the plan period
SLE 3	Supporting Tourism Growth	Number of visitors to tourist attractions in the District	An annual increase over the plan period

SLE 4	Improved Transport and Connections	Completed transport improvement schemes	Timely provision of transport infrastructure in accordance with strategic site delivery and as set out in the IDP
SLE 4	Improved Transport and Connections	Developer contributions to transport infrastructure	To meet development needs, as set out in the IDP
SLE 5	High Speed Rail 2 – London to Birmingham	Level of Council involvement with the proposed High Speed Rail Link	Respond to all relevant Government consultations on HS2  Respond to all planning applications relating to HS2.

## Theme Two: Policies for Building Sustainable Communities

Policy Reference	Policy Title	Local Plan Indicators	Target
BSC 1	District Wide Housing distribution	Housing commitments and completions per sub area (Banbury, Bicester, Kidlington, rural areas)	As set out in Policy BSC1
BSC 2	The Effective and Efficient Use of Land	% of residential completions on previously developed land	As set out in Policy BSC2
BSC 2	The Effective and Efficient Use of Land	Net housing density of completions	As set out in Policy BSC2
BSC 3	Affordable Housing	Net affordable housing completions/acquisitions per tenure	As set out in Policy BSC3
BSC 3	Affordable Housing	No. of self-build completions	An annual increase in the number of self-build completions
BSC 4	Housing Mix	Number of completed dwellings per number of bedrooms	As set out in Policy BSC4
BSC 4	Housing Mix	Number of 'extra care' completions	As set out in Policy BSC4
BSC 5	Area Renewal	Completed development per type in the 'area of renewal'	Improvements in levels of deprivation in the District
BSC 5	Area Renewal	The 'Brighter Futures in Banbury' Performance Measures Package Reports	Positive trends across all the Programme's indicators
BSC 6	Travelling Communities	Completed/Lost Gypsy & Traveller Plots/Travelling Showpeople Pitches, by location (location criteria as set out in Policy BSC6)	Provision for new pitches to meet identified shortfall as set out in Policy BSC6

BSC 7	Meeting Education Needs	Completed education infrastructure	Timely provision of education infrastructure in accordance with strategic site delivery and as set out in the IDP
BSC 7	Meeting Education Needs	Developer contributions to education infrastructure	To meet development needs, as set out in the IDP
BSC 8	Securing Health and Well Being	Completed health care infrastructure	Timely provision of health infrastructure in accordance with strategic site delivery and as set out in the IDP
BSC 8	Securing Health and Well Being	Developer contributions to health care infrastructure	To meet development needs, as set out in the IDP
BSC 8	Securing Health and Well Being	Completions at Bicester Community Hospital	Replacement of Bicester Community Hospital within the plan period
BSC 9	Public Services and Utilities	Completed public services/utilities infrastructure	Timely provision of public services/utilities infrastructure in accordance with strategic site delivery and as set out in the IDP
BSC 9	Public Services and Utilities	Developer contributions to public services/utilities	To meet development needs, as set out in the IDP
BSC 10	Open Space, Outdoor Sport & Recreation Provision	Amount, type and location of open space/sport/recreation facilities	No net loss of open space/outdoor sport/recreation sites
BSC 10	Open Space, Outdoor Sport & Recreation Provision	Areas deficient in recreation provision by type and amount	Annual improvements over the plan period
BSC 10	Open Space, Outdoor Sport & Recreation Provision	Completed built development on (former) sites of open space, outdoor sport and recreation	No net loss of open space/outdoor sport/recreation sites
BSC 10	Open Space, Outdoor Sport & Recreation Provision	Open spaces in the District meeting quality standards	A yearly improvement in the quality of sites/facilities
BSC 11	Local Standards of Provision - Outdoor Recreation	Developer contributions to open space/sport/recreation facilities per typology	As set out in policy BSC11
BSC 12	Indoor Sport, Recreation and Community	Developer contributions to open space/sport/recreation facilities per typology	As set out in policy BSC12

	Facilities		
BSC 12	Indoor Sport, Recreation and Community Facilities	Completed community facilities infrastructure	As set out in policy BSC12

### Theme Three: Policies for Ensuring Sustainable Development

Policy Reference	Policy Title	Local Plan Indicators	Target
ESD 1	Mitigating and Adapting to Climate Change	Carbon emissions in the District per capita	Reductions over the plan period
ESD 1	Mitigating and Adapting to Climate Change	Permissions granted contrary to Environment Agency advice on Flood Risk grounds	No permissions granted contrary to EA advice on flood risk grounds
ESD 1	Mitigating and Adapting to Climate Change	Access to services and facilities by public transport, walking and cycling	Improvement over the plan period, linked to Oxfordshire LAA target (National Indicator 175)
ESD 2	Energy Hierarchy	Number of Energy Statements submitted	As set out in Policy ESD2 i.e. required for all major applications
ESD 3	Sustainable Construction	% of new dwellings completed achieving water use below 110 litres/person/day	As set out in Policy ESD3
ESD 3	Sustainable Construction	Completed non residential development achieving BREEAM Very Good, BREEAM Excellent	As set out in Policy ESD3
ESD 4	Decentralised Energy Systems	Number of District Heating Feasibility Assessments submitted	As set out in Policy ESD4 i.e. required for all applications for 100 dwellings or more
ESD 4	Decentralised Energy Systems	Number of permitted District heating schemes in the District	Increase over the plan period
ESD 5	Renewable Energy	Permitted renewable energy capacity per type	Increase over the plan period
ESD 6	Sustainable Flood Risk Management	Permissions granted contrary to Environment Agency advice on flood risk grounds	No permissions granted contrary to EA advice on flood risk grounds
ESD 6	Sustainable Flood Risk Management	Flood Risk Assessments received for development proposals within Flood Zones 2 & 3, within 1 ha of Flood Zone 1, or 9m of any watercourse	As set out in Policy ESD6 i.e. required for all proposals meeting the locational criteria
ESD 7	Sustainable Drainage	Completed SuDS schemes in the District	Annual increase over the plan period

	Systems (SuDS)		
ESD 8	Water Resources	Number of permissions granted contrary to Environment Agency advice on water quality grounds	No permissions granted contrary to EA advice on water quality grounds
ESD 9	Protection of the Oxford Meadows SAC	Number of permissions granted contrary to consultee (Environment Agency, BBOWT, CDC/OCC etc) advice on water quality grounds within the SAC catchment	No permissions granted contrary to consultee (EA, BBOWT, CDC/OCC etc) advice on water quality grounds within the SAC catchment
ESD 10	Protection and Enhancement of Biodiversity and the Natural Environment	Total LWS/LGS area	A net gain in total areas of biodiversity importance in the District
ESD 10	Protection and Enhancement of Biodiversity and the Natural Environment	Changes in priority habitats by number & type	An annual increase over the plan period
ESD 10	Protection and Enhancement of Biodiversity and the Natural Environment	Changes in priority species by number & type	A net gain in priority species by number and type
ESD 10	Protection and Enhancement of Biodiversity and the Natural Environment	Ecological condition of SSSIs	100% of SSSI units in favourable or unfavourable recovering condition
ESD 10	Protection and Enhancement of Biodiversity and the Natural Environment	Distribution and status of farmland birds	A yearly increase in the District index of farmland bird presence
ESD 10	Protection and Enhancement of Biodiversity and the Natural Environment	Distribution and status of water voles	A yearly increase in the presence of water voles
ESD 10	Protection and Enhancement of Biodiversity and the Natural Environment	Permissions granted contrary to tree officer advice	No permissions granted contrary to tree officer advice
ESD 10	Protection and	Permissions granted contrary to	No permissions granted

	Enhancement of Biodiversity and the Natural Environment	biodiversity consultee advice	contrary to biodiversity consultee advice
ESD 10	Protection and Enhancement of Biodiversity and the Natural Environment	Number of Ecological Surveys submitted with applications	Ecological Surveys to accompany all planning applications which may affect a site, habitat or species of known or potential ecological value
ESD 10	Protection and Enhancement of Biodiversity and the Natural Environment	Local Sites in Positive Conservation Management	A net gain in Local Sites in Positive Conservation Management
ESD 11	Conservation Target Areas	Total amount of Natural Environment and Rural Communities (NERC) Act s41 Habitats of Principal Importance within active Conservation Target Areas (CTAs)	A net gain of relevant NERC Act Habitats in active CTAs within the District
ESD 11	Conservation Target Areas	Permissions granted in Conservation Target Areas contrary to biodiversity consultee advice	No permissions granted in Conservation Target Areas contrary to biodiversity consultee advice
ESD 12	Cotswolds AONB	Built development permitted in the AONB	No major development in AONB
ESD 12	Cotswolds AONB	Permissions granted contrary to the advice of the AONB Management Board	No permissions granted contrary to the advice of the AONB Management Board
ESD 13	Local Landscape Protection and Enhancement	Number and location of urban fringe restoration/improvement schemes completed	An annual increase over the plan period
ESD 13	Local Landscape Protection and Enhancement	Permissions granted contrary to Landscape Officer advice	No permissions granted contrary to Landscape Officer advice
ESD 14	Oxford Green Belt	Completed development (per type) in the Green Belt	All development in Green Belt to comply with Policy ESD14
ESD15	The Character of the Built Environment	Permissions granted contrary to the advice of English Heritage/consultee advice on heritage grounds	All development impacting on non designated/designated heritage assets to comply with ESD15
ESD15	The Character of the Built Environment	Permissions granted contrary to design consultee advice on design grounds	No permissions granted contrary to design consultee advice on design

			grounds
ESD15	The Character of the Built Environment	% of permitted and completed developments with Design and Access Statements (that address the criteria of policy ESD15).	All new developments to complete a Design and Access Statement
ESD15	The Character of the Built Environment	Number of new (and reviews of) conservation area appraisals	Review 6 Conservation Areas annually
ESD16	The Oxford Canal	Completed transport/recreation/leisure/tourism uses within 1km of the Oxford Canal	Increase over the plan period
ESD16	The Oxford Canal	Permissions granted contrary to consultee advice on heritage grounds	No permissions granted contrary to consultee advice on heritage grounds
ESD17	Green Infrastructure	Completed green infrastructure schemes	A net gain in green infrastructure provision over the plan period
ESD17	Green Infrastructure	Developer contributions to green infrastructure	To meet development needs and as identified in IDP/Green Infrastructure Strategy

### Policies for Cherwell's Places Bicester

Policy Reference	Policy Title	Local Plan Indicators	Target
Bicester 1	North West Bicester Eco-Town	Housing, infrastructure, employment completions at North West Bicester	As set out in policy Bicester 1 (and agreed masterplan/detailed planning documents)
Bicester 1	North West Bicester Eco-Town	Environmental standards of completed development at NW Bicester	As set out in policy Bicester 1
Bicester 1	North West Bicester Eco-Town	Embodied impacts of construction to be monitored, managed and minimised	As set out in policy Bicester 1
Bicester 1	North West Bicester Eco-Town	Sustainability metrics to be agreed and monitored	As set out in policy Bicester 1
Bicester 2	Graven Hill	Housing, infrastructure, and employment completions at Graven Hill	As set out in policy Bicester 2 (and agreed masterplan/detailed planning documents)
Bicester 3	South West Bicester Phase 2	Housing and infrastructure completions at South West	As set out in policy Bicester 3 (and agreed

		Bicester Phase 2	masterplan/detailed planning documents)
Bicester 4	Bicester Business Park	Completed employment development at Bicester Business Park	As set out in policy Bicester 4 (and agreed masterplan/detailed planning documents)
Bicester 5	Strengthening Bicester Town Centre	Permitted residential development at ground floor level in Bicester Town Centre	No residential floorspace permitted at ground floor level
Bicester 5	Strengthening Bicester Town Centre	Town centre vacancies	No increase in vacancy rates over the plan period
Bicester 5	Strengthening Bicester Town Centre	Diversity of uses	Maintain or improve the balance of uses within the town centre over the plan period
Bicester 5	Strengthening Bicester Town Centre	Completed town centre uses (including use classes A1-A5, B1a, D2) within and outside of Bicester Town Centre	No net loss of town centre use floorspace within Bicester Town Centre
Bicester 6	Bure Place Town Centre Redevelopment Phase 2	Completions (plot level) at Bicester Town Centre Phase 1 & 2	Development to accord with Policy BIC6 and agreed masterplan/detailed planning documents for the site
Bicester 7	Meeting the Need for Open Space, Sport & Recreation	Urban edge park schemes in Bicester	An annual increase in such schemes over the plan period
Bicester 7	Meeting the Need for Open Space, Sport & Recreation	Community woodland provision in Bicester	An annual increase in provision over the plan period
Bicester 7	Meeting the Need for Open Space, Sport & Recreation	Type of permitted/completed development at Stratton Audley Quarry	In accordance with a planning consent
Bicester 8	Former RAF Bicester	Completed development at former RAF Bicester	Development to accord with any agreed masterplan/detailed planning documents
Bicester 9	Burial Site Provision in Bicester	Developer contributions for Burial Site in Bicester	To meet needs and as set out in IDP
Bicester 10	Bicester Gateway	Employment and infrastructure completions at Bicester Gateway site	As set out in Policy Bicester 10 (and agreed masterplan/detailed planning documents)
Bicester 11	Employment Land at North East Bicester	Employment and infrastructure completions at Employment	As set out in Policy Bicester 11 (and agreed

		Land at North East Bicester	masterplan/detailed planning documents)
Bicester 12	South East Bicester	Employment, housing and infrastructure completions at South East Bicester	As set out in Policy Bicester 12 (and agreed masterplan/detailed planning documents)
Bicester 13	Gavray Drive	Housing and infrastructure completions at Gavray Drive	As set out in policy Bicester 13 (and agreed masterplan/detailed planning documents)

## Policies for Cherwell's Places

### Banbury

Policy Reference	Policy Title	Local Plan Indicators	Target
Banbury 1	Banbury Canalside	Employment, housing and infrastructure completions at Canalside	As set out in Policy Banbury 1 and Canalside SPD (i.e. masterplan/detailed planning documents)
Banbury 1	Banbury Canalside	Progress on completing the Canalside Supplementary Planning Document	As set out in an up to date Local Development Scheme
Banbury 2	Hardwick Farm, Southam Road (East and West)	Housing and infrastructure completions at Southam Road	As set out in Policy Banbury 2 (and agreed masterplan/detailed planning documents)
Banbury 3	West of Bretch Hill	Employment, housing and infrastructure completions at West of Bretch Hill	As set out in Policy Banbury 3 (and agreed masterplan/detailed planning documents)
Banbury 4	Bankside Phase 2	Housing and infrastructure completions at Bankside Phase 2	As set out in Policy Banbury 4 (and agreed masterplan/detailed planning documents)
Banbury 5	Land North of Hanwell Fields	Housing and infrastructure completions at Land North of Hanwell Fields	As set out in Policy Banbury 5 (and agreed masterplan/detailed planning documents)
Banbury 6	Employment Land West of the M40	Employment and infrastructure completions at Land West of the M40	As set out in policy Banbury 6 (and agreed masterplan/detailed planning documents)
Banbury 7	Strengthening Banbury Town Centre	Permitted residential development at ground floor level in Banbury Town Centre	No residential floorspace permitted at ground floor level

Banbury 7	Strengthening Banbury Town Centre	Town centre vacancies	No increase in vacancy rates over the plan period
Banbury 7	Strengthening Banbury Town Centre	Diversity of uses	Maintain or improve the balance of uses over the plan period
Banbury 7	Strengthening Banbury Town Centre	Completed town centre uses (including use classes A1-A5, B1a, D2) within and outside of Banbury Town Centre	No net loss of town centre use floorspace within Banbury Town Centre
Banbury 8	Bolton Road Development Area	Housing, Retail and Leisure Completions on the Bolton Road site	In accordance with Policy Banbury 8 and the Masterplan/detailed planning documents for the site
Banbury 9	Spiceball Development Area	Completions at the Spiceball Development Area	In accordance with Policy Banbury 9 and the Masterplan/detailed planning documents for the site
Banbury 10	Bretch Hill Regeneration Area	Completed development in the Brech Hill Regeneration Area by type	Increase over the plan period
Banbury 11	Meeting the Need for Open Space, Sport & Recreation	Completed open space/sport/recreation facility provision within Banbury	As set out in Policy BSC10 and BSC11
Banbury 12	Meeting the Need for Open Space, Sport & Recreation	Completions at the relocation site for Banbury United FC	As set out in policy Banbury 12, to be achieved over the plan period
Banbury 13	Burial Site Provision in Banbury	Developer contributions for Burial Site in Banbury	To meet needs and as set out in the IDP
Banbury 14	Cherwell Country Park	Progress on delivering the Cherwell Country Park	As set out in Policy Banbury 11
Banbury 15	Employment Land North East of Junction 11	Employment and infrastructure completions at Employment Land North East of Junction 11	As set out in policy Banbury 15 (and agreed masterplan/detailed planning documents)
Banbury 16	Land South of Salt Way: West	Housing and infrastructure completions at Land at South of Salt Way: West	As set out in policy Banbury 16 (and agreed masterplan/detailed planning documents)
Banbury 17	Land South of Salt Way: East	Housing and infrastructure completions at Land at South of Salt Way: East	As set out in policy Banbury 17 (and agreed masterplan/detailed planning documents)
Banbury	Land at Drayton	Housing and infrastructure	As set out in policy Banbury 18

18	Lodge Farm:	completions at Land at Drayton Lodge Farm	(and agreed masterplan/detailed planning documents)
Banbury 19	Land at Higham Way	Housing and infrastructure completions at Land at Higham Way	As set out in policy Banbury 19 (and agreed masterplan/detailed planning documents)

### Policies for Cherwell's Places Kidlington

Policy Reference	Policy Title	Local Plan Indicators	Target
Kidlington 1	Accommodating High Value Employment Needs	Employment completions in Kidlington (at a. Langford Lane/London-Oxford Airport and b. Begbroke Science Park)	An annual increase over the plan period
Kidlington 1	Accommodating High Value Employment Needs	Completed employment development on Green Belt land in Kidlington beyond review areas	To accord with Policy ESD14
Kidlington 2	Strengthening Kidlington Village Centre	Permitted residential development at ground floor level in Kidlington Village Centre	No residential floorspace permitted at ground floor level
Kidlington 2	Strengthening Kidlington Village Centre	Village centre vacancies	No increase in vacancy rates over the plan period
Kidlington 2	Strengthening Kidlington Village Centre	Diversity of uses	Maintain or improve the balance of uses within the town centre over the plan period
Kidlington 2	Strengthening Kidlington Village Centre	Completed town centre uses (including use classes A1-A5, B1a, D2) within and outside of Kidlington Village Centre	No net loss of town centre use floorspace within Kidlington Village Centre

### Policies for Cherwell's Places Our Villages and Rural Areas

Policy Reference	Policy Title	Local Plan Indicators	Target
Villages 1	Village Categorisation	Completed development per village category and size of scheme (number of dwellings)	As set out in policy Villages 1
Villages 2	Distributing Growth Across the Rural Areas	Land allocations made in the rural areas	As set out in policy Villages 2 and to be set out in the Local Plan Part 2.

Villages 2	Distributing Growth Across the Rural Areas	Completions on allocated sites in rural areas	100% take up of allocations over the plan period
Villages 2	Distributing Growth Across the Rural Areas	Completions on non-allocated sites in rural areas	As set out in the criteria in policy Villages 1 and 2
Villages 3	Rural Exception Sites	Completions on rural exception sites	To meet needs as per Policy Villages 3
Villages 4	Meeting the Need for Open Space, Sport & Recreation	Developer contributions to open space/sport/recreation facilities in the rural areas	As set out in policy BSC11 and BSC12 and the Infrastructure Delivery Plan
Villages 4	Meeting the Need for Open Space, Sport & Recreation	Open space/sport/recreation facilities created in the rural areas	As set out in policy Villages 4, BSC11, BSC12 and the Infrastructure Delivery Plan
Villages 5	Former RAF Upper Heyford	Housing, employment and infrastructure completions at Former RAF Upper Heyford	As set out in policy Villages 5, and agreed masterplan/detailed planning documents

### The Infrastructure Delivery Plan

Policy Reference	Policy Title	Local Plan Indicators	Target
INF 1	Infrastructure	Projects provided to date in the Infrastructure Delivery Plan	Key infrastructure to be delivered in accordance with the Infrastructure Delivery Plan

### Duty to Cooperate

Reference	Title	Local Plan Indicators	Target
DTC 1	Duty to cooperate – Partial Review of the Cherwell Local Plan Part 1	Meet milestones for Partial Review of the Cherwell Local Plan Part 1 as set out in the Local Development Scheme (Nov 2014)	Adoption of a Partial Review of the Cherwell Local Plan 2011-31 Part 1 addressing wider unmet need within the housing market area within 2 years of Local Plan Part 1 adoption.

## **Appendices**

### **Appendix 6: Adopted Local Plan 2011-2031 (Part 1) Partial Review Monitoring Framework**

## Appendix 6 – Monitoring Framework

### Plan Monitoring Schedule

Policy Reference	Policy Title	Local Plan Indicators	Targets
PR1	Achieving Sustainable Development for Oxford's Needs	<p>4,400 homes – commitments and completions</p> <p>Delivering the Vision, objectives and Policies in the Plan</p> <p>Delivery of the Infrastructure Schedule and Infrastructure Plan requirements</p>	<p>Deliver the requirements of Policy PR1:</p> <p>Sites delivered by 2031</p> <p>Delivery of Infrastructure requirements</p>
PR2	Housing Mix, Tenure and Size	<p>Net affordable housing completions/acquisitions per tenure, mix and size that specifically meet the needs of Oxford City.</p> <p>-80% affordable/social rent -20% intermediate affordable -25 -30% - 1 bed -30 -35% - 2 bed -30 -35% - 3 bed -5 -10% - 4+ beds</p> <p>Mix of sizes of market homes – create socially mixed and inclusive communities</p> <p>Provision for key workers as part of both affordable and market homes</p> <p>Self-build or self –finish housing</p>	Deliver the requirements of Policy PR2.

## Housing Land Supply Position Statement (Update) January 2023

### Context

The former NPPF (September 2023) contained a requirement include a buffer in the assessment of the supply of specific deliverable housing sites of at least 5%. A revised National Planning Policy Framework (NPPF) was published on 20 December 2023 and no longer contains this requirement.

This changes the calculation of the five year land supply as shown in the Council's 2023 Annual Monitoring Report (AMR) at paragraph 41. The calculation is now as follows:

Table 1

Step	Description	Five Year Period 2023-2028
a	Requirement (2023 – 2031) (standard method)	5,680 (710x8)
b	Annual Requirement (latest standard method)	710
c	5 year requirement (b x years)	3,550
d	Deliverable supply over next 5 years	4,121 (from 2023 AMR)
e	Total years supply over next 5 years (d/b)	5.8
f	Surplus (d-c)	571

Additionally, it is advised at paragraph 226 of the revised NPPF:

*“From the date of publication of this revision of the Framework, for decision-making purposes only, certain local planning authorities will only be required to identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of four years’ worth of housing (with a buffer, if applicable, as set out in paragraph 77) against the housing requirement set out in adopted strategic policies, or against local housing need where the strategic policies are more than five years old, instead of a minimum of five years as set out in paragraph 77 of this Framework. This policy applies to those authorities which have an emerging local plan that has either been submitted for examination or has reached Regulation 18 or Regulation 19 (Town and Country Planning (Local Planning) (England) Regulations 2012) stage, including both a policies map and proposed allocations towards meeting housing need. This provision does not apply to authorities who are not required to demonstrate a housing land supply, as set out in paragraph 76. These arrangements will apply for a period of two years from the publication date of this revision of the Framework.”*

Table 1 above demonstrates that the updated AMR 2023 position is that the district has in excess of a ‘four years’ worth of housing’ measured against a five year housing requirement.

Alternatively, Table 2 below shows the calculation of deliverable housing land supply measured against a four year requirement.

Table 2

Step	Description	Four Year Period 2023-2027
a	Requirement (2023 – 2031) (standard method)	5,680 (710x8)
b	Annual Requirement (latest standard method)	710
c	4 year requirement (b x years)	2,840
d	Deliverable supply over next 4 years	3,207 (from 2023 AMR)
e	Total years supply over next 4 years (d/b)	4.5
f	Surplus (d-c)	367

## Appeal Decision

Hearing Held on 18 October 2023

Site visit made on 18 October 2023

**by K Ford MSc MRTPI**

an Inspector appointed by the Secretary of State

Decision date: 12 December 2023

---

**Appeal Ref: APP/C3105/W/23/3325113**

**Land to the rear of No 12 and South of Dismantled Railway Heath Close, Milcombe OX15 4RZ**

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant planning permission.
  - The appeal is made by Stoic Roofing and Construction and Abbeymill Homes against the decision of Cherwell District Council.
  - The application Ref 22/02104/F, dated 12 July 2022, was refused by notice dated 19 June 2023.
  - The development proposed is erection of 35 2 storey dwelling houses, construction of access off Rye Hill together with garaging, parking, open space with LAP, landscaping and all enabling works.
- 

### Decision

1. The appeal is allowed and planning permission is granted for the erection of 35 2 storey dwelling houses, construction of access off Rye Hill together with garaging, parking, open space with LAP, landscaping and all enabling works, in accordance with the terms of the application, Ref 22/02104/F, dated 12 July 2022. This is subject to the conditions in the Schedule in the appendix of this Decision.

### Procedural Matter

2. The Hearing was adjourned to allow for the completion of a S106 Agreement with Cherwell District Council and Oxfordshire County Council. A final copy of a completed S106 Agreement was submitted on 8 November 2023 and the Hearing was closed in writing.
3. The submitted S106 agreement covers a number of planning obligations that are required by policies BSC3, BSC10, BSC11 and BSC12 of the Cherwell Local Plan 2011-2031 (Local Plan) to ensure the delivery of affordable housing and facilities and services that are essential for development to take place or to mitigate the impact of the development.
4. The S106 would secure the provision of; affordable housing; highways works; the provision and maintenance of open space and woodland; a Sustainable Drainage System scheme and Local Area for Play. It would also secure financial contributions for; improvements to Milcombe Village Hall along with measures to allow for the provision of indoor sporting opportunities at the venue; new facilities and improvements to existing GP facilities; the purchase of land in Milcombe for outdoor sports pitches and associated building/ equipment or

towards the improvement of facilities at Bloxham Recreation Ground; primary education facilities and special education needs and development facilities. It also secures financial contributions for the provision of public art within the vicinity of the site; to ensure a bus service is integrated into the development and the expansion and efficiency of household waste and recycling centres serving the site.

5. Given the policy requirements and infrastructure needs arising from the development I am satisfied that all of the above obligations are necessary to make the development acceptable in planning terms, are directly related to the development and fairly and reasonably relate in scale and kind to the development. They would accord with Regulation 122 of the Community Infrastructure Levy Regulations 2010 (as amended).
6. As I am satisfied that the provisions of the submitted agreement would meet the necessary tests I have taken them into account in my Decision. The second reason for refusal is not therefore a main issue for the appeal.

### **Application for Costs**

7. At the Hearing an application for costs was made by Stoic Roofing and Construction and Abbeymill Homes against Cherwell District Council. This application is the subject of a separate Decision.

### **Main Issues**

8. The main issues are:
  - Whether the scale and location of the proposal would be appropriate for residential development having regard to the spatial strategy in the development plan.
  - The effect on the character and appearance of the area.
  - Whether a deliverable 5 year housing land supply exists.

### **Reasons**

#### *Location of Development*

9. Measuring approximately 22ha on the western edge of Milcombe, the pasture land that forms the appeal site is on the edge but outside the built up boundary of the village and therefore in the countryside.
10. Saved Policy H18 of the Cherwell Local Plan 1996 identifies that new dwellings beyond the built up limits of settlements are only permitted under certain circumstances listed in the policy. The proposed development does not fall within any of the exceptions listed in the Policy.
11. Policy BSC1 of the Local Plan distributes growth across the district, directing it primarily to the main towns of Bicester and Banbury with more limited growth in rural areas.
12. The strategy within the Local Plan is reflected in Policy Villages 1 which categorises the villages in the District, identifying which ones are in principle best placed to sustain different levels of residential development. Policy Villages 1 is relevant to the appeal in so far as it classifies Milcombe as a Category A village which the Council confirmed at the Hearing is considered the most

sustainable form of settlement in the rural areas of the District, with a number of services and facilities including a village shop, recreation ground, community building, church and bus stops. The parties disagree as to whether the public house in the village is currently open. However, even if it is currently closed the use has not been lost with the Council confirming that there has been no planning applications proposing a change of use at the site.

13. Whilst the Council propose to downgrade the categorisation of the settlement through the Local Plan review this has not been tested at examination. Given the very early stage of the Council in the plan making process the Council themselves acknowledge that the intention cannot be given any weight. Given the range of services and facilities in the village and proximity to nearby settlements which are reasonably accessible, the site cannot be described as isolated in the countryside.
14. Policy Villages 2 of the Local Plan deals with the distribution of growth across the rural areas. It is broken down into 2 parts. The first part identifies that 'a total of 750 homes will be delivered at Category A villages' with 'the determination of applications for planning permission' being one source of supply. Whilst the Council identify that there are 1074 dwellings either built, under construction or with planning permission across the category A villages only 703 have been completed which is below the number identified in the policy.
15. Although the Council consider that when taken as a whole the 750 has been reached and exceeded, it was acknowledged at the Hearing that the 750 identified in the policy is not a limit. Noting the findings of other appeal decisions referred to by the Council in support of their case, there is little evidence before me that there has been a material exceedance in the number of dwellings that has resulted in harm to the locational strategy of the district. As such, and given the location of the site to the adjacent built up edge of the settlement with access to services and facilities, I consider the site to be an appropriate location for development, subject to compliance with the 11 bullet points that form the second part of Policy Villages 2, the most relevant of which are covered within main issue 2 of my Decision.
16. The Council say that the development would lead to significant additional growth of the village when considered alongside other development that has occurred in the settlement since the Local Plan was adopted. However, the development has been incremental over this time and the scheme proposed would constitute a 10% increase in the size of the settlement. I do not consider this to be a significant harmful addition given the position of the village in the settlement hierarchy or the level of growth directed to the rural areas.
17. The development would be contrary to Policy Villages 2 of the Local Plan and Saved Policy H18 of the Cherwell Local Plan 2015. However, of the reasons identified I conclude that the location of the appeal site outside the built up limits of Milcombe and the conflict with the policies would only cause limited harm to the spatial strategy of the development plan.

#### *Character and Appearance*

18. Accessed off Rye Hill, the site is well screened from the west and north west due to woodland and mature trees and hedgerow that run along a dismantled railway line. There is also established vegetation to the north and south. Views

into the site are not completely blocked by the vegetation in all places but it provides a good level of screening with only glimpsed views into the site from Main Road and Rye Hill. To the east are properties that front onto Heath Close comprising of 2 storey detached houses and detached bungalows. Other residential development in the area includes more recently constructed detached and semi detached dwellings at Oak Farm Close and Oak Farm Drive using a mixture of ironstone and red brick.

19. There is dispute between the parties regarding the ecological value of the site. At the Hearing the Council confirmed that, despite falling within the Swere Valley and Upper Stour Conservation Target Area, there were no objections to the development from the Council's Environmental Protection Officer, Arboricultural Officer or Ecology department, subject to appropriately worded planning conditions. They confirmed that this was a consequence of the proposed biodiversity net gain proposed by the scheme. I have no reason to take a different view. Whilst interested parties raised concern regarding the nearby NERC designation, it was confirmed by the Council that the designation would not be affected by the development. There is little before me to indicate otherwise.
20. The site provides an attractive rural edge to the settlement. The scheme would introduce built development into an area with a currently open agricultural appearance and would consequently have an urbanising effect from the built development, supporting infrastructure and associated paraphernalia. However, the retention of the existing vegetation would mitigate the impact to some extent by softening views into the site.
21. The Council has criticised the proposed layout of the site as a result of the retained landscaping. From my observations on site I disagree with the Council's assertion that the layout would not be reflective of other development in the settlement. I consider that the loss of vegetation to enable buildings to face onto the main road, as proposed by the Council, would be more harmful in this edge of settlement location. Similarly, whilst there is no separate pedestrian access onto the main road, there are pedestrian routes within the proposed layout. I do not think resident permeability would be compromised by the layout and therefore disagree with the Council's view on this matter.
22. The appellant identifies that the proposed density of the development is 22.5 dwellings per hectare, a figure that is not contested by the Council. This density would be lower than some neighbouring development in the settlement and lower than the 30 dwellings per hectare identified in Policy BSC2 of the Local Plan. However, the policy identifies that a lower density is acceptable where justifiable planning reasons exist. Given the edge of settlement location, proposed retention of existing vegetation, provision of open space and biodiversity net gain, I consider there to be justifiable reasons for the lower density proposed.
23. Whilst interested parties raised concern regarding the proposed materials for the construction of the development, the Council is satisfied that the matter can be dealt with through an appropriately worded planning condition. I agree.
24. Based on the evidence before me and my observations on my site visit, I am of the view that the scheme would cause moderate harm to the character and appearance of the area. It would conflict with the part of the National Planning Policy Framework (NPPF) that recognises the intrinsic character and beauty of

the countryside and seeks to ensure development contributes to and enhances the natural environment. However, the severe adverse harm identified in Policy Villages 2 of the Local Plan would be avoided.

#### *5 Year Housing Land Supply*

25. The Local Plan covers the administrative area of the District. It sets out the scale and distribution of housing development within the District, directing development to the main towns of Bicester and Banbury. The Cherwell Local Plan 2011-2031 (Part 1) Partial Review – Oxford Unmet Housing Need (Partial Review) makes separate provision for contributing towards meeting the unmet needs of Oxford, adopting a strategy that seeks to avoid undermining the strategy of the Local Plan and the planned delivery of growth at Bicester, Banbury and Former RAF Upper Heyford. The strategy for Oxford is to provide homes where people can most readily connect to Oxford. As such it directs development to meet Oxford's needs to the areas of north Oxford, Kidlington, Yarnton and Begbroke along the A44 corridor.
26. The provision for Oxford is monitored separately to Cherwell with supply falling significantly short of the 5 year housing land supply requirement at 0.2 years. The Council claim a housing land supply of 5.37 years within the Cherwell District area, excluding Oxford. The appellant disputes the figures and the way the Council has calculated the 5 year housing land supply suggesting that there is a 2.85 year housing land supply, including Oxford's needs and 4.78 years if they are excluded.

#### *Requirement*

27. The Local Plan was adopted in 2015 and therefore is over 5 years old and so the assessment of housing land supply is against local housing need using Government's standard methodology. The Partial Review was adopted in 2020 and so is not more than 5 years old.
28. The Council says the requirement for Cherwell should exclude Oxford. The appellant says that it should include it. The Partial Review sets out a clear strategy for development. It is clear that Policies PR1 and PR3 of the Partial Review state that the Council will deliver 4,400 homes to help meet Oxford's unmet housing needs and deliver those homes on identified land to be taken out of the Green Belt.
29. There is nothing in paragraph 74 of the NPPF that requires the use of a single administrative area when calculating housing land supply. The NPPF encourages cross boundary working and co-operation and the Partial Review seeks specifically to address Oxford's needs through the strategy contained within it. The Inspector examining the Partial Review accepted the approach of separating the Council's commitment to meeting Oxford's unmet needs from their own commitments. There has been no change in circumstances since this time and so there is no reason to take a different view. Whilst the Council is considering an alternative approach as part of their Local Plan review, it is at an early stage of preparation and subject to change.
30. There is dispute between the parties with regards the base date for the calculation of the projected annual average household growth. I have used the current year as the starting point, reflecting guidance in the Planning Practice Guidance. The appellant promoted the use of 2022 as the starting point with

reference to an appeal decision in support of their case. However, I do not have all the information that informed the approach in that decision and my assessment is based on the information before me.

31. With corresponding affordability adjustments, the local housing need is 3,728 dwellings incorporating a 5% buffer to ensure choice and competition in the market for land. This reflects the fact that the January 2022 Housing Delivery test results show that the Council has exceeded delivery expectations over the past 3 years.

#### *Housing Land Supply*

32. The NPPF defines the meaning of deliverable. The site must be available now, offer a suitable location for development now and be achievable with a reasonable prospect of delivery over the 5 year period. Sites with detailed planning permission are assumed to be deliverable unless there is evidence to indicate otherwise. Sites with outline planning permission or allocated sites are only considered deliverable where there is clear evidence that delivery will take place within 5 years.
33. The Council's case is that it can demonstrate a deliverable 5 year housing land supply of 4008 dwellings from 1 April 2022 to 31 March 2027 which equates to 5.37 years. The appellant argues it is closer to 4.78 years.
34. In considering the elements of supply that remain in dispute it should be noted that my assessment is based on the evidence presented as part of the Hearing. It is therefore a snapshot in time, representing the situation as it stood at the time of the Hearing.

#### *Bicester 1 NW Bicester Phase 2*

35. The site is subject to an outline planning permission for 1,700 dwellings with the Council anticipating first completions in year 5 of the trajectory. Whilst there has been reserved matters applications they are still pending approval and subject to objections that are yet to be resolved. There is a lack of clear evidence to support delivery and so 20 dwellings should be deducted.

#### *Bicester 3 SW Bicester Phase 2*

36. The site has outline planning permission for 709 dwellings, 649 of which have reserved matters approval and are under construction. The remaining 60 dwellings, expected to be specialist housing for older people is not currently subject to a reserved matters application and there was no clear evidence from the Council to demonstrate when it can be expected. The 60 dwellings should consequently be deducted.

#### *Bicester 12 – South East Bicester*

37. The site has outline planning permission for 1,500 dwellings on an allocated site, 50 of which the Council expects will come forward within year 5 of the delivery forecast. However, there is no written evidence to support the Council's assertion that reserved matters will come forward in 2024. There is no clear evidence to support the phasing or timing of delivery thereafter. I therefore deduct 50 dwellings.

*Bicester 10 – Bicester Gateway Business Park, Wendlebury Road*

38. Outline planning permission is in place for the allocated mixed use site which includes 283 dwellings, 80 of which the Council suggest will come forward during year 5. The Council rely on reference to a confidential pre application discussion in which the developer, Thomas Homes, provided details of delivery within 5 years.
39. During the Hearing the appellant provided written confirmation that the owner of the site does not plan to bring the site forward in the short-medium term due to viability issues with the proposed scheme. In the circumstances the 80 dwellings should be removed from the supply.

*Land South of Salt Way - East*

40. This allocated site has outline planning permission for 1000 dwellings. Reserved matters for 237 dwellings has been granted and the parties agree that these dwellings can be expected to come forward within the 5 year period. I have no reason to disagree.
41. The Council project that a further 113 dwellings will come forward within the 5 years. The trajectory is based on 5 developers being on site but currently there is only one. There is no clear evidence to support the delivery of the additional 113 dwellings and so this should be deducted from the supply.

*Former RAF Heyford*

42. The allocated site has extant planning permission although this is unlikely to be implemented following the submission of a separate planning application for David Wilson Homes which has not yet been granted with unresolved objections related to biodiversity net gain. The Council expect the planning application to go to committee before the end of 2023 with David Wilson starting on site in early 2024. However, David Wilson do not currently own the site and so I consider this timescale to be ambitious given the processes involved in completing the acquisition. I consequently deduct 30 of the projected dwellings for 2024-2025.

*Partial Review Area*

43. There is disagreement between the parties regarding the supply figures associated with the Partial Review area. As I have concluded that the Partial Review Area should not be included in the considerations of this appeal I have not considered the supply issues raised in relation to the sites.

*Conclusion*

44. For the reasons outlined I am of the view that the Council can demonstrate through clear evidence that it has sufficient housing land for the delivery of 3595 dwellings within the 5 year period 2022-2027. On the basis of a 5 year housing need of 3728, including a 5% buffer to provide choice and competition in the market, the Council has a 4.82 year housing land supply. The Council cannot demonstrate a 5 year housing land supply and so paragraph 11d of the NPPF is engaged.

## **Other Matters**

45. The site lies within an area of archaeological interest, located within proximity of a possible deserted medieval village. The appellant has undertaken an archaeological assessment and the Planning Archaeologist at Oxfordshire County Council has raised no objection subject to appropriately worded planning conditions requiring a staged programme of archaeological investigation during construction. I have no reason to take a different view.

## **Planning Balance**

46. I have found that the Council cannot demonstrate a 5 year housing land supply. As such paragraph 11d of the NPPF indicates that permission should be granted unless i) the application of policies in the NPPF that protect areas or assets of importance provides a clear reason for refusing the development proposed or ii) the adverse impacts of doing so would significantly and demonstrably outweigh the benefits when assessed against the policies in the NPPF taken as a whole.
47. There is no evidence before me to indicate there are any policies in the NPPF that provide a clear reason for refusing the development. As such paragraph 11di does not apply in this case. Nevertheless, an absence of harm in this regard is a neutral consideration in the planning balance.
48. The development would conflict with Saved Policy H18 of the Cherwell Local Plan 2015 and Policy Villages 2 of the Local Plan. Nonetheless, for the reasons identified the adverse impact arising from the conflict with the development plan would be limited and would not seriously undermine the spatial strategy of the Local Plan.
49. The proposal would contribute 35 dwellings to the housing land supply and make a contribution towards the delivery of affordable housing which I give significant weight. In addition there would be economic benefits to the local economy both during construction and occupation of the development thereafter. The development would also generate biodiversity net gain. I give this moderate weight.
50. Overall, I consider that the adverse impacts of the development would not significantly and demonstrably outweigh the benefits when assessed against the policies of the NPPF taken as a whole. Consequently, the presumption in favour of development applies.
51. Applications for planning permission are to be determined in accordance with the development plan unless material considerations indicate otherwise. In this case, whilst the development would conflict with Saved Policy H18 of the Cherwell Local Plan 2015 and Policy Villages 2 of the Local Plan the presumption in favour of the development constitutes a material consideration of significant weight that justifies a determination other than in accordance with the development plan.

## **Conclusion and Planning Conditions**

52. For the reasons given, I conclude that the appeal should be allowed subject to conditions.

53. A list of planning conditions has been drawn up by the Council with input from the appellant. I have taken into account paragraph 56 of the NPPF which identifies that planning conditions should be kept to a minimum and only imposed where they are necessary, relevant to planning and to the development permitted, enforceable, precise and reasonable in all other respects.

#### *Implementation*

54. The statutory implementation period has been imposed and the approved plans specified for the avoidance of doubt and in the interests of proper planning (conditions 1, 2).

#### *Design and Appearance*

55. A number of conditions seek to ensure quality of design. This includes conditions requiring further specification including sample panels to ensure materials are appropriate to the appearance of the locality and details of external lighting.
56. Good quality hard and soft landscaping including open space/ play space will enhance the development and can have a positive impact on the quality of life of occupants. Details of these measures and provisions for their maintenance during the first 5 years are therefore necessary. Similarly, a condition protecting existing trees in line with an arboricultural method statement will ensure such trees are retained and integrated into the development (conditions 6, 7, 8, 18, 19, 20, 22, 28, 29, 30).

#### *Drainage*

57. The installation of an approved drainage system and sustainable drainage in accordance with a phasing plan is necessary to ensure timely delivery across the site and will address the concerns raised by interested parties regarding the condition of the land in parts of the site resulting in poor drainage (conditions 25, 26, 27).

#### *Archaeology*

58. Conditions requiring the preparation of a Written Scheme of Investigation and subsequent staged programme of archaeological evaluation and mitigation will ensure the identification, recording, analysis and archiving of any heritage matters within the site (conditions 11, 12).

#### *Parking*

59. A plan providing detail of the proposed parking provision for vehicles on the site along with provision to ensure the retention of garaging spaces for the parking of motor vehicles will ensure adequate off street parking and highway safety (conditions 3, 33).
60. Whilst concern was raised by interested parties regarding the access onto Rye Hill the scheme incorporates traffic management measures contained in the drawing listed in condition 2. A separate condition on this matter is not therefore necessary.

### *Living Conditions*

61. Demonstration that all habitable rooms achieve specified noise level protection will ensure the creation of a satisfactory living environment free from intrusive noise levels. A construction method statement will protect the living conditions of nearby residents as well as the environment. The submission of details of enclosures along boundary treatments will safeguard the privacy of the occupants of existing neighbouring dwellings as well as proposed new dwellings (conditions 4, 5, 21, 23).

### *Ecology*

62. The submission and implementation of a Landscape and Ecology Management Plan will enable the protection of habitats of importance to biodiversity conservation. Interested parties raised concern on the impact of the development on Great Crested Newts. A condition requiring a Great Crested Newt Licence and necessitating compliance with its terms and conditions will ensure any adverse impacts on Great Crested Newts are adequately mitigated and compensated (conditions 9, 10, 24).

### *Contamination*

63. A desk study and site walk over to identify any contaminative uses on the site along with steps should and contamination be found is necessary to ensure any ground and water contamination is identified and adequately addressed (conditions 13, 14, 15, 16, 17).

### *Sustainable Travel*

64. The provision of covered cycle parking facilities on site and the issue of travel information packs to the first occupants of the new dwellings is necessary to promote sustainable transport options (conditions 31, 32).

## **DOCUMENTS SUBMITTED AS PART OF HEARING**

Email from Thomas Homes dated 18.10.23 regarding site at Bicester Gateway

Updated list of planning conditions

Open Space Plan MIL-PL56A

S106 Planning Obligation dated 8.11.23

## **SCHEDULE OF CONDITIONS**

1. The development hereby permitted shall be begun before the expiration of three years from the date of this permission.
2. Except where otherwise stipulated by conditions attached to this permission, the development shall not be carried out otherwise than in complete accordance with the approved plans MIL-PL01A, MIL-PL02P, MIL-PL03, MIL-PL04, MIL-PL05A, MIL-PL06A, MIL-PL07, MIL-PL08, MIL-PL09A, MIL-PL10A, MIL-PL11, MIL-PL12, MIL-PL13A, MIL-PL14, MIL-PL15, MIL-PL16A, MIL-PL17, MIL-PL18, MIL-PL19, MIL-PL20, MIL-PL21, MIL-PL22A, MIL-PL23A, MIL-PL24A, MIL-PL25, MIL-PL26A, MIL-PL27, MIL-PL28, MIL-PL29, MIL-PL30, MIL-PL31, MIL-PL40, MIL-PL41, MIL-PL42A, MIL-PL43, MIL-PL44A, MIL-PL45, MIL-PL50E, MIL-PL53E, MIL-PL55D, MIL-PL56A, 8220308\_6102 Rev B unless a non-material or minor material amendment is approved by the Local Planning Authority under the Town and Country Planning (Development Management Procedure) (England) Order 2015 (as amended).
3. Notwithstanding the details submitted, no development shall commence until and unless a plan detailing the proposed parking provision for vehicles to be accommodated within the site, including details of the proposed surfacing and drainage of the provision, has been submitted to and approved in writing by the Local Planning Authority. The approved parking facilities shall be laid out and completed in accordance with the approved details before the first occupation of the dwellings. The car parking spaces shall be retained for the parking of vehicles at all times thereafter.
4. No development shall take place, including any works of demolition, until a Construction Method Statement has been submitted to and approved in writing by the Local Planning Authority. The statement shall provide for at a minimum:
  - a) The parking of vehicles of site operatives and visitors;
  - b) The routing of HGVs to and from the site;
  - c) Loading and unloading of plant and materials;
  - d) Storage of plant and materials used in constructing the development;
  - e) The erection and maintenance of security hoarding including decorative displays and facilities for public viewing, where appropriate;
  - f) Wheel washing facilities including type of operation (automated, water recycling etc) and road sweeping;
  - g) Measures to control the emission of dust and dirt during construction;
  - h) A scheme for recycling/ disposing of waste resulting from demolition and construction works;
  - i) Delivery, demolition and construction working hours;The approved Construction Method Statement shall be adhered to throughout the construction period for the development.

5. No development shall commence unless and until a Construction Traffic Management Plan prepared in accordance with Oxfordshire County Council's checklist, has been submitted to and approved in writing by the local planning authority. The development shall not be carried out other than in full accordance with the details approved in the Construction Traffic Management Plan.

6. Prior to the commencement of the development hereby approved, an Arboricultural Method Statement (AMS), undertaken in accordance with BS:5837:2012 and all subsequent amendments and revisions shall be submitted to and approved in writing by the Local Planning Authority. Thereafter, all works on site shall be carried out in accordance with the approved AMS.

7. No development shall take place until the existing tree(s) to be retained have been protected in accordance with an Arboricultural Method Statement which details the protective measures where Root Protection Areas are impacted. A pre-commencement site meeting must be arranged to ensure tree protection has been put in place and regular monitoring will be required to ensure the protection remains in place for the duration of the development for compliance.

The barriers shall be erected before any equipment, machinery or materials are brought onto the site for the purposes of development and / or demolition and shall be maintained until all equipment machinery and surplus material has been removed from the site. Nothing shall be stored or placed within the areas protected by the barriers erected in accordance with this condition and the ground levels within those areas shall not be altered, nor shall any excavations be made, without the written consent of the Local Planning Authority.

8. Prior to the commencement of the development hereby approved full details of the provision, landscaping and treatment of open space/play space within the site together with a timeframe for its provision shall be submitted to and approved in writing by the Local Planning Authority. Thereafter the open space/play space shall be landscaped, laid out and completed in accordance with the approved details and retained at all times as open space/play space.

9. No development hereby permitted shall take place other than in accordance with the terms and conditions of the Council's organisational licence (WML-OR112, or a 'Further Licence') and with the proposals detailed on plan "Land West of Heath Close, Milcombe: Impact Plan for great crested newt District Licensing (Version 3)", dated 11th July 2023

10. No development hereby permitted shall take place unless and until a certificate from the Delivery Partner (as set out in the District Licence WML-OR112, or a 'Further Licence'), confirming that all necessary measures in regard to great crested newt compensation have been appropriately dealt

with, has been submitted to and approved by the local planning authority and the local authority has provided authorisation for the development to proceed under the district newt licence. The Delivery Partner certificate must be submitted to this planning authority for approval prior to the commencement of the development hereby approved.

11. Prior to the commencement of the development a professional archaeological organisation acceptable to the Local Planning Authority shall prepare an Archaeological Written Scheme of Investigation, relating to the application area, which shall be submitted to and approved in writing by the Local Planning Authority

12. Following the approval of the Written Scheme of Investigation referred to in condition 12, and prior to the commencement of the development (other than in accordance with the agreed Written Scheme of Investigation), a staged programme of archaeological evaluation and mitigation shall be carried out by the commissioned archaeological organisation in accordance with the approved Written Scheme of Investigation. The programme of work shall include all processing, research and analysis necessary to produce and accessible and useable archive and a full report for publication which shall be submitted to the Local Planning Authority within 2 years of the completion of the archaeological fieldwork.

13. No part of the development hereby permitted shall take place until a desk study and site walk over to identify all potential contaminative uses on site, and to inform the conceptual site model has been carried out by a competent person and in accordance with DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11' and has been submitted to and approved in writing by the Local Planning Authority. No development shall take place until the Local Planning Authority has given its written approval that it is satisfied that no potential risk from contamination has been identified.

14. If a potential risk from contamination is identified as a result of the work carried out under condition 13, prior to the commencement of the development hereby permitted, a comprehensive intrusive investigation in order to characterise the type, nature and extent of contamination present, the risks to receptors and to inform the remediation strategy proposals shall be documented as a report undertaken by a competent person and in accordance with DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11' and submitted to and approved in writing by the Local Planning Authority. No development shall take place unless the Local Planning Authority has given its written approval that it is satisfied that the risk from contamination has been adequately characterised as required by this condition.

15. If contamination is found by undertaking the work carried out under condition 14 prior to the commencement of the development hereby

permitted, a scheme of remediation and/or monitoring to ensure the site is suitable for its proposed use shall be prepared by a competent person and in accordance with DEFRA and the Environment Agency's 'Model Procedures for the Management of Land Contamination, CLR 11' and submitted to and approved in writing by the Local Planning Authority. No development shall take place until the Local Planning Authority has given its written approval of the scheme of remediation and/or monitoring required by this condition.

16. If remedial works have been identified in condition 14, the development shall not be occupied until the remedial works have been carried out in accordance with the scheme approved under condition 15. A verification report that demonstrates the effectiveness of the remediation carried out must be submitted to and approved in writing by the Local Planning Authority.

17. If, during development, contamination not previously identified is found to be present at the site, no further development shall be carried out until full details of a remediation strategy detailing how the unsuspected contamination shall be dealt with has been submitted to and approved in writing by the Local Planning Authority. Thereafter the remediation strategy shall be carried out in accordance with the approved details.

18. No development shall commence above slab level unless and until a stone sample panel in natural ironstone (minimum 1 metre squared in size) has been constructed on site and has been inspected and approved in writing by the Local Planning Authority. The external walls of the dwelling(s) to be constructed out of stone shall be laid, dressed and coursed in full accordance with the approved sample panel and shall be retained as such thereafter. The sample panel shall be constructed in a position that is protected and readily accessible for viewing in good natural daylight from a distance of 3 metres. The panel shall be retained on site for the duration of the construction contract.

19. No development shall commence above slab level unless and until a brick sample panel (minimum 1 metre squared in size) has been constructed on site and has been inspected and approved in writing by the Local Planning Authority. The external walls of the dwellings to be constructed out of brick shall be constructed in brickwork, of a type, colour, texture, face bond and pointing which is in full accordance with the approved sample panel and shall be retained as such thereafter. The sample panel shall be constructed in a position that is protected and readily accessible for viewing in good natural daylight from a distance of 3 metres. The panel shall be retained on site for the duration of the construction contract.

20. Samples of the tiles/slates (including ridge tiles) to be used in the covering of the roof of the dwelling(s) shall be submitted to and approved in writing by the Local Planning Authority prior to commencement of those

works. The development shall not be carried out other than in accordance with the samples so approved and shall be retained as such thereafter.

21. No development shall commence above slab level unless and until a report has been submitted to and approved in writing by the local planning authority that shows that all habitable rooms within the dwelling will achieve the noise levels specified in BS8233:2014 (Guidance on sound insulation and noise reduction for buildings) for indoor and external noise levels. Thereafter, and prior to the first occupation of the dwellings affected by this condition, the dwellings affected by this condition, the dwellings shall be insulated and maintained in accordance with the approved details.

22. Full details of the enclosures along all boundaries and within the site shall be submitted to and approved in writing by the Local Planning Authority prior to the commencement of those works. Such approved means of enclosure, in respect of those dwellings which are intended to be screened, shall be erected prior to the first occupation of those dwellings and shall be retained as such thereafter.

23. Details of the external lighting including the design, position, orientation and any screening of the lighting shall be submitted to and approved in writing by the Local Planning Authority prior to commencement of those works. The lighting shall be installed and operated in accordance with the approved scheme at all times thereafter.

24. The development hereby approved shall not be occupied unless and until a Landscape and Ecology Management Plan (LEMP) has been submitted to and approved in writing by the Local Planning Authority. Thereafter, the development shall not be carried out other than in accordance with the approved LEMP.

25. The approved drainage system shall be implemented in full accordance with the approved Detailed Design prior to the first occupation of any dwelling on the site (with the exception of the permeable paving for each individual dwelling, which must be installed prior to occupation of that dwelling):

26. Prior to the commencement of the approved drainage system, a phasing plan covering the entire application site shall be submitted to and approved in writing by the Local Planning Authority, in consultation with the Local Lead Flood Authority. Thereafter the development shall be carried out strictly in accordance with the approved phasing plan.

27. Prior to the first occupation of each phase, a record of the installed SuDS and site-wide drainage scheme shall be submitted for each phase in accordance with the agreed phasing plan and be approved in writing by the Local Planning Authority for deposit with the Lead Local Flood Authority Asset Register. The details shall include:

- (a) As built plans in both .pdf and .shp file format;
- (b) Photographs to document each key stage of the drainage system when installed on site;
- (c) Photographs to document the completed installation of the drainage structures on site;
- (d) The name and contact details of any appointed management company information.

28. Prior to the first occupation of the development hereby approved, a landscaping scheme shall be submitted to and approved in writing by the Local Planning Authority. The scheme for landscaping the site shall include: -

- (a) details of the proposed tree and shrub planting including their species, number, sizes and positions, together with grass seeded/turfed areas,
- (b) details of the existing trees and hedgerows to be retained as well as those to be felled, including existing and proposed soil levels at the base of each tree/hedgerow and the minimum distance between the base of the tree and the nearest edge of any excavation,
- (c) details of the hard surface areas, including pavements, pedestrian areas, reduced-dig areas, crossing points and steps,
- (d) details of boundary treatments.

The development shall be carried out in strict accordance with the approved landscaping scheme and the hard landscape elements shall be carried out prior to the first occupation of the development and shall be retained as such thereafter.

29. All planting, seeding or turfing comprised in the approved details of landscaping shall be carried out in accordance with BS 4428:1989 Code of Practice for general landscape operations (excluding hard surfaces), or the most up to date and current British Standard, in the first planting and

seeding seasons following the occupation of the building(s) or on the completion of the development, whichever is the sooner. Any trees, herbaceous planting and shrubs which, within a period of five years from the completion of the development die, are removed or become seriously damaged or diseased shall be replaced in the current/next planting season with others of similar size and species.

30. A schedule of landscape maintenance of the landscape details as shown in the landscape scheme for the life of the development shall be submitted to and approved in writing by the Local Planning Authority prior to occupation of the development. The schedule shall include details of the arrangements for its implementation. Development shall be carried out in accordance with the approved schedule unless otherwise approved in writing by the Local Planning Authority.

31. Prior to the first use or occupation of the development hereby permitted, covered cycle parking facilities shall be provided on the site in accordance with details to be first submitted to and approved in writing by the Local Planning Authority. The covered cycle parking facilities so provided shall thereafter be permanently retained and maintained for the parking of cycles in connection with the development.

32. Prior to first occupation of any dwelling hereby approved a Travel Information Pack shall be submitted to and approved by the Local Planning Authority. The first residents of each dwelling shall be provided with a copy of the approved Travel Information Pack.

33. Notwithstanding the provisions of Schedule 2, Part 1, Class A of the Town and Country Planning (General Permitted Development) Order 2015 (or in any provision equivalent to that class in any statutory instrument revoking, amending or re-enacting that order), the garage(s) shown on the approved plans shall be retained for the garaging of private motor vehicles and shall not be converted to provide additional living accommodation.

## Appeal Decision

Inquiry held on 6-9 June 2023

Site visit made on 28 June 2023

**by Tom Bristow BA MSc MRTPI AssocRICS**

an Inspector appointed by the Secretary of State

Decision date: 11<sup>th</sup> September 2023

---

**Appeal Ref: APP/G1630/W/23/3314936**

**Truman's Farm, Manor Lane, Gotherington, Gloucestershire GL52 9QX**

- The appeal is made under section 78 of the Town and Country Planning Act 1990 as amended (the '1990 Act') against a failure to give notice within the prescribed period of a decision on an application for planning permission.
  - The appeal is made by Lioncourt Strategic Land Ltd. against Tewkesbury Borough Council ('TBC').
  - The application Ref 22/00650/FUL is dated 27 May 2022.
  - The development proposed is described on the application form as 'residential development comprising 45 dwellings, creation of new access, public open space and other associated ancillary works'.
- 

### Decision

1. The appeal is allowed and planning permission is granted for residential development comprising 45 dwellings, creation of new access, public open space and other associated ancillary works at Truman's Farm, Manor Lane, Gotherington, Gloucestershire GL52 9QX, subject to the conditions in the first schedule to this decision and to the obligations contained within the planning agreements under section 106 of the 1990 Act dated 23 June 2023 with Gloucestershire County Council ('GCC') and 26 June 2023 with Tewkesbury Borough Council ('TBC').

### Preliminary matters

2. Each proposal must be determined in accordance with the development plan unless material considerations indicate otherwise.<sup>1</sup> The development plan includes policies of the Gotherington Neighbourhood Development Plan ('GNDP'), of the Gloucester, Cheltenham and Tewkesbury Joint Core Strategy 2011-2031 ('JCS'), and of the Tewkesbury Borough Plan ('TBP').<sup>2</sup> The function of the TBP was to fulfil a remit under, rather than to review, the JCS.
3. I have had regard to various other material considerations including the National Planning Policy Framework ('NPPF'), the Planning Practice Guidance ('PPG'), the Cotswolds National Landscape Management Plan 2023-2025 ('NLMP') related to the Cotswolds Area of Outstanding Natural Beauty ('AONB'), and the Cotswolds Conservation Board's Position Statement regarding development in the setting of the AONB ('PS'). I understand work reviewing the JCS and TBP is yet at an early stage. There is also no substantive argumentation before me in respect of its future direction.

---

<sup>1</sup> Section 38(6) of the Planning and Compulsory Purchase Act 2004 as amended.

<sup>2</sup> Made 19 September 2017, adopted 11 December 2017, and adopted 8 June 2022 respectively.

4. This proposal follows an unsuccessful appeal in 2017.<sup>3</sup> An application, initially for 49 homes, was also refused in 2021 (ref. 21/00019/FUL.). I have, however, reached a decision based on the current scheme in present circumstances.<sup>4</sup> The 2017 scheme was moreover in outline and for up to 65 dwellings.<sup>5</sup> That appeal was also determined at a juncture where there was no dispute that the Council were able to demonstrate a five year housing land supply of deliverable sites relative to needs ('5YHLS'), to which NPPF paragraphs 68 and 74 now relate. That is now in dispute.
5. A further difference between the scheme before me and that advanced via application ref. 21/00019/FUL is that a locally equipped area of play ('LEAP') is now proposed. The plans representing the current scheme are listed under section 8.0 of the statement of common ground between the appellant and TBC.<sup>6</sup> Some are amended or updated compared to those originally submitted, as are some associated documents.<sup>7</sup> That is notably the case of plan no. DLA 2016.L.06.P11, which shows the LEAP, and is reflected in the updated Landscape and Visual Assessment ('LVA').<sup>8</sup> The planning agreement with TBC also relates to the design, funding and maintenance of the LEAP. None of the foregoing documentation, however, significantly changes the nature of the development proposed. The appeal process has afforded opportunity for comment in respect of it. There is therefore no reason to discount any of the foregoing from my assessment.
6. The appeal is against the failure of TBC to reach a decision in respect of application ref. 22/00650/FUL within the relevant statutory period. Nevertheless TBC have set out at appeal that, had they been in a position to do so, they would have refused permission for 8 putative reasons. Of those reasons, 4 related to addressing the implications of the scheme via obligations were resolved via the inquiry to the satisfaction of TBC (by virtue of the planning agreements referenced above).
7. The planning agreements do not resolve the objections of Gothington Parish Council ('GPC') or of the Manor Lane Action Group ('MLAG') to the proposal, both 'Rule 6 parties',<sup>9</sup> represented by Eddie McLarnon and Christine White respectively. Whilst there is significant overlap between the position of TBC in respect of the development proposed and that of the Rule 6 parties, there are inevitably differences of perspective. I address those nuances, and all other matters, insofar as they are principal important controversial issues.

## Main issues

8. Against the background above, the main issues are (i) whether TBC is able to demonstrate a 5YHLS, (ii) whether the location of the appeal site is suitable for housing with reference to the spatial approach in the development plan,

<sup>8</sup> CD A.32.

<sup>9</sup> Under the Town and Country Planning Appeals (Determination by Inspectors) (Inquiries Procedure) (England) Rules 2000 as amended.

(iii) the effect of the proposal on community cohesion, and (iv) the effect of the proposal on landscape and local character.

## Reasons

### *The site*

9. The appeal site is a roughly pentagonal parcel of land amounting to some 4.15 hectares.<sup>10</sup> It is bisected by the line of an historic hedgerow shown in map regression in the appellant's Heritage Assessment ('HA'). That hedgerow is now partial, barely perceptible towards Manor Lane. The common boundary with the rear gardens of properties along Manor Lane demarcates the easternmost extent of the Gotherington settlement boundary here.<sup>11</sup> That hedgerow remains more discernible heading further across the site towards the line of the Gloucestershire Warwickshire (Heritage) Railway ('GWR'), being punctuated by an ash, oak, and cluster of smaller trees in that direction (T2, T3 and G4 in the appellant's Arboricultural Impact Assessment, 'AIA').
10. The embanked railway line represents the arcing westwards boundary of the AONB in this location. The appellant's Design and Access Statement ('DAS') refers to the 'more dramatic hillside' character of the AONB beyond. The topography of the site rises close to the embankment, albeit otherwise the site slopes only gently. At the time of my site visit the site appeared managed as grassland or, in part, had been potentially drilled with some crop. There is limited information as to the agricultural history here. There is, however, no substantive countervailing evidence to the summary of the site's current nature in the appellant's Ecological Impact Assessment and Biodiversity Net Gain Report ('EcIA').
11. Aside from by the collection of agricultural buildings at Truman's Farm, the site is otherwise enclosed by hedgerows with occasional field accesses. Beyond those agricultural buildings falls grade II listed Truman's Farmhouse which, according to the list entry, traces its origins to the late sixteenth century.<sup>12</sup> That, and the presence of historic buildings nearby and elsewhere may be said to reflect a 'time depth' at Gotherington as referenced in the DAS, notwithstanding the absence of a Conservation Area. The GWR represents a late nineteenth century intervention. Passenger services were withdrawn around 1960, the line now a popular tourist attraction.
12. Vegetation along the site boundary with the plots of Manor Lane properties is relatively light. That appears to reflect the comparative recency of that boundary in landscape terms. Nos. 3 to 11 Manor Lane, the rear gardens of which extend up to the appeal site, in their regular spacious arrangement, materials and understated detailing, appear quintessentially mid-to-late twentieth century. As a rule, properties either side thereof, with the exception of no. 44 Gretton Road which is of broadly similar era, appear older. Towards the north-east of the appeal site are further fields between the appeal site and Gotherington Nurseries. Squarely on the opposite side of Gretton Road falls GNDP allocation GNDP02/3, or Privet Court as it has now become. At the time of my site visit several of the dwellings at Privet Court were occupied.

---

<sup>10</sup> 3.95ha also referenced in the evidence before me.

<sup>11</sup> GNDP, figure 6.

<sup>12</sup> List entry no. 1091687.

13. Gretton Road becomes Malleson Road by the junction with Cleeve Road to the west of the site. Gretton Road and Malleson Road wind centrally through Gotherington, resulting in a principally east-west linear form to the Village. A short distance west of the Village, Malleson Road joins the A435, which heads south to Bishop's Cleeve (the built form of which now extends to a few fields over). The wider landscape here is criss-crossed with public rights of way. I walked along many during my site visit, between about 14:00 and 18:00, based on walking routes helpfully suggested by GPC and MLAG.
14. Footpath AGO22 heads perpendicularly westwards away from Manor Lane close to Truman's Farm, flanking Gotherington Primary School. Footpaths AGO33 and AGO43 splinter shortly after the railway bridge to the south of the site, both heading upwards into the AONB (intersecting with footpath AGO30 as they go). AGO33 continues to track upwards, leading to Nottingham Hill. Nottingham Hill Camp, likely initially an Iron Age promontory fort, is scheduled.<sup>13</sup> On the opposite side of Gretton Road, next to Privet Court, Bridleway AGO27, part of Sabrina Way, heads into the AONB proceeding north-westwards (intersecting with footpath AOX23 in short order). Thereabouts the topography rises towards both Crane Hill and Woolstone Hill beyond Woolstone Hill Farm.<sup>14</sup>
15. 45 dwellings, most detached or semi-detached, are proposed. They would be located to the west of the appeal site. The dwellings proposed would be essentially traditional in form and proportions, understated in design. As is present throughout the Village, extensive stone facing is proposed. Existing properties close to the site are predominantly substantial dormer bungalows. Dwellings proposed closest to the settlement boundary would be two storey, declining to one-and-a-half or single storey heading north-eastwards. The eastern side of the site would be principally open, albeit landscaped. That side of the site would also host the LEAP, a pumping station and an attenuation pond associated with the scheme. 40% of the dwellings proposed would be affordable housing (as defined in the NPPF).
16. Vehicular access would be achieved by removing a section of hedgerow alongside Gretton Road, facing towards the access to Privet Court. The appellant's Road Safety Audit ('RSA') sets out how Gretton Road is 'a traditional rural route that is relatively narrow and abutted by hedgerows close to the carriageway and as such is inappropriate for pedestrian movements'. That position is informed by current approaches to road safety; many rural environments are characterised by similar circumstances as here. In that context I note that Gretton Road here is relatively straight and subject to a 30mph speed limit. Nevertheless, the scheme has been informed by the RSA. The appellant's Transport Statement ('TS') sets out how the proposal would also include an 'uncontrolled crossing with dropped kerbs and tactile paving is proposed at the western end of the site to access the footway on the northern side of Gretton Road, which is being constructed as part of the residential development opposite the site [Privet Court]. There would also be a further pedestrian access to the site, broadly opposite Sabrina Way, which would again punch through the roadside hedge.

---

<sup>13</sup> List entry no. 1004864.

<sup>14</sup> Woolstone Hill also apparently referenced as Oxenton Hill on certain maps.

*Housing land supply*

17. Criterion 3.iii. to JCS policy SP1 sets a housing requirement of at least 9,899 for Tewkesbury Borough. That equates to 495 dwellings per annum ('dpa'), differing from what is given as 8,640 'demographically' derived needs. The difference between the two figures reflects a conscious approach to addressing economic growth, boosting the delivery of affordable housing, and providing for some flexibility in land supply. JCS policy REV1 requires a partial review of the housing supply for Gloucester and Tewkesbury to commence 'immediately upon adoption of the JCS'.
18. Policy REV1 stems from the withdrawal of the allocation at MOD Ashchurch, following the Defence Infrastructure Organisation's position in that regard at the tail end of the JCS examination. That resulted in anticipated delivery declining abruptly by approximately 2,400 dwellings over the plan period relative to the overall requirement.<sup>15</sup> Whilst that anticipated shortfall appears to have significantly lessened over time,<sup>16</sup> an immediate review has not occurred. Arguably now any review could not be 'immediate'. There is no clear indication as to any future review timescale.<sup>17</sup>
19. At the time of the examining Inspector's report into the JCS, housing delivery in the Borough had been strong. There had been an 'oversupply of 254 dwellings against the annualised housing requirement of 495...'.<sup>18</sup> The concept of oversupply was relevant in the appeal decision of 12 January 2021, whereby 50 dwellings were allowed at land off Ashmead Drive, Gotherington (the '2021 appeal').<sup>19</sup> At that juncture the Inspector explained how since the base date of the JCS there had been 'an overall surplus of 1,115 dwellings' relative to the requirement in policy SP1 as above. Nevertheless the Inspector there reached the position that past additional supply should not be counted ahead. By consequence the Inspector found that forward housing land supply stood at about 2.4 years' worth.<sup>20</sup>
20. A challenge to the 2021 appeal was unsuccessful.<sup>21</sup> The potential for guidance in respect of oversupply was referenced in the NPPF prospectus published (22 December 2022). Whether that will be taken forward is, however, hypothetical. Setting that aside, the 2021 Housing Delivery Test data ('HDT') for Tewkesbury Borough Council stood at 159% relative to the previous three years' requirement.<sup>22</sup> HDT across the JCS area is similarly strong. In the foregoing context there has evidently not been 'significant under delivery' of housing over the previous three years with reference to NPPF paragraph 74. c).
21. The 11 December 2022, however, marked the fifth birthday of the adoption of the JCS. NPPF paragraph 74 sets out that a supply of specific deliverable sites should be calculated relative to 'local housing need ('LHN') where the strategic

<sup>21</sup> *Tewkesbury Borough Council v Secretary of State for Housing Communities and Local Government* [2021] EWHC 2782 (Admin) (18 October 2021), CD F.18.

<sup>22</sup> Within the terms of HDT methodology.

- policies are more than five years old<sup>39</sup>.' Footnote 39 sets out that it does not apply where strategic policies have been reviewed and found not to require updating. As with the immediate partial review required pursuant to JCS policy REV1, that has not occurred.
22. LHN generates, as a minimum, a housing need figure of 578dpa for the Borough. In the light of the unsuccessful challenge to the 2021 appeal, TBC do not propose that any oversupply in terms of delivery in previous years be counted or cast forward. I note, however, that Jeremy Butterworth's housing proof on behalf of TBC notes that oversupply over the first 11 years of the plan stands at 815 dwellings.<sup>23</sup>
  23. That is significantly less than 1,115 cited by the Inspector in respect of the 2021 appeal. The reasons behind that are unclear. The absence of a review in terms of identifying provision towards the tail-end of the plan may be a factor. Setting that entirely aside, however, TBC and the appellant agree that the 5YHLS requirement ('5YHLSR') is 3,035 dwellings, representing 607dpa.
  24. A central area of dispute between TBC and the appellant is whether 2,000 homes derived from three JCS urban extension allocations should be 'counted' towards anticipated forward supply in the Borough specifically. Those allocations are at Innsworth and Twigworth, South Churchdown and North Brockworth. They are respectively subject to JCS policies A1, A2 and A3.<sup>24</sup> Criterion 2 to JCS policy SP2 explains how the 'unmet needs', i.e. those needs which cannot be accommodated within the administrative boundaries of Gloucester City Council will be delivered on strategic allocations sites identified via policy SA1 (which refers to policies A1 to A7).
  25. On 26 June 2023 an appeal decision was allowed at Alderton.<sup>25</sup> There the Inspector explained 'in this circumstance it is common ground that no 5-year supply can be demonstrated as the supply falls between 2.27 and 3.32 years'.<sup>26</sup> The 'in this circumstance' caveat refers to the implication of discounting contributions from the allocations above. I have adopted the convention of the Inspector there as referring to those allocations, for brevity if not exactitude, as 'donor sites'. The Alderton decision followed an earlier appeal decision at Twynning where the legitimate contribution that donor sites make towards the TBC's 5YHLS was also at issue.<sup>27</sup>
  26. The role of donor sites, somewhat surprisingly, remains in dispute. Overall, the updated statement of common ground between TBC and the appellant puts those parties' respective positions in terms of forward housing land supply as 6.68 or 2.14 years' worth (4,055 or 1,302 dwellings relative to the 5YHLSR of 3,035).
  27. As summarised in Jeremy Butterworth's housing proof on behalf of TBC, that Tewkesbury would meet a proportion of needs instead arising in respect of Gloucester City Council's administrative area 'was not an agreement dictated by national policy or guidance; it is the product of cooperation between the

---

<sup>23</sup> CD C.22, paragraph 5.3.2.

<sup>24</sup> All of which have overall capacities exceeding the proportion included by TBC in their position on 5YHLS.

<sup>25</sup> APP/G1630/W/22/3310117.

<sup>26</sup> Ibid. paragraph 31.

<sup>27</sup> APP/G1630/W/21/3284820, CD F.1.

JCSS authorities to address the needs identified in the JCS'.<sup>28</sup> Via that proof it is also contended that establishing and maintaining a 5YHLS has 'nothing to do with plan making', in contrast to setting a housing requirement.<sup>29</sup>

28. TBC also argue that the approach arrived at via the JCS was over the plan period of 2011 to 2031, rather than directed towards a rolling 5YHLS. I am further directed to be concerned with the 'concept of delivery which is distinct to the concept of deliverability'.<sup>30</sup> Moreover TBC emphasise that inputs to LHN calculations, both 2014 based household projections ('HHP2014') and median workplace-based affordability ratios, are set out by local planning authority area rather than reflecting areas covered by joint plans. There is some logic in the foregoing, but only so much.
29. Albeit that the precise redistribution or allocation of housing amongst JCS authorities was not prescribed by national policy or guidance, it was evidently informed by them and by the Duty to Cooperate ('DtC'). All iterations of the NPPF since the original version of 2012 have referred to the need to boost significantly the supply of housing, and that consistency with national policy is a test of a plan's soundness. The exercise of the DtC is, moreover, not a matter of process without effect.
30. Neither the NPPF nor PPG alter the statutory basis for decision taking set out above. It appears that TBC lean heavily on that fact on the one hand (in the eventuality I were to find that the most important policies should be deemed out of date). However, on the other hand, TBC appear to disregard the statutory basis for decision-taking on account of the methodology by which LHN is established. Those are contradictory positions.
31. The JCS could not have foreseen the LHN methodology, and explanatory text to a policy does not have the same force as the policy wording itself. Nonetheless JCS paragraph 3.2.23 sets out how 'dwellings being delivered on urban extensions to Gloucester or Cheltenham will contribute solely to the needs of the area's respective OANs and land supply calculations'.<sup>31</sup> Donor sites were therefore not only envisaged as the logical marrying up of anticipated delivery across the JCS area with aggregated needs. They were consciously attributed to land supply in constituent authorities' areas.
32. An appeal is not some form of re-examination of a development plan. Development plan policies are the fundamental starting point for decision-taking. Establishing a 5YHLS is therefore inextricably linked with plan-making. There is also circularity between the two, which plays out over a long period of time. To some extent housing requirements inform delivery. Delivery in turn informs projections. Projections inform a requirement. That circularity is recognised via the use of 2014-based household projections ('HHP2014') to avoid inputting under-delivery in LHN calculations.<sup>32</sup>

---

<sup>28</sup> CD 22, paragraph 3.1.18.

<sup>29</sup> Ibid., paragraph 4.2.5, noting that appeal ref. APP/J1860/W/19/3242098 is brought to my attention ostensibly in support of that position, CD F.19.

<sup>30</sup> Ibid., paragraph 5.4.5.

<sup>31</sup> Distinguishing circumstances here from in respect of the interaction between Vale of White Horse and Oxford City referred to in Cameron Austin-Fell's proof in respect of housing on behalf of the appellant, CD C.18.

<sup>32</sup> PPG Reference ID: 2a-005-20190220.

33. The use of HHP2014 in LHN is also significant. HHP2014 were found to make no meaningful difference to the objectively assessed housing need upon which the JCS was premised.<sup>33</sup> It cannot therefore be argued that any agreement that TBC accommodate the unmet needs of others, or any oversupply relative to housing requirements, is now baked into the calculation of LHN in this instance.
34. I acknowledge that, in the main, Councils enable rather than deliver housing directly. However in a similar manner to my reasoning in paragraph 30 above, TBC's arguments in that regard appear contradictory. Paul Instone's proof of evidence on behalf of TBC in respect of planning, for example, states how 'it is essential that planning decisions reflect reality and actual housing delivery outcomes...'.<sup>34</sup> Setting that aside, NPPF paragraph 74 sets out how a 5YHLS should be updated annually, by its nature reflecting delivery.
35. Moreover, nowhere in the NPPF or PPG is it expressly stated that LHN was intended as a broader shift to planning on an authority-by-authority basis (as might be the simplified summary of the TBC's position). LHN is the 'baseline' for local requirements. The DtC remains. There are multiple references to joint working in the NPPF.<sup>35</sup>
36. Furthermore, and of quite some significance, there is nothing to indicate other than that TBC and Gloucester City Council currently both 'claim' forecast supply from donor sites.<sup>36</sup> That position may of course change in time. Nonetheless that appears to represent a bizarre situation where some housing delivery at donor sites would be occupied once but counted twice.
37. I therefore find that 2,000 homes arising from donor sites should be discounted from the TBC's position in respect of anticipated forward supply. Therefore on that basis alone forward housing land supply stands, at best, at 3.39 years (some 2,055 dwellings).<sup>37</sup> That is a significant shortfall.<sup>38</sup> Accordingly the most important policies should be deemed out of date for the purposes of NPPF paragraph 11.d), a finding which neither alters the statutory basis for decision taking nor indicates the weight to ascribe to any policy conflict.<sup>39</sup>

#### *Location of development*

38. Criterion 1 to JCS policy SP1 makes provision for the delivery of approximately 35,175 new homes over the plan period across constituent authorities. Bullet iii. to criterion 3 specifies the housing requirement for TBC as 'at least 9,899 new homes'. Recognising that the JCS is a strategic document, criterion 2 to policy SP1 sets out how housing is to be delivered, namely by development 'within existing urban areas through District plans, existing commitments, urban extensions to Cheltenham and Gloucester, and the provision of Strategic Allocations at Ashchurch'.

<sup>33</sup> CD D.18, paragraph 48.

<sup>34</sup> CD C.20, paragraph 5.48.

<sup>35</sup> Paragraphs 17.a) and 24 to 27.

<sup>36</sup> CD C.18, paragraph 10.2.

<sup>37</sup> CD C.15 (as updated at the Inquiry).

<sup>38</sup> Even were 815 dwellings 'oversupplied' since 2011 accounted forward, effectively 'raising' delivery to 2,869, a 5YHLS would still not be in evidence.

<sup>39</sup> TBC identifying what it considers to be a smaller clutch of policies to be 'most important' relative to a more expansive list advanced by the appellant.

39. At its core the approach in JCS policy SP1 is consistent with the objectives of NPPF paragraphs 104 and 105, i.e. in seeking to 'locate jobs near to the economically active population, increasing sustainability, and reducing out-commuting thereby reducing carbon emissions from unsustainable car use.' That consistency is not intrinsically affected by the absence of a 5YHLS, albeit the mechanism by which development was envisaged to come forward in that respect, via criterion 2 to policy SP1, is now evidently out of date.
40. JCS policy SP2 thereafter sets 9 criteria governing the distribution of development. In summary, development is directed towards a hierarchy of settlements in rough proportion to their size and function (consistent with the foregoing objectives). Criterion 5 to JCS policy SP2 is of particular relevance. Along with 11 other settlements, Gotherington is identified as a Service Village.<sup>40</sup> Bullet ii. to criterion 5 is that 'the service villages will accommodate in the order of 880 new homes'. That applies, however, to allocations rather than to applications.
41. Albeit evidence created at a particular point in time, JCS table SP2c refers to a 2015 Settlement Audit Refresh 'SAR'.<sup>41</sup> Any methodology that attributes numerical scores to qualitative factors is inevitably imperfect. Nonetheless in the 2017 iteration of the SAR Gotherington is ranked sixteenth overall, with only 5 other Service Villages ranking higher.
42. JCS policy SD10 acts in consort with policies SP1 and SP2. Criterion 2 to JCS policy SD10, unsurprisingly, sets out how development will be permitted where allocated via the development plan. That is evidently not the case here. Criterion 3 to JCS policy SD10 accords support to housing development on previously developed land 'in the existing built-up areas of Gloucester City, the Principal Urban Area of Cheltenham and Tewkesbury town, rural service centres and service villages...'. The appeal site is instead agricultural land.
43. The scheme would similarly not accord with the circumstances defined in the remaining criteria to policy SD10, nor those in TBP policy RES3, where certain other types of development may be acceptable.<sup>42</sup> Albeit applying to different forms or types of development than the proposal here, those criteria nevertheless remain aligned with various provisions of the NPPF.
44. Although pre-dating the JCS, the GNDP was nonetheless informed by its preparation. GNDP paragraphs 5.6 and 5.7 explain how the figure of 'in the order' of 880 in JCS policy SP2 had been 'disaggregated' to settlements. That was by way of TBC's February 2015 document entitled 'Approach to Rural Sites' ('ARS').<sup>43</sup> The ARS balances multiple factors to arrive at a numerical apportionment of housing, including accessibility to 'Cheltenham and Gloucester' (*sic*), informing an apportionment of 86 homes for Gotherington between 2011 and 2031.

---

<sup>40</sup> Table SP2c, cross referenced in criterion 5 of policy SP2.

<sup>41</sup> An earlier iteration to the 2017 version at CD D.3.

<sup>42</sup> The scheme is not 'very small scale' brought forward as a rural exception site, as 'infilling', via the Community Right to Build or neighbourhood development order, via other 'specific exceptions' such as rural workers' dwellings, nor does it involve the re-use of existing buildings or the replacement or subdivision thereof.

<sup>43</sup> The ARS and GNDP cross-reference iterations of the SAR.

45. It is worth pausing to reflect on where Service Villages are located. Twynning falls to the north of Tewkesbury, Tewkesbury itself being broadly to the north of Cheltenham and Gloucester. Gotherington is to the north-east of Cheltenham, Alderton some distance beyond the Village in that direction. Neither Twynning nor Alderton could rationally be said to be as accessible to Cheltenham and Gloucester as Gotherington. Minsterworth is to the south-west of Gloucester, roughly comparable in distance from Cheltenham as Gotherington is to Gloucester.
46. Spatially Gotherington is therefore relatively well placed amongst Service Villages in terms of accessibility. That may partially account for why a figure of 86 homes was derived for Gotherington, more than the simple average of 73 that would be generated by dividing 880 dwellings by 12 Service Villages.
47. The proposal does not, however, benefit from support via GNDP policy GNDP01. That policy instead accords conditional support to infill development within the Village. Policy GNDP02 makes provision for three housing allocations (GNDP02/1, GNDP02/2 and GNDP02/3). Those allocations, now built out, are mapped at GNDP figure 6. GNDP02/1 is to the far west of the Village, to the north of Malleson Road by no. 116. GNDP02/2 is obliquely opposite GNDP02/1, accessed also via Shutter Lane. GNDP02/3 (Privet Court) also has a frontage to Gretton Road, being to the north thereof and squarely opposite the appeal site.
48. At the time of the 2011 census there were 448 dwellings recorded at Gotherington. Combining anticipated provision from allocations and 26 housing completions since 2011, the GNDP envisaged that 92 dwellings would come forward here to 2031. In proportionate terms, that would represent a 21% increase.
49. Via the 2021 appeal, however, up to 50 dwellings were allowed at land off Ashmead Drive.<sup>44</sup> MLAG therefore calculate that the current number of dwellings approved at Gotherington since 2011 now stands at 148, with applications yet to be determined for a further 20.<sup>45</sup> Numerically 148 dwellings relative to 448 represents a 33% increase, an additional 45 would reflect growth of some 43% in those terms.
50. The Inspector who determined an appeal in 2021 at Willow Bank Road Alderton allowed development that would have increased the size of that Service Village by 36% relative to 2011.<sup>46</sup> Conversely the representation of CPRE Gloucestershire refers to a 2015 appeal at land east of St. Margaret's Drive Alderton.<sup>47</sup> There an appeal was dismissed that would have increased the size of that village by 39%. A lesser proportionate increase to a village was also allowed by an Inspector at Gretton Farm.<sup>48</sup>
51. However there is no proportionate threshold set in the development plan beyond which expansion of Service Villages would be considered

---

<sup>44</sup> Ref. APP/G1630/W/30/3256319, CD F.7, following an unsuccessful earlier appeal APP/G1630/W/17/3175559, CD F.6.

<sup>45</sup> MLAG closing statement, paragraphs 4.4 and 4.8.

<sup>46</sup> APP/G1630/W/20/3259637, CD F.10.

<sup>47</sup> APP/G1630/A/14/2222147.

<sup>48</sup> APP/G1630/W/22/3296143.

unacceptable. The figure of 880 dwellings has also not stood the test of time in the light of the inability of TBC to demonstrate a 5YHLS. That figure is indivisible from the numerical approach to directing development across the JCS area. Statistics are also, at best, crude approximations for effects. Statistics also belie detail or judgements. It could also, legitimately, be said that the proposal would represent a 19% level of growth at Gotherington relative to planned-for levels.<sup>49</sup>

52. Policy GNDP02 also sets five criteria which development other than allocations are encouraged to meet. They are, in summary, a preference for development that a) adjoins the settlement boundary, b) maintains the Village's east-west linear form, c) safeguards the AONB, d) maintains separation to Bishop's Cleeve and Woolstone, and e) otherwise accords with the GNDP.
53. Those criteria, however, relate to the eventuality that 'the future development plan identifies an additional need for further strategic housing development'. GNDP policies GNDP03 and GNDP11 set out circumstances in which unallocated development outside the settlement boundary may be acceptable. In a similar manner to JCS policy SD10 and TBP policy RES3, none apply expressly to the development proposed.
54. Conflict with the development plan may be said to represent harm in and of itself. The NPPF emphasises the importance of a genuinely plan-led system, and also notes how neighbourhood plans enable the creation of a shared community vision for an area.<sup>50</sup> Logically there must come a point where unplanned housing delivery skews the strategic approach to locating development, or interferes with the objectives that a plan is designed to achieve.<sup>51</sup>
55. However, as above bullet ii. to criterion 3 of JCS policy SP1 seeks to enable provision of 'at least' 9,899 homes. Bullet ii. to criterion 5 of JCS policy SP2 employs a similar phrase, i.e. 'in the order of' 880 homes. Numerically neither of those figures therefore reflects an inherent limit beyond which any additional development would be unacceptable. I have also reasoned above that Gotherington is relatively well placed relative to other Service Villages in terms of accessibility.
56. I appreciate that policy GNDP02 was not conceived of to provide a basis for decision-taking. Nevertheless the appeal site adjoins the settlement boundary. The scheme would maintain the prevailing east-west axis to Gotherington, and would fall neither between the Village and Bishop's Cleeve nor Woolstone. Moreover GNDP allocation GNDP02/3, or Privet Court as it has now become, faces the appeal site on the opposite side of Gretton Road. I will return to the relationship of the scheme to the village, but there is no real differentiation between the two in terms of location.

---

<sup>49</sup> Subtracting 92 dwellings from 148, and adding 45 proposed here gives 101. 448 dwellings as at 2011 plus 92 planned for makes 540. 101 is approximately 19% of 540.

<sup>50</sup> Including at paragraphs 15 and 29, albeit that the GNDP is now approaching its sixth birthday with reference to NPPF paragraph 14. a)

<sup>51</sup> That criterion 5 to JCS policy SP2 refers to taking account 'existing levels of growth' reinforces that point; the accumulation of multiple smaller schemes over time may be significant collectively.

57. I acknowledge that there are limited local employment opportunities at Gotherington. Future residents would be, to some extent, reliant upon the use of private vehicles (including given the relatively limited bus service operational here). However the economy is not now so dependent on physical employment spaces as it once was. Any additional development at Service Villages would, moreover, increase car-reliance and associated emissions to greater or lesser degree (arguably to a greater degree at several Service Villages other than Gotherington). I therefore conclude that the effects of the development proposed in terms of its location would be acceptable.

*Community cohesion*

58. TBC aver that the proposal risks the 'erosion of community cohesion'.<sup>52</sup> They also state how 'negative social impacts can however result where the number of dwellings in a settlement is substantially increased without proportionate increases in infrastructure, employment opportunities and other local services'.<sup>53</sup> GPC and MLAG argue similarly, also making observations regarding the relationship of the site and proposal to the existing Village.
59. To some extent the TBC's position is a spur to the second main issue above, being relevant also to JCS policy SP2. Criterion 5 to JCS policy SP2 refers to taking into account the 'environmental, economic and social impacts [of development] including existing levels of growth over the plan period' (my emphasis).
60. As reasoned above, however, criterion 5 to JCS policy SP2 is directed towards establishing allocations rather than to determining applications. As the appellant notes, even if it were directed towards decision-taking, 'measures to mitigate' adverse effects are sought. As a phrase 'community cohesion' is referenced in the NPPF. However that is in relation to crime, disorder and the fear thereof.<sup>54</sup> There are no substantive arguments before me that those issues are of particular relevance here.<sup>55</sup>
61. NPPF paragraph 8.b), however, articulates the social objective to planning as to 'support strong, vibrant and healthy communities,' including by addressing future needs. The concept of community cohesion could be said to be relevant there. Albeit that the NPPF has been revised since the 2017 appeal, that is nevertheless the premise upon which the previous Inspector's reasoning was based. There are also parallels in that respect with the Inspector's reasoning in a 2015 appeal at St. Margaret's Drive Alderton.<sup>56</sup>
62. Whilst TBP policy RES5 is also referenced by TBC in respect of cohesion, that appears principally focussed on the design of housing development. There is only a glancing reference to development being of an appropriate scale relative to the relevant settlement. Planning should, however, ensure appropriate provision of (social) infrastructure.<sup>57</sup> That angle to the concept of community cohesion was, amongst other things, addressed by the Inspector who determined the 2021 appeal.

---

<sup>52</sup> CD C.8, paragraph 1.4

<sup>53</sup> Ibid., paragraph 5.20, said to draw from the Housing Background Paper of October 2019 at appendix E.

<sup>54</sup> NPPF paragraphs 92.b) and 130. f).

<sup>55</sup> Nor in respect of TBP policy HEA1.

<sup>56</sup> APP/G1630/A/14/2222147.

<sup>57</sup> Being referred to, amongst other locations, at NPPF paragraphs 11, 34 and 124.

63. In that context my reasoning under this main issue focusses in turn on the social objective to planning, implications for infrastructure and how the scheme would relate to the existing Village.

*The social objective to planning*

64. The proposal has generated significant local concern, GPC referring to 151 objections. MLAG further contend that, as a result of the number of proposals here and elsewhere, the extent of local objection may be underrepresented on account of consultation fatigue. As stated previously, the population of Gotherington has increased in recent years resulting in some change.
65. There is evidence before me indicating that various local clubs or associations are stretched to, or beyond, capacity (including the local football, cricket and history clubs). MLAG's closing statement explains how 'since the Inquiry, an organiser of the Wine Club has advised that it has again reached capacity'. MLAG also intimate that prospective residents of the development proposed would be less time rich than existing residents, and thereby less likely to actively contribute to Village life. MLAG also point out how 'the practice of saying 'hello' to everyone you pass is already less common than it used to be'.
66. I acknowledge that change can be disquieting. However that is in large part based on perception. It might equally be argued that changes in the size or composition of a community do not intrinsically negatively affect cohesion. Additional people may bring positive energy and different experiences. Clubs at Gotherington are organised by its residents. New residents may support existing clubs and activities, for example enabling events to run more often, or themselves generate new propositions.
67. Paragraph 3.20 of the GNDP references the 'imperative' of ensuring local services are maintained. I understand that recently the Village bakery and hairdressers, for clarity two different services, have recently shut down. Wider economic forces and consumption preferences unarguably played a role in that. Nevertheless a growing population inherently brings increased trade (some of which, given the opportunity, is likely to be localised). That is recognised via NPPF paragraph 79. There is therefore nothing to indicate that undue harm would arise in respect of the social objective of planning in itself.

*Implications for infrastructure*

68. It is not axiomatic that 'increases in infrastructure' are necessary as population rises as it is put by TBC.<sup>58</sup> Nonetheless, community infrastructure at Gotherington is comparatively limited. GPC explain how the Village Hall has a fire certificate for only 80 people, and that there is limited parking provision there and in association with the neighbouring Rex Rhodes building. I understand that the Old Chapel by the junction of Gretton Road and Cleeve Road has a useable floorspace of only around 48 square metres, sufficient only to seat a maximum of 40 people.
69. Freeman's Field next to the Village Hall has been the focus of recreation at Gotherington since 1964. I am told, however that the area devoted to

---

<sup>58</sup> Noting that NPPF paragraph 57 sets out the tests for establishing where planning obligations may legitimately be sought (and by extension, taken into account).

recreation is now only around 1.47ha, and that there is limited capacity also at the associated John Woolley Sports Pavilion (which opened in 2016). I heard, in particular, arguments as to how there is real difficulty in funding expansion of recreational provision (reflecting the difficulty of practically securing additional land). There is also an acknowledged issue with existing pitch quality.<sup>59</sup> Constraints in terms of local infrastructure have been a long-running factor in the assessment of proposals for development here.

70. Ostensibly reflecting population growth, MLAG are of the view that there is less community infrastructure than there was in 2017 or 2021.<sup>60</sup> Whilst that may be felt to be the case, notwithstanding certain practical challenges, GPC has evidently worked hard to fund provision. A fair chunk of money has been, or is intended to be, spent locally on improvements.
71. I understand that the Old Chapel was, for example, renovated and re-opened for community use in 2021. It is not uncommon for community facilities to have limited physical or parking capacity relative to the local population to which they relate. In line with my reasoning in paragraph 66 above, whilst certain existing clubs may be approaching their natural limit, or oversubscribed, that is not automatically correlated with physical capacity.
72. Moreover NPPF paragraph 55 directs that consideration should be given as to whether otherwise unacceptable development could be made acceptable through the use of conditions or planning obligations (in that order of preference). I appreciate there are practical challenges in identifying suitable projects for funding in and around Gotherington, however based on the evidence before me that does not appear to represent a fundamental barrier to additional growth.
73. Returning to the provisions of the development plan, JCS policies INF4, INF6 and INF7 relate to infrastructure provision. Criterion 2 to policy INF6, in particular, sets out a list of additional infrastructure or service types to which contributions may be sought. JCS policies SD11 and SD12 make provision in terms of housing mix, standards and affordable housing. Those provisions logically apply irrespective of whether or not a 5YHLS can be demonstrated (as they relate to the implications or quality of housing rather than its quantity). Planning obligations must only be sought where they meet the tests set out in NPPF paragraph 57, also contained in Regulation 122 of the Community Infrastructure Levy Regulations 2010 as amended (the 'CIL Regulations'). TBC has CIL in place.
74. The planning agreements under section 106 of the 1990 Act commit all those with a legal interest in the land to the fulfilment of certain obligations in the eventuality that the appeal were to be allowed, conditional on my reasoning. The agreement with the County Council dated 23 June 2023 contains obligations by way of financial contributions towards school transport, library funding and primary education (along with the County Council's costs associated with the implementation and monitoring thereof). Financial contributions in respect of management and maintenance of open space, the LEAP, towards improvement of playing pitches in the general area of the site

---

<sup>59</sup> CD D.26, GPC closing statement.

