

## Former Methodist Chapel, Colony Road, Sibford Gower

Front elevation circa 2016— Main building constructed in 1860s, the extension & porch in the 1930s.

**Proposed conversion of redundant chapel into residential dwelling**

## **Design Brief**

The former chapel is a modest and very simple building and the proposed scheme sets out to minimise changes to its external appearance

The existing doors and windows will be retained and refurbished as necessary

The entrance porch and door will be retained in its current form and will be renovated as required

Two additional conservation Velux type roof windows are proposed for the East elevation, with one on the South elevation, and three on the West elevation

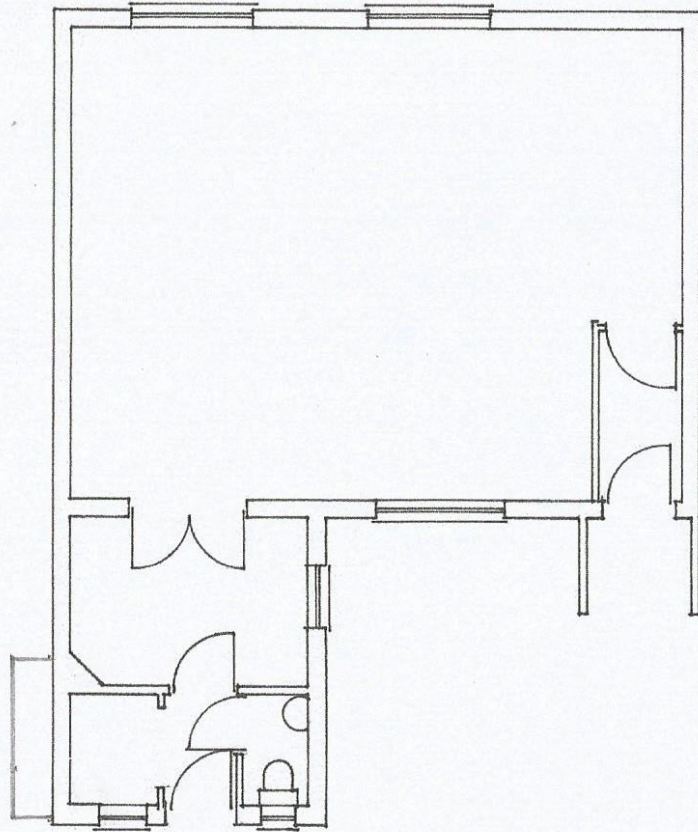

Traditional cast iron type guttering and down pipes will be retained

There will be provision for bins & bicycle storage

The proposed accommodation has two bedrooms, on a gallery floor, with a double height space and the retention of the existing kitchen

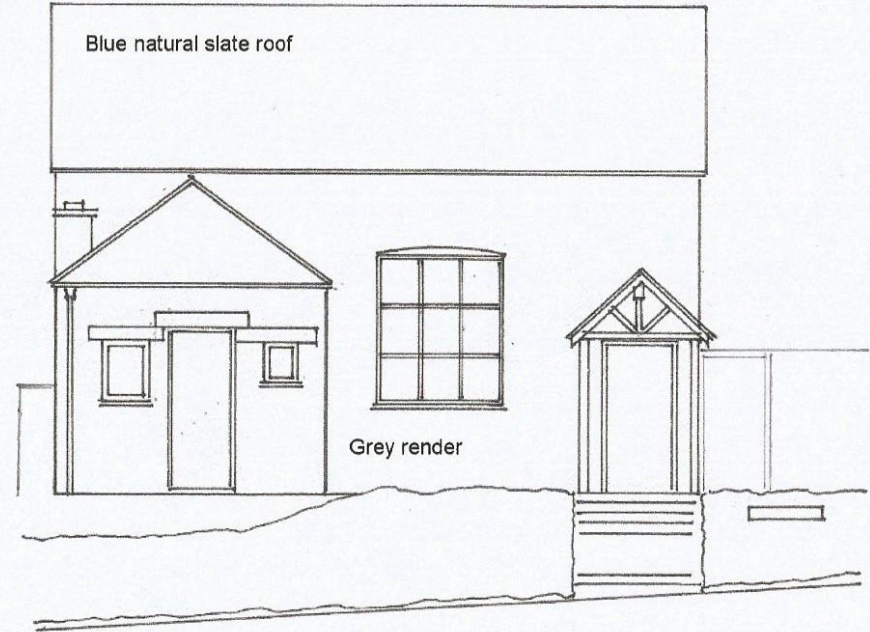

An open porch will be added to the kitchen entrance

**The objective is to provide a modest family home that will complement and enhance the street scene**
