Comments	<input type="text" value="I would like to object to the above application on the grounds of the building being inside a conservation area and any proposed development should be outside of it. Large vehicles already accessing the water works at the bottom of the lane do so with difficulty . With the requested proposal for building this will cause damage to the narrow lanes and verges. As there is only a single track lane into the the proposed site with no public footpaths it will impact on the safety of local children and pedestrians using the lane to access the playing fields and local area footpaths. Building on this land will require several trees to be felled, impacting on the local wildlife and environment. This area has flooded on a number of occasions and there has been contamination of the ground by raw sewage caused by a failure at the pumping station situated in the area."/>