<sup>60</sup> MLAG Closing statement, paragraph 4.5

(£19,811), in respect of refuse management and monitoring are contained within the agreement with TBC.

75. GPC state that 208 of 210 pupil places at Gotherington Primary School are taken, excluding a waiting list of 12 individuals. I heard heartfelt testimony from Sarah Barsby-Finch as to the adverse social implications of living in the Village but being unable to access a school place. However I understand that GCC administers school places based on an area-based, as opposed to individual school, methodology.<sup>61</sup> I therefore understand that many school places at Gotherington Primary School are already 'taken' by those who live beyond the Village.
76. That may be on account of various factors, albeit that the existing demographic of Gotherington will be amongst them. Arguably in the longer term an increased local population may aid community cohesion as children living in the Village will form an increased component of all places over time.<sup>62</sup>
77. In any event, however, many individuals in the wider area travel to school elsewhere. The scheme would not significantly alter that. Whilst I appreciate there have been delays in the anticipated provision of a new school towards Bishop's Cleeve off the A435, provision of social infrastructure invariably entails some complexities. Neither GCC nor TBC maintain an objection to the scheme with reference to JCS policies INF4, INF6 and INF7 based on the foregoing contributions towards school transport and primary education.
78. I appreciate that the site is some distance from the centre of Gotherington around Freeman's Field. MLAG indicate that the site falls some 885m from it, referring to the Government's Manual for Streets (2007, 'MfS') in that context. However the figure of 800m in paragraph 4.4 of MfS figure is given as approximate guidance in the context of walkable neighbourhoods being 'typically characterised' by walking distances of 'about' that distance.
79. With that in mind both the distance and experience of walking between the appeal site and Freeman's Field would be comparable with walking between the latter and Privet Court (or between properties towards the south of Manor Lane). The Old Chapel and Village Shop are both closer around Cleeve Road.
80. Moreover the scheme would provide for a LEAP, complementary to existing leisure provision in respect of which there are challenges locating available land. I acknowledge that no public rights of way run through the appeal site. However I am also told, and saw during my site visit, how public rights of way nearby including Sabrina Way are relatively well used. Subject to being sensitively designed and well managed, the LEAP would in my view be a welcome part of community provision.
81. The planning agreement with TBC also contains provisions securing 40% affordable housing in line with JCS policy SD12, a proportion of housing compliant with approved document M4(2) and M4(3)(b) of Approved Document M in respect of accessibility, and also compliance with the Nationally Described Space Standards 2015 pursuant to policy SD11.

---

<sup>61</sup> Reference is made to the 'Gotherington Primary Academy and/ or the Bishop's Cleeve Primary Planning Area'.

<sup>62</sup> MLAG indicating that process may, however, take seven or more years given the existing composition of the school and operating eligibility requirements for places.

82. There is an appropriate basis for all contributions, including as evidenced via representations of relevant consultees and associated methodologies.<sup>63</sup> There is no dispute between TBC or GCC and the appellant over the justification or appropriateness of any of the planning agreements. Given my reasoning above, the obligations contained within the S106 are necessary to make the development proposed acceptable and also accord with the relevant provisions of NPPF paragraph 57 and CIL Regulation 122.
83. Drawing together my reasoning, although the proposal would increase the population at Gotherington and may put some strain on existing community facilities and organisations, that would neither be excessive, nor would conflict arise with relevant elements of the development plan or provisions of NPPF paragraph 8.b).

*Landscape and local character*

84. As above, the site falls next to the AONB. The AONB has an irregular boundary, which here tracks along the eastern side of the railway to the bridge over Gretton Road by Gotherington Halt. The boundary then 'returns' towards the Village along the opposite side of Gretton Road, after a while heading up into the landscape by Sabrina Way. Thereafter the AONB extends roughly from the Tirl Brook towards Woolstone Hill.
85. Section 85(1) of the Countryside and Rights of Way Act 2000 as amended (the '2000 Act') places a duty upon me to have regard to the purpose of conserving and enhancing the natural beauty of the area of outstanding natural beauty. NPPF paragraph 176 sets out that 'great weight should be given to conserving and enhancing landscape and scenic beauty in National Parks, the Broads and Areas of Outstanding Natural Beauty which have the highest status of protection in relation to these issues.' It further sets out how 'the scale and extent of development within all these designated areas should be limited, while development within their setting should be sensitively located and designed to avoid or minimise adverse impacts on the designated areas.'
86. There is a distinction in NPPF paragraph 176 between development within areas of outstanding natural beauty and within their setting. Nevertheless the provisions of section 85(1) of the 2000 Act apply to the exercise or performance of any functions 'in relation to, or so as to affect, land in an area of outstanding natural beauty...' (my emphasis). The PPG explains how section 85(1) is relevant to considering development outside of areas of outstanding natural beauty but which might have an effect on their setting or protection.<sup>64</sup>
87. Addressing the landscape implications of proposal, including in relation to areas of outstanding natural beauty, is intricate and has been litigious. The Cotswolds National Landscape Board's representations refer to the judgement in *Monkhill* in that context.<sup>65</sup> Paragraph 63 of that judgement sets out that NPPF policy on areas of outstanding natural beauty is capable of representing

---

<sup>63</sup> Including Gloucestershire County Council's School Places Strategy 2021-2026 (published March 2021) and GCC's Local Development Guide (updated March 2021).

<sup>64</sup> Reflected via PPG Reference ID: 8-039-20190721.

<sup>65</sup> *Monkhill Ltd v Secretary of State for Housing, Communities And Local Government* [2019] EWHC 1993 (Admin) (24 July 2019).

- a 'clear reason' for refusing the development proposed (a phrase now in NPPF paragraph 11.d)i.
88. Logically the inverse is also the case; if there is no 'clear reason', NPPF paragraph 11.d)i. would not be engaged. Moreover 'great weight', as referred to in NPPF paragraph 176, does not displace the need for judgement as to the effects of a given scheme.
  89. Various development plan policies set out how development should, in broader than AONB terms, integrate appropriately with its surrounding context.<sup>66</sup> Bullet points b) and a) to NPPF paragraph 174 set out how planning policies and decisions should contribute to and enhance the natural and local environment by both 'recognising the intrinsic character and beauty of the countryside' and by 'protecting and enhancing valued landscapes'. In the context of bullet point a) to NPPF paragraph 174, there was some discussion at the inquiry on the judgement in *Stroud*.<sup>67</sup>
  90. The judgement in *Stroud* addresses the distinction between a designated landscape and a valued landscape. The two may differ. Moreover that a landscape, or element thereof, is 'valued' by local residents does not inherently mean that it amounts to a valued landscape. In short the judgement in *Stroud* refers to demonstrable attributes that would take an area 'out of the ordinary'.<sup>68</sup> The judgement in *Stroud* is referred to in the Landscape Institute's Technical Guidance note 02/21 'Assessing landscape value outside national designations' ('TGN02/21'), albeit with a note of caution.<sup>69</sup>
  91. In this instance the site falls within a Special Landscape Area ('SLA'), designated under TBP policy LAN1. Albeit that JCS policies SD6 and SD7 are relevant to landscape considerations, the sole reference to the SLA in the JCS is to saved policies of the Tewkesbury Borough Local Plan 2006. The JCS did not supersede the saved policy governing SLA (LND2). The 'reasoned justification' to TBP policy LAN1 explains how SLAs are local landscape designations originally introduced through the 1982 Gloucester Structure Plan.
  92. As referenced in the NLMP, the AONB itself was designated in 1966 and extended in 1990. I understand that the boundaries of the SLA and AONB, insofar as relevant to the vicinity of the appeal site, have not been amended since their initial establishment.<sup>70</sup> There is some contention that the railway marks something of an artificial boundary to the AONB. Whilst the boundary to the AONB is as it is, that argument effectively relates to a judgement as to the landscape value of the site.
  93. The reasoned justification to TBP policy LAN1 explains, however, how Special Landscape Areas 'are defined as areas of high quality countryside of local significance. While SLAs are of a quality worthy of protection in their own right, they also play a role in protecting the foreground setting for the

---

<sup>66</sup> Including JCS policy SD4 and GNDP policy GNDP10.

<sup>67</sup> *Stroud DC v SSCLG & Gladman Developments Ltd* [2015] EWHC 448 Admin.

<sup>68</sup> *Ibid.*, also referring at paragraph 26 to the differential referred to in paragraph 86 of this decision.

<sup>69</sup> Including at paragraph A4.1.4.

<sup>70</sup> As discussed at the Inquiry, TBP paragraph 8.4 explaining that the boundaries are unaltered from the 'Tewkesbury Borough Local Plan to 2011'.

adjacent Cotswolds AONB. The SLA is defined where the topography is a continuation of the adjacent AONB and/or where the vegetation and associated features are characteristic of the AONB’.

94. Whilst there is also reference to the SLA being established with reference to identifiable physical features in the landscape, the methodology that led to its establishment has passed into history. It is therefore somewhat difficult to establish the ‘identified quality’ of the landscape in the development plan, the phrase used in NPPF paragraph 174.
95. In that context, Stuart Ryder’s proof in respect of landscape matters on behalf of TBC honestly explains how they have ‘professional difficulties in classifying all SLA areas as a valued landscape on the basis of the original 1982 classification with no access to original assessment and justification for inclusion in the SLA formation.’<sup>71</sup>
96. It is important to note that although this appeal deals with a site, that site is also part of a landscape (whatever spatiality is used to define a landscape).<sup>72</sup> All that intricacy aside, however, I accept the Council’s central premise that implications are all centred on judgement of landscape quality and effects.<sup>73</sup>
97. Both Stuart Ryder’s proof, and that of Michael Davies on behalf of the appellant, refer to TGN02/21 and to the Landscape Institute’s Guidelines for Landscape and Visual Impact Assessment: Third edition (updated November 2021, ‘GLVIA3’). Both have completed respective versions of ‘box 5.1’ to GLVIA3 interpreted with reference to TGN02/21.
98. GLVIA3 and TGN02/21 put some methodological rigour to assessing landscape value and the effects of proposed development. Whilst those documents represent a standardised approach, in a similar vein to my reasoning in paragraph 41 of this decision in respect of the RSA, they inevitably seek to quantify what is, at its heart, a qualitative assessment. The same is true of any evidence (which cannot hope to be comprehensive or uncontroversial in terms of inputs, viewpoints and categorisations).
99. The value of a site, along with its susceptibility and sensitivity to change and the effects of proposed development are inherently matters of judgement. I do not go behind the development plan in that the site falls within the SLA, but nevertheless the respective versions of ‘box 5.1’ are useful in reaching a judgement. Local residents, GPC and MLAG may, entirely understandably, take a different view to the positions of the appellant, TBC and me. TBC also, however, contend that the proposal would ‘also cause harm to significant views identified in the Gotherington Neighbourhood Development Plan.’
100. Albeit that GNDP appendix 3 appears focussed principally on assessing potential implications of site allocations, policy GNDP10 nevertheless sets out how special consideration should be given to certain locally significant views.

---

<sup>71</sup> CD C.25, paragraph 4.8.

<sup>72</sup> Noting the judgement in *CEG Land Promotions II Ltd v Secretary of State for Housing, Communities and Local Government* [2018] EWHC 1799 (Admin), [2019] PTSR 353 referenced in the closing statement on behalf of the Council in that context.

<sup>73</sup> Council closing statement, paragraphs 38 and 45.

That is not to the exclusion of also considering 'other views from footpaths and publicly accessible places'.

101. I am conscious of my footsteps relative to those of the Inspector in 2017 (albeit that they did not expressly tussle with the concept of a valued landscape as opposed to a designated one). Whilst also acknowledging the qualitative nature of assessing landscape effects, the previous Inspector identified that the scheme in that instance would have reduced the 'SLA to just a relatively thin sliver at this point'. Notwithstanding certain moderating factors, notably landscaping, the Inspector there was also of the view that harm would result on account of the inter-relationship of the scheme and AONB, and that the scheme would also have been at odds with 'the generally linear form of the village...'.

#### *Consideration*

102. Against the statutory and policy context above, the proposal would inevitably overwrite what is essentially natural and open land.<sup>74</sup> That would be within the SLA and the development would be visible in conjunction with the AONB (both looking towards the AONB and from within it looking outwards). In summary, amongst other things, and with varying emphases, JCS policies SD6 and SD7, TBP policies RES5, LAN1 and LAN2, and GNDP policies GNDP02, GNDP09 and GNDP10 seek to suitably preserve landscape character. The proposal would intrinsically conflict with the approach in those policies in that regard.
103. The approach in the foregoing policies remains broadly consistent with the NPPF regardless of housing land supply. Nonetheless, as above, NPPF paragraph 170. b) sets out how planning policies should recognise the intrinsic character and beauty of the countryside. Recognise is not synonymous with protect. There is divergence between TBC and the appellant as to whether the site has attributes that might suggest it being a valued landscape, or part thereof.
104. In that context the site rises somewhat as it approaches the railway embankment, the HA indicating the site has experienced some colluvium deposition by consequence. As shown in the LVA, most notably from higher ground to the east and south-east towards Nottingham Hill, the site is widely visible in conjunction with parts of the AONB.<sup>75</sup> The site is also visible in connection with elements of the AONB from various private vantage points, notably from within properties and their plots along Manor Lane. The PS sets out how views out of and into the AONB 'can be very significant'.
105. The site falls within National (landscape) Character Area 107, the Cotswolds ('NCA107').<sup>76</sup> The key characteristics of NCA107 include its undulating geology, notably limestone, dramatic escarpments with open vistas, and an historic landscape incised by valleys and patches of woodland (beech hangers at upper scarps, oak and ash more characteristic of river valleys). The presence of large areas of common land and an extensive network of public

---

<sup>74</sup> Notwithstanding that the land has been much altered by human intervention, including agriculture itself, and that it features trees and is bounded by hedgerows.

<sup>75</sup> Notably from RVP 05, RVP 06, RVP 13, RVP 14 and RVP 15.

<sup>76</sup> Towards the fringes of National Character Area 105, Severn and Avon Vales (Natural England 20 March 2013).

rights of way is also noted. The NLMP summarises that the Cotswolds is a 'rich mosaic of historical, social, economic, cultural, geological and geomorphological and ecological features'. The NLMP includes, as special features, tranquillity, openness and the prevalence of arable land.

106. The Gloucestershire Landscape Character Assessment (2006, 'GLCA') identifies that the site falls within the Vale of Gloucester Landscape Character Area ('SV6B'),<sup>77</sup> defined by the rising landform of the Cotswolds escarpment and Oxenton Hill. The GLCA describes how 'intermittent small ridges, hillocks and undulations that rise above the general level of the Vale are important local features'. I saw how the landscape rising towards Nottingham Hill beyond the railway line includes such features. Albeit limestone is present throughout the Village as a building material, the GLCA notes how Gotherington grew up around a superficial deposition of Cheltenham Sand and Gravel (overlying the Charmouth Mudstone Formation). The GLCA also refers to a greater mix of arable and grazing land than indicated via higher-level studies, with low hedgerows punctuated by trees representing a common boundary treatment as at the appeal site.
107. As defined in the Cotswolds AONB Landscape Character Assessment (2016), the site falls within the Cooper's Hill to Winchcombe Landscape Character Type ('LCT2D').<sup>78</sup> Of note relative to other studies is that LCT2D is described therein as less extensively wooded than elsewhere, characterised by large unenclosed areas of rough grassland on upper slopes and improved pasture in moderately sized enclosures elsewhere.
108. There is a degree of topographic, visual and broader perceptive connection between the site and AONB in terms of character and appearance. At present, notwithstanding any intermittent agricultural use, the site contributes to the rural environs of Gotherington. In that context the site presently embodies broader sensory qualities, including as a result of its relative tranquillity and lack of illumination, which are shared with the AONB.
109. However, for the most part, the site is essentially level and slopes only gently, verging on imperceptibly. It possesses no lively geophysical features. There is a more marked change in the landform from the embankment heading eastwards,<sup>79</sup> and also heading north-west along Sabrina Way. The crests of Woolstone Hill and of Nottingham Hill are instead part of the Birdlip Limestone Formation. Albeit an artificial intervention, the railway line cuts a logical contour through the landscape. Neither in elevation nor topography is the site distinctly different to much other land around Gotherington, including that to which GNDP allocations relate.
110. As inherent in the GLCA characterisation of SV6B set out above, the land here is partially defined by the rising landform elsewhere. The site is effectively framed by, rather than itself creating or enabling, viewpoints and vistas of dramatic escarpments. In my view its qualities of being essentially open, natural and tranquil should not be over-stated. From most, if not all, public vantage points the site is inevitably seen in conjunction with mid-to-late twentieth century development along Manor Lane and elsewhere.

---

<sup>77</sup> Within the 'Settled Unwooded Vale' Landscape Character Type.

<sup>78</sup> Part of the wider 'Escarpment'.

<sup>79</sup> Noting LVA figure 10 in particular.

111. From panoramas obtainable towards Nottingham Hill and Woolstone Hill, the site forms a comparatively small landscape component (and then one seen in the context of other elements of the Village). That is similarly the case of the fleeting experience of the site if travelling along the GWR. Whilst the site is surrounded by hedgerows, and there is the remnant of a historic hedge line through it, the site is also bisected by power lines. It is set next to the principal highway through the Village and directly opposite Privet Court (which has physically extended development along Gretton Road here by around 130m since the 2017 appeal).
112. It is also worth noting that the previous Inspector referred to a Landscape and Visual Sensitivity Study ('LVSS') undertaken for TBC in November 2014. I understand the LVSS informed the process by which Service Villages were identified via the JCSS to accommodate development. The Inspector noted how the site, falling within wider land parcel 'Goth-05', was identified as having medium landscape sensitivity to new development. The LVSS is also referred to in the appellant's landscape note.<sup>80</sup> Only 'Goth-04' and 'Goth-06' amongst land encircling Gotherington were found in the LVSS to have both a lower level of landscape and visual sensitivity.<sup>81</sup> Unlike either of those land parcels, there are no public rights of way through the appeal site.
113. Truman's Farmhouse is grade II listed and some of its outbuildings are historic. Gotherington is dotted with listed buildings, principally astride Gretton Road. Notwithstanding the extensive historic lineage of the area, there is nothing to suggest any particular historic or archaeological significance to the site other than being ridge and furrow at some juncture before enclosure in 1807 (and potentially featuring the remnants of a late medieval trackway).<sup>82</sup>
114. As the HA notes, however, evidence of medieval farming is 'widespread in this area'. It is widespread elsewhere. There is no evidence of any associative value of the site, as opposed to the 'rich historical mosaic' of the AONB. Consequently the value of the site to the AONB may fairly be said to be limited. As above the SLA was, in part, established based on the ostensible affinity of land outside the AONB with that inside it, which is not readily apparent here.
115. TBC's and the appellant's respective versions of 'box 5.1' take differential slants in terms of the factor of natural heritage, leaning principally towards physiographic interest and ecology respectively. Within the terms of that factor,<sup>83</sup> however, both are relevant. Physiographically, I have reasoned above that the site only has a limited similarity with the attributes of the AONB. There is undoubtedly some ecological value to the site. However, commensurate with its history as agricultural land, that is comparatively limited.<sup>84</sup> The site is therefore not noteworthy in terms of natural heritage.

---

<sup>80</sup> CD D.22.

<sup>81</sup> Goth 4 being central within the village overlapping with the 2021 appeal site. Goth 6 heading away from Manor Lane by footpath AGO22.

<sup>82</sup> The site having previously been subject to geophysical survey and archaeological investigation in relation to application 16/00539/OUT, without significant outcomes.

<sup>83</sup> 'Landscape with clear evidence of ecological, geological, geomorphological or physiographic interest which contribute positively to the landscape'.

<sup>84</sup> CD A.8.

116. TBC's perspective on the TGN02/12 factor of 'distinctiveness', it appears, derives principally from the site's interaction with the Cotswold Escarpment. However I have reasoned that the site now features none of the small ridges, hillocks or undulations the GLCA aptly describes as important local features. I have also set out above how the site is effectively defined by virtue of its different qualities to much of the AONB. The site does not possess, topographically, historically, or more broadly in terms of perception, meaningfully different qualities from much of the rural environs of Gotherington.
117. Similarly, in respect of the TGN02/12 factor of 'functional', TBC's perspective leans heavily towards the site's function as part of a landscape to the AONB.<sup>85</sup> However, intrinsic in my reasoning above is that the site does not, in itself, provide a 'clearly identifiable and valuable function, particularly in the healthy functioning of the landscape'.
118. TBC's position in terms of landscape condition is that 'the site and its contextual area is in a good landscape condition with limited detracting features other than ongoing construction of housing to the north of the site'. There are, however, are other 'detracting features' (see paragraphs 110 and 111 above).
119. The site might fairly be described as a typical field managed for low-intensity agriculture. There is some evidence of hedgerow loss, albeit historic, and there are few trees. Hedgerows are of variable quality, and none appear important within the terms of the Hedgerows Regulations 1997 as amended (as set out in the HA). Albeit I accept that MLAG object to its characterisation as such, in respect of this factor the site representing an 'everyday to good' landscape condition is a fair summary.
120. Turning for comprehensiveness to the other factors in box 5.1, there is no strong cultural resonance or associative value to the site. There is presently no inherent recreational value to the site, other than insofar as it contributes to that which exists elsewhere. That is in contrast to other elements of the SLA which are instead characteristically criss-crossed by public rights of way. There is evidently some tranquillity by virtue of the site's current nature and use. However, as above that is qualified by various factors. There appears to be a stronger sense of tranquillity within the SLA to the north and south of the linear form of Gotherington as opposed to along Gretton Road and Malleson Road. The site is evidently not a wilderness.
121. Nearby residents understandably place considerable value upon the site as part of the landscape, along with outcome 14 of the AONBMP referring to health and wellbeing (which may of course be aided by the presence of nature and a natural outlook). However for the foregoing reasons the site does not possess demonstrable attributes out of the ordinary.

---

<sup>85</sup> Albeit that it is also stated, accurately but flatly, that 'it also acts as part of the setting to the east of Gotherington'.

*The effect of the development proposed*

122. Albeit reduced since the scheme in 2017, the proposal would inevitably result in some landscape harm; 45 homes and associated infrastructure would be significant, including in proportional terms to Gotherington. Three breaks in the roadside hedge would be created, amounting to a total of about 35 metres of loss. A large part of the site would become residential in character, diverging from its current appearance as part of a farm at the periphery of the Village.
123. I acknowledge that the scheme would not reflect the single line of development, contended by MLAG in particular to be typical at the fringes of Gotherington. The level of density proposed would exceed that at Manor Lane and the residential density in other locations around the Village. The site would also be arranged along a roughly north-west to south-east axis.
124. The scheme would inevitably be visible from within the AONB and in conjunction with views towards it. I accept that there are other vantage points than those in the LVA from where views of the site may be obtained of the site, or in relation to the site and the AONB. I also acknowledge that the representations of the site are hypothetical (albeit that there is no robust evidence indicating that they are anything other than a suitable basis for considering the scheme within the terms of their own methodologies).
125. Both proofs on behalf of the appellant and TBC in respect of landscape broadly agree that the scheme would have a particular effect in relation to the experience of walkers, sensitive receptors, proceeding downwards from Nottingham Hill and taking in the vista in that broad direction. That the scheme would bring additional residents to a place whereby the AONB might be appreciated is a somewhat incidental argument (which could be true of any development, however incongruous).
126. Although trite the scheme would, however, affect a small proportion of the SLA, of the setting of the AONB, the setting of Gotherington and the consistent landscape characterisation parcels of which it is part. Only 1.8 hectares would be 'developed', some 54% of the site area being given over to public open space and landscaping.<sup>86</sup> As set out above the scale of dwellings proposed would decline heading north-eastwards through the site as the SLA tapers between the AONB boundaries there.
127. In form, architecture and materials the dwellings proposed would not be discordant with neighbouring properties, or many properties elsewhere at Gotherington. The maximum height of properties would respect those of Privet Court (as could be secured via condition related to ground levels). Noting the reference in NPPF paragraph 124 to the efficient use of land, there is no compelling justification for emulating previous patterns of development in current circumstances.<sup>87</sup>
128. The pattern of development at Gotherington is also not without variety. Although to the north of Gretton Road properties tend to be arranged in single plot depth, that is not the case between Shutter Lane and Cleeve Road. 'The

---

<sup>86</sup> CD C.19, notwithstanding any categorisation of the associated pond, pumping station and LEAP.

<sup>87</sup> Also acknowledge via JCS policy SD10, criterion 6.

Lawns' also tracks behind Gretton Road. Manor Lane itself spurs off from Gretton Road southwards. As planting and landscaping matures, including at the bund proposed by the collection of buildings at Truman's Farm, the proposed dwellings would become more recessive (albeit they would inevitably not be occluded from view).

129. In terms of the morphology and historic development of the Village, the proposal would maintain the prevailing east-west form of the village overall. By retaining a significant proportion of the roadside hedge, by virtue of the scale of dwellings declining north-eastwards, and by dint of the on-site landscaping proposed, the proposal would not in my view unduly extend the built form of Gotherington. Instead there would be a reasonably comfortable transition to the rural environs of the Village.
130. TBC contend that the proposal would also cause harm to significant views identified in the Gotherington Neighbourhood Development Plan. GNDP policy GNDP10 sets out how special consideration should be given to certain locally significant views (albeit not to the exclusion of also considering 'other views from footpaths and publicly accessible places'). Eight significant views are identified in policy GNDP10, linking to GNDP figure 2. Viewpoints are in turn annotated on GNP figure 3. The nearest viewpoints are nos. 4-8. Those are referenced in GNDP figure 2 as comprising either 'views from Manor Lane' or 'view from Nottingham Hill' within the terms of policy GNDP10.
131. It appears, however that views from Manor Lane are to the west, across 'Goth-6' rather than in the direction of the appeal site. Logically there would be no interference with that view. More broadly buildings at Truman's Farm and the landscaping proposed between existing buildings there and the appeal site would substantially screen intervisibility. At GNDP figure 3, viewpoint 5 is indicated as taken from within the appeal site towards Gretton Road, albeit that appears referenced as the view from Nottingham Hill.
132. As reasoned above the scheme would inevitably be visible as viewed from Nottingham Hill and rights of way leading through the AONB there. However viewpoint 5 appears to be squarely towards Privet Court, such that the scheme would not appear obtrusive viewed in conjunction with it. Other viewpoints indicated, notably nos. 9 to 13, are at a significant distance from the appeal site, such that there would be no meaningful visibility of the scheme (if any at all).
133. Acknowledging that there would be an amalgamation of different effects given the relative sensitivity of receptors, as a fair summary reflecting on the value of the site, its susceptibility and sensitivity to change, the adverse landscape effects of the scheme would be moderate declining towards minor as planting matures. That weighting is arrived at through the lens of NPPF paragraph 176 and section 85(1) of the 2000 Act. Relative to the character of the Village and the built environment, any harm by virtue of the scheme would be limited.
134. As in *Monkhill*, there may be instances where effects in respect of landscape and scenic beauty may provide a clear reason for refusing development in line with NPPF paragraph 11.d)i. However that would not occur here for the above reasons.

## Other matters

135. In addition to comments regarding the issues above, I have taken careful account of all representations in respect of the proposal. Those representations include concerns over the potential implications of the scheme in respect of heritage, flooding, biodiversity, food security, global warming, the living conditions of nearby residents, traffic, utility provision, and the potential for the scheme to presage other development.

### *Heritage*

136. The site is some distance from grade II listed Truman's Farmhouse, about 35m. By virtue of reflecting the former agricultural context in which the listed building emerged, the site has a value to the surroundings in which it is experienced. However that contribution is slight; there are substantial agricultural buildings, of varying age, between the site and listed building. The wider context in which the Farmhouse is set would remain semi-rural (but equally partially residential). As set out above there is little historic value embodied in the site directly, archaeologically or associatively. Consequently, and subject to the bund and other landscaping proposed the proposal would have such limited effect so as to preserve the setting of the listed building, and no undue effect in terms of historic interest more broadly.<sup>88</sup>

### *Flooding*

137. Local residents have highlighted how flooding has occurred in this area previously. There is particular reference to flooding by the railway bridge off Manor Lane and around Sabrina Way, likely arising on account of the topography at the former and by virtue of blockages at the culvert beneath Gretton Road near the latter. However the site itself is within flood zone 1, i.e. at low probability of flooding. As also set out in the Flood Risk Assessment and Drainage strategy ('FRA'), there is some potential for flooding in extreme events focussed towards the north-east of the site (where site and watercourse capacity is exceeded, noting the limited capacity of the site in respect of infiltration drainage).
138. Nonetheless, subject to the approach in section 6.5 of the FRA, namely a piped system and attenuation and retention basin, there is nothing to indicate that the scheme could not suitably deal with adverse conditions (subject to adherence to associated drainage strategy plan 5143652-ATK-DR-D-003 Revision P 5). Development will, in any event, need to adhere to the relevant provisions of Building Regulations 2010 in respect of drainage and waste disposal.<sup>89</sup> My view in that respect accords with that of GCC as lead local flood authority, who summarise the effects of flood risk as 'minimal'.

### *Biodiversity*

139. As described in the EcIA, building upon previous studies, the ecological or biodiversity value of the site is reflected both within its flora and the fauna it supports (principally concentrated around boundaries). There is reference within the EcIA to the site being used by, or offering suitable habitat to, various species including, great crested newts, bats, birds, dormice, slow

---

<sup>88</sup> Cognisant of the duty on me under section 66(1) of the Planning (Listed Buildings and Conservation Areas) Act 1990 as amended.

<sup>89</sup> Guidance in respect of which is currently provided via Approved Document H.

worms and hedgehogs. Local residents have drawn my attention in particular to birdlife and to pipistrelle bats here.

140. Section 40 of the Natural Environment and Rural Communities Act 2006 as amended places a duty on me in respect of the conservation and enhancement of biodiversity, notwithstanding that the 10% biodiversity net gain ('BNG') requirement envisaged by section 98 of the Environment Act 2021 has yet to be commenced. Similarly, in brief, JCS policy SD9 and NPPF paragraph 174 seek to protect and enhance biodiversity, both referencing the value of ecological networks.
141. The proposal would inevitably change the nature of the site, entailing the loss of some habitat and altering the value of the site to certain species. That said, for the most part, the ecological value of the site is limited reflecting the nature of improved grassland and tall ruderal growth.<sup>90</sup> The site is not designated on account of its ecological value and there is no meaningful inter-relationship with areas that are protected in that respect (albeit there are such areas in the wider area including the Dixon Wood Special Area of Conservation). I have noted above that the HA does not indicate that any hedgerows should be considered important in terms of heritage value with reference to the Hedgerow Regulations 1997 as amended.
142. Plan no. 2466\_P22 Revision B in the AIA shows that, aside from in respect of site accesses, all trees would be retained, thereby preserving the most ecologically significant features. Subject to landscaping and planting, whilst the proposal would inherently reduce the quantity of 'natural' land at the site, the EcIA also sets out that the scheme would deliver BNG of about 132.07% (with the overall quantity of hedgerow to be increased by about 29.41%). That, in my view, is significant. Such benefits would not otherwise arise, for example were the site to be maintained in agricultural use or more of the site were to be developed (as previously proposed).
143. There is nothing to indicate, subject to a sensitive landscaping scheme, that the LEAP, attenuation basin or pumping station would hinder the foregoing. Appropriate sensitive approaches to managing existing ecology during construction could be secured via appropriately worded conditions. I acknowledge that the BNG figure of 132.07% is theoretical, and may be affected by the behaviour of individuals or by predation associated with domestic animals. However that is nevertheless significant headroom above 10%, such that even were those factors to affect the future ecological value of the site there would remain a significant benefit.

#### *Food security*

144. The NPPF prospectus of 22 December 2022 refers to food security in a planning context, notwithstanding that NPPF paragraph 174. b) already sets out how planning should take account of the benefits of the best and most versatile agricultural land ('BMV'). It has also been argued that the scheme would potentially lead to 'farmland abandonment', by virtue of lessening the overall holding associated with Truman's Farm below a viable level. MLAG also presented concerns that the site is well within 300 metres of agricultural

---

<sup>90</sup> CD A.8, paragraph S.2.

buildings at Truman's Farm, contending that breaches a cordon sanitaire which should be maintained (to ensure the ability to hold livestock there).

145. The proposal would take some land out of productive agricultural use. However even if the site were BMV, the loss thereof would be modest (set against the totality of such land in TBC's administrative area and across the JCS authorities' areas). That some agricultural land will be lost to development is also inherent in the approach in the JCS and TBP. There is no robust evidence indicating that housing needs in the Borough or across the JCS can wholly be accommodated by virtue of the re-use of previously developed land; donor sites indicating to the contrary.
146. Whilst the scheme would reduce the agricultural land holdings at Truman's farm, there is no robust indication that would inherently sterilise other land from productive agricultural use. Many farms also operate across non-contiguous land. There is little evidence before me in respect of existing farming practices here, albeit hypothetically the site may lend itself to grazing, and the farm buildings may be capable of accommodating livestock.
147. The derivation of MLAG's suggested 300 metre cordon sanitaire is unclear, 400 metres instead applying in relation to permitted development rights enabling the erection, extension or alteration of an agricultural building. However permitted development rights relate to development that may be undertaken without specific planning permission, rather than establishing a cordon sanitaire as a rule.<sup>91</sup> In many instances, as is evidently the case here, dwellings and agricultural buildings are located unproblematically far closer to one another. Accepting agricultural activities are, moreover, the logical corollary of living at the periphery of many rural villages. Whilst there is therefore nothing substantive to indicate that the proposal would lead to farmland abandonment, undue constraints to existing or future farming practices, or reciprocally in terms of the living conditions of the occupants of the dwellings proposed, I nonetheless accord limited weight against the proposal by virtue of the loss of agricultural land (assessed as if BMV).

#### *Global warming*

148. MLAG contend that 'the building of an estate on this location would in itself constitute a loss of countryside for the sake of increased urban development; this at a time when governments around the world are trying to reverse the effects of global warming and the decline of many species. We believe this proposal is therefore contrary to Government policy.'<sup>92</sup> Whilst I acknowledge the sentiment behind that statement, it is the function of planning to marry up different interests in the use of the land in environmental, social and economic dimensions. No one objective of the development plan, nor of the NPPF, takes primacy over any other. To suggest, as that does, that development inherently conflicts with Government policy is incorrect.

#### *Living conditions of existing residents*

149. The proposal would affect views from properties along Manor Lane, and I have noted above how the scheme is relatively dense compared to development

---

<sup>91</sup> Notwithstanding that parallel provisions do not exist in respect of more recent permitted development rights for the conversion of agricultural buildings to other uses.

<sup>92</sup> CD C.10, paragraph 5.8.

elsewhere at Gotherington. In that context I acknowledge that the presence of the dwellings and residential activity here would affect the outlook and privacy from which certain properties along Manor Lane currently benefit (notwithstanding that construction would inevitably be temporary and could be managed sensitively via conditions). Living conditions are, in large part, dependent on perception.

150. Nonetheless, as set out in the officer report the minimum separation between properties along Manor Lane and the rear elevations of the dwellings proposed would be 25 metres. That is, in absolute and relative terms, a reasonable separation distance. In relative terms there are comparable separation distances between rear-facing elevations in other locations about the Village.<sup>93</sup> I acknowledge that there would be a closer inter-relationship with no. 44 Gretton Road towards the south-west of the site. However the rear elevation of that property instead faces south-east (towards the rear garden of no.1 Manor Lane). As noted in TBC's officer report, the nearest proposed dwelling at plot 1 would have only a single first floor window facing towards no. 44, serving an ensuite, which could be secured as obscured-glazed via condition.<sup>94</sup>
151. Subject to the foregoing condition, and more broadly subject to a suitably approach to retaining and augmenting boundary features in terms of landscaping, the proposal would not result in undue effects in respect of the living conditions of those nearby (in accordance with the relevant provisions of JCS policies SD4, SD14 and NPPF paragraph 130.f).

#### *Traffic*

152. Being historic in origin, neither Gretton Road nor Malleson Road were designed to accommodate the number of vehicle movements they now do. At the time of my site visit, and in the absence of parking restrictions, a number of drivers had parked along Gretton Road (effectively reducing the space available to motorists to single carriageway). Local residents have identified pinch points in the surrounding highway network where congestion occurs at times, notably at the junction of Malleson Road and the A435 and at junction 9 of the M5. I accept that traffic levels fluctuate, for example around school time or when events are being held at Prescott Hill.
153. The proposal would add to vehicular movements around the local highway network. Nevertheless the effects of 45 new dwellings would be limited relative to baseline conditions. The appellant's Transport Assessment sets out how the scheme would result in approximately 34 or 30 two way vehicular trips in the morning and afternoon peak, representing approximately one additional vehicle on the network every two minutes or so. There are no personal injury collisions recorded in the vicinity of the appeal site over the last 5 years, and appropriate visibility splays and access geometry would be achieved.<sup>95</sup> Albeit that an increase in potential traffic is inevitably unwelcome, the proposal would not result in undue effects in that respect.

---

<sup>93</sup> For example between Yew Tree Drive and Ashmead Drive and around Cinder Close and Brunel Drive.

<sup>94</sup> Drawing no. 046 Rev. A originally, 0.18 Rev. A subsequently.

<sup>95</sup> Noting that neither GCC nor National Highways object to the scheme.

*Utilities provision*

154. Several residents have referred, more broadly than in respect of community cohesion, to utilities or service provision here being strained (citing electricity outages, low water pressure and limited connectivity in particular). That may be the case, nevertheless separate provisions exist by virtue of the Water Industries Act 1991 as amended and the Electricity Act 1989 as amended (including the obligation to facilitate connections). Albeit that connectivity, whether by virtue of broadband or wireless telecommunications, is practically provided by a plurality of organisations, the economic case for improved provision is aided by population increase.

*The potential for further development*

155. Reflecting that the scheme before me has a long history, I am told originating as a scheme for 95 dwellings set out at a public exhibition in 2016, some have expressed concern that allowing the appeal has the potential to presage further development here (or more broadly). Whilst I understand that perspective, I have nonetheless assessed the scheme on its merits. Any other scheme would also be assessed on its merits at that juncture.

*Housing provision*

156. As set out above, at best, there is a significant anticipated shortfall in housing delivery over the coming five years. That is relative to a needs figure established through LHN which has risen substantially since the approach in the JCS (even more so when considered relative to the 'demographically derived' needs figure referenced therein). In my view a shortfall is likely to persist for some time. Some degree of anticipated shortfall has evidently been present since the 2021 Inspector's decision, now approaching three years old.

157. The JCS remains unreviewed in line with REV1 or otherwise, ostensibly resulting in the bizarre situation referred to in paragraph 36 of this decision. Meaningful resolution is only likely to be made in line with significant progress reviewing the development plan in light of the foregoing, and given the presence of various protective designations across the JCS area. There is little clarity in that respect at present.

158. In my view it is of central importance to keep in mind that housing is occupied by people. Dealing with numbers sometimes obscures that. The lack of a sufficient forward pipeline of deliverable housing sites will inevitably mean that the housing needs of many people will not be met. The proposal would be significantly socially beneficial considered in that light. There would also be associated economic benefits in supporting employment during the construction and maintenance of dwellings. As observed above, future residents would also bring trade to nearby services facilities, and may themselves generate other opportunities and community vibrancy.

159. The proposal would also provide for 40% affordable housing as defined by the NPPF. The JCS itself was, as noted by the examining Inspector, a strategy which could not deliver sufficient affordable housing relative to needs within its own terms.<sup>96</sup> TBC do not dispute the affordable housing statistics contained within Cameron Austin-Fell's proof. That proof sets out how net affordable

---

<sup>96</sup> CD D.18, paragraph 51.

housing need in the Borough is around 345dpa, some 70% of the JCS annual requirement of 495dpa.

160. In the 2021-22 monitoring year the number of households eligible for affordable housing in Tewkesbury stood at 1,763, reflecting only a marginal reduction since 2017-18. Looking forward within the parameters of the JCS to 2031 and its housing trajectory, there is likely to be a significant accumulation of unmet affordable housing need in the region of 2,174 (albeit that affordable housing may come forward other than by virtue of representing a proportion of market-led housing).<sup>97</sup> Whilst it appears that median workplace based affordability ratios here have recently levelled out from a previously clear upwards trend, that neither reflects marked improving affordability nor, in the light of the foregoing, the likely start of a likely downwards trend.
161. There are, I accept, only limited needs for affordable housing arising at Gotherington specifically as opposed to elsewhere. Although that might in itself be a product of local demographics and the constraints of the housing market here, there are nonetheless significant and unabating needs for affordable housing in Tewkesbury (and also across the constituent authorities of the JCS). The benefits of the proposal directly, and by consequence of, housing delivery and affordable housing provision may therefore fairly be summarised as significant.

### **Planning balance**

162. NPPF paragraph 11.d) applies by virtue of the most important policies for determining the proposal being deemed out of date. At best forward housing supply in TBC's administrative area stands at 3.39 years, a significant shortfall. In this instance NPPF policies which 'protect areas of assets of particular importance' do not provide a clear reason for refusing the development proposed. Consequently NPPF paragraph 11.d)ii. applies, i.e. permission should be granted unless 'any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole'.
163. As above, that finding neither alters the statutory basis for decision taking, nor do relevant provisions of the development plan cease to exist. Nevertheless I have reasoned that the proposal would be acceptable in terms of its location relative to the approach in the development plan and NPPF and would not, in that respect, undermine a plan-led system. I have also reasoned that the proposal would not unduly affect community cohesion.
164. As a matter of judgement, aggregated landscape effects would be moderate declining towards minor as planting matures, with any harm relative to the character of the Village being limited. Whilst relevant provisions of the development plan are consistent with the NPPF in that regard, the development plan must be considered as a whole (as must the NPPF). There would also be limited harm resulting from the loss of agricultural land. In all other respects the development proposed would be acceptable, or could be rendered so subject to conditions or obligations. However that the scheme would not result in undue effects in respect of other matters, as in relation to community cohesion, is effectively neutral in the overall balance.

---

<sup>97</sup> Cd C.18, table 11.3.

165. On the other hand, taking account of the extent of housing land supply shortfall and the likelihood of it persisting, I accord significant weight to the benefits of the scheme in terms of housing provision, affordable housing, and associated economic benefits. The proposal would also entail significant BNG. The adverse impacts of granting permission would therefore not significantly and demonstrably outweigh the benefits assessed through the lens of NPPF paragraph 11.d)ii. With reference to the statutory basis for decision-taking, other material considerations therefore justify allowing the appeal.

### **Conclusion**

166. For the reasons given above, having taken account of the development plan as a whole and all other relevant material considerations, I conclude that the appeal should be allowed subject to the conditions below and the obligations contained in the planning agreements under section 106 of the 1990 Act.

### **Conditions**

167. In addition to requiring commencement within the relevant statutory period via condition 1, for clarity and so as to ensure that the proposal is implemented as assessed above, I have imposed condition 2 requiring adherence to the relevant supporting plans (as necessarily modified by consequence of discharging other conditions or the obligations contained in the planning agreement with TBC). For similar reasons conditions 3-7 are also necessary, following my reasoning in paragraphs 126 to 129 above (and, notwithstanding the AIA, pursuant to the duty on me in respect of trees under section 197 of the 1990 Act in respect of conditions 6 and 7).
168. Albeit that the planning agreement with TBC makes detailed provision in respect of the LEAP and there are indications before me as to the design, the foregoing is a bilateral arrangement between the appellant and TBC (outwith the relevant provisions of the Town and Country Planning (Development Management Procedure) (England) Order 2015 as amended, the 'DMPO', applicable to applications under section 73 of the 1990 Act). Accordingly condition 8 requiring agreed details in that respect is also necessary, including to ensure that the LEAP integrates suitably with its surroundings.
169. As above, and pursuant to section 41 of the Natural Environment and Rural Communities Act 2006 as amended, conditions 9, 10 and 11 are necessary. Condition 11 is also, in part, justified pursuant to my reasoning in paragraph 108 above (namely to ensure any adverse effects of illumination relative to prevailing character are minimised).
170. Notwithstanding drainage plan 5143652-ATK-DR-D-003 P5 and the relevant provisions of the Building Regulations 2010 as amended, to secure compliance with the final bullet of TBP policy ENV2, condition 12 is also necessary. To minimise waste and ensure efficient use of resources in line with policy WCS2 of the Gloucestershire Waste Core Strategy (adopted November 2012) and policy SR01 of the Minerals Local Plan for Gloucestershire (adopted March 2020) I have imposed condition 13. Condition 14 is also necessary to ensure compliance with policy WCS2 in respect of residential use in addition to construction.

171. Conditions 15 and 16 are necessary in respect of the living conditions of those nearby, including with reference to NPPF 130. f). Pursuant to my reasoning above, condition 17 is also necessary to safeguard the privacy of the occupants of neighbouring no. 44. Similarly, and also to ensure that the site provides suitable provision for future occupants including in relation to accessibility, highway safety and accessibility, I have imposed condition 18.
172. Paragraph 1.3 of the Government's Statutory Guidance related to Part 2A of the Environmental Protection Act 1990 as amended sets out that the starting point should be that land is not contaminated land unless there is a reason to consider otherwise. Given the agricultural history to the site the propensity for contamination to be present is likely relatively low, albeit not inherently absent.<sup>98</sup> Therefore as a precautionary approach to addressing contamination unexpectedly encountered, I have imposed condition 19.
173. Seven conditions are pre-commencement.<sup>99</sup> They are necessary as undertaking any development has the potential to affect topography, trees, the existing nature of the site in respect of landscaping and ecology, the living conditions of those nearby, and to have implications in terms of waste generation and disposal.
174. It is unnecessary to impose conditions related to a noise assessment associated with the GWR and requiring that a welcome pack to new residents be provided. Noise, or more accurately sound, generated by the GWR is intermittent. Stood by the line as a train passed, any noise in that respect is not particularly intrusive. People make an informed choice about where to live. Many may see the proximity of the GWR as appealing. A welcome pack, ostensibly advanced as a means of fostering inclusivity, is not necessary to make the development acceptable in planning terms (however well intentioned).
175. In imposing conditions I have had regard to the NPPF, the PPG and statute. In that context I have amended the wording of certain conditions put to me, and amalgamated some also, to ensure that all are appropriate without altering their fundamental aims.

*Tom Bristow*

INSPECTOR

<sup>98</sup> PPG Reference ID: 33-003-20190722.

<sup>99</sup> Nos. 3, 6, 7, 9, 10, 13 and 14.

## **SCHEDULE 1, CONDITIONS**

- 1) The development hereby permitted shall begin not later than 3 years from the date of this decision.
- 2) The development hereby permitted shall be carried out in accordance with the approved plans listed in schedule 2 to this decision (except as necessarily modified pursuant to discharging other conditions in this schedule or obligations contained within the associated planning agreement dated 26 June 2023 under section 106 of the Town and Country Planning Act 1990 as amended).
- 3) Notwithstanding condition 2, no development hereby permitted shall take place until details of site and development levels have been submitted to, and agreed in writing by, the local planning authority. Details shall include the existing levels on site and adjoining land, finished ground levels and ridge heights. The development shall accord with the agreed details.
- 4) Before their use as part of the development hereby permitted, samples or details, or both, of all external building, boundary treatment and surfacing materials to be used shall have been submitted to, and agreed in writing by, the local planning authority. The development shall accord with the agreed samples and details.
- 5) Before any construction works specifically and solely related to the attenuation pond and pumping station as shown on approved plan DLA.2016.L.06.P11 are undertaken, a drainage strategy shall have been submitted to, and agreed in writing by, the local planning authority. The drainage strategy shall include details of any associated engineering works, levels, design, geometry, materials, boundary treatments and a programme of implementation and planting in respect of those elements of the development hereby permitted. The development shall accord with the agreed details.
- 6) No development hereby permitted, including any site preparation, shall be undertaken until a scheme for the protection of relevant trees and hedgerows has been submitted to, and agreed in writing by, the local planning authority. That scheme shall include a tree protection plan or plans, an arboricultural method statement, and shall accord with the guidance in British Standard 5837: 2012, Trees in relation to demolition and construction (or successor document). The development shall be undertaken in accordance with the agreed scheme.
- 7) No dwelling hereby permitted shall be occupied until a landscaping scheme encompassing both hard and soft landscaping has been submitted to, and agreed in writing by, the local planning authority. The landscaping scheme shall be in broad accordance with approved plan no. DLA 2016.L.06.P11, and shall include, by way of annotated plans or otherwise, details of:
  - i.all existing trees and hedges on the application site (including in respect of the accurate position, canopy spread and species of each tree and hedge, and any proposals for felling or pruning and any proposed changes

within the ground level, or other works intended to be carried out, within the relevant canopy spread),

ii. the layout of proposed trees, hedges, shrubs and grassed areas,

iii. a schedule of proposed planting (indicating species, sizes at time of planting and numbers or densities of plants),

iv. a written specification outlining cultivation and other operations associated with planting,

v. the treatment of pedestrian links to the site,

vi. a programme for undertaking landscaping, and

vii. a schedule of landscaping maintenance for a minimum period of five years from first installation.

All planting, seeding and turfing shall be carried out in line with the agreed details in the first planting season following the first occupation of any dwelling hereby permitted. Any planting, seeding or turfing carried out shall be maintained in accordance with the agreed schedule of maintenance. Any trees or plants which, within a period of five years from the carrying out of landscaping pursuant to this condition, are removed, or become seriously damaged or diseased shall be replaced in the next planting season with others of similar size and species.

- 8) Notwithstanding condition 2, before the construction of the Local Equipped Area for Play ('LEAP'), details thereof shall have been submitted to, and agreed in writing by, the local planning authority. Details shall include levels, materials, surface materials, boundary treatments and a programme of implementation. The development shall accord with the agreed details.
- 9) No development hereby permitted shall take place until a Construction and Environmental Management Plan ('CEMP') has been submitted to, and agreed in writing by, the local planning authority. The CEMP shall accord with, and expand upon where necessary, the measures outlined in the associated Ecological Impact Assessment and BNG report of 27 May 2022, the Outline Dormouse Mitigation Strategy of 13 August 2021, the Outline Great Crested Newt Mitigation Strategy of August 2021, and shall include detailed method statements in order to avoid impacts to retained habitat of importance, namely hedgerows and trees, and protected and priority fauna. The agreed CEMP shall be adhered to throughout construction.
- 10) No development hereby permitted shall take place until a Landscape and Ecological Management Plan ('LEMP') has been submitted to, and approved in writing by, the local planning authority. The LEMP shall accord, and expand upon where necessary, the measures outlined in the associated Ecological Impact Assessment and BNG report of 27 May 2022, the Outline Dormouse Mitigation Strategy of 13 August 2021, and shall demonstrate that the habitat net gains and hedgerow net gains set out in paragraph S.6 of the Ecological Impact Assessment and BNG report of 27 May 2022 will be

achieved. The agreed LEMP shall be implemented, adhered to, and maintained in accordance with the approved details.

- 11) No dwelling hereby permitted shall be occupied until a lighting design strategy ('LDS') has been submitted to, and agreed in writing by, the local planning authority. The LDS shall accord with, and expand upon where necessary, the measures outlined in the associated Ecological Impact Assessment and BNG report of 27 May 2022, and shall include details of:

- i.sensitive areas,
- ii.dark corridors to be safeguarded,
- iii.the design or specification of external lighting including shields, cowls or blinds where appropriate,
- iv.a description of the luminosity and warmth of lights including a lux contour map
- v.the location and elevation of light fixings, and
- vi.methods to control lighting such as timer operation or passive infrared sensors.

The agreed LDS shall be implemented, adhered to, and maintained in accordance with the agreed details.

- 12) No dwelling hereby permitted shall be occupied until a drainage scheme for the disposal of foul water flows for the site has been submitted to, agreed in writing by the local planning authority, and implemented as agreed.
- 13) No development hereby permitted shall take place until a site waste management plan ('SWMP') has been submitted to, and agreed in writing by, the local planning authority. The SWMP shall include details of:

- i.the types and amount of waste materials forecast to be generated from the development during site preparation and construction,
- ii.the specific measures to be employed for dealing with the aforementioned materials so as to minimise their creation, maximise the amount of re-use and recycling on-site, maximise the amount of off-site recycling of any wastes that are unusable on-site and minimise the overall amount of waste sent to landfill, and
- iii.the proposed proportions of recycled content that will be used in construction materials.

The agreed SWMP shall be adhered to throughout construction.

- 14) No dwelling hereby permitted shall be occupied until a waste management scheme ('WMS') has been submitted to, and agreed in writing by, the local planning authority. The WMS shall include details of appropriate and

adequate space and infrastructure to allow for the separate storage of non-recyclable and recyclable waste materials. The agreed WMS shall be implemented before any dwelling hereby permitted is first occupied, including on a phase basis aligned with occupancy as necessary. Once implemented the agreed WMS shall thereafter be maintained.

- 15) No development hereby permitted shall take place until a Construction Management Plan ('CMP') has been submitted to, and agreed in writing by, the local planning authority. The CMP shall include details of:
- i. site access and egress (including any which are temporary),
  - ii. staff and contractor facilities and anticipated travel arrangements and advisory routes,
  - iii. measures to mitigate dust, noise, vibration and illumination (including in respect of any piling, power floating, machinery operation and vehicle reversing),
  - iv. measures to control any leaks or spillages, and for managing silt and any pollutants,
  - v. measures for the disposal and recycling of waste,
  - vi. locations for loading, unloading, and storing plant, waste and construction materials,
  - vii. measures to prevent mud and dust from being carried onto the highway,
  - viii. arrangements for vehicle turning,
  - ix. arrangement to receive abnormal loads or unusually large vehicles,
  - x. a highway condition survey, and
  - xi. methods of communicating the CMP to staff, visitors and neighbouring residents and businesses.

The agreed CMP shall be adhered to throughout construction.

- 16) No works related to the development hereby permitted, including operation of machinery, groundworks, construction and deliveries shall take place outside of the following hours: 08:00 to 18:00 Mondays to Fridays inclusive, 08:00 to 13:00 on Saturdays. No works related to the development hereby permitted shall take place at any time on Sundays or on Bank or Public Holidays.
- 17) Notwithstanding condition 2, before the dwelling hereby permitted at plot 1 is occupied, the first floor south-west facing window shown on approved plans GOCR-PL-018 Rev. A and GoGR-PL-019 Rev. A shall be installed as obscure glazed and shall be non-openable to a height of 1.7 metres above internal finished floor level. Once installed as such the foregoing window shall thereafter be maintained as such.

- 18) No dwelling hereby permitted shall be occupied until the following have been implemented and made available for use in accordance with the agreed plans, as agreed pursuant to other conditions in this schedule, or as previously submitted to and agreed in writing by the local planning authority: means of access for vehicles pedestrians and cyclists, and secure bicycle storage. Once implemented as agreed the foregoing shall thereafter be maintained only for their intended purposes.
- 19) If, during the course of undertaking the development hereby permitted, any unforeseen contamination is encountered, measures for remediation shall be submitted to, and agreed in writing by, the local planning authority before development affecting the relevant part of the site proceeds. Development shall be undertaken in accordance with any agreed remediation measures.

## **SCHEDULE 2, APPROVED PLANS**

- |         |  |

### SCHEDULE 3, APPEARANCES

#### FOR THE APPELLANT:

Peter Goatley KC	No5 Barristers' Chambers
Nathan McLoughlin	McLoughlin Planning
Michael Davies	Davies Landscape Architects
Cameron Austin-Fell	RPS group
David Tingay	Key Transport Consultants Ltd.
Rachel Chatting	Tyler Grange Group Ltd.
Harry Du Bois-Jones	Tyler Grange Group Ltd.

#### FOR THE LOCAL PLANNING AUTHORITY:

Robin Green	Cornerstone Barristers
Paul Instone	Applied Town Planning Ltd.
Stuart Ryder	Ryder Landscape Consultants Ltd.
Jeremy Butterworth	J Butterworth Planning Ltd.
Stephen Chandler	Gloucestershire County Council

--	--

**'RULE 6' PARTIES:**

Eddie McLarnon	On behalf of Gotherington Parish Council
Christine White	On behalf of the Manor Lane Action Group

**THIRD/ INTERESTED PARTIES:**

Nicola Wilson	Local resident
Marianne Andrews	Local resident
Sarah Barsby-Finch	Local resident
Michael Stevens	Local resident

EP5C

## Appeal Decision

Inquiry opened on 10 January 2023

Site visits made on 1 November 2022 and on 9 and 13 January 2023

**by Mrs J Wilson BA (Hons) BTP MRTPI DMS**

an Inspector appointed by the Secretary of State

Decision date: 24<sup>th</sup> March 2023

---

**Appeal Ref: APP/G1630/W/21/3284820**

**Part Parcel 0025, Hill End Road, Twyning, Gloucestershire, GL20 6JD, 389971, 237249.**

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a failure to give notice within the prescribed period of a decision on an application for outline planning permission
  - The appeal is made by Hayfield Homes against Tewkesbury Borough Council.
  - The application Ref 21/00291/OUT, is dated 2 March 2021.
  - The development proposed is an Outline application for up to 55 dwellings and detailed access from Hill End Road, with all other matters reserved.
- 

### Decision

1. The appeal is dismissed, and planning permission is refused.

### Preliminary Matters

2. The application is made in outline with only access to be determined. Accompanying the application is a Framework Plan which I have treated as illustrative. Additional plans not part of the original submission indicate how the access, visibility splays and retaining walls would be formed, these were confirmed to have been the subject of consultation during the life of the application by Tewkesbury Borough Council (the Council). I have therefore considered these detailed plans in respect of the access.
3. The Council set out its putative reasons for refusal in April 2022, these refer to the emerging policies of the Tewkesbury Borough Plan (the TBP). The TBP was adopted by the Council on 8 June 2022 and I have considered the appeal on the basis of the adopted rather than the emerging policies which are referred to in the putative reasons for refusal.
4. Additional notices of ownership were served in respect of two small areas of land to the southern extremities of the site. I am satisfied that the owners of the land have had an opportunity to comment on the appeal proposal and have not been prejudiced by service of notice at the appeal rather than the application stage.
5. The Council, following the result of an independent review, confirmed it did not intend to pursue the fourth putative reason for refusal relating to highway safety. I have no evidence before me which would lead me to take a different view on this matter though this is entirely separate from the visual impacts of the access, a matter to which I will return.

6. I held an online Case Management Conference (CMC) on 13 September 2022. The CMC discussion covered the following; the identification of main issues; how the evidence would be dealt with at the Inquiry; the provision of statements of common ground; the listing of core documents and the timetable for their submission along with other procedural matters. The merits of the case were not part of that discussion.
7. Two revised Section 106 agreements were submitted towards the latter stages of the Inquiry. The first relating to Gloucester County Council (GCC) and the second in respect of this Borough Council. These agreements overcame the matters identified in the fifth putative reason for refusal to the satisfaction of both Councils. I shall return to them later in my decision.

### **Main Issues**

8. The main issues are:
  - a) The effect of the development on the character and appearance of the area including its effect on protected trees.
  - b) Whether the site is a suitable location for development having regard to local and national planning policy.
  - c) The housing land supply (HLS) position for Tewkesbury Borough Council.

### **Reasons**

#### Site Description and Background

9. The appeal site is an area of mixed woodland located immediately to the north of the village of Twyning. The entire appeal site is subject to a Tree Preservation Order <sup>1</sup> the central core of which is a mixed woodland of oak, birch, ash, willow, cherry, and hazel. It was planted in 2012 as part of an environmental initiative involving the Woodland Trust to celebrate the Diamond Jubilee of Queen Elizabeth II. For that reason, the woodland has a cultural significance for the local community. Prior to 2012, the site was an open field, historical mapping indicates that it was known as Nut Orchard though no evidence was produced, beyond the name attributed to it, to indicate any other historic use. There are mature trees and older vegetation to the outer edges of the appeal site and whilst layout is not for determination through this appeal, the indications are that generally boundary planting would be retained.
10. The woodland is on slightly elevated land above the village and there are four Public Rights of Way (PROWs) which cross or border the site. Those which cross this woodland produce a strong feeling of enclosure even though from some points longer range views are achieved across the surrounding landscape particularly towards the Cotswold Area of Outstanding Natural Beauty (AONB), the boundary of which is some distance to the east beyond the M5 corridor. The 2014 Landscape and Visual Sensitivity Study<sup>2</sup> defines the area including the appeal site as having a high visual sensitivity and a high landscape sensitivity.

---

<sup>1</sup> TPO reference No.410 - Dated 20/10/21

<sup>2</sup> Appendix 2 to CD A1.15 Landscape and Visual Appraisal 2021 referring to TBC Landscape and Visual Sensitivity Study 2014

11. The site is accessible via the PROWs which cross the site which are also connected to footpaths in the wider area with points of access on the northern edge of the site via timber stiles and on the southern edge via footways. These footways connect to Hill End Lane and from a number of points onto Hill End Avenue. This gives widespread access on foot for the local community. The young woodland, whilst planted as part of a Forestry Commission and community initiative, remains in private ownership with no public access to it other than via the PROWs. Moreover, the land has changed ownership and the appellants have confirmed that the Forestry Commission funding paid via the English Woodlands Grants Scheme has been repaid as the terms attached to it had not been fulfilled.
12. Temporary Heras<sup>3</sup> fencing has been erected to both sides of the footpaths which cross the site. The Inquiry was advised that these were erected after the submission of the appeal proposal with their purpose being to prevent users of the path straying onto the privately owned parts of the appeal site.

#### Character and Appearance

13. The experience of the site for users of the public footpath network is that of a tranquil environment which, for the most part, is visually separated from the village. The appellants<sup>4</sup> describe a strong sense of enclosure and separation from the settlement and the wider rural landscape. Whilst there is an awareness of a visual connection with the village from the southern edge of the site, I found there to be a profound sense of tranquillity experienced when walking the footpaths across and around the appeal site. There was a very distant sense of traffic noise however the overwhelming experience was that of complete solitude, enhanced by a continuous presence of birdsong.
14. The presence of the Heras fencing defining the edges of the public rights of way detracts from the visual enjoyment of users of the footpaths. However, the fencing is a feature which is temporary in nature and its open construction and appearance mitigates that impact. It does not detract from the sense of separation from the village that users of the paths experience across the site. Importantly, I found that the fencing does not substantially diminish the experience of the woodland for users of the footpath.
15. On the occasions that I visited the site I observed that the paths were well used for recreation. It was also clear from the evidence given to the Inquiry that the site and wider surrounding area are highly valued by local residents. The young woodland makes an important contribution to the enjoyment of the users of the PROWs. Representors attested to the environmental benefits of the woodland and the contribution it makes to the wellbeing of local residents. The proximity of the woodland to large areas of housing in the village make it readily accessible to the local community and that proximity encourages daily usage.
16. Even though the public rights of way would be retained or diverted to alternative routes, the character of the site area and the manner in which it is experienced would be permanently, irreparably, and irreversibly changed by the extensive loss of protected trees and the introduction of residential development.

<sup>3</sup> Temporary fence panelling of open wire construction approximately 2 metres in height

<sup>4</sup> Paragraph 4.19 of Paul Harris POE

17. In evidence it was established that the proposal would not have a significant effect on the wider landscape setting of the site or the village and that the appeal site was not subject to any special designation nor was it categorised as a valued landscape. Similarly, there would be no substantive effect on the Cotswolds AONB. Nonetheless, I saw from my visits that the development of the site would be visible from the footpath network to the north. From this higher land the loss of the central core of the woodland would be highly noticeable and the introduction of the roofscape associated with up to 55 dwellings would be conspicuous and intrusive in the local landscape. Moreover, from this direction the existing established soft edge to the village would be diluted by the development which would represent a harmful visual intrusion in conflict with Policies LAN2 and NAT1 of the TBP the latter of which automatically applies to trees protected by a Tree Preservation Order<sup>5</sup>. These aims are consistent with the Framework provisions protecting the natural environment.
18. It was accepted that the proposed development will result in the loss of hedgerow to Hill End Lane together with the majority of the young trees within the woodland which are protected by a woodland TPO<sup>6</sup>. The arboricultural assessment of these trees was disputed with differing values placed when measured against the cascade chart for tree quality assessment<sup>7</sup>. It was clear that a large proportion of the 2000 trees planted in 2012 are young and have not yet reached the 150mm diameter, a size which would afford them a higher classification arboriculturally. Nonetheless the trees clearly have a considerable life expectancy and are part of a local commemorative initiative and have a higher collective rating than they would have as individual trees. The quality assessment is advisory, and the matrix is open to greater interpretation than the more rigid version advocated by the appellant.
19. Evidence was given that the woodland had not benefited from any tree management since its planting, conversely it was put to me that the woodland had established well and would not have required active management. It was not disputed that most of the planted trees are growing well, and they form a healthy albeit young woodland. The Framework<sup>8</sup> recognises the intrinsic character and beauty of the countryside, and the wider benefits from natural capital, this includes the benefits of trees and woodland. On this site the trees form a healthy woodland which was planted for community benefit, but which is in private ownership.
20. The Framework has a clear environmental objective to protect and enhance the natural environment and the woodland performs a role in relation to resilience to climate change. In this case the cumulative impact of the number and density of young trees make a significant contribution to local character. The woodland has good future potential to develop to maturity without causing harm to, or conflict with, adjoining properties and uses. It also contributes to the wider green infrastructure network and is of value in that regard. The loss of the woodland would undermine the aims of Policy NAT1 of the TBP which seeks to protect trees and which is not limited to ancient woodland and veteran trees. It would also conflict with Policy GD4 of the Twyning Neighbourhood Plan

---

<sup>5</sup> Paragraph 8.46 of the TBP

<sup>6</sup> TPO reference (No.410) 2021

<sup>7</sup> Table 1 Cascade chart for tree quality assessment – source page 9 BS 5837:2012 attached to JB Holding POE

<sup>8</sup> Paragraph 174 b)

- (the TNP) which seeks to safeguard and where appropriate enhance existing trees and resist their removal.
21. Paragraph 131 of the Framework makes clear that trees make an important contribution and can help to mitigate and adapt to climate change. The Framework is also clear that measures should be put in place to secure the long term maintenance of newly planted trees and to retain existing trees wherever possible. The Framework recognises the contribution which trees make to climate change resilience.
  22. The extent of the tree removal would effectively result in the loss of the overwhelming majority of the young woodland trees, the retained tree groups would be fragmented and the character of the site as woodland would be lost.
  23. The sheer quantum of trees planted means that the woodland provides a high level of public amenity from the established PROWs and even though surveys do not reveal the presence of protected species the woodland has a wildlife value and character which would be obliterated across a substantial proportion of the site. The rural experience enjoyed by users of the PROWs through and around the site would inevitably be lost as a result of the proposed development. The contribution which the woodland makes to the character of the area is a factor which weighs heavily against the removal of the woodland.
  24. Local representors and elected members attested to the health benefits and amenity value for families and local residents. These benefits would be lost by the proposal and would not be satisfactorily mitigated by formal public access to areas of the site adjacent to the footpaths which is proposed in the development. As such it would fundamentally conflict with the aims of the TNP.
  25. The effect of the creation of the access onto Hill End Lane with the changes to provide visibility splays and footpaths would also result in the urbanisation of Hill End Lane where the existing vegetation makes a considerable visual contribution to the edge of the village as the Lane transitions from the village to the more sporadic built form at Hill End which is generally linear in nature. The extent of the physical alteration involved, given that the level of the site sits above Hill End Lane, would result in the extensive loss of trees and vegetation such that the formation of the access would have an urbanising and visually harmful effect on the appearance of the site from Hill End Lane.
  26. Policy GD4 of the TNP focuses on the protection of natural and ecological assets aiming to reinforce local distinctiveness, protect features which are culturally significant unless there are overriding reasons for their removal. Policy GD4 also expects and requires applications for residential development to set out measures to safeguard and where appropriate enhance existing trees sympathetic to the character and visual quality of the area, and to respect, enhance and not be detrimental to the character or visual amenity of the landscape. The proposal would be at odds with these requirements.
  27. The appellants have proposed mitigation in the form of a surrogate site, the planting of which was initially intended as the provision of land to achieve a substantive level of Biodiversity Net Gain (BNG) secured through a section 106 agreement. A concession was made during the latter stages of the Inquiry to incorporate some public access to that land, the manner and extent of which would be determined in the future between the Council and the developer.

28. I visited the surrogate site and saw that an existing public footpath skirts its northern boundary. The surrogate site is accessible on foot a short distance up the hill and is around 10 minutes walk away from the appeal site. It was clear that the scheme involved the relocation of 50 of the trees from the appeal site whilst around 2000 would be lost. It was established in evidence that the requisite amount of BNG could be achieved through improvements to the quality of the surrogate land and that its use for that purpose would be secured for a minimum of 30 years. From the evidence before me, even though the surrogate site would facilitate BNG in excess of that required, it would not represent an equivalent facility for the local community even taking into account the undertaking to provide an as yet undefined level of public access. The surrogate site would not represent an equivalent area to the appeal site visually nor in terms of character and appearance. Indeed, the appellants confirmed that the surrogate site would not be woodland but enhanced pastureland. It would be far less accessible or useable to the village community and would be of a substantively different character.
29. I do not criticise the provision of the surrogate site as alternative biodiversity land which would be enriched for that purpose. The technical assessments presented indicate that replacement habitat could be achieved to secure the requisite BNG. The site is however more remote from the village such that the use of it would be no match to the extent that the village community currently use the appeal site. In terms of an equivalent or replacement facility, it would not in my judgement provide sufficient mitigation to justify the loss of the protected woodland.
30. Taking these matters together the proposed development would represent an unsympathetic encroachment into open countryside resulting in an incongruous and urbanising intrusion into the protected woodland. This would result in significant and demonstrable harm to the character and appearance of the appeal site and the local landscape in a location cheek by jowl with the village.
31. For these reasons the proposal would conflict with Policies SD6 and INF3 of the Gloucester, Cheltenham, and Tewkesbury Joint Core Strategy 2011-2031 (2017) (JCS), Policies LAN2, NAT1 and NAT3 of the TBP, Policy GD4 of the TNP, and advice set out in the Framework. These policies, amongst other things, seek to protect landscape character for its own intrinsic beauty and for the benefit it brings to environmental and social wellbeing, to protect trees and conserve green infrastructure and the natural environment.

#### Spatial Distribution

32. The adopted development plan comprises the JCS, the TBP, and the TNP. These plans direct that new development is to be focused in and around the main settlements. The site lies outside the settlement boundary of Twyning though within the TNP area. For the purposes of planning policy, the appeal site lies within the open countryside, this was not disputed by the parties.
33. The JCS is now over five years old, and work has begun on the preparation of the JCS Review. However, work is still at a very early stage such that very little weight can be given to the policy contents of the JCS Review.
34. The spatial strategy intends to deliver the housing requirement through a combination of capacity within settlement boundaries, local plan allocations and land allocated through the neighbourhood planning process. Service villages

are identified for meeting lower levels of development also to be allocated via the TBP and the TNP. These requirements are set out in Policies SP2 and SD10 of the JCS. The development plan does support that new housing can be considered outside of defined Settlement Boundaries where such development would meet criteria set out in other policies in the plan or where it is essential for the proposal to be located in the countryside; neither is the case here.

35. The site lies outside the development boundary of the village of Twyning, it is not allocated for residential development and does not accord with the exceptions provided for by the development plan including Policy GD1 of the TNP which reflects the spatial requirements of the JCS.
36. Taking these matters together the development would conflict with the strategy for the distribution of new development in Tewkesbury Borough and represents development which is neither anticipated nor sought by the development plan. It would conflict with Policies SP2 and SD10 of the JCS, Policy GD1 of the TNP and Policies RES3 and RES5 of the TBP. These policies seek to ensure that the distribution of new development in Tewkesbury Borough is focused on main settlements and within service villages unless it meets specified exceptions; to ensure that new housing respects the form of the settlement and its setting and does not represent an intrusion into the countryside.
37. In reaching this conclusion I have not found conflict with Policy RES2 of the TBP which refers to development within settlement boundaries and which does not apply to the appeal site.

#### *Housing land supply*

38. The JCS<sup>9</sup> applies to Tewkesbury and is now more than five years old. It is a matter of agreement between the Council and the appellants that, in accordance with paragraph 74 of the Framework, the correct approach to defining Tewkesbury's Local Housing Need (LHN) is the use of the Standard Method (SM). This is calculated for local authority administrative areas. It is also common ground<sup>10</sup> that the land supply period is 1 April 2022 to 31 March 2027 and that the local housing needs figure for the Tewkesbury administrative area is 578 homes per annum<sup>11</sup>.
39. The parties disagree on whether the Council can demonstrate a 5-year supply of housing. Disputes relate to the attribution of units from strategic housing sites on the periphery of the Tewkesbury district which are part of the strategic allocations within the JCS to serve Gloucester City, and the way those units are accounted for now that the JCS is more than five years old and the housing requirement is to be calculated by the SM. At its core, the issue is whether, on a geographical basis, the dwellings arising from the strategic allocations which lie within Tewkesbury's administrative area should now be included in the supply figures for Tewkesbury<sup>12</sup>. The difference between the two positions is substantial with the appellant arguing a figure of 2.23 years supply and the Council 6.61 years supply<sup>13</sup>.

---

<sup>9</sup> CD E1

<sup>10</sup> HLS SoCG CD C9 Para 2.3

<sup>11</sup> HLS SoCG CD C9 Para 2.6

<sup>12</sup> Cheltenham figures have not yet been included as the urban extension sites in Tewkesbury but serving Cheltenham cannot yet be considered deliverable against the Framework glossary definition.

<sup>13</sup> Page 8 of Core document C.9 HLS SOCG

40. The TBP was adopted in June 2022. At that time the examining Inspector recognised that the JCS had been adopted in 2017 on the basis that an immediate review would be carried out to address an anticipated future shortfall in HLS in Tewkesbury. That review has not taken place. The TBP Inspector also confirmed that it was not the role of the TBP as a stage II allocations plan to address the strategic policy framework for which the proper mechanism would be the JCS Review. The JCS indicates that the district level plans, in this case the TBP, will provide more detailed and locally specific planning policies as well as local site allocations (para 3.1.18).
41. Policy SP2 in the JCS explicitly states that regardless of the fact that the majority of the land is within Tewkesbury Borough, the urban extensions are identified to meet the unmet needs of Gloucester or Cheltenham. Therefore, dwellings being delivered on urban extensions to Gloucester or Cheltenham will contribute solely to the needs of their land supply calculations (Paragraph 3.2.23)<sup>14</sup>. This gives clear recognition of the commitment by the three authorities to a joint approach identifying sites in Tewkesbury to meet the needs arising from the urban areas in Gloucester City and Cheltenham.
42. Notwithstanding the commitments of the JCS to the level of housing need under the Objectively Assessed Need (OAN) calculations and the inclusion of supply figures there is nothing to confirm that any commitment to an accounting methodology for delivery has been established between the three JCS authorities. It was asserted<sup>15</sup> that the Housing Delivery Test (HDT) data takes a joint approach to monitoring the delivery of housing across the JCS, though that was subsequently clarified by the Council as inaccurate with delivery accounted separately for each of the three Councils. HDT by its very nature takes a retrospective look at delivery rather than considering the forward supply though serves to illustrate that the Councils are not reporting jointly.
43. The Planning Practice Guidance (PPG) defines a 5-year supply as 'a supply of specific deliverable sites sufficient to provide 5 years' worth of housing against a housing requirement set out in adopted strategic policies or (my underlining) against a local need figure using the standard method'. It goes on to say that LHN calculated using the SM should be used in place of the previous housing requirement where the strategic policies are more than five years old. Whilst Framework Paragraph 74 is very clear regarding LHN, neither that paragraph, the PPG nor the SM indicate that the method by which housing supply is to be accounted for should alter. It is clear from the inputs that LHN operates housing need purely on administrative boundaries. This applies to all three JCS authorities given the age of their joint plan.
44. It is understandable that Tewkesbury should re-evaluate their overall position following the 5 year anniversary of the plan on 12 December 2022, however the LHN pertains to housing need and there is no substantive evidence that this change to the local needs figure would impact on the spatial distribution set out in Policy SP2 of the JCS. Crucially, Policy SP2 was not argued to be out of date nor inapplicable during the Inquiry other than in respect of the quantitative elements of housing numbers.

---

<sup>14</sup> JCS figures identify 4895 to serve Gloucester and 2610 to serve Cheltenham – source table SP2a

<sup>15</sup> By the Councils HLS Witness Mr Pestell

45. Furthermore, the content of Policy SP2 in respect of strategic sites within Tewkesbury and their attribution to supply is quite specific. The effect of these circumstances leaves TBC in the unenviable position that their housing need has increased through LHN whilst their ability to meet that need remains constrained through the JCS commitments to meet unmet need from Gloucester (and later for Cheltenham) on strategic allocations on the edge of the urban area of Gloucester and Cheltenham but within the Tewkesbury administrative area. Even so, the policy commitment of the three Councils to work together to deliver development in the most sustainable urban locations is explicit and the wording of Policy SP2 went unchallenged at the Inquiry save for the quantitative LHN point. On the evidence before me, the spatial aspects of Policy SP2 remain relevant. In terms of the reporting and delivery of dwellings and the method of their attribution to housing supply I have no persuasive evidence before me to support any commitment or methodology for units delivered within Tewkesbury but on the JCS strategic sites to be credited in supply terms other than in accordance with Policy SP2 of the JCS.
46. It was put to me that the houses on the strategic sites intended to meet the housing needs of Gloucester City and Cheltenham which lie within the Tewkesbury administrative area, would disappear if they were not attributed to Tewkesbury as neither Gloucester City nor Cheltenham would be able to count them under LHN. However, that approach conflates housing need with supply when the two are markedly different steps in the process and which must be undertaken separately<sup>16</sup>. Moreover, there is nothing in the Framework or the PPG which indicates that supply must be calculated only by reference to deliverable sites in the TBC area in circumstances where LHN is being used to determine the housing need.
47. The numerical aspects in Policy SP2 have been superseded by the LHN calculations for all three Councils, however, the spatial strategy in that policy is manifested in the strategic allocations for the urban extensions. To my mind, adopting an alternative approach for the calculations of need, driven by the LHN using the SM does not undermine the intended role of strategic sites nor does it provide for an alternative apportionment of supply to that identified in the JCS. The currently proposed apportionment of housing growth may change through the JCS Review process but that is not a matter for this appeal but rather for the separate JCS Review process. Insofar as the application of the spatial strategy in the JCS is concerned the development plan policies are the fundamental starting position and set the context for the consideration of this appeal having the force of the statutory development plan.
48. The Inquiry heard evidence in a round table session about the detail of several sites which the appellants contended were not deliverable. Some adjustment of these figures arises from concessions made by the appellants on updated information, which would benefit the Council's position rather than that argued by the appellants in their original evidence. However, those adjustments would not materially alter the overall position on 5-year HLS given the quantum of development involved in the strategic sites which policy makes clear are to be taken to meet the needs of Gloucester City (and Cheltenham) within the JCS.
49. Taking all of the above factors into account, and on the basis of the facts and evidence before me, I find the appellants approach to the assessment of

---

<sup>16</sup> PPG Reference ID: 2a-001-20190220

housing supply to be the more appropriate course of action. Consequently, I conclude that an HLS in excess of 5 years cannot, at this time, be demonstrated.

50. In reaching this conclusion I have had regard to the appeal decisions elsewhere in Tewkesbury and the surrounding area which have been referred to. Those decisions referred to predate the change to the LHN method of calculating need for the JCS and pre-date the adoption of the TBP. In that regard the circumstances are materially different, and I have to determine this appeal on the facts and evidence as they relate to the circumstances now. In any event those appeals do not alter my conclusions on this matter.

### **Other matters**

#### *Asset of Community Value*

51. The appeal site is currently identified as an Asset of Community Value (ACV) though that designation has been challenged and is due to be heard by the land tribunal on an as yet unknown date. The nomination of the woodland as an ACV was made by Twyning Parish Council and serves to highlight the importance that the local community places on the use and the social value of the land. Notwithstanding this, Policy COM1 of the TBP which covers the protection of Community Assets and sets criteria by which any loss of an ACV would be considered, is not cited in the putative reasons for refusal and it cannot be certain at this time whether the ACV will be confirmed. Therefore, the weight that can be attributed to the ACV listing at this time is limited and it has not been determinative to the outcome of this appeal.

#### *Protected Species*

52. Ecological evidence was presented by the appellants the detail of which was not challenged by the Council. The appellants surveys undertaken have not revealed the presence of protected species on the site. In the event that development was to proceed planning conditions could be imposed to ensure that ecological enhancement features would be secured.

#### *Effect on Designated Conservation sites*

53. The appeal site lies around 730m west of the Upham Meadow and Summer Leasow Site of Special Scientific Interest and is also within the impact risk zone for the Bredon Hill Special Area of Conservation. A shadow Habitats Regulations Assessment<sup>17</sup> was undertaken by the appellants which concluded that the proposals would not be likely to impact, either alone or in combination, with the designated sites close to the appeal site and the Council did not dispute those conclusions. Taking a precautionary approach, the appellants intend to include mitigations measures through the requirements for Homeowner Information packs. On the basis of the evidence there is nothing to indicate that the proposed development would result in likely significant effects on the identified sites, and I am satisfied that in the event that I were minded to allow the appeal, an appropriate assessment would not be required.

---

<sup>17</sup> CD C1.16

### *Other Issues Raised*

54. The land ownership dispute in relation to whether land on the site frontage is highway or privately owned is noted. However, it is not for me to determine who owns that land as the dispute is of a private nature outside the remit of the appeal process.
55. The Parish Council highlight that there is a local issue with foul sewage in the village with insufficient capacity to serve additional dwellings. Severn Trent Water considered the application in relation to wastewater and raised no objections subject to the imposition of conditions regarding the disposal of waste and surface water flows which would avoid exacerbating any flooding issues in order to minimise the risk of pollution. The Lead Local Flood Authority also raised no objection subject to conditions. On this basis there is no substantive evidence to demonstrate that satisfactory infrastructure could not be secured for the site.
56. There is a cultural significance of the woodland having been planted by villagers as part of an initiative for the Queens Diamond Jubilee. Policy GD4 of the TNP states that features which are culturally significant shall be retained unless there are overriding reasons for their removal. In this regard the loss of the woodland weighs against the proposal given the conflict with the content of the TNP.
57. I have had regard to other concerns raised in correspondence and at the Inquiry by interested parties, beyond those already addressed. However, none of these concerns are significant enough to alter my conclusions on the main issues or weigh materially for or against the proposal. Consequently, I do not address them further.
58. The appellant argued that there was no good reason to depart from the officer recommendation initially made on the application. However, I have found that the circumstances relating to the site are now different to those when the recommendation was made. In any event it is the resolution of the Council in relation to the putative reasons for refusal to which I must have regard and I have reached my conclusions on the basis of the evidence given to the Inquiry. That initial recommendation by officers does not carry substantive weight in my deliberations.

### *Benefits*

59. The appellants highlight there are benefits to the scheme advocating that substantial weight should be given to the provision of open market housing, the Council say that this should be given moderate to significant weight however due to the 5-year HLS position and the Framework imperative to significantly boost the supply of housing I am of the view that substantial weight should be given to the provision of housing including the affordable units.
60. The benefits arising from construction investment and jobs associated with it are unquantified. However, paragraph 81 of the Framework makes clear that significant weight should be placed on supporting economic growth and productivity. Nonetheless, the temporary nature of construction inevitably means that the benefits are short term and, as a result, this leads me to conclude that such benefits would be moderate rather than significant. There

was no dispute that the provision of public open space and improvements in green infrastructure and the facilitation of public access to the land which is currently private should be attributed moderate weight and I have no reason to disagree with that conclusion. Moderate weight is attached to the provision of the surrogate site including provision of 10% BNG; and similarly moderate weight to the financial contributions to offsite infrastructure. All these benefits weigh in favour of the development.

#### *Legal agreement*

61. The Council and the appellants have reached agreement on the wording of two CIL compliant planning obligations to secure financial contributions towards education and library provision, affordable housing, a travel plan and the provision of a Locally Equipped area for Play (LEAP). At the Inquiry the Council confirmed that, subject to the conclusion of those agreements, reason for refusal five would be overcome. On that basis it was no longer contested at the Inquiry. I am satisfied that each sought obligation would meet the tests set out in Paragraph 57 of the Framework for planning obligations. As a result, I have taken the completed agreements into account.

#### **Planning Balance**

62. The starting point for any planning decision is Section 38(6) of the Planning and Compulsory Purchase Act 2004 which requires decisions to be made in accordance with the development plan unless material considerations indicate otherwise. Development which would conflict with and undermine the strategy of an approved development plan and the Framework when taken as a whole would, in planning terms, be harmful.
63. Notwithstanding the proximity of the appeal site to a 'service village' which the JCS recognises has relatively good accessibility credentials, this is a speculative development on an undeveloped and wooded site protected by a TPO which is located outside the settlement limits of the village of Twyning. I have found that the development would not integrate well with the settlement and would be harmful to the character and appearance of the area leading to encroachment into the countryside in conflict with the JCS, the TLP and the TNP. Whilst that conflict would not affect a landscape designated as 'valued' it would nonetheless significantly affect the setting, scenic character, and visual quality of the village of Twyning. Additionally, and of no less importance, development would result in the loss of a significant number of protected, albeit young trees. I have found that permanent and irreversible harm would be caused to the local landscape immediately adjacent to the settlement edge and to the experience of users of the PROWs which cross the site. These are matters to which I attach considerable weight.
64. Development on the site would conflict with important strategic objectives of the Development Plan including the Neighbourhood Plan; a position which is supported by the Framework commitment in recognising the intrinsic character and beauty of the countryside and the protection of trees and woodland. These are matters which weigh heavily against the appeal scheme.
65. The proposal must also be assessed against the provisions of paragraph 11 d) of the Framework given that I have concluded the Council cannot demonstrate a 5-year supply for the delivery of housing. This is a material consideration, particularly so given the extent of the identified shortfall and is a matter to

which I must attach substantial weight. Even so, I have found that the harm from the scheme would significantly and demonstrably outweigh the benefits outlined above which include the significant contribution which the appeal scheme would make to the current housing shortfall. Even if I was to accept the Council's position on housing land supply, which I don't accept, and they could demonstrate a 5-year supply of deliverable housing sites, this would not have changed my conclusion that the appeal should be dismissed, and planning permission refused. As such the Framework considerations taken as a whole weigh heavily against the proposal and the totality of the material considerations does not justify making a decision other than in accordance with the development plan.

### **Conclusion**

66. Taking all these matters together I have found nothing to alter my conclusion that the appeal should be determined in accordance with the development plan when taken as a whole. Consequently, the appeal is dismissed, and planning permission refused.

*Mrs J Wilson*

## Appeal Decision

Inquiry Held on 10 – 13 May 2022

Site visits made on 9 and 13 May 2022

**by R Norman BA (Hons) MA MRTPI**

an Inspector appointed by the Secretary of State

Decision date: 5<sup>th</sup> July 2022

---

**Appeal Ref: APP/J1860/W/21/3289643**

**Land at Leigh Sinton Farms, Leigh Sinton Road (B4503), Leigh Sinton, Malvern**

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant outline planning permission.
  - The appeal is made by Lone Star Land and Mr W Beard against the decision of Malvern Hills District Council.
  - The application Ref 21/01287/OUT, dated 1 July 2021, was refused by notice dated 16 December 2021.
  - The development proposed is an outline application for up to 45 residential units including 12 self/custom build units and associated infrastructure (all matters reserved except access).
- 

### Decision

1. The appeal is allowed and planning permission is granted for up to 45 residential units including 12 self/custom build units and associated infrastructure (all matters reserved except access) at Land at Leigh Sinton Farms, Leigh Sinton Road (B4503), Leigh Sinton, Malvern in accordance with the terms of the application, Ref 21/01287/OUT, dated 1 July 2021, subject to the conditions in the attached schedule.

### Application for costs

2. At the Inquiry an application for costs was made by Lone Star Land and Mr W Beard against Malvern Hills District Council. This application will be the subject of a separate Decision.

### Procedural Matters

3. The planning decision included five reasons for refusal. The Council confirmed that reason for refusal 4, safe and suitable access to and from the site, and reason for refusal 5, the need for a legal agreement, are no longer in dispute.
4. The application was submitted in outline, with all matters except access reserved for subsequent approval. Indicative drawings have been submitted with the application to show how the site might be developed and I have reached my decision on that basis.

5. A Section 106 Agreement<sup>1</sup> and a Unilateral Undertaking<sup>2</sup> has been submitted. I return to these below.
6. In addition to the accompanied site visit carried out after the Inquiry closed, I viewed the appeal site from public vantages to familiarise myself with it and the surrounding area prior to the Inquiry.
7. An appeal decision<sup>3</sup> was brought to my attention after the Inquiry. I will return to this later on.

### **Main Issues**

8. The main issues are:

- The effect of the development on the open character and function of the Significant Gap;
- The effect of the development in the open countryside, on landscape character and its visual effects; and
- Housing land supply, its calculation and resulting policy consequences.

### **Reasons**

#### *Significant Gap*

9. The appeal site is located within the Significant Gap of Leigh Sinton which is located between Leigh Sinton and Malvern. The principal function of a Significant Gap is to keep land open in order to prevent neighbouring settlements from coalescing and to provide an appropriate setting for settlements<sup>4</sup>. Policy SWDP2 Part D of the South Worcestershire Development Plan (2016) (SWDP) states that development proposals should ensure the retention of the open character of the Significant Gaps. Paragraph 8 of the supporting text explains that the purpose of maintaining the gaps, which either serve as a buffer or a visual break between rural settlements and adjacent urban areas or protect the character and setting of settlements, is to provide additional protection to open land that that may be subject to development pressures.
10. It is agreed between the parties that the appeal site falls within the Significant Gap and therefore the development of the site would result in a degree of conflict with the Development Plan in this regard.
11. Whilst the proposed development would extend the settlement into the Significant Gap, it would only occupy a small area of the wider gap which extends a considerable distance between Leigh Sinton and Malvern. The appeal site adjoins the existing built form of Leigh Sinton. There is a new development, Bluebell Walk, as well as properties on Lynn Close, Somers Close, Kiln Lane and Spruce Close which are visible from the appeal site.

<sup>3</sup> APP/H1840/W/21/3289569 Land off Morris Road, Broadway (Wychavon District Council)

<sup>4</sup> South Worcestershire Development Plan Review (SWDPR) Preferred Options: Significant Gaps Appraisal (CD8)

12. The Significant Gap Appraisal<sup>5</sup> states the purpose of this particular significant gap is to separate Leigh Sinton from Malvern. It highlights that there could be a limited reduction in it on the Southern edge of Leigh Sinton whilst retaining its purpose.<sup>6</sup> The overall recommendation is to retain with the possible exception of a few discrete land parcels on the edge of Leigh Sinton should they be needed i.e., allocations in either the SWDPR or Leigh Sinton Neighbourhood Plan.
13. I acknowledge that the appeal site does not form part of an allocation, nevertheless the Significant Gap Appraisal does give scope for some limited reduction resulting from the development of some discrete parcels of land. Bearing in mind the overall purpose of the Significant Gap to keep the settlements of Leigh Sinton and Malvern separate, and the distance that would remain between the settlements I find that the development would not be unduly harmful to, nor undermine the function and purpose of the Significant Gap in this instance.
14. Turning to the openness of the Significant Gap, its purpose is to maintain the openness of the land and secure the quality of life benefits of having open land close by. The layout at this stage is illustrative only, but indicates the dwellings being sited alongside the existing built form. I accept that the introduction of dwellings would have an impact on the outlook from the existing properties lining the appeal site, however, matters of the siting, design, height and scale of the proposed dwellings could be managed at Reserved Matters Stage to ensure the impacts on the nearby residents were not harmful.
15. The introduction of dwellings into the appeal site would lead to a loss of openness by virtue of the loss of a piece of open land. However, I find it necessary to consider this in the context of the openness of the Significant Gap as a wider area. The indicative plans suggest that the proposed dwellings will be located towards the existing built form of Lynn Close, Somers Close and Kiln Lane. The front most part of the appeal site would incorporate areas of open space, play areas and new planting and vegetation. Similarly, along the proposed access there would be landscaping. As such, I find that the proposed development would be seen in the context of the existing dwellings which would form a backdrop and the planting and landscaping would serve to mitigate against the loss of openness.
16. Consequently, I find that although there would be a loss of openness by the very reason that open land would be built upon, this would be fairly limited and would not unduly harm the purpose of the Significant Gap to protect the openness as a result of the extent of open land that would remain. Accordingly, I give this loss of openness limited weight.
17. Paragraph 8 of the supporting text of SWDP2 lists development proposals which may be acceptable within a Significant Gap which may include the reuse of rural buildings, agricultural and forestry related development, playing fields, other open land uses and minor extensions to existing dwellings. It is accepted that the proposed development doesn't constitute 'minor' development and does not fall within the listed categories. However, I have had regard to the wording of the Policy and supporting text which states 'may include' and I

---

<sup>5</sup> South Worcestershire Development Plan Review (SWDPR) Preferred Options: Significant Gaps Appraisal (Nov 2019) – CD8

<sup>6</sup> Page 5

therefore find that it is not wholly prohibitive of developments that are not included in the list.

18. The Council have raised concerns in relation to a precedent being set that would lead to cumulative encroachment into, and loss of, the Significant Gap. However, I return to the comments in the Significant Gap Appraisal relating to discrete parcels being able to be developed. I consider that the development of the appeal site with up to 45 units would represent the development of a small, and discrete, area of land relative to the overall size of the Gap. Furthermore, any additional development proposals would be assessed against the policies based on their own merits and this proposal, of itself, wouldn't lead to a widespread erosion of the Significant Gap and its purpose.
19. In conclusion on this matter, I accept that there would be a degree of conflict with Policy SWDP2 of the SWDP in this instance as a result of the location of the proposed development outside of the settlement of Leigh Sinton and within the Significant Gap. Nevertheless, I find the harms associated with this conflict to be relatively restrained. I therefore give this conflict only moderate weight.

*Open Countryside, Landscape Character and Visual Impacts*

20. The appeal site is located within the Principal Timbered Farmlands<sup>7</sup> which is characterised by notable patterns of hedgerow trees, hedgerow boundaries to fields and ancient wooded character amongst other secondary and tertiary characteristics. However, I note that many of these key features within the site have been eroded. The site itself currently forms part of a wider area of land used for the commercial growing of Christmas Trees.
21. Within Policy SWDP2 of the SWDP Leigh Sinton is a Category 2 village, which provide varying ranges of local services and facilities and where infill development within the defined development boundaries is acceptable in principle. I note that it has been proposed to downgrade Leigh Sinton to a Category 3 village as detailed in the Village Facilities and Rural Transport Study 2019<sup>8</sup>. However, this has not been formally changed yet.
22. The appeal site falls outside of, but adjoining, the settlement boundary of Leigh Sinton. This is common ground between the parties, as is that the proposed development does not fall within any of the categories of development listed in Policy SWDP2C of the SWDP which seeks to strictly control development in the open countryside.
23. In relation to the loss of countryside with permanent built form I agree with the Council that this would not safeguard the countryside and therefore there would be some harm to which weight must be given. However, I have had regard to the amount of land to be lost and the potential siting of the dwellings. In addition, the development would incorporate areas of new planting, including new hedgerows and woodland which would replace some of the natural features that have been lost and bolster the remaining landscaping and would afford a degree of mitigation.

