<b>Type of Comment</b>	<input type="text" value="Support"/>
<b>Type</b>	<input type="text" value="neighbour"/>
<b>Comments</b>	<input type="text" value="As someone who has lived in the area for a number of years I have watched in dismay at the number of planning applications that do not meet requirements, do not fulfill criteria and predictably, become a hazardous blot on our natural landscapes and conservation areas. What a refreshing and welcome approach this application is then, and one that should be supported. Impressive attention to detail with consideration for the natural surrounding lands and nearby village at the forefront of the design. Environmentally friendly, creative in aesthetic and complimentary to local area. Applications such as these should be encouraged and supported as they can set positive precedents and benchmarks for any future planning applications close to Wigginton that would ensure the protection and preservation of the natural landscape. I use the footpath that passes the proposed development and have noticed the dying woodland and strangled undergrowth that would be vastly improved should the application be successful. The appearance of the immediate area would be greatly enhanced, wildlife would thrive and it would be virtually impossible to view the proposed dwelling from the footpath or much of the surrounding area. I sincerely hope this application is successful at it will likely safeguard and future proof our beautiful surrounding countryside against inappropriate and damaging applications from less considerate developers in the coming years by setting an example of how it should be done."/>
