Subject: Bloxham proposed development for 95 new houses - Ref 19/01705

Hello Samantha

We are residents in Bloxham and have seen the negative impact of the existing developments in the area. The roads around the centre of Bloxham are a regular bottle-neck, the roundabout near the petrol station is usually very busy as well. The roads need to be more regularly fixed due to volume of traffic on them. We have suffered recently from noise pollution of the road repairs being carried out each night. This will only get worse if more houses are built in the area.

Besides 3 developments in Bloxham, there are at least 5 others in the neighbouring village of Deddington and Adderbury not to mention those on the way to Banbury. How many extra houses are really needed?! To my eyes, nothing is being done to improve or extend the transport infrastructure around Banbury and they want to reduce the size of the main hospital, which seems crazy!

Why do we need 95 more houses? Where are all these people currently living?

As you can tell I am against this proposed development and hope that sense prevails and consideration for the current residents. The scale of development in the last 5 years seems unprecedented, both locally and nationally. Surely, it is a direct result of the government help to buy scheme, which has been a boon for the building companies, but not home owners. Enough is enough.

Regards

Richard