---

<sup>7</sup> Defined within the Worcestershire County Council Landscape Character Assessment Supplementary Guidance – August 2012 (CD4)

<sup>8</sup> CD44

24. The Landscape and Visual Sensitivity Study<sup>9</sup> highlights the capacity for land parcel M09, which includes the appeal site, to accommodate residential development of between 1 – 5 hectares to the south of Leigh Sinton with a medium/low sensitivity. The appeal site is around 4.05 hectares in size<sup>10</sup>. It is not a matter of dispute that the appeal site is not situated within any designated landscapes and that the landscape value is local.
25. Given the sensitivity and susceptibility of the appeal site and immediate surroundings, derived from its location adjacent to the existing built form, I find that the proposed development would therefore not be harmful to the landscape value or character. The dwellings would sit alongside and against the backdrop of the existing properties and a sensitive planting scheme would reinstate and enhance the soft boundaries, ensuring that a suitable transition between the built settlement and the countryside would remain.
26. The proposed access is committed at this stage and would run off Leigh Sinton Road. There is a strip of new planting across the frontage of the appeal site where the access would be located which previously provided an access to the Bluebell Walk development during construction. The boundary with Leigh Sinton Road is currently bounded with mature and dense hedging, with the exception of the newer planting which currently allows views into the site and the wider area.
27. The existing hedgerow is a predominant feature of the rural roadway running away from the built-up form of Leigh Sinton. It is elevated up on a grass bank in places. It is undeniable that the removal of an extensive stretch of this hedgerow would change the rural character of this part of Leigh Sinton Road and would have somewhat of an urbanising effect.
28. However, I find the effects of this would be highly localised. Although the access would be partially discernible from along the road, as indicated in the submitted visualisations and viewed on site, after only a short distance it would not be readily apparent, and the hedge would remain the dominant visual feature. When approaching the appeal site from the rural area along Leigh Sinton Road the access would be viewed in the context of the built form along Malvern Road and the associated driveways. I also find that it would be viewed along with the junction with Lower Howsell Road. Coming from Leigh Sinton itself, again the access would be in proximity to the existing settlement and the amount of hedgerow remaining would still indicate the transition into the rural area. From both directions there are also road signs, which are to be relocated as part of the proposed development, signifying the transition from urban to rural and vice versa.
29. Concerns have been raised in relation to the excavation works and 'battering back' of the existing bank in order to construct the proposed access and the potential for damage that would occur to the roots of the remaining hedgerow. However, the Appellant has provided information and evidence of a possible method of stabilising the bank, Flex MSE Vegetated Wall System<sup>11</sup>, which could also be seeded on completion to provide a green approach to the access point.

---

<sup>9</sup> Malvern Hills AONB Environs – Landscape and Visual Sensitivity Study (2019)

<sup>10</sup> Application Form Part 5 – Site Area

<sup>11</sup> Arboricultural Statement of Case on the Vegetation – Ruskins Tree Consultancy April 2022 – Appendix 10 Proof of Evidence: Landscape and Visual Matters – Robert Hughes BSc (Hons) PgDipLA CMLI

Based on the information provided I am satisfied that a suitable method for carrying out the works to facilitate the access could be achieved.

30. The access itself would provide clear views into the appeal site and views of the proposed development would be unavoidable, however with a sensitive planting scheme and positioning of the dwellings, I consider this would not be unduly harmful.
31. The proposed development would include areas of open space and planting which would be secured by conditions. The Appellant has highlighted that the Guidelines for the Principal Timbered Farmlands LCT<sup>12</sup> identifies a pattern of hedgerows however some of these have been lost over time. The proposed development would incorporate new hedgerow planting and replenish these hedgerows and would accord with the 'Opportunities for Landscape Gain' in the Landscape Type Advice Sheet<sup>13</sup>.
32. I have had regard to the other accesses along Leigh Sinton Road. Whilst I accept that these are some distance away, they nevertheless result in sporadic punctuations of the hedgerow and in some cases, such as the Nicholson & Co site, are very wide access points. The proposed development would be likely to result in greater vehicle movements as it would serve a residential estate rather than commercial premises like some of the other accesses, however it is located in proximity to the existing estates and therefore would not appear visually incongruous.
33. Given the above considerations, I find that although the removal of the hedging would alter the visual and rural character of the area, this would not be unduly harmful and its effects would be localised in the main. The appeal site is well related to the existing settlement and viewed in the context of the existing built edge. As such, I find in regard to this issue that the proposal would not conflict with the requirements of Policy SWDP21 of the SWDP, which seeks to ensure that development integrates effectively with its surroundings, reinforces local distinctiveness, provides high quality hard and soft landscaping, and safeguards distinct identity and character of local settlements, amongst other things. It would accord with the aims of Policy SWDP25 as the development proposals have taken into account the Landscape Character Assessment and guidelines, would sufficiently integrate with the character of the landscape setting and will take the opportunity to enhance the landscape through a sensitive and suitable landscaping scheme. I also find that the proposal would not conflict with Paragraph 174 of the National Planning Policy Framework (2021) (the Framework) which seeks to ensure that planning decisions should contribute to and enhance the natural environment by recognising the intrinsic character and beauty of the countryside, amongst other things.
34. The proposal would, however, conflict with Policy SWDP2 of the SWDP as a result of its location outside of the defined settlement and as it would not be any of the development types listed in SWDP2 C.

#### *Housing Land Supply*

35. The main areas of dispute in relation to the Council's five-year housing land supply relates to the two issues of geography and oversupply. Namely, which

---

<sup>12</sup> Worcestershire Landscape Character Assessment Chapter 10.7

<sup>13</sup> Landscapes of Worcestershire Landscape Type Advice Sheet – Planning and Development: Principal Timbered Farmlands

area should the housing land supply calculations cover – whether it be individually or jointly between Malvern Hills, Wychavon and Worcester - and should the Council's oversupply be factored into the supply calculations.

36. It is a matter of agreement between the parties that the correct approach is the use of the Standard Method as the Development Plan is over five years old and a 5% buffer should be applied<sup>14</sup>. This means that the latest position in relation to the SWDP is that the housing requirement figures set out in Policy SWDP3 of the SWDP are out of date. In addition, this resulted in a change to the monitoring of the housing land supply from the five sub areas, moving to the three districts of Worcester City, Wychavon District and Malvern Hills.
37. The Council have identified that they have had an oversupply of 1,620 dwellings, calculated with a reduction with the Liverpool approach applied<sup>15</sup> and that this should be factored into the forward projecting housing land supply as the homes have been delivered on the ground and therefore the Council have provided more dwellings to date than it should have. The South Worcestershire Five Year Housing Land Supply Report, September 2021<sup>16</sup> establishes that any shortfall in delivery, or indeed substantial oversupply, against the annualised requirement is factored into the five-year supply calculation (paragraph 4.1). Furthermore, it identifies that rather than reducing the target by the full oversupply in the first five years, the Councils have adopted a cautious approach and spread the oversupply over the remaining plan period (paragraph 5.1).
38. The Appellant has produced a table of scenarios<sup>17</sup> which show differing housing land supplies ranging from a 2.82 year supply in the case of Malvern only and no oversupply included, to 5.76 which comprises the SWDP area and the inclusion of the oversupply. This latter figure is the Council's current position. The Appellant contends that only 2 of the 8 scenarios (excluding the SWDP area scenarios) result in a housing land supply above 5 years. These are taking Malvern only and applying the inverse Sedgfield method (scenario 5) and the Malvern All Supply with the Inverse Liverpool method (scenario 6). It is the Appellant's view that the Council needs to be correct on both matters of geography and oversupply in order to be able to demonstrate a five-year housing land supply.
39. Paragraph 74 of the Framework states that 'local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies or against the local housing need where the strategic policies are more than five years old'. Footnote 39 makes reference to the use of the Standard Method in relation to this paragraph.
40. In relation to the matter of oversupply, I accept that this means that there have been homes provided on the ground for local people over and above the identified need. Nevertheless, I do not understand the 5-year housing land supply to be a ceiling figure, which is suggested in the PPG which states that the standard method for calculating local housing need provides a *minimum*

---

<sup>14</sup> Topic Specific Statement of Common Ground on 5-Year Housing Land Supply

<sup>15</sup> South Worcestershire Five Year Housing Land Supply Report, September 2021 – Table at Paragraph 12 (CD5)

<sup>16</sup> CD5

<sup>17</sup> Proof of Evidence of Cameron Austin-Fell (April 2022) Appendix B – Housing Requirement Scenarios

number of homes to be planned for<sup>18</sup>. Taking into consideration the content of the Framework and the PPG and the evidence before me, which are largely silent on the matter, I feel that there is no clear steer that would lead me to conclude that the oversupply should be included in forward projections for housing delivery.

41. In addition to the matter of oversupply, the Council assert that this area has a unique set of constraints and considerations which calls for the housing need to be balanced over the wider area due to the severe land constraints for Worcester City. The South Worcestershire Five Year Housing Land Supply Report, September 2021 has been carried out over the wider geographical area rather than individual districts. The PPG includes guidance on how to monitor five year housing land supply where there is a joint plan<sup>19</sup> and states that the approach to using individual or combined housing requirement figures will be established through the plan-making process, before going on to state that where the 5 year housing land supply is to be measured on a single authority basis, annual housing requirement figures for the joint planning area will need to be apportioned to each area in the plan. If the area is monitored jointly, any policy consequence of under-delivery of lack of 5-year housing land supply will also apply jointly.
42. I have been presented with references to the specific wording used of 'local planning authorities', 'authority' and 'their', suggesting that this makes it clear that this indicates that *individual* authorities are required to monitor their housing land supply. However I do not read the Framework in this context. It does not specifically refer to 'each individual authority' and therefore I cannot conclude that this was the intention behind the wording in this instance.
43. My attention was also drawn to the wording of the Glossary of the Framework in relation to the Housing Delivery Test<sup>20</sup> which refers to a local authority area but allows for joint monitoring as evidenced in the letter from the Housing and Planning Services across the three Councils to the Secretary of State outlining the intention to calculate the HDT based on a single SWDP figure<sup>21</sup>. I find however, that the ability to monitor the HDT jointly does not automatically mean that five-year housing land supply could be considered on the same area as the two processes, although linked to a certain degree, are still separate processes with one being backwards looking and the other forward looking.
44. I accept that the Council are in a relatively unique position in that there are a limited number of joint Development Plans, and I consider that this may be a contributing factor to why such situations are not explicitly referred to in the Framework. I also acknowledge the reference to the High Court<sup>22</sup> which logically highlights that the PPG does not cover every possible situation. However, based on the evidence before me I cannot conclude that it has been demonstrated that the joint approach, nor the individual approach, should be followed given the absence of these being tested at examination or through a position statement.

<sup>18</sup> Paragraph:001 Reference ID: 68-001-20190722

<sup>19</sup> Paragraph: 028 Reference ID: 68-028-20190722

<sup>20</sup> Page 67 of the National Planning Policy Framework (2021)

<sup>21</sup> Letter Reference CW/LM-L/9.5.18 (CD68)

<sup>22</sup> Tewkesbury Borough Council v SSHCLG [2021] EWHC 2782 (Admin) (CD46)

45. In addition to the above, there were five disputed sites<sup>23</sup> which resulted in an overall difference of 222 units. However, it was suggested that in any event the inclusion or exclusion of these particular sites would not have a significant bearing on the Council's five-year housing land supply. Accordingly, it is not necessary for me to reach a finding on each individual site given my considerations above.
46. My attention has been drawn to a number of other appeal decisions which also considered the matter of the five-year housing land supply. The first of these is Claphill Lane, Rushwick<sup>24</sup> where the Inspector highlighted that the matter of distribution of housing requirement amongst the Councils is one for the plan-making process (paragraph 37). In this instance the Inspector, based on the evidence before him, did not conclude that the Housing Land Supply should be calculated on a cross-boundary basis.
47. The 'Fiddington' appeal decision<sup>25</sup> also considered oversupply, which the Inspector found was meeting the needs of local people, should be deducted from the housing requirement and credited against the requirement (the 'reverse' Sedgefield approach). However, this particular Council could not demonstrate a five-year supply regardless of oversupply. Notwithstanding these points, I am not persuaded that oversupply should be factored in.
48. Turning to the Bransford Road<sup>26</sup> appeal decision, I note that the Council's position was that the housing land supply figure calculated against the local housing need using the Standard Method had not been carried out at that stage and therefore it was accepted that in the absence of this the Council could not demonstrate a five year supply which differs from the evidence presented to me in this inquiry where the Council contend that they have a supply of 5.76 years.
49. I have been provided with a copy of a recent appeal decision for Morris Road, Broadway<sup>27</sup> which is within the district of Wychavon, which forms one of the joint councils. The Inspector in this case reached the conclusion that the NPG is a forward-looking snapshot at a given point in time and that it would therefore be inconsistent to adjust the need figure derived from the standard method to reflect past delivery<sup>28</sup>. The Inspector however did not find it necessary to reach a conclusion on the 'geography' of the supply<sup>29</sup>. Having regard to the content of this appeal decision I see little to lead me to conclude differently on the matters highlighted.
50. I have considered the implications of both the Council's and the Appellant's approaches in terms of both the oversupply and the 'geography' of the housing land supply calculation, but I consider that in any event, both approaches are a departure from the Development Plan and would need to be tested at Local Plan examination stage, or an annual position statement, rather than through a Section 78 Inquiry.

<sup>27</sup> APP/H1840/W/21/3289569 – Land Off Morris Road, Broadway

<sup>28</sup> Paragraph 50

<sup>29</sup> Paragraph 53

*Other Matters*

51. The Malvern Hills AONB is visible in the distance as a backdrop to the appeal site and from North Hill the settlements of Leigh Sinton and Malvern are discernible, with the open land between apparent. The Statement of Common Ground on Landscape and Significant Gap Matters highlights that in the Malvern Hills AONB Environs Landscape and Visual Sensitivity Study (May 2019) the land parcel M09 south of Leigh Sinton has the capacity to accommodate residential development<sup>30</sup>. It goes on to state that the proposed development would not result in any significant impact on views from the northern end of the Malvern Hills<sup>31</sup> and would not have a detrimental impact on the natural beauty of the Malvern Hills AONB<sup>32</sup>. I have not been presented with any evidence to lead me to conclude otherwise. In terms of views from the Malvern Hills, the development would be visible but firmly in the context of the existing built form and would not adversely impact the views. The development of the site, based on the indicative layout would similarly be viewed in the context of the existing built form and would not harm or significantly alter views of the Malvern Hills from Leigh Sinton Road and the surrounding area.
52. The Council have provided the Examiners Letter for the Leigh and Bransford Neighbourhood Development Plan (NDP)<sup>33</sup> as well as details of a development scheme for 52 dwellings at Leigh Sinton<sup>34</sup> which Ward Members have indicated can be approved subject to the completion of a Section 106 Agreement. I note the progress of the NDP, nevertheless understand that there are still outstanding matters and therefore I do not conclude that this carries any additional weight from when it was considered at the Inquiry itself. In relation to the pending approval for 52 dwellings, I have limited information before me, however, note that the application referred to is in outline also and no indication of the progress of the Section 106 has been put forward. In addition, I have not been presented with evidence to suggest that if these 52 dwellings came forward they would represent a ceiling for development in Leigh Sinton. I therefore find that this does not have any bearing on the merits of this case that is before me.

*Other matters*

53. In terms of the matters of lack of infrastructure it was noted at the Inquiry that it was not the position of the parties that there are insufficient facilities to serve additional dwellings in Leigh Sinton and I have little evidence before me that public facilities are at capacity or in relation to the availability of jobs.
54. The Local Highway Authority were given the opportunity to consider the proposed access and volumes of traffic and the application was accompanied by a speed survey, Road Safety Audit Stage 1 (RSA) and revised Transport Assessment following their initial comments. A Highways Statement of Common Ground confirms agreement on the provision of the access, visibility splays and findings of the speed survey and confirms that the development would provide safe and suitable access for all users and that there would not be severe or unacceptable highway safety impact on the local highway network. I note the levels of public transport available in the area and in order to mitigate

---

<sup>30</sup> Page 25 and Paragraph 17 Statement of Common Ground on Landscape and Significant Gap Matters

<sup>31</sup> Paragraph 32 Statement of Common Ground on Landscape and Significant Gap Matters

<sup>32</sup> Paragraph 33 Statement of Common Ground on Landscape and Significant Gap Matters

<sup>33</sup> Email from Council dated 20 June 2022

<sup>34</sup> M/22/00187/OUT

- this the development would be required to contribute to transport facilities which would be secured by legal agreement.
55. Turning to matters relating to precedent and other preferable sites, I have limited information in relation to other sites available and the development of this site would not automatically set a precedent for further development which would need to be considered in relation to its own set of circumstances.
56. The Council's Ecologist has considered the information supplied and raises no concerns subject to the imposition of conditions. This was agreed within the Landscape and Significant Gap Matters Statement of Common Ground<sup>35</sup>. Conditions can be imposed to secure any necessary protection and mitigation.
57. In relation to impacts on neighbouring living conditions, at this stage the development proposed is outline with only access committed. Therefore, whilst I accept the outlook for the occupiers of the properties along the site boundaries will change, the height, design and siting of the proposed dwellings, as well as any landscaping, can be negotiated between the Council and Appellant at Reserved Matters stage to ensure living conditions of neighbours are taken into consideration. There is likely to be some noise and disturbance during the construction phase, however a condition can be applied requiring a construction management plan to manage these matters.
58. Similarly, at Reserved Matters stage the specific lighting details can be secured and I have little evidence before me that would suggest pollution levels arising from the development would be at an unacceptable level given the scale of the development and the type of buildings proposed. The Worcestershire Regulatory Services raised no objections in terms of air quality subject to conditions.
59. The appeal site is located within Flood Zone 1 which is a low-risk category. Furthermore, Severn Trent Water considered the application in relation to wastewater and raised no objections subject to conditions to agree the disposal of waste and surface water flows to avoid exacerbating any flooding issues and minimise the risk of pollution. The Lead Local Flood Authority also raised no objection subject to conditions.
60. My attention has been drawn to an appeal decision for Droitwich Spa<sup>36</sup> which considered whether the Council (Wychavon) had made adequate provision for self-build dwellings and concluded that insufficient information had been provided to demonstrate that the Council had met its duty to deliver these types of plots. I note that Policy SWDP2 does not provide for self or custom-build plots, nor does Policy SWDP14. I return to the weight I give to the provision of self and custom build plots in the planning balance below.
61. A Section 106 Unilateral Undertaking<sup>37</sup> has been provided which makes provision for a financial contribution to the Herefordshire and Worcestershire Clinical Commissioning Group. The Council position is that the request for this contribution is not CIL compliant. The request for the funding is to cover a revenue funding gap rather than for any infrastructure required to mitigate the impacts on the health and access to care for the local population as a result of the development. I also note that the methodology for the calculation of this

---

<sup>35</sup> Report No 1010 R05 Dated 09.05.2022

<sup>36</sup> APP/H1840/W/19/3241879 – Corner Mead, Newland Lane, Droitwich Spa, Worcestershire WR9 7JH (ID3)

<sup>37</sup> Section 106 Unilateral Undertaking (1) Walter John Beard, (2) Lone Star Land to Malvern Hills District Council

contribution is not considered to be robust, has not been through the plan-making process and is not supported specifically by the Policies of the SWDP.

62. A signed Section 106 Agreement dated 20 May 2022 has also been provided which makes provision for on-site affordable housing of 40% and provision of First Homes, and contributions towards: community transport education (determined by the mix of dwellings proposed at Reserved Matters Stage) Highways (community transport, scholar transport, personalised travel planning and traffic regulation order), off-site public open space, off-site formal sports, and on site public open space. The Section 106 Agreement also secures the provision of Self and Custom Build plots in Schedule 6.
63. The Council have provided CIL Compliance Statement<sup>38</sup> (May 2022) which provides a thorough justification for each of the requested obligations to demonstrate that each is necessary and reasonably related in scale and kind to the development. I have considered this and the content of the legal agreements and agree that they are necessary and that the documents are legally sound and enforceable. Accordingly, I accept the content of the Section 106 Agreement in this case however for the above reasons I find that the contribution requested by the Herefordshire and Worcestershire Clinical Commissioning Group forming the Unilateral Undertaking has not been justified.

### **Planning Balance**

64. Turning to the overall planning balance, I have found conflict with Policy SWDP2 of the development plan in relation to matters of Significant Gap and the location of the site in the countryside and therefore the development plan as a whole. I give this weight in the planning balance. However, I have found no conflict with the development plan in terms of the landscape and visual character of the area.
65. I have balanced this policy conflict with the benefits of the proposed development, comprising the provision of affordable housing, self and custom build plots, economic benefits including through employment during the construction phase and contributions to the local economy through additional local expenditure, plus the New Homes Bonus and CIL Contributions, provision of new public open space and new planting and improvements to infrastructure.
66. Although policy compliant I still consider the provision of affordable housing to be a significant benefit and the Appellant has provided evidence of the affordability of properties within the area. In addition, I have been presented with evidence as to the need and provision to date of self and custom build homes<sup>39</sup> which shows an under delivery of these types of plots. I have had regard to the level of outstanding requirement for self and custom build plots, as well as the Droitwich Spa appeal decision referred to above, and I therefore give considerable weight to the provision of these types of plots.
67. In relation to the economic benefits, I accept that the employment during the construction phase would be temporary, nevertheless this would still be a benefit. The development would generate additional expenditure in the local

---

<sup>38</sup> ID7

<sup>39</sup> November 2021 Progress Update Report

area also. Collectively I find the economic benefits to weigh moderately in favour of the development.

68. I have addressed the provision of open space and new planting above and find that these would help to mitigate against the visual impacts of the development and would go some way to replicating the historic landscape patterns in this area. Given the loss of the hedgerow, I give the new planting a limited amount of weight overall.
69. Taking all of the benefits into consideration, when balanced with the limited harm that would arise from the proposed development, I find that these harms would be significantly and demonstrably outweighed by the benefits in this instance. Accordingly, whether I was to find that the Council does or does not have a five-year housing land supply would not alter my conclusions in this regard. As such, the conflict with the Policies of the SWDP identified above and as such, the Development Plan as a whole, are outweighed by the benefits and accordingly the proposed development would be acceptable.

### **Conditions**

70. In addition to the standard time limit and reserved matters conditions for outline applications, I have imposed a condition listing the approved plans as this provides certainty.
71. I have imposed a condition limiting the number of dwellings as it is not sufficient to rely on the description of development alone to control this.
72. Conditions 5, 6, 7 and 8 are necessary in the interests of ensuring the development is appropriately landscaped and in the interests of the visual character of the area. Condition 9 is necessary to ensure that any archaeological remains on site are identified and suitably dealt with. It is necessary to impose conditions 10 and 11 in order to provide suitable provisions for future occupiers to be able to use alternative methods of transport. Conditions 12 and 16 are necessary in order to ensure the development of the site does not harm the living conditions of nearby residents and is carried out in a responsible way. I have included conditions 13, 15 and 17 to ensure the energy and water efficiency of the development and protect the air quality of the area. Condition 14 is necessary to provide suitable broadband connections for future occupiers of the development.
73. Conditions 18, 19, 20, 21 and 22 are necessary in order to protect the biodiversity and habitats within and around the appeal site. I have imposed condition 23 as it is fundamental to have suitable and functional drainage for each phase of the development. Conditions 24 and 25 are necessary to ensure that the new access is constructed correctly and does not impact on highway safety.
74. The Council suggested two additional conditions during the course of the Inquiry, which the Appellant has had chance to consider and raises no objections to. These conditions related to the requirement for a statement of conformity to notify the Council that the landscaping works have been carried out in accordance with the approved plans/scheme and that the first residents are provided with a Landscape Welcome Pack which identifies the public landscaped areas, their maintenance schedule and responsible company. I have considered both conditions against the tests however I do not find these

to be necessary to make the development acceptable. I consider that the initially suggested landscaping conditions would be sufficient to secure the delivery and retention of the agreed planting and the residents could contact the developer or Council if there were any queries or concerns about the communal areas and planting throughout the development. I have therefore not imposed these conditions.

75. Conditions 10, 13, 14, 19, 20, 21 and 25 are pre-commencement conditions as it is fundamental to have these matters agreed prior to any works commencing on site. The Appellant has indicated agreement to these conditions.

### **Conclusion**

76. For the reasons given above, and having had regard to all matters raised, I conclude that the appeal should be allowed.

*R Norman*

INSPECTOR

### **Schedule of Conditions**

- 1) Details of the appearance, landscaping, layout, and scale, (hereinafter called "the reserved matters") shall be submitted to and approved in writing by the local planning authority before any development takes place and the development shall be carried out as approved.
- 2) Application for approval of the reserved matters shall be made to the local planning authority not later than 3 years from the date of this permission. The development hereby permitted shall be begun before the expiration of two years from the date of approval of the last of the reserved matters to be approved.
- 3) The reserved matters pursuant to conditions 1 and 2 shall be submitted in accordance with a Phasing Plan for the development which shall set out the details of the Phased delivery of the development including the proposed Self and Custom Build serviced plots.
- 4) Unless where required or allowed by any other conditions attached to this permission, the development hereby approved shall be carried out in accordance with the information provided on the application form and the following plans, drawings and documents:
  - Site Location Plan (reference 294 LO1)
  - Site Plan (Wider Ownership Plan) (reference 294 LO2)
  - Constraints and Opportunities Plan (reference 294 P01)
  - Land Use and Parameter Plan (reference 294 P02)
  - Access and Movement Parameter Plan (reference 294 P03)
  - Building Heights Parameter Plan (reference 294 P04)
  - Landscape and Open Space Parameter Plan (reference 294 P05)
  - Topographical Survey Plan (reference 1755-00)
  - Flood Risk Assessment, including Drainage Assessment (ES115-TES-00-XX-DR-0663 June 2021)
  - Access Drawings ES115-TES-00-XX-DR-C-0505-S2-P05 and ES115-TES-00-XX-DR-C-0506-S2-P02
- 5) The Reserved Matters pursuant to condition 2 hereof shall ensure a minimum site wide provision of 40% green infrastructure on site.
- 6) The development hereby permitted shall be limited to a maximum of 45 dwellings.
- 7) Details of the levels of the existing site, proposed finished levels or contours and the precise slab levels of the approved dwellings, relative to a fixed datum point outside of the boundary of the site, shall be submitted for approval for each phase as part of the reserved matters pursuant to Condition 2 hereof.
- 8) The details of 'landscaping' for each phase to be submitted in accordance with condition 2 hereof shall make specific provision for the following:

- a) Details of any trees and hedgerows to be retained including the hedge fronting to the B4503, together with measures for their protection in the course of development;
- b) Schedule of proposed planting (indicating species, sizes at time of planting and numbers/densities of plants);
- c) Written specification outlining cultivation and other operations associated with plant establishment;
- d) Finished levels or contours;
- e) Details of boundary treatments;
- f) Hard surfacing specification and materials; and
- g) A schedule of maintenance for a minimum period of five years from first planting

The approved landscaping scheme for each phase shall be carried out concurrently with the development and be completed within one calendar year of the substantial completion of the last dwelling to be constructed in that phase. If within a period of 5 years from the date of planting of any tree or hedgerow planted or retained pursuant to this condition that tree or hedgerow, or any tree or hedgerow planted in replacement for it, is removed, uprooted or destroyed or dies, or becomes, in the opinion of the local planning authority, seriously damaged or defective, another tree or hedgerow of the same species and size as that originally planted shall be planted at the same place, unless the local planning authority gives its written approval to any variation.

- 9) Before the first occupation of any phase of the development a schedule of landscape maintenance for the lifetime of the development shall be submitted to and approved in writing by the local planning authority. The schedule shall include details of the arrangements for its implementation, long-term objectives, management responsibilities and maintenance schedules for all communal landscape areas (excluding domestic gardens). The approved landscape maintenance schedule shall be fully implemented.
- 10) (A) Prior to the submission of a reserved matters application for any phase of the development a programme of archaeological work is required, including a Written Scheme of Investigation, to be submitted to and approved by the local planning authority in writing. The scheme shall include an assessment of significance and research questions:
  - i. The programme and methodology of site investigation and recording;
  - ii. The programme for post investigation assessment;
  - iii. Provision to be made for analysis of the site investigation and recording;
  - iv. Provision to be made for publication and dissemination of the analysis and records of the site investigation;
  - v. Provision to be made for archive deposition of the analysis and records of the site investigation;

- vi. Nomination of a competent person or persons/organisation to undertake the works set out within the Written Statement of Investigation

(B) The development shall not be occupied until the site investigation and post investigation assessment has been completed in accordance with the programme set out in the Written Scheme of Investigation approved under part (A) and the provision made for analysis, publication and dissemination of results and archive deposition has been secured.

- 11) Details of the location, type of rack, spacing, numbers, method of installation and access to cycle parking shall be submitted to and approved in writing by the local planning authority for each phase prior to the first occupation of the dwellings within that phase. The cycle parking provision shall be installed in accordance with the approved plans for each phase before the dwellings in that phase are first occupied.
- 12) Appropriate cabling and an outside electrical socket must be supplied for each property to enable ease of installation of an electric vehicle charging point (houses with dedicated parking). The charging point must comply with BS7671. The socket should comply with BS1363 and must be provided with a locking weatherproof cover if located externally to the building.

For developments with unallocated parking, i.e., flats/apartments, 1 EV charging point per 10 spaces (as a minimum) should be provided by the developer to be operational at commencement of development. The charging point must comply with BS EN 62196 Mode 3 or 4 charging and BS EN 61851. As a minimum, charge points should comply with Worcestershire County Council Design Guide which required 7kw charging points for residential developments.

- 13) No development or site assembly for any phase shall begin until a Construction Environment Management Plan (CEMP) for that phase has been submitted to and approved in writing by the local planning authority. The CEMP shall be adhered to throughout the construction of each phase and shall include the following details:
  - a) Details of measures to minimise the impacts arising from construction, demolition, and site clearance activities and the traffic associated with this development, including a scheme for vehicle wheel cleaning and other measures to ensure that vehicles leaving the site do not deposit mud or other detritus on the public highway;
  - b) Details of site operative parking areas, material storage areas and the location of site operative facilities, including offices and toilets;
  - c) A management strategy and proposals for the minimisation of construction waste; and
  - d) Details of any temporary construction accesses and their reinstatement. The measures set out in the approved plan shall be carried out and complied with in full during the construction of the development hereby approved. Site operatives' parking, material storage and the positioning of operatives' facilities shall only take place on the site in locations approved in writing by the local planning authority.

- 14) Prior to the commencement of the development of each phase, details of renewable and/or low carbon energy generation measures for that phase shall be submitted to and approved in writing by the local planning authority. The measures shall contribute to at least 10% of the predicted energy requirements of the development. The details to be submitted shall include:
- a) The overall predicted energy requirements of the approved development;
  - b) The predicted energy generation from the proposed renewable/low carbon energy measures; and
  - c) An implementation timetable for the proposed measures.

The development of each phase shall be carried out in accordance with the approved details.

- 15) Prior to the first occupation of any of the dwellings within each phase, details of connections to facilitate superfast broadband facilities or alternative solutions to serve the dwellings within the phase shall be submitted to and approved in writing by the local planning authority. The submitted details shall include an implementation programme. The facilities shall be provided in accordance with the approved details.
- 16) Prior to the commencement of above ground works within each phase, a Water Management Statement for that phase, setting out water efficiency measures and confirming that the daily non-recycled water use per person will not exceed 110 litres per day, shall be submitted to, and approved in writing by, the local planning authority. The measures for each phase shall be implemented in accordance with the approved details before occupation of the respective dwelling in that phase and retained thereafter.
- 17) Demolition, clearance or construction work and deliveries to and from the site in connection with the development hereby approved shall only take place between the hours of 0800 and 1800hrs Monday to Friday and 0800 and 1300hrs on a Saturday. There shall be no demolition, clearance or construction work or deliveries to and from the site on Sundays or Bank and Public Holidays.
- 18) Details shall be submitted to and approved in writing by the local planning authority prior to the commencement of above-ground works within each phase for the installation of Ultra-Low NOx boilers with maximum NOx Emissions less than 40 mg/kWh. The boilers for each phase shall be implemented in accordance with the approved details before occupation of the respective dwelling in that phase and retained thereafter.
- 19) No development of any phase shall take place (including demolition, ground works, vegetation clearance) until a Construction Environmental Management Plan for Biodiversity (CEMP:Biodiversity) for that phase has been submitted to and approved in writing by the local planning authority. The CEMP:Biodiversity shall include the following:
- a) Risk assessment of potentially damaging construction activities;
  - b) Identification of "biodiversity protection zones";

- c) Practical measures (both physical measures and sensitive working practices) to avoid or reduce impacts during construction. These may be provided as a set of method statements for reptiles and amphibians, birds, badgers, bats (lighting during construction);
- d) The location and timing of sensitive works to avoid harm to biodiversity features
- e) The times during construction when specialist ecologists need to be present on site to oversee works;
- f) Responsible persons and lines of communication;
- g) The role and responsibilities on site of an ecological clerk of works (ECoW) or similarly competent person; and
- h) Use of protective fences, exclusion barriers and warning signs.

The approved CEMP: Biodiversity shall be adhered to and implemented throughout the construction period strictly in accordance with the approved details, unless otherwise, agreed in writing by the local planning authority.

- 20) No development shall take place until an Ecological Design Strategy (EDS) addressing biodiversity compensation and enhancement measures for that phase has been submitted to and approved in writing by the local planning authority. The EDS shall include the following:

- a) Purpose and conservation objectives for the proposed works;
- b) Review of site potential and constraints;
- c) Detailed design(s) and/or working method(s) to achieve stated objectives;
- d) Extent and location/area of proposed works on appropriate scale maps and plans;
- e) Type and source of materials to be used where appropriate e.g., native species of local provenance;
- f) Timetable for implementation demonstrating that works are aligned with the proposed phasing of development;
- g) Persons responsible for implementing the works;
- h) Details of initial aftercare and long-term maintenance;
- i) Details for monitoring and remedial measures; and
- j) Details for disposal of any wastes arising from works.

The EDS shall be implemented in accordance with the approved details and all features shall be retained in that manner thereafter.

- 21) A Landscape and Ecological Management Plan (LEMP) for each phase of the development shall be submitted to and approved in writing by the local planning authority prior to the commencement of that phase of the development. The content of the LEMP shall include the following:

- a) Description and evaluation of features to be managed;
- b) Ecological trends and constraints on site that might influence management;

- c) Aims and objectives of management;
- d) Appropriate management options for achieving aims and objectives;
- e) Prescriptions for management actions;
- f) Preparation of a work schedule (including an annual work plan capable of being rolled forward over a minimum five-year period);
- g) Details of the body or organisation responsible for implementation of the plan; and
- h) Ongoing monitoring and remedial measures.

The LEMP shall also include details of the legal and funding mechanism(s) by which the long-term implementation of the plan will be secured by the developer with the management body(ies) responsible for its delivery. The plan shall also set out (where the results from monitoring show that conservation aims and objectives of the LEMP are not being met) how contingencies and/or remedial action will be identified, agreed and implemented so that the development still delivers the fully functioning biodiversity objectives of the originally approved scheme. The approved plan will be implemented in accordance with the approved details.

- 22) Prior to the first occupation of each phase, a lighting design strategy for biodiversity for that phase shall be submitted to and approved in writing by the local planning authority. The strategy shall:
- a) Identify those areas/features on site that are particularly sensitive for bats and other nocturnal wildlife and that are likely to cause disturbance in or around their breeding sites and resting places or along important routes used to access key areas of their territory, for example for foraging; and
  - b) Show how and where external lighting will be installed (through the provision of appropriate lighting contour plans and technical specifications) so that it can be clearly demonstrated that areas to be lit will not disturb or prevent the above species using their territory or having access to their breeding sites and resting places.

All external lighting for each phase shall be installed in accordance with the specifications and locations set out in the strategy, and these shall be maintained thereafter in accordance with the strategy. Under no circumstances should any other external lighting be installed without prior consent from the local planning authority.

- 23) Prior to the first occupation of each phase, the phase of the development shall be inspected by a qualified ecologist and a statement of conformity shall be submitted to the local planning authority to confirm the mitigation, compensation and enhancement measures for biodiversity have been successfully implemented in accordance with the details approved under this condition. The development of each phase shall not be occupied until these details have been approved.
- 24) No works in connection with site drainage for each phase shall commence until a SuDS management plan for that phase, which will include details on future management responsibilities, along with maintenance schedules

for all SuDS features and associated pipework has been submitted to and approved in writing by the local planning authority. This plan shall detail the strategy that will be followed to facilitate the optimal functionality and performance of the SuDS scheme throughout its lifetime. The approved SuDS management plan shall be implemented in full in accordance with the agreed terms and conditions and shall be managed and maintained in accordance with the approved maintenance plan and thereafter.

No works in connection with site drainage for each phase shall take place until an exceedance flow routing plan for flows above the 1 in 100+40% event has been submitted to and approved in writing by the local planning authority. The proposed scheme shall identify exceedance flow routes through the development based on proposed topography with flows being directed to highways and areas of POS. Flow routes through gardens and other areas in private ownership will not be permitted. The approved details for each phase shall be implemented in full prior to the first occupation of the phase.

Notwithstanding the submitted Drainage Strategy, no development shall commence in each phase until detailed design drawings for surface water drainage and disposal of foul waters for that phase have been submitted to and approved in writing by the local planning authority. Thereafter the development of the phase shall be carried out in accordance with the approved details.

- 25) Prior to the commencement of development, a detailed scheme for the site access works at Leigh Sinton Road, including the location and extent of the Traffic Regulation Order related to the proposed access, shall be submitted to the local planning authority (and Worcestershire County Council Highways). The development shall not be occupied or brought into use until the submitted scheme, which is broadly in accordance with drawings ES115-TES-00-XX-DR-C-0505-S2-P05 and ES115-TES-00-XX-DR-C-0506-S2-P02, has been agreed in writing by the local planning authority, in consultation with Worcestershire County Council Highways, and has been implemented in full.
- 26) The development hereby approved shall not be occupied until the visibility splays shown on drawings ES115-TES-00-XX-DR-C-0505-S2-P05 and ES115-TES-00-XX-DR-C-0506-S2-P02 have been provided. The splays shall at all times be maintained free of level obstruction exceeding a height of 0.6m above the adjacent carriageway.

## APPEARANCES

### FOR THE LOCAL PLANNING AUTHORITY:

Richard Kimblin QC of No5 Chambers instructed by Penelope James, Solicitor at Malvern Hills District Council and Wychavon District Council Joint Legal Team

He called	
Christopher Lewis-Farley	Tree and Landscape Officer, Malvern Hills District Council
MLArch HND Arb	
Richard Pestell BSc	Director, Stantec UK Limited
MPhil MRTPI	
Edward Buckingham BA	Senior Associate, Stantec UK Limited
MPlanning MRTPI	

### FOR THE APPELLANT:

Satnam Choongh No 5 Chambers instructed by Reuban Bellamy BA(Hons) DipTP MPRTI, Planning Director at Lone Star Land

He called	
Jason Tait BA(Hons)	Director, Planning Prospects Ltd
DipTP MRTPI	
Cameron Austin-Fell	Director, RPS Consulting Services Ltd
BA(Hons) MSc MRTPI	
Robert Hughes	Director, Incola Landscape Planning

# Appeal Decision

Inquiry held on 21 February 2023

Site visit made on 23 February 2023

**by Jonathan Bore MRTPI**

an Inspector appointed by the Secretary of State

Decision date: 13 March 2023

---

**Appeal Ref: APP/V3120/W/22/3310788**

**Land East of Grove, Grove, OX12 7FS, 441052, 190896**

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant outline planning permission.
  - The appeal is made by David Wilson Homes against the decision of Vale of White Horse District Council.
  - The application Ref P22/V055/O, dated 2 March 2022, was refused by notice dated 28 July 2022.
  - The development proposed is up to 300 dwellings and provision of public open space including associated landscape planting with associated infrastructure, drainage measures and earthworks and all other associated works.
- 

## Decision

1. The appeal is dismissed.

## Preliminary matters

2. The application was submitted in outline with all matters reserved except for access into the site.
3. The Council's decision notice contained 5 reasons for refusal. Reasons for refusal 3, in respect of archaeology, and 4, concerning highways impact, were resolved before the inquiry opened. Reason for refusal 5, which referred to affordable housing provision and development contributions, was resolved through the completion of a s106 agreement, dated 23 February 2023. Two main issues remain, as discussed below.

## Main Issues

4. These are:
  - (i) the effect of the scheme on the countryside and landscape;
  - (ii) the position regarding the 5 year housing land supply, and the need for additional housing in this location.

## Reasons

### Issue (i)

5. Grove is defined as a Local Service Centre in Core Policy 3 of the adopted Vale of White Horse Local Plan 2031 Part 1 (hereafter referred to as Local Plan Part 1); Core Policy 4 contains a presumption in favour of development within the built-up areas of Local Service Centres or on allocated sites outside the

settlement. The site is outside the settlement boundary and is not allocated for development. Core Policy 4 indicates that development in open countryside will not be appropriate unless specifically supported by other relevant policies as set out in the development plan or national policy. Core Policy 44 seeks to protect from harmful development the key features that contribute to the nature and quality of the Vale of White Horse District's landscape.

6. Grove has expanded over the years; Station Road, the A338, now forms a strong eastern boundary to the village. To the east of Station Road is open countryside, of which the appeal site forms an integral part, consisting of arable land and pasture intersected by hedgerows, ditches, watercourses and footpaths. There are attractive wider views towards higher land to the north and south. Though not having a national landscape designation, the site and the surrounding countryside have a pleasant rural character, identified by the Vale of White Horse Landscape Character Assessment (2017) as part of the wider Lower Vale Farmland area. There are a few building groups in this rural area, but not many. The buildings of Grove, the F1 Williams buildings, the petrol station and passing vehicles on the A338 are visible from the site and various nearby locations, but rather than degrading the rural character of the site, they are seen as a typical village edge and do not alter the perception that the site is part of the wider countryside.
7. The Appellant's landscape evidence concluded that the visual and landscape impacts of the scheme would be localised. However, the scheme would introduce a substantial block of development into this pleasant rural area. Even the maturing of the proposed on-site planting would not be able to disguise the fundamental change of a large area of land from open agricultural land to housing development. Whilst no public rights of way cross the site, the scheme would have a significant urbanising influence on Grove Park Drive and on the rural character of hedge-lined Tulwick Lane which border the site. Despite the proposed planting on and around the site, the development would be clearly apparent from these roads and from parts of the extensive footpath network beyond the site. From the raised area of Crab Hill, it would be seen to intrude into the pleasant expanse of countryside to the north, which is currently interspersed only with a few individual building groups.
8. From all these locations, and indeed from Station Road itself, the scheme would appear as a notable departure from the existing settlement form and an awkward eastern extension of the village. Recent plan-led development has enlarged Grove, but the appeal scheme, by extending eastwards beyond Station Road, would appear as unplanned sprawl. In making this observation it is appreciated that nearby East Hanney and Wantage extend to the east of the A338, but they are separate settlements with their own development forms and are not part of the immediate visual context for the site.
9. In conclusion, the scheme would cause significant harm to the character of the countryside and landscape and would conflict with that aspect of Core Policy 4 which resists development outside settlement boundaries, and with Core Policy 44 of the Local Plan which seeks to protect the nature and quality of the landscape.

### **Issue (ii)**

10. Core Policy 4 of Local Plan Part 1, adopted in 2016, states that the housing requirement for the district is 20,560 dwellings for the period 2011/12 to

2030/31. This strategic policy remains extant. Core Policy Part 4a of the adopted Vale of White Horse Local Plan 2031 Part 2, "Detailed Policies and Additional Sites", adopted in 2019 (Local Plan Part 2), adds 2,200 dwellings to the Core Policy 4 figure as an allowance towards the unmet needs of the City of Oxford, giving 22,760 dwellings as the total housing requirement for the district over the same period as Local Plan Part 1. Apart from the element that addresses Oxford's unmet needs, the housing requirement in Core Policy 4a is derived directly from Core Policy 4.

11. The Council has undertaken a review of Local Plan Part 1 under Regulation 10a of the Town and Country (Local Planning) (England) Regulations 2012. The review, which was not challenged, has concluded that Core Policy 4 is more than 5 years old, is out of date, and needs revision, its housing requirement being based on the 2014 strategic housing market assessment (SHMA) which used the 2011 interim household projections to 2021. National policy as set out in paragraph 74 of the National Planning Policy Framework, and Planning Practice Guidance "Housing Supply and Delivery", state that, where strategic policies are more than 5 years old, the 5 year housing land supply will be measured against the area's local housing need (LHN), calculated using the standard method. This is directly applicable to Core Policy 4 of Local Plan Part 1.
12. Core Policy 4a of Local Plan Part 2 is only 3 years old and has not been reviewed. However, the housing requirement in that policy, apart from the City of Oxford allowance, is the same as that set out in Core Policy 4 of Local Plan Part 1. The provenance of Core Policy 4a and its derivation from the same figure and the same ageing statistical inputs and projections as Core Policy 4 are a clear indication that its housing requirement (apart from the Oxford allowance) is also out of date for the purposes of assessing the 5 year housing land supply. The purpose of the 5 year housing land supply calculation is to ensure that there is at least 5 years' supply of deliverable housing land based on an up to date calculation of housing need. The more up-to-date figure from LHN should therefore be used.
13. LHN is 636 dwellings per annum, significantly lower than the 1,028 dwellings per annum requirement in Local Plan Part 1. The Council state that a further 183 dwellings per annum should be added to the LHN figure to allow for Oxford's unmet needs from Core Policy 4a. This addition is appropriate in this particular instance because it is an agreed figure which addresses the level of unmet housing need in Oxford, which was reassessed and confirmed in the up-to-date Oxford Local Plan 2036, adopted in June 2020. Taking the two components together, the total housing requirement for the district, for the purposes of the 5 year housing land supply calculation, is 819 dwellings per annum.
14. Using 819 dwellings per annum as the housing requirement, there are 6.36 years' supply of deliverable housing land in the district on the Council's figures and 5.01 years on the Appellant's figures. Whilst the Appellant disputes the deliverability of some sites or phases, it is agreed between the parties that there is more than 5 years' supply if the housing requirement is based on LHN. As to the extent of the surplus, it is evident that most of the disputed sites have outline permission, many have outstanding applications for reserved matters and on most of the sites where there are impediments such as outstanding infrastructure requirements, there is evidence that positive action

is being taken to resolve the issues. There is no justification in policy for applying a 10% reduction to contributions from deliverable small sites. On this basis the housing land supply is nearer to the Council's figure of 6.36 years, and there is substantially more than 5 years' supply of deliverable sites in the district.

15. Core Policy 5 in Local Plan Part 1 ring fences Science Vale, where the site lies, and treats it as a separate sub-area for the purposes of the assessment of housing land supply, with a housing requirement of 11,850 homes in the plan period (593 homes per annum) in support of the 15,850 jobs planned in this sub-area and as a contribution towards meeting the district's housing needs set out in Core Policy 4. The delivery of housing and employment in the sub-area has been lower than anticipated by Local Plan Part 1, and if the ring-fenced housing requirement in Core Policy 5 were to be taken as the basis for the 5 year housing land supply calculation in this area, there would be a shortfall in supply. It is noted that the Inspector in the East Hendred case (Ref no APP/V3120/W/16/3145234) gave weight to a housing supply shortfall in the ring-fenced area.
16. However, things have changed since the Science Vale housing requirement was established in 2016 and the East Hendred decision was made in 2017: the lower levels of housing and employment delivery in Science Vale have been influenced by a recent combination of macroeconomic factors, and Core Policy 5, like Core Policy 4, has been reviewed under Regulation 10a and found to be out of date and in need of revision. Core Policy 5 is based on a historic calculation of housing need. The calculation of the 5 year housing land supply looks forward, and must use an up-to-date figure of housing need.
17. Therefore, in accordance with national policy, LHN should be used for the calculation of the 5 year housing land supply, and LHN is calculated on a district wide rather than sub-area basis. There was discussion at the inquiry about the effect of this approach on the implementation of the Local Plan's spatial strategy for Science Vale. In this regard it should be recognised that the purpose of the 5 year housing land supply calculation is not to drive the implementation of the spatial strategy, it is simply to ensure that current housing needs can be met, using up-to-date calculations of housing need and supply. Core Policy 5 is not an appropriate basis for that calculation because it is derived from a past calculation of housing need. The spatial strategy is already in place as part of the statutory development plan; it covers the period up to 2031; its allocations have been made, and they are already delivering, or are anticipated to deliver, a substantial amount of development during the plan period. The spatial strategy, including its approach towards Science Vale, is not undermined by the use of LHN in the 5 year housing supply calculation.
18. To conclude on this issue, there is a supply of specific deliverable sites in the district sufficient to provide a minimum of five years' worth of housing against the housing requirement. It is acknowledged that the scheme would bring benefits; it would provide up to 300 new homes, of which 35% would be affordable, on a site which benefits from a good bus service on Station Road, and it would deliver a useful cycle link and toucan crossings on Station Road. There would be new planting, public paths, open space and a heritage park which would reflect the presence of the nearby deserted medieval village. But the decision-making approach in paragraph 11(d) of the National Planning Policy Framework does not apply, and the harm to the landscape and

countryside, described under Issue 1, would significantly outweigh the benefits of the additional housing provision and the other benefits of the scheme. Indeed, that would be the case even if the housing land supply calculation were to be based on the out-of-date housing requirement established in the Local Plan, resulting in a supply of less than 5 years and the decision-making balance in paragraph 11(d) of the National Planning Policy Framework were applied.

## **Conclusion**

19. The scheme would lie outside the settlement boundary of Grove and would appear as an awkward eastern extension of the village, causing significant harm to the countryside and the character of the landscape, contrary to the relevant part of Core Policy 4, and Core Policy 44, of Local Plan Part 1. LHN is the appropriate figure to use for the purposes of the 5 year housing land supply calculation and the use of LHN would not undermine the spatial strategy for Science Vale. Using LHN there is more than 5 years' supply of deliverable housing land in the district and the decision-making approach in paragraph 11(d) of the National Planning Policy Framework does not apply. The harm to the landscape and countryside would significantly outweigh the benefits of the additional housing provision and the other benefits of the scheme; that would remain the case even if there were a 5 year housing land supply shortfall and the decision-making balance in paragraph 11(d) of the National Planning Policy Framework were applied.
20. I have considered all the other matters raised, but they do not alter the balance of my conclusions. For all the reasons given above the appeal is dismissed.

*Jonathan Bore*

INSPECTOR

## **APPEARANCES**

### FOR THE APPELLANT:

15 July 2020

Dear Sir

**TOWN AND COUNTRY PLANNING ACT 1990 – SECTION 78  
APPEAL MADE BY MULLER PROPERTY GROUP  
LAND OFF AUDLEM ROAD/BROAD LANE, STAPELEY, NANTWICH AND LAND OFF  
PETER DE STAPELEIGH WAY, NANTWICH  
APPLICATION REFS: 12/3747N AND 12/3746N**

1. I am directed by the Secretary of State to say that consideration has been given to the report of David L Morgan BA MA (T&CP) MA (Bld Con IoAAS) MRTPI IHBC, who held a public local inquiry on 20-24 February 2018 into your client's appeal against the decision of Cheshire East Council to refuse your client's application for outline planning permission for Appeal A: Proposed residential development for up to a maximum of 189 dwellings; local centre (Class A1 to A5 inclusive and D1) with a maximum floor area of 1,800 sq.m Gross Internal Area (GIA); employment development (B1b, B1c, B2 and B8) with a maximum floor area of 3,700 sq. m GIA; primary school site; public open space including new village green, children's play area and allotments, green infrastructure including ecological area; access via adjoining site B (see below) and new pedestrian access and associated works; and against the failure of Cheshire East Council to determine your client's application for Appeal B: Proposed new highway access road, including footways and cycleways and associated works, in accordance with applications 12/3747N and 12/3746N.
2. The Secretary of State issued his decisions in respect of the above appeals by way of his letters dated 17 March 2015 and 11 August 2016. Those decisions were challenged by way of an application to the High Court and were subsequently quashed by orders of the

Ministry of Housing, Communities & Local Government  
Jean Nowak, Decision Officer  
Planning Casework Unit  
3rd Floor Fry Building  
2 Marsham Street  
London SW1P 4DF

Tel: 0303 444 1626  
Email: [PCC@communities.gov.uk](mailto:PCC@communities.gov.uk)

Court dated 3 July 2015 and 14 March 2017. The appeals have therefore been redetermined by the Secretary of State following a new inquiry into this matter. Details of the original inquiry are set out in the 17 March 2015 and 11 August 2016 decision letters.

### **Inspector's recommendation and summary of the decision**

3. The Inspector recommended that the appeals be allowed and planning permission should be granted.
4. For the reasons given below, the Secretary of State agrees with the Inspector's conclusions, except where stated, and agrees with his recommendation. He has decided to allow the appeals and grant planning permission. A copy of the Inspector's report (IR) is enclosed. All references to paragraph numbers, unless otherwise stated, are to that report.

### **Procedural matters**

5. The Secretary of State notes that, prior to the opening of the Inquiry the appellant submitted a revised layout of the proposals which omitted the proposed access off Audlem Road and that this has necessitated an amendment to the description of development to reflect the changes (IR7). The Secretary of State also notes that the Inspector subsequently received comments on the revisions following consultation by the appellant. For the reasons given in IR7-8, the Secretary of State agrees with the Inspector that the proposed revisions should be taken into account in the determination of this case and he is satisfied that no interests have thereby been prejudiced.
6. The Secretary of State has noted that a reference to policy RG6 of the Cheshire East Local Plan Strategy (CELPS) in IR424 should refer to policy PG6.

### **Matters arising since the close of the inquiry**

7. On 21 February 2019, the Secretary of State wrote to the main parties to afford them an opportunity to comment on:
  - The Written Ministerial Statement on housing and planning, issued on 19 February 2019.
  - The publication, on 19 February 2019, of the 2018 Housing Delivery Test (HDT) measurement by local planning authorities and a technical note on the process used in its calculation.
  - The Government's response to the technical consultation on updates to national planning policy and guidance, published 19 February 2019.
  - The revised National Planning Policy Framework, published on 19 February 2019.
  - Updated guidance for councils on how to assess their housing needs.

The representations that were received in response were circulated to the main parties on 11 March 2019. Further representations were subsequently received, including an assessment of the 5-year housing land supply submitted on 23 April 2019 by Harris Lamb on behalf of the appellant and the Cheshire East Annual Housing Monitoring Update Report (HMU) (Base Date March 2018) received on 24 April 2019 submitted by Cheshire East Council. Further representations were received in response to the HMU 2018.

Subsequently the Cheshire East Annual Housing Monitoring Update Report (Base Date March 2019) was submitted by Cheshire East Council on 8 November 2019. Representations received were circulated with the final correspondence received on 12 February 2020. All representations are listed at Annex A. Copies of these letters may be obtained on written request to the address at the foot of the first page of this letter.

8. The 2019 Housing Delivery Test results were published on 13 February 2020. The Council's score was assessed as 230%, requiring no further action. The Secretary of State is satisfied that this does not affect his decision and does not warrant further investigation or a referral back to parties.

### **Policy and statutory considerations**

9. In reaching his decision, the Secretary of State has had regard to section 38(6) of the Planning and Compulsory Purchase Act 2004 which requires that proposals be determined in accordance with the development plan unless material considerations indicate otherwise.
10. In this case the development plan consists of the Cheshire East Local Plan Strategy 2010 – 2030, adopted July 2017 (CELPS), the Stapeley and Batherton Neighbourhood Plan, made in 2018 (S&BNP) and the saved policies from Crewe and Nantwich Replacement Local Plan (February 2005) (CNLP). The Secretary of State considers that relevant development plan policies include those set out in paragraph 5.1 of the Planning Statement of Common Ground (IR26).
11. Other material considerations which the Secretary of State has taken into account include the National Planning Policy Framework ('the Framework') and associated planning guidance ('the Guidance'), as well as those listed in IR28-29. The revised National Planning Policy Framework was published on 24 July 2018 and further revised in February 2019. Unless otherwise specified, any references to the Framework in this letter are to the 2019 Framework.

### **Main issues**

12. The Secretary of State agrees with the Inspector that the main considerations are those set out at IR380-381.

#### *Character and appearance*

13. For the reasons given in IR382-387 and IR418 the Secretary of State agrees with the Inspector at IR388 that the proposals are in conflict with the letter and principles of Policies PG6, SD1 and SD2 of the CELPS, Policy RES5 of the CNLP and Policy GS1, H1 and H5 of the S&BNP. However, he also agrees that the appeal sites are now effectively bordered on three sides by existing and emerging development. The Secretary of State also agrees with the Inspector that the rural hinterland, anticipated by the plan vision has, in the circumstances of these cases, been extensively eroded. The Secretary of State agrees with the Inspector that the degrees of harm to visual amenity here, because of the very specific urbanised context of the site and the contribution green space makes to the scheme, would, in actuality, be limited in extent (IR418). Overall the Secretary of State affords the harm to character and appearance, and visual amenity, limited weight in the planning balance.

#### *BMV Agricultural land*

14. As set out in IR389-390 and IR419 the Secretary of State agrees with the Inspector that the proposed development would result in the loss of best and most versatile agricultural land and is contrary to Policy SE2 of the CELPS. The Secretary of State further agrees that the area of land is modest and predominantly at lower grade, and that its loss cannot be judged significant. He agrees it merits only modest weight against in the planning balance.
15. The Secretary of State notes that no other substantive harms have been identified and agrees with the Inspector that the other effects of the development can be effectively mitigated through the provisions of the section 106 obligations, thus rendering them neutral in the planning balance (IR419).

#### *Highway safety*

16. The Secretary of State acknowledges that there was a significant degree of apprehension amongst local residents over any increase in traffic numbers in the locality as a result of the development proposed. For the reasons given in IR391–392 and IR416 the Secretary of State agrees with the Inspector that such concerns must be afforded no more than very limited weight.

#### *Housing land supply*

17. The Secretary of State has considered the Inspector's assessment of housing land supply at IR393-409 and has also taken into account the revised Framework, Housing Delivery Test (HDT) and material put forward by parties as part of the reference back processes set out in paragraph 7 of this letter. As part of this, the Council submitted their Annual Housing Monitoring Update Report (HMU) (base date March 2019) which concludes that the Council can demonstrate 7.5 years of housing land supply, assessed from 2019-2024. The appellant disagrees with this figure and concludes that the Council can demonstrate 4.72 years of housing land supply.
18. For the reasons given in IR393 the Secretary of State agrees that the basic housing requirement for Cheshire East Council is 1800 dwellings per annum (9000 over 5 years) and notes that this was agreed in a statement of common ground between the parties and was also set out in the CELPS. The shortfall to be addressed is now 3582 dwellings, which is set out in the Council's HMU 2019 and also referred to in the appellant's correspondence of 4 December 2019. The Secretary of State, therefore, uses this figure of 3582 dwellings as the shortfall rather than 5635 dwellings set out in IR393. For the reasons given in IR397-398, the Secretary of State agrees with the Inspector that any backlog should be made up within the first 8 years of the plan period as determined by the CELPS and the Examining Inspector, and that this 8-year period should not be rolled forward. As the 8-year period began on 1 April 2016, and concludes on 31 March 2024, the shortfall of 3582 should therefore be made up in the 5-year period on which the current HMU is based, with the housing requirement at this stage of the calculation being 12,582.
19. The Secretary of State notes that since the closure of the Inquiry the revised Framework and updated HDT 2019 figures have been published. The HDT figures mean that the Council is only required to add a 5% buffer in line with paragraph 73 of the Framework rather than the 20% buffer that was required at the time of the Inquiry. Including this buffer, the housing requirement is 13,211.

20. The Secretary of State considers that the Inspector's assessment of housing supply at IR400-409 is now out of date given the new information that has been submitted by parties since the end of the Inquiry.
21. The Secretary of State has reviewed the information submitted by the parties, in particular the sites where deliverability is in dispute between the appellant and the Council. The Secretary of State agrees with the appellant that some of the sites identified by the Council, at the time the evidence was submitted, may not meet the definition of deliverability within the Framework. He considers that, on the basis of the evidence before him, the following should be removed from the supply: sites with outline planning permission which had no reserved matters applications and no evidence of a written agreement; a site where there is no application and the written agreement indicates an application submission date of August 2019 which has not been forthcoming, with no other evidence of progress; and a site where the agent in control of the site disputes deliverability. He has therefore deducted 301 dwellings from the supply of housing figures.
22. The Secretary of State also considers that there are further sites where the evidence on deliverability is marginal but justifies their inclusion within a range of the housing supply figures. This group includes sites where the Council has a written agreement with an agent or developer and this indicates progress is being made, or where there is outline planning permission or the site is on a brownfield register and the Secretary of State is satisfied that there is additional information that indicates a realistic prospect that housing will be delivered on the site within 5 years. The Secretary of State considers that in total the number of dwellings within this category is 2,234.
23. Applying these deductions to the Council's claimed deliverable supply figure of 17,733, the Secretary of State is satisfied therefore, on the basis of the information before him, that the Council has a 5 year deliverable supply of between 15,198 dwellings and 17,432 dwellings. As the Secretary of State also considers that the Council has a total 5 year requirement of 13,211 dwellings, he is satisfied that the Council is able to demonstrate a supply of housing sites within the range of 5.7 years to 6.6 years. The Secretary of State has considered the Inspector's comments in IR423-425, and considers that in the light of his conclusion that there is a 5 year housing land supply, the presumption in favour of sustainable development does not apply in this case.

#### *Need for a mixed use development*

24. The Secretary of State agrees with the Inspector at IR410 that the right approach is to consider the proposal as a whole, as to do otherwise would be to invite independent evaluation of the constituent elements across the board.

#### *Distortion of the Council's spatial strategy*

25. For the reasons given in IR411, the Secretary of State agrees with the Inspector that the development proposed here cannot be considered of such a magnitude as to distort the spatial vision. He therefore agrees with the Inspector that there is no breach of policies PG2 and PG7 of the CELPS.

#### *The benefits of the scheme*

26. For the reasons given in IR412 and IR421, the Secretary of State agrees with the Inspector that the proposal would bring economic benefits, in terms of direct and indirect

employment during its construction and expenditure into the local economy. The Secretary of State also agrees with the Inspector that the site is in a sustainable location and notes that Nantwich is one of the preferred locations for development in the CELPS. He agrees that these benefits should be afforded medium weight.

27. For the reasons given in IR413 and IR421, the Secretary of State agrees with the Inspector that there will be a number of social benefits including extensive areas of public open space embracing a new village green and an enlarged Landscape and Nature Conservation Area, the scope for the development of a further primary school and improvements to sustainable transport connectivity. He agrees that these would represent significant additional social benefits, not just to new occupiers of the development, but to those in the locality as well. He also agrees with the Inspector that these benefits should be afforded medium weight.
28. For the reasons given in IR414 and IR420 the Secretary of State agrees with the Inspector that the delivery of significant numbers of market housing in a sustainable location is a significant benefit. Whilst the Secretary of State has concluded that the Council can demonstrate a 5 YHLS, he has taken into account that nationally it is a government policy imperative to boost the supply of housing, as set out at paragraph 59 of the Framework, and he considers that this benefit should be afforded significant weight.
29. The Secretary of State also agrees with the Inspector at IR415 and IR420 that the scheme will include 30% affordable homes which will help meet the need in Cheshire East. The Secretary of State agrees that this is a tangible benefit and merits significant weight.

### **Planning conditions**

30. The Secretary of State has given consideration to the Inspector's analysis at IR368-372, the recommended conditions set out at the end of the IR and the reasons for them, and to national policy in paragraph 55 of the Framework and the relevant Guidance. He is satisfied that the conditions recommended by the Inspector comply with the policy test set out at paragraph 55 of the Framework and that the conditions set out at Annex B should form part of his decision.
31. Having had regard to the Inspector's analysis at IR373-378, the planning obligation dated 2 March 2018, paragraph 56 of the Framework, the Guidance and the Community Infrastructure Levy Regulations 2010, as amended, the Secretary of State agrees with the Inspector's conclusion for the reasons given in IR374-378 that the obligation complies with Regulation 122 of the CIL Regulations and the tests at paragraph 56 of the Framework.

### **Planning balance and overall conclusion**

32. For the reasons given above, the Secretary of State considers that the appeal scheme is not in accordance with PG6, SD1, SD2, SE2 of the CELPS, Policy RES5 of the CNLP and Policies G5, H1 and H5 of the S&BNP and is not in accordance with the development plan overall. He has gone on to consider whether there are material considerations which indicate that the proposal should be determined other than in accordance with the development plan.

33. Weighing against the proposal, the harm to character and appearance, and visual amenity, is afforded limited weight and the loss of BMV agricultural land is afforded modest weight. Any concerns due to increase in traffic are afforded only very limited weight. No other substantive harms have been identified.
34. Weighing in favour of the proposal, the provision of market housing in a sustainable location is afforded significant weight. The provision of affordable housing to help meet a need in Cheshire East is also given significant weight. The economic benefits in terms of direct and indirect employment during its construction and expenditure into the local economy of the proposal are given medium weight. The social benefits, including extensive areas of public open space, the scope for the development of a further primary school and improvements to sustainable transport connectivity are given medium weight.
35. The Secretary of State has found that the Council can now demonstrate a 5 year housing land supply. However, having carefully taken into account the factors weighing for and against this scheme, he considers that the overall balance of material considerations in this case indicates a decision which is not in line with the development plan – i.e. a grant of permission for both proposals.
36. The Secretary of State therefore concludes that the appeals should be allowed and planning permission should be granted.

### **Formal decision**

37. Accordingly, for the reasons given above, the Secretary of State agrees with the Inspector's recommendation. He hereby allows your client's appeals and grants planning permission subject to the conditions set out in Annex B of this decision letter for Appeal A: Proposed residential development for up to a maximum of 189 dwellings; local centre (Class A1 to A5 inclusive and D1) with a maximum floor area of 1,800 sq.m Gross Internal Area (GIA); employment development (B1b, B1c, B2 and B8) with a maximum floor area of 3,700 sq. m GIA; primary school site; public open space including new village green, children's play area and allotments, green infrastructure including ecological area; access via adjoining site B (see below) and new pedestrian access and associated works; and Appeal B: Proposed new highway access road, including footways and cycleways and associated works, in accordance with applications 12/3747N and 12/3746N.
38. This letter does not convey any approval or consent which may be required under any enactment, bye-law, order or regulation other than section 57 of the Town and Country Planning Act 1990.

### **Right to challenge the decision**

39. A separate note is attached setting out the circumstances in which the validity of the Secretary of State's decision may be challenged. This must be done by making an application to the High Court within 6 weeks from the day after the date of this letter for leave to bring a statutory review under section 288 of the Town and Country Planning Act 1990.
40. An applicant for any consent, agreement or approval required by a condition of this permission for agreement of reserved matters has a statutory right of appeal to the Secretary of State if consent, agreement or approval is refused or granted conditionally or if the Local Planning Authority fail to give notice of their decision within the prescribed period.

41. A copy of this letter has been sent to Cheshire East Council, Stapeley and District Parish Council and Nantwich Town Council.

Yours faithfully

*Jean Nowak*

## **Annex B**

### **Schedule of Conditions**

#### **Appeal A**

1. Details of appearance, access landscaping, layout and scale (hereinafter called “the reserved matters”) shall be submitted to and approved in writing by the local planning authority (LPA) before any development begins, and the development shall be carried out as approved.
2. Application for approval of all the reserved matters shall be made to the LPA not later than three years from the date of this permission. The development hereby permitted shall begin not later than two years from the date of approval of the last of the reserved matters to be approved.

3. This permission shall refer to the following drawing numbers unless any other condition attached to the permission indicates otherwise:

Mixed Use and Access Applications Diagram – dwg SK15 Rev C  
(11 November 2017)

Mixed Use and Access Applications Diagram – dwg SK16 Rev C  
(11 November 2017)

Mixed Use and Access Applications Diagram – dwg SK17 Rev C  
(11 November 2017)

Mixed Use and Access Applications Diagram – dwg SK19 Rev D  
(11 November 2017)

4. No development shall commence until details of a scheme for the disposal of foul and surface water from the development has been submitted to and approved in writing by the LPA. The scheme shall make provision, inter alia for the following:
  - a. this site to be drained on a totally separate system with all surface water flows ultimately discharging in to the nearby watercourse
  - b. a scheme to limit the surface water run-off generated by the proposed development
  - c. a scheme for the management of overland flow
  - d. the discharge of surface water from the proposed development to mimic that which discharges from the existing site.
  - e. if a single rate of discharge is proposed, this is to be the mean annual run-off (Qbar) from the existing undeveloped greenfield site. For discharges above the allowable rate, attenuation for up to the 1% annual probability event, including allowances for climate change.
  - f. the discharge of surface water, wherever practicable, by Sustainable Drainage Systems (SuDS).
  - g. Surface water from car parking areas less than 0.5 hectares and roads to discharge to watercourse via deep sealed trapped gullies.

- h. Surface water from car parking areas greater than 0.5 hectares in area, to have oil interceptor facilities such that at least 6 minutes retention is provided for a storm of 12.5mm rainfall per hour.

The development shall not be occupied until the approved scheme of foul and/or surface water disposal has been implemented to the satisfaction of the LPA.

5. No development shall commence until a scheme for the provision and management of an 8 metre wide buffer zone alongside the watercourse on the northern boundary measured from the bank top (defined as the point at which the bank meets the level of the surrounding land) has been submitted to and approved in writing by the LPA. The scheme shall include:

- plans showing the extent and layout of the buffer zone
- details of any proposed planting scheme (for example, native species)
- details demonstrating how the buffer zone will be protected during development and managed/maintained over the longer term including adequate financial provision and named body responsible for management plus production of detailed management plan.

This buffer zone shall be free from built development other than the proposed access road. Thereafter the development shall be carried out in accordance with the approved scheme and any subsequent amendments shall be agreed in writing with the LPA.

6. No development shall commence within the application site until the applicant has secured the implementation of a programme of archaeological work in accordance with a written scheme of investigation which has been submitted to and approved by the LPA.
7. No development shall take place until a Construction Method Statement (CMS) has been submitted to and approved in writing by the LPA. The approved CMS shall be adhered to throughout the construction period. The CMS shall provide for:
  - a. the hours of construction work and deliveries
  - b. the parking of vehicles of site operatives and visitors
  - c. loading and unloading of plant and materials
  - d. storage of plant and materials used in constructing the development
  - e. wheel washing facilities
  - f. measures to control the emission of dust and dirt during construction.
  - g. details of any piling operations including details of hours of piling operations, the method of piling, duration of the pile driving operations (expected starting date and completion date), and prior notification to the occupiers of potentially affected properties

- h. details of the responsible person (e.g. site manager / office) who could be contacted in the event of complaint
  - i. control of noise and disturbance during the construction phase, vibration and noise limits, monitoring methodology, screening, a detailed specification of plant and equipment to be used and construction traffic routes
  - j. waste management: there shall be no burning of materials on site during demolition/construction.
8. No development shall take place on the commercial and retail element until a detailed noise mitigation scheme to protect the proposed dwellings from noise, taking into account the conclusions and recommendations of the Noise Report submitted with the application, shall be submitted to and agreed in writing by the LPA. The approved mitigation measures shall be implemented before the first occupation of the dwelling to which it relates.
9. Prior to the commencement of development:
- a. A contaminated land Phase 2 investigation shall be carried out and the results submitted to, and approved in writing by the LPA.
  - b. If the Phase 2 investigations indicate that remediation is necessary, a Remediation Statement including details of the timescale for the work to be undertaken shall be submitted to, and approved in writing by, the LPA. The remedial scheme in the approved Remediation Statement shall then be carried out in accordance with the submitted details.
  - c. Should remediation be required, a Site Completion Report detailing the conclusions and actions taken at each stage of the works including validation works shall be submitted to, and approved in writing by, the LPA prior to the first use or occupation of any part of the development hereby approved.
10. No development shall commence until a scheme of destination signage to local facilities, including schools, the town centre and railway station, to be provided at junctions of the cycleway/footway and highway facilities shall be submitted to and agreed in writing by the LPA. The approved scheme shall be provided in parallel with the cycleway/footway and highway facilities.
11. No development shall commence until schemes for the provision of MOVA traffic signal control systems to be installed at the site access from Peter Destapleigh Way and at the Audlem Road/Peter Destapleigh Way traffic signal junctions, has been submitted to and approved in writing by the LPA. Such MOVA systems shall be installed in accordance with approved details prior to the first occupation of the development hereby permitted.
12. The Reserved Matters application shall include details of parking provision for each of the buildings proposed. No building hereby permitted shall be occupied until the parking and vehicle turning areas for that building have been

constructed in accordance with the details shown on the approved plan. These areas shall be reserved exclusively thereafter for the parking and turning of vehicles and shall not be obstructed in any way.

13. Prior to the first occupation of the development hereby permitted a Travel Plan shall be submitted to and approved in writing by the LPA. The Travel Plan shall include, inter alia, a timetable for implementation and provision for monitoring and review. None of the building hereby permitted shall be occupied until those parts of the approved Travel Plan that are identified as being capable of implementation after or before occupation have been carried out. All other measures contained within the approved Travel Plan shall be implemented in accordance with the timetable contained therein and shall continue to be implemented, in accordance with the approved scheme of monitoring and review, as long as any part of the development is occupied.
14. No development shall take place until a scheme (including a timetable for implementation) to secure at least 10% of the energy supply of the development from decentralised and renewable or low carbon energy sources shall be submitted to and approved in writing by the LPA. The approved scheme shall be implemented and retained as operational thereafter.
15. Prior to first occupation of each unit, Electric Vehicle Infrastructure shall be provided to the following specification, in accordance with a scheme, submitted to and approved in writing by the LPA which shall including the location of each unit:
  - A single Mode 2 compliant Electric Vehicle Charging Point per property with off road parking. The charging point shall be independently wired to a 30A spur to enable minimum 7kW charging.
  - 5% staff parking on the office units with 7KW Rapid EVP with cabling provided for a further 5% (to enable the easy installation of additional units).

The EV infrastructure shall be installed in accordance with the approved details and thereafter be retained.

16. Prior to any commencement of works between 1st March and 31st August in any year, a detailed survey shall be carried out by a suitably qualified person to check for nesting birds and the results submitted to the LPA. Where nests are found in any hedgerow, tree or scrub to be removed (or converted or demolished in the case of buildings), a 4m exclusion zone shall be left around the nest until breeding is complete. Completion of nesting shall be confirmed by a suitably qualified person and a further report submitted to LPA before any further works within the exclusion zone take place.
17. Prior to the commencement of development detailed proposals for the incorporation of features into the scheme suitable for use by breeding birds shall be submitted to and approved in writing by the LPA. The approved features shall

be permanently installed prior to the first occupation of the development hereby permitted and thereafter retained, unless otherwise agreed in writing by the LPA.

18. The reserved matters application shall be accompanied by a detailed Ecological Mitigation strategy including a great crested newt mitigation strategy informed by the recommendations of the submitted Protected Species Impact Assessment and Mitigation Strategy dated 2013 prepared by CES Ecology (CES:969/03-13/JG-FD). The development shall be implemented in accordance with the measures of the approved ecological mitigation strategy.
19. Prior to the commencement of each phase of development details of the proposed lighting scheme should be submitted to and approved in writing by the Local Planning Authority.
  - a) The details shall include the location, height, design and luminance and ensure the lighting is designed to minimise the potential loss of amenity caused by light spillage onto adjoining properties. The lighting shall thereafter be installed and operated in accordance with the approved details.
  - b) The scheme should include dark areas and avoid light spill upon bat roost features, boundary hedgerows and trees. The scheme should also include details of: Number and location of proposed luminaires; Luminaire light distribution type; Lamp type, lamp wattage and spectral distribution; Mounting height; Orientation direction; Beam angle; Type of control gear; Proposed lighting regime; and Projected light distribution maps of each lamp. The lighting scheme shall be installed in accordance with the approved details.
20. All trees with bat roost potential as identified by the Peter Destapleigh Way Ecological Addendum Report 857368 (RSK September 2017) shall be retained, unless otherwise agreed in writing by the Local Planning Authority
21. The first reserved matters applications shall include a Design Code for the site and all reserved matters application shall comply with provisions of the Masterplan submitted with the application and the approved Design Code.
22. Prior to the commencement of each phase of development a scheme for landscaping shall be submitted to the Local Planning Authority and approved in writing. The approved landscaping scheme shall include details of any trees and hedgerows to be retained and/or removed, details of the type and location of Tree and Hedge Protection Measures, planting plans of additional planting, written specifications (including cultivation and other operations associated with tree, shrub, hedge or grass establishment), schedules of plants noting species, plant sizes and proposed numbers/densities and an implementation programme.

The landscaping scheme shall be completed in accordance with the following:-

- a) All hard and soft landscaping works shall be completed in full accordance with the approved scheme, within the first planting season following completion of

the development hereby approved, or in accordance with a programme agreed with the Local Planning Authority.

- b) All trees, shrubs and hedge plants supplied shall comply with the requirements of British Standard 3936, Specification for Nursery Stock. All pre-planting site preparation, planting and post-planting maintenance works shall be carried out in accordance with the requirements of British Standard 4428 (1989) Code of Practice for General Landscape Operations (excluding hard surfaces).
  - c) All new tree plantings shall be positioned in accordance with the requirements of Table 3 of British Standard BSD5837: 2005 Trees in Relation to Construction: Recommendations.
  - d) Any trees, shrubs or hedges planted in accordance with this condition which are removed, die, become severely damaged or become seriously diseased within five years of planting shall be replaced within the next planting season by trees, shrubs or hedging plants of similar size and species to those originally required to be planted.
23. An Arboricultural Impact Assessment, Tree Protection Plan and Arboricultural Method Statement in accordance with BS5837:2012 Trees in Relation to Design, Demolition and Construction – Recommendations shall be submitted in support of any reserved matters application which shall evaluate the direct and indirect impact of the development on trees and provide measures for their protection.
24. No phase of development shall commence until details of the positions, design, materials and type of boundary treatment to be erected have been submitted to and approved in writing by the LPA. No building hereby permitted shall be occupied until the boundary treatment pertaining to that property has been implemented in accordance with the approved details.
25. The Reserved Matters application for each phase of development shall include details of bin storage or recycling for the properties within that phase. The approved bin storage facilities shall be provided prior to the first occupation of any building.
26. Notwithstanding the details shown on plan reference no. BIR.3790.09D (September 2012) access to the development herein permitted shall be exclusively from Peter Destapeleigh Way as shown on plan reference no. dwg SK16 Rev C (11 November 2017)
27. Unless otherwise agreed in writing, none of the dwellings hereby permitted shall be first occupied until access to broadband services has been provided in accordance with an action plan that has previously been submitted to and approved in writing by the LPA.

## **Appeal B**

1. The development hereby approved shall commence within three years of the date of this permission.

2. This permission shall refer to the following drawing numbers unless any other condition attached to the permission indicates otherwise:
  - a. Site Location Plan reference no. BIR.3790\_13
  - b. Site Access General Arrangement Plan reference no. SCP/10141/D03/Rev D (May 2015).
3. No development shall commence until there has been submitted to and approved by the LPA a scheme of landscaping and replacement planting for the site indicating inter alia the positions of all existing trees and hedgerows within and around the site, indications of those to be retained, also the number, species, heights on planting and positions of all additional trees, shrubs and bushes to be planted.
4. All planting, seeding or turfing comprised in the approved details of landscaping shall be carried out in the first planting and seeding seasons following the completion of the development whichever is the sooner; and any trees or plants which within a period of 5 years from the completion of the landscaping scheme die, are removed or become seriously damaged or diseased shall be replaced in the next planting season with others of similar size and species unless the LPA gives written consent to any variation.
5. Prior to the commencement of development or other operations being undertaken on site a scheme for the protection of the retained trees produced in accordance with BS5837:2012 Trees in Relation to Design, Demolition and Construction : Recommendations, which provides for the retention and protection of trees, shrubs and hedges growing on or adjacent to the site, including trees which are the subject of a Tree Preservation Order currently in force, shall be submitted to and approved in writing by the Local Planning Authority.
  - (a) No development or other operations shall take place except in complete accordance with the approved protection scheme.
  - (b) No operations shall be undertaken on site in connection with the development hereby approved (including any tree felling, tree pruning, demolition works, soil moving, temporary access construction and / or widening or any operations involving the use of motorised vehicles or construction machinery) until the protection works required by the approved protection scheme are in place.
  - (c) No excavations for services, storage of materials or machinery, parking of vehicles, deposit or excavation of soil or rubble, lighting of fires or disposal of liquids shall take place within any area designated as being fenced off or otherwise protected in the approved protection scheme.
  - (d) Protective fencing shall be retained intact for the full duration of the development hereby approved and shall not be removed or repositioned without the prior written approval of the Local Planning Authority.
6. No excavations for services, storage of materials or machinery, parking of vehicles, deposit or excavation of soil or rubble, lighting of fires or disposal of liquids shall take place within any area designated as being fenced off or otherwise protected in the approved protection scheme.

7. Prior to development commencing, a detailed Ecological Mitigation strategy including a great crested newt mitigation strategy informed by the recommendations of the submitted Protected Species Impact Assessment and Mitigation Strategy dated MARCH 2013 REVISION) prepared by CES Ecology (CES:969/03-13/JG-FD) shall be submitted to and approved in writing by the Local Planning Authority. The development shall be implemented in accordance with the measures of the approved ecological mitigation strategy.
8. Prior to any commencement of works between 1st March and 31st August in any year, a detailed survey shall be carried out by a suitably qualified person to check for nesting birds and the results submitted to the LPA. Where nests are found in any building, hedgerow, tree or scrub to be removed (or converted or demolished in the case of buildings), a 4m exclusion zone shall be left around the nest until breeding is complete. Completion of nesting shall be confirmed by a suitably qualified person and a further report submitted to LPA before any further works within the exclusion zone take place.
9. Prior to the commencement of development details of the proposed lighting scheme should be submitted to and approved in writing by the Local Planning Authority. The scheme should include dark areas and avoid light spill upon bat roost features, boundary hedgerows and trees. The scheme should also include details of: Number and location of proposed luminaires; Luminaire light distribution type; Lamp type, lamp wattage and spectral distribution; Mounting height; Orientation direction; Beam angle; Type of control gear; Proposed lighting regime; and Projected light distribution maps of each lamp. The lighting scheme shall be installed in accordance with the approved details.
10. Prior to the commencement of development, and to minimise the impact of the access road on potential wildlife habitat provided by the existing ditch located adjacent to the southern site boundary, the detailed design of the ditch crossing shall be submitted to and approved in writing by the LPA. The access road shall be constructed in full accordance with the approved details.
11. No development shall commence on site unless and until a Deed of variation under s106A TCPA 1990 (as amended) has been entered into in relation to the S106 Agreement dated 20 March 2000 between Jennings Holdings Ltd (1), Ernest Henry Edwards, Rosemarie Lilian Corfield, James Frederick Moss, Irene Moss, John Williams and Jill Barbara Williams (2), Crewe and Nantwich BC (3) and Cheshire County Council (4) to ensure that the Local Nature Conservation Area is delivered, maintained and managed under this permission.

**Appeal A: File Ref: APP/R0660/A/13/2197532**  
**Land off Audlem Road/Broad Lane, Stapeley, Nantwich,**  
**Cheshire CW5 7DS**

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant [outline] planning permission.
- The appeal is made by Mr Carl Davey, Muller Property Group against the decision of Cheshire East Council.
- The application Ref 12/3747N, dated 28 September 2012, was refused by notice dated 16 April 2013.
- The development proposed is Proposed residential development for up to a maximum of 189 dwellings; local centre (Class A1 to A5 inclusive and D1) with a maximum floor area of 1,800 sq.m Gross Internal Area (GIA); employment development (B1b, B1c, B2 and B8) with a maximum floor area of 3,700 sq. m GIA; primary school site; public open space including new village green, children's play area and allotments, green infrastructure including ecological area; access via adjoining site B (see below) and new pedestrian access and associated works.

**Summary of Recommendation: that the appeal should be allowed and planning permission should be granted subject to conditions.**

---

**Appeal B: File Ref: APP/R0660/A/13/2197529**  
**Land off Peter de Stapeleigh Way, Nantwich, Cheshire CW5 7HQ**

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a failure to give notice within the prescribed period of a decision on an application for planning permission.
- The appeal is made by Mr Carl Davey, Muller Property Group against Cheshire East Council.
- The application Ref 12/3746N is dated 28 September 2012.
- The development proposed is Proposed new highway access road, including footways and cycleways and associated works.

**Summary of Recommendation: that the appeal should be allowed and planning permission should be granted subject to conditions.**

---

**Procedural matters**

1. The application to which Appeal A relates was submitted in outline form with all matters reserved except for access. The extent of development is set out in the Design and Access Statement (DAS). An agreed Schedule of Drawings is listed in the Statement of Common Ground (SoCG) appendix X. Appeal B was not determined but Council members resolved that it would have been refused because it would be unsustainable and result in a loss of habitat for protected species and part of an area allocated for tree planting, landscaping and subsequent management, contrary to various policies.
2. Section 106 Agreements were submitted under section 106 of the Town and Country Planning Act 1990 (s106) in respect of both applications. As agreed, signed and dated versions were submitted after the Inquiry closed. All parties had the opportunity to comment on an unsigned though otherwise identical

---

agreement during the Inquiry. I deal with the contents of the Agreement below.

3. The Inquiry sat for 4 days. I held an accompanied site visit held on 24 February. Evidence regarding housing land supply (HLS) was heard as a round table discussion on Thursday 22 February 2018.
4. This is a redetermination following the quashing of the previous decision of the Secretary of State in the HC.
5. Since the last determination of the appeals the Cheshire East Local Plan Strategy (CELPS) has been formally adopted (20 September 2017).
6. Also since the last determination of the Appeals the Stapley & Batherton Neighbourhood Plan (S&BNP) has also been made following Referendum in February 2018 and now forms part of the Development Plan.
7. Prior To the opening of the Inquiry the appellant submitted a revised layout of the proposals which omitted the proposed access off Audlem Road; this has necessitated an amendment to the description of development to reflect the changes. Whilst such amendments have been considered and accepted by the Council, acknowledged in the SoCG, they had not been the subject of formal consultation in accordance with standing regulations. After the close of the Inquiry this consultation was undertaken by the Appellant, comments collated and submitted to the Planning Inspectorate to an agreed timetable.
8. I have taken the subsequently received comments on the revisions into account whilst writing my report. Having considered the proposed revisions and the commentary on them I conclude that as they represent a diminution in the scope of the proposals and indeed address a number of previously expressed concerns on this aspect of the proposals, it would be appropriate for them to be taken into account in the determination of the appeals. I therefore recommend the Secretary of State duly take them into account in the determination of this case.
9. The revised National Planning Policy Framework (hereafter referred to as the rFramework) was published on the 24 July 2018. In light of the revisions contained therein parties were invited to comment on them insofar as relevant to both appeals. Their responses have been taken into account below.
10. There appear to be different ways of spelling Destapeleigh. I have adopted that used on the application form.
11. Although concerns over highway safety do not form part of the Council's case, given the degree of concern expressed on this matter by other parties at the Inquiry this issue is included in the main issues and is addressed in the reasoning that follows.
12. In accordance with the Town and Country Planning (Pre-commencement Conditions) Regulations 2018 the Appellant was consulted on all the pre-commencement conditions provisionally considered at the Inquiry. They

---

confirmed in writing that they were content with the terms of each of such conditions and these are therefore included in the report.

### **The Site and its Surroundings**

13. The site is 12.06 hectares of flat agricultural land located to the south of the main built up area of Nantwich. It principally comprises of two fields bounded by native hedgerows with some tree cover within them. There is a field ditch along the northern boundary. The land is currently in agricultural use, primarily arable and some grazing. It is bounded to the north by Peter Destaplegh Way (A5301) and the ecology mitigation/woodland landscape area for the Cronkinson Farm development although the obligations associated with the extant consent and s106 agreement have yet to be met.
14. To the west it is bound by residential properties accessed off Audlem Road, including an approved residential development for 11 dwellings and to the east by the recently constructed residential development. The upper floors and roofs of some of the new properties may be seen from the Appeal Site. The principal length of the southern boundary runs to the south of an existing hedgerow. Part of the site runs further south, adjoining existing residential development to the west.
15. To the north of Peter Destaplegh Way is the Cronkinson Farm residential development. This includes a small parade of five shops including a Co-Operative convenience store and a public house. Pear Tree Primary School and a community hall are also situated within this residential development. To the north of the Cronkinson Farm development is the railway line connecting Nantwich / Crewe / Chester and beyond, with the town centre to the north west.
16. Existing residential development in ribbon form is situated along Audlem Road. It comprises of a mix of properties from different eras. Within this housing is The Globe public house. Bordering the south west of the application site (and accessed off Audlem Road) is Bishops Wood housing development constructed in the 1970's. Audlem Road turns into Broad Lane south of the Bishops Wood cul-de-sac and has ribbon residential development along it as well as Stapeley Broad Lane Primary School further to the south.
17. London Road, an arterial route into Nantwich, is located to the east of the former Stapeley Water Gardens site and there is residential ribbon development to the south of that site. The land between the London Road and the Appeal Site has been infilled by residential development and open space. Further to the south along London Road are more dwellings together with Stapeley Technology Park, a small employment site with a mix of office uses based around the former Stapeley House.
18. There are a number of bus stops in close proximity to the site located off Audlem Road. These bus stops are served by the No. 73 and 51 bus service. These bus services provide direct connections to Nantwich bus station and rail station continuing on to Whitchurch.

- 
19. Nantwich train station is approximately 1.4 km to the north of the site, accessed via Audlem Way and Wellington Road. Nantwich Town Centre is approximately 1.3 km to the north-east of the site, to the north of Nantwich train station. Nantwich Town Centre provides a range of services, facilities and job opportunities. The site is, therefore, well served by a range of services, facilities and public transport opportunities, and comprises a location which is accessible to modes of transport other than the private car.
  20. The Appeal B site is approximately 1.71 hectares in size and comprises part of a single field which adjoins Peter Destaplegh Way to the north. The site comprises of a mixture of unmanaged semi-improved grassland, bramble / scrub and a drainage ditch. There are two existing ponds within the site and to the west and south east of the site are areas set aside for Great Crested Newt mitigation. This relates to the Cronkinson Farm development and to the Stapeley Water Gardens scheme.
  21. The western and southern boundaries of the site comprise hedgerows interspersed in places with trees. The eastern boundary of the site runs through the centre of the field and will follow the edge of the proposed new highway.
  22. Further to the east of the site is recently constructed residential development. To the north of the site beyond Peter Destaplegh Way is a predominantly residential area. To the west of the site are two fields, the built up edge of Nantwich and the A529 Audlem Road which is flanked by development on either side. To the south of the site is the site of the proposed mixed use led development subject to planning appeal APP/R0660/A/13/2197532.
  23. The site will connect to the Peter Destaplegh / Pear Tree Field signalised junction in the form of a fourth arm to the signalised junction. The spur for the fourth arm is already in place with signals, street lighting and tactile paving. It is agreed by the parties that this planning permission is, therefore, extant.
  24. Planning permission was granted on the 4th January 2001 for the "construction of new access road into Stapeley Water Gardens" (planning application reference: P00/0829). This permission allowed the construction of a carriageway on a north-south alignment similar to that now proposed in this planning application with a connection to the Peter Destaplegh Way / Pear Tree Field highway junction via a fourth arm.

## **Planning Policy**

25. The revised National Planning Policy Framework (the rFramework) was published on the 24 July 2018. Paragraphs 7-14 and 59-76 of the rFramework, together with their attendant footnotes (as paragraph 3 affirms), are particularly relevant to HLS. The rFramework also sets out the position with regard to weight and conformity of existing development plan policies. The PPG confirms that any shortfall in HLS should be made up over the next 5 years.

- 
26. The Development Plan for Cheshire East comprises for the purpose of the appeals the recently adopted Cheshire East Local Plan Strategy 2010 - 2030, and the saved policies from Crewe and Nantwich Replacement Local Plan (February 2005). The relevant policies from each of the plans considered relevant are set out in the Planning SoCG<sup>1</sup>.
  27. As a result of a Referendum held on the 15 February 2018 the Stapley & Batherton Neighbourhood Plan was approved and consequently is now considered 'made', and thus now forms part of the Development Plan.
  28. The Planning SoCG also identifies the following as material planning policy considerations: Interim Planning Statement: Affordable Housing (Feb 2011), Strategic Market Housing Assessment (SHMA), Strategic Market Land Availability Assessment (SHLAA), Article 12 (1) of the EC Habitats Directive and the Conservation of Habitats and Species Regulations 2010.
  29. High Court cases referred to include Suffolk Coastal Appeal Court Judgement<sup>2</sup>, Suffolk Coastal Supreme Court<sup>3</sup>, St Modwen Appeal Court Judgment<sup>4</sup>, and the Shavington High Court Judgement<sup>5</sup>.

## Planning history

30. The planning application for Appeal A scheme was submitted to the Council in September 2012 and it was registered on 9th October 2012. It was assigned planning application reference number 12/3747N. The application was determined at Committee on 3rd April 2013 and was refused planning permission by Members in accordance with the planning officer's recommendation<sup>6</sup>.
31. The original appeal was considered at a public local inquiry between 18<sup>th</sup> and 21<sup>st</sup> of February 2014 in association with Appeal B. Both appeals were recovered by the Secretary of State following the close of the public inquiry. The inquiry Inspector recommended in his report dated 18th June 2014 that planning permission be granted for both appeals but in his decision letter dated 17th March 2015, the Secretary of State rejected this Inspector's recommendation and refused both appeals. (The '**Original Decision**') The Original Decision of the Secretary of State was subject to an application to the High Court and was subsequently quashed by order of the court dated 3rd July 2015. The appeals were, accordingly, re-determined by the Secretary of State and he issued a new decision on 11th August 2016. (The '**Second Decision**').
32. In the Second Decision the Secretary of State refused planning permission Appeal A on two grounds, the first being that, '*the proposals would cause*

---

<sup>1</sup> Paragraph 5.1 ID2.

<sup>2</sup> CDQ1.

<sup>3</sup> CD C12.

<sup>4</sup> CDQ2

<sup>5</sup> [2018] EWC 2906 (Admin) Case Number: CO/1032/2018.

<sup>6</sup> CD K2

---

*harm to the character and appearance of the open countryside, for the reasons at Paragraph 27 to 28 above. This harm will be in conflict with Paragraph 7 and the fifth and seventh bullet points of Paragraph 17 of the Framework. Having given careful consideration to the evidence to the inquiry, **the Inspector's conclusions and the parties' subsequent** representations, the Secretary of State considers that the harm to the character and appearance of the open countryside should carry considerable weight against the proposals in this case. He further considers that the loss of BMV land is in conflict with Paragraph 112 of the Framework and carries moderate weight against the proposals for the reasons given at Paragraphs 31 to 34 above.*

33. *The Secretary of State concludes that the environmental dimension of sustainable development is not met due to the identified harm, especially to the character and appearance of the countryside. He concludes that the development does not deliver all three dimensions of sustainable development jointly and simultaneously, and is therefore not sustainable development overall.*
34. *For the reasons given above, the Secretary of State concludes that the adverse impacts of granting permission would significantly and demonstrably outweigh the benefits, when assessed against the policies and the Framework taken as a whole.'*
35. The Second Decision was challenged by the Appellant and in a Consent Order issued by the High Court on 14<sup>th</sup> March 2017 the Second Decision was also quashed. In the letter of 12<sup>th</sup> April 2017 from DCLG confirming that the Second Decision had been quashed, the Secretary of State invited further representations in respect of the following matters:
  - a) Progress of the Emerging Cheshire East Local Plan Strategy;
  - b) The current position regarding the five year supply of deliverable housing sites in the Council's area;
  - c) Any material change in circumstances, fact or policy, that may have arisen since the decision of 11<sup>th</sup> August 2016 was issued and which the parties consider to be material to the Secretary of State's further consideration of this application.
36. Having requested that written representations be submitted in respect of these matters, the Secretary of State determined that, in the light of representations received the inquiry should be re-opened, by way of correspondence dated 3<sup>rd</sup> August 2017.
37. The purpose of the planning application for the Appeal B scheme was to provide access to the adjoining mixed use proposal that is subject to Appeal A. Originally, Appeal A had a separate access arrangement but it is now agreed between the parties that the Appeal Site A should be accessed solely from Appeal Site B and the original access arrangements suggested for Appeal Site A (via Audlem Road / Broad Lane) are no longer pursued. Thus, Appeal Site A falls to be determined on the basis that access will be achieved through Appeal Site B alone. The process by which this is to be achieved is explained in Section 3 below.

