Subject: Objection to the new development by Gladstones in Bloxham
Importance: High

Dear Samantha

I would like to raise my extreme objections to the new proposed development in Bloxham by the recreation ground with the developer Gladstones.

There are several reasons:

- The environmental impact, at the moment maintaining wild life, green spaces, trees and nature and the slade are very close to our hearts and more building takes away more wildlife so impacting on those who can not speak and on the mental well being of the hundreds and thousands who treasure it
- when we moved here we were able to get to country side easily, now this is getting further away for us due to new housing
- We live in a listed grade 1* property on the A361 and this road is getting busier and busier and affecting the houses with the heavy traffic. For instance damage to the brickwork and the roofs have been affected... we need to help protect our grade 1* and grade 2 properties.
- The A361 through the village is far too busy and fast, nursery schools, schools and shops mean there are children and people crossing---- too dangerous to take even more traffic
- Lots of other village developments over the last few years and even more traffic!!!

Could you please pass on these comments to planning
