Subject: **FW: Application 19/01705/OUT. OBJECTION. Additions to previous submission**

The following point are further to those made in my previous submission.

1. There could be a big impact on wildlife in the very adjacent SLADE.
2. The Rec will become an urban park whereas currently it has open views
3. The A361 currently carries a great volume of traffic that causes congestion in the village and makes crossing it dangerous in some places, for example by the church. Very large vehicle now are regular. Traffic at the small island causes hold ups and some risky moves by impatient drivers.
4. There are a number of unsold properties in Bloxham, small to large, some of which are on new build sites.
5. Views all around are changed from open countryside to restricted.