- 
38. The planning application for the Appeal B scheme was submitted to Cheshire East Council in September 2012. It was registered by the authority on 5th October 2012. The target date for the determination was 30<sup>th</sup> November 2012 but the application was not determined prior to the appeal being lodged.
39. The process by which the Appeal B scheme was determined by the Secretary of State is the same as for Appeal A above. The appeal will be heard alongside Appeal A. It is agreed that the merits of the two appeals stand or fall together.

### **The proposals**

40. The details are confirmed in the Planning SoCG. The concept for Appeal A is also set out in the Design and Access Statement (DAS)<sup>7</sup>. Most of the houses would be on the western side of the site. On the eastern side, linking in with the new highway access road in Appeal B, would be land for employment, public open space including a new village green with an equipped play area, a local centre and a primary school. Allotments would back onto the existing houses to the west. The DAS confirms the amount of development as 189 dwellings at an average density of just over 30 dwellings per hectare with up to 57 affordable dwellings in a series of clusters.
41. These would comprise five elements as follows:
- Parcel 1 is on the northwest side of the site and could contain up to 51 dwellings.
  - Parcel 2 is located to its south and could have up to 62 dwellings.
  - Parcel 3 is to the south of the employment area could deliver 15 dwellings.
  - Parcel 4 is along the main southern boundary and could contain up to 36 dwellings.
  - Parcel 5 is on the eastern side of application site and could provide up to 25 dwellings.
42. The application proposals will be a mix of 2, 3, 4 and 5 bedroom dwellings. The affordable housing mix would be based on 2 and 3 bedroom homes, split between 35% intermediate tenure for sale and 65% social rented. The total affordable housing provision represents 30% of the total number of units. Parcel 5 forms part of a new village centre. Located around a village square and adjoining the village green, the residential element forms the eastern side of the village centre with the new primary school site and local centre forming the western side. The village green will have both general open space (with appropriate pathways and street furniture sited on the edges) and a children's equipped play area in the form of a LEAP. The primary school site will be reserved for future education expansion.
43. The local centre comprises of up to 1,800 sq m (19,375 sq ft) and would accommodate a range of uses. It is envisaged that the local centre will

---

<sup>7</sup> CD H12.

---

comprise of 8 – 10 separate units with a single A1 unit of 1,000 sq m (10,764 sq ft) and the remaining floorspace split between units ranging from 50 sq m to 150 sq m (538 sq ft to 1,615 sq ft). The employment accommodation is situated adjacent to the local centre. Comprising of 3,700 sq m (39,826 sq ft) in total, it is envisaged this will be divided into units based on 100 sq m (1,076 sq ft). 2.7 Located on the south western side of the application site is an allotment area of 0.5 hectares. The allotments will be available to both new and existing residents. The provision of open space will be controlled by planning conditions.

44. In addition to the public open space there are two principal interlinked areas of green infrastructure. The first is along the northern boundary in the vicinity of the new village centre and the employment area. This will include the planting of a new hedgerow. At its western end, it connects to the second principal green infrastructure area which runs on a north-south axis to the east of residential parcels 1 and 2. This reflects an existing mature hedgerow.
45. The development would include a pedestrian/cycle network which, taken with its close proximity to the established community, would be intended to provide safe, direct, convenient and interesting routes through the site. The single vehicular access now proposed utilises the putative infrastructure already established on Peter Destapeleigh Way. This is now supported with linkages to the new realigned access road giving access to the greater site. This in effect comprises Appeal B, which differ from the extant and part implemented scheme previously granted planning permission<sup>8</sup>.
46. Appeal B proposes an access onto Peter Destapeleigh Way at its junction with the Pear Tree Field signalised junction in the form of a fourth arm to the signalised junction. The application subject to Appeal B is similar in nature to the approved scheme (P00/0829) for access on this site, albeit with some amendments. The spur of the fourth arm is already in place with signals, street lighting and tactile paving.
47. Planning permission was granted on the 4th January 2001 for the "construction of a new access road into Stapeley Water Gardens" (planning application reference P00/0829). This permission allowed the construction of a carriageway on a north – south alignment, similar to that now proposed as part of Appeal B. The spur of the fourth arm junction has been constructed so that the permission has been implemented. A copy of the correspondence from CEC which confirms this position is in the Core Document List (CD E2).
48. Appeal B is similar in nature to the extant scheme, albeit with some minor amendments. Appeal B realigns the road further east in order to create a direct route into the land to the south, subject to Appeal A. The position of the roundabout has also been relocated further south. A plan showing the road layout for the extant scheme, Appeal B and a composite plan showing Appeal B overlaid on the approved scheme is included in the appeal documents.

---

<sup>8</sup> Planning application ref. P00/0829

---

## Other matters agreed between the Parties

49. The parties have also agreed a Sustainability Analysis<sup>9</sup> in relation to key facilities and services in the context of the site, which include:
- Primary Schools – Pear Tree Primary School, St Annes Catholic Primary School and Stapeley Primary School;
  - Secondary Schools – Brine Leas Secondary School;
  - Health Facilities – Kiltern Medical Centre, a pharmacy and numerous dentists;
  - Retail – Morrisons Supermarket, Coop Convenience Store and numerous non-food retail units located to the south of Nantwich; and Public Transport Facilities – Nantwich Railway Station and numerous bus stops
50. The site has been assessed against the North West Sustainability Toolkit. Whilst some of the distances vary slightly between the Appellant's assessment, the Council concluded in the committee report to the original application that *'on the basis of the above assessment the proposal does appear to be generally sustainable in purely locational terms'*. The Council has reaffirmed this position in the report to committee of 22nd November 2017.
51. In terms of connectivity to higher order centres, Crewe lies 6.4 km (4 miles) to the north east of Nantwich and Newcastle-under-Lyme is 21 km (13 miles) to the east. These settlements have employment, advanced educational facilities, retail, leisure and entertainment venues. These settlements can be accessed via a variety of routes, which avoid the town centre. These include Broad Lane, London Road and Newcastle road.
52. In addition to the topics set out above further additional matters are agreed between the parties;
- The original planning permission in respect of appeal B is acknowledged as extant by CEC (P00/0829). It, therefore, represents a fall-back position.
  - Access to Appeal Site A will only be achieved through Appeal Site B if Appeal A is allowed.
  - Since it is no longer necessary to access the site via Audlem Road / Broad Lane, the masterplan and the red line area for Appeal A can be amended. This reduces the extent of Appeal Site A. The parties agree that updated plans L9 should now form part of the Appeal Scheme A if planning permission is granted.
  - It is agreed that 25% of the aggregated sites constitute best and most versatile land 6% of the site is grade 2 and 19% of the site is grade 3a.
  - It is agreed that there is no reason to resist the scheme in terms of ecology and that a suitable mitigation package can be provided as part of the proposed planning obligation under s.106.

---

<sup>9</sup> 4.13 Planning SoCG ID2.

- 
- It is agreed that there are no technical reasons to resist a development in terms of highways, drainage, residential amenity and environmental health matters.
  - The Council's Landscape Officer does not consider that the proposals will have a significantly adverse landscape impact.
53. The Housing Land Supply SoCG also covers other significant areas of agreement. This advises that: the LPA's current position on 5 year HLS is set out in the Housing Monitoring Update published August 2017, base date 31st March 2017; the Housing Monitoring Update takes the housing requirement of 1,800 dwellings per annum set out in the Cheshire East Local Plan Strategy (LPS) as the relevant housing target for the calculation of 5 year HLS; The Housing Monitoring Update has a base date of 31st March 2017. The relevant five year period in HMU is therefore 1st April 2017 to 31st March 2022; that the backlog should be calculated over the plan period to date (1 April 2010 – 31 March 2017) and amounts to 5,365 dwellings and that in accordance with paragraph 47 of the first published version of the NPPF it is agreed that it is necessary to apply a 20% buffer, reflecting persistent under-delivery against the housing requirement.
54. Paragraph 73 of the rFramework revises the format of applying the buffer to the requirement, indicating a range of percentages to be applied in different scenarios. This matter is addressed in detail through each party's submissions in relation to the rFramework NPPF below.

### **The Case for the Muller Property Group**

55. At the time that these proposals were submitted almost 5.5 years ago, there was no Local Plan Strategy in place, and CEC at the time undoubtedly couldn't demonstrate a 5YS. As matters stand now, whilst the LPS is now in place, the next part of the Local Plan, which considers the merits of non-strategic allocations and which will review settlement boundaries, is still a long way from adoption. Of more concern is that CEC are still lack a sense of urgency about the need to bring forward additional housing in sustainable locations now, despite two recent appeals which have concluded that a 5YS cannot be demonstrated. And despite the fact that even on its best case that CEC has only a marginally above 5 years supply. In fact for the reasons articulated in evidence by the appellant, CEC has significantly less than 5YS of deliverable housing, and this site is needed now.
56. Thus, residential development on this site was originally recommended for refusal but was refused by members at a time when there was no plan and no 5YS. Then, after appeal it was recommend for grant by an Inspector when there was no plan and no 5YS. It was refused by the SOS whose decision was then quashed, re-determined only to be quashed in the High Court again both when there was no plan and no 5YS. In the same month that the LPS was adopted instead of re-determining the appeal the SOS decided to reopen this inquiry. That was a disappointment to the Appellant, however ironically it has provided the opportunity for the SOS to determine the appeal based upon a properly robust scrutiny of CEC's housing supply. Back in July 2017 CEC were robustly contending that their assessment of 5YS had been

---

endorsed by the LPI who had concluded that CEC should have a 5YS on adoption, however his conclusions were caveated with the following warning:

*"Much will depend on whether the committed and proposed housing sites come forward in line with the anticipated timescale and amended housing trajectory."*

57. The essential reason why two Inspectors concluded that there was not a robust 5YS after two inquiries in 2017 was that the 2017 HMU, published at the end of August 2017 demonstrated that the anticipated delivery rates for last year (ie 2016/17) were significantly below those being put to the LPI, demonstrating a failure in the first year after the period being assessed by the LPI. Predictive exercises tend to become less accurate the further one looks into the future. Here the prediction being put forward by a combination of private sector evidence being put to the examination and the application of the LPA's standard methodology on lead in times and build rates has gone wrong immediately. Moreover there is strong evidence to conclude that has gone wrong in relation to 2017/18 as well.
58. It is notable that the LPI concluded that CEC should be able to demonstrate a 5YS on adoption. Had he known about the substantial under-delivery when compared to the trajectory he endorsed in the LP, then he would plainly have been far more circumspect. As was put in cross examination, based on what we now know to have been the actual delivery in 2016/17, then the supply position before the LPI was that CEC couldn't demonstrate a 5YS based on their own trajectory. It was for that reason that CEC sought to downplay the importance of the trajectory as predictive tool for assessing the overall realism of CEC's claimed supply (past and future). The problem with that is not only that it was based upon an erroneous understanding of the St Modwen case (see below), and that it is at odds with the role of a housing trajectory in national guidance and policy, but most importantly, it ignores the fact that the housing trajectory in CEC was the yardstick that the LPI uses to gauge whether or not the supply position in CEC is realistic.
59. Properly understood CEC cannot demonstrate a robust 5YS and their anticipated delivery rates claimed before the LPI are untenable. Yet instead of reacting to the recent appeals with an immediate reassessment of its standard methodology on build rates and lead in times and an immediate sense check of likely delivery from its various components of supply CEC has instead done a further trawl of agents/developers to try to make good its evidential deficit, it has sought to down play quite how wrong its LP trajectory was, and how implausible its HMU trajectory is. It now contends that the Park Road Inspector got the supply figure wrong by well over 1000 units.
60. This mixed use scheme brings benefits which are diverse and considerable – ie not simply the provision of much needed homes, but deliverable commercial development which will provide opportunities for local businesses and for the local population, which will result in a sustainable pattern of development, as well as a small local centre which will meet the needs of both the proposed housing and employment but also recently consented housing which is being constructed nearby. The reality of the position is that

---

the appeal proposals are a sustainable form of development and that the only objection to them is the in principle one that the proposals are an unjustified incursion into the countryside beyond the settlement boundary. Contrary to that position the development is plainly needed now, the tilted balance is engaged and there are no adverse effects which significantly and demonstrably outweigh the benefits.

#### *5 year land supply*

61. For the reasons explained in evidence the issue of 5YS is not a determinative one in relation to the outcome of this appeal. Even if the LPA were to be able to just demonstrate a 5YS then it is firmly submitted that the appeals should still be allowed, since on the LPA's best case the position is a marginal one given its substantial under-delivery compared to the position endorsed by the LPI.
62. However on the evidence, it is clear that CEC cannot demonstrate a robust 5YS and therefore paragraph 11 (by means of footnote 7) is triggered. Prior to the exchange of evidence the Appellant invited CEC to agree to this appeal being determined on the same basis as the Park Road Inspector ie that there is a range which is just above or just below 5 years but the LPA can't demonstrate a robust 5YS therefore the presumption is triggered. This was thought to be a proportionate course of action, mindful that consistency in decision making is a material consideration of considerable importance. CEC declined this invitation.

#### *Planning Policy Guidance context*

63. Before turning to the detail of the current land supply position in Cheshire East, it is worth setting out the correct approach to guidance covering the subject; the provisions in the PPG supplement the NPPF and, do not have the same status as NPPF policy. Of most relevance to this appeal are 3-031 and 3-03311. From those paragraphs the following points arise:
  - a. Deliverable sites include those with permissions in the LP, unless there is clear evidence that the site won't be implemented within 5 years. From this:
    - i. Once a site is included as deliverable then there remains a requirement to assess the likely yield from sites with permission or an allocation. It is simply wrong to say, as the Council does in closing at paragraphs 31 and 32, that an assessment of yield is not required. PPG 3-031 is clear the "robust, up to date evidence" is required on the deliverability – i.e. the yield. It is difficult to see how an assessment of supply can be undertaken if that an assessment of yield is not undertaken. On AF's approach the decision maker would be obliged to accept the LPA's judgments when assessing delivery from sites with an allocation or permission, absent contrary evidence. However this is no more than an approach to assessing yield which –without policy support– presumes that the Council is always right. Not only is that not supported in policy it belies the repeatedly experience of this particular LPA's predictive ability over many years.

- 
- ii. This means that sites with PP are presumed to be deliverable unless there is evidence to the contrary. It does not mean that if a site has planning permission, then there is a rebuttable presumption that its yield is whatever the Council says it will be.
  - iii. This approach does not include allocated sites with the presumption that they are to be treated as deliverable, but the PPG does. There may be an interesting question at some future point in time as to whether that makes any difference, but in this case there is almost no dispute as to which sites are the ones which are considered to be deliverable – the dispute revolves around the likely yield from those sites.
- b. When assessing whether a site should be included in the 5YS and the yield from that site, the decision maker must consider the time it will take to commence development (lead in time) and the build out rate.
  - c. The PPG makes clear (3-033, paragraph 2) that the yield of sites as well as the deliverability of sites forms part of the annual assessment of the 5YS that the LPA is required to conduct. It self-evidently points out to an authority that deliverability and then likely yield are two separate exercises.
  - d. If an LPA does the following, then it will be able to demonstrate a 5YS (from PPG 3-033):
    - i. A robust annual assessment;
    - ii. A timely annual assessment;
    - iii. Using up to date and sound evidence;
    - iv. Considering the proposed and actual trajectory of sites in the supply;
    - v. Considering the risks to a proposed yield;
    - vi. Include an assessment of the local delivery record;
    - vii. All of the above assessments must be realistic; and,
    - viii. The approach must be thorough.
64. Drawing all of this together, it is not right to suggest that Inspectors in the Park Road and White Moss cases were wrong and that there is no requirement on the Council that their assessment of the 5YS is robust. The questions seemed to be put on the basis that the word “robust” is not included in the NPPF. This cannot possibly be correct. The language of the PPG (as above) clearly indicates that the LPA must demonstrate a 5YS – within that the evidence must be sound and it must stand up to scrutiny. If the Council’s approach was right (which no Inspector has to our knowledge endorsed) then Appellants up and down the country have been wasting time and money arguing contrary land supply positions; provided the Council can show some sort of evidence that would suffice.
65. CEC advanced an argument that when trying to assess the yield from a site, that the correct test was the capability of the site to deliver the expected numbers, and not the probability. His basis for this argument was paragraph 38 of *St Modwen*. This is, simply put, wrong and counter to common sense.

- 
66. CEC fell into the trap that Lindblom LJ was warning decision makers of in paragraph 39 of the same judgment:

*One must keep in mind here the different considerations that apply to development control decision-making on the one hand and plan-making and monitoring on the other. The production of the "housing trajectory" referred to in the fourth bullet point of paragraph 47 is an exercise required in the course of the preparation of a local plan, and will assist the local planning authority in monitoring the delivery of housing against the plan strategy; it is described as "a housing trajectory for the plan period " (my emphasis). Likewise, the "housing implementation strategy" referred to in the same bullet point, whose purpose is to describe how the local planning authority "will maintain delivery of a five-year supply of housing land to meet their housing target" is a strategy that will inform the preparation of a plan. The policy in paragraph 49 is a development control policy. It guides the decision-maker in the handling of local plan policies when determining an application for planning permission, warning of the potential consequences under paragraph 14 of the NPPF if relevant policies of the development plan are out-of-date. And it does so against the requirement that the local planning authority must be able to "demonstrate a five-year supply of deliverable housing sites", not against the requirement that the authority must "illustrate the expected rate of housing delivery through a housing trajectory for the plan period".*

67. CEC were unable to say whether or not they were identifying the "likely yield", the "possible yield" or the "almost certain yield" from the sites assessed. This from an apprehension not to give up the interpretation of the St Modwen case in which they failed to understand that the case revolved around the meaning of the term "deliverable"– a point which just doesn't arise in this case. This inability to explain the yield from sites within 5 years fundamentally undermines the utility of his exercise and means that it is not comparable to the appellant's approach to "probable yield". If CEC's position is merely what the site is "capable of delivering" then it is bound to be higher than what is probable and therefore betrays a fundamental error on the part of CEC which may explain why the LPA's predictive ability has proven to be wrong.

68. On the application of the above analysis, the following points are agreed:

- It is agreed that the requirement is 1800 dpa.
- The agreed five year period runs from 31 March 2017 (the base date of HMU) to 31 March 2022.
- The agreed backlog in delivery between 2010 and 2017 amounts to 5635 dwellings, which equates to 3 years of the overall requirement for the first 7 years of the plan.
- It is agreed that a 20% buffer applies in relation to paragraph 47 of the Framework and that 10% applies in relation to paragraph 73 of the rFramework, if appropriate.

---

69. From the examination of the sites claimed to be within the supply the following is clear:

- i. The appellant's assessment of the sites the Council seeks to include in the supply are identified in evidence. A number are drawn-out to illustrate the key arguments against the sites being included in the supply to the extent claimed by the Council:
- ii. LPS 1 and the Crewe opportunity area is not a "*specific deliverable site*" in NPPF§47 terms and should not be included within the supply.
- iii. The Appellant's assessment of lead in times to construction in Cheshire East (Appendix MW 6) the following should be applied – 1 year from submission to the grant of outline permission; 1 year to a reserved matters application; 6 months to determine the reserved matters application; and, one year to the completion of the first dwelling. This is a total lead in time of 3.5 years. This is vital to deciding what is in the supply as it allows for an assessment of yield. Unlike CEC's standard methodology for lead in times and build rates, MW's evidence is transparently evidenced and is palpably more reliable than CEC's "black box" approach. Thus, whilst MW accepts these conclusions on average lead in times can be rebutted by specific evidence, it requires sound, realistic and up to date evidence (see para 2.5(d) above and PPG 3-033). No such evidence was forthcoming from the Council. Instead the Council offered a partial assessment of lead in times from a self-serving data set in Mr Fisher's rebuttal proof of evidence (Appendix 2). Mr Fisher's assessment is partial as it completely fails to take into account sites started before the adoption of the LPS and the lead in times between application and between construction starting and the first unit emerging from the ground (conceded by Mr Fisher XX).
- iv. Despite the policy requirements in the Framework/rFramework and PPG (see paragraph 2.4 and 2.5 above), Mr Fisher thought it appropriate for the Council to make assumptions about sites being delivered by multiple builders without any supporting evidence. Whilst that may be a correct statement that doesn't mean it comprises evidence! The Secretary of State cannot as a matter of law (given the clear interpretation of policy and guidance above) adopt this approach when evidence not an aphorism is needed. If the Council cannot produce evidence to support their assumptions on build rates, yield or commencement timelines then the Secretary of State must prefer the reasoned and evidenced approach put forward by the Appellant, which precisely mirrors the concerns of the last 2 inspectors to consider this topic in detail. Indeed Mr Fisher continued to make unsubstantiated assertions – "*we increasingly see single builders doing 50+ units a year on a site*". The Council's own assessment of build out rates in the 2017 HMU (Appendix MW17) does not support Mr Fisher's statement. Statements such as this cannot be given any weight when the Council's only evidence does not support them.

- 
- v. The 'sense check' for the use of the LPA's standard methodology as to lead in times and build rates is what it has predicted will be delivered and what has actually been delivered. As noted below the prediction for 2016/17 in the LP trajectory of 2955 (presumably based on the optimism of those making representations to the hearing) has proven to be groundless, and this year looks set to be similarly wrong compared to the LP and the HMU trajectory.
- vi. MW and the Inspectors in the WMQ<sup>10</sup> and Willaston<sup>11</sup> inquiries are in agreement on the yield from many of the sites. Mindful of the materiality of consistency of decision making, the SOS should be slow to deviate from those conclusions without the clearest possible evidence for so doing (the sites are noted in Appendix MW4), with respect AF asserting that he thinks that the Inspector's got it wrong is not a such a reason.
- vii. AF at one point made the bold point that both Mr Inspector Rose in the White Moss Quarry ("WMQ") inquiry<sup>12</sup> and Mr Inspector Hayden in the Willaston inquiry<sup>13</sup> both fell into serious error by concluding that a 5YS could not be demonstrated having concluded that the supply was either just above or just below 5 years. Whilst the language used was that of 'precaution', in fact both Inspectors reached an orthodox conclusion with regard to paragraph 47<sup>14</sup>, having determined that the supply was within that range. Thus, the conclusion reached by those senior Inspectors was that they were unable to determine with confidence that the Council had a 5YS. That means no more than that they could not be satisfied that the LPA could demonstrate that it had a deliverable 5YS. Therefore they approached the evidence on the assumption that Framework paragraphs 49 and 14 were engaged – deciding those appeals using the tilted balance. Both Inspectors' reasons were impeccable.

It was notable by its absence in relation to the sites where MW allies himself with the conclusions of those previous Inspectors' that time and again the Council failed to bring forward evidence to rebut the Inspectors' conclusions, reached after an exhaustive analysis of the evidence before them, in those inquiries from 8 November 2017.<sup>15</sup>

Even if the Council is correct on their least attractive argument that they are not required by policy to rely upon "robust" evidence to demonstrate a 5YS, they nonetheless are forced to accept that these appeal decisions are material considerations. Furthermore they accepted in XX the fundamental importance of the consistency of

---

<sup>10</sup> C.D29 Appendix MW1.

<sup>11</sup> CD D29 Appendix MW2 at [103].

<sup>12</sup> Ibid.

<sup>13</sup> Ibid.

<sup>14</sup> Subsequently paragraph 11 incorporating footnote 7.

<sup>15</sup> CD29 / Appendix MW1 at [28] – [59] and Willaston - CD D29 / Appendix MW2 at [58]– [89]).

---

decision taking, and that the Secretary of State in this appeal would need to give reasons (and therefore have supporting evidence) for deviating from those decisions. Whilst this is trite law, it makes it all the more baffling that having accepted those principles, they failed to produce any evidence to properly rebut conclusions of the WMQ and Willaston Inspectors.

The Council has comprehensively failed on both counts – they have failed to produce robust evidence to demonstrate a 5YS; and, they have not produced any evidence to rebut the Inspectors' conclusions in the early appeals, either evidence arriving post those decisions or to explain why those Inspectors got it wrong. Instead they continue to rely upon the approach in the LPS, the same arguments that failed in the WMQ and Willaston inquiries.

viii. What is interesting is to consider the predictive confidence with which sites were said to be on the verge of progressing in the HMU in August 2017 and then again at inquiries in late 2017, but where there has been yet further slippage. Time and again sites where applications were on the verge of being made haven't resulted in applications (e.g. the promise in the Park Road inquiry made by AF that the Handforth Growth Village application would be lodged in January, when there is still not even a masterplan in the public domain in March let alone an application), and for sites where applications were on the verge of determination then they remain on the verge of determination (e.g. the reserved matters application on White Moss phase 1).

ix. The Council has adopted a hybrid "Sedgepool 8" approach to addressing its backlog. Mr Fisher sought to explain the approach as meaning that the 8 year period rolled forward throughout the plan period. This approach runs counter to the specific conclusions on the matter by the Local Plan Inspector<sup>16</sup>. The LP Inspector concludes at paragraph 72:

*"CEC therefore proposes to fully meet the past under-delivery of housing within the next 8 years of the Plan period ("Sedgepool 8"). This would require some 2,940 dw/yr (including buffer) over the next 5 years, which would be ambitious but realistic and deliverable, as well as boosting housing supply without needing further site allocations."*

It is plain from this part of the LP Inspector's report that he envisioned the Council meeting its under-delivery in the first 8 years of the Plan – i.e. by April 2024. As Mr Wedderburn made clear, Sedgepool 8 is not Sedgefield, it is unique to Cheshire East. In the absence of an accepted approach that everyone understands, Sedgefield or Liverpool, the words of the LP Inspector carry a great deal of significance as the only direction for how this unique

---

methodology should be applied. Had the Inspector wanted the 8 year period in Sedgpool 8 to have rolled forward, he would have explicitly said so. Not to do so in effect means that the backlog keeps getting rolled ever forward, at least on the Liverpool method the backlog has to be addressed within the LP period. Thus if Sedgpool 8 means rolling the shortfall forward over a perpetually rolling 8 year period then it will be a longer period than the Liverpool methodology, if it means doing so until the 8 years hits the end of the plan period then it is the Liverpool methodology by stealth – either way it is a distortion of the grace afforded by the LPI to deal with the shortfall within the next 8 years. It is of course recognised that the Park Road Inspector didn't agree with this argument – but his argument was based upon giving the Council some leeway in the early years after adoption of the plan. With respect that is not grappling with the issue properly, and the SOS is therefore respectfully invited to do so.

- x. Instead of the high delivery rates that were contended for as being realistic before the LPI (evidenced by the LP trajectory and noted by the LPI at paragraph 72 of his report) delivery rates thus far are well below those needed by CEC to plausibly claim a robust 5YS. To use a different metaphor, wheels have come off the Cheshire East Local Plan Strategy ("CELPs") in the first year after that assessed by the LPI. As at the base date of 1/4/17, it has under-delivered by 5365 units (equating to a deficit of 3 years of the requirement in the first 7 years of the plan), already.
- xi. The LP trajectory identifies that to secure a 5YS the LPA needs to deliver 2466dpa each year from 1/4/17. That figure is comparable under the HMU because the rolling Sedgfield 8 lets the LPA off the hook from not reducing a single unit from its shortfall last year (1796 – essentially equating the requirement but not eroding the shortfall at all – which is still then spread over the next 8 years). AF projects in his evidence that this year there will be delivery of 2000 units based on current information – which means delivery way below the ~2500 figure needed each year for the next 5 and pushing back meeting the shortfall by yet another year. In the real world this is woeful under-delivery and yet AF sought to argue it as if things were on-track.

Mr Fisher accepted that the LP Inspector put weight on the anticipated delivery described in the LP trajectory<sup>17</sup>. However, he somewhat inexplicably sought to argue against the 2955 figure being CEC's realistic prediction on the basis that there was no adopted plan during the first 3 years of the plan period – something the LP Inspector would have been well aware.

The only sensible conclusion is that the LP Inspector saw Sedgpool 8 as meeting the undersupply by 2024, and therefore having rolled the base date forward by one year the shortfall should be met within the

---

<sup>17</sup> CD A40 paragraph 68.

---

next 7 years resulting in an annual requirement (including shortfall) of 2955. On this basis alone CEC cannot demonstrate a 5YS.

70. The yardstick of the LPA's judgment is of course its own predictive ability, and in this case it has been found wanting in the starkest possible terms within the first year of the period considered by Inspector Pratt. The figures could not be more telling, contrasting the case being put last year before Inspector Pratt and that being put this year at this inquiry. Thus comparing the trajectory at the end of the 2016 Housing Topic Paper, which might usefully be considered to be its 2016 HMU against the trajectory at the back of the HMU, the following obvious points can be made:
- (i) in the 2016 HMU, the LP predicted that its delivery for 2016/17 would be 2955, in fact it was 1762 (ie 40% less than it predicted and told Mr Inspector Pratt). Even if the target was 246617 as AF now maintains, that is still 27% below the level it should have been;
  - (ii) both AF and MW provide evidence which triangulates upon around 2000 units as the likely delivery in 2017/18, against a requirement of 2466 on AF's case or 2955, which is either 19% or 32% below where it should be. That is also 2 years out of the 5 years considered by Inspector Pratt where the prediction of the LPA has failed – one wonders at what point the LPA go back to re-read the serious caution that Inspector Pratt issued in paragraph 68 of his final report?
  - (iii) in the 2017 HMU it predicts that delivery in 2017/18 will be 3373, which is double that actually achieved in 2016/17 (1762), and is way above any trendline of delivery. It is also 33% higher than CEC were predicting would be delivered in 2017/18 in its 2016 HMU (which predicted 2549 being delivered). In fact it is likely to be around 2000 units. That difference alone should lead anyone to seriously question whether its predictive methodology is flawed;
  - (iv) other figures for the 5 year period under consideration at this inquiry (ie 5 years from 1/4/17) also vary wildly from the 2016 HMU to the 2017 HMU; for example in 2016 it was predicted that 2019/20 would deliver 3,501 but in 2017 it is predicted that it will be only 3032;
  - (v) both trajectories (the LP and the HMU 2017) reveal that in no year has the LPA ever achieved its requirement (1800 pa) in the seven years since the plan started (2010), which means that year on year the backlog has been increasing until it is now the equivalent of 3 years supply. Had delivery taken place as planned in 2016/17 the backlog would have reduced by 1155 units, as it is, it has increased and is not now proposed to be removed for a further 8 years despite it relating to need arising now;
  - (vi) to be blunt, both trajectories have an air of unreality to them since both are predicated on an immediate and dramatic upturn in delivery – ie they assume imminent delivery way in excess of past delivery rates for a decade after which delivery rates will once again fall back

---

to pre-2017 rates. The LPA's case was tough before the LPI but is now implausible. In order to achieve a 5YS now it needs to take a far more positive attitude to the release of deliverable sites without land use constraints in sustainable locations, and not to assume an ever more ostrich-like approach to what has actually taken place compared to its predictions since Inspector Pratt's assessment based on a base-date of April 2016.

(vii) Importantly, the failure of the LPA's predictive ability has been in the first year of delivery – if a plan fails that badly, this early the need for intervention is acute. There is no warrant to give the plan a bit more time to play out – the need for action is an immediate one and is overwhelming on the evidence. It is depressing that having been told that implicitly by two Inspectors that CEC are trying ever harder to man the bilge pumps on their own private Titanic that is their claimed 5YS.

71. The supply of housing land is not a ceiling and given the current state of affairs in this LPA, they should be actively searching out new sites with manageable planning harms to come forward. The Council's closing submissions (paragraphs 63 – 67) argues that permitting this site would reduce the allocations going forward to meet more local needs. This argument is wafer thin, and completely unsupported by any evidence provided at the inquiry. The figures contained in a local plan (including CELPS where this point is recognised at 8.73) are a floor and not a ceiling, and there is no support in policy or evidence to support this argument. Given there are no technical objections to this appeal site, its locationally sustainable and its intrinsic merits have already been endorsed by one Inspector (in the context of there being an immediate need), it is an obvious candidate to come forward now to help this Council meet its needs and to help to address its already significant under supply.
72. The Council's closing go on to say that if the SoS concludes that the LPA has failed to demonstrate a 5YS, then settlement boundaries will need to flex, but it contends that it should not be at this site (paragraph 153). This approach shies away from meeting an immediate problem. This approach has no founding in policy; it suggests that some sort of sequential test should be applied when a 5 year housing land supply problem arises. The appropriate approach is to consider whether or not the development being put forward to rectify the 5 year housing land supply problem is acceptable in planning terms and constitutes sustainable development. If it is, then it should be permitted. Sustainable sites should not be precluded from being developed when there is an immediate need on the basis that the Council thinks that there might be better sites to meet the need that it has denied, and based on evidence it has not presented! This is an abrogation of proper decision making.
73. The Council sought to argue that lapse rates shouldn't be applied, when it accepts that permissions do in fact lapse at a rate which is presently unknown. It's reasons for rejecting MW's approach in this regard is that it is said to duplicate the buffer – which it plainly doesn't – one relates to appraising supply, whereas the other relates to establishing the requirement.

---

CEC bases its argument on a fundamental misunderstanding of *Wokingham BC v SOSCLG* [2017] EWHC 1863 (Admin). When that case is examined correctly, the issue was whether the Inspector was right in law to apply a lapse rate despite no party raising it during the inquiry (at paragraph 55). When the judge went on to consider whether lapse rates could be law *per se*, he concluded (paragraph 69):

*It is for the decision-maker to determine in the first instance whether or not the application of a "lapse rate" to the estimated five-year supply of deliverable housing to reflect the Council's "record of tending to over-predict delivery" involves an unwarranted adjustment, given an increase in the housing requirement by 20% "where there has been a record of persistent under delivery of housing", in each case in order "to provide a realistic prospect of achieving the planned supply.*

Therefore, provided the issue is fully ventilated before the Inspector, as it was at this inquiry, then the conclusion can be made to add a lapse rate onto the requirement. Given this Council's history of under delivery and continuing over estimation of future performance, a lapse rate of 5% as proposed by the Applicant is entirely appropriate. Indeed, it will be a vital tool to pushing this Council to meeting its need to provide homes.

74. In conclusion, on both methodology and content, the evidence before this Inspector confirms the Appellant's case that the LPA can demonstrate at most 4.25 YS. If the Council's approach to Sedgemoor 8 is applied, the land supply position on the LPAs approach to yield goes to 4.42 years. It follows from such an outcome on the land supply position that paragraph 49 of NPPF is engaged (subsequently paragraph 11 if the rFramework through footnote 7) and the decision necessarily should be taken based upon the tilted balance therein. The SOS will undoubtedly be told by CEC that the recently adopted local plan can, and is, delivering the houses to meet the identified need. However, it is not that straightforward. One cannot say that simply because there is a recently adopted LP, that the land supply position is safe. The following points are of note:

- a. The Appellant is not seeking to "go behind" the conclusions of the LPS Inspector which were based upon an analysis of Housing Supply position as at April 2016. Rather this inquiry is charged with critiquing the 2017 HMU which has rolled the position forward by one year;
- b. AF at one point in his evidence seemed to run an argument that has repeatedly failed at inquiry – that the task of an inquiry is to review the position as it was known at the base date and then close one's mind to knowledge of what has come to light in relation to the various components of supply since the base date. With respect that position is wrong:
  - i. It is not the approach of the LPA in its 2017 HMU which relies on information which has come to its attention after the base date;
  - ii. It is not the approach of AF who also relied upon information which has come to his attention after the base date, and indeed he has

---

sought to gather more evidence after the LPA lost the 5YS argument at 2 previous appeals;

iii. It is not the approach of Inspectors in countless appeals across the Country;

iv. It is contrary to the approach required as a matter of law in the *Stratford on Avon DC v SOSCLG* [2013] EWHC 2074 (Admin);

v. It literally makes no sense – a decision maker is required to form a view on what the 5YS is on the evidence before him/her a s.78 appeal is not a form of quasi-judicial review to review the LPA's assessment at a point in time.

75. Inspectors in the White Moss and Willaston decisions<sup>18</sup> both concluded that a precautionary approach should be taken to the 5YS issue and that the tilted balance should be engaged. It is just wrong to contend (as AF now seeks to) that the LPA was constrained in how it wished to put its case, or that there was a misunderstanding of the implications of the St Modwen case. To the contrary in both appeals there was no constraint on the information that the LPA was able to bring forward, noting that it had failed to provide much of the base information on which the 2017 HMU was predicated AND submissions on the St Modwen case were made by leading counsel for CEC in the latter case which followed the reporting of the decision of the Court of Appeal.

76. As noted above the St Modwen case is in any event something of a red herring. It deals with what should be the components of supply and essentially concludes that the footnote to the then paragraph 47 means what it says; but it says nothing about how to approach what is the expected yield that should be assessed from those components of supply, where the PPG requires robust evidence to be provided where PP is not in place.

77. The Inspector's decision in Shavington is being challenged, as the Council is eager to point out. The basis of challenge seeks, through the Shavington decision, to impugn the rational and unimpeachable approach to calculating 5YLS in the WMQ and Willaston decisions. This challenge is being robustly defended, by both the Secretary of State and the Land Owners. Until the claim is heard, those decisions stand and the approach to 5YLS they adopt should be followed – not just in the interests of consistency in decision making, but because it is the correct approach in law and a failure to do so would be unlawful. The presumption of legality applies, and the Inspector is invited to give precisely no weight to the fact of the challenge (just as was the case in relation to the local plan challenge which was live at the time of the White Moss Quarry and Park Road appeals). Moreover, insofar as some of the arguments raised in that challenge mirror the fallacious arguments being raised by CEC in this case then the Secretary of State is respectfully invited to have regard to the rejection of those self-same arguments being raised on his behalf by the Government Lawyers. It is apprehended that the challenge will

---

<sup>18</sup> Ibid.

---

have long failed by the time that this decision is ultimately made by the Secretary of State in any event. It has of course not been welcome news to the LPA that it cannot demonstrate a robust 5YS, and as a professional one can have a degree of sympathy for the LPA which has gone through a very long process to secure adoption of the LPS only to discover that houses aren't being delivered sufficiently quickly to ensure a 5YS. However, what is startling is that rather than taking steps to remedy the position (e.g. advancing the pt2LP, and releasing more deliverable sites) the LPA has chosen instead to deploy its resources into defending the obviously indefensible. Based on a robust and objective assessment AF is wrong and the LPA cannot demonstrate a 5YS, and the deficit can only be made good in the short-term by the release of additional sustainable and deliverable sites without technical constraints such as this one.

### **Appellant's supplementary comments on revisions to the National Planning Policy Framework**

78. Paragraph 73 of the revised Framework states:

*"Local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of **five years'** worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old".*

79. The requirement to assess the housing supply as set out previously in NPPF para 47 therefore remains. In the case of Cheshire East the housing requirement is established in the Cheshire East Local Plan Strategy ("the LPS"). Policy PG 1 sets a housing requirement of 1,800 dwellings per annum. This plan was adopted on 27 July 2017 and is therefore less than 5 years old. In accordance with paragraph 73, this housing requirement should therefore form the basis of the assessment. The housing requirement set out in the LPS was used in the appellant's evidence heard at the Inquiry in February 2018 and indeed it was common ground at the Inquiry that this housing target should be applied. The appellant's approach is therefore considered appropriate with regard to the revised NPPF.

### **Identifying the Base Date and Five Year Period**

80. The rFramework does not comment on the base date or the 5 year period to apply to the assessment. The appellant's evidence on 5 year HLS applied a base date of 31st March 2017 and a five year period of 1st April 2017 to 31st March 2022, which aligned with the Local Planning Authority's Housing Monitoring Update (published August 2017, base date 31st March 2017). This based date of 31<sup>st</sup> March 2017 was therefore agreed, and is contained within the Statement of Common Ground (SoCG). This approach is considered appropriate with regard to the rFramework.

---

## The Appropriate Buffer

81. Paragraph 73 of the rFramework states:

*"The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:*

- 5% to ensure choice and competition in the market for land; or*
- 10% where the local planning authority wishes to demonstrate a five year supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or*
- 20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply."*

82. Footnote 39 of the rFramework explains that from November 2018 "*significant under delivery*" of housing will be measured against the Housing Delivery Test, where this indicates that delivery was below 85% of the housing requirement. At the time of writing, the relevant section of the PPG which may provide further guidance on this matter has not been updated to reflect the revised NPPF.

83. As above, footnote 39 is clear that the Housing Delivery Test will not be used to measure significant under delivery until November 2018 or thereafter. Paragraph 215 of the rFramework also explains that the Housing Delivery Test will apply from the day following the publication of the Housing Delivery Test results in November 2018.

84. Paragraph 73(b) advises that a 10% buffer can be applied by a LPA where it wishes to demonstrate a five year land supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market that year. The reader is then directed to footnote 38 which states:

*"For the purposes of paragraph 73B and 74 a plan adopted between 1st May and 31st October will be considered recently adopted until the 31st October of the following year; and a plan adopted between the 1st November and the 30th April will be considered recently adopted until 31st October in the same year".*

85. As set out in evidence at the inquiry, in the first seven years of the LPS plan period, net housing completions in Cheshire East had been on average 1,034 dwellings per annum, and did not reach the 1,800 target at any point. It was therefore common ground at the inquiry earlier this year that a 20% buffer be applied, reflecting persistent under delivery as identified in the Framework.

86. In respect of the implications of the rFramework, the Local Plan Strategy was adopted by Cheshire East on 27 July 2017. As such it qualifies as "*recently*

---

*adopted*” until 31 October 2018. Whilst the PPG has not been updated to provide detailed guidance upon this matter, the rFramework indicates that a 10% buffer to housing land supply is appropriate in any decision taken up to 31 October 2019.

87. From 1 November 2018, whether there has been a significant under delivery of housing will then be a matter for the decision maker to determine. Therefore the appellant maintains that a 20% buffer should apply from 1 November 2018 given the previous under delivery throughout the plan period.
88. It is also noted however that the Housing Delivery Test will then be used to measure significant under delivery from the day following its publication in November 2018. It is expected to use the national statistics for net additional dwellings, which have typically been published in mid-November over the last few years. Consequently, it seems likely to be later in November or thereafter before the Housing Delivery Test is in place.
89. The Framework is clear that the measurement of what amounts to “significant” under-delivery will be based upon the publication of the Housing Delivery Test that will be November 2018. In this case, the 10% buffer should apply as a minimum as the LPA have a recently adopted local plan in accordance with footnote 38 of the Framework. rFramework paragraph 73 gives flexibility to allow the decision maker to apply judgement as to whether or not criteria a) b) and c) applies based upon the evidence before them.
90. Whilst footnote 39 may not apply until November 2018, and because the Framework is silent on how one should determine what is “significant in the interim, it is considered that the 20% buffer should apply as until this time, the application of a 20% buffer is a matter for the decision maker to determine.
91. “Significant” under-delivery is defined as being below 85% of the annual housing requirement. It should be noted here that the transitional arrangement identified at paragraph 215 of Annex 1 only applies to the application of footnote 7 in terms of triggering the tilted balance of paragraph 11d of the Framework. It does not affect the determination of whether or not the 20% buffer applies. The appellant’s 5 year HLS calculation is therefore resupplied below showing both a 20% and also a 10% buffer to cover NPPF para 73b.

### **Addressing the under-provision**

92. The rFramework does not specifically state how the backlog should be addressed, however it does set out the Government’s objective of “*significantly boosting the supply of homes*” (paragraph 59). Addressing the backlog as soon as possible would be consistent with this paragraph. The supporting Planning Practice Guidance (PPG) has not been updated at the time of writing. Paragraph 3-035 of the PPG: “*How should local planning authorities deal with past under-supply?*” provides the guidance that was set out in the evidence for the appeal. It states:

---

*"Local planning authorities should aim to deal with any undersupply within the first 5 years of the plan period where possible. Where this cannot be met in the first 5 years, local planning authorities will need to work with neighbouring authorities under the 'Duty to Cooperate'."*

93. Consequently, the PPG is clear that Local Planning authorities should aim to deal with the backlog within five years. Whilst the PPG does appear to recognise that there may be circumstances in which this is not possible, it does not suggest that the backlog should be addressed over any other period in those circumstances. Instead it states that local planning authorities will need to work with neighbouring authorities under the 'Duty to Co-operate', presumably with adjacent authorities looking to help to address the backlog by making immediate provision.

94. A draft HLS section of the PPG was made available in association with the consultation on the draft rFramework. The draft PPG proposes to remove the reference to the Duty to Co-operate and replace it with reference to the plan making and examination process. It states (on page 14):

*"Local planning authorities should deal with deficits or shortfalls against planned requirements within the first five years of the plan period. If an area wishes to deal with past under delivery over a longer period, then this should be established as part of the plan making and examination process rather than on a case by case basis on appeal".*

95. This draft guidance is consistent with the appellant's position given in evidence and maintained at the inquiry. The appellant's position was to acknowledge that the matter of undersupply of housing delivery had been considered at the Local Plan examination and that the first year of the 'Sedgepool 8' period had elapsed. The appellant's position is that the LPA's "rolling" 'Sedgepool 8' approach would result in the shortfall continuing to be moved backwards and not actually be addressed at all, rather than being addressed within the 8 years as the LPS Inspector intended. The appellant's approach to addressing the under-provision therefore is considered appropriate with regard to the rFramework.

### **Assessing the Deliverable Supply**

96. Paragraph 67(a) of the rFramework is particularly relevant to the appellant's 5 yr HLS case in this appeal. At the Inquiry, there were a number of sites contested at inquiry between the Council and the appellant over whether they should be expected to deliver housing within five years. The assessment of the parties and the supporting evidence was provided within the context of footnote 11 of paragraph 47 of the previous version of the NPPF where 'deliverable' was defined. That footnote was the subject of a number of Court Judgements, in particular the *St Modwen* judgement, which was discussed at the Inquiry. In the rFramework, the definition of "Deliverable" is set out in the Glossary at Annex 2, and this states:

*"To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five*

---

*years. Sites that are not major development, and sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (e.g. they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans). Sites with outline planning permission, permission in principle, allocated in the development plan or identified on a brownfield register should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years."*

97. The definition of deliverable has now been clarified and sets out the expectations for both local planning authorities and others in assessing the supply of housing land. This change is significant in that it sets out separate tests for two categories of sites as follows:
- Category A - Sites that are not major development (i.e. 9 dwellings or less<sup>19</sup>) and sites with detailed planning permission: these should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (some examples are given as to what constitutes clear evidence).
  - Category B - Sites with outline planning permission, permission in principle, allocated in the Development Plan or identified on a Brownfield Register: these should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.
98. In summary, sites under Category A are to be considered deliverable unless the appellant, in challenging the LPA's 5 year HLS, provides clear evidence that those sites are not deliverable. Conversely sites in Category B should not be included in the five year housing land supply by the LPA unless there is clear evidence that housing completions will begin on these sites within five years. This is a significant change as the test has now been reversed for sites with outline permission or development plan allocations. Previously under footnote 11 sites were deemed to be deliverable unless there is clear evidence that they were not. Therefore, national policy now stipulates that these should no longer be included unless there is specific evidence that they are deliverable.
99. The appellant considers that this change in approach to considering whether a site is deliverable gives overall support to the appellant's position and undermines the Council's approach to the supply in the evidence before this appeal.
100. In general, it does not alter the appellant's position on the sites that were challenged in the appellant's evidence in this appeal. Without seeking to introduce new evidence or reopen the detailed consideration of sites undertaken at the inquiry, the appellant's approach at the inquiry was

---

<sup>19</sup> As per the definition of "major development" within Annex 2 of the rFramework.

generally not to challenge whether sites should be considered deliverable, but to challenge whether sites had a realistic prospect of delivering of the number of units indicated by the Council within 5 years. The change in approach in the rFramework would add weight to our concerns for Category B sites, that the Council has not demonstrated (to quote the rFramework) with *"clear evidence that housing completions will begin on site within five years"* (and without seeking reopen the detailed consideration of sites undertaken at the inquiry it may also provide a reason to challenge further sites in the supply).

101. The appellant provided evidence disputing 41 sites and the majority of these were sites within category B. Of these sites, 34 were sites without planning permission, sites with outline planning permission or sites with outline permission subject to S106. In the case of these sites, the onus would now be on the Council to demonstrate in evidence why it should be considered that housing completions will begin on site within five years. A summary of the sites falling within Category A and Category B are set out in the table below.

Site Name/ Reference	Category A	Category B
LPS1 Central Crewe		✓
LPS2 Basford East Crewe (Phase 1)		✓
LPS4 Leighton West (part a)		✓
LPS5 Leighton		✓
LPS6 Crewe Green		✓
LPS8 South Cheshire Growth Village		✓
LPS10 East Shavington	✓	
LPS11 Broughton Road, Crewe		✓
LPS13 South Macclesfield Development Area		✓
LPS14 Kings School, Fence Avenue		✓
LPS15 Land at Congleton Road		✓
LPS16 Land south of Chelford Road, Macclesfield		✓
LPS17 Gaw End Lane, Macclesfield		✓
LPS18 Land between Chelford Road and Whirley Road		✓

LPS20 White Moss Quarry, Alsager		✓
LPS27 Congleton Business Park		✓
LPS29 Giantswood Lane to Manchester Road		✓
LPS33 North Cheshire Growth Village		✓
LPS36 Land north of Northwich Road and land west of Manchester Road, Knutsford		✓
LPS37 Parkgate Industrial Estate, Knutsford		✓
LPS38 Land south of Longridge, Knutsford		✓
LPS42 Glebe Farm, Middlewich		✓
LPS43 Brooks Lane, Middlewich		✓
LPS46 Kingsley Fields	✓	
LPS48 Land adjacent to Hazelbridge Road, Poynton		✓
LPS57 Heathfield Farm, Wilmslow		✓
LPS61 Alderley Park	✓	
1934 Land off Dunwoody Way, Crewe	✓	
2991 Land adjacent to 97 Broughton Road, Crewe	✓	
3535 Santune House, Rope Lane, Shavington	✓	
3574 Land west of Broughton Road, Crewe	✓	
3612 Land south of Old Mill Road, Sandbach		✓
2896 Land to the north of Moorfields, Willaston		✓
4302 Kings School, Macclesfield		✓
4752 Land off East Avenue, Weston		✓
4725 Abbey Road, Sandbach		✓
5672 Land off Church Lane Wistaston		✓
5709 Land off London Road, Holmes Chapel		✓
406 Victoria Mills		✓
3175 Chelford Cattle Marker and Car Park		✓

102. The change in approach to considering whether a site is deliverable does however run very much counter to the LPA's approach in this appeal with regard to assessing the deliverable supply. The Council's evidence to the appeal set out a number of observations on the *St Modwen* judgement and the consideration of whether a site is deliverable. The Council essentially suggested that the *St Modwen* Court of Appeal Judgement is a 'game changer' in that the threshold for calculating 5 year HLS had been lowered in some significant respect and contending that, given the strategic sites are allocated and these sites are 'capable' of having homes built on them, *St Modwen* obviated the need for the LPA to evidence that their yields in the 5 year period are 'realistic'. Clearly the rFramework now makes absolutely clear that Category B sites should no longer be included in the supply unless there is specific evidence that they are deliverable. It is therefore it is clear that robust evidence on delivery is needed, as was argued by the appellant.
103. In summary, the supply of deliverable sites must be determined within the context of the rFramework which is a material change from that in the superseded Framework. It is for this reason, and the test in paragraph 67A (and associated definition of what comprises a deliverable site provided within Annex 2) that means that the Appellant's housing land supply position should be favoured over the Councils.

### **Housing land supply calculation**

104. The above comments in respect of the approach to 5 year HLS in the rFramework refer to each of the key stages of assessment. The final stage is to undertake the calculation itself. The appellant's calculation was set out in the Appellant's 5 year HLS Proof of Evidence in Table 16 entitled "Conclusions on 5 year land supply CEC / Appellant". At the end of the Inquiry on 23 February 2018 a revised version of this table was submitted at the Inspector's request, updated to reflect the concessions on supply made by both parties in the 5 year HLS Statement of Common Ground (SoCG).
105. It is considered that, given the reference to a 10% buffer in rFramework para 73(b), it may be of assistance to now provide a table showing the appellant's position updated to reflect the concessions on supply made by both parties in the SoCG with a 10% buffer applied.

Updated version of Table 16 of the Appellant's Proof of Evidence "Conclusions on 5 year land supply CEC / Appellant" to reflect the concessions on supply made by both parties in the 5 year HLS Statement of Common Ground in this appeal and also showing the calculation applying a 10% buffer

		Appellant's position when the 20% buffer is applied (supply addressed in 7 years) (updated to reflect SoCG on sites)	Appellant's position when the 10% buffer is applied (supply addressed in 7 years) (updated to reflect SoCG on sites)
<b>A</b>	<b>Net annual requirement (2010 to 2030)</b>	1,800	1,800
<b>B</b>	<b>Housing requirement 1 April 2017 – 31 March (A x 5)</b>	9,000	9,000
<b>C</b>	<b>Shortfall 1 April 2010 - 31 March 2017</b>	5,365	5,365
<b>D</b>	<b>Shortfall to be addressed in 5 years</b>	3,832	3,832
<b>E</b>	<b>Requirement + shortfall (B+D)</b>	12,832	12,832
<b>F</b>	<b>Buffer (20% of E)</b>	2,566	n/a
	<b>Buffer (10% of E)</b>	n/a	1,283.2
<b>G</b>	<b>Requirement + buffer (E+F) = supply required</b>	15,398	14,115.2
<b>H</b>	<b>Assessment of Supply (updated)</b>	13,101	13,101
<b>I</b>	<b>Supply demonstrated (H/G x 5) in years</b>	4.25 years	4.64 years

106. The table above sets out that, where the appellant's approach to supply is preferred, even if a 10% rather than 20% buffer is applied the Council's 5 year HLS figure remains below the requirement.
107. The appellant's position in the light of the rFramework therefore remains that the LPA cannot demonstrate a deliverable five year housing land supply, as was set out in evidence to this appeal and at the inquiry. Therefore, in accordance with paragraph 73 of the rFramework it remains the position of the appellant that the Council are unable to robustly demonstrate a 5 year supply of deliverable housing sites. Therefore, the tilted balancing exercise required by paragraph 11d of the rFramework is engaged as per footnote 7. The conclusions reached by the appellant in the evidence heard before the inquiry therefore remain valid in the context of policies contained within the revised Framework.

## **Landscape**

108. The application site carries no designation, nor is anyone arguing that it is a valued landscape in rFramework terms. In local landscape policy terms

---

(SE4), the scheme is compliant for the reasons explained by Mr Berry. Moreover, it is clear from the proposed Landscape Strategy principles that the development will respond to the existing landscape with good legibility and a strong sense of place. Any marginal criticisms that have been raised over the course of the last 4 years have been fully taken on board in the latest revisions to the illustrative masterplan. In JB's view the appeal site is an unremarkable and ordinary parcel of land with no particular features that would set it out of the ordinary. Its relationship to the urban area, especially following recent planning permissions granted to the east and west and illustrated on JB's appendix 1, drawing SK19, underscore the site's obvious capacity to accommodate the proposed development. Importantly, that capacity has only increased since the application was first refused (contrary to officer's recommendations) as a result of the adjacent development (especially the DWH land to the east which will have been evident on site); and also as a result of the scheme no longer proposing its own dedicated access to the south, but through an access from the north of the site, the junction with Peter Destapeleigh Way already having been completed.

109. Given that CEC have never refused this application on landscape grounds and have never raised a freestanding landscape impact case against the proposals either at this inquiry or its precursor, one might legitimately ask why the Appellant has sought to present a fully articulated landscape case. Indeed, Mr Gomulski CEC's landscape architect who is habitually called at housing appeals in this borough reiterated his advice back in November 2017 that there would be no significant adverse landscape and visual impacts (after mitigation) and that a landscape reason for refusal could not be substantiated.

### **Local Plan considerations**

110. The Council's case is in essence that there is no need for additional housing and that there are breaches of the recently adopted Local Plan Strategy ('CECLP') whose policies should be treated as not out of date and therefore the application must be refused. To put it mildly, that is an oversimplification of the situation of the task that is before this Inquiry, and takes a myopic view of the actual position that CEC finds itself. Unarguably, in accordance with s.38(6) of the 2004 Act the SOS must determine this appeal in accordance with the development plan unless material considerations indicate otherwise. As PD pointed out in his evidence, whether the policies of the development plan remain relevant and up to date is a material consideration that must be taken into account. Further, the question of whether or not the appeal proposal is in accordance with the relevant policies of the development plan is not simply a yes or no question the answer to which determines the outcome of this appeal. The degree of conflict is plainly relevant and an essential question to consider. Similarly, the actual land use consequence of a policy breach has to be interrogated.
111. That is particularly important here when the alleged harm is the principle of development beyond settlement boundaries, and not any particular significant land use harm, such as landscape, ecology, drainage etc, other than the loss of an area of BMV agricultural land (which is agreed not to be a determinant issue in any event). However the loss of BMV is not significant

---

and the site is not currently farmed. As recorded in the note submitted to the Inquiry by the Appellant, and not disputed by the Council, only 17% of the appeal site A is BMV (sub-grade 3a). As set out in appendix 2 to PD's POE (the POE of M J Reeve on BMV for the original inquiry at para 6.1), the site "would primarily use one of the few areas dominated by poorer non-flooding land on the margins of Nantwich, so meets the requirements of the NPPF to use poorer quality land in preference to that of a higher quality. The LP at policy SE.2 requires that BMV is "safeguarded". It is agreed that the site will result in the loss of BMV it is a small amount (2.6ha in total across Appeals A and B) and that this loss is not determinative (see SoCG). Taking these points together, in the context of a county where most of the land is of similar grade (see RT PoE at 6.33), the poor quality of the other land in site A and that the parties agree that the loss of BMV is not determinative, the loss of BMV must accord no more than limited weight (as PD concludes in his POE at page 60). Furthermore, if the SoS concludes that the Council cannot demonstrate a 5YHLS, then greenfield sites will need to be delivered and he should reach the same conclusion as the original inspector at paragraph 12.1626 that in those circumstances the release of the BMV on this site to development causes no harm.

112. The starting point for considering whether the relevant policies are up-to date and the weight to be afforded to any breaches of them is a consideration of the basis upon which the plan was adopted. It is agreed by both of the main parties planning witnesses that the settlement boundaries used in the CECLP are those from the previous Crewe and Nantwich local plan. PD explained that the LP settlement boundaries that were set in 2006 were only ever intended to last until 2011, by which time there would have been expectation that they would have been reviewed.
113. The only modifications that were made to these boundaries during the recent LPS process was to incorporate the strategic allocations into them. This did not constitute a review of the boundaries and it is agreed by both planning witnesses that there is therefore a need for the boundaries to be reviewed as part of the next stage of plan preparation SADPPD/LPpt2, which will also consider allocating additional sites so as to meet CEC's needs, for a plan whose plan period started back in 2010. This was acknowledged by the LPI in his report at paragraph 111 and is expressly acknowledged in Policy PG 6 itself along with its supporting text<sup>27</sup>.
114. As a matter of sensible planning, as a matter of logic and as a matter of mere common sense the geographical extent of these settlement boundaries are therefore obviously "out of date", even if the text of the policies themselves correspond to the approach of the rFramework – a distinction which goes unremarked in the LPA's evidence. This is further evidenced, by the number of dwellings that have been granted planning permission by the Council and at Appeal over the last 5 years and in the overall approach adopted in the LPS itself that involves very significant development outside of settlement boundaries of the saved Local Plan – thereby underscoring it's out of datedness. In a situation where it is acknowledged that development will be required outside of adopted boundaries to meet identified development needs it is nonsensical of the Council to argue that those boundaries are up to date.

- 
115. One final point is that the position is not altered by the making of the NP. That is because Inspector Jonathan King in emasculating the draft NP rewrote the housing chapter of the NP to mirror the settlement boundary in the saved LP and the NP expressly notes that the boundaries will be reviewed as part of the Ppt2. It follows that policies RES-5 and Policies PG-6 are out of date in their geographical extent and this must reduce the weight to be attached to them and the weight to be attached to any breaches of them. This is precisely the approach of the Park Road Inspector who at paragraph 16 observed:

*"Whilst, for the time being, the settlement boundaries and extent of the Open Countryside in the CNRLP as amended continue to carry weight as part of the development plan, there is clearly an acceptance in Footnote 34 and the CELPS Inspector's report that they will be subject to further change. This may be to accommodate non-strategic sites allocated for development as part of the SADPPDP or where planning permissions have been granted for development beyond existing boundaries or in the light of other criteria yet to be defined. To this extent the current boundaries cannot be considered to be fully up to date."*

Thus, it is accepted by the Appellant that these policies are breached but as the Appellant correctly contends the extent of that breach has to be assessed to determine what weight to be attached to the breach. The appeal site lies in the defined open countryside but is in no way an isolated or irregular intrusion into the open countryside. It is an obvious extension to the settlement of Nantwich with development on three sides. Importantly, other than the fact of the breach, the Council does not identify any land use harm arising from the breaches of policies RES-5 and PG-6. That there is no land use harm that arises from the breach of these policies must reduce still further the weight to be attached to these policy breaches.

116. There is an allegation within the RfR as well as RT and AF's proof that to allow the appeal proposals would somehow place the Spatial Vision of the LPS 'out of whack'. That is founded upon the proposition that Nantwich has already delivered the amount of housing that was anticipated as part of the LPS spatial distribution. The point is however nonsensical and belied by the words of the LPS itself, since policy PG7 sets out figures for each settlement that are expressly said to be "neither a ceiling nor a target". And yet RT purports to interpret PG7 in precisely that way, at one point even alleging that there was a conflict with the policy (despite it not being cited in the RfR). Moreover, the table following paragraph 8.77 in the LPS is expressed to be an 'indicative distribution'. Thus whilst it may be that CEC could contend that it would be a powerful material consideration against a scheme which was grossly out of kilter with the overall distribution of the LPS, it is an abuse of the express language of the plan to contend that there is a breach of policy PG7 as RT alleges.
117. However, to arrive at that point one has to come to the view that the proposals would indeed be sufficiently at variance with the indicative distribution to be said to result in a land use distribution contrary to the objectives of the LPS. In White Moss Quarry, Inspector Rose seems to have

---

arrived at the conclusion albeit for a much bigger proposal close to a much smaller settlement. However, merely being a little above the indicative figure of 2050 when that figure is not a ceiling nor a target does not lead to the inexorable conclusion of an offence against the distribution contended for by RT.

118. Moreover, RT was unable to answer the “so what?” point – i.e. even if there is development in excess of the notional distribution, if there is an immediate need for more housing in CEC there are no land use consequences identified which arise as a result why is there a consequence which even weighs into the ‘harmful’ side of the scales. In XC it was argued that the position is directly analogous to the White Moss Quarry appeal – however that decision bears close reading, since the Inspector there was dealing with an argument that the proposals (which were much bigger than those proposed here close to a much smaller settlement) would give rise to harmful out-commuting– whereas here no such allegation is made.
119. As RT was at pains to emphasise in his proof, PG-7 does not identify maximum limits on housing numbers in any location, nor does it identify targets. For a breach of PG-7 to arise it cannot simply occur as a result of a numbers game, there has to be a consequence of that number of housing units coming forward in the location in question. Here there has been no attempt at all to identify any such harm. Thus there was no alleged (unmitigated) infrastructure harm to Alsager and there was no harm to social cohesion, further there is therefore no technical justification for withholding consent.
120. It is all well and good to allege that a proposal is contrary to the spatial strategy of the development plan but in order for such an allegation to be credible the proposal in question must actually be contrary to the spatial strategy and even if it is there must be some consequence of that. Here, the appeal proposal is not contrary to the spatial strategy because the numbers identified in PG-7 are not maxima, and harm has not been shown if panning permission is granted.
121. The appeal proposal should be decided in accordance with the development plan unless material considerations indicate otherwise. When looking at the development one looks at whether the proposal is in overall accordance with the development plan. The appellant accepts there are some breaches of development plan policies, but these are limited<sup>30</sup>, where the breaches arise as a result of settlement boundaries the geographical extent of these policies are out of date and when harm is considered, there is none. This proposal does not give rise to harm to the spatial strategy, gives rise to not meaningful land use harm and comprises sustainable development. Consequently, regardless of the 5yrHLS situation the appeal proposal should be approved.

---

## **Other considerations**

### **Deliverability**

122. In something of an unexpected turn of events CEC ran a surprising and misguided case against the appeal proposals, namely that even if planning permission was granted that the proposals would not deliver very much within the plan period in any event.
123. The first attack was both an attack “ad hominem”, or in modern parlance, the LPA sought to play the man and not the ball. AF presented 3 examples of where consents had been granted to the Appellant but where delivery had not come forward as expected. However, in XX he readily accepted that he had presented a deeply partial picture and had identified only those sites which had under-delivered and that he had said nothing at all about sites where the Appellant had brought forward sites which had readily delivered units. That of itself should have compromised AF’s credibility. However, he also failed to point out that the third of the sites that he cited (Old Mill Sandbach) hadn’t delivered because of a land dispute with the Council, where the latter (as landowner) were essentially holding-out for ransom value for land which had been compulsory purchased as part of a highway scheme but was never needed. The picture painted was a disingenuous and partial one.
124. The argument was then put that based upon MW’s delivery rates, and assuming that the SOS wouldn’t issue his decision quickly that the delivery rates for the site would be low. AF’s picture painted in his proof of a dilatory land-banking strategic land company is with respect ludicrous;
- (v) agents have been appointed as PD explained in XC and the likely purchaser for part of the residential component will be DWH, who are building homes rapidly next door – this will be a continuation of that site, resulting in obvious benefits in terms of lead in time as well as evidencing a clear local market;
- (vi) there is clear evidence of a demand for the employment units – see letter from RWR Walker Surveyors - 15 March 2018.
125. There is no basis for the pessimism expressed by AF (which may be contrasted with gross over-optimism elsewhere), there is compelling evidence that this site will deliver within the 5 year period.

### **Neutral outcomes and Benefits**

126. The Transport Assessment concludes without challenge from the highway authority that the existing road network has the capacity to readily accommodate the traffic anticipated from the scheme. There would therefore be neither severe adverse effects nor deleterious impacts on the safety of other road users. This matter therefore, despite the recognised apprehension of local people, would be rendered neutral in the planning balance. If permitted this scheme will bring forward much needed market and affordable homes. The delivery of these homes will provide employment opportunities.

---

The employment site will provide employment opportunities and strengthen the local economy generally. The services such a site will be a benefit in terms of those services and by reducing trips.

127. The provision of a site for a primary school represents a potential long term benefit of the proposal which could be provided as and when future development requirements for Cheshire East are assessed.

128. The scheme includes extensive areas of open space and landscaping (see CD L9), including habitats with biodiversity benefits. 7.3.4 The section 106 agreement provides, in addition to the affordable housing, for an education contribution and a highways contribution to improve public transport facilities.

### **Overall Conclusions**

129. It is the Appellant's case that the LPA can demonstrate at most 4.25 YS (with a 20% buffer. If a 10% buffer is applied the land supply is 4.64 years. If a more critical view on delivery post-rFramework is factored-in the supply drops further<sup>20</sup>. On any of the outcomes above, the Council cannot demonstrate a 5YS as required by rFramework paragraph 11 (footnote 7). Therefore the consequences flow from this and the tilted balance in NPPF in paragraph 11.

130. Even if it was concluded that the LPA's optimism was well founded and that it could (just) demonstrate a 5YS, then that does not mean that the appeal should necessarily be dismissed:

- a. on its best case, at 5.45 years the LPA is only just able to demonstrate a 5YS, and even that based upon heroic assumptions about future delivery;
- b. the settlement boundaries were established in the C&NLP over ten years ago and have not been reviewed, save for account being taken of strategic allocations since then;
- c. the settlement boundaries will need to be reviewed and updated as part of the CELPpt2 which is still not even at the earliest stage of preparation;
- d. there is no technical objection to the appeal proposals, including any allegation that there is no capacity to meet infrastructure requirements; and,
- e. the existence of a 5YS is not a ceiling nor is it a proper basis to withhold consent for otherwise sustainable development, especially

---

<sup>20</sup> These account for the revised figures submitted after the revisions to the Framework have been accounted and differ from the Appellant's assessment in closings after the Inquiry.

---

when as at 1/4/17 there has been an under-delivery of over 5300 homes or more than 3 years of the adopted LP requirement. Indeed even the figures in the CELPS are firmly expressed as not being maxima, and it would be perverse to treat them as such in the manner implicitly asserted by CEC.

131. The scheme complies with the settlement hierarchy by locating in a Key Service Centre. Furthermore, the scheme complies with the terms of the Neighbourhood Plan as it provides important residential development next to the existing boundary of Nantwich, as the plan envisions (despite the revisionist approach now being taken to interpretation). The Council's arguments in closing (paragraph 156) that this scheme, if permitted, would skew the strategy for Nantwich simply ignores that the CELPS directs residential and employment development to Nantwich as a Key Service Centre. Therefore if the Council has failed to demonstrate a 5YS, then Nantwich would be a prime candidate for flexing settlement boundaries to deliver the homes that are being held up by this Council.
132. Furthermore, the Council's claim that permitting this site would lead to housing provision of 18% above the level identified as appropriate in terms of spatial distribution in the CELPS is misleading. The 18% is presumably (the Council conveniently don't show their working) arrived at by taking the 2246 allocated plus the 189 on this site, giving 2434. This equals 18.7% more than the 2050 in policy PG7. What the Council fails to mention is that as 2246 has already been allocated, CEC has shown they are happy to go over the 2050 and are already over it by 12%. Therefore the percentage increase on the allocated sites (2246) of this proposed scheme (189) is 8.4%. So the Council is not only misleading in paragraphs 61 – 65, but they have also got their arithmetic wrong.
133. The Scheme also provides significant employment, housing and social benefits set out in Mr Downes' evidence. Despite the Council's protestations in closing, there is no policy requirement that weight should not be given to economic proposals if they are not accompanied by a clear indication of the occupier, that would stifle development across the UK were the proposition to have any force. The Appellant has made a planning application and there is no reason to suggest that development will not be forthcoming, indeed it is understand that correspondence has been provided by the landowner in response to the latest consultation exercise from a local commercial agent which demonstrates exactly this point. There is therefore no reason not to place significant weight to the benefit of the economic aspect of the scheme.
134. A section 106 agreement has been concluded providing for affordable housing education, public open space and transportation.
135. Given there are no identified harms that could significantly and demonstrably outweigh the benefits of this scheme, the Inspector is respectfully invited to recommend to the Secretary to (finally) allow the appeal and to grant permission to these applications which propose a sustainable form of development in the context of clear evidence of need.

---

## The case for the Council

### The Starting Point

136. The starting point for any decision in the present case is, of course, section 38(6) of the 2004 Act. This requires assessment of whether the proposed development accords with the Development Plan.

137. The Development Plan consists of:

- a. Saved Policies of the Crewe and Nantwich Plan 2011;
- b. The Stapeley and Batherton Neighbourhood Plan adopted in February 2018; and
- c. The Cheshire East Local Plan Strategy 2017 ("the CELPS").

138. The CELPS was, of course, only adopted in July 2017 and sets out the strategy to meet the needs of this area including housing needs. The Examination Inspector concluded:

"I consider the Overall Development Strategy for Cheshire East, including the provision for housing and employment land, is soundly based, effective, deliverable, appropriate, locally distinctive and justified by robust, proportionate and credible evidence, and is positively prepared and consistent with national policy." (Examination Inspector's Report p21 para 78)

139. In reaching that conclusion the Examination Inspector considered a wide range of objections including a number presented by housing developers and their advisors. They raised wide-ranging concerns including those relating to:

- a. Lead-in times; and
- b. Deliverability of sites.

140. After a lengthy and detailed consideration of those concerns and after considering the views of all stakeholders in the Local Plan process, the Examination Inspector rejected them. He concluded that:

"CEC has undertaken much detailed work in establishing the timescales and delivery of these sites, including setting out the methodology for assessing build rates and lead-in times, using developers' information where available and responding to specific concerns [PS/B037]. Although there may be some slippage or advancement in some cases, I am satisfied that, in overall terms, there are no fundamental constraints which would delay, defer or prevent the implementation of the overall housing strategy...

I am satisfied that CEC has undertaken a robust, comprehensive and proportionate assessment of the delivery of its housing land supply, which confirms a future 5-year supply of around 5.3 years." (Examination Inspector's Report p19 para 69)

---

### Subsequent appeal decisions

141. Since then matters have moved on. The Council has been party to a number of planning appeals not least those relating to Sites at White Moss and at Willaston. The Inspector's in those appeals reviewed the evidence presented to them and concluded that there was a range of realistic views. That range, they said, straddled the five-year housing land boundary.
142. They then both adopted what they described as a precautionary approach. We submit that there is no policy guidance which supports this. There is nothing in the NPPF or the NPPG that indicates that where the realistic range of deliverable sites falls either side of the five-year supply line the decision maker should assume that there is no five-year housing land supply.
143. The Inspectors in these decisions both dismissed the appeals and refused to grant planning permission. As a result, the Council was not a person aggrieved and could not challenge the lawfulness of the approach adopted to five year housing land supply issues.

### A Precautionary Approach is Unlawful

144. In the Claim relating to the Shavington Appeal, the Council contends that the adoption of a precautionary approach is unlawful. The reasons why are set out in the Statement of Facts and Grounds but are summarised below.
145. Paragraph 14 of the NPPF explains that the presumption in favour of sustainable development means for decision taking:

"where the development plan is absent, silent or relevant policies are out-of-date, granting permission unless:

- any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole; or
- specific policies in this Framework indicate development should be restricted."

146. Thus, in order to apply the tilted balance, a decision maker must conclude that the development plan is absent, silent or relevant policies are out of date.
147. As Lord Carnwath explained in *Hopkins Homes v Secretary of State for Communities and Local Government* [2017] 1 W.L.R. 1865 at paragraph 59:

"The important question is not how to define individual policies, but whether the result is a five-year supply in accordance with the objectives set by paragraph 47. If there is a failure in that respect, it matters not whether the failure is because of the inadequacies of the policies specifically concerned with housing provision, or because of the over-restrictive nature of other non-housing policies. The shortfall is enough to trigger the operation of the second part of paragraph 14. As the Court of

---

Appeal recognised, it is that paragraph, not paragraph 49, which provides the substantive advice by reference to which the development plan policies and other material considerations relevant to the application are expected to be assessed”.

148. It is submitted that, as a result of the words of paragraph 14 and **Hopkins Homes**, in order to apply the tilted balance, the decision maker has to determine that relevant policies in the development plan are out of date. In order to do that by reference to five-year housing land supply considerations, a decision maker must conclude that there is currently no five-year housing land supply of specific deliverable sites.

### **Determining Deliverability**

149. The decision in *St Modwen Developments Ltd. v Secretary of State for Communities and Local Government* [2017] EWCA Civ 1643 was delivered by the Court of Appeal on the 20<sup>th</sup> October 2017. It provides significant clarification as to the approach to adopt to the consideration of what is meant by a deliverable site within the NPPF.
150. Paragraph 47 of the NPPF provides that local planning authorities are to “identify and update annually a supply of specific deliverable sites sufficient to provide five-years’ worth of housing against their housing requirements...”
151. Footnote 11 of the NPPF then explains what a “specific deliverable site” is as follows:

“To be considered deliverable, sites should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years and in particular that development of the site is viable. Sites with planning permission should be considered deliverable until permission expires, **unless there is clear evidence that schemes will not be implemented within five years**, for example they will not be viable, there is no longer a demand for the type of units or sites have long term phasing plans.”

152. Further guidance is provided in the National Planning Practice Guidance:

“What constitutes a ‘deliverable site’ in the context of housing policy?

**Deliverable sites for housing could include those that are allocated for housing in the development plan and sites with planning permission (outline or full that have not been implemented) unless there is clear evidence that schemes will not be implemented within 5 years.**

However, planning permission or allocation in a development plan is not a prerequisite for a site being deliverable in terms of the 5-year supply.

**Local planning authorities will need to provide robust, up to date evidence to support the deliverability of sites, ensuring that their judgements on deliverability are clearly and transparently set out.**

---

If there are no significant constraints (eg infrastructure) to overcome such as infrastructure sites not allocated within a development plan or without planning permission can be considered capable of being delivered within a 5-year timeframe”.

153. The size of sites will also be an important factor in identifying whether a housing site is deliverable within the first 5 years. **Plan makers will need to consider the time it will take to commence development on site and build out rates to ensure a robust 5-year housing supply.**” (emphasis added)

154. In **St Modwen**, Lindblom LJ explained at paragraph 38:

“The first part of the definition in footnote 11 – amplified in paragraphs 3-029, 3-031 and 3-033 of the PPG – contains four elements: first, that the sites in question should be “available now”; second, that they should “offer a suitable location for development now”; third, that they should be “achievable with a realistic prospect that housing will be delivered on the site within five years”; and fourth, that “development of the site is viable” (my emphasis). Each of these considerations goes to a site’s capability of being delivered within five years: not to the certainty, or – as Mr Young submitted – the probability, that it actually will be. The second part of the definition refers to “[sites] with planning permission”. This clearly implies that, to be considered deliverable and included within the five-year supply, a site does not necessarily have to have planning permission already granted for housing development on it. The use of the words “realistic prospect” in the footnote 11 definition mirrors the use of the same words in the second bullet point in paragraph 47 in connection with the requirement for a 20% buffer to be added where there has been “a record of persistent under delivery of housing”. Sites may be included in the five-year supply if the likelihood of housing being delivered on them within the five-year period is no greater than a “realistic prospect” – the third element of the definition in footnote 11 (my emphasis). This does not mean that for a site properly to be regarded as “deliverable” it must necessarily be certain or probable that housing will in fact be delivered upon it, or delivered to the fullest extent possible, within five years.”

155. Thus, to be included in the supply side of the five-year housing land assessment, a site needs to be one where there is a realistic prospect of housing coming forward within the 5 year period. Lindblom LJ then went on to contrast that approach with the approach required in produce a housing trajectory “of the expected rate of delivery”:

“One must keep in mind here the different considerations that apply to development control decision-making on the one hand and plan-making and monitoring on the other. The production of the “housing trajectory” referred to in the fourth bullet point of paragraph 47 is an exercise required in the course of the preparation of a local plan, and will assist the local planning authority in monitoring the delivery of housing against the plan strategy; it is described as “a housing trajectory for the plan period” (my emphasis). Likewise, the “housing implementation strategy” referred to in the same bullet point, whose purpose is to describe how the local

---

planning authority "will maintain delivery of a five-year supply of housing land to meet their housing target" is a strategy that will inform the preparation of a plan. The policy in paragraph 49 is a development control policy. It guides the decision-maker in the handling of local plan policies when determining an application for planning permission, warning of the potential consequences under paragraph 14 of the NPPF if relevant policies of the development plan are out-of-date. And it does so against the requirement that the local planning authority must be able to "demonstrate a five-year supply of deliverable housing sites", not against the requirement that the authority must "illustrate the expected rate of housing delivery through a housing trajectory for the plan period".

156. Thus, a housing trajectory is undertaking a different task from the exercise that must be undertaken when looking at deliverable sites for purposes of a 5 year housing land supply assessment.

157. *St Modwen* has been applied in an important Inspector's decision in the East Riding of Yorkshire. In that decision an Inspector, in the light of *St Modwen* explained:

"the decision maker has to have clear evidence to show that there is not simply doubt or improbability but rather no realistic prospect that the sites could come forward within the 5-year period."<sup>21</sup>

158. Accordingly, *St Modwen* clarifies that the test to be applied to sites with planning permission or which are allocated is whether there is clear evidence to show that there is no realistic prospect that a site would come forward (see footnote 11 and the NPPG guidance set out above).

159. Assuming that both the Inspectors in the White Moss and Willaston appeals applied to the correct approach to identifying the realistic number of units that sites are capable of delivering over 5 years, there appears to be no basis for asserting that sites are incapable of delivering at the top of the range. i.e. the top of the range must be realistic since it is included in a range which sought to identify what sites were capable of delivering on that basis. It follows necessarily that the White Moss and Willaston Inspectors both reached a conclusion which must mean that a five-year housing land supply of specific deliverable sites was demonstrated.

160. *The Framework* does not state anywhere that a precautionary approach to the identification of a 5 year housing land supply is to be applied. Such a proposition cannot be inferred from the indication that the policy intention is to significantly boost supply since that intention is fulfilled by the inclusion of a 20% buffer in the housing requirement.

161. It is submitted that the application of a precautionary approach was thus unwarranted on the basis of the policy set out in the Framework and unjustified on the evidence. It is submitted that to adopt the same approach

---

<sup>21</sup> Appeal Ref: APP/E2001/W/16/3165930 Land north and east of Mayfields, The Balk, Pocklington, East Riding of Yorkshire YO42 1UJ paragraph 12)

---

as the Inspectors in the White Moss, Willaston and Shavington decisions would be to err in law.

162. Instead, what must be undertaken is an appraisal of the sites at issue on the basis identified in St Modwen. Where the site has planning permission or is allocated then the approach that the Council has adopted (which was accepted by the Examination Inspector) should be accepted unless the Appellant has proven that there is no realistic prospect that the site would come forward.

### **Robust Evidence**

163. The Inspector in the Willaston appeal also made another material error and this too was adopted by the Shavington Inspector. He adopted the position that the local planning authority had to present "robust and up to date" evidence as to the likely contribution that a particular site would make to five-year housing land supply. This was based upon a misreading of the NPPG and a failure to apply the words in the Framework.
164. Footnote 11 and the NPPG make it clear that sites which have planning permission or are allocated are to be included in the 5 year supply unless there is clear evidence that there is no realistic prospect that they be implemented within 5 years. The emphasis is on realism. Thus, a different approach to that adopted by a local planning authority can be adopted when there is clear evidence that the Council's approach to sites with planning permission or with an allocation is unrealistic (see the East Riding of Yorkshire case).
165. The part of the NPPG that the Willaston Inspector relied upon as the foundation of his test for "robust and up to date evidence" is not dealing with sites with planning permission or with an allocation as Mr Wedderburn properly accepted in XX – if it were it would contradict the approach set out in the previous earlier paragraph in the NPPG and also footnote 11 of the Framework. Accordingly, the Willaston Inspector approached the sites on the basis that the Council had to adduce robust and up to date evidence to justify its approach to sites with planning permission and/or which were allocated when this was not the case.
166. The Appellants would have you reject all of the above in favour of an approach that there is some two tiered test:
- Whether a Site is specifically deliverable – the Appellant appears to content that the test of whether a Site would realistically contribute to the 5 year housing land supply position is to be applied here simply to identify the pool of sites examined in the second test.
  - If so, the Appellant contends that the second test is what is the likely number of units a site will contribute to housing land supply within the five-year period.

---

You and the SofS would err in law if you were to accept this position since it is found upon a grievous misinterpretation of National Planning Policy.

167. Mr Wedderburn in his evidence described the second-tier test as “the more central issue” in housing land supply cases (see Wedderburn p26 footnote 19). He adopted the position that the evidence to support the yield produced by a local planning authority has to be robust and up date.
168. The first point to note is that Mr Wedderburn was totally unable to identify where his second-tier test was addressed in National Planning Policy. If the approach really were “the more central issue” and really did form part of National Planning Policy in such an important area it is submitted that it would be set out in the Framework; it is not and Mr Wedderburn accepted that it is not. It must be remembered that the guidance in the NPPG is just that; the NPPG does not contain planning policy and must not be applied as if it does.
169. The second point is that the Appellant’s approach is totally logically inconsistent.
170. It applies the same test to sites with planning permission and with an allocation as those without either. This conflicts with the Framework which makes it plain that the evidential burden in relation to sites with planning permission and which are allocated is reversed – they are included unless there is no realistic prospect of them coming forward.
171. It is not logical to include a site with planning permission/allocation if there is not clear evidence that it will not be implemented only to then apply a test which requires robust and up-to-date evidence to prove it will actually yield any development.
172. If that were the intent of Policy, there would only be a need for a single test namely, is there robust and up-to-date evidence that a site will yield housing within the 5 year period. However this is not what the Framework actually says.
173. Indeed, as can be seen from the analysis above, to apply the Appellant’s approach thus subverts the intent of the Framework and footnote 11 – it renders the presumption specifically contemplated by Policy in respect of deliverability of housing from sites with planning permission/allocation wholly otiose.
174. The third point is to have in mind why the Framework would include such a presumption in the first place. The answer is obvious. It is included in order to reduce the scope for debate in determining five-year housing land supply in relation to Sites with planning permission/allocation. The adoption of the Appellant’s approach would have precisely the opposite consequence. It would mean that the yield from every single site (whether one with planning permission/allocation or not) would have to prove in every single case. The administrative burden that this would create for local planning authorities

---

and the Inspectorate cannot be underestimated and cannot have been the intention behind the Framework.

175. The only approach to sites with planning permission/allocation which is consistent with the words of the NPPF, St Modwen and the NPPG is that presented by the Council in this Appeal, namely is there clear evidence that there is no reasonable prospect of the yield identified by the local planning authority being delivered.
176. Mr Wedderburn's assessment of the likely contribution of sites is thus flawed since he applied an incorrect test based upon a fundamental misunderstanding of National Planning Policy. His site appraisal conclusion must therefore be rejected; at the very least his appraisal of individual sites must be approached with great caution lest one draws conclusions similarly contaminated by an error of law.

### **Additional Evidence**

177. A further difference in the present appeal to previous appeals has been the fact that Mr Fisher has produced evidence which was not available to the previous Inspectors. In particular the material produced to the CELPS Inspector has been produced and further and updated evidence has been given in relation to specific sites.
178. It is submitted that, as a result of all of the matters above, the Secretary of State is entirely free to reach a different conclusion of five-year housing land supply to that reached by his Inspectors in recent months. Indeed, the Council submits that, if the appraisal of sites undertaken by the White Moss and/or Willaston Inspectors were accepted given that the top end of the range must be taken to be a realistic figure, the only conclusion, once their error regarding a precautionary approach is jettisoned, must be that they should have concluded that there is a five-year supply of housing sites.

## **THE CONFLICT WITH THE DEVELOPMENT PLAN**

### **Policy PG6 of the CELPS**

Policy RES5 of the CNLP and Policy PG6 both seek to restrict housing in the "open countryside".

179. Policy PG6 defines the Open Countryside as the area outside of any settlement with a defined settlement boundary. The Appeal scheme lies outside of the settlement boundary and is within the Open Countryside.
180. Policy PG6 provides that within the Open Countryside only development that is essential for the purposes of agriculture, forestry, outdoor recreation, public infrastructure, essential works undertaken by public service authorities or statutory undertakers, or for other uses appropriate to a rural area will be permitted. The appeal scheme does not fall within this paragraph.

---

181. PG6 also goes on to reference to a number of exceptions that might enable development in the open countryside to proceed. None apply to the proposed development. The Appeal scheme is thus contrary to Policy PG6.

182. In considering Policy PG6 (Although it was then referred to as Policy PG5), the Examination Inspector explained:

“Policy PG5 seeks to provide for development required for local needs in the open countryside to help promote a strong rural economy, balanced with the need for sustainable patterns of development and recognising that most development will be focused on the main urban areas. The “open countryside” is defined as the area outside any settlement with a defined settlement boundary; a footnote confirms that such boundaries will be defined in the SADPDPD, but until then, settlement boundaries defined in the existing local plans will be used, as now listed in Table 8.2a. Issues about the detailed extent of specific settlement boundaries can be addressed in the SADPDPD. This is an appropriate and effective approach, given the strategic nature of the CELPS. ” (Examination Inspector’s Report p28 para 111)

He concluded:

“Consequently, with the recommended modifications, the approach to the Green Belt, Safeguarded Land, Strategic Green Gaps and the Open Countryside is appropriate, effective, positively prepared, justified, soundly based and consistent with national policy.” (Examination Inspector’s Report p29 para 113)

### **Policy RES.5 of the CNLP**

183. Policy RES.5 of the CNLP is the sister policy to PG6. It provides:

“Outside settlement boundaries all land will be treated as Open countryside. New dwellings will be restricted to those that:

- A) meet the criteria for infilling contained in policy NE.2; or
- B) are required for a person engaged full time in Agriculture or forestry, in which case permission will not be given unless...”

The Policy then lists a series of exceptions.

184. The proposed development is located in the “open countryside” as defined for this policy also. It does not fall within Part A (i.e. it is not infilling as referred to in Policy NE.2) and it does not fall within Part B. the proposed development is then contrary to Policy RES.5 of the CNLP.

185. Although not considered by the Examination Inspector, the policy approach set out in RES.5 is wholly consistent with the approach in PG6 that he found to be “appropriate, effective, positively prepared, justified, soundly based and consistent with national policy”

---

## **Policies PG2 of CELPS**

186. Policy PG2 defines the settlement hierarchy of the newly adopted CELPS. It creates four tiers. Nantwich lies within the Key Service Centres tier in respect of which Policy PG2 states:

“In the Key Service Centres, development of a scale, location and nature that recognises and reinforces the distinctiveness of each individual town will be supported to maintain their vitality and viability.”

187. The Examination Inspector explained at paragraph 79:

“This settlement hierarchy recognises the size, scale and function of the various towns, as well as their future role in the development strategy. In my earlier Interim Views (Appendix 1), I considered the proposed settlement hierarchy is appropriate, justified and soundly based, and no new evidence has been put forward since then to justify any further changes to the settlement hierarchy as set out in Policy PG2.”

188. At paragraph 82 of his report the Examination Inspector concluded:

“the Settlement Hierarchy and Visions for each town and settlement are appropriate, effective, locally distinctive, justified and soundly based, and are positively prepared and consistent with national policy.”

## **Policy PG7 of CELPS**

189. Policy PG2 needs to be read alongside Policy PG7 of the CELPS which defines the spatial distribution anticipated by the CELPS. Whilst the nature of settlements in Cheshire East is diverse, each with different needs and constraints, Policy PG7 sets indicative levels of development by settlement. These figures are intended as a guide and are expressly neither a ceiling nor a target. The explanatory text explains that provision will be made to allocate sufficient new sites in each area to facilitate the levels of development set out in the policy.

190. The explanatory text to Policy PG7 (paragraph 8.75) makes clear that the distribution of development between the various towns of the borough is informed by the Spatial Distribution Update Report. This has taken into account a large number of considerations including Settlement Hierarchy, various consultation stages including the Town Strategies, Development Strategy and Emerging Policy Principles, Green Belt designations, known development opportunities including the Strategic Housing Land Availability Assessment, Infrastructure capacity, Environmental constraints, Broad sustainable distribution of development requirements.

191. Indeed, the distribution also takes into account the core planning principles set out in the Framework, which states that planning should take account of the varied roles and character of different areas, and actively manage patterns of growth to make the fullest possible use of public transport,

---

walking and cycling and focus significant development in locations that are or can be made sustainable.

192. The Examination Inspector considered Policy PG7 (then known as Policy PG6) and explained that it is

“a key policy setting-out the spatial distribution and scale of proposed development at the Principal Towns, Key Service Centres, Local Service Centres and Other Settlements & Rural Areas. In my Further Interim Views (Appendix 2), **I considered that the revised spatial distribution of development represents a realistic, rational and soundly-based starting point for the spatial distribution of development; it is justified by a proportionate evidence base and takes account of the relevant factors, including the crucial importance of the Green Belt and the outcome of other studies undertaken during the suspension period. It is also based on sound technical and professional judgements and a balancing exercise, which reflects a comprehensive and coherent understanding of the characteristics, development needs, opportunities and constraints of each settlement.** Since that time, there is no fundamental or compelling new evidence which suggests that these conclusions should be reviewed.” (Examination Inspectors Report para 83 – Emphasis added)

193. The Examination Inspector’s overall conclusion in relation to the Spatial Distribution contained in the CELPS at paragraph 92 of his report was:

“Consequently, with the recommended modification, I conclude that the Spatial Distribution of Development and Growth to the various towns and settlements is **appropriate, effective, sustainable, justified with robust evidence and soundly based, and fully reflects the overall strategy of the Plan.** I deal with specific issues relating to particular settlements on a town-by-town basis, later in my report.” (emphasis added).

194. The text of Policy PG7 explains in respect of Nantwich this level would be in the order of 3 hectares of employment land and 2,050 new homes.

195. Appeal Site A was considered during the plan process as a potential site for meeting this requirement but was rejected. This decision was upheld by the Examination Inspector who concluded that (paragraph 252 Examination Inspector’s Report):

“Some participants argue that more housing development should be allocated to Nantwich, given the absence of other new sites and its close relationship to Crewe. However, Nantwich has seen significant new housing development in the recent past and, with existing commitments and future proposals, is well on the way to meeting its overall apportionment. Further development would almost inevitably involve additional greenfield sites, which could adversely affect the character and setting of the town and the adjoining Strategic Green Gap. The Plan

---

already provides some flexibility in housing provision (6.4%) and no further sites are needed to meet currently identified housing needs.”

196. The result of the adoption of the CELPS is that 2246 units have been allocated over the plan period. In addition, there is currently provision for 4.15 ha of employment land. It follows, as Mr Taylor explain in his evidence (paragraph 6.25), that there is then no requirement to allocate further sites to meet employment or housing needs through the SADPPDP.
197. Thus, the Appeal Scheme would radically and significantly reduce the allocations going forward to meet more local needs elsewhere within the Council’s administrative area in the remaining plan period.
198. The Appeal scheme if permitted would add 189 units and 0.37 ha of employment space to the land already allocated/committed for housing an employment needs. In other words this would lead to housing provision of 18% above the level identified as appropriate in terms of spatial distribution in the CELPS and would add some 10% to the appropriate employment floorspace required resulting in employment provision some 50% above the appropriate requirement.
199. These are very significant levels of unplanned growth. It is so significant that it must necessarily undermine the careful balance between employment growth and housing that forms the basis of the strategy for Nantwich within the CELPS.
200. The only reasonable conclusion is that the proposed development would significantly undermine the settlement hierarchy and spatial distribution set out in the CELPS. It is contrary to Policies PG2 and PG7.

### **Best and Most Versatile Land**

201. Paragraph 112 of the NPPF states:

“Local planning authorities should take into account the economic and other benefits of the best and most versatile agricultural land. Where significant development of agricultural land is demonstrated to be necessary, local planning authorities should seek to use areas of poorer quality land in preference to that of a higher quality.”

202. CELPS Policy SE2 provides that the loss of BMV should be minimised.

203. It is submitted that the policy approach requires consideration of:

- a. Whether there is a need for the development proposed?
- b. If so, has it been demonstrated that development of BMV is “necessary” i.e. that there is no area of poorer quality agricultural land to locate the development upon?

- 
204. The Council submits that, since it has a five-year supply of specifically deliverable housing sites, it cannot be contended that the housing element of the proposed development is needed.
205. So far as the commercial element is concerned, some 0.37 ha of commercial floorspace is proposed. Mr Taylor has explained and was not challenged that 3ha of employment land was identified as required for Nantwich in the CELPS. 4.15 ha is already anticipated to come forward. The grant of Appeal Scheme would mean some 4.52 ha would come forward i.e. 50% provision over and above the CELPS expectation. Mr Downes in XX accepted that he was not contended that there was a local need for additional commercial floorspace in this location.
206. Remarkably, the Appellant is seeking planning permission for some 3600 sq m of commercial floorspace on a greenfield site which includes BMV in the open countryside without any justification whatsoever.
207. It follows that it has not been established that the proposed development is needed.
208. Even if this is rejected, however, the next stage in applying policy is to ask whether it has been established that the development could not be accommodated on poorer quality agricultural land.
209. The Appellant, as Mr Downes confirmed in XX, has presented no evidence on this point. There has been no study undertaken. No assessment has been made. In short, no attempt whatsoever to show that the development could not be accommodated elsewhere on poorer quality agricultural land.
210. This is particularly important in respect of the commercial element of the proposed development; there has been no attempt to examine whether that could be provided on poorer quality agricultural land within the Borough.
211. It is submitted that as a result of the above it has not been established that it is necessary to develop the BMV that would be permanently lost to the proposed development. Nor that development needs could not be met by utilising poorer quality agricultural land.
212. The proposed development is contrary to paragraph 112 of the NPPF and to Policy SE2 of the CELPS.

