Comments	<p>The entrance to the site is too close to the junction with Wallin Road, not only is it visible from our address it is likely to create friction with traffic that is entering and leaving Wallin Road. The entrance to Henge Close is also to be considered, being within close range of the other two junctions. We would like to be reassured that the grass verge and current mature hedge will be retained, there are a variety of birds that use the hedge and it is also high enough to shield the building and car park area. We do not want any light pollution from this development and are not reassured by the planning design and proposal. We experience limited light pollution in this area and would like this to continue. This is also pertinent to noise pollution. Please ensure that users of the building and sports pitches DO NOT park in Wallin Road when there is no available parking. We are disappointed that we are going to have to experience yet more construction, which has been continuous since we moved here in 2015. In our experience this creates noise, mess, debris, dirty roads and impacts the external and internal areas of our home, how are you going to ensure there is no impact on neighbouring properties throughout construction?</p>
