1.0 INTRODUCTION

1.1 David Tucker Associates (DTA) have been commissioned by Framptons Planning to provide transport and highways advice for a proposed development of the erection of up to 8 dwellings in the domestic curtilage of The Beeches, Steeple Aston. The indicative site masterplan is attached at **Appendix A**.

1.2 This Transport Statement (TS) has been prepared in accordance with the National Planning Policy Framework (NPPF). The NPPF document states that all developments that generate significant amounts of movements should be supported by a Transport Statement or Transport Assessment. This TS includes the following headings:

Chapter 1: Introduction

Chapter 2: Existing Conditions

Chapter 3: Development Proposals

Chapter 4: Summary and Conclusions

1.3 This TS considers the traffic impact of the development proposals on the adjacent highway network. The traffic generation of the site confirms that the site will generate a modest number of vehicular movements and would not result in a detrimental impact on the local highway network.

2.0 EXISTING CONDITIONS

2.1 Site Location

2.1.1 The site is located in the village of Steeple Aston. It is bound by housing to the north and agricultural land to the south and west. Heyford Road runs along the eastern site frontage.

2.2 Local Highway Network

2.2.1 The existing vehicular access to the site provides access to the proposed dwellings and the site.

2.2.2 Heyford Road to the east of the site runs in a north west-south direction connecting to the A4260 Oxford Road to the west and the B4030 to the south. Heyford Road is subject to a 30mph speed limit in the vicinity of the site.

2.2.3 To the north west of the site the A4260 Oxford Road is subject to the national speed limit and links the A34 from the south to Banbury to the north.

2.2.4 To the south, the B4030 provides access to the A44 to the west and Bicester to the east.

2.3 Existing Traffic Flows

2.3.1 In order to establish existing flows in the vicinity of the site, an automatic traffic counter (ATC) was undertaken to the south of the site access at the 30mph/ 60mph speed limit change. It was carried out between 3rd May 2019 and 9th May 2019. The summary results are shown in **Table 1** below with the full results being attached at **Appendix B**.

Table 1- Volumetric Summary of Glasshouse Lane Traffic Flows (at the Site Frontage)

	5 Day Ave.	7 Day Ave.	85 th %ile (mph)	Mean Speed (mph)
Northbound	484	436	33.3	28.2
Southbound	511	463	35.7	30.6

2.3.2 The results demonstrate there is good compliance with the posted speed limit due to both directional mean speeds being at or below 30mph.

2.4 **Personal Injury Collision Data**

2.4.1 Personal Injury Collision (PIC) data has been obtained by Crashmap for the last five years. This confirms that there have been no recorded accidents within the vicinity of the site.

2.5 **Walking and Cycling**

2.5.1 There are a number of existing pedestrian routes within the vicinity of the site. A footway is located on the eastern side of Heyford Road which links to the village centre.

3.0 DEVELOPMENT PROPOSALS

3.1 Overview

3.1.1 The development proposals are to redevelop the land at The Beeches and provide 8 new dwellings.

3.2 Site Access Arrangement

3.2.1 The access proposals are to provide a 5.5m shared surface into the existing site access at The Beeches in accordance with the requirements of the County Council as Local Highway Authority.

3.2.2 The access proposals are shown on **DTA Drawing 20388-02b**. Visibility splays of 2.4m x 59m are proposed which are in excess of the 53m and 47m that would be required by the recorded 85th percentile speed of traffic.

3.2.3 **Drawing 20388-02b** provides vehicle tracking information to demonstrate that a refuse vehicle can enter and exit the site in a forward gear.

3.2.4 **Drawing 20388-03** shows a new connecting footway. This will provide a new 1.5m footway adjacent to the northern access kerb line terminating at a dropped kerb crossing point. This will connect to the existing footpath which will be upgraded to 1.5m in width with a bound surface for approximately 40m in length. This will then connect back to Heyford Road via a dropped kerb opposite the existing footway to the west of Heyford Road.

3.2.5 It is envisaged this provision will be secured via a suitably worded planning condition with full details, alignment and construction specification to be agreed during the technical approval process of the necessary highway works agreement.

3.3 Proposed Traffic Generation

3.3.1 In order to assess the likely traffic movements relating to the proposed development, the TRICS database was interrogated (TRICS 2018 (b) v.7.5.1 on line). This database contains surveys of the vehicle and multimodal trip generation of a wide variety of sites which are classified by land use and various other attributes.