### **Neighbourhood Plan**

213. The most recently adopted element of the statutory development plan is the Stapeley and Batherton Neighbourhood Plan adopted in February 2018.
214. Policy GS1 can only be sensibly construed as preventing development in the open countryside unless it falls within the exceptions delineated in paragraphs (a) to (i). The proposed development does not fall within any of those paragraphs as an exception. Accordingly, it is contrary to the Stapeley and Batherton Neighbourhood Plan.

---

215. In terms of housing, the Neighbourhood Plan sets out in policy H1 and H2 the kinds of housing that accords with the Plan. The proposed development does not fall within the scope of the development that is supported and is thus contrary to these policies.

216. There was an attempt to suggest that the proposed development accords with Policy H5. This policy provides:

“Subject to the provisions of other policies in the Neighbourhood Plan, the focus for development will be on sites within or immediately adjacent to the Nantwich Settlement Boundary, with the aim of enhancing its role as a sustainable settlement whilst protecting the surrounding countryside.

Outside the settlement boundary any development is subject to the Cheshire East Local Plan Strategy Countryside Policy PG 6 and other relevant policies of this Plan.”

217. The proposed development is outside the settlement boundary. As such as Policy H5 provides it is subject to Policy PG6 and “other relevant policies of this Plan”. Since there is conflict with Policies GS1, H1 and H2 of the Neighbourhood Plan then the proposed development cannot accord with Policy H5 either.

## **THE WEIGHT TO BE GIVEN TO THE CONFLICT WITH POLICY**

218. Mr Downes properly accepted that the overall aims and objectives of these policies are broadly consistent with the aims and objectives of the Framework (Taylor p17 para 5.3). Indeed, given the conclusions of the Examination Inspector he could hardly do otherwise.

219. Nevertheless, it appears to be the Appellant’s case that, notwithstanding the adoption of the CELPS only last year and the Neighbourhood Plan only a few weeks ago, the policies addressed above should all be given “very limited weight” (see Downes XX and Taylor Proof p 18 para 5.6). This is a remarkably brave contention.

220. In summary, the Appellant contends that:

- a. the Council cannot demonstrate that it has a 5-year housing land supply of deliverable sites;
- b. the settlement boundary must flex in order to bring sites forward in order to provide a 5-year housing land supply of deliverable sites;
- c. the settlement hierarchy similarly must flex in order to enable sites to come forward to provide a 5-year housing land supply of deliverable sites;
- d. Accordingly, in order to meet 5-year housing land supply needs these policies must be given very little weight so that the appeal scheme

---

can come forward to assist in providing the 5-year housing land supply which is required.

### **A 5 Year Housing Land Supply**

221. As already outline above, the Examination Inspector considered a wide range of evidence on housing land supply from numerous parties. This included points raised relating to the methodology used in relation to build out rates and lead in times.

222. Mr Fisher explained to the Inquiry the work undertaken to inform the Examination on these issues. The Council has looked at every application over a 10 year period, looking at thousands of sites. Further, in terms of delivery, the Council had contacted and obtained information from the land owners/developers of all of the strategic sites.

223. The Examination Inspector explained at paragraph 65:

"Housing land supply was not covered in my earlier Interim Views, since the latest figures and assessments were not available. This issue was discussed regularly throughout the examination hearings, with developers, housebuilders and local communities challenging the deliverability of specific sites, particularly the larger strategic sites. **By the end of the hearings, CEC had undertaken a considerable amount of work to establish the timescale and deliverability of its housing land, including those strategic sites proposed in the CELPS-PC.**" (emphasis added)

224. In this same vein, the Inspector continued at paragraph 69:

**"CEC has undertaken much detailed work in establishing the timescales and delivery of these sites, including setting out the methodology for assessing build rates and lead-in times, using developers' information where available and responding to specific concerns [PS/B037]. Although there may be some slippage or advancement in some cases, I am satisfied that, in overall terms, there are no fundamental constraints which would delay, defer or prevent the implementation of the overall housing strategy.** The monitoring framework also includes specific indicators related to housing supply with triggers to indicate the need for review. I deal with site-specific issues later in my report on a town-by-town basis. On the basis of the evidence currently available, **I am satisfied that CEC has undertaken a robust, comprehensive and proportionate assessment of the delivery of its housing land supply, which confirms a future 5-year supply of around 5.3 years.**" (emphasis added)

225. It is very important to note that the Appellant in the present case has not contended that any of the triggers in the monitoring framework referred to by the Inspector are engaged.

226. At paragraph 76 the Examination Report, the Inspector concluded:

---

"On the basis of the evidence before me, I conclude that the CELPS-PC, as updated and amended, would provide a realistic, deliverable and effective supply of housing land, to fully meet the objectively assessed housing requirement, with enough flexibility to ensure that the housing strategy is successfully implemented. Similarly, CEC should be able to demonstrate that there is at least a 5-year supply of housing land when the CELPS is adopted."

227. He concluded in terms that the provision for housing and employment land within the CELPS including the 5-year housing land supply position "is soundly based, effective, deliverable, appropriate, locally distinctive and justified by robust, proportionate and credible evidence, and is positively prepared and consistent with national policy." (Examination Inspector's Report p21 para 78)

### **The Inspector's Decisions**

228. The approach adopted in the White Moss, Willaston and Shavington decisions was wrong in law for reasons set out above. The approach set out in those decisions must not be followed in this one. The proper approach is:

- a. In respect of sites with planning permission/allocation is to ask whether there is clear evidence that there is no realistic prospect of the Site delivering housing as assessed by the Council;
- b. In respect of sites without planning permission/allocation is to ask whether there is robust and up to date evidence that there is a realistic prospect of the Site delivering housing as assessed by the Council.

229. It is also submitted that there is no policy requirement for the Council to demonstrate that it has a "robust" five-year housing land supply. Nor is there any policy requirement that a "precautionary approach" should be adopted to five-year housing land supply considerations.

### **The Housing Monitoring Update August 2017**

230. The Council's Housing Monitoring Update August 2017 sets out in detail a re-appraisal of the position. The Housing Monitoring Update which shifts the base date to 31 March 2017 utilises the same methodology employed in the CELPS Examination process. This methodology was described by the Examination Inspector as resulting in a "robust, comprehensive and proportionate assessment" housing delivery (Examination Inspector's Report p19 para 69).

231. The HMU reveals that completions have increased to a level more than double that delivered in 2013/14 and for the fourth year in a row. In addition, there has been a net increase in commitments of some 3157 units compared to the position in March 2016 – a 19% increase on the position in March 2016. Indeed, the level of planning permissions granted/resolutions to approve in the last 12 months stands at 5269 units. Thus, not only have completions increased since March 2016 but also the pool of planning

---

permissions to enable additional housing to come forward has increased very substantially.

232. It is submitted that this demonstrates that the pool of deliverable sites has increased since March 2016 and not decreased as the Appellant contends.

### **The Appellant's Case on Housing Land Supply**

233. The 'big picture issues' between the parties are as follows.

#### **Backlog**

234. Mr Wedderburn contended that the "Sedgpool 8" method of addressing backlog adopted by the Council and accepted by the Examination Inspector is to be applied so that the period it relates to shrinks year on year i.e. in the second year it is to be applied to a 7 year period in the third a six year period and so on until it shrinks to no period at all.

235. Mr Wedderburn has got this badly wrong. It is well established that the Sedgfield approach to backlog is a rolling approach and there is no reason not to apply this approach to the backlog in Cheshire East. He produced no appeal decision which supported the approach of a gradually shrinking period over which backlog should be applied.

236. Further and more significantly, Mr Wedderburn's point was taken and rejected in the Willaston appeal where the Inspector concluded (document D30 para 45):

"The Sedgpool 8 method was agreed by the examining Inspector for the CELPS on the basis that the backlog would be met within the next 8 years of the plan period from 1 April 2016. I note the appellant's concern that applying Sedgpool 8 from April 2017 effectively rolls the backlog forward another year. However, the CELPS Inspector agreed to vary the Sedgfield method because delivering the backlog over 5 years in Cheshire East would result in an unrealistic and undeliverable annual housing requirement. Dealing with a shortfall in housing delivery since the start of the plan period is a rolling requirement in the calculation of the 5 year housing requirement at any point in the plan period. The Council has factored the backlog for 2016-17 into the calculation of the current 5 year requirement. It would be unreasonable at such an early stage in the life of the new CELPS to depart from the Sedgpool 8 approach, given the basis for it in Cheshire East. To do so would in effect impose a further variant of the Sedgfield and Liverpool methods outside of the local plan examination process."

237. The Council submits that there has been no relevant change in circumstances since that decision. It continues to be unreasonable to adopt a different approach outside of the Plan process. The Appellant's case in this regard must be rejected.

---

## Build Rates

238. Mr Wedderburn's position accepted the build rates on sites adopted by the Council (which reflected the approach accepted by the Examination inspector) other than on larger sites. On these larger sites he explained that he only accepted a 50 dpa yield where there is specific evidence to show that two builders would be on-site. In other words, he relies upon an absence of evidence to prove there would be two builders on site rather than any assessment of the realism of the assertion that two builders on site would not be realistic.
239. This is a perfect example of an approach at odds with the Policy position in the Framework. The policy compliant approach (as set out above) in relation to sites with planning permission/allocation is to ask whether there is clear evidence that there is no realistic prospect of two builders on site. Mr Wedderburn produced no evidence on this whatsoever.
240. Indeed, it is entirely unclear what evidence he would accept. For example, in relation to his approach to site LPS4 he explained that evidence from site promoters cannot be relied upon. If the evidence of the likely manner of build out of a site from those promoting a site cannot be relied upon, it is difficult to see how a local planning authority could evidence justify an assumption that two builders would actually come forward.
241. The evidence presented by Mr Fisher (rebuttal p13 table below paragraph 68), however, was that in practice the build rate is frequently significantly higher than the Council's methodology assumed in many cases by a factor of more than 100%. Even a small increase in the build rate over all of say 10% would produce an increase of supply of 1295. It cannot be said that there is no prospect of an increase in overall build rate of 10% or more than the Council has assumed.
242. It is submitted that Mr Wedderburn's evidence on this issue should be rejected. Only where there is specific evidence that there is no reasonable prospect of a large site being developed out by two builders should an assumption of anything less than 50 dpa be adopted.

## Lead-In Times

243. Mr Wedderburn also attacked the Council's approach to examining sites by reference to a study of lead-in times he had undertaken. This examined some 70 sites through the planning process (see his appendix MW6). He then applied timings for various stages of the planning process to sites in the future i.e. he applied timings from the past and assumed they would be comparable in the future; his approach is flawed.
244. Firstly, 20 sites out of his 70 (29%) were sites which obtained planning permission on appeal. That was because prior to the adoption of the CELPS there were considerable issues relating to the principle of development on sites within Cheshire East. This gave rise to much argument, many appeals and many delays.

- 
245. With the adoption of CELPS, the basis for these in principle arguments has been removed. The whole point of adopting a Local Plan is, after all, to provide a reliable basis for decision making which minimises scope of in principle disagreement. Indeed, Mr Wedderburn accepted in XX that he would not expect the same proportion of appeals going forward as had been experienced in his sample of sites.
246. As Mr Fisher explained in his rebuttal evidence (page 7 paragraph 35), the circumstances are very different now. Virtually all sites in the supply are either committed or are allocated. Accordingly, the number of appeals has also reduced – with no further residential inquiries programmed after the current one. Further, Local plan adoption not only resolves the principle of development (a major stumbling block previously – hence the number of appeals) – but it also assists in agreement on matters of detail (education, highways, landscaping etc) as all now relate to clear adopted policies. Added to this the Council has also adopted SPD on design guidance (May 2017), which again makes the position on detailed layouts clearer. In addition, the s106 process is assisted since the planning obligations are now linked to adopted policies (e.g affordable housing).
247. These are all reasons why the timing adopted in the past in relation to particular stages of the planning process are unlikely to be continued in the future. Thus, pointing to the past, as Mr Wedderburn has, does not establish that the approach adopted by the Council to lead in times is clearly unrealistic.
248. Indeed, they cannot be viewed as such given that the lead-in times utilised in the Council's evidence were accepted by the Examination Inspector as appropriate. That Inspector has the evidence now present in the present appeal and had the benefit of representations from all stakeholders, not just Mr Wedderburn. The lead-in times presented were the product of discussion with those stakeholders. In confirming that the lead-in times utilised were appropriate the Examination Inspector would have been aware of the points relating to the effect of adoption of CELPS and timings.
249. To reject the lead-in times adopted by the statutory plan process via the s78 appeal process is a radical step. It wholly undermines the basis on which the CELPS housing land supply was calculated and found sound. In other words, it undermines the strategic basis for the CELPS at its core. It would leave the man in street wondering how a Local Plan can be sound one month and then some 9 months later be found to have been adopted on a basis which can no longer be supported. What a colossal waste of public resources it would be to have promoted a Plan which is then effectively jettisoned less than a year later?
250. It is submitted that great care needs to be taken to ensure that such a significant step is not taken lightly or else it will bring national planning policy and the planning system as a whole into disrepute. It must only be a rare case indeed, when a methodology accepted at Examination a few months before is deemed inappropriate a few months later only on the basis of the sort of generalised evidence presented by Mr Wedderburn. The time for consideration of that generalised evidence was in pursuit of objection to the

---

CELPS at Examination when all stakeholders involved could have their views aired and considered and not subsequently in a s78 appeal where other stakeholders views are not provided.

251. But of course, unlike Mr Wedderburn, the Council's appraisal is not simply reliant upon the application of generic time periods from a study of 70 sites in the past.
252. Mr Fisher set out in his evidence an exercise which sought to look at the lessons to be learned from recent post adoption data. He analysed major applications that commenced between 1 April and 31 December 2017. He considered that he had obtained a decent but not comprehensive sample of what is currently taking place.
253. His evidence showed that for the 16 Major developments that have started by Q3 of 2017/18 the median timeline between the date of detailed consent and the start of construction is 0.43 years – or just over 5 months. A similar picture applies to both larger and smaller developments. For those applications that featured an outline the median timeline between the date of outline consent and the start of work is 1.47 years. Once again, the picture is similar for both larger and smaller applications. This data is set out in Appendix 2 to Mr Fisher's rebuttal.
254. The most up to date information reinforces the timelines employed in the standard methodology and demonstrates that sites can commence and deliver initial units within relatively short timescales. Whilst not every site may deliver in this way, those starting in 2017/18 follow this pattern.
255. The data also reveals that of the sites of 100 units or more, 44% of sites have started ahead of the timescales in the HMU. It is submitted that this illustrates the reasonableness of the Council's approach and that sites are not only capable of meeting the timescale in that approach but also of improving upon them. It is submitted that this provides a good indicator of what will happen in future. It demonstrates that sites are fully capable of delivering to the timescales anticipated by the Council and that those timescales are realistic.
256. A further and important point to note from Mr Fisher's analysis of this data is that full applications (as opposed to reserved matters) were made on more than 50% of the sites. This includes half of the sites over 100 units. This shows that on allocated sites, companies are willing to use the greater certainty that the development plan provides to proceed straight to a detailed application.
257. By contrast Mr Wedderburn confirmed in XX that he had assumed that all sites without planning permission would come forward as outline applications. The evidence that Mr Fisher has adduced demonstrates that this assumption is not realistic. As a result timescales are applied to sites on a basis that an outline planning permission will be obtained when the evidence shows that for a large proportion that will not be the case. The result is that Mr Wedderburn's approach is seriously unrealistic.

- 
258. Further, the Council has relied upon site specific evidence and has specifically contacted site owners and promoters. Such site-specific evidence must constitute better evidence than the generalised approach of Mr Wedderburn.
259. In particular, there may be a number of site specific reasons why a site would come forward faster or slower. In looking at the position, it is submitted that site owners/promoters must be in the best position to advise on a number of factors including, the likely phasing and thus timing of reserved matters applications since phasing is often tied to funding issues. They have knowledge of timing issues arising out option agreements which no other party knows and which can include the need for certain stages to be met by certain dates. They also have access information relating to construction including implications for financing, and labour supply and materials.
260. These are all matters known by site owners/promoters and no-one else. Yet Mr Wedderburn's approach was to ignore this. He negated all of this by asserting that statements by promoters were not reliable. Admittedly caution has to be applied to statements made prior to the adoption of a Local Plan which allocates sites, since there may be a desire for some to present a rosier picture of deliverability of their site in order to secure allocation. Indeed, this point is crucial because it undermines any reliability in the exercise conducted by Mr Wedderburn (his rebuttal page 5 paragraph 4.7) looking at outturn against comments. The comments he examined were all made prior to the adoption of the CELPS and the allocation of the sites concerned.
261. It is the case, however, that after allocation that motivation is simply removed. Indeed, Mr Wedderburn struggled to identify why post allocation a site owner/promotor would make unreliable statements regarding the yield of units from their site in XX.
262. All of these matters point to a single conclusion; there is no basis for accepting that there is clear evidence that there is no realist prospect of the lead-in times adopted by the Council and accepted by the Examination Inspector coming about. The reality here is that there is ample evidence to establish that they are robust, up to date and realistic.
263. It is submitted that the approach advocated by the Appellant must be rejected and the approach that lies behind the recently adopted Local Plan and utilised by Mr Fisher in his appraisal must be accepted.

## **5% Discount**

264. Mr Wedderburn adopted an approach in which he was entirely alone; no other planning consultant in any of the appeals post-adoption of CELPS has contended that a percentage discount to the total supply should be applied to take account of planning permissions which expire. He is a lone voice in this. The reason why is that it is a thoroughly bad point.
265. Firstly, his figures were miscalculated even if it were right to apply the discount. He had applied it to permissions that were already implemented;

---

once implemented a planning permission cannot expire. Mr Wedderburn agreed that his discount should not be applied to implemented permissions.

266. Secondly, Mr Wedderburn has identified his 5% figure by reference to data from the Council which contained an error. Mr Fisher explained in his rebuttal evidence that the consequences of that error meant that a figure of 5% expiry could not be supported from the data; rather a figure of 4% (Fisher rebuttal paragraph 45). But this is before an allowance is made for sites which obtain a new planning permission after expiry. Mr Wedderburn allowed 1% for this. That would get one to a 3% discount figure.
267. However, Mr Wedderburn had made no investigation of the extent to which the sites where consent had lapsed in the past had obtained planning permission post expiry. Mr Fisher explained that in practice many sites regain consent in short order and are subsequently developed. This illustrates that even if a site lapses it is capable of development. Further, the NPPG indicates that where there is robust evidence a site without planning consent can be included in the supply. Where planning consent has been given in the past and there are no significant physical impediments, it is in line with national guidance to include sites within the deliverable supply.
268. As Mr Fisher explained in his rebuttal at paragraph 47 the Council only employs 63% of commitments within its 5-year supply. It is very far from counting every last house from consent. There is plenty of scope for other commitments to deliver better than expected.
269. Even more significantly, however, Mr Wedderburn's approach if adopted would result in a double counting. The effect of applying a lapse rate to a housing requirement is that additional sites need to be found to make up the shortfall. However, the housing requirement in Cheshire East already includes a 20% buffer. Paragraph 47 explains that the purpose of the 20% buffer is to "to provide a realistic prospect of achieving the planned supply and to ensure choice and competition in the market for land". Thus the 20% buffer rate is already applied in order to achieve the objective of Mr Wedderburn's discount. There is no reason to both increase the housing requirement and to decrease to pool of available sites for the same purpose. To do so results in double counting.
270. Mr Wedderburn was unable to identify any coherent reason why in the circumstances pertaining to Cheshire East both a 5% discount and a 20% buffer should be applied when he was questioned on the point in cross-examination.
271. The dangers of applying a discount for the decision maker can be seen in the case of *Wokingham Borough Council v Secretary of State* [2017] EWHC 1863 where the High Court quashed an Inspector's decision for failing to explain why in a 20% buffer context it was appropriate to apply a discount lapse rate. Indeed, in that case reference is made to a decision of the Secretary of State in respect of a proposed development in Malpas, Cheshire. In that case the Secretary of State agreed with the Inspector's reasoning on certain points including these. The Inspector considered the objective of the 20% "buffer" was to provide a realistic prospect of achieving the planned

---

supply and to ensure choice and competition in the market and that "the buffer figure thereby allows for some uncertainty and slippage in the delivery of some sites". He added:

"there is no evidence to support the arbitrary 6 month or 12 month slippage rate assumed by the Appellant across all developments. To apply such an assumption, or the alternative 10% discount (which is equally arbitrary), would result in double counting in that the 20% buffer would also allow significant slippage or non-implementation."

272. The same reasoning applies to the present case. For all these reasons Mr Wedderburn's suggested 5% lapse rate must be rejected.

### **Windfall**

273. Mr Wedderburn has adopted an inconsistent approach to windfall. He included an allowance for windfall in areas not including Crewe. There was no rational reason for this and this needs to be taken into account when looking at the "allocation" for windfall for the Crewe area.

### **A Comparison between Trajectory and Actual Delivery**

274. The Appellant has placed significant emphasis on a comparison between the actual delivery of housing and that which was anticipated in the housing trajectory. A number of annotated graphs were produced on behalf of the Appellant to illustrate the points being made. These points were put forward as a basis for suggesting that the Council's identification of housing land supply is suspect in some way. The comparison in fact does not such thing.

275. As the Court of appeal emphasised in *St Modwen*, paragraph 49 of the NPPF requires a local planning authority "demonstrate a five-year supply of deliverable housing sites". This is not the same things as comparing against the requirement that the authority must "illustrate the expected rate of housing delivery through a housing trajectory for the plan period" as part of Plan preparation. A housing trajectory is undertaking a different task from the exercise that must be undertaken when looking at deliverable sites for purposes of a 5 year housing land supply assessment. Accordingly, the comparative exercise undertaken is of only very limited utility in a decision taking context.

276. Further, it has to be remembered that the issue here relates to the delivery of houses over a five-year period. As the Examination Inspector recognised there will inevitably be slippage or advancement of some sites in reality compared with any forecast. However, over a five-year period this effect is, absent particular evidence relating to a particularly significant and large strategic site, likely to even out. For example, a site where delivery slips will simply deliver in the next year. Thus, overall delivery in the next year is likely to be higher than anticipated unless units in that next year have come forward in an earlier year in significant number. That is why the Council's trajectory in the HMU for next year increases; that is entirely logical and indeed an obvious consequence of slippage in the year to 1 April 2017.

---

## **Conclusion on Housing Land Supply**

277. For the reasons set out above, the Appellant's case on housing land supply must be rejected. If the White Moss and Willaston Inspectors had applied the correct legal approach and not the unlawful "precautionary" one that they did, they would have concluded that the Council had a 5-year housing land supply. Mr Wedderburn's attempt to argue that the position is far worse than these Inspectors identified must be rejected.
278. The reality here is that the CELPS was only found sound because there was accepted to be a five-year housing land supply. To find the opposite but a few months later as a result of adopting a different approach to that accepted by the CELPS examination Inspector without any material change in circumstances is to fall into error and worse to undermine the public's faith in the plan led system; what is the point of communities accepting the loss of greenbelt land in order to produce a Plan if the basis of that Plan is undermined by s78 Appeal decisions but a few months later? It is submitted that the public's faith in the planning system will be wholly undermined if section 78 decisions conclude so lightly that a five year supply is lost so soon after plan adoption. It submitted that the conclusions of an Examination Inspector that a methodology is robust and that there is a five-year housing land supply must be treated as of significant weight. Those conclusions should only be undermined if there is strong evidence to demonstrate that there has been a fundamental change of circumstances in the intervening period. There is not such evidence and no such change of circumstances in the present case. The only reasonable conclusion in this appeal is that the Council has demonstrated that it has a five-year housing land supply of deliverable sites.

## **Flexing the Settlement Boundaries**

279. Since the Council has a 5-year housing land supply of deliverable sites, there is no policy imperative to "flex" the settlement boundaries and the Appellant's contention in that regard must be rejected. Indeed, Mr Downes accepted in XX that if there is a five-year housing land supply the settlement boundaries must be up to date.
280. It is incorrect to assert, as the Appellant has done, that the settlement boundaries are out of date in any event since their review is foreseen in the CELPS itself. As Mr Taylor explained, the CELPS anticipates a review of boundaries in order to facilitate development later in the plan period; the settlement boundaries right now are up to date.
281. Indeed, the Examination Inspector himself necessarily considered the question of whether the settlement boundaries were up to date. He must have, since a number of policies depend upon them and could not be sound unless the boundaries were up to date. Further, he considered numerous objections including those of the Appellant in relation to the Appeal site that sought to change the settlement boundaries. Since he concluded that the Council had a 5 year supply of housing, he must have concluded that, with the adjustments proposed, the settlement boundary was up to date.

- 
282. It is submitted that, if you conclude that the Council has demonstrated that it has a five-year supply of deliverable housing sites, you must conclude that the settlement boundary is up to date.
283. On the other hand, if you conclude that the Council has not demonstrated that it has a five-year supply of deliverable housing sites, then logically it must be the case that settlement boundaries must flex somewhere in order for further housing to come forward. In such circumstances, Policies PG6 and RES.5 must be given reduced weight; what has not been established, however, is that they must flex here in order to allow the Appeal scheme to come forward given its location and position in the settlement hierarchy.

### **Flexing the Settlement Hierarchy and Spatial Distribution**

284. There is no evidence that the settlement hierarchy and spatial distribution anticipated in the CELPS has to flex in the absence of a five-year supply of deliverable housing sites. If you conclude that there is a five-year supply of deliverable housing sites then there can be no basis for such "flexing".
285. If there is a need for further sites to meet 5 year housing needs in the short term, it is obviously preferable that these are met at sites which do accord with the settlement and spatial distribution hierarchy; to accept otherwise is to subvert the newly adopted CELPS and the plan led system.
286. As set out above, the Appeal Scheme is contrary to Policies PG2 and PG7. The Appeal scheme if permitted lead to housing provision of 18% above the level identified for this part of the District as appropriate in terms of spatial distribution in the CELPS and would add some 10% to the appropriate employment floorspace required resulting in employment provision some 50% above the appropriate requirement. These are very significant levels of unplanned growth. It is so significant that it must necessarily undermine the careful balance between employment growth and housing that forms the basis of the strategy for Nantwich within the CELPS.
287. It is submitted that even if there is no 5-year housing land supply of deliverable sites, Policies PG2 and PG7 of the CELPS should be given significant weight.

### **The Planning Balance**

288. In order to assist in undertaking the planning balance these submissions address the planning balance on two alternative bases:

If there is a five-year housing land supply; and

If there is no five-year housing land supply

### **There is a Five-Year Housing Land Supply**

289. If there is a five-year housing land supply then the policies in the development plan are up to date. There is then no basis for applying the tilted balance. Instead paragraph 14 of the NPPF requires the development to

---

be assessed against the policies in the Development Plan. The significant conflict with the development plan has been identified in above. In a context where the development plan is up to date, the breaches of policy identified above must be given full weight.

290. Section 38(6) of the 2004 Act falls to be applied. This indicates that given the breach of development plan policy planning permission should be refused unless material considerations indicate otherwise.
291. The development would provide market and affordable housing. However, as set out above, the Council is in a position where a 5-year supply can be demonstrated and the Council is meeting its market housing needs and has made the necessary strategic provision for the future. Therefore only limited weight can be given to this benefit, particularly given that the CELPs have addressed Nantwich's housing needs, including through the strategic allocations at Kingsley fields and Snow Hill.
292. The provision of affordable housing is a benefit of the proposed development and would result in 57 affordable properties being provided based on a 189 house development. However, affordable housing is required to be delivered by all housing developments. As set out above, the appeal scheme is not needed in order to secure a five-year supply of housing, and the Examination Inspector concluded that the CELPS, by delivering its planned housing numbers, appropriately meets affordable housing needs. Nevertheless, given local housing need, it is accepted that the delivery of affordable housing in an accessible location is an important benefit of the scheme.
293. Overall the proposal would also provide social and economic benefits. These would include employment opportunities generated in construction, spending within the construction industry supply chain and indirectly as a result of future residents contributing to the local economy. There would also be a boost to the local economy through additional spending and support for existing facilities and services.
294. Although economic benefits from the construction of the site would be limited as these would cease upon completion of the development. Indeed, it has not been established that the economic benefits here would be additional to those which would arise in any event. For example, if the construction workers were not on this site, it is likely they would be employed elsewhere.
295. The appeal site (A) proposes a package of development in addition to the housing. This includes a local centre incorporating a convenience store with 7 other small shop units, a potential new primary school and the provision of employment units. However, there is no commitment to these actually being provided and no evidence that they would be. Accordingly, it is submitted that only limited weight should be attributed to the benefits arising from the proposed local centre.
296. So far as the new employment provision is concerned, the evidence has established that there is no commitment to delivering this aspect of the scheme. Further, there is already substantial overprovision of employment

---

land in Nantwich. The benefits associated with this element of the scheme are also to be given only limited weight.

297. Subject to a suitable Section 106 package, the proposed development would provide adequate public open space and highways improvements. However, these are not considered benefits of the development as they are required to make the development acceptable in planning terms. Therefore, whilst these factors do not weigh against the proposal they also do not weigh in favour.
298. In the light of the above, in a context where it is accepted that there is a 5-year supply of housing sites, the proposed development would lead to a very significant breach of the Development Plan. That breach must be given substantial weight against the grant of planning permission. Whilst there would be some benefits of granting planning permission these are of the kind that would arise from any housing scheme. There is nothing particular about the material considerations associated with the Appeal scheme which is of such particular benefit that it can be considered to outweigh the breach of the Development Plan.
299. As a result, the only reasonable conclusion is that, applying section 38(6), planning permission must be refused.

### **No Five Year Housing Land Supply**

300. If, contrary to the Council's case it is concluded that there is no five-year housing land supply, then policies which are policies for the supply of housing are out of date and the tilted balance must be applied.
301. It is submitted that none of the policies identified above as being in breach by the proposed development are policies for the supply of housing in the narrow sense identified in Hopkins Homes. However, in Hopkins Homes it was recognised that the weight of policies that would operate to constrain development to meet housing needs could be affected by a conclusion that there is no five-year housing land supply; otherwise the policy objective of meeting housing needs might be frustrated.
302. It is then necessary to carry out an exercise of:
- Examining harm against benefits in order to apply the tilted balance; and
- Undertaking the exercise required by section 38(6) of the 2004 Act.
303. The appeal scheme will have material economic and social benefits as set out above. I also acknowledge that the actual delivery of housing to meet needs within 5 years in a context where there is no 5-year supply of housing is a factor to which weight should be given. How much weight depends upon the extent to which the proposed development is likely to deliver housing within this time-scale. In the present case there are a number of factors that are likely to mean that the actual contribution towards the current five-year supply will be very limited.

- 
304. There is likely to be a substantial delay in the decision-making process given the time taken for decisions to be made previously in this case. Following the Public Inquiry held in February 2014 the appeals were not dismissed by the Secretary of State until 17th March. Subsequent to the quashing of this decision by the High Court on 3rd July 2015, the appeals were re-determined by the Secretary of State with the decision issued on 11 August 2016.
305. As set out by Adrian Fisher when applying the Council's assumed lead-in times, a site with outline planning permission of the size of the appeal proposal would start on site at 2 years with 15 dwellings being completed that year. A completion rate of 30 dwellings/year would be assumed for years 3, 4 and 5. With this in mind, if the Secretary of State was to allow this appeal, say, twelve months on from this Inquiry, the site would at best, on the Council's lead in times contribute 45 completions to the 5 year supply.
306. However, if Mr Wedderburn's approach to standardised lead-in times followed there would be even less of a contribution made to supply within five years. The additional year's delay that that approach would deliver would reduce the Appeal scheme's contribution to just 15 homes in the five-year period (see Taylor proof paragraph 6.58). Thus, whilst the development might make some contribution towards the five-year housing land supply it is likely to be small, and at best 45 dwellings but likely less.
307. It is on this point that the Appellant's evidence performs a remarkable volte face; instead of applying the standard approach to sites with outline planning permission that Mr Wedderburn applied to every other site, the Appellant adopts a bespoke timetable which results in a much faster rate of delivery. It is even more remarkable that the Appellant should do this in the face of Mr Wedderburn's evidence that decision makers should be wary of site owners/promoters overselling the rate of delivery from their sites. The Appellant's wholly inconsistent case must be rejected in this regard.
308. Whilst the Appeal scheme would deliver a limited number of homes to meet five-year housing land supply needs, it would remain housing that is not justified spatially. For reasons set out above, the conflict with the settlement hierarchy should still be given significant weight. In addition, the conflict with development plan policies seeking to protect the loss of BMV should also be given significant weight since it has not been established that needs could not be met on less valuable agricultural land.
309. In relation to affordable housing, the position here is the same as set out above. Against this it is necessary to weigh the benefits of the proposed development. The benefits associated with the provision of a local centre are to be given only limited weight for the reasons set out above. In addition, it is to be noted that no need for a local centre has been asserted or established by the Appellant. In relation to the employment, as set out above, there is no established need for the employment aspect of the proposed development. The benefits associated with it are to be given limited weight as already explained. As a consequence, the additional benefits compared to the situation where there is a five-year housing land supply only change by reference to the weight attributable to the actual contribution the

---

proposed development would make supply, which is likely to be limited for reasons set out above.

## Impacts

310. It is acknowledged that in the absence of a five-year housing land supply the geographic extent of the settlement boundaries can be regarded as out of date, but nonetheless the proposals would harm the Policy objectives of recognising the intrinsic character and beauty of the open countryside for the reasons set out above.

311. The Secretary of State has considered the extent of that harm previously and there has been no material change in circumstances which means that a different conclusion should be reached. The decision letter of August 11th 2016 concludes:

“Weighing against the proposals, the Secretary of State considers that the proposals would cause harm to the character and appearance of the open countryside, for the reasons given at paragraphs 27-28 above. This harm would be in conflict with paragraphs 7 and the 5th and 7th bullet points of paragraph 17 of the Framework. Having given careful consideration to the evidence to the Inquiry, the Inspector’s conclusions and the parties’ subsequent representations, the Secretary of State considers that the harm to the character and appearance of the open countryside should carry considerable weight against the proposals in this case. He further considers that the loss of BMV land is in conflict with paragraph 112 of the Framework and carries moderate weight against the proposals, for the reasons given at paragraphs 31-34 above.” (para. 46).

312. It is important to remember that much of this harm is likely to be caused by housing that would not contribute to 5-year housing supply and thus would not contribute to any identified shortfall in that supply. In addition, no justification for the local centre or employment provisions has been proffered as Mr Downes accepted in XX. Thus, granting planning permission would result in adverse impact upon the open countryside from housing which is not required to meet any 5-year housing land supply needs and from other development which is not required to meet retail/employment floorspace needs. As a result, it is submitted that the weight to be given to such adverse impacts from unjustified development in the open countryside, on BMV and in a location which conflicts with the adopted settlement hierarchy is very substantial.

313. As explained above, the proposed development will result in the loss of BMV for a scheme which is not necessary since the greater part of it is not required to meet any identified need. Further, there has been no assessment which has established that the part of the scheme which may be needed (the small number of housing units that might come forward to meet five-year housing needs) cannot be accommodated on less valuable agricultural land.

314. Overall, it is submitted that the adverse impacts of granting permission would significantly and demonstrably outweigh the benefits, when assessed

---

against the policies in the Framework taken as a whole. It is thus submitted that the proposed development is not sustainable development and is not supported by the NPPF.

315. So far as the section 38(6) exercise is concerned, it is submitted that the proposed development would give rise to significant breaches of the Development Plan. Where there is no five-year housing land supply however, it is necessary to identify the appropriate weight to give to those policies.
316. The Court of Appeal in the Suffolk Coastal case, in a passage which is not affected by the Supreme Court decision gave some guidance as to factors which are relevant to a decision makers consideration of the weight to give to policies in this context at paragraph 49:

“One may, of course, infer from paragraph 49 of the NPPF that in the Government’s view the weight to be given to out-of-date policies for the supply of housing will normally be less than the weight due to policies that provide fully for the requisite supply. The weight to be given to such policies is not dictated by government policy in the NPPF. Nor is it, nor could it be, fixed by the court. It will vary according to the circumstances, including, for example, the extent to which relevant policies fall short of providing for the five-year supply of housing land, the action being taken by the local planning authority to address it, or the particular purpose of a restrictive policy – such as the protection of a “green wedge” or of a gap between settlements. There will be many cases, no doubt, in which restrictive policies, whether general or specific in nature, are given sufficient weight to justify the refusal of planning permission despite their not being up-to-date under the policy in paragraph 49 in the absence of a five-year supply of housing land. Such an outcome is clearly contemplated by government policy in the NPPF. It will always be for the decision-maker to judge, in the particular circumstances of the case in hand, how much weight should be given to conflict with policies for the supply of housing that are out-of-date. This is not a matter of law; it is a matter of planning judgment (see paragraphs 70 to 75 of Lindblom J.’s judgment in *Crane*, paragraphs 71 and 74 of Lindblom J.’s judgment in *Phides*, and paragraphs 87, 105, 108 and 115 of Holgate J.’s judgment in *Woodcock Holdings Ltd. v Secretary of State for Communities and Local Government and Mid-Sussex District Council* [2015] EWHC 1173 (Admin)).”

317. It is then relevant to consider;

- The extent to the shortfall;
- The action being taken by the local planning authority to address that shortfall; and
- The particular purpose of a restrictive policy.

318. In this context, to the extent that a shortfall can be identified, it must be very small indeed. As Mr Fisher explained the next stage of the development plan is for the identification of additional housing sites. Any shortfall now is

---

likely to be addressed very shortly, and in all probability before the Appeal Scheme is likely to deliver any housing units.

319. So far as the particular purposes of the relevant restrictive policies are concerned, the protection of the open countryside and of the best and most versatile land are objectives wholly supported by the Framework. In addition, the sustainable distribution of development via appropriate settlement hierarchy is supported by the Framework.
320. Accordingly, in a context where there is no 5-year housing land supply, the relevant restrictive policies cannot be given full weight, however they can be given weight at a level just below that since any shortfall identified will be very small, is likely to be addressed very quickly indeed and before the Appeal Scheme could contribute units and seek to achieve objectives supported by the Framework.
321. Against this the benefits of the scheme must be weighed. These have been addressed above. In essence, the Appeal scheme would only deliver a very limited number of units to meet five-year housing land supply needs. The remaining housing units, the local centre and the employment use proposed would not meet any identified need and are wholly unjustified. In this context, the harm that they would cause and the breach of development plan policy they give rise to is not justified by reference to any public interest need for them.
322. As a result, it cannot be the case that there is a justification for the proposed development. The Council submits that even where there is not five-year housing land supply, the conflicts with the development plan identified above are not outweighed by any material considerations. Thus, it must be concluded that planning permission should be refused and the appeal dismissed.

### **Supplementary evidence submitted following the publication of the revised National Planning Policy Framework**

#### **STATUS OF THE DEVELOPMENT PLAN**

323. The rFramework does not change the statutory status of the development plan as the starting point for decision making. Planning law requires that applications for planning permission be determined in accordance with the development plan. Where a planning application conflicts with an up-to-date development plan (including any neighbourhood plans that form part of the development plan), permission should not usually be granted (paragraph 2, 12 and 47 of the rFramework). The adopted development plan for Cheshire East currently comprises of the following documents:

- The Cheshire East Local Plan Strategy (adopted 27 July 2017) (CELPS)
- The saved policies of the Borough of Crewe and Nantwich Replacement Local Plan (adopted 17 February 2005) (CNLP)

- 
- The Stapeley and Batherton Neighbourhood Plan (made on the 15th February 2018).

324. These plans were adopted prior to the introduction of rFramework. Paragraph 213 confirms that existing policies should not be considered out-of-date simply because they were adopted or made prior to the publication of this Framework. Due weight should be given to them, according to their degree of consistency with this Framework (the closer the policies in the plan to the policies in the Framework, the greater the weight that may be given).

## **CONSISTENCY OF ADOPTED POLICIES WITH THE NPPF**

### *Spatial Strategy*

325. The CELPS sets out the overall vision and planning strategy for the Borough. It is an up-to-date plan that provides a positive vision for the future and provides a framework for addressing housing needs and other economic, social and environmental priorities in accordance with paragraph 15 of the rFramework. The plan clearly sets out an overall strategy for the pattern, scale and quality of development, and makes sufficient provision for housing to meet the objectively assessed needs of the area. Policy PG1 states that sufficient land will be provided for a minimum of 36,000 new homes over the 20 year plan period, in accordance with rFramework paragraph 20. It should be noted that this figure is significantly higher than that previously published by MHCLG in its indicative assessment of housing need of 1,142 dwellings per annum (22,840 over 20 years). The CELPS therefore seeks to significantly boost housing supply, having regard to paragraph 59, providing a clear strategy for bringing sufficient land forward, and at a sufficient rate, to address objectively assessed needs over the plan period, in line with the presumption in favour of sustainable development.

### *Settlement hierarchy*

326. The CELPS establishes a settlement hierarchy for development. In essence, this ensures that the majority of development takes place close to the borough's Principal Towns and Key Service Centres to maximise use of existing infrastructure and resources and to allow homes, jobs and other facilities to be located close to one another. The plan therefore plays an active role in guiding development towards sustainable solutions having regard to paragraph 7 of the rFramework. As at the 31.3.2017, some 37,196 dwellings were committed, completed or allocated, leaving a small residual requirement to be addressed through the subsequent Site Allocations and Development Policies Document (SADPD) which will be published for consultation in September 2018. It should be noted that through existing allocations, completions and commitments, sufficient deliverable and developable land and sites to meet the housing requirement of 36,000 homes has already been provided. The additional allocations identified through the future SADPD will therefore serve to provide for local housing needs in particular settlements.

327. The Council's evidence demonstrates that the development will result in harm to the intrinsic character and beauty of the open countryside. This harm was acknowledged in the previous decision letter of the Secretary of State. The appeal proposal conflicts with Policy PG6 of the CELPS and Policy RES5 of the CNLP. These policies are considered to be consistent with Paragraph 170 of the rFramework which states that planning policies and decisions should contribute to and enhance the natural and local environment by:

'recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services – including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland'.

*Best and Most Versatile Agricultural Land*

328. CELPS Policy SE.2 encourages the re-use/ redevelopment of previously developed land and also seeks to safeguard natural resources, including high quality agricultural land. The supporting text advises that agricultural land is a finite resource which cannot be easily replicated once lost. Policy SD2 (v) also states that the permanent loss of areas of agricultural land quality 1,2 or 3a should be avoided unless the strategic need overrides these issues. These policies are considered to be consistent with the rFramework as they recognise the economic and other benefits that are derived from best and most versatile land. Furthermore, the Council has recognised through Policy SD2 that there may be occasions where a strategic need may override such loss.

329. These policies are considered to be consistent with the rFramework. Paragraph 170(b) of the rFramework states that planning policies and decisions should contribute to and enhance the natural and local environment by recognising the intrinsic character and beauty of the countryside, and the wider benefits from natural capital and ecosystem services – including the economic and other benefits of the best and most versatile agricultural land, and of trees and woodland. Best and Most Versatile Land is also relevant to plan making. Paragraph 171 states that plans should allocate land with the least environmental or amenity value, where consistent with other policies in the Framework. Footnote 53 advises that where significant development of agricultural land is demonstrated to be necessary, areas of poorer quality land should be preferred to those of a higher quality.

*Stapeley & Batherton Neighbourhood Plan*

330. The Stapeley and Batherton Neighbourhood Plan forms part of the development plan. Where a planning application conflicts with a made neighbourhood plan, planning permission should not normally be granted in accordance with Paragraph 12 of the rFramework. At Paragraph 29, the rFramework states that neighbourhood planning gives communities the power to develop a shared vision for their area. Neighbourhood plans can shape, direct and help to deliver sustainable development, by influencing local planning decisions as part of the statutory development plan.

---

Neighbourhood plans can play an important role in identifying the special qualities of each area and explaining how this should be reflected in development (paragraph 125).

331. The Stapeley Neighbourhood Plan was made on 15th February 2018 and is a recently adopted plan that includes local policies which seek to ensure that the special qualities of the area are recognised in the planning system. The plan contains notable policies on the landscape and open countryside, housing and design that should influence planning decisions, ensuring that development is appropriate to the area. The Neighbourhood Plan does not preclude residential development but rather it sets out the circumstances in which development will be permitted in order to ensure that it is commensurate with the character of the Parish and avoids intrusion into the open countryside.
332. As submitted in evidence, the appeal proposal clearly conflicts with adopted policies GS1, Policies H1 and H2. These policies are considered to be consistent with paragraphs 77 – 79, 83, 125 and 170 of the rFramework and full weight should therefore be given to them.

### **THE WEIGHT TO BE GIVEN TO ANY CONFLICT WITH POLICY**

333. The appellant's case is that the Council cannot demonstrate a 5 year supply of deliverable housing sites. In these circumstances, footnote 7 and paragraph 11 of the NPPF apply. The NPPF states that where the policies that are most important for determining the planning application are out of date, planning permission should be granted unless the adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the Framework as a whole. As submitted in evidence, the Council has demonstrated that a sufficient 5 year supply of housing sites to meet identified requirements can be demonstrated. Any implications from revised NPPF on matters of housing requirements, delivery and supply are identified below.

#### *The Cheshire East Local Plan Strategy*

334. Paragraph 74 of the rFramework states that a five year supply of deliverable housing sites, with the appropriate buffer, can be demonstrated where it has been established in a recently adopted plan which:
- a) has been produced through engagement with developers and others who have an impact on delivery, and been considered by the Secretary of State; and
  - b) incorporates the recommendation of the Secretary of State, where the position on specific sites could not be agreed during the engagement process.
335. As submitted in evidence, the CELPS was adopted on the 21 July 2017. Therefore it should be considered a recently adopted plan having regard to paragraphs 73 & 74 and footnote 38. The Cheshire East housing requirement and the five year supply of housing sites were subject to lengthy and thorough examination, involving engagement with those stakeholders that

---

have an impact upon the delivery of sites. The adopted plan incorporated the recommendations of the Secretary of State. Upon adoption, the Inspector concluded that the Local Plan would produce a five year supply of housing, stating that:

*'I am satisfied that CEC has undertaken a robust, comprehensive and proportionate assessment of the delivery of its housing land supply, which confirms a future 5 year supply of around 5.3 years'.*

336. Full weight should therefore be given to the CELPS as a recently adopted plan in accordance with paragraph 74. It should also be noted that the 5 year supply of specific deliverable sites considered by the Examining Inspector incorporated within it the maximum possible buffer – 20% (see Paragraph E.9, Appendix E of the CELPS). This buffer is double that now required to be applied to recently adopted plans having regard to paragraph 73(b) of the NPPF. If a 10% buffer had been applied to the Cheshire East 5 year housing supply requirement at the point of the adoption, this would have the effect of reducing the overall 5 year requirement by some 1,235 dwellings.

337. The intention of the rFramework guidance appears to be to try and limit endless debates over 5 year housing supply, most particularly where the Secretary of State has recently ruled on the matter. This can be done either through the new annual assessment process or through the adoption of a local plan. National Policy now weighs heavily against attempts in S78 planning appeals to re-examine housing supply where a definitive conclusion has been reached through the Local Plan process. The NPPF sets clear time limits on the currency of those conclusions. In the case of Cheshire East, it is evident that a 5 year supply can be demonstrated up to 31 October 2018 based on the recent Local Plan adoption.

338. The Council therefore respectfully requests that the Appeal Inspector and Secretary of State follows rFramework guidance in this regard and concludes that a 5 year supply can be demonstrated for the purpose of this appeal.

#### *The housing requirement*

339. Paragraph 60 of the rFramework states that strategic policies should be informed by a local housing need assessment, conducted using the standard method in national planning guidance – unless exceptional circumstances justify an alternative approach. As submitted in evidence, the adopted CELPS housing requirement for Cheshire East over the plan period is some 36,000 homes, equivalent to 1,800 per annum. This is significantly higher than that previously published by MHCLG in its indicative assessment of housing need of 1,142 dwellings per annum. By adopting a significantly higher figure, the Council has clearly not shirked its responsibilities to significantly boost housing delivery within the Borough.

340. The Council's 5 year housing land supply assessment is based on a very generous assessment of need compared to the standard approach. The purpose of having a specific 5 year deliverable supply of housing sites is to ensure that sufficient land is available to enable homes to be built to meet housing need. In using a significantly higher figure than that produced by

---

standard methodology, even if the calculated supply was exactly 5 years (or as in this case, that supply exceeds the 5 year requirement), it would fully achieve the objective of ensuring that there is sufficient land available to meet housing need.

*Presumption in favour of sustainable development*

341. Paragraph 11 and footnote 7 concerns the application of the presumption in favour of sustainable development to both plan making and decision taking. For decision-taking, the presumption in favour of sustainable development means:

- a) approving development proposals that accord with an up-to-date development plan without delay; or
- b) where there are no relevant development plan policies, or the policies which are most important for determining the application are out-of-date, granting permission unless:
- c) the application of policies in this Framework that protect areas or assets of particular importance provides a clear reason for refusing the development proposed; or
- d) any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in this Framework taken as a whole.

342. Footnote 7 explains that for the purposes of d) that out of date policies includes, for applications involving the provision of housing, situations where the local planning authority cannot demonstrate a five year supply of deliverable housing sites (with the appropriate buffer, as set out in paragraph 73); or where the Housing Delivery Test indicates that the delivery of housing was substantially below (less than 75% of) the housing requirement over the previous three years. Transitional arrangements for the Housing Delivery Test are set out in Annex 1.

343. As submitted in evidence, the appeal proposal does not accord with the adopted development plan. The CELPS is a recently adopted plan having regard to Paragraph 73 & 74 and footnote 38. Its adoption established a 5 year supply of specific deliverable housing sites with the maximum buffer. The Council has submitted detailed evidence to the Inquiry to demonstrate that a continued 5 year supply of deliverable housing sites can be demonstrated since the adoption of the CELPS.

*The Housing Delivery Test*

344. The Housing Delivery Test (HDT) will apply from the day following the publication of the Housing Delivery Test results in November 2018 (see paragraph 215 of the rFramework). The HDT result will have a number of implications for decision-taking, including the circumstances in which the presumption in favour of sustainable development applies as explained at footnote 7. Under transitional arrangements, delivery of housing considered to be 'substantially below' the housing requirement will equate to delivery below 25% of the housing required over the previous three years.

345. The accompanying Housing Delivery Test Measurement Rule Book provides the methodology for calculating the HDT result. The Housing Delivery Test is effectively a percentage measurement of the number of net homes delivered against the number of homes required, over a rolling three year period. The number of net homes delivered is taken from the National Statistic for net additional dwellings over a rolling three year period, with adjustments credited for net student and net other communal accommodation. The national statistics are published annually in November.
346. The number of net homes required, will be the **lower** of the latest adopted housing requirement (excluding any shortfall)<sup>3</sup> **or** the minimum annual local housing need figure. Under transitional arrangements, for the financial years 2015-16, 2016-17 and 2017-18, the calculation of the minimum annual local housing need figure is to be replaced by household projections only. This is shown below.

Year	Adopted annual CELPS Requirement	Household projections (annual average over 10 year period) <sup>4</sup>	Net additional dwellings
2015/16	1800	1,100	1573
2016/17	1800	1,100	1763
2017/18	1800	900	1509 dwellings
TOTAL	5400	3,100	4,8457

347. What is clearly evident from the above table is that net additional dwellings over the three year period already comfortably exceeds the housing requirement calculated using 2012 and 2014 household projections. When the housing delivery test is applied against the completions data set out in the Council's proof of evidence, it is evident that the test is met and exceeded by a significant margin (1,745 homes) even without the full year data for 2017/18.
348. While the Council has not yet published its annual housing monitoring update for 2017/18, as submitted in evidence, completions continue to show a positive direction of travel and it is likely that the final total of completions for the year ending 31 March 2018 will exceed that of previous years. However based simply on the evidence before the Inquiry, the November 2018 HDT result, using the formula in the published rule book, will show that housing delivery significantly exceeds the minimum number of net homes required.

#### *The buffer*

349. Paragraph 73 requires that Local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need

---

where the strategic policies are more than five years old. The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:

- a) 5% to ensure choice and competition in the market for land; or
- b) 10% where the local planning authority wishes to demonstrate a five year supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or
- c) 20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply

350. Footnote 39 advises that from November 2018, the requirement to apply a 20% buffer will be measured against the Housing Delivery Test result, where this indicates that delivery was below 85% of the housing requirement.

351. As submitted in evidence, net completions over the past three years have continued to increase in Cheshire East. For the monitoring years 2015/16 and 2016/17, net completions have exceeded the household projections result by as considerable margin.

When the CELPS was adopted, it should be noted that the Council applied the maximum possible buffer to its calculation of the 5 year housing land supply requirement and with this buffer, the Examining Inspector confirmed that a 5 year supply could be demonstrated. The 20% buffer was also applied to the 5 year supply of deliverable sites identified in the subsequent Housing Monitoring Update (base date 31 March 2017). Evidence submitted to the Inquiry robustly demonstrates that a continued five year supply including the maximum buffer can be identified. It goes without saying, that if the buffer was to drop to 10 or 5 per cent, taking account of delivery over the past three years, the 5 year housing land supply requirement would also drop significantly.

### **Definition of deliverable**

352. As per earlier guidance, the rFramework definition retains the previous requirement for sites to be available, suitable and achievable with a **realistic** prospect that housing will be delivered on the site within 5 years. As submitted in evidence, the relevant test is whether there is a realistic prospect of a site coming forward, i.e. is the site capable of being delivered within 5 years rather than it being absolute certainty that it will be delivered. The revised definition makes a distinction between sites that are small or have full planning permission and those that have outline planning permission or are allocated in a development plan or otherwise have planning permission in principle or identified through a brownfield land register. For small sites (less than 10 dwellings) and all sites with full planning permission should be considered deliverable until the permission expires, unless there is clear evidence that they will not come forward. For those sites with outline planning permission or planning permission in principle, allocated in the development

---

plan or sites identified in the brownfield land register. These can be considered deliverable where there is clear evidence that housing completions will begin within five years.

353. The Council has submitted detailed evidence not only through the recent examination of the Local Plan Strategy, particularly in relation to strategic allocations but also to the Inquiry. A considerable body of evidence has been submitted on the deliverability of sites to respond to the very the detailed scrutiny of sites undertaken by the appellant. The Council's evidence has been fully revised and updated, looking afresh at the latest position on key sites and the housing sector generally and this included evidence on many sites including those with outline planning permission and allocated through the CELPS. The evidence submitted included an updated 5 year housing land supply assessment, taking into account a small number of concessions made following the Park Road, Willaston appeal decision. It should be noted that evidence was submitted both in relation to the current appeal and a second appeal, APP/R0660/W/17/3176449: Land to the West of New Road, Wrenbury, which has now reported and a copy of the Inspector's Decision Letter is appended. Based on the latest available evidence, the Inspector concluded that a deliverable 5 year supply was in place.

354. Therefore the Council remains of the view that in light of the revised NPPF, a deliverable supply of housing sites to meet the five year requirement can be demonstrated.

355. To conclude:

- Adopted development plan policies are up-to-date and consistent with the rFramework
- The appeal proposal conflicts with up-to-date policies and full weight should be given to the findings of the Inspector who confirmed that upon adoption, a five year supply could be demonstrated. In accordance with the rFramework, the CELPS should be considered recently adopted until 31 October 2018. In line with NPPF paragraph 74 this shows that a 5 year supply of can be demonstrated at the time of writing. The rFramework effectively settles the matter.
- In addition, to the above, a considerable body of updated evidence has been submitted to the Inspector on the specific supply of deliverable sites. The Council has demonstrated that a five year supply of housing sites can be demonstrated. This view is collaborated by the recent findings of the Inspector in 'Land to the West of New Road, Wrenbury'. The Inspector and Secretary of State therefore has all relevant information to enable the determination of the appeal.
- The five year housing requirement built in the maximum possible buffer. The rFramework indicates that a lower buffer of 10% should be used where the local planning authority wishes to demonstrate a five year supply of deliverable sites through a recently adopted plan.
- Housing completions over recent years have shown a continued positive direction of travel. Delivery over the last 3 years is likely to exceed by some margin, the local housing need requirement established through the Housing Delivery Test in November 2018.

- 
- The applicable buffer to be applied to the 5 year supply requirement will reflect the HDT result from November 2018 onwards. It is very unlikely that given past performance over the last 3 years, that a 20% buffer will be applied.
  - Notwithstanding any changes that may take place in the future to the buffer, in submitting evidence to the Inquiry, the Council has robustly demonstrated that a five year supply of deliverable sites can be demonstrated with the maximum 20% buffer.
  - Very detailed evidence has been submitted in relation to the supply of specific sites to support the conclusions reached about 5 year supply.
  - Having regard to the rFramework and the matters outlined above, the Council remains firmly of the view that a 5 year supply of deliverable housing land can be demonstrated and as such paragraph 11d is not engaged.

### **Overall Conclusion**

356. The Council submits that where there is a five-year housing land supply or not, the application of section 38(6) of the 2004 act results in the conclusion that planning permission for the proposed development must be refused and the appeal dismissed.

### **The Case for the Interested Parties**

The material points are:

357. Councillor Mathew Theobold, Chairman of Stapeley & District Parish Council<sup>22</sup>, seeks to emphasise the newness of the Stapeley and Batherton Neighbourhood Plan, it having been Made on the 15 February 2018. After setting out the relevant policies of the plan, Councillor Theobold goes on to identify the key areas of conflict the proposals have with these policies. Whilst accepting that Policy H5 directs development to within or directly adjacent to the Nantwich Settlement Boundary (where the proposed development is proposed), such proposals also have to be considered 'subject to the provisions of other policies of the Plan'. When the proposals are considered against the provisions of Policy H1 that can be held to be in clear conflict with all criteria contained in the policy (criteria H1.1- H1.4)
358. Councillor Theobold goes on to identify further concerns over the provision of local facilities, specifically the absence of a formal mechanism to secure their delivery, and shortcomings in the Appellant's Air Quality Document and Acoustic Planning Report. The Council also made further submissions on the contents of the draft section 106 agreement. Concerns were expressed over the potential conflict of ecological provisions and community based aspirations for publicly accessible community orchards, an aspiration of the plan.

---

<sup>22</sup> ID10 and ID32.

- 
359. Mr Patrick Cullen<sup>23</sup>, a local resident, also expressed concerns in relation to the section 106 agreement and the effect of cumulative local housing development on local infrastructure. Concerns relating to the 106 agreement covered the outstanding commitments on land within the appeal site (Appeal B) and the desire of the community to secure a Community Orchard on the land to reflect local preference. Evidence relating to local housing development draws attention to the number and scale of housing sites currently under construction and draws attention to the effect such will have on local infrastructure and services.
360. Mr Philip Staley also submitted evidence to the Inquiry in respect of levels of traffic in the locality and the effect of further housing development on these levels and on the extend of public transport provision adjacent to the appeal sites. He also presented a short video in addition to a written submission.<sup>24</sup> Mr Staley suggests that traffic congestion on Peter de Stapeleigh Way at peak times (0800-0900hrs and 1500-160hrs) is sever, and quotes an Inspector's conclusions in respect of this issue in relation to a dismissed appeal on Audlem Road<sup>25</sup>. The cumulative effects of this and other proposals will cause harm to the local area and to local residents. Mr Staley also advised that sense the submission of the Appellant's evidence local bus services in the vicinity of the site had bed reduced, limiting the local service to only 4 journeys each way during normal shop hours. The provisions of the draft section 106 agreement to fund an increase in local bus services for a specified period would therefore have limited effect in mitigating the increased demand for such local services.
361. Ms Gilian Barry also made representations to the Inquiry supporting the statements in respect of the effects traffic generation by the proposed development<sup>26</sup>. She also made objections on the grounds of adverse effect on air quality, the prospect of flooding on the site, loss of habitat, including trees and hedgerows, and the effects of the development on public safety.

## **Written Representations**

362. There is a large body of correspondence in respect of the initial applications and the subsequent appeal, the body of which has been set out in the previous Reports to the Secretary of State.
363. Most correspondence came from objectors. They were particularly concerned with increased traffic, including the access, on adjoining road and at nearby level crossings, and the effects on the open countryside, the proposed loss of trees, recently felled trees, planned wildlife mitigation, lack of medical, dental and other facilities, shortage of school places, loss of privacy at the proposed roundabout, noise, air and light pollution, poor house design, and the potential for much more development.

---

<sup>23</sup> ID11.

<sup>24</sup> ID12.

<sup>25</sup> APPEAL ref: APP/R0660/W/15/319474.

<sup>26</sup> ID13.

- 
364. These themes are repeated in the written responses to the current appeals, though they also refer to the adoption of the current local plan and the establishment of a five year land supply inherent in that and the advanced state of the Stapely and Batherton Neighbourhood Plan.
365. Further correspondence has been received in respect of the current appeals and, following the advertisement of amendments to the scheme during the Inquiry, further representations made in respect of these matters.
366. Mr Paul Tomlinson states the appeals are flawed due to 'flawed' traffic data as a result of being based on material over ten years old. Mr Andrew Hale states that the commercial units proposed in Appeal A would not contribute to the local economy or culture. He also states the proposals would fail to make use of the existing access to Peter de Stapeleigh Way. Mr David Wall refers to the site being within the Green Belt and expresses concerns over the ability of emergency services being able to access the site. Ms Jane Emery states there is a need for the development to mitigate the effects it will have on local infrastructure.
367. Mr D Roberts and Mrs H S Thompson Also raise objection on the basis that the traffic assessment is flawed and that the proposals represent a considerable risk to the safety of highway users<sup>27</sup>.

## Conditions

368. A discussion was held as to the suitable wording of, and reasons for, any conditions on 23 February with reference to the tests for conditions in the *Framework*. Following these discussions, with only a few exceptions which I set out below, in the event that the appeals are allowed, the conditions in the attached Schedule should be imposed, for the reasons set out below. Some conditions have been adjusted from those suggested in the interests of precision, enforceability or clarity.

## Appeal A

369. As well as the standard conditions 1-3, control is required over matters in the other conditions for the following reasons:
- 4, 5 & 9: flood risk reduction, contamination mitigation and ecological enhancement, including concerns raised by the Parish Council
  - 6: protection of archaeological remains
  - 7, 8 & 10: residential and visual amenity and sustainability
  - 11, 12, 13 & 27: highway safety and sustainability
  - 14 & 15: sustainability
  - 16-20: protected and other species mitigation
  - 21-25: reserved matters clarification and implementation

---

<sup>27</sup> ID34.

---

370. For clarity and for the avoidance of doubt, condition 26 establishes the sole vehicular access to the site will be through the junction with Peter Destapeleigh Way.

## **Appeal B**

371. As well as the standard conditions 1& 2, control is required over matters in the other conditions for the following reasons:

- 3-6: the visual amenity and landscape quality of the area
- 7-10: protected and other species mitigation and public amenity

372. Condition 11 is necessary in order that the Local Conservation Area is appropriately delivered, maintained and managed under the terms of this planning permission. This is all the more the case in view of Mr Cullen's concerns for its future management and the challenges to ensuring this identified in the previous report to the Secretary of State.

## **Planning Obligations**

373. The draft s106 agreement was discussed at the Inquiry during the same sessions as the conditions. A final signed and dated versions were submitted, as agreed, after the Inquiry closed. The agreement makes provision for the revocation of previous obligations in respect of the previous applications and also, in conjunction with condition 11 in relation to Appeal B, makes a commitment to the submission of a scheme for the Local Nature Conservation Area (LNCA) should the appeals be granted. The Council, in support of their request for financial and physical contributions to local infrastructure, have presented a detailed Community Infrastructure Levy Regulations 2010 Compliance Statement which evidences their necessity in relation to the regulatory requirements and the expectations of the rFramework. The agreement submitted by the Appellant reflects these requirements.

374. Firstly the agreement confirms that 30% of the proposed homes will be affordable which is policy compliant. The agreement also sets out the mix of tenure types reflecting local need in the area. Such a contribution therefore fully accords with the regulations and expectations of the rFramework and may be taken into account.

375. A further obligation facilitates contributions to secondary special needs education in the area. Again this recognises that future families occupying the development will place demand on local education facilities that will require mitigation. This is also calibrated through established formulae and is thus proportionate, related to the development and necessary to make it acceptable in planning terms. It too therefore may be taken into account.

376. For related reasons there is also an obligation securing open space and children's play areas, justified on the basis of the increased numbers of people anticipating use of such facilities. These provisions are also justified against policy, calculated to agreed formulae and proximate to the site. This too may therefore be taken into account.

---

377. A key obligation securing an enlarged LNCA is also presented which also makes provision for its ongoing management. Not only, given the ecological interest of the site, is this provision necessary to make the development acceptable in planning terms, it addresses one of the key concerns of interested parties who have made representations in respect of both appeals. On all counts therefore it may properly be taken into account.

378. There are a further three obligations securing funding for an additional pedestrian crossing of Peter Destapleigh Way, two additional bus stops and a subsidy for the local bus service. The first enhances the safe pedestrian connectivity of the development, the second brings it within ready access to a sustainable transport service whilst the latter enhances that service for residents. All are necessary to make the development acceptable in planning terms, are proportionate and are directly related to the site. They may also therefore be taken into account.

### **Inspector's Conclusions**

379. I have reached the following conclusions based on all of the above considerations, the evidence and representations given at the Inquiry, and my inspection of the appeal sites and their surroundings. At the beginning of each topic for consideration the relevant paragraphs of the respective parties are identified to assist in an understanding of the reasoning set out therein.

#### *Main considerations*

380. In respect of Appeal A these are:

- a) The effect of the development on the character and appearance of the area with particular regard to the open countryside and policies PG6, SD1 and SD2 of the Cheshire East Local Plan Strategy (CELPS); policy RES.5 of the Borough of Crewe and Nantwich Replacement Local Plan (BCNRLP) and Policies GS1, H1 and H5 of the Stapeley & Batherton Neighbourhood Plan (S&BNP) and;
- b) the loss of BMV agricultural land and;
- c) the effect of the development on the safety of highway users and;
- d) whether or not the Council can demonstrate a 5 year HLS and the implications of this with regard to policy in the rFramework.

381. In respect of appeal B these are the effects of the proposals on:

Its effect on the character and appearance of the area with regard to policy PG6 of the above.

#### *Character and appearance*

The relevant preceding paragraphs for the Appellant are 108-109.

The relevant preceding paragraphs for the Council are 310-312 & 327-329.

---

The relevant preceding paragraphs for the other parties are 357-359.

382. Policy PG6 explains that 'open countryside' is defined as the area outside of any settlement with a defined settlement boundary. It goes on to established that within such designations, development will be restricted to that essential for the purposes of agriculture, forestry, recreation and infrastructure, though with exceptions listed in 6 criteria. The supporting justification for the policy also confirms inter alia that ...'the intrinsic character and beauty of the countryside will be recognised'.
383. The proposals as presented in Appeal A, as a mixed use scheme, are both outwith the Nantwich settlement boundary as currently defined, and do not conform with any of the types of exceptional forms of development identified in the criteria. The proposals are therefore, as the Council maintain in conflict with policy PG6 of the CELPS and with sub- paragraph b) of paragraph 170 of the rFramework.
384. In common with the conclusions of the Secretary of State in his previous (now quashed) decision, set out in his letter of 17 March 2015, the Council also assert the proposals would result in harm to the intrinsic character and beauty of the open countryside. This view is supported, perhaps more in relation to natural habitat, by other representations made by local residents.
385. Although the degree to which the site as an element of countryside may be considered open, its character is nevertheless agrarian and naturalistic in character. The construction of the proposals, with its mix of uses (notwithstanding the areas of open space and areas of habitat) would certainly change this established agrarian character, transforming it into an urban enclave – an extension of the settlement. Insofar as this would result in the loss of an element of countryside of intrinsic character, this would cause a degree of harm to that character, compounding the technical breach of the policy.
386. Insofar as they would also fail to protect or enhance the natural environment, they would also conflict with criterion 14 of Policy SD1 and, the same reasons, it may be held to conflict with Policy SD2 (criteria ii and iii thereof) of the same. Policy RES.5 of the CNLP, as sister policy to PG6 also relates to the restriction of development in the open countryside. For the same reasons therefore the proposals presented in Appeal A may also be considered in conflict with it.
387. It is the case that Policy H5 of the S&BNP acknowledges that 'the focus for development will be on sites within or immediately adjacent to the Nantwich settlement boundary' and as a consequence of the proposed development being so adjacent garners some support from this element of the policy. However, this is a narrow reading of the policy, as its prefix makes clear that such an expectation will be subject to the provisions of other policies of the S&BNP. This clearly engages Policy H1, which, inter alia, anticipates (at H 1.1) development being 'limited infilling in villages or the infill of a small gap with one or two dwellings in an otherwise built up frontage'. Neither does the proposed development conform to the other exception criteria of the policy nor with Policy GS1, which only permits development in the countryside in

---

limited circumstances. Moreover, as the plan explains these policies follow 'a consistent theme around conserving and maintaining the character of the Neighbourhood Area'.

388. It may quickly be concluded that the proposals are in conflict with the letter and purpose of these Policies PG6, SD1 and SD2 of the CELPS, Policy RES5 of the CNLP and Policies GS, H1 and H5 of the S&BNP. However, the specific circumstances of the site and its context do need to be taken into account. The fact of the matter is that the appeal sites are now effectively bordered on three sides by existing and emerging development. Whilst the purpose of the policies is to maintain character it is evident that the rural hinterland anticipated by the plan vision has, in the circumstances of these cases, been extensively eroded. Such circumstances necessarily calibrate the actual harm to existing countryside character accordingly. Nevertheless, the proposals remain in breach of the policies and this needs to be accounted for in the final planning balance.

*BMV agricultural land*

The relevant preceding paragraphs for the Appellant are 111.  
The relevant preceding paragraphs for the Council are 201-212, 312-314 & 328.

389. The proposed development would result in the loss of 2.6 hectares of the best and most versatile agricultural land (25% of the aggregated site is designated as such, 6% being Grade 2, 19% being 3a). Accordingly such a loss would render it contrary to Policy SE2 of the CELPS which expects development to safeguard high quality agricultural land. The rFramework, through paragraph 171, and specifically through footnote 53, makes clear that where significant development of agricultural land is demonstrated to be necessary, areas of poorer quality land should be preferred.
390. Although technically in breach of policy SE2, the area of land is modest and predominantly at lower grade. Moreover, the engagement of the consideration of the rFramework is contingent on the loss of such designated land being significant. By any reasonable measure the loss identified here cannot be judged as such. Moreover, in the light of the conclusions below in relation to the supply of housing land, it is inevitable that the use of BMV will become a consideration in help correcting supply. Nevertheless the breach of policy and the loss of such land does represent a harm, though in light of the above, one meriting only modest weight in the planning balance.

*Highway safety*

The relevant preceding paragraphs for the Appellant are 126-128.  
The relevant preceding paragraphs for the other parties are 359-361.

391. It was clear from the representations made at the Inquiry that there was a significant degree of apprehension amongst local residents over any increase in traffic numbers in the locality as a result of the development proposed. Both written and video evidence was presented at the Inquiry to support the notion

---

that any development on this site would exacerbate already challenging highway usage in the locality.

392. Video evidence of peak-time congestion in any given area is inevitably compelling; who has not experienced the frustration of not being where we want to be at any given time in a car? Be that as it may, the expression of such frustration does not equate to a robust argument or justification, as paragraph 109 of the rFramework requires, for the rejection of the proposals as they are presented. None of the detailed evidence of the appellant, nor the considered acceptance of it by the Council, is convincingly rebutted by the heartfelt, though non-empirical submissions of those opposing the scheme. In the absence of such substantial rebuttal, such concerns must inevitably be afforded no more than very limited weight. Moreover, the mitigation through transport infrastructure provision and the creation of enhanced pedestrian and cycle routes through the site for the use of residents, workers and others further increase the opportunities for non-car transport modes.

#### *Housing Land Supply*

The relevant preceding paragraphs for the Appellant are 55-107.

The relevant preceding paragraphs for the Council are 149-178, 218-278 & 333-355.

#### *The Requirement*

393. A statement of common ground (SoCG) on housing land supply (HLS) (thus HLSSoCG) was submitted by the appellant at the inquiry<sup>28</sup>. It confirms as a starting point that the housing requirement for Cheshire East Council is 1800 dwellings per annum. Elsewhere it is common ground that the five year period runs from the 31 March 2017 to 31 March 2022. Such agreement extends also to the extent of the backlog in delivery between 2010 and 2017, which stands at 5635 dwellings, equating to three years of the overall requirement for the first seven years of the plan.
394. It is also agreed in the HLSSoCG that, reflecting a pattern of historic under delivery, a 20% buffer also applies to the aggregated numbers. This consensus reflects the position of parties in two key previous appeals referred to in evidence<sup>29</sup>.
395. Paragraph 73 of the rFramework, replacing paragraph 47 of the previous addition, requires local planning authorities to identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing supply. This number should include a buffer of either:
- a) 5% to ensure choice and competition in the market for land; or
  - b) 10% where the local planning authority wishes to demonstrate a five year supply of deliverable sites through an annual position statement or

---

<sup>28</sup> CD3.

<sup>29</sup> White Moss Quarry and Park Road, CD29 & CD30.

---

recently adopted plan, to account for any fluctuations in the market during that year; or

- c) 20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply.

396. The Council predicts in its submissions in relation to the revisions to the framework that after November 2018 and the initiation of the Housing delivery Test it is unlikely that a 20% buffer will be required as a result of increased housing delivery. Indeed, in their further representations they set out variations of the supply position referencing the 5% and 10% scenarios, each of which correspondingly indicate and increase in the supply: 6.11 years @5% and 5.38 years @10%. Even if the Council's expectations in relation to the Housing Delivery Tests were to be met, it remains apparent that in the first seven years of the LPS plan period housing completions within Cheshire East have averaged 1,034 dpa, considerably below the expected, 1800 target . Under the terms of the third bullet point of paragraph 73 of the revised Framework therefore, there would still be a compelling case to apply the 20% buffer. Be that as it may, that is in the future. For current purposes, both parties agree in the HLSSoCG that a 20% buffer should be applied. Notwithstanding this point, the appellant maintains, again in light of the evidence before the Inquiry, that even if the scenario b) of a 10% buffer were applied in this case, the Council would remain unable to demonstrate a five year supply of housing land, indicated as being 4.64 years.

397. Thus the net annual requirement, plus the shortfall (including that to be met in the first five years) in addition to the 20% buffer, in both the Council's and the Appellant's 'Sedgpool8' methodology agreed and applied by the CELPS Examining Inspector, both equate to a requirement of 14,842 over the supply period. The Appellant also goes on to model a scenario whereby the agreed eight year delivery period is not rolled forward (ie the supply period remains fixed and diminishes as time moves forward), the requirement increases. The net figure is increased by 574 dwellings, which in turn impacts on the final supply figure.

398. The Council interpret the 'pool' element of the calculation to facilitate the rolling forward of the backlog in the calculation, thus allowing the number of units to be made up over the greater part of the plan period. However, this runs counter to the current position set out in the rFramework and the PPG which anticipates that any backlog should be made up within the first five years of the plan period (or in this case the 8 year period as determined by the CELPS and the Examining Inspector)<sup>30</sup>. This has to be the right approach unless where express circumstances dictate otherwise<sup>31</sup>. Whilst such an approach would not be consistent with that applied in Park Road Appeal<sup>32</sup> it is consistent with the expectations of the Local Plan Inspector, who anticipated that the Council fully

---

<sup>30</sup> CD40 Examining Inspector's Report paragraph 72.

<sup>31</sup> PPG/NPPF ref.

<sup>32</sup> Ibid.

---

meet past under-delivery within the next 8 years of the plan period<sup>33</sup>. Whilst not supported by the Wrenbury decision<sup>34</sup>, a rolling deferment of meeting the shortfall beyond the anticipated eight year cycle is at variance with the Government's policy commitments to boost significantly the supply of new homes.

399. The difference in the calculation of backlog delivery of 574 dwellings is a significant number, in the view of the appellant contributing to a depleted five year supply figure of 4.24 years. However, even if the Council's calculation is preferred, in combination with anticipated delivery rates, the Council's five year supply position stands at just 5.37 years or as advised in their last submissions 5.35 years. That said, as in the two other recent appeals<sup>35</sup> the greater divergence of view in respect of the supply position is focused on the delivery of housing sites that will help meet the anticipated trajectory. The Council's assessment of supply (recalibrated after the round table discussion at the Inquiry) 15,908 over the defined period, whilst the Appellant calculates a number of 13,101 (again recalibrated) applying the Sedgemoor methodology, a difference of 2,807 dwellings. These respective positions are reached on the one hand by standard methodology (previously referred to as the 'in principle' approach)<sup>36</sup> and more specifically though narrow analysis by the Council, and a detailed exploration of a wider range of larger sites (previously defined as above as 'performance') by the appellant. These matters are now considered below.

### *Supply*

400. With regard to the 'in principle' differences between the parties, the Council applies a standard methodology to predict the lead in times for site delivery and build rates for strategic and non-strategic sites, basing these on past experience. For strategic sites without planning permission, the standard methodology anticipates an average of 2.5 years to the point of completion of the first dwellings. These are calibrated by applying information from site promoters or agents where evidence supports a site coming forward more quickly or the reverse.

401. The Examining Inspector was clear that a lot depends on whether the committed and proposed sites come forward in line with the anticipated timescale in the housing trajectory. Since March 2016 it is evident there has been slippage in the anticipated timescales for delivery of a number of the strategic sites when the March 2017 HMU and the March 2016 position are compared. Delivery in 2016/17 of 1,762 dwellings also fell short of the anticipated trajectory of 2,955 dwellings and in 2017/18 the target of 3,373 dwellings looks like being short by approximately 130 units. Although the CELPS is only two years old, and inertia caused by such factors as the absence of the plan and the unpredictabilities of appeal-based permissions are no longer present, thus potentially hastening delivery, it is difficult to

<sup>36</sup> CD29, Paragraph 13 White Moss Appeal.

---

escape the conclusions of the two previous Inspectors<sup>37</sup> that the assumed delivery rates of the housing trajectory have in fact failed.

402. Although there are positive signals that delivery is picking up, also recognised in the two previous appeals, it is inevitably perhaps in the light of their wider conclusions the Council also presents an analysis of 16 specific sites to demonstrate that on-the-ground delivery is in fact meeting or exceeding the expectations of the trajectory.
403. The evidence here is initially compelling. The Council suggest a commencement period post-detailed consent averaging around 5 months and for those with outline consent around 1.47 years. Such evidence suggests that just under half the chosen sites have started ahead of expectations in the HMU (the 'in principle' expectation time of 2.5 years), an indicator, the Council suggest, of likely commencement rates in the future. This evidence is also supported by feedback from developers and promoters, offering a site specific record of particular circumstances. With the 'in principle' figures consolidated by these accelerated lead-in times delivering above expectation numbers, the Council maintain a 5 supply of 5.35 years with a 20% buffer and 5.83 years with 10% buffer applied, as identified in their post rFramework submissions.
404. However, by the Council's own admission this assessment, though 'decent' was not 'comprehensive'. Indeed, numbering just 16 sites, and without a transparent methodology for selection, it is difficult to avoid the conclusion offered by the appellant that there may have been an element of inadvertent self-selection in the process, and that such evidence does not, of itself, convincingly establish a significant upward trend in delivery. Moreover, this, and the 'in principle' evidence, needs to be considered against that presented (and recalibrated following the round table discussion at the Inquiry) in the context of the site specific evidence presented by the appellant, covering a total of 41 sites within the district. Without reference to each detailed site-specific analysis the sum of the appellant's conclusions on lead in time to construction anticipates 1 year from submission to grant of outline consent; 1 year to reserved matters application; 6 months to their determination and 1 year to the completion of the first dwelling, a total lead-in time of 3.5 years. Such an analysis, as the appellant points out, correlates with the broad conclusions of both Inspectors in the White Moss and Park Road cases, with the Park Road Inspector identifying an average of between 3 and 4 years for strategic sites without planning permission to first completion<sup>38</sup>.
405. With such lead-in times applied to the 41 sites identified in the appellant's case and the commensurate reduction in the number of units accounted), the broad slippage in delivery previously identified repeated, the appellant identifies a 4.25 year supply with the 20% buffer applied and a 4.64 year supply with the lower 10% buffer used. Even if one were to add the 5% of the total discounted by the appellant to account for lapsed planning permissions as the Council advise (or any part lesser %), this would still not achieve the five year supply threshold, even with a 10% buffer applied.

---

<sup>37</sup> Those who determined White Moss and Park Road.

<sup>38</sup> Paragraph 51, APP/R0660/W/17/3168917.

- 
406. Moreover, and notwithstanding the various submissions to the Inquiry, paragraph 67 of the revised Framework clarifies the definition of the term 'deliverable' in relation to the supply of housing, setting this out in Annex 2 therein. In summary the definition applies to two categories of sites; those lesser sites and those with planning permission, which should be considered deliverable and; sites without planning permission in principle or allocated in development plans. These should now only be considered deliverable where there is clear evidence that housing completions will begin on site within five years. This represents a significant shift in emphasis from the previous Framework position; now the latter sites are no longer to be included unless there is specific evidence that they will indeed deliver within the five year period. These clarifications effectively supersede interpretations around the St Modwen case<sup>39</sup> that preoccupied the evidence on housing delivery heard at the Inquiry.
407. 34 of the 41 sites identified by the appellant were those without planning permission, those with outline planning permission or those also subject to section 106 commitments. Whilst the Council, on notification of the revisions to the Framework, chose not to address these sites in any detail, it is clear that by default, those within the latter category, without the clear evidence that completions will begin within five years, must now be at risk of dropping out of the calculation. This being so, to Council's position of asserting a 5.35 year supply with a 20% looks to be increasingly untenable, whilst that of the appellant's assessment of 4.25 years, and even that of 4.64 years with a reduced 10% buffer, looks the more robust. Whilst the conclusions reached by the Inspector in the Wrenbury case<sup>40</sup> take a contrary view on the 5 year land supply position, this appeal was determined prior to the publication of the Framework and the weight to be conferred it is very significantly reduced as a result.
408. Even if the most generous conclusion is reached, there has to be reasonable doubt that the Council is able to demonstrate a five year supply of housing land. Thus the precautionary approach taken by the two Inspectors in the White Moss and Park Road decisions may equally and rightly apply here. Whilst such a conclusion may not only be viewed as consistent with the previous approach, it also now enjoys the support of the High Court in the form of the dismissal of the Shavington case<sup>41</sup> (previously advised of by the Council) which had sought to demonstrate, by proxy reference to White Moss and Park Road, that the 'precautionary approach' adopted by the two previous Inspectors, and as is applied here, was unlawful. Such a view was comprehensively rejected by the Court. This case however also predated the publication of the revised Framework and the editing-out of paragraph 49 of the former document making reference to the requirement for Councils to demonstrate a five year supply of housing sites. However this changes little beyond the structure of the document. Paragraph 11 at sub paragraph d) though footnote 7 makes clear

---

<sup>39</sup> St Modwen Developments Ltd v Secretary of State for Communities and Local Government [2017] EWCA Civ 1643.

<sup>40</sup> APP/R0660/W/17/3176449 appended to the Council's NPPF revisions submission IDXX.

<sup>41</sup> [2018] EWHC 2906 (admin). Case No. CO/1032/2018.

---

that where a local authority cannot demonstrate a five year supply of deliverable housing sites policies most important for determining the application can be considered out-of-date. The delegation of the need to identify a supply to a foot note does not diminish the status of the policy as paragraph 3 of the rFramework makes clear; 'The Framework should be read as a whole (including footnotes and annexes).

409. On the basis of the evidence presented, the Council is unable to demonstrate a five year supply of housing sites. In accordance with paragraph 11 of the rFramework therefore, the policies most important for determining these applications are out-of-date. Their status as such will thus need to be taken into account in the final planning balance.

*Need for a mixed use development*

The relevant preceding paragraphs for the Appellant are 110-112.  
The relevant preceding paragraphs for the Council are 279-283.

410. The Council argue in closing that disaggregating the employment component of the scheme and accounting for it in the context of employment floor space would add some 10% to the appropriate employment floor space required by policy. This would amount the Council suggest to 'very significant levels of unplanned growth'. However, the supply of employment land, over and above development plan targets or otherwise, has hitherto not formed part of the Council's case, that application having always been viewed as a mixed use scheme, led by the significant residential component that has always remained the focus of the Council's and the Secretary of States considerations. This is the right approach as to do otherwise would be to invite independent evaluation of its constituent elements across the board. The Secretary of State is invited to consider the proposal as a whole and against the substantive policy issues hitherto set out.

*Distortion of the Council's Spatial Vision*

The relevant preceding paragraphs for the Appellant are 112-121.  
The relevant preceding paragraphs for the Council are 284-287 & 325-326.

411. The Council argue that as Nantwich has achieved target numbers identified in the CELPS and to allow further development above that number would serve now only to distort the spatial vision of the strategy in conflict with its broad strategic policies PG2 and PG7. However, the numbers set out therein are expressed as neither a ceiling not a target to be reached. Moreover, the supporting material for the policy advises such numbers as being an indicative distribution, and no more. Whilst a development of a scale reaching way beyond these aspirational targets may well be seen as distorting the spatial vision, in the context of the phrasing characterised above, the development proposed here cannot be considered of that magnitude. Indeed, it also remains consistent with the policies of the rFramework in paragraphs 59 and 60, which continue to emphasise the imperative of significantly boosting the supply of homes, and in so doing, determining the minimum, not the maximum number of homes needed in differing circumstances. There is therefore no breach of

---

policies PG2 and PG7 of the CELPS, and therefore no policy-based harm to consider in the planning balance in this regard.

### **The benefits of the scheme**

The relevant preceding paragraphs for the Appellant are 126-128.

The relevant preceding paragraphs for the Council are 291-294 & 303-322.

412. The construction of new housing would create jobs, and support growth, as would new space for employment development. Notwithstanding the Council's view that the employment component of the scheme is not required, such provision, in close proximity to services, new residential property and transport links is likely to prove an attractive offer, and would readily therefore contribute to the growth of the local economy. Nantwich is also one of the preferred locations for development in the CELPS and there is no dispute that in locational terms at least, the site is in a sustainable location. Such recognised benefits garner a medium measure of weight.
413. The provision of a new primary school site to meet future educational provision, the children's play area, and extensive areas of public open space including a new village green and an enlarged LNCA would represent significant additional social benefits, not just to new occupiers of the development but to those in the locality as well. There would be contributions towards new bus stops and an extensive service linking with the town centre and railway station in addition to new path and cycle path networks offering alternative transport modes to the town and its services. Beyond necessary mitigation, these are also measurable social benefits that weigh in favour of the proposals.
414. In both the local and national context the delivery of significant numbers of market housing in a sustainable location is a significant benefit. Nationally, it is a government policy imperative to boost the supply of housing and this is given fresh emphasis in the recently published rFramework. Locally, although the Council fear the final yield of the site within the five year supply period may be curtailed this is rebutted convincingly by the appellant, and the site will in all probability make a contribution to housing numbers within the anticipated part of the plan period. This has all the more value given the identified shortfall in delivery. In both contexts therefore the delivery of market housing merits substantial weight being afforded in favour of the scheme.
415. The proposal would not provide affordable housing above that anticipated by policy, nor would it be above the level expected on other sites. However, such provision would be a tangible benefit when judged against the identified need in the district. Nor is there a suggestion that the contribution, if lost, would be made up from other developments. In light of the above, this contribution to affordable housing also merits significant weight.
416. It was clear from the representations made at the Inquiry that there was a significant degree of apprehension amongst local residents over any increase in traffic numbers in the locality as a result of the development proposed. However, such apprehension does not have the support of technical evidence that would convincingly rebut the appellant's view, not challenged by the

---

Council, that no severe highway harms would result from the scheme. Such concerns therefore carry the most minimal of weight.

### **Planning balance**

417. Section 38(6) of the Planning and Compulsory Purchase Act 2004 requires that applications for planning permission be determined in accordance with the development plan unless material considerations indicate otherwise. Such a consideration of importance is the presumption in favour of sustainable development set out in paragraph 11 of the rFramework. The question of a 5 year housing land supply in relation to these appeals is very finely balanced. It is therefore recommended, in accordance with reasoning adopted in the White Moss and Park Road appeals, and as now endorsed by the Shavington case<sup>42</sup>, that a precautionary approach is applied, taking the worst-case position within the range on housing land supply presented, and apply the 'tilted balance' in sub-paragraph d) of paragraph 11 of the rFramework in the determination of these appeals. This makes clear that where the policies most important for the determination of the proposals are out-of-date, permission should be granted unless other policies of the rFramework dictate otherwise, or the adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the Framework taken as a whole.
418. In terms of the adverse impacts of the proposal, the appeal sites form part of the Open Countryside on the borders of Nantwich. As such the development is in clear conflict with the letter and purpose of Policies PG6, SD1 and SD2 of the CELPS, Policy RES5 of the CNLP and Policies GS, H1 and H5 of the S&BNP. However, the degrees of harm to visual amenity here, because of the very specific urbanised context of the site and the contribution open green space makes to the scheme, would, in actuality, be limited in extent.
419. It is also the case that the proposals would result in the loss of BMV and again this would be in conflict with Policy SE2 of the CELPS. No other substantive harms have been identified and other effects of the development can be effectively mitigated through the provisions of the section 106 obligations, thus rendering them neutral in the planning balance.
420. Set against these identified harms the development would deliver up to 189 dwellings. In the context of the national imperative to significantly boost the supply of homes, the identified shortfall in housing delivery over the plan period, and supported by the indicators that it may come forward to the market relatively quickly, this is a clear benefit meriting significant weight in favour of the scheme. This is the more so in light that the site the scheme would also include up to 30% affordable homes, secured through the S106 agreement. Given that there is an undisputed need for affordable housing in Cheshire East, which the appeal scheme would help meet, this is again a benefit meriting significant weight in favour of the proposals.

---

<sup>42</sup> Ibid.

- 
421. The development would also bring economic benefits in terms of direct and indirect employment during its construction phase, expenditure into the local economy and sustain further enterprise through the mixed uses on offer. Moreover, there are other social benefits in terms of the open space, improvements to sustainable transport connectivity and the scope for the development of a further primary education facility. These latter benefits would accrue not only to occupiers of the residential development proposed, but to others within the vicinity as well. Taken together these positive attributes can be afforded a medium degree of weight.
422. The Secretary of State will be mindful that both the CELPS and the S&BNP are relatively new components of the development plan, each of which has seen the subject considerable investment in terms of local resource and commitment and are which both relatively recently adopted and made. Moreover, there are also incipient signs that delivery of housing sites may indeed pickup more in accordance with expectations later in the plan period. The policies of the development plan should not therefore be set aside lightly. However, against the conflict with these policies, for which there is a presumption development shall be determined in accordance with, there are some material considerations of considerable importance and weight to consider.
423. The first is that despite the conflict with countryside policies, the degree of harm to visual amenity is in fact limited, and reflected in the Council's position on the proposals from the outset. More significantly however, the Council has been found unable to demonstrate a five year supply of housing land and this, in accordance with paragraph 11 of the rFramework and its attendant foot note 7, triggers the presumption in favour of sustainable development heralded therein on the basis that policies most important to the determination of the cases are out-of-date. The policies referred to above (PG6 and SE2 of the CELPS, Policy RES5 of the CNLP and Policies GS1, H1 and H5 of the S&BNP) have to be viewed as being the most import of policies for the determination of these proposals as they are critical to the permitting of residential development in open countryside and immediately adjacent to settlement boundaries. It must follow therefore that in light of the supply position they are out of date, thus diminishing the weight to be afforded them in the planning balance.
424. Moreover, it might be right that the aims and purposes of Policy RG6 remain consistent with those of the rFramework (as the Council maintain). However, in the absence of a five year supply of housing land it has to be considered somewhat Canute-like to argue that the settlement boundaries drawn to reflect the past aspirations of the former local plan (2006-2011) can still be held to be not-out-of date. This is a conclusion all the more compelling given the evidence of appeals being allowed and the Council granting planning permission for development outwith these boundaries in years subsequent to their anticipated utility in order to meet supply. Neither does it come as a surprise that the LP Inspector for the CELPS anticipated that such boundaries would have to be reviewed in the future allocations component of the plan. This position is again reflected in the reasoning of the Inspector in the Park Road Appeal<sup>43</sup>.

---

<sup>43</sup> Ibid, paragraph 16 thereof.

---

425. All of these weighty considerations combine to reduce the weight to be applied to these policies in the light of the very particular supply situation identified in this case. Whilst there remains conflict with the policies of the development plan, these proposals would bring forward substantial benefits. These benefits are such that they are not significantly or demonstrably outweighed by the lesser harms identified. The proposals, presented in both appeals, therefore constitute the sustainable development for which the rFramework presumes in favour of.

### **Recommendation**

426. I recommend that both appeals should be allowed and planning permission granted subject to the attached Schedules of Conditions.

*David Morgan*

INSPECTOR

---

## Schedule of Conditions

### Appeal A

1. Details of appearance, access landscaping, layout and scale (hereinafter called "the reserved matters") shall be submitted to and approved in writing by the local planning authority (LPA) before any development begins, and the development shall be carried out as approved.
2. Application for approval of all the reserved matters shall be made to the LPA not later than three years from the date of this permission. The development hereby permitted shall begin not later than two years from the date of approval of the last of the reserved matters to be approved.
3. This permission shall refer to the following drawing numbers unless any other condition attached to the permission indicates otherwise:

Mixed Use and Access Applications Diagram – dwg SK15 Rev C  
(11 November 2017)

Mixed Use and Access Applications Diagram – dwg SK16 Rev C  
(11 November 2017)

Mixed Use and Access Applications Diagram – dwg SK17 Rev C  
(11 November 2017)

Mixed Use and Access Applications Diagram – dwg SK19 Rev D  
(11 November 2017)

4. No development shall commence until details of a scheme for the disposal of foul and surface water from the development has been submitted to and approved in writing by the LPA. The scheme shall make provision, inter alia for the following:
  - a. this site to be drained on a totally separate system with all surface water flows ultimately discharging in to the nearby watercourse
  - b. a scheme to limit the surface water run-off generated by the proposed development
  - c. a scheme for the management of overland flow
  - d. the discharge of surface water from the proposed development to mimic that which discharges from the existing site.
  - e. if a single rate of discharge is proposed, this is to be the mean annual run-off (Qbar) from the existing undeveloped greenfield site. For discharges above the allowable rate, attenuation for up to the 1% annual probability event, including allowances for climate change.
  - f. the discharge of surface water, wherever practicable, by Sustainable Drainage Systems (SuDS).
  - g. Surface water from car parking areas less than 0.5 hectares and roads to discharge to watercourse via deep sealed trapped gullies.
  - h. Surface water from car parking areas greater than 0.5 hectares in area, to have oil interceptor facilities such that at least 6 minutes retention is provided for a storm of 12.5mm rainfall per hour.

---

The development shall not be occupied until the approved scheme of foul and/or surface water disposal has been implemented to the satisfaction of the LPA.

5. No development shall commence until a scheme for the provision and management of an 8 metre wide buffer zone alongside the watercourse on the northern boundary measured from the bank top (defined as the point at which the bank meets the level of the surrounding land) has been submitted to and approved in writing by the LPA. The scheme shall include:

- plans showing the extent and layout of the buffer zone
- details of any proposed planting scheme (for example, native species)
- details demonstrating how the buffer zone will be protected during development and managed/maintained over the longer term including adequate financial provision and named body responsible for management plus production of detailed management plan.

This buffer zone shall be free from built development other than the proposed access road. Thereafter the development shall be carried out in accordance with the approved scheme and any subsequent amendments shall be agreed in writing with the LPA.

6. No development shall commence within the application site until the applicant has secured the implementation of a programme of archaeological work in accordance with a written scheme of investigation which has been submitted to and approved by the LPA.

