Dear Shona King

I am writing with my concerns of the above planning request. I am not happy with the way the plans look directly into my garden where I have lived for twenty five years the way it would look at the moment it will block a lot of light from my kitchen and living room windows also they would be able to look straight in as we would then I am suggesting a quarter turn so they we cant see into each other homes and maybe not quite so close to where I live.

The entrance they are proposing to make into a road is a very busy street and extra traffic once the houses are built seeing that most families these days have to two - three cars per household will prove to be a danger to pedestrians on the high st.

I have been told by the above that they intended to remove the barn and make into a dwelling and it was always going to be a small holding like Mrs Watsons father had this was nonsense as they had this planned all along. The barn however is made part from asbestos which must be taken down professionally as it would be a health hazard. whichever way they decide to go as a road or a conversion which is what they applied for first.

Yours sincerely

 (Mr Michael Tiddy)