3.3.2 The TRICS database has therefore been interrogated for Houses Privately Owned Land Use 03/A. The resulting TRICS outputs are attached at **Appendix C** and summarised below in **Table 2**.

Table 2 – 8 Dwellings Trip Rates and Traffic Generation

Time Period	Trip Rates			Traffic Generation		
	Arrivals	Departures	Two-way	Arrivals	Departures	Two-way
AM Peak (08:00-09:00)	0.118	0.345	0.463	1	3	4
PM Peak (17:00-18:00)	0.306	0.153	0.459	3	1	4

3.3.3 As can be seen in **Table 2** above the development is predicted to generate 4 vehicle movements in each of the peak hours.

3.3.4 This level of development flow is minimal and would have no material adverse impact on the local highway network. Furthermore, this level of traffic is well within the daily variation of traffic flow.

4.0 SUMMARY AND CONCLUSIONS

- 4.1 This Transport Statement has been prepared on behalf of Frampton's to provide transport advice for their proposed residential site in Steeple Aston.
- 4.2 A review of personal injury collision data has been undertaken which confirms that there are no existing road safety issues that would be affected by traffic from the development proposals.
- 4.3 The development will be served from an existing improved access road into the site.
- 4.4 The traffic generation forecasts confirm that the site will generate minimal levels of traffic onto the local highway network. It is therefore concluded that the development impact is minimal and will have no material adverse impact on the local highway network.
- 4.5 This Transport Statement has demonstrated that the development is fully in accordance with both national and local policy and in particular confirms that the impact of the development is not severe. On this basis it is concluded that there are no grounds for refusal on highway grounds.

To Oxford

New fencing to maintain 3m buffer to site boundary in accordance with Ecologist's recommendations

Courtyard with turning head for emergency vehicles

Replacement trees for T60 & T61

Passing Bay

New access road 'no dig construction' within tree root zones

Access reformatted to County Highways requirements

Existing boundary planting reinforced with new native tree & shrub planting

'green space' 200m²

'green space' 200m²

Existing driveway widened

Replacement tree for T13

Existing boundary planting reinforced with additional new planting

New fencing to maintain 3m buffer to site boundary in accordance with Ecologist's recommendations

New boundary to existing house with new screen planting

Key:

Site Boundary	No dig construction	Proposed Replacement Tree Planting
Site entrance	Existing Cat A Trees	Proposed new planting/boundary reinforcement
Existing Footpath	Existing Cat B Trees	Existing Cat C Trees
Existing Buildings	Existing Cat U Trees	Existing Trees Proposed to be Removed
Existing buildings/structures to be removed	Root Protection Areas	Pumping Station - refer to drainage strategy
Proposed New Dwellings	Bin Collection Point - 18no. wheelie bins	Allocated on-plot parking spaces
Existing Access Drive Widened	Unallocated visitors parking spaces	New fencing protecting buffer to site boundary
Proposed New Roads (Permeable surface with below ground surface water attenuation - subject to civil eng's advice)		
New/existing private gravel driveways		

NOTE: Retention of trees T73 & T76 subject to feasibility of providing adequate root protection during demolition of existing adjacent buildings. Should retention not prove feasible replacement trees to be provided as part of detailed landscape scheme.

Total Rates:			2.099			2.180			4.279

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: $COUNT/TRP*FACT$. Trip rates are then rounded to 3 decimal places.

The survey data, graphs and all associated supporting information, contained within the TRICS Database are published by TRICS Consortium Limited ("the Company") and the Company claims copyright and database rights in this published work. Parameter summary

Trip rate parameter range selected:	6 - 363 (units:)
Survey date date range:	01/01/10 - 20/11/18
Number of weekdays (Monday-Friday):	33
Number of Saturdays:	0
Number of Sundays:	0
Surveys automatically removed from selection:	3
Surveys manually removed from selection:	0

This section displays a quick summary of some of the data filtering selections made by the TRICS® user. The trip rate calculation parameter range of all selected surveys is displayed first, followed by the range of minimum and maximum survey dates selected by the user. Then, the total number of selected weekdays and weekend days in the selected set of surveys are shown. Finally, the number of survey days that have been manually removed from the selected set outside of the standard filtering procedure are displayed.