7. No development shall take place until a Construction Method Statement (CMS) has been submitted to and approved in writing by the LPA. The approved CMS shall be adhered to throughout the construction period. The CMS shall provide for:

- a. the hours of construction work and deliveries
- b. the parking of vehicles of site operatives and visitors
- c. loading and unloading of plant and materials
- d. storage of plant and materials used in constructing the development
- e. wheel washing facilities
- f. measures to control the emission of dust and dirt during construction.
- g. details of any piling operations including details of hours of piling operations, the method of piling, duration of the pile driving operations (expected starting date and completion date), and prior notification to the occupiers of potentially affected properties
- h. details of the responsible person (e.g. site manager / office) who could be contacted in the event of complaint

- 
- i. control of noise and disturbance during the construction phase, vibration and noise limits, monitoring methodology, screening, a detailed specification of plant and equipment to be used and construction traffic routes
  - j. waste management: there shall be no burning of materials on site during demolition/construction.
8. No development shall take place on the commercial and retail element until a detailed noise mitigation scheme to protect the proposed dwellings from noise, taking into account the conclusions and recommendations of the Noise Report submitted with the application, shall be submitted to and agreed in writing by the LPA. The approved mitigation measures shall be implemented before the first occupation of the dwelling to which it relates.
9. Prior to the commencement of development:
- a. A contaminated land Phase 2 investigation shall be carried out and the results submitted to, and approved in writing by the LPA.
  - b. If the Phase 2 investigations indicate that remediation is necessary, a Remediation Statement including details of the timescale for the work to be undertaken shall be submitted to, and approved in writing by, the LPA. The remedial scheme in the approved Remediation Statement shall then be carried out in accordance with the submitted details.
  - c. Should remediation be required, a Site Completion Report detailing the conclusions and actions taken at each stage of the works including validation works shall be submitted to, and approved in writing by, the LPA prior to the first use or occupation of any part of the development hereby approved.
10. No development shall commence until a scheme of destination signage to local facilities, including schools, the town centre and railway station, to be provided at junctions of the cycleway/footway and highway facilities shall be submitted to and agreed in writing by the LPA. The approved scheme shall be provided in parallel with the cycleway/footway and highway facilities.
11. No development shall commence until schemes for the provision of MOVA traffic signal control systems to be installed at the site access from Peter Destapleigh Way and at the Audlem Road/Peter Destapleigh Way traffic signal junctions, has been submitted to and approved in writing by the LPA. Such MOVA systems shall be installed in accordance with approved details prior to the first occupation of the development hereby permitted.
12. The Reserved Matters application shall include details of parking provision for each of the buildings proposed. No building hereby permitted shall be occupied until the parking and vehicle turning areas for that building have been constructed in accordance with the details shown on the approved plan. These areas shall be reserved exclusively thereafter for the parking and turning of vehicles and shall not be obstructed in any way.
13. Prior to the first occupation of the development hereby permitted a Travel Plan shall be submitted to and approved in writing by the LPA. The Travel Plan shall

---

include, inter alia, a timetable for implementation and provision for monitoring and review. None of the building hereby permitted shall be occupied until those parts of the approved Travel Plan that are identified as being capable of implementation after or before occupation have been carried out. All other measures contained within the approved Travel Plan shall be implemented in accordance with the timetable contained therein and shall continue to be implemented, in accordance with the approved scheme of monitoring and review, as long as any part of the development is occupied.

14. No development shall take place until a scheme (including a timetable for implementation) to secure at least 10% of the energy supply of the development from decentralised and renewable or low carbon energy sources shall be submitted to and approved in writing by the LPA. The approved scheme shall be implemented and retained as operational thereafter.

15. Prior to first occupation of each unit, Electric Vehicle Infrastructure shall be provided to the following specification, in accordance with a scheme, submitted to and approved in writing by the LPA which shall include the location of each unit:

- A single Mode 2 compliant Electric Vehicle Charging Point per property with off road parking. The charging point shall be independently wired to a 30A spur to enable minimum 7kW charging.
- 5% staff parking on the office units with 7kW Rapid EV with cabling provided for a further 5% (to enable the easy installation of additional units).

The EV infrastructure shall be installed in accordance with the approved details and thereafter be retained.

16. Prior to any commencement of works between 1st March and 31st August in any year, a detailed survey shall be carried out by a suitably qualified person to check for nesting birds and the results submitted to the LPA. Where nests are found in any hedgerow, tree or scrub to be removed (or converted or demolished in the case of buildings), a 4m exclusion zone shall be left around the nest until breeding is complete. Completion of nesting shall be confirmed by a suitably qualified person and a further report submitted to LPA before any further works within the exclusion zone take place.

17. Prior to the commencement of development detailed proposals for the incorporation of features into the scheme suitable for use by breeding birds shall be submitted to and approved in writing by the LPA. The approved features shall be permanently installed prior to the first occupation of the development hereby permitted and thereafter retained, unless otherwise agreed in writing by the LPA.

18. The reserved matters application shall be accompanied by a detailed Ecological Mitigation strategy including a great crested newt mitigation strategy informed by the recommendations of the submitted Protected Species Impact Assessment and Mitigation Strategy dated 2013 prepared by CES

---

Ecology (CES:969/03-13/JG-FD). The development shall be implemented in accordance with the measures of the approved ecological mitigation strategy.

19. Prior to the commencement of each phase of development details of the proposed lighting scheme should be submitted to and approved in writing by the Local Planning Authority.
  - a) The details shall include the location, height, design and luminance and ensure the lighting is designed to minimise the potential loss of amenity caused by light spillage onto adjoining properties. The lighting shall thereafter be installed and operated in accordance with the approved details.
  - b) The scheme should include dark areas and avoid light spill upon bat roost features, boundary hedgerows and trees. The scheme should also include details of: Number and location of proposed luminaires; Luminaire light distribution type; Lamp type, lamp wattage and spectral distribution; Mounting height; Orientation direction; Beam angle; Type of control gear; Proposed lighting regime; and Projected light distribution maps of each lamp. The lighting scheme shall be installed in accordance with the approved details.
20. All trees with bat roost potential as identified by the Peter Destapleigh Way Ecological Addendum Report 857368 (RSK September 2017) shall be retained, unless otherwise agreed in writing by the Local Planning Authority
21. The first reserved matters applications shall include a Design Code for the site and all reserved matters application shall comply with provisions of the Masterplan submitted with the application and the approved Design Code.
22. Prior to the commencement of each phase of development a scheme for landscaping shall be submitted to the Local Planning Authority and approved in writing. The approved landscaping scheme shall include details of any trees and hedgerows to be retained and/or removed, details of the type and location of Tree and Hedge Protection Measures, planting plans of additional planting, written specifications (including cultivation and other operations associated with tree, shrub, hedge or grass establishment), schedules of plants noting species, plant sizes and proposed numbers/densities and an implementation programme.

The landscaping scheme shall be completed in accordance with the following: -

- a) All hard and soft landscaping works shall be completed in full accordance with the approved scheme, within the first planting season following completion of the development hereby approved, or in accordance with a programme agreed with the Local Planning Authority.
- b) All trees, shrubs and hedge plants supplied shall comply with the requirements of British Standard 3936, Specification for Nursery Stock. All pre-planting site preparation, planting and post-planting maintenance works shall be carried out in accordance with the requirements of British Standard 4428 (1989) Code of Practice for General Landscape Operations (excluding hard surfaces).

- 
- c) All new tree plantings shall be positioned in accordance with the requirements of Table 3 of British Standard BSD5837: 2005 Trees in Relation to Construction: Recommendations.
  - d) Any trees, shrubs or hedges planted in accordance with this condition which are removed, die, become severely damaged or become seriously diseased within five years of planting shall be replaced within the next planting season by trees, shrubs or hedging plants of similar size and species to those originally required to be planted.
23. An Arboricultural Impact Assessment, Tree Protection Plan and Arboricultural Method Statement in accordance with BS5837: 2012 Trees in Relation to Design, Demolition and Construction – Recommendations shall be submitted in support of any reserved matters application which shall evaluate the direct and indirect impact of the development on trees and provide measures for their protection.
24. No phase of development shall commence until details of the positions, design, materials and type of boundary treatment to be erected have been submitted to and approved in writing by the LPA. No building hereby permitted shall be occupied until the boundary treatment pertaining to that property has been implemented in accordance with the approved details.
25. The Reserved Matters application for each phase of development shall include details of bin storage or recycling for the properties within that phase. The approved bin storage facilities shall be provided prior to the first occupation of any building.
26. Notwithstanding the details shown on plan reference no. BIR.3790.09D (September 2012) access to the development herein permitted shall be exclusively from Peter Destapeleigh Way as shown on plan reference no. dwg SK16 Rev C (11 November 2017)
27. Unless otherwise agreed in writing, none of the dwellings hereby permitted shall be first occupied until access to broadband services has been provided in accordance with an action plan that has previously been submitted to and approved in writing by the LPA.

## Appeal B

1. The development hereby approved shall commence within three years of the date of this permission.
2. This permission shall refer to the following drawing numbers unless any other condition attached to the permission indicates otherwise:
  - a. Site Location Plan reference no. BIR.3790\_13
  - b. Site Access General Arrangement Plan reference no. SCP/10141/D03/ Rev D (May 2015).
3. No development shall commence until there has been submitted to and approved by the LPA a scheme of landscaping and replacement planting for the site indicating inter alia the positions of all existing trees and hedgerows within and around the site, indications of those to be retained, also the number,

---

species, heights on planting and positions of all additional trees, shrubs and bushes to be planted.

4. All planting, seeding or turfing comprised in the approved details of landscaping shall be carried out in the first planting and seeding seasons following the completion of the development whichever is the sooner; and any trees or plants which within a period of 5 years from the completion of the landscaping scheme die, are removed or become seriously damaged or diseased shall be replaced in the next planting season with others of similar size and species unless the LPA gives written consent to any variation.
5. Prior to the commencement of development or other operations being undertaken on site a scheme for the protection of the retained trees produced in accordance with BS5837:2012 Trees in Relation to Design, Demolition and Construction : Recommendations, which provides for the retention and protection of trees, shrubs and hedges growing on or adjacent to the site, including trees which are the subject of a Tree Preservation Order currently in force, shall be submitted to and approved in writing by the Local Planning Authority.
  - (a) No development or other operations shall take place except in complete accordance with the approved protection scheme.
  - (b) No operations shall be undertaken on site in connection with the development hereby approved (including any tree felling, tree pruning, demolition works, soil moving, temporary access construction and / or widening or any operations involving the use of motorised vehicles or construction machinery) until the protection works required by the approved protection scheme are in place.
  - (c) No excavations for services, storage of materials or machinery, parking of vehicles, deposit or excavation of soil or rubble, lighting of fires or disposal of liquids shall take place within any area designated as being fenced off or otherwise protected in the approved protection scheme.
  - (d) Protective fencing shall be retained intact for the full duration of the development hereby approved and shall not be removed or repositioned without the prior written approval of the Local Planning Authority.
6. No excavations for services, storage of materials or machinery, parking of vehicles, deposit or excavation of soil or rubble, lighting of fires or disposal of liquids shall take place within any area designated as being fenced off or otherwise protected in the approved protection scheme.
7. Prior to development commencing, a detailed Ecological Mitigation strategy including a great crested newt mitigation strategy informed by the recommendations of the submitted Protected Species Impact Assessment and Mitigation Strategy dated MARCH 2013 REVISION) prepared by CES Ecology (CES: 969/03-13/JG-FD) shall be submitted to and approved in writing by the Local Planning Authority. The development shall be implemented in accordance with the measures of the approved ecological mitigation strategy.
8. Prior to any commencement of works between 1st March and 31st August in any year, a detailed survey shall be carried out by a suitably qualified person to check for nesting birds and the results submitted to the LPA. Where nests are

---

found in any building, hedgerow, tree or scrub to be removed (or converted or demolished in the case of buildings), a 4m exclusion zone shall be left around the nest until breeding is complete. Completion of nesting shall be confirmed by a suitably qualified person and a further report submitted to LPA before any further works within the exclusion zone take place.

9. Prior to the commencement of development details of the proposed lighting scheme should be submitted to and approved in writing by the Local Planning Authority. The scheme should include dark areas and avoid light spill upon bat roost features, boundary hedgerows and trees. The scheme should also include details of: Number and location of proposed luminaires; Luminaire light distribution type; Lamp type, lamp wattage and spectral distribution; Mounting height; Orientation direction; Beam angle; Type of control gear; Proposed lighting regime; and Projected light distribution maps of each lamp. The lighting scheme shall be installed in accordance with the approved details.
10. Prior to the commencement of development , and to minimise the impact of the access road on potential wildlife habitat provided by the existing ditch located adjacent to the southern site boundary, the detailed design of the ditch crossing shall be submitted to and approved in writing by the LPA . The access road shall be constructed in full accordance with the approved details.
11. No development shall commence on site unless and until a Deed of variation under s106A TCPA 1990 (as amended) has been entered into in relation to the S106 Agreement dated 20 March 2000 between Jennings Holdings Ltd (1), Ernest Henry Edwards, Rosemarie Lilian Corfield, James Frederick Moss, Irene Moss, John Williams and Jill Barbara Williams (2), Crewe and Nantwich BC (3) and Cheshire County Council (4) to ensure that the Local Nature Conservation Area is delivered, maintained and managed under this permission.

## APPEARANCES

### FOR THE LOCAL PLANNING AUTHORITY:

Mr Reuben Taylor of Queen's Counsel

Instructed by the Solicitor to  
Cheshire East Council

He called:

Mr Richard Taylor BA (Hons) BTP MRTPI

Mr Adrian Fisher BSc MTPL MRTPI

### FOR THE APPELLANT:

Mr Paul Tucker of Queen's  
Counsel

instructed by Patrick Downes, Harris  
Lamb on behalf of Müller Property  
Group

Assisted by Mr Philip Robson  
of Counsel

He called:

Mr Jonathan Berry BA (Hons) Dip LA CMLI AIEMA M ArborA

Mr Patrick Downes BSc (Hons) MRICS

Mr Matthew Weddaburn BSc MA MRTPI

Mr William Booker BSc (Hons)

### INTERESTED PERSONS:

Councillor M Theobald

Stapeley & District Parish Council

Mr P Cullen

Resident

Councillor P Groves

Cheshire East Council

Mr P Staley

Resident

Ms J Crawford

Resident

Ms G Barry

Resident

---

Mr K Roberts

Resident

Councillor A Martin

Councillor

## RIGHT TO CHALLENGE THE DECISION IN THE HIGH COURT

These notes are provided for guidance only and apply only to challenges under the legislation specified. If you require further advice on making any High Court challenge, or making an application for Judicial Review, you should consult a solicitor or other advisor or contact the Crown Office at the Royal Courts of Justice, Queens Bench Division, Strand, London, WC2 2LL (0207 947 6000).

The attached decision is final unless it is successfully challenged in the Courts. The Secretary of State cannot amend or interpret the decision. It may be redetermined by the Secretary of State only if the decision is quashed by the Courts. However, if it is redetermined, it does not necessarily follow that the original decision will be reversed.

### SECTION 1: PLANNING APPEALS AND CALLED-IN PLANNING APPLICATIONS

The decision may be challenged by making an application for permission to the High Court under section 288 of the Town and Country Planning Act 1990 (the TCP Act).

#### Challenges under Section 288 of the TCP Act

With the permission of the High Court under section 288 of the TCP Act, decisions on called-in applications under section 77 of the TCP Act (planning), appeals under section 78 (planning) may be challenged. Any person aggrieved by the decision may question the validity of the decision on the grounds that it is not within the powers of the Act or that any of the relevant requirements have not been complied with in relation to the decision. An application for leave under this section must be made within six weeks from the day after the date of the decision.

### SECTION 2: ENFORCEMENT APPEALS

#### Challenges under Section 289 of the TCP Act

Decisions on recovered enforcement appeals under all grounds can be challenged under section 289 of the TCP Act. To challenge the enforcement decision, permission must first be obtained from the Court. If the Court does not consider that there is an arguable case, it may refuse permission. Application for leave to make a challenge must be received by the Administrative Court within 28 days of the decision, unless the Court extends this period.

### SECTION 3: AWARDS OF COSTS

A challenge to the decision on an application for an award of costs which is connected with a decision under section 77 or 78 of the TCP Act can be made under section 288 of the TCP Act if permission of the High Court is granted.

### SECTION 4: INSPECTION OF DOCUMENTS

Where an inquiry or hearing has been held any person who is entitled to be notified of the decision has a statutory right to view the documents, photographs and plans listed in the appendix to the Inspector's report of the inquiry or hearing within 6 weeks of the day after the date of the decision. If you are such a person and you wish to view the documents you should get in touch with the office at the address from which the decision was issued, as shown on the letterhead on the decision letter, quoting the reference number and stating the day and time you wish to visit. At least 3 days notice should be given, if possible.

EP5G

## Appeal Decision

Inquiry Held on 20-23 August 2019

Site visits made on 19 and 22 August 2019

**by John Felgate BA(Hons) MA MRTPI**

an Inspector appointed by the Secretary of State

**Decision date: 16<sup>th</sup> September 2019**

---

**Appeal Ref: APP/R3650/W/19/3227970**

**Land to the south of Cox Green Road, Rudgwick, Surrey**

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant outline planning permission.
  - The appeal is made by Parkes Limited against the decision of Waverley Borough Council.
  - The application Ref WA/2018/1109, dated 25 April 2018, was refused by notice dated 7 November 2018.
  - The development proposed is the erection of 53 dwellings with associated access, car parking, open space and drainage ponds.
- 

### Decision

1. The appeal is dismissed.

### Preliminary Matters

2. The appeal proposal seeks outline permission, with all details reserved except for access. In so far as the submitted plans include other details, I have treated these as illustrative.
3. Prior to, or during the inquiry, the appellants tabled a revised illustrative layout plan, a landscape and ecology master plan, a parameters plan, a proposed footway plan, a revised drainage strategy, and an updated reptile survey. No objections have been received to these additional documents, and I have taken them into account in my decision.
4. During the inquiry, the appellants entered into a Section 106 agreement with Waverley Borough Council (WBC) and Surrey County Council (SCC), and unilateral undertakings with WBC and West Sussex County Council (WSCC). In summary, these provide for: 30% affordable housing, a play area, a sustainable drainage system, vehicular access, a new footway along Cox Green Road, a crossing point on Church Street, improvements to off-site footpaths to the west, travel vouchers, a travel plan, and ecological mitigation.
5. In the light of these amended submissions and planning obligations, the Council withdrew a number of its original Refusal Reasons (RRs). These were RR4 which related to housing tenure and mix, RR6 relating to development north of Cox Green Road, RR7 relating to children's play space, RR8 regarding pedestrian access, RR9 relating to impacts on wildlife, and RR14 which related to sustainable travel.
6. Prior to the inquiry, the Council also accepted that a number of its other RRs should be withdrawn, because they related to matters that were already

covered by the Community Infrastructure Levy, which had been introduced in October 2018. These were RR11 which sought a contribution to education, and RRs 10 and 13, which in any event duplicated each other in seeking contributions to recreation and leisure facilities.

7. RR12, which sought a contribution in respect of waste and recycling, was also withdrawn, in favour of dealing with the matter by means of a condition.
8. As a result of these withdrawals, the remaining RRs are Nos 1, 2, 3 and 5, relating to planning policy, character and appearance, and heritage impact.

### **Main Issues**

9. In the light of all the submissions before me, the main issues in the appeal are:
  - whether the Borough of Waverley has an adequate supply of land for housing;
  - whether the proposed development would accord with the WBLP's policies for the location of new housing;
  - the development's effects on the character and appearance of the area and its landscape;
  - and the effects on the setting of the listed building 'Crouchers'.

### **Reasons for Decision**

#### *Supply of land for housing*

10. The Council's view of the housing land supply, for the 5-year period 2019-24, is set out in the Position Statement published in July 2019. The requirement figure of 5,501 dwellings, is agreed between the parties, and is derived from the housing policies of the Waverley Borough Local Plan Part 1 (the WBLP), adopted in February 2018. Against this figure, the Position Statement shows a maximum supply of 5,720 units. In subsequent correspondence, the Council has conceded an adjustment of minus 12 units. The adjusted supply is therefore now 5,708 units, or a surplus of 207 units. In terms of years' supply, this equates to just under 5.2 years.
11. The requirement in the National Planning Policy Framework (the NPPF) is for a supply of sites that are deliverable. The meaning of 'deliverable' in this context is set out in the NPPF's Glossary, and further clarified in the Planning Practice Guidance (the PPG). Following the changes made to the NPPF in July 2018, sites for more than minor development, which do not have detailed planning permission, can only be considered deliverable where there is clear evidence that housing completions will be achieved within the relevant 5-year period. In the present case, the sites that are disputed between the parties<sup>1</sup> all come within this category.

#### *Dunsfold*

12. The former aerodrome site now known as Dunsfold Park is allocated for 2,600 dwellings, and has outline permission for 1,800 dwellings plus other uses<sup>2</sup>. Out of this total, the Council's 5-year supply relies on 463 units being delivered by

---

<sup>1</sup> As listed in the schedule of disputed sites, jointly tabled at the inquiry

<sup>2</sup> The permission is described as a hybrid, but with the detailed elements relating to matters of roads and infrastructure only

April 2024, with the first 50 completed dwellings coming in the year 2021/22, and the build rate accelerating significantly thereafter. The dispute between the parties centres on the length of the lead-in period, prior to those first house completions.

13. The Council's assumptions rest principally on a pro-forma return from the site's lead developer, but the details contained in that document are scant. Although estimated numbers and dates are presented, there is no explanation of how the timing is to be achieved. There is no indication of the intended timescales for submitting and approving reserved matters, including any further public consultation. Neither is there any breakdown of the advance works that are likely to be needed on-site, for discharging conditions, site preparation, and installing infrastructure. On a development of this scale, the planning and programming of these stages is likely to be more complex than on smaller sites, but the evidence contains none of these important details. There is therefore no evidence that house completions can realistically be achieved by 2021/22.
14. I have had regard to the WBLP Examination report<sup>3</sup>, and to the Dunsfold delivery report<sup>4</sup>, but these clearly cannot reflect the up-to-date position now. I note that a Planning Performance Agreement (PPA) has been entered into, but this deals only with the approval stages, and anyway does not appear to set out any overall programme. There is no evidence that the award of Garden Village status will have any effect on the timescale. I also note that an application has recently been made to vary the outline permission, in respect of the site access, and there is no indication as to how this may affect the programme which was drawn up prior to that.
15. Having regard to the NPPF's revised definition of deliverability, I can see little if anything that amounts to clear evidence that any completions will be achieved on the site within the relevant 5-year period. Although the PPG refers to PPAs and information from developers, it seems to me that the evidential value of these must be dependant on their content. In this case there is no clear evidence of any real progress since the granting of the outline permission in March 2018.
16. To my mind, having regard to the presumptive effect of the NPPF definition, these circumstances would justify excluding Dunsfold from the current supply in its entirety. But nevertheless, the evidence before me challenges the numbers rather than the principle of the site's inclusion. The appellants, somewhat generously, accept a realistic prospect in respect of a reduced figure of 232 units within the relevant period, and in the circumstances I consider this an appropriate number to adopt for my calculations too. This reduces the Council's supply by 225 dwellings.

*Milford and Coxbridge sites*

17. The land opposite Milford Golf Course has outline permission for 200 dwellings, and some progress has been made on submitting reserved matters and discharging conditions. The Council envisages the whole site being built-out within the relevant 5-year period. However, the Council relies principally on a pro-forma sheet dating from 2017, and even that information seems to offer

---

<sup>3</sup> The WBLP Examination Inspector's report dated 1 February 2018, based on hearings held in June and July 2017

<sup>4</sup> 'Dunsfold Aerodrome Delivery Rates Assessment', Troy Associates, Nov 2016

limited support for the Council's current assumptions. There is no evidence from the site's current developer, and no evidence of any dialogue with that company. The Council's evidence to the present inquiry is contradictory as to whether the first completions are expected in 2021/22 or 2022/23<sup>5</sup>. The latter programme would depend on a build rate of 100 units per annum, from the start, and the Council agrees that this could only be achieved with two outlets throughout. None of these assumptions are corroborated. There is further uncertainty regarding a restrictive covenant, which may need reference to the Lands Tribunal. The Council's assumptions are not necessarily unrealistic, but neither have they been shown to be clearly realistic; for the site to be deliverable, the evidence would need to be more convincing and more up to date. But again there is a measure of agreement between the parties with regard to at least some completions, 130 units in this case. In the circumstances, I accept that this figure should replace the Council's.

18. Coxbridge Farm is an allocated site and has a current outline application for 350 dwellings. The Council has included 200 units in its 5-year supply, with the first of these coming in 2021/22. There is a programme from the developer, but this is acknowledged to be over-optimistic, and is stated to be subject to the outcome of Section 106 negotiations. The Council has substituted its own more conservative assumptions as to the lead-in time and the annual build rate, based again on evidence prepared for the Local Plan examination<sup>6</sup>. I accept that this report is based on research specific to the local housing market, but even so, it does not look at the specific circumstances of individual sites. It is therefore not a substitute for site-specific information and knowledge. In the absence of a reliable programme from the site's own developer, and in view of the early stage of the planning process, the current evidence does not clearly show the Council's assumptions to have a realistic prospect of being achieved. For similar reasons to those applying to the Dunsfold and Milford sites, I consider the appellants' estimate, which again is 130 units, to be more realistic than the Council's figure.
19. In the remainder of the first section of the 'disputed sites' schedule, the nature of the disputed matters is such that the differences do not affect the outcome of the 5-year supply calculation, and I have therefore not considered these six sites further.
20. The effect of the two adjustments that I have identified, for the Milford and Coxbridge sites, is to reduce the Council's deliverable supply by a further 140 dwellings.

*Other disputed sites*

21. In view of my findings on the above, it is clear that the Council's 5-year supply must fall below the number that is required within that period. However, it remains necessary for me to get an approximate view of the shortfall's likely full extent. In the light of this, I have considered the other 24 disputed sites, in the second part of the joint schedule, more briefly.
22. None of the other disputed sites has any planning permission. Twelve of the sites are proposed allocations in emerging plans, but this does not ensure that they will be confirmed. About four others are on the Brownfield Register, which

---

<sup>5</sup> Shown as 2021/22 in the July 2019 Position Statement, and 2022/23 in the joint schedule of disputed sites

<sup>6</sup> 'Housing Land Supply and Housing Trajectory Contextual Note', Troy Associates, May 2017

indicates their suitability in principle, but not their capacity, nor their viability. Two sites are identified only in the SHLAA<sup>7</sup>, and this does not guarantee that permission would be granted. Three sites have no planning status at all. Seven of the sites have previously been refused permission, including five on appeal, and one other has an appeal outstanding. Four sites are in the Green Belt, and one in the AONB. At least two others are subject to other unresolved planning objections. At least three sites are currently occupied by existing uses, and are therefore not yet available. Two of these are dependant on new premises being built for their relocation. Several of the sites form extensions to sites that are already included, and thus their timing is contingent on that of the larger site. Some sites are dependent on agreements yet to be reached between two or more landowners.

23. None of these circumstances make it impossible that these sites could contribute to the housing land supply, but that is not the test of deliverability. To justify including sites of these types it would be necessary to produce clear and specific evidence, in sufficient detail, to show that the sites were available, suitable, and achievable, with a realistic prospect of delivery within the required timescale. I appreciate that this would be a large task, but self-evidently the size of that task is related to the number of sites without full planning permission that the Council seeks to rely on. On the evidence before me now, none of the sites in the second section of the schedule can currently justify being included in the 5-year supply.
24. I therefore consider that all 24 of these sites, in the second part of the disputed sites schedule, should be deleted. The result of this is to reduce the deliverable land supply by a further 563 units.

#### *Lapse rate*

25. I accept that, even with the above adjustments, the actual housing delivery over the next five years may well prove to be less than what is envisaged. But the exercise is not meant to be a forecast, it is simply a means of identifying sites that are capable of delivering the required numbers. Provided the assumptions and evidence are robust on a site-by-site basis, I see no need for the application of a lapse rate to achieve that purpose.

#### *Conclusion on land supply*

26. With the necessary deductions that I have identified, totalling 928 units, the Council's deliverable supply is reduced to 4,780. Against the agreed requirement figure of 5,501 units, this amounts to a supply of around 4.3 years.
27. It follows that the benefit of providing 53 dwellings, including 16 affordable, carries particular weight in the planning balance.

#### *Accordance with **the Local Plan's** locational policies for housing*

28. The principal policy for the location of housing is WBLP Policy SP2, which sets out the spatial strategy for the district. The policy's aims are to maintain the area's character and to meet development needs in a sustainable manner. To that end, the policy defines a settlement hierarchy, in which development is to be focussed at the four largest settlements, with moderate and limited levels of

---

<sup>7</sup> Strategic Housing Land Availability Assessment

- development at the second and third-tier villages respectively. After these, the fourth and final tier of the hierarchy is 'all other villages', where only modest growth is allowed, to meet local needs.
29. In the present case, Rudgwick is not identified as a settlement for development in any of the first, second or third tiers of the WBLP's settlement hierarchy (Sections 2, 3, and 4 of Policy SP2). Nor is the appeal site located at, or related to, any of the other settlements thus identified in any of these tiers. With regard to the third tier, the site does fall within the parish of Ewhurst, but it was accepted at the inquiry that the provisions in Policy SP2's Section 4 are intended to apply only to the named villages themselves, and not to whole parishes. I agree with that interpretation. In this case the appeal site is well away from Ewhurst village, and as such, it clearly does not benefit from the provisions of Section 4.
30. The site therefore falls to be considered, at best, within the bottom tier of Policy SP2's settlement hierarchy, where Section 5 of the policy permits modest growth, for local needs. In this context, the WBLP's text at 5.18 also refers to extremely limited, small scale development. Having regard to both the policy and the text, I can see no basis on which the expression 'modest growth' could be taken to include a development of 53 dwellings such as that now proposed. Nor is there any indication that this development would serve only local, as opposed to general, housing needs. It follows that the proposed scheme does not fall within the type or scale of development that Policy SP2 permits in locations such as this. Policy SP2 as a whole therefore offers no support to this proposed development.
31. In addition, the WBLP's housing policies also include Policy ALH1, which sets out the broad distribution of development. This includes 100 dwellings in Ewhurst, and in the context of this particular policy it is agreed that the distribution is based on parishes. However, it is not disputed that Ewhurst's requirement has now been met, through planning permissions granted on other sites. Policies SS1 – SS9 allocate strategic sites throughout the District, but the appeal site is not included in any of these. Again therefore, none of these housing policies supports the appeal proposal. Nor has any such support been identified in any other development plan policy.
32. I accept that Policy SP2 is permissively worded, and does not expressly presume against development in other locations. I also agree that Policy ALH1 is primarily a plan-making, rather than a decision-taking, type of policy. But together these two policies, together with the strategic allocations, represent the WBLP's housing strategy. There are no other policies relevant to housing location. The plan therefore does not provide for development at sites like the appeal site. There is nothing in these policies with which the appeal proposal can be said to accord, and the scheme therefore conflicts with the most relevant policies in this respect.
33. Having regard to the shortfall in the District's land supply, I agree that there is an urgent need to find additional sites. There is no certainty that sufficient numbers can be found without some degree of compromise, particularly in respect of the locational elements of policies such as SP2 and ALH1. But in these kind of circumstances, the way that the NPPF envisages that matters should be resolved is by adjusting the relative weight given to those policies, not by stretching their meaning. For the reasons already explained, I consider

that the relevant policies are not designed to accommodate the appeal proposal.

34. I also agree that alongside these matters, it will be relevant to consider the site's suitability, its sustainability credentials, and its relationship the WBLP's underlying aims. In the context of the appeal as a whole, these are material considerations. But that does not make them relevant to determining whether or not there is compliance with the particular policies that I have identified. I will return to these other material considerations later in my decision.
35. For the reasons stated, I conclude that the appeal proposal conflicts with the WBLP's strategy for housing location, and in particular with Policy SP2.

*Effects on the character and appearance of the area and its landscape*

*The existing situation*

36. The appeal site is part of a larger parcel of farmland which, in the appellants' LVIA<sup>8</sup> report, is given the descriptive name 'Rudgwick Park Fields'. This distinct landscape compartment comprises primarily open grass pasture, used for sheep grazing. The topography shelves gently at first, and then more steeply, away from the village, and towards Cox Green Road and the lower-lying fields beyond. Within the site, the grassland is punctuated by scattered tree groups and individual trees, mainly of oak, ash, hornbeam and other native broadleaved species, and these give the land a parkland quality. The small pond on the northern boundary is an attractive natural feature. Although the northern boundary is partly open, the other edges are strongly contained by tree belts and rear gardens, creating an enclosed, intimate character. Together, these ingredients combine to create an attractive and highly distinctive, small-scale, pastoral landscape, of considerable scenic quality. The appeal site itself forms an integral part of this landscape.
37. The appeal site is seen mainly from Footpath No 448 and from Cox Green Road. Approaching along the footpath, from the south-west, the path crosses the western part of the Rudgwick Park Fields, passes through a line of trees, and arrives at the south-western corner of the appeal site itself. From this relative high point there is a sweeping vista, down across the whole of the site. From this point, the undulating slope, the irregular-shaped partial enclosures of the tree groups, and the contrasting textures of the trees and grassland, form a striking composition. As the footpath continues north-westwards across the site, the view changes subtly, with different angles opening up, and new glimpses appearing through and beyond the trees. As I saw on my visits, the morning and evening shadows, from both the trees and the undulations, add a further dramatic visual element at these times of day. In addition, from the upper parts of the path, the site is framed by distant views of the Surrey Hills AONB<sup>9</sup>. Although the backs of some of the houses in Church Street are visible, the views from the Footpath 448 are focussed in the opposite direction, and thus the presence of this existing development does not detract from the site's rural tranquillity.
38. Seen from Cox Green Road, the site is viewed in the context of a quiet rural lane. On my visit I saw that, in summer, views are filtered by the boundary

---

<sup>8</sup> Landscape and Visual Impact Assessment

<sup>9</sup> Area of Outstanding Natural Beauty

hedge and occasional trees, but nevertheless, the site can be clearly seen, and its park-like nature is clearly evident. In winter, it seems likely that these views will be more open and its landscape qualities even more readily appreciated. Approaching from the west, the historic building 'Crouchers' is glimpsed, but there are no other signs of any nearby settlement, and thus the appeal site appears in a context that is almost entirely rural and undeveloped.

39. In addition, from the direction of Church Street, although the appeal site cannot be directly seen from here, there is an evident sense of the openness which exists behind the houses on the road frontage, including Crouchers and the adjoining properties. This openness is discernible from the absence of buildings, roofs, or other artefacts, and from the resulting glimpses of sky and more distant landscape features, as seen through the occasional gaps between the frontage development. Again, in winter these would be more readily perceived than at the time of my visit. The openness to the rear of the frontage buildings in this part of Church Street contributes to its distinctive character, as a transition zone between the village and the countryside.
40. To sum up with regard to the site as it currently exists, it seems to me that the appeal site embodies and exemplifies those qualities of intrinsic countryside character and beauty that are referred to in the NPPF, and which national policy requires to be recognised in planning decisions. I accept that public views of the site are largely confined to those that I have identified, and the site does not have any significant wider visibility. But nevertheless, in this case the site's value lies in its own intrinsic qualities, and in its contribution to the rural character and appearance of this particular part of the countryside.
41. In addition, in this case the appeal site is included within an Area of Great Landscape Value (AGLV), which is a designation originating at County level, and thus indicating its landscape importance in the context of the county of Surrey as a whole. As such, the site falls within the scope of the NPPF's advice relating to 'valued landscapes', which are to be protected and enhanced in a manner commensurate with their quality. In the light of the appeal site's own intrinsic qualities that I have identified, I see no reason to question its inclusion in the AGLV. It therefore seems to me that the designation reinforces the value that attaches to the site's landscape, and its contribution to the character and appearance of the area.

#### *The impact of the development*

42. The development now proposed would introduce onto the site 53 dwellings, roadways, gardens, fences, vehicles, lighting, a play area, and associated residential paraphernalia. Although the submitted plans are illustrative, they show that such a development could be attractively designed and laid out, and could create a pleasant residential environment. To my mind however, they do not suggest any way in which such a development could avoid completely changing the site's character from what exists now. I have no doubt that most of the existing trees could be retained, together with the pond, and indeed it might be that these features could be enhanced to a degree, by means of better and more active management. The development would also potentially have sufficient space for substantial new planting and landscaping. But the inclusion of positive elements such as these would not alter the fact that the site's present rural character and landscape quality would inevitably be lost,

and would be subsumed within the very different character that would result from any new residential development on this scale.

43. Seen from Cox Green Road, the development would involve physical changes both within the site and outside it. The existing views of open parkland, albeit partial and glimpsed, would be lost, irrespective of any new planting. The proposed new vehicular access would open up additional views into the development. There is no evidence that these views could be effectively screened. The access itself would have a 6m-radius bellmouth, a 5.5m roadway, and visibility splays, accompanied by road widening on the southern side. In addition, there would be a new footway along a 100m stretch of Cox Green Road, and into Church Street, replacing part of the existing verge, and further road widening on the opposite side. All of these would be urbanising features, on a largely undeveloped rural lane. Moreover, the new access would be sited more than 200m from the junction with Church Street, and thus well outside the perceived threshold of the village. The whole development would therefore appear as an isolated and incongruous incursion into an otherwise wholly rural environment.
44. For users of Footpath 448, the effect would be that the section of that path that runs through the appeal site would be urbanised. Instead of running through open fields, the path would run between houses and managed spaces, the surface itself would necessarily have to be made more durable, and the rural ambience would be lost. The experience of walking this route via Footpath 448 would thus be completely changed.
45. With regard to views from Church Street, although the development would not be prominent from this direction, it is likely that roofs, chimneys, lighting columns, or other taller elements would be visible from some view points. Although the submitted plans seek to show how development immediately behind Crouchers might be minimised, it seems unlikely that views from Church Street could be avoided altogether. The visible presence of built development in the background would erode the semi-rural character of this part of the village fringe.
46. I accept that the density proposed is not excessive, and that the illustrative scheme does not appear noticeably cramped. Judged on its own merits, the style of development and the overall approach shown in the submitted plans seems to me generally appropriate for many semi-rural locations. In this respect I find no conflict with WBLP Policy TD1. But these considerations do not outweigh the harmful impact that any residential development on this particular site would have, due to the loss of the existing valued landscape.
47. I conclude that the proposed development would have a seriously adverse effect on the character and appearance of the area and its landscape. As a result, the scheme conflicts with WBLP Policies RE1 and RE3, which seek to protect the intrinsic character and beauty of the countryside beyond the Green Belt, and the distinctive landscape of the AGLV.

### ***Effects on the setting of the listed building 'Crouchers'***

48. The property known as Crouchers comprises a timber-framed house in the form of two parallel ranges. The front range faces Church Street, and the rear looks out towards what is now the appeal site. The building dates from at least the 17<sup>th</sup> century. It was re-fronted in the 18<sup>th</sup> century, and further alterations

occurred in the 19<sup>th</sup>. The house originally had a smaller curtilage, which has been extended over time. From its earliest days, the property formed part of the small hamlet of Cox Green, which also included the surviving properties Dukes Cottage and Trade Winds. All three are listed, and form a recognisable group.

49. The significance of Crouchers as a heritage asset lies partly in the evidential value of its historic fabric, but also in the building's illustrative value with regard to the social history of the locality, and its aesthetic value as a charming and characterful structure in its own right.
50. The appeal site lies directly to the rear of the present day curtilage, and forms the dominant element in outward views from the listed building's first floor windows, and from its rear garden. From within the site, there are clear and unobstructed views of the building's rear elevation, including public views from Footpath 448. The appeal site is also seen in the foreground of views towards Crouchers from Cox Green Road, and forms the background to the important frontal views from Church Street. Consequently, the site is a major visual element in the listed building's setting.
51. Although there is no evidence of any functional or ownership connection between Crouchers and the appeal site, the physical proximity and visual relationship are not in doubt. In all of the available views, the appeal site contributes a sense of the openness, space and rural tranquillity of the surroundings, that the dwelling would have enjoyed up to the mid-20<sup>th</sup> century. Despite the changes that have occurred in field patterns and boundaries, the site's continued agricultural use reflects the role that it has had throughout the building's lifetime. Thus the appeal site, in its present use and undeveloped condition, helps to preserve a sense of timelessness and a connection to the past which contributes to the listed building's heritage significance.
52. As has already been set out above, the development now proposed would change the nature and character of the appeal site dramatically. Instead of looking out over a scene of agricultural pasture land, the view would be of a housing development. I accept that the central part of the site could be left free of buildings, as shown on the amended plans tabled at the inquiry, and that its treatment could be geared towards a more naturalistic appearance. But this would be little more than a corridor between areas of built development, which would still have to accommodate a play area and drainage basin, and would be crossed by roads and vehicles. The change in the site's character would therefore be immediately obvious in all of the relevant views, either to, from, or around the listed building. The adverse nature of this change would not be diminished by any attempt to recreate former field boundaries, as the new housing would be by far the most dominant element.
53. The loss of the appeal site's openness and agricultural character would therefore cause permanent and irreversible harm to the listed building's setting. In view of the duty imposed by the relevant legislation<sup>10</sup>, this harm carries considerable weight in the final planning balance.
54. Given the importance of the setting, it follows that the harm caused to it would also result in a loss of the building's significance. Although this harm to its significance would be 'less than substantial', the NPPF advises that the

---

<sup>10</sup> Section 66 of the Planning (Listed Buildings and Conservation Areas) Act 1990

conservation of designated heritage assets should be given great weight. This reinforces my view as to the weight in the present case. I will consider the relative weight of this harm against the scheme's benefits, later in my decision.

55. In the light of the above, I conclude that due to the harm that it would cause to the setting of the listed building Crouchers, the proposed development would conflict with Policy HA1 of the WBLP, and saved Policy HE3 of the Waverley Local Plan 2002.

## **Other Matters**

### *Sustainability of the location*

56. Rudgwick has a range of facilities broadly on a par with some of the WBLP's third-tier settlements. Had it been located within the Borough of Waverley, it is possible that the village might have been included in that category, although this is somewhat hypothetical. In the equivalent settlement policy for Horsham District<sup>11</sup>, it is classified as a medium village, where the level of local facilities is described as moderate. Although there is no evidence that any relevant Horsham policies would allow a development of the size now proposed, I accept that in principle Rudgwick is the type of settlement where opportunities for sustainable rural development on some level might be found. I also agree that a development of 53 dwellings could potentially provide support for existing services, both in the village itself and in the wider area.
57. However, the appeal site is at the furthest end of the village from most of the main facilities. It is beyond reasonable or regular walking distance from the local shops, schools, nursery, and village hall. The shortest route to these facilities, southwards via Footpath 448, is across open fields and a muddy track. The alternative of going east on the same path, to Church Street, involves climbing over a brick stile. Although the appellants are willing to pay for improvements to these routes, some sections are in other ownerships. The proposed new footway via Cox Green Road would be more user-friendly, but longer. Although buses can be hailed close to the site, there is no shelter and the service is limited.
58. Waverley is a predominantly rural Borough, and much of its new housing is therefore likely to be in locations that are at least partly dependent on car travel. But that does not mean that locational sustainability is irrelevant. In this case the appeal site is poorly integrated with the village, and the development would therefore not be well located to take advantage of the facilities that Rudgwick has to offer. The site is therefore not one which meets the aim of WBLP Policy ST1, to locate development where the opportunities for sustainable transport are maximised.
59. I note the contents of the Statement of Common Ground agreed between the appellants and SCC as Highway Authority. But for the reasons given, I do not necessarily agree with all the opinions expressed in that statement, particularly with regard to pedestrian accessibility. Since SCC was not represented at the inquiry, I have been unable to explore their reasoning further. Instead I have formed my own view, taking account of all the evidence before me.
60. I appreciate that the appeal site is outside the Green Belt and AONB, which together cover a good deal of the District. But this does not change the fact

---

<sup>11</sup> Policy 3 of the Horsham District Planning Framework, adopted November 2015

that, despite its proximity to Rudgwick, the site is poorly related to the village. Overall, I consider that the site's location in relation to Rudgwick adds no material weight in favour of the proposal.

#### *Planning obligations*

61. The obligations contained in the S.106 agreement and undertakings are summarised on the first page of this decision. In the light of the evidence presented, I agree that these obligations are necessary, directly related to the development, and reasonable in scale and kind. I have therefore taken them all into account in the overall planning balance.
62. The obligations in respect of the affordable housing, the play area, the crossing point on Church Street, and the provision of kissing-gates in place of stiles on some off-site public rights of way, would all have potential benefits for the general public. However, in the case of the crossing, that benefit would be very limited, as the likely level of usage by the public would be low. All of the other obligations are essentially mitigatory in nature, and their effect on the planning balance would therefore be neutral.

#### *Other benefits of the development*

63. In addition to the benefits already noted elsewhere in this decision, the proposed development would generate benefits to the local and national economy, in the form of capital investment, construction employment, local spending, and tax revenues. I have taken these into account in my decision.

### **Planning Balance and Conclusions**

64. For the reasons set out in this decision, I have found that the proposed development would conflict with WBLP Policy SP2 with regard to the Local Plan's housing strategy. It would also conflict with Policies RE1 and RE3 due to its impact on the landscape and countryside, and with WBLP Policy HA1 and saved Policy HE3 because of its impact on the setting and significance of the listed building Crouchers. There are no development plan policies that weigh positively in favour of any development, on this site. The appeal proposal therefore fails to accord with the development plan as a whole.
65. In addressing the planning balance, WBLP Policy SP1 requires a presumption in favour of sustainable development, similar though not identical to that in paragraph 11 of the NPPF. Where relevant policies are out of date, this includes the application of a 'tilted balance'. In the present case, since there is less than a 5-year supply of housing land, it follows that Policy SP2 must be considered out of date. All other policies relevant to the appeal remain up to date. My attention has been drawn to a recent High Court judgement<sup>12</sup> in which it was held that the out-datedness of a single policy did not necessarily trigger the tilted balance. But that case turned on NPPF paragraph 11, whereas Policy SP1 differs slightly in that regard, in that it refers to 'relevant policies' rather than the 'most important' policies. I have therefore applied the tilted balance provisions of Policy SP1, on a precautionary basis.
66. I now turn to the proposed scheme's planning benefits. In view of my finding that the housing land supply only amounts to 4.3 years' worth, the addition of 53 dwellings to the housing stock commands substantial weight in favour of the

---

<sup>12</sup> Wavendon Properties Limited v SoS and Milton Keynes DC [2019] EWHC 1524 (Admin)

appeal. In addition I note that there is a very high level of need in the affordable housing sector, including a long waiting list for properties specifically at Rudgwick. I therefore give particular weight to the 16 proposed units that would be affordable. With regard to the other benefits, I consider that the economic effects carry moderate weight; the play area and the kissing gates have modest weight; and the crossing point on Church Street has negligible weight.

67. Having regard to the heritage balance required by NPPF paragraph 196, if the less than substantial harm to the listed building were considered on its own, then on balance I consider that the benefits identified above would outweigh that impact. It follows from this that the tilted balance is not dis-applied on the basis of specific NPPF policies relating to heritage assets.
68. However, the overall planning balance requires consideration of the scheme's benefits against the totality of the harm. When the heritage harm is weighed together with the serious harm that I have found to the character and appearance of the area, then my view is that the position is reversed, and the benefits are significantly and demonstrably outweighed by the combination of these two adverse impacts.
69. The scheme therefore does not constitute sustainable development. It follows that the conflict with the development plan is not outweighed by the other material considerations.
70. I have had regard to all the other matters raised, but none leads me to any other conclusion than that planning permission should be refused. The appeal is therefore dismissed.

## Appeal Decision

Inquiry held on 15–18 and 24–25 February 2022

Site visit made on 28 February 2022

**by Andrew Dawe BSc (Hons), MSc, MPhil, MRTPI**

an Inspector appointed by the Secretary of State

Decision date: 20<sup>th</sup> June 2022

---

**Appeal Ref: APP/D1265/W/21/3284485**

**Station Road, Stalbridge, North Dorset DT10 2RJ (Easting 374204, Northing 118026)**

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant outline planning permission.
  - The appeal is made by Gladman Developments Ltd against the decision of Dorset Council.
  - The application Ref 2/2019/1799/OUT, dated 18 December 2019, was refused by notice dated 10 September 2021.
  - The development proposed is Outline planning application for the erection of up to 130 dwellings including affordable housing with public open space, structural planting and landscaping and sustainable drainage system (SuDS) with vehicular access point from Station Road. All matters reserved except for means of vehicular access.
- 

### Decision

1. The appeal is allowed and planning permission is granted for: Develop land by the erection of up to 130 No. dwellings (including affordable housing), form vehicular access from Station Road, public open space, landscaping and sustainable drainage system (SuDS) (Outline application to determine access) at Station Road, Stalbridge, North Dorset DT10 2RJ (Easting 374204, Northing 118026) in accordance with the terms of the application, Ref 2/2019/1799/OUT, dated 18 December 2019, subject to the conditions in the attached Annex.

### Preliminary Matters

2. For clarity, the site address in the above header is taken from the original planning application form, albeit that I note the Council's decision notice and the appeal form refer to Dorset as opposed to North Dorset and that the grid reference for the site is recorded as being slightly different with Easting 374230 and Northing 117990. Although different, I have no basis to consider that the address on the application form cannot be attributed to the appeal site.
3. The description of development in the above header is also taken from the original planning application form. The different description on the Council's decision notice is cross-referred to on the appeal form as being that which represents the Council's agreement to the change, albeit that the revised wording set out on the appeal form is different again. As the description on the decision notice is agreed by the Council, I have determined the appeal on that basis and included that amended description in the above decision.

4. The appeal relates to an outline planning application with all matters reserved for future consideration other than access. The matters of appearance, landscaping, layout and scale would therefore be for future consideration were the appeal allowed. The Appellant has however submitted a Development Framework Plan which, although not a plan sought for approval by the Appellant nevertheless shows, amongst other things, the proposed developable area; access and movement on the site, albeit that the Appellant confirmed at the Inquiry that access approval is only being sought at this outline stage for the access point to Station Road; and green infrastructure on the site; and which I have therefore taken into consideration. I have determined the appeal on that basis.
5. The Council's third reason for refusal in its decision notice relates to the lack of a section 106 agreement at that time to secure affordable housing or other off-site contributions required to make the development acceptable in planning terms. Such a certified document was submitted during the Inquiry. At the start of the Inquiry, I left the matter of whether or not acceptable provision would be made in respect of affordable housing and infrastructure to service the proposed development as a main issue on the basis that there remained a dispute between the parties on the matter of education provision. However, there is no dispute over the level of the proposed financial contribution. The Council's concern relates to the capacity of the existing school and any interim measures required to accommodate additional pupils, which I have dealt with under '*Other matters*' rather than as a main issue.
6. The Council raised concerns at the Inquiry about the impartiality of the evidence of the Appellant's planning witness, who is currently employed by the Appellant. In this context, the Council refers to another case relating to an appeal decision of the Upper Tribunal (Lands Chamber) relating to a certificate of appropriate alternative development, known as the 'Leech Homes' case. The question there related to the principle of whether the witness was aware of their primary duty to the Tribunal in relation to giving expert evidence, and were willing and able, despite the interest or connection with the litigation or a party thereto, to carry out that duty.
7. Having regard to the current appeal, the witness concerned clearly declared in his Proof of Evidence (PoE) that the PoE is true and has been prepared in accordance with the guidance of the RTPI, of which he is a member; that the opinions expressed in his evidence are his true and professional opinions; and that he is aware that his duty as a professional planner was to the Inquiry, irrespective of by whom he is employed. Notwithstanding the submission of the Council on this matter, I have received or heard no substantive evidence to indicate that the witness concerned has acted improperly having regard to the above declaration. As such, I have not assigned less weight to the witness' evidence as a result of the Council's concerns on this matter. Notwithstanding this, it is also the case, as was also stated in the Leech Homes case, that in relation to matters of opinion on issues of planning judgement, I am well equipped to form my own judgement on those issues, having regard to all of the evidence presented.

## Main Issues

8. The main issues are:

- i) the effect of the proposed development in terms of the Council's spatial strategy, with particular regard to housing distribution and location and sustainable travel, having regard to local and national policy;
- ii) the effect of the proposed development on the landscape character and appearance of the area, with particular regard to that relating to the countryside comprising the site and surrounding area and the setting of the existing settlement of Stalbridge;
- iii) the existing housing need and land supply position at local and strategic level.

## Reasons

### *Housing distribution and location and sustainable travel*

9. Policy 2 of the North Dorset Local Plan Part 1 (the Local Plan) states that all development should be located in accordance with the spatial strategy for North Dorset. It highlights that the four main towns will function as the main service centres in the District and will be the main focus for growth, both for the vast majority of housing and other development. It goes on to identify Stalbridge and eighteen larger villages as the focus for growth to meet the local needs outside of the four main towns. It does not highlight there to be a sequential approach with Stalbridge necessarily being the first preference ahead of the larger villages. However, that policy also highlights that outside of the defined boundaries of the four main towns, Stalbridge and the larger villages, the remainder of the District will be subject to countryside policies where development will be strictly controlled unless it is required to enable essential rural needs to be met. It goes on to state that at Stalbridge and all the District's villages, the focus will be on meeting local (rather than strategic) needs.
10. Policy 20 of the Local Plan sets out that development in the countryside outside defined settlement boundaries will only be permitted if it is of a type appropriate in the countryside, as listed in the supporting text, or for any other type of development, it can be demonstrated that there is an 'overriding need' for it to be located in the countryside. The proposed development, being located outside of the defined settlement boundary, and not fulfilling any of the criteria for being a type appropriate in the countryside under policy 20, would therefore conflict with policies 2 and 20 of the Local Plan.
11. Policy 6 of the Local Plan relates to housing distribution and amongst other things states that in the countryside (including Stalbridge and the villages) the level of housing and affordable housing provision will be the cumulative number of new homes delivered to contribute towards meeting identified local and essential rural needs; and that at least 825 dwellings will be provided in the

countryside (including Stalbridge and the villages) during the period 2011-2031. In this respect, I note that the Council highlights that the total of completions, extant planning permissions it anticipates being completed in the next five years, and a further 503 consented/allocated dwellings, amounts to 1711 dwellings. Whilst that figure would be dependent on the extent to which those not yet built are completed, it is clearly likely that whilst the policy figure of 825 dwellings is not a cap, it would be significantly exceeded. On that basis, the proposed additional major housing development in the location concerned would be in conflict with that principle of meeting a local need. I also note the Council's figure of c.33% existing consented expansion in the number of dwellings in Stalbridge since 2011 and that the proposals would clearly add to that cumulatively.

12. Section 5 of the National Planning Policy Framework (the Framework) relates to delivering a sufficient supply of homes and I have no reason to consider that the above Local Plan policies are not seeking to achieve this important principle. I shall consider separately below whether or not the Council is able to demonstrate a five year supply of deliverable housing sites.
13. The proposed development would be located immediately adjacent to the existing settlement. Furthermore, it would make provision for pedestrian access from the site to link to existing footways into the town and to the nearest bus stops. Additionally, it is agreed by the Council and Appellant that Stalbridge contains a range of services and facilities to meet the day to day needs of its residents, with the local centre about 800 metres away and other facilities and amenities within a 1.4 kilometres walking and cycling distance, which is generally accepted as being a reasonable walking distance. From my observations I have no substantive basis upon which to find otherwise.
14. In this respect, the services available in Stalbridge include a primary school and pre-school, a superstore and café, a post office, a pharmacy, opticians, Stalbridge Hub incorporating a community library, Stalbridge Hall, places of worship, a petrol station including a small convenience store, and a small number of other independent shops and services, public houses and takeaway food outlets, and various businesses including those located on Station Road Business Park. There is not however a GP surgery, hospital, secondary school, bank/building society, cinema/theatre, leisure centre and swimming pool. Notwithstanding the recreation ground, and the presence of a private tennis club, there are therefore limited sports facilities in the town, albeit that there are a number of sports teams, clubs and societies based in Stalbridge and the surrounding area.
15. I have also had regard to the 2018 Joint Retail, Commercial and Leisure Study (JRCLS) which highlights that there are only a small number of retail units within the town centre such that it has a more limited role and function in the District's network and hierarchy of centres, predominantly meeting the more day-to-day needs of its local resident catchment population. It finds that the centre has an average convenience provision mainly catering for the more frequent top-up shopping needs of the local catchment population, as well as the population of surrounding areas. It does however also state there to be an overall food and convenience provision below the national average, but noting the presence of the supermarket as performing an important role above what would be expected for a town of this size. The JRCLS also finds that although comparison provision in the town is below the national average, it adequately

meets the needs of the local resident catchment. Notwithstanding this, it goes onto find that Stalbridge has a number of weaknesses and gaps in its offer that are impacting on its overall vitality and viability, with most concern relating to the vacancy rate being significantly higher than the national average. It also highlights that leisure services are poorly represented in the town centre and that there is below average provision of both leisure and financial services with no banks, restaurants or cafes present. It finds that overall Stalbridge is struggling and is not a healthy and viable centre.

16. Notwithstanding the above position, it remains the case that Stalbridge currently provides an adequate, albeit restricted, overall level of services and facilities, including those listed above. The level concerned reflects the town's position in the spatial strategy, alongside the eighteen larger villages, as the focus for growth to meet the local needs outside of the four main towns. Whilst the centre may be struggling in terms of its vitality and viability, I have no substantive evidence to indicate that the proposed development would worsen that position. If anything, it would provide the potential for additional local expenditure and support of such services and facilities albeit that there is no evidence to indicate the extent to which that would be likely.
17. There was some debate at the Inquiry as to whether the supermarket in the town centre was of a nature to be likely to attract use by all local people in terms of the range and cost of products, and the extent to which it would be likely to be used for main food shopping trips as opposed to topping up. However, I have no substantive evidence before me as to these factors, including the extent to which it is used by local people. Nevertheless, from my observations, albeit acknowledging this to be a snapshot in time, I saw that it is a significant sized store, selling a wide range of products, centrally located within Stalbridge in terms of convenience of location.
18. I note that my colleague in the relatively recent Land South of Lower Road appeal decision<sup>1</sup>, with reference to the number of houses under Local Plan policy 6 and where the number had nearly doubled, acknowledged that there may well be a tipping point for Stalbridge, but that that proposal was not it and that the range of services and facilities would be satisfactory. I have acknowledged that the extent to which housing numbers in Stalbridge and the larger villages have already exceeded the 825 dwellings set out in policy 6 is significant. However, it remains the case that it is not a cap on new housing and although the proposed development would cumulatively add up to a further 130 dwellings, there is no substantive evidence to indicate that a tipping point would be reached with the appeal scheme either, albeit there is not an established need for any more local housing in relation to policy 6.
19. Measured from the proposed site access, several individual destinations in the town centre, including the superstore, would be at slightly further walking distances than the 800 metres which would be the generally preferred maximum, reflecting the peripheral location of the site on the edge of the town. Walking distances would also be increased slightly depending on the position of a particular dwelling on the site. However, it would remain the case that due to the good degree of proposed connectivity with the existing footways, albeit without a direct connection to the Trailway, there would be a reasonable option for people to walk or cycle to those destinations in the town.

---

<sup>1</sup> Appeal Ref. APP/D1265/W/20/3265743

20. As referred to above, the proposals would not include a direct pedestrian link to the adjacent Trailway in terms of minimising walking distances to some local facilities and services and maximising accessibility to that route from a recreational perspective. However, whilst it would be a slightly longer walk, there would be a footway constructed from the site access alongside Station Road that would link to the Trailway. That additional length of walk would be unlikely to be such as to significantly reduce or deter use of the Trailway. Furthermore, from a safety perspective, as well as that new roadside footway being of appropriate width, there would be provision through planning obligations to allow for the extension of the 30mph speed limit on Station Road in the vicinity of the proposed site access. Use of the Trailway, together with other local rights of way, would also be encouraged through planning obligations relating to financial contributions towards their improvement and maintenance.
21. In terms of travel to destinations further afield, the context relating to Dorset generally, as set out in the Dorset Council Bus Service Improvement Plan 2021 (the BSIP), is one of significant challenges to accessing local services, healthcare, work, and education, resulting in rural isolation. In the case of Stalbridge, there are bus stops serving local bus services within a reasonable walking distance of the site. Based on the Council's evidence, those services comprise an approximately two hourly service in the main during week-days. However, there is only a very restricted service on Saturdays to Yeovil and none in the later evenings. As such, whilst there would be some degree of choice over the private car, for weekdays in particular, the level of convenience for a variety of potential destinations, such as a wider range of shops, services and facilities, including to larger settlements, would be fairly limited. As such, for those with access to a car, there would likely remain a high degree of reliance on the car for those purposes, albeit that travel distances would not necessarily be great. The Appellant also highlights that there is a school bus serving Sturminster Newton High School, which has not been disputed, and which would avoid reliance on private car use to that particular destination.
22. Furthermore, in terms of access to employment destinations, as well as those locally, including immediately adjacent to the site, at least a small proportion of prospective residents would be likely to work from home thereby potentially avoiding the need to conduct employment related travel on a regular basis. Henstridge Village and employment opportunities at Henstridge Airfield would also be potentially accessible by cycle in terms of the distance and nature of the intervening roads. However, poor weather conditions would be a potential deterrent given the distances involved as would the lack of fully well-lit routes after dark. Nevertheless, those destinations would only be a relatively short car journey thereby minimising use of that mode for such activity.
23. For longer distance travel, although there is no train station in Stalbridge, the nearest one at Templecombe would only be a relatively short distance away. In terms of the distance and the nature of the intervening road, the choice of cycling to that station may be restricted to a small number of people. Nevertheless, it would only be a relatively short car journey with car parking available at the station, thereby encouraging use of that more sustainable longer distance rail transport.
24. Having regard to the extent of reliance on the private car, the implementation of a Travel Plan to encourage prospective residents to use alternative modes of

transport could be secured through a condition. The proposals would also include provision through planning obligations for issuing sustainable travel vouchers to the first occupier of each dwelling proposed. Whilst such measures, along with provision for cycle parking, would be likely to fulfil that purpose to some degree, it is unclear as to the extent to which that would significantly influence modal splits away from the private car.

25. The likely levels of reliance on the private motor car would be likely to also result in some degree of environmental harm as a result of vehicle emissions. However, I have no substantive evidence to indicate that the level of increase concerned would worsen the existing situation in and around Stalbridge to an extent that would represent an unacceptable level of harm. It also remains the case that increased use of electric vehicles would be likely to lessen those emissions, provision for which could be secured by a condition to ensure the implementation of measures for electric vehicle charging on the site.
26. I conclude on this issue that the proposed development would conflict with the Council's spatial strategy set out in Local Plan policies 2, 6 and 20. Furthermore, for the above reasons, the proposed development would have some specific shortcomings in terms of that spatial strategy, with particular regard to housing distribution and location and sustainable travel, having regard to local and national policy. However, also for the above reasons, the extent of that harm relating to such shortcomings would be moderate, which I shall consider further in the planning balance.

#### *Landscape character and appearance*

27. Local Plan policy 2 relates to the Core Spatial Strategy referred to above in terms of the principle of all development being located in accordance with it. In respect of this issue, this policy supports the general principle set out in paragraph 174 of the Framework of recognising the intrinsic character and beauty of the countryside.
28. Policy 4 of the Local Plan states amongst other things that the natural environment of North Dorset and the ecosystem services it supports will be enhanced through the protection of environmental assets and the establishment of a coherent ecological network of designated sites and stepping stone sites linked via corridor features. It goes on to say that developments are expected to respect the natural environment including the designated sites, valued landscapes and other features that make it special. Development should be shaped by the natural environment so that the benefits it provides are enhanced and not degraded. Furthermore, in terms of landscape character, policy 4 states that this will be protected through retention of the features that characterise the area; and where significant impact is likely to arise as a result of a development proposal, developers will be required to clearly demonstrate that the impact on the landscape has been mitigated and that important landscape features have been incorporated into the development scheme.
29. Having regard specifically to valued landscapes, there is no particular definition set out in policy 4. However, as referred to above, it is mentioned in the same context of other features that make the natural environment special. As recorded in the supporting text to policy 4 of the Local Plan, the landscape of North Dorset is highly valued with almost 40% of the District being covered by Area of Outstanding Natural Beauty (AONB) designations. The appeal site is not

within or in the close vicinity of such an AONB and neither does it comprise any other designated landscape. Nevertheless, that does not mean that it could not be considered a valued landscape.

30. Paragraph 174 of the Framework relates to conserving and enhancing the natural environment and states that planning policies and decisions should contribute to and enhance the natural and local environment by amongst other things protecting and enhancing valued landscapes in a manner commensurate with their statutory status or identified quality in the development plan; and, as referred to above, recognising the intrinsic character and beauty of the countryside.
31. The Appellant has undertaken a Landscape and Visual Impact Assessment, which I shall take into consideration along with all other relevant evidence, including various agreed viewpoints which helped my observations when visiting the site and surrounding area.
32. The site is located immediately on the edge of the built-up area of Stalbridge, with industrial/employment use buildings immediately to the west, beyond which is a large residential area and the centre of the settlement beyond that. Nevertheless, the site comprises an open field surrounded by hedgerows and trees, typical of the countryside which continues from that edge of the settlement, and contributes to a pleasant open setting to that part of the town. On that western edge of the site, The Sidings starter industrial units, and associated currently undeveloped land to their south, would be immediately adjacent to that part of the site. The remaining western boundary is separated from the larger industrial buildings in that vicinity, and a Site of Nature Conservation Interest (SNCI) to the south-west, by the Stalbridge Trailway, alongside which are various, generally not large, trees and hedgerow. There are a small number of dwellings on Station Road just to the east of the site which although close to Stalbridge are clearly separate from it.
33. The route of the Trailway was formerly that of a railway line running to the east of the town. That and any associated buildings would have been a feature in between the town and open countryside to the east of the line. However, from historic maps provided by the Appellant, which I have no basis to consider cannot be considered to be accurate, the railway line has not been a characteristic, distinct dividing feature confining the town from the countryside beyond. Furthermore, and in any case, the Trailway currently only forms an edge to a relatively short section of the built-up area of the town on its eastern side, notwithstanding its relationship with ongoing new housing development relating to the Land South of Lower Road appeal referred to previously. As such it is not a feature that has represented a clear edge to that side of the settlement generally. Additionally, the degree to which that edge is retained is weakened in the immediate vicinity of the site by the presence of The Sidings which is to the east of that route.
34. The site is located within the Blackmore Vale and Vale of Wardour National Character Area (NCA). At the regional level, as set out in the Dorset Landscape Character Assessment (2009), it is located within the Clay Vale Landscape Character Type (LCT); and at the local level, as set out in the North Dorset District Council Landscape Character Assessment (2008), it is located in the Blackmore Vale Landscape Character Area (LCA).

35. In considering the NCA, the area's profile describes, amongst other things, that it is steeped in a long history of pastoral agriculture, characterised by hedged fields with an abundance of hedgerow trees, many of them veteran, and that it is productive pastureland. It goes on to set out statements of environmental opportunity which highlight the need to protect, manage and enhance the diverse but coherent pastoral landscape character components and to manage the simple patterns of land use maintained by the long history of agriculture.
36. In relation to the regional LCT, the key characteristics comprise, amongst others, its flat to gently undulating or bowl shaped clay landform; flanked and defined by surrounding limestone, chalk and/or greensand hills and ridges; a homogenous grassland landscape with a patchwork of small to medium sized fields, woods or ribbons of trees and dense trimmed hedgerows; distinctive mature hedgerow oaks which dot the landscape in a distinctive pattern; its long tradition of dairy farming; a dense network of twisting narrow lanes lined by thick hedgerows; evenly scattered hamlets, small villages and farmsteads often associated with groups of trees; and it having a peaceful, undeveloped and secluded rural atmosphere. In North Dorset the Clay Vale Landscape is represented by the broader scale landscape of the Blackmore Vale. The overall management objective for the LCT is to conserve the patterns that contribute to the rural tranquil landscape of winding lanes and small scattered settlements.
37. With regard to the LCA, this has the following key characteristics:
- a broad expansive clay Vale which is tranquil and unified;
  - a unique mosaic of woods, straight hedgerows and grassland fields 'dotted' with distinctive mature hedgerow Oaks;
  - open views across the undulating to flat pastoral landscape to the chalk escarpment backdrop;
  - dense network of twisting lanes often with grass verges and sharp double 90 degree bends;
  - small hump backed bridges with low stone or brick parapets;
  - many very small villages and hamlets built with locally distinctive materials, such as stone, redbrick, tile and thatch;
  - a network of ditches, streams and brooks which drain into the tributaries of the Stour; and
  - Lydlinch Common (an SSSI) and Stock Gaylard Deer Park (an SNCI) are both key locally important features.
38. Some of the above characteristics are evident in relation to the site itself and its immediate surroundings. However, other features relating to the last five bullet points are less evident at this peripheral location of the LCA, reflective of the location adjacent to the larger settlement of Stalbridge. This is notwithstanding the small number of houses fronting the road just to the east of the site which mostly exhibit no clear or consistent use of locally distinctive materials.
39. Therefore, whilst in the countryside, the site is not deeply rural, being immediately adjacent to Stalbridge, albeit projecting away from it. The

proposed development would clearly result in the loss of a field that is typical of the LCA, LCT and NCA. Furthermore, in projecting outwards into the countryside, there would be some interruption of views across the pastoral landscape. However, its close proximity to the existing settlement would minimise the extent to which it would stand out as an alien feature. For the same reason, together with the close proximity to Station Road, it is not in a highly tranquil location such that the degree to which the proposed development would intrude in terms of lighting and noise would be lessened.

40. Furthermore, the characteristic hedgerows around the edge of the site would be largely retained, other than in relation to the formation of the proposed site access, along with protected hedgerow trees. Additionally, those existing public views of the pastoral landscape, across the site and to the countryside generally, are currently fairly limited and localised, and often with intervening existing vegetation, as I will consider further below. That existing vegetation, along with proposed new planting would also be likely to have the effect of softening or screening, at least partially, the proposed development from public vantage points, more so over time as new planting would mature.
41. In terms of the setting of Stalbridge, the town currently extends down the slope of the Vale's edge from the Limestone Ridge. Although the older, historic part of town sits higher up, as is the case to the south-east of the town, the settlement pattern noticeably includes development all the way to, and in some cases beyond those side slopes, including the industrial buildings immediately to the west of the site. The proposed development would inevitably extend the extent of protrusion beyond the Vale's side slopes and into the currently pleasant open setting, projecting beyond the Trailway to a noticeably greater extent than The Sidings. However, there would remain open fields to the south and east of the site, and to the north on the opposite side of Station Road, which would to some degree maintain a generally open setting to the town, albeit to a lesser degree. Furthermore, it would be a continuation of other relatively modern development as opposed to a direct continuation from the older historic part of the town further up the Vale's slopes, and in a situation where I have found that the Trailway itself, and the railway before it, is not a feature that has represented a clear edge to that side of the settlement generally.
42. I have also had regard to the relationship of the proposed development with that being progressed relating to the previously referred to Land South of Lower Road appeal, and other recently approved new housing development to the south/south-east of the town. Although both would be seen from certain vantage points, it would be in the context of a noticeable, albeit not large, degree of separation both in terms of distance and the extent to which they would be softened or screened by intervening vegetation or townscape, depending on the vantage point. In this respect, the proposed development would not be clearly seen from local vantage points as an amalgamation with the existing expansion of the town, but instead an additional branch to the settlement, closely associated with an existing key vehicular route serving Stalbridge. As such, in this respect, the extent of any harm in terms of the landscape's ability to cumulatively assimilate an additional major housing development would be minimised.
43. The proposed development would therefore represent an intrusion into the existing countryside landscape and would inevitably cause some harm to its

intrinsic character and beauty. However, for the above reasons, even were I to find it to represent a valued landscape, the extent of any harm to the landscape character, whether relating to the NCA, LCT or LCA, would only be to a moderate degree.

44. Visually, the site is fairly well contained with viewpoints largely confined to being very localised. In this respect, notwithstanding the issues relating to character of the landscape, the proposed development would be unlikely to harmfully affect views from within the wider area. Furthermore, in more distant views from higher ground to the east, the proposed development would be seen more cumulatively with the rest of Stalbridge, including new development. In that context the extent to which the proposals would stand out would be likely to be limited due to the intervening distance and extent of the existing settlement against which it would be seen.
45. Outward views of the countryside from the Trailway would be obscured to varying degrees by the proposed development. However, that would only relate to a relatively short stretch of that pedestrian route and where such views are currently in any case softened or screened by intervening vegetation. The proposed development, as viewed from easterly vantage points, would also have the benefit of at least partially screening or softening those adjacent existing less attractive industrial buildings that are prominently visible on the edge of the town. However, this is with the acknowledgment that it would not require the full eastwards projection of the proposal to achieve such a benefit.
46. The Council also refers to the relationship of the site with Stalbridge Park and its distinctive walls. However, due in particular to the noticeable degree of separation of the site from Stalbridge Park, I consider the proposed development unlikely to harmfully affect that feature.
47. For the above reasons, I conclude on this issue that the proposed development would cause some harm to the landscape character and appearance of the area, with particular regard to that relating to the countryside comprising the site and surrounding area and the setting of the existing settlement of Stalbridge. As such, specifically in respect of this issue, it would be in conflict with policies 2 and 4 of the Local Plan and paragraph 174 of the Framework. However, again for the above reasons, the extent of that harm would be moderate, which I shall consider further in the planning balance.
48. In respect of this issue, the Council, in its original decision notice also makes reference to Policies 6, 7, 20 and 24 of the Local Plan. However, policy 6 relates to housing distribution and not specifically to this main issue. Furthermore, policy 20, whilst concerning the restriction of the type of development considered to be appropriate in the countryside, and relevant to the first main issue, does not specifically relate to the particular matters concerning this second main issue. Policies 7 and 24 relate to design and layout and highlight respectively, amongst other things, that development should have an appropriate density and be designed to improve the character and quality of the area within which it is located. In these respects, at this outline stage, I have no clear basis to consider that the proposals would be likely to be in conflict with those two policies, particularly as more detailed design and layout would be dealt with at the reserved matters stage.

*Existing housing need and land supply*

49. Having regard to whether or not the Council can demonstrate a five year supply of deliverable housing sites (5 year HLS), the difference between the Council and Appellant on this matter relates to the disputed deliverability of nine sites and I have no substantive basis to consider otherwise. As such, in relation to a 5 year requirement of 1992 dwellings, the Council considers there to be 5.17 years' worth of supply whilst the Appellant, as confirmed in the Appendix to their closing submissions, considers it to be 3.78 years. I have had regard to the evidence of both parties taking account of the Framework's definition of 'deliverable' in this context and consider each of the disputed sites below.
50. Site A01 – Land adjacent to Wincombe Business Park, Shaftesbury.
51. There is a resolution to grant full planning permission for 162 dwellings, subject to the signing of a Section 106 Agreement (s106), and associated necessary widening/realignment of Wincombe Lane has commenced. Furthermore, the Council is hopeful that the s106 will be completed shortly. There is therefore evidence of the developer's clear intent to progress this development within the 5 year period and no obvious obstacle highlighted by the Council in respect of the signing of the s106. The question remains as to the extent of development likely to be delivered within the 5 year period. Notwithstanding the anticipated signing of the s106 in the near future, there remains uncertainty as to the timing of this and therefore also the subsequent submission of details for discharging any conditions. The developer indicated in June 2021 that on the assumption of planning permission being granted in early Autumn 2021, 40-41 dwellings per annum (dpa) would be delivered. Despite the Council highlighting that other volume housebuilders are achieving 50-60 dpa, I have no substantive basis to veer from that indicated by the developer for this particular site. Even without that ongoing uncertainty, based on the above trajectory of 40-41 dpa, at the very most this would set back the anticipated 40-41 in 2022/23 by approximately half that number. Allowing for the ongoing uncertainty as to exactly when permission will be granted and any pre-commencement conditions discharged, I consider that there is not clear evidence of delivery in 2022/23. As such, for the basis of calculating the 5 year HLS I have deducted 40 units from the full 162, resulting in a deliverable supply of 122 within the 5 years.
52. Site A02 – Ham Farm and Newhouse Farm, Gillingham.
53. Outline planning permission was granted for 961 dwellings in September 2021 and the principal road required to unlock the delivery of this site is now well underway. Reserved matters are required to be submitted for the first phase within 2 years of planning permission and as yet no application has been received by the Council. Furthermore, under the planning conditions, there is a 4 year period within which to commence the first phase. The Council accepts that the majority of the proposed dwellings will be delivered beyond the 5 year period with a modest number within it. However, without any information from a prospective developer of the site, and in the absence of any reserved matter application, I cannot be sufficiently certain that even the 100 dwellings put forward by the Council will be delivered in the 5 year period. I have therefore deducted those 100 units from the 5 year HLS.

54. Site A03 – Lodden Lakes Phase 2, Gillingham.

55. Outline planning permission has been granted for 115 dwellings and a reserved matters application has also recently been submitted and validated. There remains no certainty as to the timescale for determining that application or whether there are any issues relating to it that will cause delay albeit I acknowledge it was subject to pre-application discussion with the Council. The Council consider that development of Phase 2 is likely to follow straight on from the completion of Phase 1 in 2024. There is no evidence provided from the developer to confirm that although I consider it is a reasonable assumption to make subject to satisfactory approval of reserved matters and any pre-commencement conditions. The submission of a reserved matters application shortly after having secured planning permission is also an indication of intent to proceed quickly. Given that such a start time would be approximately two years away, there appears to be sufficient contingency in the meantime for approval of reserved matters, conditions and site preparation. I therefore consider that commencement on site in 2024 to be a reasonable assumption, obviously subject to achieving the necessary reserved matters approval. On that basis I consider that the 60 dwellings indicated by the Council for completion in the 5 years period to be reasonable.

56. Site A04 – Park Farm, Gillingham.

57. Outline planning permission was granted in November 2021 for up to 634 dwellings and pre-application advice has been sought in relation to the submission of a reserved matters application for a first phase of around 300 dwellings. The developer's intention for submission of such an application was indicated to be February 2022 with a start on site expected in the summer of 2023. The Council indicated that the submission is now likely to be in the second quarter of this year. There is however no clear evidence on that timing, including any updated information from the developer concerned. The Council accepts that the majority of the dwellings will be built beyond the 5 year period. However, given the above uncertainty, and despite the degree to which the developer is active, sizeable and Dorset-based, there is not clear evidence that even the suggested modest quantum of 50 dwellings put forward by the Council for completion in the 5 year period would be fulfilled. As such, I have deducted those 50 dwellings from the 5 year HLS.

58. Site A05 – Land north and east of Blandford Forum, Blandford.

59. This site is allocated in the Neighbourhood Plan for a mix of uses including residential. An outline planning application was submitted in September 2020 for 600 dwellings, with full permission requested for 167 dwellings at this stage. Information from the developer in October 2021 indicated that completions would begin in 2024/25 with the majority being in 2025/26. However, those assumptions were based on anticipated planning permission early in 2022. I have received no clear evidence to indicate the timescale for a decision being taken, albeit that the Council states that its officers who assisted in the production of the Neighbourhood Plan are not aware of any major impediments to planning permission being granted. Furthermore, my attention was drawn to some objections having been made to the application. Although the Council indicated that these were not in principle objections, and even if they could be addressed, there is no clear indication as to the extent to which this could delay any planning permission being granted. I therefore have no

substantive basis upon which to consider there to be a realistic likely number of dwellings, if any, which would be completed within the 5 year period, despite the developer being Dorset-based and active across a number of sites across the county. For this reason, I have deducted the 49 dwellings put forward by the Council from the 5 year HLS.

60. Site A08 – Land east of Franwill Industrial Estate, Pimperne.

61. The site is allocated for up to 15 dwellings in the Pimperne Neighbourhood Plan and a full planning application for 15 dwellings was submitted in 2020. Whilst the allocation suggests local support and that a full planning application indicates intent to develop the site, the application nevertheless remains undetermined after a substantial period of time. Furthermore, whilst the principle is established through the allocation, there remain outstanding matters relating to the specific application that require resolution prior to a decision being taken. For these reasons, I have insufficient certainty that the application concerned will result in the completion of dwellings on the site within the 5 year period and so have deducted the 15 dwellings concerned from the 5 year HLS.

62. Site A09 – Land at Bittles Green, Motcombe.

63. The site is allocated for about 10 dwellings in the Motcombe Neighbourhood Plan and although an outline planning application submitted for 15 dwellings has remained undetermined for a substantial period of time, the Council confirmed that the s106 is ready for engrossment and that the decision is ready for issuing. The developer, in an email dated 1 October 2021, set out the anticipated delivery of the 12 dwellings in 2025/26. Whilst there remains three years before 2025/26, there is no indication as to the assumptions made at the time of that email about when planning permission would be granted. That permission, even if issued around the time of the Inquiry would have been approximately 5 months on from the above email and I have no substantive evidence to indicate whether or not that would affect the anticipated programme. Furthermore, any consent would be in outline only with reserved matters still required to be dealt with. There is therefore not clear evidence that the 12 houses concerned will be completed within the 5 year period and so I have deducted them from the 5 year HLS.

64. Site A10 – St Mary's Hill, Blandford St Mary.

65. Development is underway on this site, relating to planning permission for a total of 350 dwellings in two phases. The Council has received completion certificates for a total of 41 dwellings up to the end of December 2021, albeit with 10 of those in the previous 2020/21 period and thereby predating the current 5 year period and indicating that development is slightly ahead of the programme predicted in an email from the developer dated 5 August 2020. Nevertheless, a rate of 31 completions to the end of 2021 within the 2021/22 period indicates alignment with the developers predicted 42 in that period as a whole as set out in the above email, based on business forecasting and expected sales rates allowing for Covid. In that email, 47 completions were then predicted for 2022/23, 60 in each of 2023/24 and 2024/25, and 80 in 2025/26 with the remainder in the following year outside of the 5 year period. For the last three of those years within the current 5 year period, the higher figure takes account of an assumption that there would be two sales outlets from 2023/24. Notwithstanding the existing rate of completions, I have no

more up-to-date evidence to indicate whether those ongoing predictions of the developer from over a year and a half ago still apply, including whether it remains the intention for two sales outlets and the basis upon which that would result in more completions. I acknowledge the point made by the Council that a rate of 60 dpa is not unreasonable for a volume housebuilder on a large site, and the example of this having been achieved by Persimmon Homes on a site in Blandford St Mary. However, I do not have full details of the circumstances of that or other cases to enable a proper comparison. Based on the evidence provided for the site in question, in the absence of any more up-to-date information since August 2020, and while acknowledging the Appellant's figure of 200 based on an average of 40 dpa, the only clear basis for ongoing predicted completion rates is the actual rate within the first year, broadly in line with the originally predicted 42 dpa. As such, across the 5 year period this would result in a figure of 210 completions as opposed to the Council's figure of 269. I have therefore deducted 59 dwellings from the 5 year HLS.

66. Site A11 – Wessex Park Homes, Shillingstone Lane, Okeford Fitzpaine.

67. This site is the subject of prior approvals and one full planning permission for a number of developments ranging from between 1 and 4 dwellings, each one in itself therefore not defined as major development and still extant, totalling 44 dwellings. They would therefore be regarded as deliverable unless there is clear evidence that homes will not be delivered within the 5 year period. In this respect, the above approvals/permissions were granted in the period between September 2019 and December 2020 without any indication of forthcoming intent to commence their construction. Nevertheless, that is not to say that this could not occur, including taking account of the need to discharge any pre-commencement conditions. I acknowledge that an outline planning application has since been submitted for 70 dwellings on the site which remains to be determined and is not included by the Council in the 5 year HLS. Reference is made in the Planning, Design and Access Statement, relating to that application, to the more appropriate replacement of existing light industrial buildings with purpose built dwellings rather than conversions, citing that many of the approved dwellings would be over large and do not make good use of the internal floorspace available. That Statement also goes on to state that the prior approval applications were submitted to establish the principle of residential use across the site. However, these factors in themselves do not indicate that the extant approvals/permissions could not still be implemented. As such, I consider that there is not clear evidence that 44 homes will not be delivered on this site within the 5 year period and so I have retained that figure within the 5 year HLS.

68. Based on the above findings, I have deducted 325 dwellings from the Council's claimed supply of 2060 dwellings. This reduces the supply to 1735 dwellings against a requirement for 1992 dwellings. On that basis I conclude on the matter of 5 year HLS that the Council can demonstrate 4.35 years' worth of supply. I shall consider this further in the planning balance along with matters relating to the Housing Delivery Test (HDT) and measures that the Council is taking to address supply, including pipeline development beyond the 5 year period.

*Other matters*

69. I have had regard to concern that the proposed housing development would stop any future growth of the existing industrial area. In this respect the submitted Development Framework Plan shows provision for a 2 metre high acoustic fence alongside the western site boundary, relating to the prevention of noise transmission from the adjacent industrial uses. I have no substantive basis to consider that any new industrial uses would be likely to cause such additional noise as to be restricted, taking account of such mitigation measures.
70. Furthermore, together with the general principle of the proposed of dwellings being set away from the boundaries concerned, as shown on the Development Framework Plan, appropriate noise mitigation measures for the proposed development could be secured by condition. The Council raises some concern about the effect on the amenities of prospective residents if those measures resulted in windows having to be kept shut with a reliance on mechanical ventilation. However, I have no substantive basis to consider that any noise mitigation measures would be likely to harmfully affect those amenities, subject to further consideration at any reserved matters/conditions discharge stage.
71. In terms of the effect of the proposed development on the nearby Stalbridge Site of Nature Conservation Interest (SNCI), additional recreational use of this area would be inevitable. However, the area is already open to the public and measures could be put in place to ensure protection during construction, such as a Construction Environmental Management Plan secured by a condition. A financial contribution, via a planning obligation, towards measures to strengthen and maintain the habitat is also proposed thereby making it more robust in light of increased pressures. As such the proposed development would be unlikely to harmfully impact on the integrity of the SNCI.
72. In terms of the effect of the proposed development on local infrastructure, I have considered this in terms of the existing local facilities and services under the first main issue. Furthermore, the proposed development would make provision for appropriate financial contributions towards various local infrastructure to mitigate for any additional impacts, which are covered in more detail below under '*conditions and planning obligations*' including in relation to local primary and secondary education, healthcare, library services, leisure, sport and play facilities, local allotments, and rights of way.
73. In relation to primary school provision, the proposed financial contribution would be at the appropriate level to mitigate for the proposed development. However, the Council raises concern about the capacity of the existing school, projected to worsen, and the less than ideal situation if interim measures are required to accommodate additional pupils. This would not be an ideal situation whether it were to come about as a result of the proposed development alone or that the latter would add additional pressure to an already anticipated situation, albeit that there would be some time lag before such demand would be realised. Nevertheless, with the proposed financial contribution in place, I have no substantive basis to consider any measures to ensure adequate provision of education could not be acceptably provided, including on an interim basis.

74. The proposed development would inevitably introduce increased traffic in and around Stalbridge. The submitted Transport Assessment predicts likely trip generation and flow distribution and has been assessed by the Highway Authority (HA) as being satisfactory and robust. As such, the HA consider that the cumulative impact of the development would not be severe, having regard to the Framework. I have no substantive basis to consider differently or that there would be unacceptable harm caused in this respect.
75. Having regard to the water and sewerage system, I have no substantive evidence to indicate that this would not be able to cope with the proposed development. The proposals would include appropriate measures for the site relating to surface water drainage which could also be secured by condition. Furthermore, the Dorset Council Flood Risk Management Team raise no objections subject to such appropriate conditions. I have no substantive basis to consider differently.
76. Taking account of proposed on-site mitigation grassland creation, there would nevertheless be a net loss of grassland on the site. This would comprise the loss of existing semi-improved grassland. However, I have not received any substantive evidence to indicate that the existing grassland is of anything other than local interest or that is of particularly high ecological value. Furthermore, there are opportunities relating to the proposed development to provide enhanced habitat on the boundaries of the site and in the areas of proposed public open space which would be likely to at least partially mitigate for the loss of existing grassland. The proposals also include provision for an off-site biodiversity mitigation financial contribution to off-set the net loss on the site itself. The clear basis and need for that contribution is further identified in the submitted Biodiversity Plan Certificate of Approval which refers to such compensation being calculated in line with the Dorset Biodiversity Compensation Framework, and I have no substantive basis to consider otherwise. I cannot be certain that there would be any biodiversity net gain. However, for the above reasons, the proposed development would not cause unacceptable harm to biodiversity.
77. The Council and Appellant agree that the proposed development, both in isolation or cumulatively with other development, would not be likely to have any significant adverse effects on the Rooksmoor Special Area of Conservation (SAC). This is because any increased traffic flows would not cause the levels to exceed Natural England's thresholds, having regard to air quality. The Council highlights that this does not amount to no effect. However, whilst that may be the case, I have not received any substantive evidence to indicate any likely harm arising from any such effect.

*Conditions and planning obligations*

78. The Council has submitted 21 suggested conditions were I minded to allow the appeal. Some were subject to suggested amendments by the Appellant and Council during the course of the Inquiry. One of those original conditions, relating to provision of a link from the site onto the North Dorset Trailway, was agreed at the Inquiry to be unreasonable in terms of potential conflict with any need to provide an acoustic barrier along the boundary concerned. I have therefore omitted that condition. One further condition was also suggested during the Inquiry, relating to provision for a vehicular/pedestrian/cycle link-up to the adjacent land. The amended suggested conditions are generally agreed

by the Appellant, subject to some suggested amendments. I have considered these in the light of advice in the National Planning Practice Guidance and have, in the interests of clarity and precision, amended some of the wording. I have referred to the condition numbers, cross referenced to the attached annex, in brackets for clarity purposes.

79. The standard conditions (1, 2 and 3) would be necessary to ensure the submission of details relating to the reserved matters, the timescale for that, and the timescale for commencement of development. For certainty, a condition requiring the development to be carried out in accordance with the approved plans would also be necessary (4).
80. The following conditions would be necessary in the interests of highway safety: to ensure that the highway layout, turning and parking areas are completed in accordance with approved details (5); to secure provision of the first 15 meters of the proposed vehicular access prior to occupation of the development (6); to secure the approved visibility splays at the site access (7); to secure provision of a 2 metre wide footway from the site access to link with the existing footway to the west of the site, also in the interests of encouraging sustainable means of travel (8); and to ensure that construction activity is conducted in accordance with a Construction Traffic Management Plan, also in the interests of protecting local amenity (9).
81. In the interests of environmental sustainability, a condition would be necessary to secure provision for electric vehicle charging on the site (10). Also, to encourage the use of alternative modes of transport to the car, conditions would be necessary to secure provision for cycle parking (11); and the implementation of a Travel Plan (12).
82. In order to provide acceptable drainage for the proposed development, conditions would be necessary to secure the implementation of a surface water management scheme (13) and the maintenance and management of the surface water sustainable drainage scheme (14). Furthermore, in the interests of protecting the local environment and the health of prospective residents, a condition would be necessary to ensure that any contamination not previously identified on the site is appropriately remediated (15).
83. So as to provide acceptable living conditions for prospective residents of the proposed development, a condition would be necessary to secure the implementation of any noise mitigation measures identified as being needed (16).
84. In the interests of protecting the local environment and ecology, conditions would be necessary to secure the implementation of a Construction Environment Management Plan (17); adherence to the submitted Biodiversity Plan (18); implementation of an appropriate lighting scheme having regard to the protection of bats (19); and the implementation of a landscape and ecological management plan (20).
85. In order not to prejudice any potential future development of the adjacent land, the condition referred to above would also be necessary to ensure the implementation of a vehicular/pedestrian/cycle link-up to the relevant site boundary (21).

86. Planning Obligations have been submitted within a Unilateral Undertaking (UU) under Section 106 of the Act, making provision for the following:

- 40% of the proposed dwellings shall be affordable housing, in accordance with policy 8 of the Local Plan concerning the provision of affordable housing, and paragraph 65 of the Framework.
- Provision of on-site open space and associated works specification and management plan, including provision for a local equipped area for play. This would be in accordance with Local Plan policy 15 relating to the provision of green infrastructure and would be necessary in the interests of the amenities of prospective residents, the visual quality of the site and provision of a buffer to existing retained and enhanced site boundary hedgerows and trees.
- Provision for issuing sustainable travel vouchers to the first occupier of each dwelling which would be necessary in the interests of encouraging sustainable travel.
- Appropriate financial contributions towards the Trailway Strategic Project in the vicinity of the site; the provision of local allotments; Local Nature Reserve mitigation and maintenance; local play facilities maintenance; and local rights of way; all relating to likely increased use arising from the proposed development; and towards biodiversity mitigation. These would all be in accordance with Local Plan policy 15 relating to the provision of green infrastructure. They would also be necessary, respectively, in the interests of sustainable travel and the health benefits of using the Trailway; enabling local food production, along with the associated health and well-being and sustainability benefits relating to allotments; specifically relating to the nearby SNCI, which I shall address further below; the health and well-being benefits of play facilities, specifically relating to maintaining and/or upgrading those facilities at Jarvis Field Play Area and/or the Park Grove recreation grounds; the health and well-being of prospective residents and local accessibility relating to improvements to and maintenance of gates, stiles and bridleway and footpath surfaces of local rights of way; and to offset the net loss of grassland on the site.
- Appropriate financial contributions towards community, leisure and indoor sports facilities; primary and secondary education; local healthcare; library services; all to mitigate the increased use of such local services/facilities by prospective residents of the proposed development, and in accordance with Local Plan policy 14 relating to the provision of social infrastructure. These would also be necessary, respectively, in the interests of the health and well-being of prospective residents; providing appropriate access to education and, in respect of the secondary level, for the enhancement or provision of specialist provision and/or science provision at Sturminster Newton High School; provision of appropriate access to healthcare, specifically contributing to provision of a new clinical room in any of the surgeries that would be impacted upon by the proposed development within the Blackmore Vale GP partnership; and retaining and developing libraries as community hubs.

- Appropriate financial contribution towards the costs of making and, if confirmed, implementing a road traffic regulation order to extend the 30mph speed limit on Station Road in the vicinity of the proposed site access. This would be necessary in the interests of highway safety.
87. Having regard to the Local Nature Reserve mitigation and maintenance contributions, the UU sets out that these would relate to the nature reserve at Rooksmoor and/or Stalbridge local nature reserve off Station Road and/or Blackmoor Vale Commons and Moors Site of Special Scientific Interest (SSSI). However, with the exception of Stalbridge SNCI, there is no substantive evidence to indicate that sufficient harm would otherwise be caused to the integrity of the sites concerned to justify the need for measures supported by the contribution concerned. I have therefore not taken into account that element of the UU relating to potential contributions to the nature reserve at Rooksmoor and/or Blackmoor Vale Commons and Moors SSSI.
88. In relation to the proposed financial contribution for pedestrian/cycle connectivity, there was some discussion at the Inquiry as to what this would be used towards. From the evidence and that discussion, no specific works have been identified and no safety reasons have been identified. This is also in light of there being other proposed contributions relating to the Trailway and local rights of way. There is therefore no clear justification for this separate contribution and so I have not taken it into account in my decision.

#### *Planning balance*

89. I have found that the proposed development would be in conflict with the Council's spatial strategy set out in Local Plan policies 2, 6 and 20. It would also have some specific shortcomings in terms of that spatial strategy, with particular regard to housing distribution and location and sustainable travel, having regard to local and national policy, which I have found would amount to moderate harm in respect of this issue.
90. I have also found that the proposed development would cause some harm to the landscape character and appearance of the area, with particular regard to that relating to the countryside comprising the site and surrounding area and the setting of the existing settlement of Stalbridge. For the reasons set out, I have found that the extent of that harm would again be moderate.
91. The Council is not able to demonstrate a 5 year HLS and I have found the figure to be 4.35 years' worth of supply. Furthermore, there is a poor record of recent completions identified through the Housing Delivery Test (HDT) whereby delivery of housing was substantially below (less than 75% of) the housing requirement over the previous three years. As such, having regard to paragraph 11(d) of the Framework, the most important policies for determining the appeal are out-of-date and the tilted balance is engaged.
92. Having regard to the poor housing delivery performance in recent years referred to above, the Council has not produced an Action Plan to address this. However, notwithstanding the 5 year HLS position, in terms of meeting the housing requirement within the Plan period as a whole going beyond the 5 year period, it is evident that there are factors that indicate how the Council is being proactive in trying to achieve that. These include, amongst others, the substantial urban extension, through allocated sites relating to Gillingham where s106 Agreements relating to planning obligations have now been signed

and the primary new road serving them is anticipated to be completed later this year; other pipeline development beyond the 5 year period including sites with outline planning permission for housing; supporting Neighbourhood Plans and associated housing allocations; gaining funding as part of the Brownfield Land Release Fund, including sites in the north of the county albeit amounting to only 40 homes; supporting community land trusts and development of a Building Better Lives programme. I also note that the Council has shown some flexibility in approving development beyond settlement boundaries.

