

On the left low garden walls of Deerfields Farm house with stables beyond – the low triangular roofs (- proposed 2 x 4 bedroom houses,) followed by 5 existing houses which front Canal Lane, rear vehicle access only, part of Longford Park.

Removing the cones and vehicular access obstacle not only allows narrow access to the 2 proposed houses, it allows front access to the three houses this side of the gate and other properties beyond.

No places to park, pass or turn round.

Could proposed properties have rear vehicle access only, like their existing neighbours?

Pre-existing properties fronting Canal Lane with rear access for vehicles.
Planning documents do not mention Right of Way gate.
