<b>Type of Comment</b>	<input type="text" value="Objection"/>
<b>Type</b>	<input type="text" value="neighbour"/>
<b>Comments</b>	<p>As a resident of Tanners Lane we love living in the safe conservation area of Adderbury. We are blessed with beautiful open spaces which contribute to animal habitats and the enjoyment of all. We enjoy walking and drinking in the tranquility of the area when we walk our dogs on a regular basis within the surrounds of this area. We are most disheartened to learn that this is under threat, the properties would not only increase pollution but also be a huge blot on the landscape. Tanners lane is not easily accessible for emergency vehicles and this would also prove problematic along with the huge volumes of building materials that would be delivered over 12-24 months. We live in an era in which our countryside is being destroyed and littered with housing developments for material gain, this is no different. What is a quiet area and the sole reason we moved here would become noisy,over-inhabited and not only destroy our quality of life but the animals such as deer,owl and herons. Young people are already struggling to access affordable housing and building excessive properties like contributes towards the struggle. The inhabitants of the proposed three properties would increase risk of accidents given increased vehicles and unnecessary traffic flow. Why should our PUBLIC footpath be diverted, this is a public right of why that should remain so. The thought of looking out of my window and not seeing the array of greenery saddens me. 400 year old oak trees are at risk because of ground works. Why would we risk the preservation of our environment and safety for the erection of three 5 bedroom houses? This shows a complete disregard for our community and is attributed to greed. I am strongly opposed to these properties being built.</p>