93. Whilst the above factors are important, there is no clear evidence or guarantee that this will ensure that the housing requirement will be met within the Plan period. The Council is also clearly in the process of producing its emerging Local Plan with the implications that would have for provision of new housing on an ongoing basis. However, due to the early stage it is at towards adoption, only limited weight can be afforded it.
94. Having regard to the Government's objective of significantly boosting the supply of homes, the proposed development would have the benefit of contributing up to 130 dwellings towards the supply of housing in the District. There cannot be certainty as to the speed at which the proposed development would be progressed once commenced or whether the full 130 dwellings would be included in a detailed proposal. However, in terms of what can be controlled, even if all of the proposed dwellings would not necessarily be built within the 5 year period, the Appellant is in agreement with a condition that would ensure that development commences relatively quickly on site, within 1 year from the final approval of the reserved matters, which themselves would be submitted within 2 years of any planning permission. Of those up to 130 dwellings, the proposed 40% contribution to the supply of needed affordable housing in the District as a whole would, despite being at the Local Plan policy compliant level, be an added benefit. Those combined benefits alone would therefore attract significant weight. This is particularly in the scenario whereby the Council is not currently able to demonstrate a 5 year HLS.
95. There would also be likely significant economic benefits relating to the provision of construction related jobs during the construction phase, albeit on a temporary basis for the duration of that phase; and then in terms of local spending by prospective residents of the proposed development, such as in shops and in relation to other services and facilities. Furthermore, the proposed on-site public open space and play provision, although required in respect of the proposed development and not directly accessed from the Trailway, would also be likely to benefit existing local people to a degree in terms of providing additional choice alongside that which already exists locally.
96. Notwithstanding my findings in relation to the main issues, I have found there to be no other matters that would cause unacceptable harm, subject to appropriate conditions and planning obligations where applicable.
97. Taking all of the above into account, in applying paragraph 11(d)(ii) of the Framework, the extent to which there would be adverse impacts of granting planning permission relating to the first and second main issues, would not significantly and demonstrably outweigh the above benefits of the proposed development, when assessed against the policies in the Framework taken as a whole.

## **Conclusion**

98. For the reasons given above I conclude that the appeal should be allowed.

*Andrew Dawe*

INSPECTOR

## **APPEARANCES**

### **FOR THE APPELLANT:**

Martin Carter – Counsel, Kings Chambers

Instructed by Peter Dutton

He called:

Silke Gruner (for round table discussion (RTD) on landscape character and appearance matters)

Associated Director of Landscape Architect and Urban Designer, CSA Environmental

Ben Pycroft (for RTD on housing need and land supply matters)

Director, Emery Planning

Nigel Weeks

Consultant, Stirling Maynard Transportation

Peter Dutton

Planning Manager, Gladman Developments Ltd

### **FOR THE LOCAL PLANNING AUTHORITY:**

George Mackenzie – Counsel, FTB Chambers

Instructed by Philip Crowther, Dorset Council Legal Services

He called:

Helen Lilley

Senior Landscape Architect, Planning Service, Dorset Council

Jo Witherden

Planning Consultant, Dorset Planning Consultant Limited

Philip Reese

Senior Planning Policy Officer, Community Planning Team, Dorset Council

And also Robert Lennis, Area Lead (Major Projects) Eastern Planning Dorset Council in respect of the RTD on conditions and planning obligations.

### **INTERESTED PARTIES:**

Cllr Graham Carr-Jones

Ward Member for Stalbridge and Marnhull, Dorset Council  
Cabinet Member for Housing & Community Safety

Stuart Waite

Member of Stalbridge Town Council

## **INQUIRY DOCUMENTS (IDs)**

1. Opening submissions of the Appellant.
2. Opening statement on behalf of the Council.
3. Statement made by Cllr Carr-Jones.
4. Extracts from The Institution of Highways & Transportation 2000 document: Guidelines for Providing for Journeys on Foot, submitted by the Council.
5. Table received from the Council relating to the latest status of sites in the North Dorset 6-10 year supply with outline permission at 1 April 2021.
6. Site visit itinerary.
7. Statement made by Stuart Waite.
8. Email from the Council confirming validation of a reserved matters application for Lodden Lakes Phase 2 (site A03 in the Scott Schedule).
9. Response from the Appellant to the above ID8 email.
10. Unilateral Undertaking (undated) including manuscript amendments.
11. Council's suggested amendments to revised conditions.
12. Updated CIL Compliance Schedule submitted by the Council.
13. Email from the Council with attached agenda item relating to Lower Road appeal, including putative reasons for refusal.
14. Judgement relating to Gladman Developments Ltd v Secretary of State for Housing, Communities and Local Government and Central Bedfordshire Council.
15. Upper Tribunal decision relating to matter between Leech Homes Ltd and Northumberland County Council.
16. Certified copy of Unilateral Undertaking.
17. Closing statement on behalf of the Council.
18. Closing submissions of the Appellant.

## **ANNEX - CONDITIONS**

1. No part of the development hereby approved shall commence until details of all reserved matters, including layout, appearance, scale, and landscaping have been submitted to and approved in writing by the Local Planning Authority.
2. An application for approval of any 'reserved matter' shall be made not later than the expiration of 2 years beginning with the date of this permission.
3. The development to which this permission relates shall be begun not later than the expiration of 1 year from the final approval of the reserved matters or, in the case of approval on different dates, the final approval of the last such matter to be approved.
4. The development hereby permitted shall be carried out in accordance with the following approved plans: CSA/4521/100 Rev A (Location Plan); P19094-00-05 (Site Access Drawing).
5. Notwithstanding the information shown on the approved plans, prior to the commencement of any works on site, details of the geometric highway layout, turning and parking areas shall be submitted to and approved in writing by the Local Planning Authority. The development shall be carried-out and completed in accordance with the approved details and retained in the approved form thereafter.
6. Before the development is occupied or utilised, the first 15.00 metres of the vehicle access, measured from the rear edge of the highway, shall be laid out and constructed to a specification firstly submitted to and approved in writing by the Local Planning Authority.
7. Prior to occupation of any dwelling hereby approved, the visibility splay areas as shown on the approved plans (ref: Drawing Number P19094-00-05) shall be provided to a level not exceeding 0.6 metres above the relative level of the adjacent carriageway. The splay areas shall thereafter be maintained and kept free from all obstructions.
8. No dwelling hereby approved shall be occupied until a 2.00m wide footway running from the site entrance westwards to join up with the existing footway outside Station Road Business Park, as shown on Dwg No P19094-00-05, has been provided and made available for use in accordance with details which shall firstly have been submitted to and approved in writing by the Local Planning Authority.

9. Prior to commencement of any works on site, a Construction Traffic Management Plan ('CTMP') shall be submitted to and approved in writing by the Local Planning Authority. The CTMP shall include:

- construction vehicle details (number, size, type, and frequency of movement)
- a programme of construction works and anticipated deliveries/timings of deliveries to avoid, where possible, peak traffic periods
- a framework for managing abnormal loads
- contractors' arrangements (compound, storage, parking, turning, surfacing and drainage)
- wheel cleaning facilities
- vehicle cleaning facilities
- a scheme for inspecting the highways serving the site prior to work commencing and at regular, agreed intervals during the construction phase
- a scheme of appropriate signing of vehicle route to the site
- a route plan for all contractors and suppliers to be advised on
- temporary traffic management measures where necessary.

Development shall take place in accordance with the approved CTMP.

10. Prior to the construction of any part of the development above damp proof course level, a scheme to enable the charging of plug-in and other ultra-low emission vehicles in safe, accessible and convenient locations within the development (along with a timetable for their provision), shall be submitted to and approved in writing by the Local Planning Authority. The development shall be carried out in accordance with the approved details and timetable and retained as such thereafter.

11. Prior to the first occupation of any dwelling hereby approved, a scheme detailing cycle parking facilities shall be submitted to and approved in writing by the Local Planning Authority. The cycle parking facilities shall be installed as approved prior to the first occupation of the dwelling and shall be retained as such and kept free from obstruction and be available for the purpose specified thereafter.

12. Prior to the first occupation of the development, a Full Travel Plan based on the principles set out in the Framework Travel Plan dated December 2019 shall be submitted to and approved in writing by the Local Planning Authority. The Full Travel Plan shall as a minimum include:

- i. Measures for promoting sustainable modes of travel to residents of the development;
- ii. Arrangements for monitoring and reviewing the Travel Plan's objectives;

- iii. Appointment of a Travel Plan Co-Ordinator;
- iv. Travel Information Packs for the first occupiers of each completed dwelling;
- v. Measures for disseminating updated sustainable travel information and Travel Plan updates to residents for the duration of the Travel Plan's lifetime.

The Full Travel Plan shall be implemented in accordance with the approved details and the development shall be carried-out and operated in accordance with the approved Travel Plan thereafter.

13. Prior to the commencement of any works on site, a surface water management scheme for the site, based upon the hydrological and hydrogeological context of the development shall be submitted to and approved in writing by the Local Planning Authority. The surface water scheme thereby approved, shall be implemented in accordance with the approved details before the development is completed.
14. Prior to commencement of any works on site, details of the maintenance & management of the surface water sustainable drainage scheme shall be submitted to and approved in writing by the Local Planning Authority. The scheme shall be implemented and thereafter managed and maintained in accordance with the approved details. These shall include a plan which covers the lifetime of the development, the arrangements for adoption by any public body or statutory undertaker, or any other arrangements to secure the operation of the surface water drainage scheme throughout its lifetime.
15. In the event that contamination is found at any time when carrying out the approved development that was not previously identified, no further work shall take place until a remediation strategy for dealing with that contamination has been submitted to and approved in writing by the Local Planning Authority. The development shall thereafter be completed in accordance with the approved remediation strategy. Following completion of the measures set out in the approved remediation strategy a verification report shall be submitted to the Local Planning Authority demonstrating compliance with the said strategy.
16. The application for reserved matters for 'layout' and 'appearance' made pursuant to Condition 1 of this planning permission, shall be accompanied by a noise mitigation scheme setting out the measures that shall be implemented to mitigate any potential adverse effects arising from noise sources (including for the avoidance of doubt the site currently known as Hunts Food Service). The noise mitigation scheme shall be submitted to and approved in writing by the Local Planning Authority, and the approved

scheme shall be implemented in full prior to the occupation of any dwelling requiring such mitigation measures and maintained in perpetuity thereafter.

17. Prior to commencement of development, a Construction Environment Management Plan (CEMP) shall be submitted to, and approved in writing by, the Local Planning Authority demonstrating mitigation strategies to be used on site during development. As a minimum the CEMP shall include details of the following:

- Measures to control the emission of dust, dirt and smoke during construction, together with a scheme to control noise and vibration during the construction phase of the development;
- Measures to protect all retained and newly created hedgerows and trees with an appropriate buffer for the duration of the construction period in line with BS 5827:2012 and the recommendations of the submitted Arboricultural Impact Assessment prepared by CSA Environmental (November 2019); and
- Avoidance measures in relation to the potential presence of nesting birds, badgers, hedgehogs, dormice and reptiles for the duration of the construction period.

The approved CEMP shall be adhered to throughout the construction period for the development.

18. The development hereby approved shall be completed in accordance with the certified submitted Biodiversity Plan ('BP') (dated 1 July 2021) and any subsequent reserved matters application(s) shall provide detail of the ecological enhancement measures contained therein. Any measures relating to the construction phase shall be adhered to throughout the construction of the development. Any measures relating to the operational phase shall be implemented in accordance with the BP and shall thereafter be retained for the life of the development.

19. Prior to the construction of any dwelling hereby approved above damp proof course, a detailed lighting scheme shall be submitted to and approved in writing by the Local Planning Authority (the scheme shall be designed by a suitably qualified person and in accordance with the Bat Conservation Trust's Guidance Note 08/18 (Bats and artificial lighting in the UK), and take account of the proposed bat mitigation measures set out in Section D of the approved Biodiversity Plan dated 1 July 2021). The development shall thereafter be completed and maintained in accordance with the approved details.

20. Prior to commencement of any works on-site, a landscape and ecological management plan (LEMP) shall be submitted to, and be approved in writing by, the Local Planning Authority. The content of the LEMP shall have due regard to the certified Biodiversity Plan (BP) and include the following:

- a) Description and evaluation of features existing and/or to be created and managed.
- b) Ecological trends and constraints on site that might influence management.
- c) Aims and objectives of management as set out in the BP.
- d) Appropriate management options for achieving aims and objectives.
- e) Prescriptions for management actions.
- f) Preparation of a work schedule (including an annual work plan capable of being rolled forward over a 5-year period).
- g) Details of the body or organisation responsible for implementation of the plan.
- h) Ongoing monitoring and remedial measures.

The LEMP shall also include details of the legal and funding mechanism(s) by which the long-term implementation of the plan will be secured by the developer with the management body (or bodies) responsible for its delivery. The LEMP shall also set out (where the results from monitoring show that conservation aims and objectives of the LEMP are not being met) how contingencies and/or remedial action will be identified, agreed, and implemented so that the development still delivers the fully functioning biodiversity objectives of the originally approved scheme. Development shall take place in accordance with the approved LEMP which shall be adhered to for the lifetime of the development.

21. The application for reserved matters for layout made pursuant to Condition 1 of this planning permission, shall show details of a vehicular/pedestrian/cycle link-up to the site's boundary with Title Number DT406057. Prior to the first occupation of 75% of the proposed dwellings, the vehicular/pedestrian/cycle link-up shall be constructed in accordance with the approved details.

EP5I

## Appeal Decision

Inquiry held on 3 – 6 August, 9 – 12 August and 14 September 2021

Site visit made on 13 August 2021

**by O S Woodward BA(Hons.) MA MRTPI**

an Inspector appointed by the Secretary of State

Decision date: 27<sup>th</sup> May 2022

---

**Appeal Ref: APP/L3815/W/21/3270721**

**Land within the Westhampnett / North East Chichester Strategic Development Location, North of Madgwick Lane, Chichester**

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant outline planning permission.
  - The appeal is made by CEG and the Landowners (D C Heaven and Eurequity IC Limited) against the decision of Chichester District Council.
  - The application Ref WH/20/02824/OUT, dated 30 October 2020, was refused by notice dated 1 March 2021.
  - The development proposed is for residential development comprising up-to 165 dwellings, including an element of affordable housing; together with an access from Madgwick Lane as well as a relocated agricultural access, also from Madgwick Lane; green infrastructure, including the enhancement of the Lavant Valley Linear Greenspace; sustainable drainage systems; and associated infrastructure.
- 

### DECISION

1. The appeal is allowed, and planning permission is granted for residential development comprising up-to 165 dwellings, including an element of affordable housing; together with an access from Madgwick Lane as well as a relocated agricultural access, also from Madgwick Lane; green infrastructure, including the enhancement of the Lavant Valley Linear Greenspace; sustainable drainage systems; and associated infrastructure, at Land within the Westhampnett / North East Chichester Strategic Development Location, North of Madgwick Lane, Chichester, in accordance with the terms of the application Ref WH/20/02824/OUT, dated 30 October 2020, subject to the conditions set out at Annex C.

### PRELIMINARY MATTERS

2. The appeal is for outline planning permission with all matters reserved except for access. The appeal is supported by land use and buildings heights parameters plans, as well as full details of the proposed access points that have been applied for in full. A series of illustrative drawings have also been submitted in support of the appeal which I have had regard to as appropriate, allowing for their illustrative status.
3. The Goodwood Estates Ltd (The Estate) had Rule 6 status at the inquiry. The relationship of the site and the proposal to The Estate is a key component of the appeal, as set out throughout this Decision.

4. The appeal is supported by a s106 Planning Obligation. Following the related discussions at the inquiry, this required amending. I therefore agreed a short extension of time following the close of the inquiry for the parties to deal with that. The revised s106 Planning Obligation was duly received on 29 September 2021 (the s106).
5. There was no reason for refusal in relation to heritage matters, but The Estate submitted evidence in relation to the effect of the proposal on the setting of the Old Place Farmhouse. I have therefore assessed this factor in my Decision.
6. The reason for refusal in relation to noise is only with regard to aircraft noise from the aerodrome. However, The Estate submitted evidence in relation to helicopter and motor circuit noise, and all of these aspects of noise were considered in depth at the inquiry. I have reflected this in my Decision.
7. The fourth reason for refusal is in relation to access and highway safety, specifically in relation to pedestrian access to the south of the site, pedestrian access to the central parts of the site from Madgwick Lane, and the northern agricultural and non-motorised access to Stocks Lane. However, the appellant submitted further information to the Council in the lead up to the inquiry. In light of that additional information, the Council did not pursue this reason for refusal.
8. The fifth reason for refusal is in relation to the provision of affordable housing and infrastructure obligations. The s106 secures provision for these factors and, in light of this, the Council did not pursue this reason for refusal.
9. At the time of the inquiry, the Council agreed with the appellant that it could not demonstrate a five-year supply of housing land, albeit the extent of shortfall was in dispute. After the inquiry closed, further evidence was released which led the Council to change its position and to argue that it could, in fact, demonstrate a five-year supply of housing land. I afforded the main parties the opportunity to comment on the updated position and this is reflected in my Decision.
10. After the inquiry closed, Natural England (NE) updated its advice in relation to nutrient level pollution. I consulted the main parties on the implications of this advice. The appellant submitted a Deed of Variation to the s106 on 13 April 2022 (the DoV) with regard to changes to the proposed off-site nitrate mitigation land. I have reflected this in my Decision.
11. Two appeal decisions<sup>1</sup> were brought to my attention after the inquiry closed. I afforded the main parties the opportunity to comment on those decisions and I have reflected them as appropriate in my Decision.

## MAIN ISSUES

12. In light of the forgoing and reflecting the evidence at the inquiry, the main issues were agreed as:
  - whether or not the appeal site is an appropriate location for development of this type, particularly with regard to the wider masterplanning for the Westhampnett/North East Chichester Strategic Development Location

---

<sup>1</sup> Refs APP/L3815/W/21/3284653 and APP/L3815/W/21/3286315.

(SDL), physical integration with the existing settlements of Chichester and Westhampnett, and reliance on the car by future occupiers;

- the effect of the proposed development on the character and appearance of the area, particularly with regard to the Lavant Valley landscape and visual integration with the existing settlements of Chichester and Westhampnett;
- the effect of the proposed development on the special interest of the nearby listed buildings, in particular Old Place Farmhouse and Chichester cathedral, with regard to the effect on their settings;
- whether or not the proposed development would provide satisfactory living conditions for future occupiers, with particular regard to noise from the aerodrome and motor circuit; and,
- whether or not the proposed development would create potential future risks to the operation of the aerodrome and/or motor racing circuit, including with regard to the efficient operation of the highway network in the vicinity of the appeal site with regard to events traffic related to major events at the motor racing circuit.

## **REASONS**

### **Planning policy**

13. The Development Plan for the area includes the Chichester Local Plan Key Policies 2014-2029, adopted July 2015 (the LP). The LP was adopted subject to a requirement to a review being undertaken within five years in response to a flawed transport evidence base. The Council has not yet undertaken this review. It is therefore common ground that the housing policies in the LP are to be considered as out-of-date. Paragraph 11d of the Framework is therefore engaged. I reflect this as appropriate in the 'planning balance' section of this Decision.
14. The Chichester Local Plan Review 2035: Preferred Approach – December 2018 (the emerging LP) is in the early stages of production. It is due to undergo further extensive public consultation and is likely to be the subject of modifications before adoption. It therefore carries limited weight. This is common ground between the Council and the appellant, as agreed through cross-examination.

### **Location/principle**

15. The appeal site is a relatively small part of the SDL. Policy 17 of the LP is in relation to development in the SDL. The policy explicitly allocates 500 dwellings, community facilities, and open space to the SDL. It directs development to two areas, one to the south of Madgwick Lane (now built out as Phase 2) and one to the eastern edge of Chichester (now built out as Phase 1). The appeal site does not fall within either location. The dwellings allocated for the SDL have now been delivered in the two locations as set out in the policy. Whether or not this renders the policy, or parts of it, 'spent' was the subject of much debate at the inquiry. However, this is a needless distraction. The relevant consideration is that the policy does not explicitly allocate for more than 500 homes within the SDL and does not direct development to the appeal

site. The proposal therefore conflicts with Policy 17 and the wider masterplanning for the SDL.

16. The proposed housing would be to the centre of the site, set away from existing surrounding built form. There would be a degree of separation from the immediately adjoining built-up areas through the proposed landscaping to the borders of the site. However, to the east and south it would only be separated from the existing built development by the proposed managed landscaped area, rather than open, agricultural land. There would be a degree of physical separation from Chichester and Westhampnett, but this would be tempered because the appeal site sits in an area with an edge-of-settlement, hinterland character, with residential and commercial development close by.
17. In terms of accessibility, the appeal site sits nearby to Chichester, which is a sub-regional centre and offers a plethora of services and facilities. New walking and cycle routes would be provided providing connectivity to Chichester. The appeal site lies within a short walk along safe footpaths of bus stops along Westhampnett Road, which are served by bus route 55 which provides a half hourly service to Chichester, Tangmere, and Chichester Bus Station and Chichester Rail Station. The appeal site would therefore provide alternative options to journeys by car. In principle, the appeal site is in an appropriate location in terms of reducing the reliance on the car by future occupiers.
18. Overall, whilst future occupiers would not be overly reliant on the private car to access the services and facilities that would be required on a daily basis, the development proposed would be separated from the immediately adjoining built up areas, and would conflict with the approach to masterplanning of the SDL. The proposal would therefore conflict with the relevant parts of Policies 7, 17 and 33 of the LP in these respects. The proposal fails to comply with Policy AL4 of the emerging LP, which largely reflects Policy 17 of the LP. The proposal also conflicts with Criterion 1 of the Interim Position Statement for Housing Development, November 2020 (the IPS), which is with regard to the integration of housing development with existing settlements.

### **Character and appearance**

19. The appeal site is agricultural land, with the River Lavant forming the southern boundary. Properties in the Old Place Farmhouse complex form the eastern boundary with the Phase 2 housing development further away on the opposite side of Madgwick Lane. Remaining agricultural fields lead up to the motor racing circuit to the north, and to the west are relatively small amounts of open space either side of the river, with the built envelope of Chichester beyond.
20. Although the appeal site itself is open agricultural land, it sits near to significant built form on the edge of Chichester and the village of Westhampnett which is, particularly following the construction of Phase 2, effectively joined-up to Chichester. In the vicinity of the appeal site are substantial retail outlets such as Aldi, a hotel, residential estates, and the city of Chichester beyond. The appeal site is located in a corridor of open agricultural land separating Chichester from the motor racing circuit, but this has already been partially eroded with the construction of Phases 1 and 2. The character of the area is of an edge of settlement, transitional area leading outwards from Chichester, but with the circuit nearby to the north rather than significant areas of open countryside.

21. It is proposed to develop the site for housing. The scheme is in outline, with only access applied for in detail. However, parameters plans have been submitted which confirm that the built development would be a mixture of up to 2 and 2 ½ storey housing, concentrated to the centre of the site and away from the boundaries. This is at least partially a product of the physical constraints on the appeal site, in particular the need for a 400m off-set from the motor racing circuit in relation to noise (a matter to which I return later) flooding from the river, the need to preserve a view of the cathedral from the junction of Stocks Lane and Madgwick Lane, and to respect the setting of the nearby grade II listed Old Place Farmhouse complex.
22. There would be some harm to the landscape character of the area through the loss of the existing agricultural land and replacement with a residential development, whatever its eventual precise layout and form following consideration of reserved matters. This would negatively alter the character of the appeal site by the introduction of built form and lighting to what is currently tranquil, agricultural land. However, as set out above, the appeal site is on the edge of the built-up area of Chichester and Westhampnett, and the motor racing circuit, a large built-up facility, lies to the north. The closeness and the extent of the nearby built-up areas, and that the areas are to all sides of the site, are key aspects of the appeal site and its setting. It is in a transitional character area and is perceived as such both from nearby and from distance, partially mitigating the harm to landscape character from the proposal.
23. A new northern boundary to Chichester would be created, likely with fairly significant landscaping and/or built form. However, there needs to be a northern boundary to Chichester at some point, and I do not see moving this slightly further forward from its current position as being unduly harmful to the character and landscape of the area, given the context set out above. I particularly note that the appeal site would not be materially any closer to the boundary of the circuit than Phases 1 or 2 and a ring of open land, between Chichester and the circuit, would be maintained. There would be some loss of hedgerow along Madgwick Lane where the new access is proposed. However, this would be relatively limited in extent and the character of the lane has already changed to be more open and suburban as a consequence of the Phase 2 development and its access to the east. These factors partially mitigate the harm from this element of the proposal.
24. The proposed extensive landscaping would be of a suburban character and form and would therefore also harm the existing agricultural landscape character. As noted above, the proposed open space would form a ring around the proposed built form, which is the opposite of the general urban grain in Chichester with open space located to the centre and forming the focus of urban development. However, this would be less harmful than might otherwise be the case because to the south of the site the open space would border the river, providing a pleasant and open aspect along this feature, also reflecting the character of built form being set away from the river along this valley. To the east, the proposed open space would eventually be seen as in the middle of the existing development to the east of Madgwick Lane and the proposed development, albeit divorced to a degree by the road and associated hedgerow, rather than as a ring around the proposed development in isolation.

25. The harm that I have identified above would be appreciated by a number of nearby receptors, including not only the sensitive receptors of the occupiers of the western edge of the Phase 2 development and the farmhouse buildings directly adjacent to the appeal site, but also for the users of surrounding public rights of way and in viewpoints from further afield, looking over the river valley. Drivers would also be afforded views of the proposal from Madgwick Lane, although these would be fairly fleeting through gaps in the hedgerow. A degree of harm would be caused to these receptors from the harm to the character and appearance of the area that I have identified above. However, this again must be considered in the context of the transitional character of the appeal site itself, and the urban nature of much of the surroundings, which would mitigate the harm.
26. If the development were to use the Lavant Waste Water Treatment Works then a 2.56 ha area of land to the north and east of the appeal site would need to be planted with trees, at a minimum canopy cover of 20%, in order to meet nutrient neutrality objectives. It is not certain, however, that this will be required, because there is an alternative, indeed preferred, option using Tangmere Waste Water Treatment Works, which would not require this planting. That said, if the planting were required it would introduce a fairly significant area of tree planting, likely of managed, rather than naturalistic/woodland, appearance. This would be in an area which is currently open agricultural land. This would cause harm to the character and appearance of the area, but only to a limited degree because tree planting, even if of a managed appearance, is not an unusual countryside feature.
27. Overall, the proposal would harm the character and appearance of the area and the Lavant Valley landscape. I judge the level of harm to be moderate, because of the existing transitional, edge-of-settlement character of the immediate surroundings and the partially mitigating factors set out above. The proposal would therefore fail to comply with Policies 7, 17 and 48 of the LP, which, amongst other criteria, require high quality design and to protect local landscape character. The proposal fails to comply with Policy AL4 of the emerging LP, which largely reflects Policy 17 of the LP. The proposal also conflicts with Criteria 1 and 5 of the IPS which relate to the integration of housing development with existing settlements and landscape character.
28. The proposal would be visible from key views within the South Downs National Park (SDNP). The South Downs National Park Authority has objected to the proposal on the basis of harm to the setting of the SDNP, including night time views and light pollution. However, the proposal is significantly distant from the SDNP and would be perceived in the context of the surrounding existing built form. I observed on site that the appeal site is barely discernible from the key viewpoints in the SDNP. The proposal would therefore have a negligible effect on the landscape and scenic beauty of the SDNP, and I find no conflict in this regard with paragraph 176 of the Framework, and Policies 48 of the LP and Criteria 5 of the IPS, all of which seek to protect or enhance the SDNP.

## Heritage

29. To the east of the appeal site lies the grade II Listed Old Place Farmhouse and its curtilage listed outbuildings and immediate grounds. This group of buildings has been converted into houses. Despite the change of use, the buildings have partially retained their historic setting and association with the former

agricultural land, through the fields to the north and the east. Windows in the farmhouse and some of the outbuildings overlook that land, albeit largely to secondary elevations. In my view, the overall group of buildings retains a connection to this land, which is recognisably agricultural land adjacent to, and associated with, the former farmhouse. As such, the listed complex derives part of its heritage significance from the setting provided by that land.

30. However, this setting has already been partially eroded through the Phase 2 development to the east, various elements of further development on the outskirts of Chichester to the south and west, and the motor racing circuit further to the north. Nevertheless, the proposed development would place substantial built form on agricultural land historically associated with the farmhouse. The proposed open space corridor immediately adjacent to the farmhouse complex would be of a landscaped, recognisably suburban character, at odds with the agricultural appearance of the land. The proposal would therefore further erode the setting of the historic complex, harming its special interest and heritage significance. I assess this level of harm to be at the lower end of less than substantial. The proposal therefore fails to comply with Policy 47 of the LP which, amongst other criteria, seeks to conserve and enhance the settings of listed buildings.

### **Living conditions of future occupiers - noise**

31. A significant amount of evidence, both technical and otherwise, was before the inquiry with regard to acoustic matters. Concerns have also been raised by The Estate regarding the seaming retrofitting of some noise considerations to the proposal. However, the key planning consideration on this matter is whether or not the proposed development, however it has been arrived at, would provide satisfactory living conditions for future occupiers.
32. In this regard, paragraph 185 of the Framework cross-refers to the Noise Policy Statement for England, 2010. This document sets out two relevant thresholds of noise impact - Significant Observed Adverse Effect Level (SOAEL) and Lowest Observed Adverse Effect Level (LOAEL) – which equate to a significant adverse impact and a minimum adverse impact respectively. Paragraph 174 of the Framework makes it clear that development should not be adversely affected by unacceptable levels of noise pollution with paragraph 185 making it clear that mitigation can play a part in this assessment.
33. There are two principal sources of noise that would affect the future occupiers – Goodwood Aerodrome, split into fixed-wing and helicopter movements, and Goodwood Motor Circuit.

#### *Fixed-wing aircraft*

34. There are no set LOAEL or SOAEL levels in planning policy. In the absence of any definitive policy or guidance, it is therefore up to me as the decision maker to decide what the appropriate LOAEL and SOAEL levels for aircraft noise should be with regard to the particular circumstances of the appeal. In this regard, there are an extensive array of studies, documents, reports and assessments to attempt to establish what the levels should be for aircraft noise.
35. The first question to consider is what type of decibel (dB) reading should be adopted. There was general consensus that for fixed wing aviation, LAeq 16 hr

should be used, because it best reflects the noise pattern from an airfield in operation during daytime hours. I have no reason to disagree.

36. The Government's Aviation Policy Framework, dated March 2013, which is a material consideration in this case<sup>2</sup>, sets a noise level of 57 dB LAeq 16 hour as the onset of significant community annoyance from aircraft noise, which in my view can fairly be treated as the SOAEL as set out in that report, which is, by definition, the level at the onset of significant observed adverse effects.
37. The Survey of Noise Attitudes 2014: Aircraft document<sup>3</sup> (SONA) finds that 7% of people would be highly annoyed by aviation noise at 51 dB LAeq 16 hour, rising to 9% at 54dB, 13% at 57dB and 17% at 60dB. The report centred on the United Kingdom and was specifically commissioned to consider the relationship between airports and development. I place significant weight on this document, albeit I note that it does not set a specific SOAEL level. Rather it highlights the dB levels at which a certain percentage of people are likely to become highly annoyed.
38. As set out at paragraph 245 of Appeal Ref APP/R5510/A/14/2225774, dated 2 February 2017, in relation to works at Heathrow Airport, the SOAEL for aviation was set at 63 dB LAeq 16 hour. This is a level that was agreed between the parties and was adopted as part of an extensive inquiry into an airport expansion. I therefore place significant weight on this decision, even though it pre-dates some more recent reports considering noise from aircraft, which I take account of as appropriate in my assessment.
39. A Department of Transport (DfT) report from 2017<sup>4</sup> sets out a LOAEL of 51 dB LAeq 16 hours. The report is detailed and followed a wide-ranging consultation. I therefore place significant weight on it.
40. The World Health Organisation (WHO) has issued guidance<sup>5</sup> that the SOAEL for transport aviation should be set at 45 dB LAeq 16 hour. However, this is not policy in the United Kingdom. The guidance's primary focus is on avoiding even low level annoyance to people, rather than considering the issue in the round. Concerns have been raised by the Government, in its Aviation 2050 The Future of UK Aviation document, dated December 2018, that the WHO approach does not consider a full cost/benefit analysis of the impact of setting a SOAEL at this level. I therefore place limited weight on this guidance.
41. A number of reports and updates from the Independent Commission on Civil Aviation Noise and the Civil Aviation Authority were presented at the inquiry, but these are not formally adopted reports by Government, and are advisory only, which limits their weight. The conclusions in many of these reports, including in SONA, appear to show that people have become more sensitive to aviation noise over the past few decades. However, there is no compelling evidence that this trend will necessarily continue, and the SONA advice already accounts for the changes up until 2014.
42. Taking all of the above into consideration, the starting point for considering the SOAEL should be 63 dB LAeq 16 hour, as established through the Heathrow

---

<sup>2</sup> Paragraph: 015 Reference ID: 30-015-20190722

<sup>3</sup> Published by the Civil Aviation Authority in 2017

<sup>4</sup> Consultation Response on UK Airspace Policy: A framework for balanced decisions on the design and use of airspace, October 2017

<sup>5</sup> WHO Environmental Noise Guidelines for the European Region, 2018

decision. However, this is based on Transport Aviation (TA). The Goodwood Aerodrome is instead used by General Aviation (GA) planes. These are smaller, fly lower, are more likely to be propeller rather than jet engine, and have a different overall noise profile. I still believe that the primary measure of the likely level of disturbance should be the overall noise level, ie the dB level. However, a discount should be applied to take account of the different character of the noise. I have decided to apply a 5 dB discount, as set out in DfT report Study of Community Disturbance caused By General and Business Aviation Operations Report, July 1988 (the GABA Report)<sup>6</sup>, resulting in adopting a SOAEL of 58 dB LAeq 16 hour.

43. As a sense check, the results from SONA, which indicate that at 60 dB 17% of people would be highly annoyed and at 57 dB it would be 13%, and the conclusion in the Aviation Policy Framework of 57 dB as the onset of significant community annoyance, indicate that 58 dB LAeq 16 hour is a reasonable position to adopt. My attention has been directed to a previous appeal decision<sup>7</sup> which placed SOAEL at 52 dB LAeq 16 hour in apparently similar circumstances. However, that decision was issued before the SONA report was published, which is a material change in the evidence base.
44. I have adopted a LOAEL of 51 dB LAeq 16 hour, based on the DfT Report and that this is the level where only 7% of people would become highly annoyed, as set out in SONA. I have not undertaken the same discount to LOAEL to reflect GA noise as I have with SOAEL, because the GABA Report highlights that, below 50 dB, any reductions in noise would be difficult to discern.
45. Noise contours confirm that the appeal site would be the subject of an overall noise profile of 48 to 51 dB LAeq 16 hour on a typical summers day, ie when the aerodrome is most busy and noisy. This is a very similar noise profile to that affecting both Phase 1 and Phase 2, which is perhaps to be expected given that all three sites are a similar distance from the aerodrome. The three sites are to the south east, south and south west of the aerodrome. The prevailing wind is from the south west and therefore blowing away from all of these sites. Therefore, all of the appeal site, and all of the future occupants of the proposed dwellings, would not be subject to unacceptable noise levels from aircraft, likely not even breaching LOAEL levels.
46. If the aerodrome were to increase usage up to its maximum of 70,000 movements per annum as allowed for by its s52 agreement<sup>8</sup>, then the noise profile would increase to between circa 50 to 53 dB LAeq 16 hour. In my view, this is unlikely, given the broadly downward trend of total aircraft movements in the period 1985 to 2020, and, in any event, would only bring the site into the lower levels of LOAEL effects.
47. There would occasionally be greater noise levels from louder aircraft. However, evidence has been provided that these events are unlikely to number more than two per day. Therefore, whilst each event would potentially cause harm to the living conditions of the future occupiers, the infrequency and short duration mean that this would be acceptable.

---

<sup>6</sup> Table 3.9, page 62

<sup>7</sup> Ref APP/L3815/A/13/2200123, dated 11 February 2014

<sup>8</sup> As confirmed in a Section 52 (T&CPA 1971 – Section 126 of the Housing Act 1974) Agreement, amended 1987

### *Helicopters*

48. Helicopters use two different landing sites in the aerodrome. In addition to normal flights there are also two different training routes, which are used by the aerodrome for helicopter pilot instruction – the northern route and the southern route. The standard helicopter flights and the northern training route are not in proximity to the appeal site and their noise can be taken account of as part of the assessment above. However, the southern training route flies directly over the appeal site and needs to be considered separately.
49. Helicopters make a markedly different noise from fixed-wing aircraft, including a percussive element. Helicopters have the potential to harm living conditions to a greater extent for any given dB reading than fixed-wing aircraft. Having carefully taken on board the evidence on this issue, I conclude that there is no reliable way of reflecting the effect of this on living conditions through dB levels, although L<sub>A</sub>max readings are helpful to provide quantitative background information, because they best reflect the noise profile of an overhead helicopter flight. It instead needs to be taken on board as part of the general qualitative assessment of the likely effects of helicopter movements on future residents.
50. The submitted noise assessment confirms that the helicopter flights would generate noise levels at the site of between 68 and 81 dB L<sub>A</sub>max. These are significantly in excess of the SOAEL level, even before adding in the qualitative element of the percussive nature of the sound. The flight routes are also over the appeal site and the noise would come from above and from many directions as the helicopters fly over. Each individual helicopter flight is likely to lead to annoyance to a significant proportion of the future residents of the appeal site.
51. However, the southern training circuit is only used when runways 14/32 are not in operation. These are the preferred runways due to prevailing wind conditions. Therefore, only somewhere between one quarter and one third of helicopter training flights use the southern training route. Using the data provided, this has, in recent years, resulted in an average of nine fly-overs per day of the appeal site in the summer, and as low as two per day in the winter. In addition, the fly-overs are restricted by the s52 agreement to 0900 to 1800 hrs or sunset, and not at all on Sundays, although with two evenings per week up to 22:00 hrs.
52. The number of fly-overs could increase if the aerodrome were to increase its helicopter flights up to the maximum allowed by the s52 agreement, but there is no indication that this is likely to occur and the number of helicopter movements has remained broadly stable in the period 1985 to 2020. In any event, even if increased to the maximum movements as allowed for by the s52 agreement, helicopter fly-overs would remain infrequent.

### *Motor racing circuit*

53. The motor racing circuit hosts five Category 1 event days each year where there are no noise restrictions. During these events it is likely that the appeal site would be exposed to high levels of noise, easily in excess of any SOAEL level and would be likely to cause high annoyance to future residents. However, these days are of great value to The Estate, the local community, and the wider general public. The Revival, in particular, is one of the pre-eminent motorsport events in the entire country. They bring great economic

benefits to the area. They are for only five days a year. The planning permission for the circuit<sup>9</sup> specifically allows the Category 1 days, despite being disruptive to the local area in a number of ways, given their many benefits. I therefore do not consider the Category 1 days as part of my noise assessment, although they are, of course, still a material planning consideration.

54. The LP sets out a 400m limit from the circuit where housing should not generally be located, although it does explicitly state that limited development may be possible subject to appropriate noise mitigation measures. It is not entirely clear from the proposed drawings, and because of the illustrative nature of the layout plans, but the proposed housing would likely fall outside this 400m limit, with the possible exception of the northern facade to some of the dwellings to the northernmost part of the site. However, the 400m limit is a guide for the location of noise sensitive development, such as housing. Detailed noise assessment is also necessary and has been undertaken.
55. On the basis of the evidence before me, LAeq 30 min should be used to measure noise from use of the circuit, because it best reflects the noise pattern which includes moments of noisier activity but also a general blend of background noise. As with aircraft noise, there are no fixed LOAEL and SOAEL levels for motorsport noise. The appellant has adopted 50dB LAeq 30 min as LOAEL and 55dB LAeq 30 min as SOAEL, based on WHO Guidelines for Community Noise from 1999 related to steady, continuous noise and serious annoyance (SOAEL) and moderate annoyance (LOAEL). I acknowledge that I have previously placed limited weight on a different set of WHO guidance. However, the 1999 guidance is a useful starting point for considering motorsports noise, which is of a different character to aircraft noise. I am content to adopt the figures in the WHO report, however, caveated by the qualitative consideration that not all motorsports noise is steady and continuous, and there would be louder elements, such as screeching tyres.
56. Category 2 event days are the days where the noise limits for cars using the circuit are highest (excluding the unlimited Category 1 days). These are therefore the most robust days to assess. On Category 2 days, the appeal site would be subject to between 46 and 51 dB LAeq 30 min. The level of noise would fall fairly rapidly once behind the northern façade of the northernmost buildings, which would act as an acoustic screen. I acknowledge this is only an illustrative layout, but the parameters plans do provide some certainty that there would be this 'buffer' of building along a high proportion of the northern boundary. The overall noise levels washing across the appeal site would be similar to those at the Phase 1 and Phase 2 developments.
57. Overall, given that the majority of the site would be below the LOAEL, and all of it comfortably below the SOAEL, the noise from use of the circuit, even allowing for occasional more noisy and intrusive elements, would be within acceptable limits to ensure that the living conditions of future occupiers would not be unduly harmed. The one possible exception to this would be the northern façade of the northernmost dwellings, which may require noise mitigation measures. These measures could include ensuring the layout keeps the buildings beyond the 400m barrier, ensuring double aspect dwellings, detailed layout of private outside amenity areas, the ability to ventilate with closed windows, and a number of other considerations.

---

<sup>9</sup> Ref WH/10/00235/FUL, dated 20 May 2010

58. It is possible that the mitigation may include the need to close windows. However, this is only likely to be necessary to the northern façade of the northernmost dwellings, which would be the most affected by the motor circuit noise, and even then likely only for relatively short periods of time. This may be able to be designed out entirely, depending on the final layout and treatment of the landscaping to the northern boundary. I do not, therefore, see this as an unacceptable expectation of the future detailed design.
59. Given the relatively low levels of noise I have identified, and in particular noting that it is only at LOAEL and not SOAEL levels, I do not foresee the mitigation measures being extensive or in themselves harming the living conditions of future occupiers. These could all be controlled effectively by condition.

#### *Cumulative*

60. Noise from the aerodrome and the motor racing circuit often occurs simultaneously. The cumulative effect must therefore be considered. This was discussed in detail at the inquiry, but no firm conclusions were provided regarding specific dB deductions to make to LOAEL and SOAEL levels to accommodate this factor. However, it is clear that annoyance from noise from The Estate could be exacerbated by the different types, tones, frequencies, and nature of the noise from fixed-wing, helicopter and motorsport sources. I have considered this carefully, and I am comfortable that the combined noise effects would remain within a LOAEL range, in the sense that they would not result in a significant adverse impact, given the headroom before SOAEL levels of noise would be likely to be experienced by the future occupiers.

#### *Other*

61. It was raised at the inquiry that the fourth bullet point to Policy 17 of the LP could also mean that the development itself should be designed to reduce the effect of noise on existing communities. However, no matter how eloquently put this position was, planning policy should not be read legalistically and instead from a common sense approach of its clear intended meaning. In this case, the common sense reading of Policy 17 is that any proposals in the SDL should mitigate their effect from noise on the proposal itself, not on surrounding existing communities.

#### *Overall*

62. Overall, the noise from fixed-wing aircraft would be either below, or at the lower end of, the LOAEL. The noise from helicopter flights, despite their relatively loud noise and qualitative annoyance, would be infrequent. Given that the majority of the site would be below the LOAEL, and all of it comfortably below the SOAEL, the noise from the motor racing circuit, even allowing for occasional more noisy and intrusive elements, and noise considered in combination, would be within acceptable limits. Modest mitigation measures to counteract effects at a LOAEL level may be required at the detailed design stage, and these could be secured by condition.
63. Consequently, the proposal would provide satisfactory living conditions for future occupiers, with particular regard to noise from the aerodrome and circuit. This is either as it operates currently or as it is likely to do so in the future, and it would not unacceptably harm the living conditions of the future

occupiers. The proposal is therefore acceptable in these respects and complies with Policy CP17 of the LP, which requires that proposals reduce the impact of noise associated with the motor circuit and aerodrome, and Policy 33, which requires that proposals provide a high quality living environment.

### **Agent of Change – risk to operations at The Estate**

64. Paragraph 187 of the Framework introduces the concept of the 'agent of change' principle. The key test is that existing businesses should not have unreasonable restrictions placed on them as a result of new development. In this instance, the two relevant businesses are the Goodwood Motor Circuit and Goodwood Aerodrome.

#### *Noise*

65. There have been relatively few complaints over the past few years regarding noise from The Estate, and many of the complaints have come from Summersdale, to the west of the aerodrome, and from a few households within that area. Concern has been raised that new residents to the area would not be as accommodating regarding noise disruption as existing residents. However, the existence of The Estate would be known to any potential future purchasers – Goodwood is a famous venue. I view it likely that the majority of future residents would be aware of the potential of noise pollution from events and activities at The Estate, and would factor that into their decision on whether or not to purchase a property. Also, as identified above, the proposal would provide satisfactory living conditions for future occupiers, with particular regard to noise from the aerodrome and circuit.

#### *Aircraft safety*

66. The proposal would involve building underneath the southern training helicopter circuit. This would reduce the amount of open land which could be used by helicopter pilots when making an emergency landing. Evidence was provided at the inquiry from an aircraft safety expert. He presented circles of possible landing points for helicopters in an emergency situation. Under cross-examination, it was revealed that in any individual given circumstance the area would be smaller and cone-shaped or similar, based on prevailing wind conditions and other factors.
67. However, the evidence from the only aircraft safety expert witness at the inquiry was that the appeal site would not prevent safe landing options due to remaining safe landing options and the 'stepping stones', where the pilots identify the next emergency landing spot they would head to if necessary, that are part and parcel of how a helicopter pilot would react to such a situation. On this basis, it has been demonstrated that the proposal would not lead to unacceptable safety concerns that could lead to the closure or re-routing of the southern helicopter circuit. The appellant provided an alternative route for the southern helicopter circuit, but this would likely not be required because of my conclusions on noise and safety above.
68. Some concern has also been raised by pilots in written submissions about the safety of taking off or landing in a fixed-wing aircraft. However, there are agreed Noise Preferred Routeings (NPRs) for aircraft, as set out in the existing s52 agreement<sup>10</sup>. The NPRs for runways 06, 10 and 28 are to the centre and

---

<sup>10</sup>

north of the aerodrome, away from the appeal site. The NPR for runways 14/32 is closer to the appeal site, but does not fly over it, and is of approximately equal distance to Phase 2. I do not, therefore, consider this to be a safety risk.

#### *Air displays*

69. Air displays are part of The Revival. Restrictions imposed in 2015, following the Shoreham accident, have curtailed the displays, but The Estate has confirmed that they still form an important part of the entertainment offering at The Revival. I have no reason to doubt this. However, the air displays follow a circular route that would not be affected by the appeal site, as confirmed in cross-examination. The practice air displays potentially follow a route that includes flying over the appeal site, and may therefore need to be diverted.
70. However, even if small changes were required to the air display routes, there is no compelling evidence before me that this could not be accommodated, or that any changes would result in any meaningful diminution in the quality of The Revival's entertainment and overall offer. The key test in paragraph 187 of the Framework is that there should not be any unreasonable restrictions on operations, and I do not view any potential small alterations to the air display routes, if there would be any at all, as an unreasonable restriction.

#### *Events traffic*

71. One of the four key entrance routes to the major events at The Estate is along Madgwick Lane. It is possible that the development proposed could cause some disruption to this route through vehicles exiting the appeal site and in particular wanting to turn right, across traffic, to access Chichester and other destinations in that direction. However, traffic is carefully managed for the major event days, including a Traffic Management Scheme to be agreed with the Council. Ensuring that traffic from the appeal proposal is effectively controlled could form part of that scheme in the future, and this could be secured by condition. In particular, the amount of disruption likely to be caused would, it seems to me, be self-limiting, because future residents may well be unlikely to want to travel when the traffic is at its busiest on major event days.
72. Overall, there could be some negative effects on traffic on major event days, and I do not deny the importance of this to the smooth running of the event and to The Estate. However, it would likely be minor. The proposal would not therefore materially effect the efficient operation of the highway network in the vicinity of the appeal site with regard to major events traffic.

#### *Overall*

73. In light of my findings above, I consider that the proposal would not create potential future risks to the reasonable operation of the aerodrome or the motor racing circuit, and conclude that the proposal complies with paragraph 187 of the Framework.

### **OTHER MATTERS**

#### **Housing land supply**

74. The Council claims it can demonstrate a five-year supply of deliverable housing sites, at 5.3 years. The appellant claims the true figure is 3.71 years.

75. My attention has been drawn to two recent appeal decisions, Refs APP/L3815/W/21/3284653 and APP/L3815/W/21/3286315, both of which assess housing land supply. I have taken account of these decisions as appropriate in my assessment below, but I have primarily relied upon the evidence before me as submitted for this appeal.

*Need*

76. Need has been calculated using the 'standard method' because the LP is more than five years old, as set out in paragraph 74 of the Framework. The 'standard method' calculation is 759 dwellings per annum (dpa), a significant increase from the LP target of 560-575 dpa.
77. However, a discount needs to be made for the housing to be provided in the part of the District covered by the South Downs National Park. I conclude the discount should be 125 dpa, based on the 125 dpa need figure for the Chichester part of the national park as identified in the South Downs National Park Housing and Economic Development Needs Assessment, September 2017. This is the only figure before me in relation to housing need in the National Park, as disentangled from delivery and 'policy on' considerations. This equates to an overall need of 634 dpa. A 5% buffer is then required, which is uncontested in principle, equating to a final annualised requirement of 666 dpa. I note that this is either the same, or very similar (670 dpa), to the conclusions on need in the two recent appeal decisions.

*Supply*

78. The delivery of small sites (up to 9 dwellings) is considered as a combination of permissions and a windfall allowance. A significant amount of data and varying supply figures have been provided in relation to these two supply factors. However, critically, the Council and the appellant are in agreement that the historic delivery rate is 64 dpa. This is then raised to 71 dpa by removing the two highest and lowest completion years from the past 10 years. The appellant contests the logic of this approach, but ultimately adopts the figure, which I therefore take to be common ground.
79. The Council has partially double counted permissions and windfall provision, resulting in more than 71 dpa being included in the supply, without a robust evidence base. The combined contribution from these two factors should be 71 dpa equating to 355 dwellings overall versus the 459 dwellings as included in the Council's supply. Therefore, 104 dwellings need to be removed from the supply. I am mindful, in this regard, of paragraph 71 of the Framework, which requires compelling evidence that windfall sites can be a reliable source of supply.
80. The Council's supply also includes a windfall allowance for large sites, at 280 dwellings in total. This primarily relies on unallocated greenfield sites coming forward, 'other' sites which are not defined in detail, or brownfield 'residential' sites. Any such sites would be in the housing land supply allocation if known. Therefore, they are, by definition, unknown. They are also likely to be difficult to bring through to delivery within five years because obtaining planning consent is likely to be difficult, and/or potential land ownership and other practical constraints on brownfield sites in particular. I highlight again here paragraph 71 of the Framework. The 280 dwellings should therefore be removed from the five year supply.

81. There is one disputed large site under construction – Centurion Way. Evidence has been provided<sup>11</sup> that average delivery rates for sites of this size lie between 52 and 68 dpa. The Council has assumed 100 dpa for the purposes of their housing land supply calculation. This has not been supported by site specific justification or historic build out rates. The appellant has suggested an alternative build out rate of 80 dpa. This is possibly still too high but I am happy to adopt the lower figure as specified by the appellant as a reasonable assumption. 100 dwellings should therefore be removed from the supply, ie a reduction of 20 dpa for each of the five years.
82. The definition of 'deliverable' in the Framework is clear that sites with outline permission can only be considered where there is clear evidence that housing completions will begin on-site within the five-year period. The agreed base date is 31 March 2021. My approach is to use this date as the 'cut-off' point at which a site can be included in the potential supply, but to have regard to evidence up to the present day for those sites which make it through the 'cut-off'. This ensures that there is consistency in using the same deadline for both supply and need sides of the equation, whilst not ignoring relevant information which may contribute to 'clear evidence' on the progress of the sites. There are four disputed sites, which I take in turn below:
- Manor Road, Selsey – the 74 dwellings in Phase 2 only have outline permission and the reserved matters application has not yet been submitted. I acknowledge that the applicant is a major housebuilder and is progressing with Phase 1 of the development. However, this does not constitute clear evidence that Phase 2 will proceed in a timely manner and will contribute to the five year supply. The 74 dwellings from this scheme should therefore be removed from the supply;
  - Tangmere SDL – an outline planning application has been submitted and the Council resolved to grant permission on 31 March 2021. However, this has yet to be issued awaiting the signing of the s106 agreement. This is because of ongoing negotiations surrounding the sale of some of the land on the application site to the developer, Countryside Properties. This is a complex negotiation, potentially also including CPO powers but likely as a last resort. The evidence before me is that this is a fractious process with significant areas of dispute and unresolved issues, particularly regarding the 'ransom value' of the land to be sold. There is therefore no clear evidence that 180 dwellings from this scheme will come forward within the five year period and they should be removed from the supply;
  - Loxwood Farm Place, Loxwood – a reserved matters application has been submitted. However, it has not yet been determined and one of the factors that still needs to be agreed is in relation to nutrient neutrality in response to a standing objection from NE. This on its own is a potentially difficult obstacle to overcome and there is no certainty about the timescales that may be involved in securing reserved matters consent. The 24 dwellings should therefore be removed from the supply; and,
  - Cooks Lane, Southbourne – the evidence before me as part of the inquiry is that a reserved matters application has not yet been

---

<sup>11</sup> Figure 7, Start to Finish Second Edition, February 2020 and pages 12-13, Chichester District Council 5YHLS Critical Friend Review, dated September 2021, both by Lichfields

submitted. However, the Inspector for the appeal decision<sup>12</sup> at Land to the West of Church Road, West Wittering, dated 22 April 2022, stated that this reserved matters application has now been submitted, by a major housebuilder. The appeal decision was issued after the evidence was submitted in relation to this inquiry, and I see no reason to doubt its accuracy. Given this active interest and progress for the scheme, there is a reasonable prospect of delivery within five years and the inclusion of this site within the supply is justified.

### *Conclusion*

83. Taking all of the above together, I calculate the supply of deliverable dwellings to be 3,536 (the Council's figure) minus 762 dwellings as set out above, leaving 2,774 dwellings. The need is 3,330 dwellings, based on my conclusion of 666 dpa. The extent of the shortfall is therefore 556 dwellings. This equates to a housing land supply of some 4.17 years.

### **Neighbour Comments**

84. Several letters of objection have been received, from local residents and also other interested parties, including Lavant Parish Council, Westhampnett Parish Council, and The Chichester Society. They raised many of the same concerns as assessed above. In addition, concerns were raised regarding: the accuracy of flood maps; groundwater and sewerage capacity; the impact on local infrastructure eg schools; the free flow of traffic, particularly on Madgwick Lane and access to the Rolls Royce Factory; highway safety on Madgwick Lane; pollution and health effects from increased traffic; the potential for the future drivers from the proposed development to cut through Madgwick Park; increased surface water run-off; removal of productive agricultural land; that local residents have not been properly consulted; occupants of the development to the east stating that they received reassurance from the estate agent and/or developer when purchasing their properties that the appeal site would not to be developed; loss of unspoilt views across the appeal site; Westhampnett is already over-developed and has taken more than its fair share of housing allocations; and, harm to privacy of residents at Old Place Farm.
85. I have taken all of these factors into consideration. Most are not in dispute between the main parties. Most were addressed in the officer's report, with the Council concluding that there would be no material harm in these regards. The appellant has submitted detailed technical information in relation to flooding, drainage, and highways. West Sussex County Council, in its capacity as the Lead Local Flood Authority and Highways Authority, has not objected to the proposal subject to conditions. Southern Water has likewise not objected to the proposal with regard to surface water drainage or flooding. All statutory consultation was undertaken by the Council and the appellant and the large numbers of objections make it clear that the majority of neighbouring residents are aware of the proposal. No substantiated evidence has been submitted that leads me to any different view. There is no 'right to a view' through the planning system, and advice provided by third parties during the purchase of nearby properties is not a material planning consideration. The other points are addressed in my reasoning above, could be addressed by conditions or are dealt with by the planning obligations secured.

---

<sup>12</sup> Paragraph 35, appeal Ref APP/L3815/W/21/3286315

## PLANNING OBLIGATION

86. The s106 secures 30% of the total dwellings to be affordable housing, or a commuted sum payment *in lieu*. The full details of the size, tenure, mix and location of the affordable dwellings is to be agreed through an Affordable Housing Strategy.
87. The s106 secures the provision of at least 1.08 hectares (ha) of open space, a 5.15 ha area to be managed as natural/semi-natural meadow and/or grassland including a buffer area adjacent to the river, and a 0.13 ha play area. A Landscape Management and Maintenance Plan for all of these areas is also secured, as well as arrangements for a management company to secure the ongoing maintenance of these areas and any unadopted roads.
88. A contribution towards works to the A27 road to improve the Chichester Bypass Junction, as identified as necessary to mitigate traffic generation from the proposal by Highways England, is secured.
89. The provision of an education pack is secured, to be given to first future occupants providing details of how to mitigate the impact of their activities on the Chichester Harbour Special Protection Area (SPA). A recreation disturbance mitigation contribution is also secured. These are necessary to ensure that any effects on the SPA from increased recreation from future occupants are mitigated.
90. West Sussex County Council, related to the highways works monitoring, and Chichester District Council monitoring fees are secured.
91. The highways works necessary to create the access to the site from Madgwick Lane, including road safety audits, are secured.
92. A Travel Plan, a Travel Plan co-ordinator, and a Travel Plan monitoring fee, are all secured and would encourage modes of travel other than the car and the lifetime implementation of the Travel Plan.
93. Two alternative waste water treatment strategies are set out. The preferred option is to use Tangmere Waste Water Treatment Works. In that instance, nitrate mitigation measures would not be required. The alternative option is to use Lavant Waste Water Treatment Works. In that instance, the s106 secures nitrates mitigation measures for a period of 80 years, comprising tree planting on a specified area of land. The DoV secures two areas of land totalling 2.56 ha, to the north and east of the appeal site. Both are under the control of the appellant, with both to be planted with trees at a minimum of 20% canopy cover.
94. Overall, the obligations set out in the s106 and the DoV are directly related to the development, fairly and reasonably related in scale and kind to the development, and are necessary to make the development acceptable in planning terms.

## CONDITIONS

95. Standard reserved matters submissions and timescales, and commencement timescale, conditions are necessary. In addition, a condition specifying the detail expected with future reserved matters submission(s), including housing mix with the first submission, is necessary to ensure the appropriate details are

- submitted in support of future reserved matters submission(s) so as to protect the character and appearance of the area, highway safety, and to ensure biodiversity enhancement.
96. A condition specifying the relevant drawings provides certainty. I have only included the drawings showing details of access, which is applied for in full, and parameters plans as are required to control the future reserved matters submissions. The other submitted drawings are not listed because they are illustrative or relate to technical matters the detail of which will come forward as part of future reserved matters and other condition discharge submissions.
97. A Phasing Plan condition is necessary to confirm what the phases of the development will be and to provide a framework for the submission of details through other conditions.
98. A condition requiring a Written Scheme of Archaeological Investigation is necessary to secure appropriate protection and archaeological work.
99. Conditions requiring details of the landscaping and children's play area, buffer zone by the River Lavant, tree protection measures, a Landscape and Environmental Management Plan, a Tree Protection Plan and an Arboricultural Method Statement, are necessary to protect the character and appearance of the area and to ensure biodiversity enhancement, both at construction and through ongoing management and maintenance.
100. Contamination conditions are necessary to secure appropriate protection and remediation measures.
101. Conditions requiring a Construction and Environmental Management Plan and restricting construction hours are necessary to control the effects of construction on the living conditions of nearby occupiers, highway safety, traffic congestion, and the character and appearance of the site during construction, including specific controls with regard to the potential effect on operations and access to The Estate on major event days.
102. A condition requiring details in relation to air quality is necessary to protect the health and well being of the future occupants of the development.
103. Conditions requiring a scheme for the protection of the development from external noise, including layout and high level considerations prior to commencement and detailed design considerations prior to development above ground level, are necessary to ensure that the proposal suitably mitigates any noise effects from the operations of The Estate on the future occupiers. I have not adopted the full suggested wording of The Estate for these conditions, or used precise dB levels to be attained, because the Council would retain full control through the discharge of the conditions to ensure that suitable mitigation is secured and suitable noise levels achieved.
104. A condition requiring details of surface water drainage is necessary to ensure appropriate drainage works are completed to protect against unacceptable levels of surface water flooding.
105. A condition requiring details of sewage disposal is necessary to protect the living conditions of the future occupiers of the development and to ensure that sufficient sewage capacity and connections are secured, in accordance with the Strategic Infrastructure vision in the LP.

106. Conditions requiring details of the construction of the main access road, and the relevant driveways of each dwelling, and the construction of the agricultural buildings access, and specific highways details at the junction of Madgwick Lane and Old Place Lane, are necessary to ensure that no dwelling is occupied until adequate vehicular access has been provided, and to ensure highway safety.
107. A condition requiring compliance with the ecological reports is necessary to protect and enhance biodiversity.
108. A condition requiring a Sustainable Design and Construction Statement is necessary to mitigate carbon emissions and water usage, in accordance with Policy 40 of the LP.
109. A condition requiring details be provided to the first occupants of each dwelling of the events to be held at Goodwood Motor Circuit was requested by The Estate. However, the circuit is a well known local feature and business and it is highly likely that future occupants would be aware that the circuit exists and that major events are held there. I do not, therefore, view this condition as necessary to make the proposed development acceptable.

*Pre-commencement*

110. The pre-commencement conditions are necessarily worded as such, because a later trigger for the submission and/or implementation would limit their effectiveness or the scope of measures which could be used.

**PLANNING BALANCE AND CONCLUSION**

111. In the section that follows, I have adopted the following ascending scale in terms of weighting – limited, moderate, significant, substantial.
112. It is proposed to provide up to 165 dwellings. The housing land supply of the Council is 4.17 years, below the required five years supply. The need for housing is therefore pressing. Providing more housing is one of, if not the most, important aspirations of local and national planning policy. I therefore place substantial positive weight on the proposed market housing.
113. Up to 50 of the proposed 165 dwellings would be for affordable housing. The Council is currently exceeding its affordable housing targets as set out in the LP, but this is against the agreed to be out-of-date requirement of 182 dpa. The more up-to-date Chichester Housing and Economic Development Needs Assessment 2020 finds an affordable need of 385 dpa, against a supply of 255 dpa, leaving a net shortfall of 130 dpa. That there is a shortfall is evidenced in the fact that the Council has 1,226 households on the waiting list for affordable housing and that the affordability ratios have worsened over the past 2 years, whereas the rest of the south east of England has remained stable. There is therefore an acute requirement for affordable housing and I place substantial positive weight on the proposed affordable housing.
114. The proposal includes substantial areas of landscaped public open space, and a play area. These areas and facilities would be available for use by the public, as well as the future occupants of the development. A new view of the cathedral would also be created, which would be both a heritage and character and appearance benefit of the proposal. I place moderate positive weight on these factors.

115. A biodiversity net gain of 83% for general habitat and 300% for hedgerow habitat would be achieved. This is possible because the appeal site is currently agricultural land and, in common with much agricultural land, it offers relatively low existing biodiversity value. The proposal would introduce new native hedgerows, tree planting, management of the River Lavant to enhance existing habitats, and would provide bat boxes. Paragraph 174 of the Framework requires net gains for biodiversity, but does not identify a specific figure. The Environment Act 2021 indicates a likely future requirement for a biodiversity net gain of 10%. The proposed biodiversity net gain therefore goes significantly beyond policy requirements. I place significant positive weight on this factor.
116. There would be economic benefits in the short term through construction employment, and in the longer term through expenditure by future occupants in the area. As directed by paragraph 81 of the Framework, I attribute significant positive weight to the proposed employment generation that would support economic growth and productivity.
117. Proposing housing on the appeal site conflicts with the masterplanning of the SDL and would be physically divorced from the surrounding built-up areas. There would also be harm to the character and appearance of the area, including to landscape character. However, these harms would be tempered because the appeal site sits in an area with an edge-of-settlement, hinterland character, with residential and commercial development close by, and because the separation to the existing development to the east would be a managed landscaped area, rather than open, agricultural land.
118. Importantly, the identified deficit in housing land is only likely to be rectified through the granting of permission for housing on sites not identified in the LP, such as the appeal site. In addition, the LP was adopted on the basis of a housing need figure of 435 dpa, even though the objectively assessed need was 505 dpa, due to an insufficient evidence base in relation to transport. The LP Inspector therefore adopted the LP at the lower figure but only subject to an updated transport study being produced and the LP being reviewed within five years. The LPA are currently about three years behind schedule on this review. The policies in the LP affected by this awaited review, and in particular those relating to the location of housing, such as Policy 17 and the SDL, therefore carry reduced weight. The acceptability, or otherwise, of a proposal in other regards forms part of the overall planning balance, as I consider in this section, and should not be used to increase the weight to be attached to the conflict with the masterplanning of the SDL. Consequently, I only place moderate negative weight on these factors.
119. The proposal would introduce a new, publicly available view of Chichester Cathedral, a grade I listed building and one of the key defining features of the city. However, whilst this is a benefit of the proposal, I attribute to it limited positive weight because a mid-distance view of the cathedral with Chichester in the foreground is quite a common view from numerous locations.
120. The proposal would erode the setting of the Old Place Farmhouse historic complex, harming its special interest and heritage significance. I assess this level of harm to be at the lower end of less than substantial. I do not seek to set the benefit of the new view of the cathedral against the identified harm to the Old Place Farmhouse complex within the context of establishing if, overall, there remains less than substantial harm to heritage assets. The Framework

makes it clear that harm should be assessed against a heritage asset, not assets collectively. As directed by paragraph 199 of the Framework, I place great weight on the harm to the Old Place Farmhouse complex, limited though it may be.

121. The public benefits of the proposal include the provision of up-to 165 homes, including affordable housing, and the creation of significant areas of public open space, amongst others. These benefits clearly outweigh the lower end of less than substantial harm to the heritage asset that I have identified and the proposal complies with paragraph 202 of the Framework.
122. Subject to relatively minor mitigation measures that could be secured by condition, the proposal would provide satisfactory living conditions for future occupiers, with particular regard to noise from the aerodrome and motor circuit. This factor weighs neutrally in the planning balance.
123. Subject to control through traffic management that could be secured by condition, the proposal would not materially effect of the efficient operation of the highway network in the vicinity of the appeal site with regard to major events traffic. Nor would the proposal risk any unreasonable changes to the operation of The Estate more widely. This factor weighs neutrally in the planning balance.
124. As the housing land supply is 4.17 years and none of the assets of particular importance as set out in the Framework<sup>13</sup> provide a clear reason for refusing the development proposed, paragraph 11d, and the 'tilted balance', is therefore engaged. For the appeal scheme, the adverse impacts I have identified are moderate harm to character and appearance, conflicts with wider masterplanning and physical and visual integration, and harm to the Old Place Farmhouse complex. Taken together, these would not significantly and demonstrably outweigh the many benefits, in particular the provision of housing, including affordable housing, and the creation of new areas of publicly accessible open and play space including significant biodiversity net gain.
125. For the above reasons and having regard to all other matters, I conclude that the appeal should be allowed.

*O S Woodward*  
INSPECTOR

## **ANNEX C: SCHEDULE OF PLANNING CONDITIONS**

- 1) Details of the appearance, landscaping, layout, and scale (hereinafter called "the reserved matters") shall be submitted to, and approved in writing by, the local planning authority before any development takes place, and the development shall be carried out as approved.
- 2) Application(s) for approval of the reserved matters shall be made to the local planning authority not later than 3 years from the date of this permission.
- 3) The development hereby permitted shall take place not later than 2 years from the date of approval of the last of the reserved matters to be approved.
- 4) The development hereby permitted shall be carried out in accordance with the following approved plans: 6216/L001, P001, P002, R-20-0033-001E, and 004A.
- 5) As part of the first reserved matters application, a Phasing Plan identifying the Phases for the development hereby approved shall be submitted to, and approved in writing by, the local planning authority. Thereafter, the development shall proceed in accordance with the approved Phasing Plan.
- 6) The reserved matters submission(s) for each Phase shall include, but not be limited to, the following details:
  - a) Palette of materials;
  - b) Housing mix (including size of dwellings in terms of bedrooms);
  - c) Architectural, character and landscape approach;
  - d) Existing ground levels and finished floor levels;
  - e) Location of fire hydrants;
  - f) External lighting;
  - g) Refuse storage; and,
  - h) Vehicle and cycle parking.

In respect of matter b) 'housing mix', the details shall be submitted with the first reserved matters submission.

### **Pre-commencement**

- 7) Prior to the commencement of development, a Written Scheme of Archaeological Investigation has been submitted to, and approved in writing by, the local planning authority. The scheme shall include proposals for:
  - a) desk-based assessment of the previous results;
  - b) the programme and methodology of site investigation and recording;
  - c) the programme for post investigation assessment;
  - d) the provision to be made for analysis of the site investigation and recording;
  - e) the provision to be made for publication and dissemination of the analysis and records of the site investigation;
  - f) the provision to be made for archive deposition of the analysis and records of the site investigation; and,

- g) the nomination of a competent person or persons/organisation to undertake the works set out within the Written Scheme of Investigation.

Development shall be carried out in accordance with the approved Written Scheme of Investigation.

- 8) No development shall commence until a scheme for the provision of white lining, road hatching or kerb build out, cycle markings, and associated signage at the junction of Madgwick Lane with Old Place Lane, as generally shown on drawing Ref R-20-0033-025A, has been submitted to, and approved in writing by, the local planning authority. The white lining, hatching or kerb build out, cycle markings, and associated signage at this junction shall thereafter be carried out in accordance with the approved details prior to first occupation of any dwellings.
- 9) No development shall commence until details of the location, extent and layout (together with an implementation specification and delivery programme) for the amenity open space, natural/semi natural green space and equipped children's area have been submitted to, and approved in writing by, the local planning authority. The amenity open space, natural/semi natural green space and equipped children's area shall be provided in accordance with the approved details in accordance with the approved delivery programme.
- 10) No development shall commence until an assessment of the risks posed by any contamination has been submitted to, and approved in writing by, the local planning authority. This assessment must be undertaken by a suitably qualified contaminated land practitioner, in accordance with British Standard 10175: Investigation of potentially contaminated sites - Code of Practice and the Environment Agency's Model Procedures for the Management of Land Contamination (CLR 11) (or equivalent British Standard and Model Procedures if replaced), and shall assess any contamination on the site, whether or not it originates on the site.
- 11) No development shall commence until a scheme for the protection of the development, both with regard to external and internal areas, from external noise has been submitted to, and approved in writing by, the local planning authority. The scheme shall include:
  - a) plans, drawings and a description of the site;
  - b) an assessment of the existing noise levels relevant to the site;
  - and,
  - c) an explanation of the principles adopted in the devising of mitigation measures, including appropriate site design and layout.
- 12) No development shall commence on a Phase where (following the risk assessment submitted pursuant to condition 9) land affected by contamination is identified within that Phase which poses risks identified as unacceptable in the risk assessment, until a detailed remediation scheme for such land has been submitted to, and approved in writing by, the local planning authority. The scheme shall include an appraisal of remediation options, identification of the preferred option(s), the proposed remediation objectives and remediation criteria, and a description and programme of the works to be undertaken including the verification plan. The remediation scheme shall be sufficiently detailed and thorough to ensure that upon completion the site will not qualify as

contaminated land under Part IIA of the Environmental Protection Act 1990 in relation to its intended use. The remediation shall be carried out in accordance with the approved remediation scheme.

- 13) No development shall commence on any Phase until a Construction and Environmental Management Plan (CEMP) for that Phase, comprising a schedule of works and accompanying plans for that Phase has been submitted to, and approved in writing by, the local planning authority. The CEMP for each Phase shall accord with the method of works and mitigation measures detailed in the recommendations section of the Ecological Appraisal by Baker Consultants (October 2020), and the recommendations of the Badger Mitigation Strategy (January 2021). Each CEMP shall also include (but not be limited to) details of:
- a) the anticipated number, frequency and types of vehicles to be used;
  - b) the location and specification for vehicular access;
  - c) the provision made for the on-site parking of vehicles by contractors, site operatives and visitors;
  - d) the provision for on-site loading and unloading of plant, materials and waste;
  - e) the storage of on-site plant and materials;
  - f) the erection and maintenance of security hoarding;
  - g) the location of any site huts/cabins/offices;
  - h) the works required to mitigate the impact of construction traffic upon the public highway;
  - i) measures to control the emission of dust and dirt;
  - j) measures to control the emission of noise;
  - k) details of all proposed external lighting;
  - l) details for any on-site storage of fuel and chemicals;
  - m) measures to reduce air pollution;
  - n) management of construction waste;
  - o) the contact details of a named person to deal with complaints; and,
  - p) measures to accord with the mitigation measures detailed in the recommendations section of the Ecological Appraisal by Baker Consultants (October 2020) and the findings and recommendation in the Badger Mitigation Strategy (January 2021), as they relate to construction.

The approved CEMP shall be adhered to throughout the entire construction period of that Phase.

- 14) Construction of the development shall take place only between the hours of: 07:30 hours and 18:00 hours Mondays to Fridays; 07:30 hours and 13.00 hours on Saturdays; not at all on Sundays or Public Holidays or the public attendance days for major events operating within the locality.
- 15) No development shall commence on a Phase until a scheme for the protection of the retained trees (the Tree Protection Plan) as part of that Phase and the appropriate working methods (the Arboricultural Method Statement) in accordance with paragraphs 5.5 and 6.1 of British Standard 5837:2012 Trees in relation to design, demolition and construction - Recommendations (or in an equivalent British Standard if replaced) have been submitted to, and approved in writing by, the local

planning authority. Each Phase of the development shall be carried out in accordance with the approved Tree Protection Plan for that Phase.

- 16) No development shall commence on any Phase above ground level until a management plan demonstrating how the mitigation measures relevant to that Phase identified in Tables 6.1 and 6.2 of the Air Quality Assessment produced by Brookbanks Consulting dated October 2020 will be implemented has been submitted to, and approved in writing by, the local planning authority. Each Phase of the development shall be undertaken in accordance with the approved implementation of the management plan for that Phase.
- 17) No development shall commence above ground level on any Phase until a scheme for the protection occupiers of the dwellings in that Phase from external noise has been submitted to, and approved in writing by, the local planning authority. The scheme shall follow the 'good acoustic design' principles set out in Planning Practice Guidance – Noise, and shall set out how the adverse effects of Goodwood noise (motor circuit and aerodrome activities) on the approved development (external amenity space as well as inside spaces) are minimised as far reasonably practicable by way of mitigation. Development shall be carried out in accordance with the approved scheme with any measures provided as part of the scheme to be retained in perpetuity.

### **Pre-occupation**

- 18) Upon completion of any remediation works pursuant to the requirements of condition 11, a verification report by a suitably qualified contaminated land practitioner shall be submitted to, and approved in writing by, the local planning authority before any dwelling on land upon which contamination is found is first occupied.
- 19) No dwelling shall be occupied until surface water drainage works applicable to that Phase have been implemented in accordance with details that shall first have been submitted to, and approved in writing by, the local planning authority. The drainage details shall include, but not be limited to:
  - a) information about the design storm period and intensity, the method employed to delay and control the surface water discharged from the part of the site relevant to that Phase and the measures taken to prevent pollution of the receiving groundwater and/or surface waters, and measures to prevent surface water draining onto the public highways and pollution of the receiving watercourse;
  - b) a timetable for its implementation including any phased implementation; and,
  - c) a management and maintenance plan for the lifetime of the development which shall include the arrangements for adoption by any public authority or statutory undertaker and any other arrangements to secure the operation of the scheme.

Development is to be carried out in accordance with the approved details and timetable.

- 20) No dwelling hereby permitted shall be occupied until works for the disposal of sewage have been constructed in accordance with details that have first been submitted to, and approved in writing by, the local planning authority.
- 21) No dwelling shall be occupied until the first 20 metres of the access shown in approved Drawing No. R-20-0033-001 Rev.E has been constructed to its wearing course, and the private vehicular access serving the relevant dwelling has been constructed to at least base course level.
- 22) No dwelling shall be occupied until such time as the approved vehicular access serving the agricultural buildings located to the west of the site and the pedestrian and cycle access works to Stocks Lane shown in approved Drawing No. R-20-0033-004 Rev.A have been constructed in accordance with the approved drawings.
- 23) No dwelling shall be occupied until a scheme for the delivery of a buffer zone alongside the River Lavant has been submitted to, and approved in writing by, the local planning authority. The buffer zone shall consist of natural/semi-natural greenspace, and shall be kept free from built development including lighting, formal hard-surfaced footpaths, domestic gardens and formal landscaping. The scheme shall include:
  - a) details of the proposed planting scheme;
  - b) a delivery and implementation programme; and,
  - c) details demonstrating how the buffer zone will be protected during development and managed/maintained over the longer term.

The development shall be delivered in accordance with the approved scheme.

- 24) A Landscape and Environmental Management Plan (LEMP) for the development shall be submitted with first application for Reserved Matters. The LEMP shall include details of ecological enhancements and a timetable for their implementation (taking account of the proposed Phasing for the development) and ongoing management and maintenance including:
  - a) replacement tree planting at 2:1 ratio;
  - b) areas of wildflower grassland planting;
  - c) infilling gaps in tree lines or hedgerows with native species;
  - d) the provision of bat brick/boxes to be installed into the dwellings and bat boxes/nest boxes to be installed on retained trees ;
  - e) the provision of bird bricks/boxes installed into the dwellings and around the site;
  - f) the provision and retention of 2 no. hedgehog nesting boxes;
  - g) the provision of log piles;
  - h) gaps to be provided under boundary fences to allow free movement of hedgehogs and small mammals across the site; and,
  - i) retention of a green corridor along the River Lavant with ecological enhancements across the area; and,
  - j) Dark corridors within the lighting scheme to ensure there are areas of no lighting which wildlife can move between.

Each Phase of the development shall be carried out in accordance with the approved LEMP.

- 25) The development hereby permitted shall be carried out in accordance with the method of works and mitigation measures detailed in the recommendations section of the Ecological Appraisal by Baker Consultants (October 2020) and the findings and recommendation in the Badger Mitigation Strategy (January 2021). The measures provided as part of the scheme are to be retained in perpetuity.
- 26) A Sustainable Design and Construction Statement shall be submitted in writing for approval by the local planning authority with the first reserved matters application. The Statement shall include the following details:
  - a) how the consumption of potable water should not exceed 110 litres per person per day;
  - b) details for provision of charge points for electric vehicles; and,
  - c) how the principles of the Sustainability and Energy Statement (October 2020) will be implemented.

The development shall be carried out in accordance with the approved Statement.

=====END OF SCHEDULE=====

## Appeal Decision

Inquiry held on 31 July, 1, 30 and 31 August 2018

Site visit made on 2 August 2018

**by Harold Stephens BA MPhil DipTP MRTPI FRSA**

**an Inspector appointed by the Secretary of State**

**Decision date: 28<sup>th</sup> September 2018**

---

**Appeal Ref: APP/W3520/W/18/3194926**

**Land on East Side of Green Road, Woolpit, Suffolk IP30 9RF**

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant planning permission.
  - The appeal is made by Landex Ltd against the decision of Mid Suffolk District Council.
  - The application Ref 2112/16, dated 2 May 2016, was refused by notice dated 6 September 2017.
  - The development proposed is the erection of 49 dwellings (including 17 affordable dwellings) and construction of a new access.
- 

### Decision

1. The appeal is allowed and planning permission is granted for the erection of 49 dwellings (including 17 affordable dwellings) and construction of a new access at Land on East Side of Green Road, Woolpit, Suffolk IP30 9RF in accordance with the terms of the application, Ref 2112/16, dated 2 May 2016, and the plans submitted with it, subject to the conditions set out in the Schedule attached to this decision.

### Procedural Matters

2. The application was supported by a number of reports and technical information including a Design and Access Statement (DAS), a Planning Statement, a Revised Transport Assessment, a Planning Statement, a Contamination Report Part 1 and Part 2, an Ecology Report and Skylark Survey, a Flood Risk Assessment, a Foul and Surface Water Drainage Strategy, an Archaeological Report and a Landscape and Visual Appraisal.
3. At the Inquiry, a S106 Unilateral Planning Obligation was submitted by the Appellant.<sup>1</sup> This addresses all of the matters sought by the District and County Council in connection with the provision of community and other services arising from the development. The Planning Obligation is signed and dated 29 August 2018 and is a material consideration in this case. A Community Infrastructure Compliance Statement has been submitted by Suffolk County Council (SCC).<sup>2</sup> I return to the Planning Obligation later in this decision.
4. In addition, the Appellant submitted an Agreement with Flagship Housing Group Limited, conditional upon planning permission being granted, to enter into a Deed of Easement<sup>3</sup> to secure pedestrian and cycle access to the north

---

<sup>1</sup> APP8

<sup>2</sup> INQ5

<sup>3</sup> APP7

via Steeles Close. I shall return to the proposed easement later in the decision.

5. Statements of Common Ground (SoCG)<sup>4</sup> between the Appellant and SCC were agreed and have been signed by both parties in respect of: (i) Archaeology Matters; (ii) Drainage Matters; (iii) Early Years and Education Matters; and (iv) Highways and Transport. An additional SoCG on Planning Matters including Housing Land Supply was agreed between the Appellant and Mid Suffolk District Council (MSDC).
6. The main parties confirmed the List of Drawings on which the appeal should be determined and this is set out at Document APP1. The List of Drawings includes the House Types (1-9), a Site Location plan PA33, a Site Layout Plan PA31 Rev H and an Offsite Highways Works Plan 112/2015/04 - Rev.P2.
7. The revised National Planning Policy Framework (NPPF 2018) was published on 24 July 2018 shortly before the Inquiry opened and was addressed by participating parties both during the event and in closings. I have taken it in to consideration in my conclusions.<sup>5</sup>
8. Following the close of the Inquiry I sought the views of both main parties in respect of the revisions made to the PPG<sup>6</sup> on 13 September 2018 on Housing and economic land availability assessment. The comments received have been taken into account in my consideration of the appeal proposal.

## **Main Issues**

9. In the light of the above I consider the main issues are: -
  - the effect of the proposed development on highway and pedestrian safety;
  - the impact of the proposed development on designated heritage assets including the setting of listed buildings and the character and appearance of the Woolpit Conservation Area; and
  - whether the Council is able to demonstrate a five-year supply of deliverable housing sites sufficient to meet the full objectively assessed need (OAN) for housing and the implications of this in terms of national and local planning policy.

## **Reasons**

### *The proposed development and appeal site*

10. The appeal proposal is for 49 dwellings including 17 affordable dwellings (35%) together with a new access to be constructed to serve the development of Green Road. The dwellings would have associated garages and parking areas and pedestrian access from the site onto Green Road and pedestrian/cycle access to Steeles Close. There is a dedicated on-site play area proposed as well as extensive on-site open space and linking footpaths.

---

<sup>4</sup> INQ3

<sup>5</sup> Paragraph 212 Annex 1: Implementation

<sup>6</sup> Planning Practice Guidance

11. Woolpit is the third largest village in Mid Suffolk and has a good level of local services and infrastructure including health care, education and two business parks/employment sites and is designated as a Key Service Centre in the Council's settlement hierarchy. The appeal site is located on the southern edge of Woolpit village, to the south of its centre but with access to facilities which are in close proximity – a primary school, health centre, village shops and services are within walking distance.
12. Whilst, for planning policy purposes, the site is located in the designated 'countryside', its northern and eastern boundaries adjoin the defined settlement boundary for the village in the Mid Suffolk Local Plan 1998 (Woolpit Village Inset Map). There is existing residential development on the eastern side of the site on Steeles Road and immediately adjacent to the north lies Steeles Close and the main body of the village; on the opposite side of Green Road, but at the northern end of the appeal site lies residential development in the form of Priory Cottage, a Grade II Listed Building. There is therefore residential development on two sides of the appeal site. Land to the south and west comprises open agricultural land.
13. The appeal site comprises a total site area of about 2.3 hectares. It consists of a rectangular shape block of land which is part of an agricultural field. It is enclosed with an existing tree/hedge line on three sides. The appeal site is broadly level but there is a gentle slope west to east. There is an existing tree/hedge line to a part of the site's Green Road frontage and there are trees to the northern boundary which separate the site from Steeles Close. A public footpath passes north to south along the site's eastern boundary. This footpath connects to the southern part of the village and then to the wider countryside to the south.
14. There is a designated Conservation Area in Woolpit Village its nearest boundary being located about 250m to the north from the appeal site at the junction of Drinkstone Road and Green Road. The appeal site is not within the boundary of a protected landscape and there are no designations which apply to it. No Listed Buildings about the application site but the listed Grade II, 17<sup>th</sup> century, Priory Cottage is situated on the west side of Green Road opposite the north-west corner.

#### *Planning policy*

15. The statutory development plan includes the following documents:
  - (i) The Mid Suffolk District Local Plan 1998 (MSDLP) which was saved in accordance with the Secretary of State's Direction dated 14 September 2007;
  - (ii) The Mid Suffolk District Core Strategy 2008 (CS), as adopted in September 2008 covering the period until 2025; and
  - (iii) The Core Strategy Focused Review 2012 (CSFR) as adopted on 20 December 2012 covering the period until 2027.
16. The Council is in the course of preparing a new Joint Local Plan with Babergh District Council which will replace the CS and will be used to manage development in both districts up to 2036. The Councils have published the Joint Local Plan for consultation (Regulation 18) but the emerging Plan is in its very early stages and thus carries limited weight in the context of this appeal.

A Neighbourhood Plan is currently being prepared for Woolpit. It too is in its very early stages and draft policies have not yet been published so no weight can be attached to the Neighbourhood Plan.

### ***First Issue - Highway and pedestrian safety***

17. SCC, as Highway Authority, does not object to the proposal subject to conditions being attached to a grant of planning permission. The Council did not refuse the proposal on the basis of highway and pedestrian safety grounds because a highway improvement scheme at the pinch point on Green Road was proposed as part of the development and was to be secured by means of a planning condition. Rather, the Reason for Refusal (RfR) indicates that the proposed development would increase vehicular traffic in the village centre and require the provision of highway works to the north of the site in the vicinity of a number of unspecified listed buildings and within the Conservation Area. The Council then argues firstly, that the nature of the works and the increase in traffic would neither preserve or enhance the character of this part of the Conservation Area and secondly, would not preserve or enhance the setting of the unspecified listed buildings causing less than substantial harm to both.
18. The areas of debate at the Inquiry comprised:
  - Increase in vehicular traffic through pinch point
  - Increase in pedestrian flow through pinch point
  - Personal Injury Accidents (PIA) Analysis
  - Accessibility

#### ***Increase in vehicular traffic***

19. North of the appeal site between Drinkstone Road and just beyond Mill Lane, Green Road narrows significantly to about 4.3m creating a pinch point about 60m long. On the western side there is no footway as the buildings and fences are hard against the edge of the road. On the eastern side there is a narrow footway measuring less than 1m in width, reducing to only 0.85m in parts. This road width is insufficient for two vehicles to pass with pedestrians on the footway being vulnerable to being hit by vehicles. The footway at this width is insufficient to allow pedestrians to pass each other without stepping into the road. It is also too narrow for wheelchair users and pram use so the only alternative for many is to walk along the road.
20. The footway here is also vulnerable to being driven over by vehicles as the kerbed separation is too low to offer sufficient protection. The kerb upstand is between 20mm and 60mm – this does not prevent or deter vehicles from driving over the kerb onto the footway. The Parish Council and others are concerned that at times Green Road can become congested. Both highway experts agree that Green Road is relatively lightly trafficked but this does not mean at times it cannot become congested.
21. I see no reason to doubt the underlying validity of the Appellant's Traffic Assessment (TA) as considered by the Highway Authority. The TA estimated that the proposed development would generate, overall, 33 vehicular trips in the AM peak hour and a total of 38 trips in the PM peak hour which would give

rise to 295 additional trips over a 24 hour period. The majority of this traffic would travel northbound through the pinch point to the transport links and facilities in the village beyond. Based on these TA figures, two-way traffic on Green Road would increase by 15% in the AM peak and by 16% in the PM peak as a result of the development traffic. This equates on average during the AM and PM peak hours to an additional vehicle passing through the pinch point every 2 minutes. In my view this represents at worst, a very modest increase in vehicular traffic through the pinch point.

#### *Increase in pedestrian flow*

22. The Council has assessed the additional pedestrian flows associated with the development: an additional three pedestrians walking northwards in the AM peak and 2 in the PM peak and an additional one pedestrian walking southwards in each of the AM and PM peak hours. The Council's assessment determines the theoretical likelihood of a northbound vehicle, a southbound vehicle and a pedestrian negotiating the pinch point together at any one time during the peak hour for both the existing scenario and that with the proposed development. It concludes that such events would increase threefold with the development in place, which equates to ten additional pedestrian injury risk events per year. These figures were accepted by the Appellant.
23. I appreciate that the Council's assessment is a theoretical risk analysis and that the ten additional pedestrian injury risk events compared to the baseline is relatively small – not even one per month. Nevertheless that increase is significant when considered over time, and it is noteworthy that any conflict between vulnerable road users (pedestrians) and motor vehicles will often result in an injury requiring hospital attention, even allowing for the slight reduction in vehicle speeds through the pinch point. In my view there would be a modest increase in the number of pedestrian injury risk events.

#### *Personal Injury Accidents (PIA) Analysis*

24. The TA demonstrates that there is no recorded accident data for Green Road itself, but there were four accidents which led to injury in the period between 2010 and 2015 (Appendix I). The Appellant accepted that when considering accident data, it is relevant to look more widely than the road on which the development is proposed, and that it is not just about the overall number of accidents but the details of them. Two of the accidents involved pedestrians being struck by passing cars (on The Street and on Heath Road) and that in one of those accidents the narrow width of the road was recorded as a causation factor by the police. Another accident involved a driver striking a line of cars in The Street during the hours of darkness. In my view the circumstances of the accidents which have occurred in the wider area are not inconsistent with a highway safety concern.

#### *Accessibility*

25. I accept that the proposed pedestrian and cycle link via Steeles Close and Steeles Road is likely to be used for a good percentage of pedestrian trips to give access to village services. It would be used for: (i) dropping off and collecting children from the primary school and pre-school as well as after school clubs; (ii) to access childcare services in the grounds of the primary school, such as a "Holiday Club" during school holidays; (ii) attending health appointments; (iv) picking up prescriptions from the dispensary; (v) shopping

at Costcutter Convenience Store with its extended opening hours (0600-2230 hours) and (vi) accessing the Brickfields Business Park, where around 25 companies are based. Moreover, the proposed easement to the north<sup>7</sup> would be entirely adequate for the purposes of guaranteeing access at all times. The terms on which it is granted make it entirely enforceable and I cannot foresee any circumstances which would lead to the grantor being in a position to restrict or prevent its use.

26. Nevertheless, it is noteworthy that the proposed development provides a footpath link from the Green Road access on the west of the appeal site which links to the pavement outside Vine Cottage. Anyone seeking the shortest route to walk to the village centre, to access facilities including the village shop (Co-op), the post office within it, the bus stops, the village pubs, the bakery, the tea room, the hairdressers, the Village Hall, the Church and the petrol filling station would have to negotiate the pinch point and the increased traffic going through it. Even with the Steeles Close access, anyone using it to take the shortest route to the village centre would still travel through the pinch point on Green Road. Use of the access via the Greenway at the south east of the site onto the public footpath would be far from desirable for anyone accessing facilities in the village centre.
27. Taking all of these matters into account I consider that the increase in vehicular and pedestrian traffic from the new development having to negotiate the pinch point on Green Road would exacerbate highway dangers unless appropriate safety improvements can be made. I conclude on the first issue that the off-site highway works specified in Drawing 112/2015/04 Revision P2 are necessary to mitigate the increased safety risk as a result of the development. If an appropriately worded planning condition(s) is imposed to secure the off-site highway works then there would be no unacceptable residual highway or pedestrian safety impact arising from the proposed development.

### ***Second Issue - Heritage Assets***

28. Section 66(1) of the Planning (Listed Buildings and Conservation Areas) Act 1990 (LBA) requires that special regard shall be had to the desirability of preserving the building or its setting or any features of special architectural or historic interest which it possesses. Section 72(1) of the LBA requires special attention shall be paid to the desirability of preserving or enhancing the character or appearance of the conservation area.
29. Paragraph 193 of the NPPF 2018 states that when considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation (and the more important the asset the greater the weight should be). This is irrespective of whether any potential harm amounts to substantial harm, total loss or less than substantial harm to its significance.
30. Whilst there is no statutory protection for the setting of conservation areas, paragraph 194 of the NPPF 2018 requires that consideration be given to any harm to or loss of significance of a designated asset, which includes conservation areas, from development within its setting. The main parties confirmed that no harm would be caused to the setting of the Conservation

---

<sup>7</sup> APP7

Area in this case and I agree.

### *Woolpit Conservation Area*

31. The Woolpit Conservation Area Appraisal (2012) tells us that the Conservation Area covers the historic core of the village and was first designated by the Council in 1972. The Appraisal notes that the built form is marked by a variety of dates, architectural styles and building materials including a variety of roof finishes. The Conservation Area includes the Grade I listed Church of St Mary with its flint and stone chequered flushwork. The remaining listed buildings, the majority being Grade II, are identified as *'timber-framed houses, many now re-fronted in brick'*. The variety of building materials is noted, with exposed timber-framing and bricks from the local brickworks, comprising *'Suffolk whites'* and *'soft red brick'*.
32. In terms of its plan form and layout, Woolpit village has a distinct central triangular island, which *'is a well defined focal point'* which forms the focus for three *'important vistas'* identified on page 11 of the Appraisal. In vista (1) looking north along Green Road towards the village triangle, the view is eroded somewhat by the presence of street signage and the extent of parked cars around this *'island'*. Each important vista contributes to the character and appearance of the Conservation Area.
33. I consider the significance of the Conservation Area derives from its character interest which includes a mixture of medieval, post medieval and later buildings, of a variety of styles and material finishes, arranged around a central village *'triangle'* which is laid out and maintained as a green-edged *'island'*, from which radiate outwards three main thoroughfares; Green Road, Church Street and The Street; and from there extends a wider network of smaller sub-roads. In connection with this, the vehicular traffic is regular enough to be noticeable particularly along the three main roads, but it is not an overbearing element. It contributes to the appearance of the Conservation Area, as does the traffic control measures that form part of the street scenes, most obviously in the form of a variety of bollards.
34. The Council alleges that there would be a significant impact on the appearance of the important vista along Green Road towards the central market place at the centre of the Conservation Area and that the important historical character of the southern *'gateway'* and the important historic street scene would be harmfully altered by the introduction of the highway improvements, resulting in a more urban appearance. In particular, reference is made to the kerbed build out with bollards, the footpath widening with raised kerbs, the erection of a TSRGD 516 sign on the pavement between Pepys House and Tyrells, the disruption of sightlines which have a natural downward slope and the noticeable increase in both vehicular and pedestrian traffic which it is said would detract from the perception of relative tranquillity. I disagree.
35. The changes such as they are would only be appreciable in relatively limited views north and south along Green Road from about the area of the village triangle to the southern edge of the Conservation Area. The proposed off-site highway works would only bring about a change to a limited and localised part of this designated heritage asset. In terms of the revision of road markings, when taken in the context of the existing roadway and indeed the appearance of the wider network of roads within the Conservation Area that are generally

of 'black tarmac with white network markings'; it would not be out of character and would not harm its special interest.

36. In terms of footpath widening, the existing pathway is a standard kerbed tarmac path, about wide enough for one person to traverse. The appeal proposals envisage the widening of this footpath to 1.8m with the kerb face raised to 125mm. Again, whilst this would represent a change to the current situation, it would not be incongruous with the character and appearance of the Conservation Area which includes a large number of kerbed footpaths of varying widths. The final form and finish of these proposals would be subject to detailed design at a later stage and there is an opportunity to include a higher quality surface finishing such as sandy bedding gravel to improve the appearance of this stretch of footpath, more in keeping with the current character of this area of the asset.
37. In my view, the proposed widening of the footpath would also allow better appreciation of the character and appearance of the Conservation Area by providing a more convenient means of accessing the asset to enjoy the quality of the historic built environment.
38. In terms of road signage there are currently numerous examples of instructional road signs elsewhere within the Conservation Area, not least within the village 'triangle' itself. The introduction of a new road sign would be needed at the southern end of the highways works to forewarn drivers heading north into the Conservation Area of the narrowing roadway. The exact location of this sign is not yet fixed and is subject to future agreement. It could, for instance, be located outside the southern boundary of the Conservation Area. Even if located within the asset I see no reason why it could not be sympathetically integrated into the street scene.
39. The kerbed build out with bollards adjacent to Model Cottage would be the most evident change resulting from the proposals, as the current location for this is a featureless part of the black tarmac roadway. However, the use of a variety of bollards for such traffic calming/building protection measures is already widely evident within the wider Conservation Area, with others also used to control parking. In my view, the use of bollards in this location and for this purpose, employing a sympathetic design to be agreed with the Council, would plainly not be intrusive or incongruous with the character and appearance of the wider Conservation Area and would not result in any harm.
40. In terms of the built form of the off-site highway works, the appeal proposals would only be evident from a small part of the wider Conservation Area, would not be incongruous with its current character and appearance, and, with regard to the widened footpath, could actually deliver an enhancement.
41. In relation to the increase in vehicular traffic and any effect on the character and appearance of the Conservation Area, I have identified that there would be a *very modest* increase in the amount of traffic using the immediate road network and on Green Road leading into the village centre. This very modest increase in vehicular traffic would not introduce an element into the Conservation Area that is not already present within the designated area and neither would it increase that existing element of the Conservation Area's character and appearance to any more than a modest degree. The very modest increase in traffic flow would have no effect on the special interest of the Conservation Area and no harm would be generated.

42. I consider there would be no harm caused to the Woolpit Conservation Area as a result of the appeal proposals. The proposals would as a minimum 'preserve' the character and appearance of the Conservation Area, if not actually enhance it through the improvement of the footpath.

#### *Listed Buildings*

43. When assessing the indirect impact of proposals on heritage assets such as those beyond the boundary of a development site, the question which should be asked is whether change within its wider 'setting' would result in a loss of (or damage to) its 'significance' as a heritage asset.
44. The NPPF 2018 defines significance in Annex 2: Glossary as: *'The value of a heritage asset to this and future generations because of its heritage interest. The interest may be archaeological, architectural, artistic or historic. Significance derives not only from a heritage asset's physical presence, but also from its setting'*.
45. The current Historic England (HE) guidance<sup>8</sup> is clear in stating that change within a heritage asset's setting need not be harmful; the implementation of development proposals within a heritage asset's setting can be positive, negative or neutral. The HE guidance presents an approach to setting and development management based on a five-step procedure. The key issue is whether and to what extent, the proposal would affect the contribution that setting makes to the significance of the heritage asset in question. In the following analysis I give considerable weight and importance to the desirability of preserving the settings of Listed Buildings.

#### *Mullions, Tyrells and The Cottage*

46. These three Grade II Listed Buildings are closely associated with each other and are all late medieval or early post medieval houses and should be considered as a group in terms of the contribution which setting makes to their significance. They also share this group value with those other listed buildings within this same historic core area. Such associations provide positive contributions to the significance of these buildings by providing context in which to appreciate the layout and hierarchy of the earlier settlement. In particular, Tyrells and The Cottage derive significance from their historic and functional associations, as two parts of the same original late medieval dwelling.
47. Insofar as the setting of these three listed buildings contributes to their significance, it does so in terms of (i) their associative relationships within the group, as well as with other surrounding aspects of the historic built environment defining the street scenes around and south of the triangle; (ii) in respect of historic, functional and aesthetic relationships with the positions and alignments of both Green Road and Mill Lane; and (iii) in respect of their historic and functional inter-relationships with spaces forming their garden enclosures.
48. In terms of Mullions, Tyrells and The Cottage, the Council alleges that their settings would experience change as a result of the off-site highway works and increased vehicular traffic. In terms of the off-site highway works, as

---

<sup>8</sup> The Setting of Heritage Assets: Historic Environment Good Practice Advice in Planning Note 3 (Second Edition) Historic England 2017

previously stated, these can be broadly divided into the following elements: (i) revision of road markings; (ii) footpath widening; (iii) new road signage and (iv) a kerbed build-out with bollards, adjacent to Model Cottage.

49. The proposals would effect physical change to only a short stretch of Green Road, which is already experienced as a modern tarmac road with white markings and street furniture. Although these three listed buildings are identified as deriving some significance from their association with this road, in terms of historic and functional associations, this is in no way dependent on its current appearance.
50. The three listed buildings would be broadly opposite where the kerbed build-out and bollards would be located. However, such a change would not reduce the ability to appreciate these buildings from Green Road or alter their evidential, historic or functional relationships with it. Moreover, the footpath widening adjacent to Mullions, would also be a noticeable change, particularly if the quality of finish was improved from tarmac to a more sympathetic surfacing, but in the context of the tarmac path already present, it would be inconsequential to the significance of the listed building. There is no substance to the allegation that the highway works would have an impact on the structural integrity of Mullions. The other changes, comprising new road signage and revised road markings, in the context of the existing setting would be such a marginal peripheral change as to be all but unnoticeable.
51. It is noteworthy that Dr Duck, the Council's Heritage Officer, did not raise the possibility of harm accruing to the listed buildings within the Conservation Area - including any of these three listed buildings as a result of the implementation of the off-site highway works. Given the very limited change and the existing context of these listed buildings I consider that the off-site highway works would preserve the setting of these listed buildings and would not harm their significance.
52. The appeal proposals would result in a very modest increase in traffic on average in the peak morning and evening hours. This increase would evidently be so marginal as to be barely perceptible and would not result in an apparent change to the experience of these listed buildings. As such, the traffic generation, such as it is would also not harm the significance of any of these listed buildings.

### *Priory Cottage*

53. The Grade II listed Priory Cottage is the most southerly property in Woolpit and forms the southern gateway to the village. It comprises a cottage dating from the early 17<sup>th</sup> century, with 19<sup>th</sup> century additions. It is assessed as drawing its significance mostly from its architectural and historic interest, as evidenced in its built form. There is also some limited artistic and archaeological interest, which is derived from the few architectural embellishments and limited phasing which it possesses and exhibits. The building is set within private and well-tended gardens that provide an attractive space in which to appreciate its significance.
54. The property is adjacent to Green Road and the regular traffic along this roadway is also a notable feature within its setting. The roadway possesses historic and functional links with Priory Cottage and it forms the predominant means whereby the structure is appreciated. As the Cottage is located on the

edge of the village, there is some limited relationship with the street frontage immediately to the north, which represents pre-20<sup>th</sup> century dwellings. To the south and west, the wider setting of the building comprises open agricultural land, as it is also on the east side of Green Road (i.e. the appeal site).

55. The appeal site is assessed as falling within the setting of Priory Cottage, given that it is possible to experience the Grade II listed building from the farmland it comprises through a gap at the north end of the otherwise bushy and robust hedgerow. This hedgerow largely encloses the east side of Green Road and contains and curtails eastward views outwards from the listed building to the confines of this north-south thoroughfare of Green Road, thus separating the asset from the appeal site.
56. Therefore, whilst the appeal site does fall within the asset's setting, it makes only a very limited contribution to the significance of this building because of the screening effect of the boundary hedgerow and the concentration of the asset's relationships on (i) its garden enclosure (ii) the Green Road frontage north and south and (iii) the agricultural farmland that adjoins it to the west and south. All of these relationships are focussed to the west of the road.
57. The appeal proposals envisage two dwellings (Plots 15 and 16) in the north west corner of the development site served by a private drive that would run parallel to Green Road. A new footpath link with Green Road would run between Green Road and the private drive and thread through a gap in the roadside hedge opposite Priory Cottage. The hedgerow would be retained albeit on a slightly set back alignment.
58. Therefore, the change to the setting of Priory Cottage would only be noticeable as a change from partial views of an agricultural field to partial views of modern properties in the north west corner of the site. This would cause some erosion to the rural context of the area albeit limited by the partial retention of the hedgerow and the setback of the new properties from the Green Road frontage. Otherwise it would not affect the rural setting to the west and south, the relationships with its well-tended private gardens, Green Road or those properties in close proximity to it.
59. I consider that this limited change would result in a very low level of harm to the significance of this listed building at the lowest end of '*less than substantial harm*'. This conclusion is broadly in agreement with Dr Duck's original consultation response on the planning application where he states that the '*overall impact on the setting of Priory Cottage is notably less than substantially harmful*'.<sup>9</sup> No further mitigation is suggested.
60. In line with statute, policy, and case law<sup>10</sup>, considerable weight and importance must be given to the presumption against granting permission for development that would harm the character or appearance of a conservation area or the setting of a listed building. If less than substantial harm is found of whatever magnitude, the decision maker needs to give considerable weight to the desirability of preserving the setting of the asset. In this case I have found a lack of identifiable harm to the Woolpit Conservation Area and the proposals would, as a minimum '*preserve*' its character and appearance. However, the overall impact of the proposal needs to take into account the

---

<sup>9</sup> Mr Crutchley's Appendix AC5

<sup>10</sup> East Northamptonshire DC v SSCLG [2014] 1 P & R 22 at paragraph 29

less than substantial harm to Priory Cottage and this harm should be weighed against the public benefits of the proposals.

61. The public benefits of the appeal proposals comprise:

- An increase in the provision of housing numbers at a time of pressing need (see my conclusion on the following main issue)
- An increase in choice and type of homes
- 35% affordable housing provision
- Employment opportunities during the construction phase
- Residents would be likely to use the local shops and services within Woolpit making a positive contribution to their vitality and viability
- Provision of 0.5 ha of community open space with green infrastructure features – delivering high quality green spaces available to all
- Footpath improvements to the village centre and the wider countryside
- Highway works in the village centre would deliver benefits to the Listed Buildings and the Conservation Area.

62. In accordance with the test set out in paragraph 196 of the NPPF 2018, I find that the clear public benefits of the proposal would outweigh the less than substantial harm to the significance of a designated heritage asset.

### ***Third Issue - Housing Land Supply (HLS)***

63. It is common ground that the Council's strategic policy for housing numbers is more than five years old and has not been reviewed. Accordingly, paragraph 73 of the NPPF 2018 indicates that the Council's housing land supply is to be assessed against the standard method for calculating local housing need. The Council's local housing need is 585 dwellings per annum (dpa) and a 20% buffer is to be applied. This amounts to 3,510 dwellings for the next five years, or 702 dpa. The difference between the parties is solely down to supply.

64. No under supply/previous under delivery is taken into account when using the standard method. Therefore, no 'backlog' of unmet need should be taken into account when calculating the Council's housing land supply position.

65. The NPPF 2018 provides specific guidance in relation to the calculation of the five years supply but specifically with regard to qualifying sites, the Glossary definition of 'Deliverable' in Annex 2 goes further than its predecessor. Small sites and those with detailed permission should be considered deliverable until permission expires unless there is clear evidence that they will not be delivered. Sites with outline permission, or those sites that have been allocated, should only be considered deliverable where there is clear evidence that housing completions will begin on sites within five years. The onus is on the LPA to provide that clear evidence for outline planning permissions and allocated sites.

66. The Council relies upon the same sites in its supply as were contained in its

Annual Monitoring Report (AMR) dated 11 July 2018. The only new site referred to at the Inquiry was that known as Land on the West of Barton Road, Thurston which was missed out of the AMR in error and for which planning permission was granted on 5 July 2018. The Council has carried out a sense check of the supply against the terms of the NPPF 2018 and referred to events that have occurred after the base date of the AMR.

67. In my view the definition of 'deliverable' in the Glossary to the NPPF 2018 does not relate to or include sites that were not the subject of an allocation but had a resolution to grant within the period assessed within the AMR. The relevant period is 1 April 2017 to 31 March 2018.<sup>11</sup> There is therefore a clear cut-off date within the AMR, which is 31 March 2018. The Council's supply of deliverable sites should only include sites that fall within the definition of deliverable at the end of the period of assessment i.e. 31 March 2018. Sites that have received planning permission after the cut-off date but prior to the publication of the AMR have therefore been erroneously included within the Council's supply. The inclusion of sites beyond the cut-off date skews the data by overinflating the supply without a corresponding adjustment of need. Indeed that is why there is a clear cut-off date set out in the AMR. Moreover, the site West of Barton Road, Thurston, should be removed from the supply as its permission postdates the cut-off for the relevant period of assessment.
68. Sites with outline planning permission make up a very large proportion of the Council's claimed supply. The onus is on the Council to provide the clear evidence that each of these sites would start to provide housing completions within 5 years. I accept that there was clear evidence of what was necessary on one site provided in Mr Robert's evidence<sup>12</sup> and so the 200 dwellings in respect of that site should be added to the Appellant's supply calculations. As for the other 1,244 dwellings with outline permission, the Council has not even come close to discharging the burden to provide the clear evidence that is needed for it to be able to rely upon those sites.
69. The up-dated PPG on Housing and economic land availability assessment sets out guidance on what constitutes 'deliverable sites' and covers the evidence that a site with outline planning permission is expected to have in support of its inclusion in the supply. The PPG places great weight on the adequacy and sufficiency of consultation with those responsible for delivering dwellings. It is noteworthy that in this case, the Council has failed to adequately demonstrate it has done so. An assessment of the Council's AMR against the updated PPG reveals that the AMR falls substantially short of producing the evidence that a LPA is expected to produce.<sup>13</sup>
70. Furthermore, the Council has had to provide additional information to demonstrate that sites are deliverable as and when it has surfaced throughout the weeks and months following the publication of the AMR in an attempt at retrospective justification. It is wholly inadequate to have a land supply based upon assertion and then seek to justify the guesswork after the AMR has been published. The site at Union Road, Onehouse is one amongst others, which was only an allocation at the time the AMR was published. Although planning permission was granted 17 August 2018<sup>14</sup> it does not alter

---

<sup>11</sup> Paragraph 1.1 of the Annual Monitoring Report

<sup>12</sup> Mr Robert's POE A4 Build out rates for Chilton Leys

<sup>13</sup> See paragraphs 36 (ID:3-036-20180913); 047 (ID:3-047-20180913) and 048 (ID3-048-20180913)

<sup>14</sup> LPA4

the fact that the site was only subject to an allocation at the cut-off date but the Council did not have any clear evidence that it would provide housing within 5 years.

71. Paragraph 73 of the NPPF 2018 requires the Council's housing supply to be made up of 'specific sites'. The Council was presented with three opportunities to demonstrate that the figure of 858 dwellings recorded in its trajectory table for small sites is robust. Firstly, on production of the AMR. Secondly, the Appellant asked for a list of sites on 30 July 2018 and was supplied with a list of 561 planning permissions, which the Council said made up its 858 dwellings. In this list there was insufficient evidence to either accept or challenge this figure, although a number of defects quickly became apparent to the Appellant. The Council was asked to provide more information but failed to do so. Finally, the Council indicated that it was going to submit a final rebuttal proof of evidence on HLS but it did not do so.
72. The Council argues that the St Modwen case<sup>15</sup> continues to provide sensible guidance on the context, as applied to NPPF 2018 and claims that it can demonstrate a 5 year HLS of 5.39 years. However, I cannot accept that the 858 is a robust figure. I agree that it would be a time consuming exercise for the Appellant to review 561 planning permissions. This is an exercise which the Council should have done before it produced its AMR. The Appellant has completed a partial review and from the evidence that is before me it appears that there are at least 108 defective planning permissions within the list of 561 permissions<sup>16</sup> but does not know by what number one should discount the figure of 858. As the NPPF 2018 carries a presumption that small sites are deliverable until there is clear evidence that they will not be delivered, the 858 has been left in the Appellant's HLS calculation but I consider it is likely to be an overestimate.
73. Drawing all of these threads together I consider that the Appellant's assessment of supply, set out in Mr Short's rebuttal proof of evidence, is the more realistic taking into account the St Modwen judgment. The only change is that the site West of Barton Road, Thurston should now be removed from the supply. This leaves the Council's HLS at 3.4 years. If the small sites problem is taken into account, it is highly likely that the Council's HLS is less than 3.4 years. I conclude on the third issue, therefore that the Council cannot demonstrate a five year supply of deliverable housing sites.

## Other Matters

74. I have taken into account all other matters raised including the representations from the Woolpit Parish Council, the Suffolk Preservation Society, the landscape assessment of Woolpit by Alison Farmer Associates and other interested persons. I have also taken into account the various appeal decisions submitted by the main parties. The proposed development has generated a significant amount of public interest and many of the representations which have been submitted relate to the impact on the local highway network or the heritage impact which I have dealt with under the main issues.

---

<sup>15</sup> St Modwen Developments Ltd v SSCLG et al [2017] EWCA Civ 1643 paragraph 35

<sup>16</sup> APP6

75. The issue of landscape impact was raised in the representations. However, the Appellant has provided a comprehensive Landscape & Visual Impact Appraisal (LVIA) and the Council takes no issue with this. It is proposed to reinstate the former field boundary to the southern part of the site which would include a mixture of trees and hedging and a landscaped Greenway directly to the north of it which would form part of the pedestrian links throughout the site. The existing trees and hedging along the northern boundary and eastern boundaries of the site would be retained with some new planting proposed along the most southern part of the eastern boundary. Within the site itself, trees and hedging are proposed between dwellings and the public spaces to provide an attractive soft environment.
76. The appeal site would result in the loss of an agricultural field to development and whilst this would have some direct landscape impact, it would not be significantly adverse given its suburban backdrop. The proposed landscape framework would screen and filter views of buildings from the surrounding countryside. The visual impact of the development would be successfully mitigated into the rural edge of Woolpit and would provide an attractive environment for both new residents and those living in the surrounding locality. I therefore find no harm in this regard.
77. Reference is made to alternative housing sites identified in the emerging Joint Local Plan which are located to the north of the village centre. However, as I noted at the start, the emerging Joint Local Plan is in its very early stages and any conflict with this plan carries limited weight at this time and in the context of this appeal.
78. Concerns have been raised in relation to drainage, archaeology and ecological matters. However, it is noteworthy that the Council has not raised any objections in relation to these matters. In my view the concerns which have been raised can be adequately dealt with through the use of planning conditions in accordance with the advice in paragraph 54 of the NPPF 2018.

### **Planning Obligation**

79. The S106 Unilateral Planning Obligation includes the provision of 17 affordable units on site which broadly equates to the Council's requirements for 35% provision. In this respect the Obligation is in line with both paragraph 62 of the NPPF 2018, which requires on-site delivery of affordable homes and Altered Policy H4 of the MSDLP.
80. With regard to open space covenants within the Obligation, the appeal scheme provides open space and a 360m<sup>2</sup> play area with play equipment within the site which meets the Council's policy requirements, notably Policy RT4 of the MSDLP.
81. With regard to covenants with SCC, the Obligation includes contributions in relation to primary school and Early Years provision and Public Rights of Way Improvements. A SoCG on Early Years and Education Matters has been agreed between the Appellant and SCC. There is also a Community Infrastructure Levy (CIL) Compliance Statement submitted by SCC.<sup>17</sup>

---

<sup>17</sup>INQ5

82. The Obligation includes the following matters in respect of SCC functions:

- Primary School Construction contribution – £180,719 (equates to £3,688.14 per dwelling). This is necessary if there are no surplus places available at the time of commencement, and if expansion of the existing primary school is confirmed, this Obligation would cease or be returned.
- Primary School Land contribution - £12,936 (equates to £264 per dwelling)– as above; and
- Contribution towards the build costs of a new Early Years setting - £33,332 (equates to £680.24 per dwelling).

83. The proposed development is estimated to generate up to four pre-school children. The proposed development should make a proportionate contribution towards the build cost of the new Early Years setting which in total would cost £500,000 and provide 60 places. The proposed development would generate 11 primary aged pupils but the Woolpit Primary Academy does not have enough places to accommodate all of the development being proposed in Woolpit. Due to the layout of the current school site it is not possible to add further permanent accommodation unless additional land is acquired.

84. Therefore the SCC strategy for primary school provision is to deliver a new 420 place primary school for Woolpit to ensure that there is adequate provision to support housing growth and basic need. The proposed development should make a proportionate contribution to the land and build costs of the new primary school in respect of the 11 pupils generated by it.

85. There are currently forecast to be surplus places available at the current secondary schools serving the proposed development, so no secondary or sixth form contributions would be required from the proposed development.

86. Paragraph 98 of the NPPF 2018 promotes the need to protect and enhance public rights of way and access, including taking opportunities to provide better facilities for users for example by adding links to existing rights of way networks. The anticipated increased use of the PROW network from the development would result in the need for offsite improvement work involving heavy clearance on Woolpit Public Footpath 4. The total financial contribution required is £915. The requirement for the footpath improvement arises directly from the increased population which would be generated by the development in the local area and it would also meet Council policies.

87. The Council has confirmed that none of the obligations would conflict with Regulation 123 requiring that no more than five contributions are pooled towards any one specific infrastructure scheme.

88. In my view, all of the provisions set out in the Section 106 Planning Obligation are necessary to make the development acceptable in planning terms, directly related to the development and fairly and reasonably related in scale and kind to the development. Therefore they all meet the tests with CIL Regulations 122 and 123 and should be taken into account in the decision.

### **Planning Balance**

89. Section 38(6) of the Planning and Compulsory Purchase Act 2004 requires that applications for planning permission be determined in accordance with

the development plan, unless material planning considerations indicate otherwise. Whilst the RfR cites only a limited number of policies which are said to be breached I deal with all policies that have a bearing on the proposals and in line with the new approach of the NPPF 2018<sup>18</sup> identify those which are most important for determining the appeal and whether they should be considered to be out-of-date.

90. The CS was adopted in 2008 and the MSDLP in 1998. Both plans predate the publication of the NPPF 2012 and the more recent NPPF 2018. The CSFR has had little impact on the saved or CS policies that remain in place and Policy FC1 really only and unnecessarily repeats what was in paragraph 14 of the NPPF 2012. It is now out-of-date because of the test it employs. Policy FC1.1 is policy of a very broad nature with one requirement that development must conserve and enhance the local character of the different parts of the district. It is up-to-date but is not otherwise of significance. The appeal proposal complies with these policies.
91. Policy CS1 of the CS merely sets out the settlement hierarchy. However, it includes the words "*the rest of Mid-Suffolk, including settlements not listed in the above (hierarchy) will be designated as countryside ... renewable energy*". By virtue of this latter requirement it offends paragraphs 77 and 78 of NPPF 2018. It perpetuates the theme of protection of the open countryside for its own sake and its limitations are inimical to the balanced approach which the NPPF 2018 exhorts. It is one of the most important policies and it is out-of-date. The appeal proposal complies with the hierarchical requirements of Policy CS1 but it conflicts with the latter part of this policy as the site is located outside the settlement boundary.
92. As the proposed development is in open countryside, it also offends the requirements of Policy CS2. Policy CS2 is a most important policy and it is out-of-date. The NPPF has never and still does not exhort a restrictive approach to development outside settlements in this manner. It does not protect the countryside for its own sake or prescribe the types of development that might be acceptable. The policy as worded obviates a balancing exercise and precludes otherwise sustainable development by default and thereby defeats the presumption in its favour. It is also contrary to paragraphs 77 and 78 of NPPF 2018.
93. Policy CS5 provides that all development will maintain and enhance the environment including the historic environment, and retain local distinctiveness. It requires development actually to maintain and enhance the historic environment which exceeds the statutory duty (LBA 1990) and goes further than paragraph 192 of NPPF 2018 which requires decision makers to "take account of the desirability of sustaining and enhancing the significance of heritage assets" (my underlining). This is a most important policy and it is out-of-date. It does not make enhancement a requirement where no such requirement is reasonably possible or appropriate to the nature of the proposed development. The policy also fails to acknowledge the balancing exercise which the NPPF 2018 requires to be undertaken in circumstances where the harm is less than substantial.
94. Moreover, I have found that the appeal proposal would accord with national policy advice in the NPPF 2018, notably paragraph 192, and there would be no

---

<sup>18</sup> Paragraph 11

conflict with Policy CS5. The proposed development constitutes a high quality design as it proposes a form of development that reflects the character and appearance of the surrounding streetscape. The DAS provides details on materials and finishes. The materials selected for the new dwellings reflect the colours and shades of the Suffolk vernacular buildings of Woolpit in their simple forms and thus retain local distinctiveness in accordance with Policy CS5 and the NPPF 2018 in Section 12. Nor would there be any conflict with Policy CS5 in relation to the off-site highway improvements works in the Conservation Area.

95. Policy GP1 is a most important policy and it is up-to-date. The proposal complies with its requirements. Policy HB8 is also a most important policy and it is up-to-date despite the fact that it predates its CS equivalent. As I disagree with the Council's case on the impact of the proposal on the character and appearance of the Conservation Area, the proposal complies with its requirements. Policy FC2 is the Council's strategic housing policy within the development plan. However, in the light of paragraph 73 of the NPPF 2018, this policy is out-of-date, which is accepted by Mr Roberts.<sup>19</sup>
96. Drawing all of these threads together I find that being outside the settlement boundary and within the countryside, the appeal proposal is not in accordance with the development plan taken as a whole.
97. However, in the context of paragraph 213 of the NPPF 2018, I have found that some of the most important policies for determining this appeal are out-of-date, notably Policy CS1 and Policy CS2. I have attached only moderate weight to the conflict with these policies which lessens the significance of that conflict.
98. At paragraph 62 of this decision, I found that the clear public benefits of the proposal would outweigh the less than substantial harm to the significance of a designated heritage asset.
99. The tilted balance in paragraph 11 of the NPPF 2018 is engaged because firstly, policies that are most important for the determination of this appeal are out-of-date and secondly, the Council cannot demonstrate a five year supply of deliverable housing sites.
100. Balanced against the identified conflict with the development plan I give substantial weight to the provision of 32 market dwellings and 17 affordable dwellings on a site which is visually and functionally well related to the existing village. Paragraph 59 of the NPPF 2018 states that to support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed, that the needs of groups with specific housing requirements are addressed and that land with permission is developed without unnecessary delay. This comprises a substantial social benefit.
101. I have attached moderate weight in terms of the economic benefits that would arise from the provision of employment opportunities during the construction phase and the spending power from 49 new households within the local area.
102. Furthermore I am satisfied that the proposed development would fulfil the aims of the NPPF 2018 by promoting a high quality design of new homes and

---

<sup>19</sup> Proof of evidence paragraph 2.3

places. I find that the provision of on-site community open space with green infrastructure features, the footpath improvements to the village centre and the wider countryside and the highway works in the village centre would all provide environmental benefits. I apportion moderate weight in terms of the environment.

103. Taking all of these matters into account, including all other material considerations, I find that the adverse impacts of granting planning permission would not significantly and demonstrably outweigh the benefits of the proposed development when assessed against the policies in the NPPF 2018 as a whole and that the proposal represents sustainable development. On this basis a decision, other than in accordance with the development plan is justified and therefore the appeal should be allowed.

### **Planning Conditions**

104. I have considered the conditions suggested by the Council<sup>20</sup> in the light of the advice in paragraphs 54 and 55 of the NPPF, the model conditions retained at Appendix A of the cancelled Circular 11/95 and the Government's PPG on the use of planning conditions. I have made minor adjustments to the suggested conditions in the interests of clarity. Condition 1 imposes a shorter timescale than the normal three years but this is justified given the pressing housing need and the advice in paragraph 76 of the NPPF 2018. Condition 2 is necessary for the avoidance of doubt. Condition 3 is required to safeguard heritage assets of archaeological interest. Condition 4 which relates to Construction Management is necessary to ensure minimal impact on the public highway and residential amenity but I have deleted the element relating to haul routes as this relates to land outside the site and thus cannot be controlled by condition. Conditions 5-7 are necessary in the interests of ecology, safeguarding habitats/species and visual amenity. Conditions 8 -10 are required to ensure the development does not cause increased flood risk or increased pollution to the water environment.
105. Conditions 11-23 are necessary in the interests of highway safety, traffic management, safe and suitable facilities for pedestrian and cycle movement and to comply with paragraph 110 of the NPPF. Condition 24 is required in the interests of safeguarding ecology, biodiversity and amenity within the site. Condition 25 is required to ensure the site is suitably served by fire hydrants in the interests of public safety and fire prevention. Condition 26 is necessary to ensure that the development is equipped with access to high-quality telecommunications in accordance with paragraph 112 of the NPPF.
106. Condition 27 is required to ensure that recycling bins are not stored on the highway in the interests of highway safety. Condition 28 which relates to screen walls and/or fences is required in the interests of residential amenity. Condition 29 is required to ensure the appropriate recording and analysis of archaeological assets. Condition 30 is required to ensure the provision and long-term maintenance of adequate on-site space for the parking and manoeuvring of vehicles. Condition 31 relates to a Residents Travel Pack to reflect the national policy aim of achieving the fullest possible use of public transport, walking and cycling.

---

<sup>20</sup> INQ4

## **Conclusion**

107. Having considered these and all other matters raised I find nothing of sufficient materiality to lead me to a different conclusion. The appeal is therefore allowed subject to the conditions set out in the attached Schedule.

*Harold Stephens*

INSPECTOR

## **SCHEDULE OF PLANNING CONDITIONS (1-31)**

### **TIME LIMIT FOR IMPLEMENTATION**

- 1) The development hereby permitted shall be begun not later than the expiration of two years from the date of this permission.

### **LIST OF APPROVED DRAWINGS**

- 2) The development hereby permitted shall be carried out in accordance with the following drawings:

5018 PA01 House Type 1  
5018 PA02 House Type 1  
5018 PA03 Single Garage  
5018 PA04 House Type 2  
5018 PA05 House Type 2  
5018 PA06 House Type 3  
5018 PA07 House Type 3  
5018 PA08 House Type 3  
5018 PA09 Rev. A House Type 3  
5018 PA10 Rev. A House Type 4  
5018 PA11 House Type 4  
5018 PA12 Rev. A House Type 4  
5018 PA13 House Type 5  
5018 PA14 House Type 5  
5018 PA15 House Type  
5018 PA16 House Type 6  
5018 PA17 House Type 6  
5018 PA18 Rev. A Cart Lodge  
5018 PA19 House Type 7  
5018 PA20 House Type 7  
5018 PA21 House Type 7  
5018 PA22 Rev. A House Type 8  
5018 PA23 House Type 8  
5018 PA24 House Type 8  
5018 PA28 House Type 9  
5018 PA29 House Type 9  
5018 PA31 Rev H Site/block roof plan  
5018 PA32 Rev C Street Elevations  
5018 PA33 Site Location Plan  
5018 PA34 rev A Typical Elevations  
5018 PA35 rev B Street Elevations  
5018 PA36 ASHP SIZES

### **PRE - COMMENCEMENT CONDITIONS**

#### **Archaeology**

- 3) No development shall take place within the site until the implementation of a programme of archaeological work has been secured, in accordance with a Written Scheme of Investigation which has previously been submitted to and approved in writing by the Local Planning Authority.

The scheme of investigation shall include an assessment of significance and research questions; and:

- a. The programme and methodology of site investigation and recording.
- b. The programme for post investigation assessment.
- c. Provision to be made for analysis of the site investigation and recording.
- d. Provision to be made for publication and dissemination of the analysis and records of the site investigation.
- e. Provision to be made for archive deposition of the analysis and records of the site investigation.
- f. Nomination of a competent person or persons/organisation to undertake the works set out within the Written Scheme of Investigation.
- g. The site investigation shall be completed prior to development, or in such other phased arrangement, as agreed and approved in writing by the Local Planning Authority.

### **Construction Management**

- 4) Prior to the commencement of development details of a Construction Management Plan shall be submitted to and approved in writing by the Local Planning Authority and shall incorporate the following information:
  - a. Details of the hours of work/construction of the development within which such operations shall take place and the hours within which delivery/collection of materials for the said construction shall take place at the site.
  - b. Details of the storage of construction materials on site, including details of their siting and maximum storage height.
  - c. Details of how construction and worker traffic and parking shall be managed.
  - d. Details of any protection measures for footpaths surrounding the site.
  - e. Details of any means of access to the site during construction.
  - f. Details of the scheduled timing/phasing of development for the overall construction period.
  - g. Details of any wheel washing to be undertaken, management and location it is intended to take place.
  - h. Details of the siting of any on site compounds and portalooos.
  - i. Monitoring and review mechanisms.

The construction shall at all times be undertaken in accordance with the agreed methodology approved in writing by the Local Planning Authority.

### **Landscaping and Biodiversity**

- 5) All ecological mitigation measures and/or works shall be carried out in accordance with the details contained in the Ecological report (MHE Consulting August 2015) as already submitted with the planning application and agreed with the Local Planning Authority prior to determination.
- 6) No development shall commence until a detailed 'hard' and 'soft' Landscaping Scheme, which shall include any proposed changes in ground levels, has been submitted to, and approved in writing by, the Local Planning Authority.

The 'hard' landscaping shall include details of all hard surface materials and boundary treatments to be used within the development with a timetable for implementation, including all means of enclosure and boundary treatments, residential screen walls and fences.

The 'hard' landscaping shall be implemented and completed in accordance with the approved details and agreed timetable.

The 'soft' landscaping shall include details of the existing trees and plants on site to be retained together with measures for their protection which shall comply with the recommendations set out in the British Standards Institute publication 'BS 5837:2012 Trees in relation to design, demolition and construction'.

The 'soft' landscaping shall include details (including species, size of stock at time of planting, location) of all new plants and trees to be provided as well as any areas for seeding. The new landscaping should comprise of native species only as defined in Schedules 2 and 3 of the Hedgerow Regulations 1997.

The 'soft' landscaping shall be implemented in accordance with the approved details within the first planting season (October - March inclusive) following the commencement of development.

Any trees, hedges, shrubs or turf identified within the approved Landscaping Scheme (both proposed planting and existing) which die, are removed, seriously damaged or seriously diseased, within a period of 10 years of being planted or in the case of existing planting within a period of 5 years from the commencement of development, shall be replaced in the next planting season with others of similar size and species.

The approved Landscaping Scheme shall be carried out in its entirety and shall accord with the approved drawings under this permission.

- 7) Prior to the commencement of development on the site a skylark mitigation strategy, including a timetable for implementation, shall be submitted to, and agreed in writing by, the Local Planning Authority. The agreed strategy shall be implemented in full to mitigate the loss of potential nesting habitat.

## **Site Drainage**

- 8) No development shall commence until a foul water strategy has been submitted to and approved in writing by the Local Planning Authority. No dwellings shall be occupied until the works have been carried out in accordance with the foul water strategy so approved.
- 9) No development shall take place until a surface water drainage scheme for the site, including a timetable for implementation, based on sustainable drainage principles and an assessment of the hydrological and hydro geological context of the development, has been submitted to and approved in writing by the Local Planning Authority. The drainage strategy should demonstrate that the surface water run-off generated up to and including the 100 year + Climate Change storm will not exceed the run-off from the undeveloped site following the corresponding rainfall event. The scheme shall subsequently be

implemented in accordance with the approved details and timetable before the development is completed. Details of which will include:

- a. Details of further infiltration testing on site in accordance with BRE Digest 365 to verify the permeability of the site (trial pits to be located where soakaways are proposed and repeated runs for each trial hole). Borehole records should also be submitted in support of soakage testing.
  - b. Infiltration devices should be no more than 2m deep and will have at least 1.2m of unsaturated ground between base of the device and the groundwater table.
  - c. Dimensioned plans illustrating all aspects of the surface water drainage scheme including location and size of infiltration devices and the conveyance network. A statement on the amount of impermeable area served by each infiltration device should also be illustrated on the plans and should be cross referenceable with associated design calculations.
  - d. Full modelling results (or similar method) to demonstrate that the infiltration device has been adequately sized to contain the critical 100yr+ Climate Change event for the catchment area they serve. Each device should be designed using the nearest tested infiltration rate to which they are located. A suitable factor of safety should be applied to the infiltration rate during design.
  - e. Infiltration devices will have a half drain time of less than 24 hours.
  - f. Modelling of conveyance networks showing no above ground flooding in 1 in 30 year event, plus any potential volumes of above ground flooding during the 1 in 100 year rainfall + Climate Change.
  - g. Infiltration devices shall only be used where they do not pose a threat to groundwater. Only clean water will be disposed of by infiltration devices due to the site being inside a Source Protection Zone. Demonstration of adequate treatment stages for water quality control shall be submitted - SuDS features should demonstrate betterment to water quality, especially if discharging towards a watercourse or aquifer.
  - h. Topographic plans shall be submitted depicting safe exceedance flow paths in case of a blockage within the main surface water system and/or flows in excess of a 1 in 100 year rainfall event. These flow paths will demonstrate that the risks to people and property are kept to a minimum.
  - i. A management and maintenance plan for the lifetime of the development which shall include the arrangements for adoption by any public body or statutory undertaker, or any other arrangements to secure the operation of the sustainable drainage system throughout its lifetime.
  - j. Arrangements to enable any surface water drainage within any private properties to be accessible and maintained including information and advice on responsibilities to be supplied to future owners.
- 10) No development shall commence until details of a Construction Surface Water Management Plan (CSWMP) detailing how surface water and storm water will be managed on the site during construction (including demolition and site clearance operations) is submitted to and agreed in writing by the Local Planning Authority. The CSWMP shall be implemented and thereafter managed and maintained in accordance with the approved plan for the duration of construction. The approved CSWMP shall include:
- a. Method statements, scaled and dimensioned plans and drawings detailing surface water management proposals to include:

- i. Temporary drainage systems.
- ii. Measures for managing pollution / water quality and protecting controlled waters and watercourses.
- iii. Measures for managing any on or offsite flood risk associated with construction.

## **Highways**

- 11) No development shall commence until details of the estate roads and footpaths (including layouts, levels, gradients surfacing and means of surface water drainage, lighting and traffic calming measures), have been submitted to and approved in writing by the Local Planning Authority. The development shall be carried out and completed in accordance with the approved details and agreed timetable.
- 12) No development shall commence until a detailed scheme for highway improvements to Green Road, comprising traffic calming measures and footway widening provision which shall be in general accordance with those details as shown on Drawing no. 112/2015/04 Revision P2, has been submitted to and agreed in writing by the Local Planning Authority in consultation with the Local Highway Authority.
- 13) No development shall commence until details have been submitted to and approved in writing by the Local Planning Authority, of the means to prevent the discharge of surface water from the development onto the highway. The development shall be carried out and completed in accordance with the approved details and agreed timetable.

## **PRIOR TO OCCUPATION OR OTHER STAGE CONDITIONS**

### **Highways**

- 14) No part of the development shall be commenced above slab level until the new vehicular access onto Green Road has been laid out and completed in all respects in accordance with Drawing No. 5018 PA31 Rev H Site/block roof plan and with an entrance width of 5.5 metres and been made available for use. Thereafter the access shall be retained in the specified form.
- 15) Prior to the access from Green Road into the site being constructed, the ditch beneath the proposed access shall be piped or bridged in accordance with details which previously shall have been submitted to and approved in writing by the Local Planning Authority and shall be retained thereafter in its approved form.
- 16) The new estate road junction with Green Road, inclusive of cleared land within the sight splays to this junction, must be formed prior to any other works commencing or delivery of any other materials.
- 17) No development shall commence above slab level until a scheme for the provision and implementation electric car charging points for the development has been submitted to, and approved in writing by, the Local Planning Authority. The scheme shall include a clear timetable for the implementation of the measures in relation to the occupancy of the development. The scheme

shall be implemented, and the measures provided and made available for use, in accordance with such timetable as may be agreed.

- 18) Details of the gateway feature identified on drawing 5018 PA31 Rev H to be located to the southwest corner of the site shall be submitted to and agreed with the Local Planning Authority and shall be completed prior to occupation of the first dwelling and thereafter retained in the approved form.
- 19) Before the access onto Green Road is first used, visibility splays shall be provided as shown on Drawing No. 5018/PA31 Revision H, as submitted, and thereafter retained in the specified form. Notwithstanding the provisions of Part 2 Class A of the Town & Country Planning (General Permitted Development) Order 2015 (or any Order revoking and re-enacting that Order with or without modification) no obstruction over 0.6 metres high shall be erected, constructed, planted or permitted to grow within the areas of the visibility splays at any time.
- 20) No dwelling shall be occupied until the carriageways and footways serving that dwelling have been constructed to at least binder course level or better.
- 21) No dwelling shall be occupied until the area(s) within the site, shown on approved drawing 5018 PA31 Rev H for the purposes of loading/unloading, manoeuvring and parking of vehicles, including electric charging points and secure cycle storage, serving that dwelling has been provided and thereafter that area(s) shall be retained and used for no other purpose. Thereafter those areas applicable to that dwelling shall be retained and remain free of obstruction except for the purpose of manoeuvring and parking of vehicles.
- 22) A metalled footway/cycleway, as shown on Drawing 5018 PA31 Rev H of a minimum 2.0 metres width, shall be provided from the site into Steeles Close, northwards to connect with the existing access in Steeles Close. The metalled footway shall be provided and made available for use prior to the first occupation of any dwellings in the development.
- 23) No dwelling shall be occupied until the highway improvements secured under Condition 12 above have been constructed in strict accordance with the approved details and made available for public use and thereafter retained post construction in the approved form.

### **Site Infrastructure/Other**

- 24) Within three months of the commencement of development a detailed lighting scheme for all public areas to be lit shall be submitted to and approved in writing by the Local Planning Authority. The scheme shall show how and where external lighting will be installed, (through technical specifications and the provision of appropriate lighting contour plans which shall include lux levels of the lighting to be provided), so that it can be:
  - a. Clearly demonstrated that areas to be lit have reasonably minimised light pollution, through the use of minimum levels of lighting and features such as full cut off cowls or LED.
  - b. Clearly demonstrated that the boundary vegetation to be retained, as well as that to be planted, will not be lit in such a way as to disturb or

prevent bats using their territory or having access to their breeding sites and resting places or foraging areas, through the use of minimum levels of lighting and features such as full cut off cowls or LED.

All external lighting shall be installed in accordance with the specifications and locations as set out in the approved scheme and shall be maintained thereafter in accordance with that scheme.

- 25) Within three months of the commencement of development details of the provision of fire hydrants for the development, including a timetable for installation, shall be submitted to and approved in writing by the Local Planning Authority. The fire hydrants shall be installed in accordance with the approved details in their entirety and in accordance with the agreed timetable.
- 26) Within three months of the commencement of development, details of how superfast or ultrafast broadband infrastructures will be delivered to every household in the development, subject to network capacity being available, shall be submitted to and approved in writing by the Local Planning Authority. The approved superfast broadband infrastructures for each dwelling shall be installed prior to first occupation of that dwelling.
- 27) Within three months of the commencement of development, details of the areas to be provided for the storage of refuse/recycling bins shall be submitted and approved in writing by the Local Planning Authority. The approved scheme shall be carried out in its entirety prior to the first occupation of the dwelling to which it relates and shall be retained thereafter and used for no other purpose.
- 28) The residential screen walls and/or fences as may be approved pursuant to the Landscaping Scheme under Condition 6 above, shall be erected prior to the dwelling/s to which they relate being first occupied and thereafter shall be retained in the approved form.
- 29) No dwelling shall be occupied until the archaeological site investigation and post investigation assessment, secured under Condition 3 above, has been completed and submitted to, and approved in writing by, the Local Planning Authority.

## **POST OCCUPANCY MONITORING/MANAGEMENT**

- 30) Notwithstanding the provisions of Schedule 2 of the Town & Country Planning (General Permitted Development) (England) Order 2015 (or any Order revoking and re-enacting that Order with or without modification), no development shall be carried out in such a position as to preclude vehicular access to those vehicular parking spaces and no alterations shall be carried out to the approved garage units that would preclude the parking of vehicles within them without planning permission being granted in that regard.
- 31) Within one month of the first occupation of any dwelling, the occupiers of each of the dwellings shall be provided with a Residents Travel Pack (RTP). Not less than three months prior to the first occupation of any dwelling, the contents of the RTP shall be submitted to and approved in writing by the Local Planning Authority in consultation with the Local Highway Authority and shall

include walking, cycling and bus maps, latest relevant bus and rail timetable information, car sharing information, personalised travel planning and a multimodal travel voucher. The RTP shall be maintained and operated thereafter.

End of Conditions Schedule

## **APPEARANCES**

### **FOR THE LOCAL PLANNING AUTHORITY:**

Mr Asitha Ranatunga of Counsel

Instructed by the Council

He called:

Luke Barber HND BSc FD C Eng.

Principal Engineer Suffolk CC

Nicholas Joubert MSc

Heritage Consultant

Andrew Ryley BA (Hons) MSc MRTPI

Associate Director DLP Planning Ltd

Alex Roberts BSc (Joint Hons) Associate RTPI

Director DLP Planning Ltd

### **FOR THE APPELLANT:**

Mr Paul Shadarevian QC

He called:

25 June 2020

Dear Sir

**TOWN AND COUNTRY PLANNING ACT 1990 – SECTION 78  
APPEAL MADE BY WAVENDON PROPERTIES LTD  
LAND TO THE EAST OF NEWPORT ROAD AND TO THE EAST AND WEST OF  
CRANFIELD ROAD, WOBURN SANDS, BUCKINGHAMSHIRE MK17 8UH  
APPLICATION REF: 16/00672/OUT**

1. I am directed by the Secretary of State to say that consideration has been given to the report of Tom Gilbert-Wooldridge BA (Hons) MTP MRTPI IHBC, who held a public local inquiry from 14 - 23 January 2020 into your client's appeal against the decision of Milton Keynes Council to refuse your client's outline application, with all matters except the means of access reserved for subsequent approval, for residential development of up to 203 dwellings, a doctor's surgery, open space and landscaping, together with pedestrian, cycle and vehicular access from Newport Road and Cranfield Road and supporting infrastructure, in accordance with application ref: 16/00672/OUT, dated 20 July 2016.
2. On 31 October 2017, this appeal was recovered for the Secretary of State's determination, in pursuance of section 79 of, and paragraph 3 of Schedule 6 to, the Town and Country Planning Act 1990.
3. The Secretary of State initially issued his decision in respect of the above appeal in his letter dated 5 December 2018. That decision was challenged by way of an application to the High Court and was subsequently quashed by order of the Court dated 14 June 2019. The appeal has therefore been redetermined by the Secretary of State, following a new inquiry into this matter. Details of the original inquiry are set out in the 5 December 2018 decision letter.

**Inspector's recommendation and summary of the decision**

4. The Inspector recommended that the appeal be dismissed.
5. For the reasons given below, the Secretary of State agrees with the Inspector's conclusions and agrees with his recommendation. He has decided to dismiss the appeal.

Ministry of Housing, Communities & Local Government  
Jean Nowak, Decision Officer  
Planning Casework Unit  
3rd Floor Fry Building  
2 Marsham Street  
London SW1P 4DF

Tel: 0303 444 1626  
Email: [PCC@communities.gov.uk](mailto:PCC@communities.gov.uk)

A copy of the Inspector's report (IR) is enclosed. All references to paragraph numbers, unless otherwise stated, are to that report.

### **Matters arising since the close of the inquiry**

6. On 18 May 2020, the Secretary of State wrote to the main parties to afford them an opportunity to comment on a letter from Milton Keynes Council dated 12 May 2020 which included a recent appeal decision relating to Rectory Farm, Woburn Sands Road, Bow Brickhill, Milton Keynes, MK17 9JY. A list of the representations received in response to this letter is at Annex A. These representations were circulated to the main parties on 27 May 2020 and 3 June 2020. The Secretary of State is satisfied that all representations received have been given full and due consideration, and no other new issues were raised in this correspondence to warrant further investigation or necessitate additional referrals back to parties. Copies may be obtained on written request to the address at the foot of the first page of this letter.
7. In his letter of 16 August 2019, confirming the reopening of the inquiry, the Secretary of State explained that one change in circumstance he considered material to the redetermination was the announcement by Highways England, in September 2018, that corridor B (central option) had been selected as the preferred corridor for the Oxford-Cambridge Expressway (IR1.16). The Secretary of State has noted that, in March 2020 Highways England announced that work had paused on the Oxford-Cambridge Expressway while they undertook further work on other potential road projects that could support the government ambition on the Oxford-Cambridge Arc (<https://highwaysengland.co.uk/project-update-12-march-2020/>). The Secretary of State has also noted that none of the parties have made representations to him on this announcement. The Secretary of State does not consider the pausing of the work raises any matters that would require him to refer back to the parties for further representations prior to reaching his decision on this appeal.

### **Policy and statutory considerations**

8. In reaching his decision, the Secretary of State has had regard to section 38(6) of the Planning and Compulsory Purchase Act 2004 which requires that proposals be determined in accordance with the development plan unless material considerations indicate otherwise.
9. In this case the development plan consists of Plan:MK 2016-2031 (Plan:MK), Woburn Sands Neighbourhood Plan 2014 (WSNP) and Site Allocations Plan 2018 (SAP). The Secretary of State considers that relevant development plan policies include those set out at IR3.3-3.9.
10. Other material considerations which the Secretary of State has taken into account include the National Planning Policy Framework ('the Framework') and associated planning guidance ('the Guidance').
11. In accordance with section 66(1) of the Planning (Listed Buildings and Conservation Areas) Act 1990 (the LBCA Act), the Secretary of State has paid special regard to the desirability of preserving those listed buildings potentially affected by the proposals or their settings, or any features of special architectural or historic interest which they may possess.

## **Main issues**

### *Housing Land Supply*

12. The Secretary of State has considered the Inspector's analysis at IR12.4-12.64. For the reasons given at IR12.8-12.12 the Secretary of State agrees with the Inspector that it is acceptable that the evidence can post-date the base date provided that it is used to support sites identified as deliverable as of 1 April 2019 (IR12.11). Like the Inspector, the Secretary of State does not consider it necessary to apply a 1 October 2019 base date (IR12.12). For the reasons given at IR12.13-12.15, the Secretary of State agrees with the Inspector that a proforma can, in principle, provide clear evidence of a site's deliverability (IR12.14). The Secretary of State also agrees with the Inspector that it would not be appropriate to automatically disregard all the sites owned by Homes England and Milton Keynes Development Partnership (IR12.15). For the reasons given at IR12.16-12.25 the Secretary of State agrees with the Inspector that there is no reason to apply a greater discount than the Council's rate (IR12.19). The Secretary of State agrees with the approach the Inspector has taken to prior approval sites in this case (IR12.22).
13. The Secretary of State has noted that the Globe and Castlethorpe Road appeal decisions came to different conclusions on whether the Council could demonstrate a 5-year housing land supply (HLS) (IR12.23), but he agrees that, as the Inspector's conclusions in this case are based on the evidence before him, this should be regarded as being sufficient to explain any difference from the findings of the Castlethorpe Road or Globe Inspectors (IR12.25).
14. The Secretary of State has considered the Inspector's assessment of disputed sites at IR12.26-12.60. For the reasons given, the Secretary of State agrees with the Inspector that the Council can demonstrate a HLS of 5.5 years for the base date of 1 April 2019 (IR12.61). The Secretary of State has also noted that the Inspector finds that, for a base date of 1 October 2019, there would be a 5-year HLS of 5.99 years (IR12.62). However, as already indicated in paragraph 12 above, the Secretary of State agrees with the Inspector that it is not necessary to apply a 1 October base date. The Secretary of State also agrees with the Inspector that the Council's Scenarios 2 and 3 do not affect his findings on HLS (IR12.63-64).
15. Overall, the Secretary of State agrees with the Inspector's conclusion at IR12.65 that the Council can demonstrate a 5-year supply of deliverable housing sites whichever approach is taken in terms of the base date, and even with the application of the Council's lapse rate.
16. The Secretary of State has noted that, in their correspondence of 26 May 2020 and 12 June 2020, the appellant has referred to the potential impact of the current Covid-19 pandemic on house building. He has also noted that the appellant submitted a document with their correspondence of 26 May 2020 issued by the Council entitled 'Rectory Farm decision and the Implications for Five-Year Housing Land Supply', published on 29 April 2020. The Secretary of State considers that, as the quantification in that document is based on the appellant's modelling using a past event and they have not put forward specific evidence about the deliverability of individual sites, it does not affect his judgement in this case.

### *The location of the development*

17. For the reasons given at IR12.66-12.71 and IR12.74, the Secretary of State agrees with the Inspector that the location and type of the appeal development does not comply with Policies DS1, DS2 and DS5 of Plan:MK and WSNP policies WS5 and WS6. He further agrees that there is no inconsistency with the Framework in terms of how WSNP Policies WS5 and WS6 seek to safeguard the countryside and direct developments to specific locations, and that these policies can be given significant weight (IR12.71). The Secretary of State agrees with the Inspector that the housing would not be in an appropriate location having regard to the development plan and national policies (IR12.74). He further agrees that the conflict with the development plan in terms of the location of the proposal carries substantial weight (IR12.101).
18. For the reasons given at IR12.72 the Secretary of State agrees with the Inspector that the proposal does not conflict with the development plan insofar as the proposed Oxford to Cambridge Expressway is concerned. He also agrees with the Inspector that there is no conflict with the development plan or other reason to refuse the proposal in relation to the East-West rail project (IR12.73).

### *Housing Density*

19. For the reasons given at IR12.75-12.82, the Secretary of State agrees with the Inspector that the final density figure cannot be established at this point (IR12.78). Like the Inspector the Secretary of State considers that, while the final layout and density of the development has yet to be fixed, a scheme based on the illustrative layout with a density of 16-20dph would be relatively low but would be acceptable in this instance for this location. It would balance an efficient use of land with respecting the surrounding character and setting and so would accord with Plan:MK Policy HN1 and NPPF paragraph 122 (IR12.81).

### *Other matters*

#### *Best and most versatile agricultural land*

20. For the reasons given at IR12.83 the Secretary of State agrees with the Inspector that the loss of Grade 3a agricultural land within the site would conflict with Plan:MK Policy NE7. However, the Secretary of State also agrees with the Inspector that this would not, in itself, be a reason for refusal and carries only moderate weight (IR12.99).

#### *Ecology and drainage*

21. For the reasons given at IR12.84-12.87 the Secretary of State agrees with the Inspector that the development would not have an unacceptable effect on ecology or protected species (IR12.86). The Secretary of State further agrees that the development offers the means to alleviate current drainage problems through additional attenuation and the use of a suitable maintenance regime (IR12.87). The Secretary of State considers that the environmental enhancement of ecology and the provision of drainage measures to try to address existing problems are benefits which should be afforded moderate weight (IR12.97).

#### *Highways and parking*

22. The Secretary of State notes that the appellant's updated Transport Assessment concludes that there would be very modest impacts on all junctions as a result of the

development (IR12.88 and IR12.96). For the reasons given the Secretary of State agrees with the Inspector that only limited weight can be afforded to any highway benefits (IR12.96).

#### *Facilities and services in Woburn Sands*

23. For the reasons given at IR12.89, the Secretary of State agrees with the Inspector that there is little evidence to indicate that the development would have an unacceptable impact on services and facilities in Woburn Sands.

#### *Heritage assets*

24. For the reasons given at IR12.90-12.91 the Secretary of State agrees with the Inspector that the development would result in less than substantial harm to the significance of the Grade II listed Deethe Farmhouse. He also agrees with the Inspector that the level of harm would be low due to the existing setting and the proposed mitigation measures. Nevertheless, paragraphs 193 and 194 of the Framework state that great weight should be given to the conservation of listed buildings and any harm weighed against the public benefits (IR12.91).
25. The Secretary of State also agrees with the Inspector that, given the existing screening and distances involved, there would be no harm caused to either the Grade II listed park and garden at Wavendon House or the Grade II\* Wavendon House itself (IR12.92).

#### *Character and appearance of the landscape*

26. For the reasons at IR12.93 the Secretary of State agrees with the Inspector that the development would have a very limited effect on the character and appearance of the landscape. Therefore, the Secretary of State affords little weight to any harm.

#### *Other benefits*

27. For the reasons given in IR12.94 the Secretary of State agrees with the Inspector that the provision of affordable housing beyond the minimum policy requirement should carry significant weight. The Secretary of State also agrees with the Inspector that the provision of market housing should be afforded significant weight given the potential number of dwellings that could be delivered and the eagerness of the appellant as a small to medium sized developer to deliver housing as swiftly as possible.
28. The Secretary of State agrees with Inspector that there are a range of economic benefits (IR12.95) and affords these moderate weight. For the reasons given in IR12.97 the Secretary of State agrees with the Inspector that little weight can be afforded to the appellant's claim of a high-quality living environment given the limited information at outline stage and the policy requirement that all development should be high quality.

#### **Planning conditions**

29. The Secretary of State has given consideration to the Inspector's analysis at IR11.1-11.2, the recommended conditions set out at the end of the IR and the reasons for them, and to national policy in paragraph 55 of the Framework and the relevant Guidance. He is satisfied that the conditions recommended by the Inspector comply with the policy test set out at paragraph 55 of the Framework. However, he does not consider that the imposition of these conditions would overcome his reasons for dismissing this appeal and refusing planning permission.

## **Planning obligations**

30. Having had regard to the Inspector's analysis at IR11.3-11.5, the planning obligation dated 27 February 2020, paragraph 56 of the Framework, the Guidance and the Community Infrastructure Levy Regulations 2010, as amended, the Secretary of State agrees with the Inspector's conclusion for the reasons given in IR11.6 that the obligation complies with Regulation 122 of the CIL Regulations and the tests at paragraph 56 of the Framework. However, the Secretary of State does not consider that the obligation overcomes his reasons for dismissing this appeal and refusing planning permission.

## **Planning balance and overall conclusion**

31. For the reasons given above, the Secretary of State considers that the appeal scheme is not in accordance with Plan:MK Policies DS1, DS2, DS5 and NE7 and WSNP policies WS5 and WS6, and is not in accordance with the development plan overall. He has gone on to consider whether there are material considerations which indicate that the proposal should be determined other than in accordance with the development plan.

32. Weighing in favour of the proposal, the Secretary of State affords the provision of affordable housing significant weight and also affords the provision of market housing significant weight. The economic benefits are given moderate weight, and the Secretary of State also gives moderate weight to ecology and drainage benefits. The Secretary of State affords limited weight to any highway benefits; and little weight to the appellant's claim of a high quality living environment..

33. Weighing against the proposal, the Secretary of State considers the housing would not be in an appropriate location having regard to the development plan and national policies. He further considers that the conflict with the development plan in terms of the location of the housing carries substantial weight as it would not accord with the spatial strategy in Plan:MK. The Secretary of State affords moderate weight to the loss of BMV agricultural land. The Secretary of State gives little weight to any harm to the landscape or character of the area.

34. The Secretary of State has considered whether the identified 'less than substantial' harm to the significance of the Grade II listed Deethe Farmhouse is outweighed by the public benefits of the proposal. In accordance with the s.66 duty, he attributes considerable weight to the harm. The public benefits have been summarised in paragraph 32 of this letter.

35. Overall the Secretary of State agrees with the Inspector at IR12.98 that the benefits of the appeal scheme are collectively sufficient to outbalance the identified 'less than substantial' harm to the significance of the Grade II listed Deethe Farmhouse. He considers that the balancing exercise under paragraph 196 of the Framework is therefore favourable to the proposal

36. The Secretary of State considers that other matters covered in this decision letter are neutral in the planning balance.

37. Overall the Secretary of State considers that the material considerations in this case indicate a decision in line with the development plan – i.e. a refusal of permission.

38. The Secretary of State therefore concludes that the appeal should be dismissed and planning permission refused.

## **Formal decision**

39. Accordingly, for the reasons given above, the Secretary of State agrees with the Inspector's recommendation. He hereby dismisses your client's appeal and refuses outline planning permission, with all matters except the means of access reserved for subsequent approval, for residential development of up to 203 dwellings, a doctor's surgery, open space and landscaping, together with pedestrian, cycle and vehicular access from Newport Road and Cranfield Road and supporting infrastructure, in accordance with application ref: 16/00672/OUT, dated 20 July 2016

## **Right to challenge the decision**

40. A separate note is attached setting out the circumstances in which the validity of the Secretary of State's decision may be challenged. This must be done by making an application to the High Court within 6 weeks from the day after the date of this letter for leave to bring a statutory review under section 288 of the Town and Country Planning Act 1990.

41. A copy of this letter has been sent to Milton Keynes Council and Woburn Sands Town Council.

Yours faithfully

*Jean Nowak*

**File Ref: APP/Y0435/W/17/3169314**

**Land to the east of Newport Road and to the east and west of Cranfield Road, Woburn Sands, Buckinghamshire MK17 8UH**

- The appeal is made under section 78 of the Town and Country Planning Act 1990 against a refusal to grant outline planning permission.
- The appeal is made by Wavendon Properties Ltd against the decision of Milton Keynes Council.
- The application Ref 16/00672/OUT, dated 20 July 2016, was refused by notice dated 5 December 2016.
- The development proposed is an outline planning application with all matters except the means of access reserved for subsequent approval described as 'residential development of up to 203 dwellings, a doctor's surgery, open space and landscaping, together with pedestrian, cycle and vehicular access from Newport Road and Cranfield Road and supporting infrastructure'.
- This report supersedes that issued on 2 February 2018. The original decision on the appeal was quashed by order of the High Court.

**Summary of Recommendation: That the appeal be dismissed.**

---

**1. Procedural Matters**

- 1.1. This section is based on the first Inspector's report and has been updated as necessary.

*Summary of appeal chronology*

- 1.2. The original inquiry into this appeal opened on 11 July 2017 and closed on 19 July 2017. Although requests that the appeal be determined by the Secretary of State (SoS) were refused in August 2017<sup>1</sup>, the SoS subsequently directed that he should determine this appeal himself in letters dated 31 October 2017<sup>2</sup>. The original Inspector's report was submitted on 2 February 2018 with a recommendation to allow the appeal and grant planning permission subject to conditions. The SoS disagreed and dismissed the appeal<sup>3</sup>. The appellant challenged the decision in the High Court. The decision was quashed by order of the High Court on 14 June 2019<sup>4</sup> and sent back to the SoS for redetermination. The SoS decided to re-open the inquiry, which opened on 14 January 2020 and ran for 7 days. The inquiry was closed in writing on 28 February 2020 once outstanding documents were received, including a completed and executed Section 106 (S106) agreement.

*The proposal in outline*

- 1.3. The appeal site extends across almost 15.2ha. It consists of about half a dozen fields, often enclosed behind mature hedges and trees, that wrap around the assorted residential streets and cul-de-sacs that project behind Newport Road and either side of Cranfield Road at the northern end of Woburn Sands. The main part of the town lies to the south beyond the Bletchley to Bedford railway line and a level crossing. The proposal is made in outline with all matters except the means of access reserved for subsequent approval. An illustrative

---

<sup>1</sup> ID26

<sup>2</sup> ID27

<sup>3</sup> CD10.33

<sup>4</sup> CD10.34

layout plan and a parameters plan<sup>5</sup> show how up to 203 dwellings and a doctor's surgery could be laid out across the site along with associated landscaping and open space.

*The application and the Council's decision*

- 1.4. The original planning application was reported to the Council's development control committee on 1 December 2016<sup>6</sup>. In the absence of sufficient housing land being identified as available to meet requirements over the next 5 years, the scheme was recommended for approval, subject to conditions and the execution of a S106 Agreement securing contributions towards the provision of health and education facilities, parks, play and community facilities, together with the maintenance of open space. The reasons for the recommendation were as follows:

"With the lack of a five year housing land supply, the strategic policies of the Development Plan are out of date, as outlined by the National Planning Policy Framework. Having weighed all other matters, the proposed development is considered to represent a sustainable form of development in terms of its social, environmental and economic functions and the proposed development is therefore acceptable in principle. Access to the site is considered appropriate and would not put undue pressure on the local road network and there are no other fundamental issues that would warrant a refusal of the application. All other detailed matters would be considered under reserved matters applications at a later date. In the light of these comments and the report above, approval is recommended."

- 1.5. However, the committee decided to refuse the application contrary to the recommendation. The reasons for refusal were<sup>7</sup>:

1. The Committee resolved to refuse planning permission on the basis that any such development of this site would result in the loss of future development and infrastructure options, causing significant and demonstrable harm and is therefore not sustainable development in accordance with Resolution 24/187 of the United Nations General Assembly definition of sustainable development and the National Planning Policy Framework (NPPF) in respect of future generations. The development would also therefore be contrary to paragraphs 14 and 19 of the National Planning Policy Framework, Saved Policy D1 of the adopted Milton Keynes Local Plan 2001-2011 (adopted 2005) and policy WS5 of the Woburn Sands Neighbourhood Plan 2014-2026 (adopted 2014). This does not constitute sustainable development in terms of paragraph 14 of the National Planning Policy Framework.
2. Furthermore the low density of this proposed development would not be considered sustainable given the current objectives of central government and this Council to both optimise use of land and to build both quickly and strategically.

- 1.6. In the Council's Statement of Case for the first inquiry, the first reason for refusal was effectively amended to read:

1. The development would be contrary to policy WS5 of the Woburn Sands Neighbourhood Plan 2014-2016 ([sic] adopted 2014). This does not constitute

---

<sup>5</sup> CDs1.4, 1.5 and 1.7

<sup>6</sup> CD3.2

<sup>7</sup> CD3.4

sustainable development in terms of paragraph 14 of the National Planning Policy Framework.

*The reasons for recovery*

- 1.7. An initial request to recover this appeal for determination by the SoS was made on the basis that the development exceeded the threshold of 150 dwellings and on whether the *Liverpool* or *Sedgefield* method of calculating the available provision for housing was the 'correct' approach to adopt in this case; that request was refused on 30 August 2017<sup>8</sup>. However, the SoS subsequently directed that he should determine this appeal himself in letters dated 31 October 2017<sup>9</sup>. The reason for recovery was that:

*... the appeal involves proposals for residential development of over 150 units or on sites of over 5 hectares, which would significantly impact on the Government's objective to secure a better balance between housing demand and supply and create high quality, sustainable, mixed and inclusive communities.*

*The need for Environmental Impact Assessment (EIA)*

- 1.8. Although this 'urban development project' falls within the descriptions set out at paragraph 10b of Schedule 2 and exceeds the thresholds in column 2 of the Town and Country Planning (Environmental Impact Assessment) (England and Wales) Regulations 2015, the Screening Opinion issued by the Council on 7 December 2016 indicated that the effects were likely to be mainly local and, given that the site was not in a specially sensitive location, that an Environmental Statement was not necessary, bearing in mind the advice in Schedule 3 to the Regulations. Accordingly, the scheme is not EIA development and an Environmental Statement is not required. Nevertheless, the application was accompanied by the following documents<sup>10</sup>:

- Planning Statement
- Design and Access Statement
- Transport Assessment (TA)
- Flood Risk Assessment
- Archaeology Report
- Tree Survey
- Landscape and Visual Assessment (LVA)
- Ecology Assessment
- Protected Species Report
- Noise Survey and supplementary report
- Statement of Community Involvement
- Sustainability Statement
- Geo-environmental Audit

- 1.9. The appellant's evidence to the second Inquiry included updates to the Ecological Assessment, the TA, and the Sustainability Statement, as well as updates to the Heritage Assessment and Economic Benefits Statement that had been presented to the first Inquiry<sup>11</sup>.

---

<sup>8</sup> ID26

<sup>9</sup> ID27

<sup>10</sup> CD1.10-CD1.29

<sup>11</sup> APP9

*Public consultation*<sup>12</sup>

- 1.10. Pre-application discussion with Council officers together with statutory and non-statutory consultees preceded the application; meetings were held in December 2015 and February 2016. As a result, the intention to pursue a low density scheme, creating a 'soft edge' to the settlement, was endorsed. In addition, the link road through the site between Newport Road and Cranfield Road was considered to help relieve congestion at the junction beside the level crossing. Technical evidence was requested, relating to noise emissions from the Deethe Farm Industrial Estate, surface water drainage, ecological assessments and the setting of the Grade II listed Deethe Farmhouse.
- 1.11. A public consultation event (publicised in advance) was held in the Summerlin Centre, Woburn Sands on Friday 22 January 2016. This attracted 218 people. Concerns were raised about the existing junction between Cranfield Road and Newport Road, considered unsafe and subject to congestion, particularly when the level crossing was closed, and the need for traffic calming on Newport Road and Cranfield Road. There was support for the low density and the large gardens proposed and for the possibility of an additional doctor's surgery to ease perceived capacity problems at the existing facility.
- 1.12. Discussions with officers continued after the submission of the scheme and a revised illustrative site layout responded to specific points made at a meeting in June 2016. In addition, an LVA was undertaken, surveys of protected species carried out and the TA updated.

*The first Inspector's report*<sup>13</sup>

- 1.13. The first Inspector's report (IR) dated 2 February 2018 recommended that the appeal be allowed and planning permission granted subject to conditions. The Inspector concluded that a 5 year housing land supply (HLS) could not be demonstrated and the development plan policies pulled in both ways at a location he considered to be sustainable (IR9.48). He concluded on matters relating to the character of the landscape and surrounding area, the setting of the listed farmhouse, the traffic, car parking and facilities in Woburn Sands, housing density, ecology, and drainage (IR9.49), and considered that these matters were not sufficient to prevent a sustainable housing development from proceeding especially in the absence of a 5 year HLS (IR9.50). Weighing up the harms against the benefits, he concluded that the planning balance was firmly in favour of the proposed development (IR9.51-IR9.55).

*The SoS's decision*<sup>14</sup>

- 1.14. The SoS's decision letter (DL) dated 5 December 2018 agreed with the Inspector on matters such as the effect of the development on the character of the area (DL27), heritage assets (DL28), traffic, parking and facilities in Woburn Sands, ecology, and drainage (DL30). He disagreed regarding the 5 year HLS and concluded that the supply was approximately 5.9-6.2 years (DL15-18). He also disagreed regarding housing density and concluded that there was conflict with the relevant development plan policy (DL24-26).

---

<sup>12</sup> Document 11 and CD1.28

<sup>13</sup> CD10.33

<sup>14</sup> CD10.33

Weighing up the benefits of the scheme against the adverse impacts including the conflicts with the development plan (DL34-37), he disagreed with the Inspector's recommendation and concluded that the appeal should be dismissed.

#### *High Court challenge*

1.15. The appellant appealed to the High Court on 6 grounds. It succeeded in the case of 2 which related to the SoS's findings in relation to the estimated deliverable supply of housing. The Court found that the SoS had failed to provide adequate reasons in relation to the HLS figure adopted in his decision. As a consequence, the decision was quashed in a judgment<sup>15</sup> dated 14 June 2019 and the appeal returned to the SoS for redetermination.

#### *Re-opening of the Inquiry*

1.16. The SoS wrote to parties on 16 August 2019<sup>16</sup> confirming that the inquiry would be re-opened. He considered that there had been significant changes in circumstances since the first Inquiry which were material to the redetermination of the appeal. These included:

- The adoption of a new local plan (Plan:MK) with the associated identification of housing expansion areas;
- The announcement by Highways England, in September 2018, that corridor B (central option) had been selected as the preferred corridor for the Oxford-Cambridge Expressway; and
- Changes to national policy and guidance.

1.17. A Pre-Inquiry meeting was held on 1 November 2019 which was followed by a note<sup>17</sup> setting out the likely main issues and how they would be addressed. At the meeting, the Council provided a note<sup>18</sup> updating the reasons for refusal to reflect changes in national and local policy. The updated reasons are as follows:

(1) The development by virtue of its location would be contrary to spatial policies DS1 (Settlement Hierarchy), DS2 (Housing Strategy) and DS5 (Open Countryside) of Plan:MK 2016 – 2031 (adopted March 2019) and to policy WS5 of the Woburn Sands Neighbourhood Plan 2014-2026 (adopted 2014). This does not constitute sustainable development in terms of paragraph 11 of the National Planning Policy Framework (2019).

(2) Furthermore, the low density of this proposed development would not be considered sustainable given the current objectives of central government and this Council to both optimise use of land and to build both quickly and strategically, contrary to policy HN1 (Housing Mix and Density) of Plan:MK 2016 – 2031 and paragraph 122 of the National Planning Policy Framework (2019)

1.18. The second Inquiry was held on 14-17 and 21-23 January 2020. I carried out an accompanied site visit on 20 January 2020. On the same day, I also carried out unaccompanied visits to locations in the surrounding area including within

---

<sup>15</sup> CD10.34

<sup>16</sup> CD10.42

<sup>17</sup> CD10.44

<sup>18</sup> CD12.3

Woburn Sands as highlighted on the site visit itinerary<sup>19</sup>. The Inquiry closed in writing on 28 February 2020 once all outstanding documents, including the completed and executed Section 106 agreement, had been received.

## **2. The Site and Surroundings**

- 2.1. The following summary of the site and its surroundings is based on Section 2 of the first Inspector's report and the Statement of Common Ground (SOCG)<sup>20</sup> submitted to the second Inquiry which provides a number of updates.
- 2.2. The appeal site is almost 15.2ha. It consists of about half a dozen arable and pasture fields to the east of Newport Road and to the east and west of Cranfield Road. Part of the site is designated as Grade 3a agricultural land<sup>21</sup> in the Agricultural Land Classification. To the north is the former Wavendon Golf Academy which closed in 2018 and is laid out as a golf course with a formal parkland character. Further to the north of the former academy is the Grade II\* listed Wavendon House and a Grade II registered park and garden of the same name which was designated on 1 November 2019. To the east is agricultural land and to the south and west are residential properties at Parkway, Hillway, Tavistock Close and Ridgeway as well as the car park of the Wyevale Garden Centre. The site wraps around the Deethe Farm Industrial Estate. Deethe Farmhouse is listed Grade II and sits in the southern corner of the estate with commercial shed-type buildings to the north.
- 2.3. Internal boundary features include hedgerow and scrub. Mature trees and hedgerows bound the Newport Road and Cranfield Road frontages and the northern boundary with the former golf academy. A hedgerow also marks the boundary with a public footpath which runs through the site between the former golf course and the industrial estate. A Group Tree Preservation Order (TPO) protects trees at the proposed access point with Newport Road. A wider Area TPO<sup>22</sup> was designated on 8 January 2020 on land which includes the appeal site.
- 2.4. The site lies on the northern edge of Woburn Sands and beyond the development boundary for that settlement. The site is split between the parishes of Woburn Sands and Wavendon. There are neighbourhood plan areas covering both parishes although only Woburn Sands has a made neighbourhood plan. Woburn Sands is a small town with a range of shops and services including schools and a medical centre. There are bus links to Milton Keynes and a railway station on the line between Bedford and Bletchley. There are plans to upgrade the railway line as part of the east-west rail link between Cambridge and Oxford, while the area surrounding Woburn Sands is within the preferred corridor for the Oxford to Cambridge Expressway road proposal.

## **3. Planning Policy**

- 3.1. The relevant development plan documents for this appeal now comprise Plan:MK 2016-2031 (which has replaced the Milton Keynes Local Plan 2001-2011 and the Milton Keynes Core Strategy 2013) and the Woburn Sands

---

<sup>19</sup> RID14

<sup>20</sup> RID06

<sup>21</sup> RID24 and LPA4

<sup>22</sup> TPO1

Neighbourhood Plan 2014 (WSNP). There is also the Site Allocations Plan 2018 (SAP) which is of relevance for some of the disputed HLS sites (see subsequent sections of this report).

- 3.2. The National Planning Policy Framework (NPPF) was updated in February 2019 and a new section on housing supply and delivery in the Planning Practice Guidance (PPG) was published in July 2019.

*Plan: MK*<sup>23</sup>

- 3.3. The appeal site lies adjacent to one of only 3 key settlements (Woburn Sands, Newport Pagnell and Olney) in the rural area of Milton Keynes as identified by Plan:MK. They comprise the second tier of the settlement hierarchy in Policy DS1 and are considered to be the most sustainable rural settlements taking into account their population, constraints, transport links and the capacity of services within each town. Policy DS1 states that most new development within the rural area will be concentrated within these 3 settlements.
- 3.4. Policy DS2 sets out Plan:MK's housing strategy and seeks to deliver a minimum of 26,500 dwellings across the Borough of Milton Keynes over the plan period. The policy states that new housing development will be focused on, and adjacent to, the existing urban area of Milton Keynes as well as the 3 key settlements. There are 13 criteria within the policy setting out how this development will be delivered.
- 3.5. Policy DS5 defines open countryside as all land outside the development boundaries defined on the Policies Map. Planning permission in the open countryside will only be granted for development which is essential for agriculture, forestry, countryside recreation, highway infrastructure or other development, which is wholly appropriate to a rural area and cannot be located within a settlement, or where other policies within this plan indicate development would be appropriate.
- 3.6. Policy HN1 covers housing mix and density. Part C states that net densities of proposals for 11 or more new dwellings should balance making efficient use of land with respecting the surrounding character and context, and that higher density development will be encouraged in locations with good accessibility to facilities, that are well served by public transport, and where it can be accommodated by existing or improved infrastructure.
- 3.7. Although not mentioned in the updated reasons for refusal, Policy NE7 is referenced in the Council's planning proof of evidence which seeks to protect the best and most versatile agricultural land (land in grades 1, 2 and 3a meet this definition in the NPPF). In assessing proposals for greenfield sites, the policy states that the Council will take into account the economic and other benefits of such land. Development involving the loss of agricultural land should seek to use areas of poorer quality land (grades 3b, 4 and 5) in preference to that of a higher quality unless other sustainability considerations suggest otherwise.

*Woburn Sands Neighbourhood Plan*<sup>24</sup>

---

<sup>23</sup> CD5.31

<sup>24</sup> CD5.3

- 3.8. A small part of the site between Hillway and Ridgway falls within the boundary of the WSNP area<sup>25</sup>. Policy WS5 states that the preservation of the countryside setting, existing woodland and footpath links into the countryside is key to the future of Woburn Sands. The policy goes on to state that accordingly no extension to the current Woburn Sands Development Boundary will be permitted other than in the following exceptional circumstances:
- Plan:MK identifies a specific need for an amendment to the Development Boundary, and
  - Any proposed amendment is brought forward following full consultation with, and agreement by, Woburn Sands Town Council, and
  - The implications of any revised Development Boundary has been assessed in terms of the need to protect and maintain the character and countryside setting of Woburn Sands.
- 3.9. Although not mentioned in the original, amended or updated reasons for refusal, Policy WS6 was referenced at the second Inquiry. It states that existing housing developments in Parklands and on the Greens' site are expected to meet the needs for large scale housing development in Woburn Sands during the plan period. It goes on to state that additional housing in the plan area will be limited to small scale infilling between existing properties or redevelopment of existing properties other than in the following circumstances:
- The review of the MK Core Strategy [Plan:MK] identifies a specific housing need in Woburn Sands, and
  - Land proposed for development is brought forward after consultation, and agreement, with Woburn Sands Town Council, and
  - Development is of a scale and in a location that complies with the Vision and policies of the Neighbourhood Plan, and
  - Any such development is phased to take place in the latter part of the plan period in order to allow the assimilation of the increased population created by the already approved substantial developments.

*National policies and guidance*

- 3.10. NPPF paragraph 11 sets out a presumption in favour of sustainable development. For decision-taking this means either approving development that accords with an up to date plan without delay or where there are no relevant development plan policies or the policies which are most important for determining the application are out of date, granting permission unless one of two exceptions apply. The first is whether the application of policies in the NPPF that protect areas or assets of particular importance provides a clear reason for refusing the development. The second is whether any adverse impacts of granting permission would significantly and demonstrably outweigh the benefits when assessed against the policies in the NPPF taken as a whole.

---

<sup>25</sup> CD12.4

- 3.11. Footnote 7 to paragraph 11 clarifies that out of date includes, for applications involving the provision of housing, situations where the local planning authority cannot demonstrate a five year supply of deliverable housing sites (with the appropriate buffer set out in paragraph 73).
- 3.12. NPPF paragraph 73 states that local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing against their housing requirement set out in adopted strategic policies that are less than five years old. The supply of such sites should in addition include a buffer of 5%, 10% or 20% depending on the circumstances.
- 3.13. The NPPF glossary defines deliverable as sites for housing that should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. The definition goes on to state that, in particular:
- (a) sites which do not involve major development and have planning permission, and all sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (for example because they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans).
  - (b) where a site has outline planning permission for major development, has been allocated in a development plan, has a grant of permission in principle, or is identified on a brownfield register, it should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.
- 3.14. NPPF paragraphs 122 and 123 seek to achieve appropriate densities for development within the context of making effective and efficient use of land. Paragraph 122 sets out 5 criteria that need to be taken into account including (d) the desirability of maintaining an area's prevailing character and setting (including residential gardens), or of promoting regeneration and change.
- 3.15. Paragraph 123 states that where there is an existing or anticipated shortage of land for meeting identified housing needs, it is especially important that planning policies and decisions avoid homes being built at low densities and ensure that developments make optimal use of the potential of each site. It then sets out three considerations of which the first two are relevant to plan-making. The third sets out the following:
- (c) local planning authorities should refuse applications which they consider fail to make efficient use of land, taking into account the policies in this Framework. In this context, when considering applications for housing, authorities should take a flexible approach in applying policies or guidance relating to daylight and sunlight, where they would otherwise inhibit making efficient use of a site (as long as the resulting scheme would provide acceptable living standards).
- 3.16. Paragraph 170(b) recognises the intrinsic character and beauty of the countryside and the wider benefits from natural capital and ecosystem services including the economic and other benefits of the best and most versatile

agricultural land. Paragraphs 193-196 deal with the impact of development on designated heritage assets.

3.17. The Housing Supply and Delivery section of the PPG sets out a number of paragraphs relating to demonstrating a 5 year HLS. This includes a paragraph<sup>26</sup> on what constitutes a 'deliverable' housing site in the context of plan-making and decision-taking. It states that robust and up to date evidence needs to be available. Sites in category (a) of the NPPF definition are considered deliverable in principle. Sites in category (b) require further evidence to be considered deliverable. The paragraph states that such evidence may include:

- current planning status – for example, on larger scale sites with outline or hybrid permission how much progress has been made towards approving reserved matters, or whether these link to a planning performance agreement that sets out the timescale for approval of reserved matters applications and discharge of conditions;
- firm progress being made towards the submission of an application – for example, a written agreement between the local planning authority and the site developer(s) which confirms the developers' delivery intentions and anticipated start and build-out rates;
- firm progress with site assessment work; or
- clear relevant information about site viability, ownership constraints or infrastructure provision, such as successful participation in bids for large-scale infrastructure funding or other similar projects.

#### **4. Planning History**

4.1. Two outline planning applications were previously submitted on land forming part of the appeal site. The first (11/00936/OUT) was for the erection of 102 dwellings and associated garages/parking, creation of two new accesses and provision of open space and associated works, which was refused in July 2011. The second (12/01502/OUT) was a resubmission of the first application and was refused in October 2012. Neither refusal was appealed. Two planning applications similar to the one at appeal were submitted in January and February 2017, but were withdrawn prior to determination.

#### **5. The Proposal<sup>27</sup>**

5.1. The proposal is made in outline with all matters except the means of access reserved for subsequent approval. The access arrangements are shown on drawing nos.WO1188-101 rev.PO5 and WO1188-1021 rev.PO3 indicating junction geometries with, respectively, vehicle tracking and visibility splays. Each access is shown as a simple T-junction with 2.4m x 70m visibility splays. There are 4. Two are designed to serve a new 'spine road' running through the proposed development from Newport Road (at a position north of Frosts landscape business and the Wyevale Garden Centre) to Cranfield Road (at a point beyond the Deethe Farm Industrial Estate and Spinney Lodge); those

---

<sup>26</sup> PPG reference ID: 68-007-20190722

<sup>27</sup> Based on section 3 of the first Inspector's report and section 3 of RID06

access points are shown with 9m radii and are intended to serve a road some 6.2m wide suitable to accommodate buses. The access onto Newport Road entails the removal of 2 category A trees and 2 category B trees protected by the Group TPO. It also necessitates the relocation of a badger sett. Other trees protected by the Area TPO may be affected depending on details at the reserved matters stage.

- 5.2. The 2 other access points are shown on Cranfield Road, one on the outside of the bend beyond Ridgeway and the other opposite the Deethe Farm Industrial Estate; they are also shown with 9m radii, but with carriageways only 5.5m wide, as they are mainly intended to serve discrete parts of the scheme.
- 5.3. All other matters are reserved for subsequent approval, although an illustrative layout plan and a parameters plan show how the new road between Newport Road and Cranfield Road could serve a series of residential streets created partly around cul-de-sacs taken from that new road and partly around the 2 additional junctions on to Cranfield Road. Open space would be provided along with additional boundary screening, landscape buffers, play areas and surface water attenuation ponds.
- 5.4. The Design and Access Statement indicates that the dwellings would range in type and size and include both houses and some flats. 33% of the housing would be affordable dwellings equating to 67 units out of the proposed maximum of 203 units (25% would be affordable rented and 8% shared ownership).
- 5.5. The illustrative plans show the potential site for a doctor's surgery which would be provided if NHS England or the local Clinical Commissioning Group indicate that they would be willing to take advantage of such provision. It would either be a standalone facility or a satellite building for the existing surgery in Woburn Sands which has limited room to expand. Should the provision not be taken up, then 3 homes would be provided instead up to the maximum 203. This matter is addressed in the S106 agreement<sup>28</sup> and includes a financial contribution either towards the provision of the on-site surgery or expanding capacity at the nearest surgery serving the development. The S106 agreement also makes a range of financial contributions towards matters including education, open space, transport, community assets and social infrastructure. It also secures the provision of affordable housing on site.
- 5.6. Suggested conditions<sup>29</sup> are intended to ensure that the scheme would be implemented as intended and that the reserved matters and other details (including hard and soft landscaping and boundary treatments) would be submitted to the local planning authority for approval. In addition, foul and surface water drainage systems would be installed and controlled: a Construction Management Plan (including hours of operation) would be devised and implemented: a Landscape and Ecological Management Plan, including measures to safeguard protected species, would be prepared: a Travel Plan would be instigated: further archaeological investigations would be undertaken: the provision of 'green infrastructure', the retention of trees and the creation of new pedestrian and cycle facilities would be secured.

---

<sup>28</sup> RID37

<sup>29</sup> Section A2 of RID06

## **6. Other Agreed Facts**

6.1. The main SOCG<sup>30</sup> sets out a number of agreed matters including:

- The proposal would not have an adverse effect of facilities and services within Woburn Sands;
- The proposed highway junctions onto Newport Road and Cranfield Road would have sufficient capacity to serve the development and additional through traffic and there are no objections to the junctions in highway terms;
- The junctions will remain well within capacity and will not create any queuing or congestion issues on the existing highway network;
- The effect on the listed Deethe Farmhouse would result in a low level of less than substantial harm;
- There are no national landscape designations that require consideration, effects on the locally designated area of attractive landscape will be negligible and the site and adjacent areas are not 'valued landscapes' in the context of NPPF paragraph 170;
- The landscape impacts would be limited to the site and immediately adjacent fields and would carry limited weight against the proposal. It is agreed that the same approach should apply at the current Inquiry;
- The proposal should not be refused because of the Oxford-Cambridge Expressway or on the grounds of prematurity;
- The proposal is acceptable with regard to surface water drainage and matters of detailed design can be addressed via planning conditions;
- Matters relating to noise from the adjacent industrial estate can be addressed via planning condition; and
- Matters relating to biodiversity and protected species are not an issue for this appeal and can be addressed via planning conditions and reserved matters applications.

6.2. An addendum to the SOCG<sup>31</sup> was received after the inquiry addressing the recently designated Area TPO. It confirms that:

- The TPO covers a wide area including the appeal site. It is directed to a wide area rather than in relation to individual trees or groups of trees.
- It is subject to a 28 day legal challenge period up to 5 February 2020 and will remain in effect for 6 months up to 8 July 2020 and thereafter if it is confirmed or replaced in the meantime.
- It is agreed that this new TPO does not materially alter the planning evidence or planning balance as presented by each party

---

<sup>30</sup> RID06

<sup>31</sup> RID35

- Should outline permission be granted, this would allow for the removal of trees within the area covered by the TPO once details have been fully agreed at the reserved matters stage.
- The TPO protects trees on site until the implementation of the planning permission.

6.3. There is also a SOCG relating to housing land supply<sup>32</sup>, which sets out the following agreed matters:

- Plan:MK provides the basis for the calculation of the five-year housing land requirement. This states that there is a minimum requirement of 1,767 dwellings a year in the period April 2016 to March 2031;
- There have been 4,529 net completions in the Plan:MK plan period to 31 March 2019;
- There is a backlog of 772 dwellings as at 1 April 2019;
- All of this backlog should be met in the next 5 years (the Sedgefield method); and
- A 5% buffer should be applied to both the annual requirement and the backlog based on the published 2018 Housing Delivery Test results (February 2019).

6.4. The areas of disagreement relating to housing land supply are as follows:

- Whether or not a 5 year supply of deliverable housing sites can be demonstrated
- The timescale of the assessment (1 April or 1 October 2019)
- The timing of meeting the definition of deliverable
- The definition of deliverable
- Forecast completions
- The "optimism bias" (discounting dwellings from the supply)

---

<sup>32</sup> SOCG1

## 7. The Case for the Appellant<sup>33</sup>

### The previous decision letter and the first Inspector's report

- 7.1. The Council asserted that the previous SoS decision letter (DL) remained a material consideration relying on *Davison v Elmbridge BC* [2019] EWHC 1409<sup>34</sup>. That judgment is on appeal to the Court of Appeal and relates to a planning committee's decision not an appeal decision which is an important distinction. The most recent judgment in relation to a challenge against an appeal decision held that the quashed decision is of no legal effect and should not be sub-divided in respect of those matters on which it was quashed: *R (West Lancashire BC) v Secretary of State for Communities and Local Government* [2017] EWHC 3451 (Admin), [27]-[38].
- 7.2. The Council in opening accepted that the SoS DL was not material in terms of HLS and conflict with expired Policies S10 and H8 (location and density respectively) due to the court order and change in circumstances including the adoption of Plan:MK. The Council identified the DL's finding of failure to accord with WSNP Policy WS5 was relevant but made clear that the weight to be accorded to that policy would need to be considered afresh. The appellant accepts there is policy conflict but there remains dispute about datedness.
- 7.3. The Council confirmed that the DL findings on landscape and character, heritage, traffic, ecology and drainage remained relevant where the DL simply endorses the conclusions of the first Inspector's report.
- 7.4. The only basis upon which the Council maintains the SoS is bound by consistency as to both policy conflict and weight is DL paragraph 26 (and the finding that the proposals were contrary to NPPF paragraph 122 and 123)<sup>35</sup>. That is contentious and fundamentally incorrect. The approach does not correctly reflect the position that a quashed DL is of no legal effect. It ignores important changes in circumstances in the evidence before the Inquiry including:
- (a) the Appellant's updated evidence at this inquiry as to the actual net density of the scheme and the changes in housing mix;
  - (b) the changes to the development plan following adoption of Plan:MK; and
  - (c) the Council's concession through the evidence of its planning witness<sup>36</sup> that density is a matter to be addressed at the reserved matters stage in the context of layout and does not provide a basis for refusal.

### The Development Plan

#### *Plan:MK*

- 7.5. The Appellant acknowledges that the development is in conflict with Policies DS1, DS2 and DS5 of Plan:MK<sup>37</sup>. However, it is important to examine the extent of the conflict and how precisely it arises. The development is contrary

<sup>36</sup> Cross-examination and re-examination of Niko Grigoropoulos on Day 5

<sup>37</sup> APP8 page 7 para 3.1

to the terminology of the policies, given their reference to Policy DS5. DS5 is a counterpart policy. Where a proposal conflicts with DS5, it will be contrary to DS1 and DS2. However, it accords with the strategy underlying DS1 and DS2 insofar as directing development to the three key settlements in the rural area as locations that the Council has "chosen for development"<sup>38</sup>.

- 7.6. Woburn Sands is the only key settlement to have its own train station. Plan:MK does not identify any constraint on housing delivery or place any cap on the number of dwellings to be located at Woburn Sands. The first Inspector found Woburn Sands to be a sustainable location for growth (see IR9.48). The WSNP was adopted more than 5 years ago and 3 years prior to Plan:MK. It does not make any allocations and has not been reviewed.
- 7.7. The settlement boundary is tightly constrained. The application of and weight accorded to Policies DS1, DS2 and DS5 must yield to the assessment of HLS. The Council accepted<sup>39</sup> that it was to Woburn Sands as a key settlement that development should go in the absence of a 5 year HLS.
- 7.8. The Council has identified conflict with Policies HN1 and NE7 of Plan:MK but confirmed that all other policies weighed in support (including Policy HN2 in respect of affordable housing and Policy EH5 in respect of health facilities) or could be addressed through reserved matters.

#### *Woburn Sands Neighbourhood Plan*

- 7.9. It is accepted that the development conflicts with Policy WS5 as none of the named exceptional circumstances are presently met. The weight to be accorded to the policy must however reflect the extent to which the policy remains in accordance with the NPPF and up-to-date, for the purposes of NPPF paragraph 213.
- 7.10. The WSNP was adopted comparatively early in July 2014 and was assessed for general conformity against a now expired Local Plan backdrop and the 2012 version of the NPPF. Policy WS5 was identified at appeal as creating an unacceptable constraint on growth in circumstances where there was no 5 year HLS. It was accorded very little weight in the Frost appeal<sup>40</sup> and the first Inspector for this appeal stated it was contrary to the advice in the NPPF (see IR9.20).
- 7.11. The policy is not consistent with the NPPF including the second test which requires the agreement of the Town Council. This was added after the examination without the recommendation of the examiner or any further assessment<sup>41</sup>. The policy also seeks to protect the countryside for its own sake which is at odds with the more balanced approach in NPPF paragraph 170(b).
- 7.12. The WSNP makes no provision for an up to date housing requirement in line with NPPF paragraph 65 and 66 and contains no allocations or policies to provide for housing. The lack of WSNP review means that the obvious defects of Policy WS5 have not been scrutinised. The Council is incorrect to say that

<sup>38</sup> CD5.31 Glossary on page 286

<sup>40</sup> CD6.6

<sup>41</sup> CD5.17 paragraph 7.6.12 and recommendation 2B

the policy has been given a new lease of life by Plan:MK as the Plan Inspector could not and did not make any finding on the soundness of this policy.

- 7.13. The Council's planning witness accepted no conflict with Policy WS6 in cross-examination but the Council's advocate seemed to withdraw that concession in cross-examination of the appellant's planning witness. The policy is parasitic on WS5 and equally inconsistent with the NPPF, requiring the agreement of the Town Council and seeking to delay development to the end of the plan period. This reduces the weight to be accorded to it.
- 7.14. Irrespective of the 5 year HLS position, Policies WS5 and WS6 are out of date for at least two reasons: (1) their wording is highly restrictive and fails to accord with the NPPF and (2) the WSNP was not prepared using an up to date housing requirement and makes no housing allocations.

### Housing Land Supply

#### *Overview*

- 7.15. The SOCG on HLS sets out a number of agreed matters in terms of housing requirement, net completions, the backlog, the use of Sedgefield, the buffer and the resulting requirement.
- 7.16. Plan:MK was assessed under the tests contained in the old 2012 NPPF and the Plan Inspector made no findings as to deliverability under paragraph 73 and glossary definition of the 2019 NPPF. The Council's HLS witness accepted that the Plan Inspector's Report does not help in determining whether the Council can demonstrate a 5 year HLS now.
