Comments	<input type="text" value="I would like to offer my full support for this application. It is in a beautiful area with which I am very familiar. I can see that the ash dieback will have a devastating impact on the site if nothing is done, and I applaud the landscaping proposals, which will protect and enhance the site. I think the design of the house is fabulous, and particularly like the multi-generational idea. This house would be barely visible, only glimpsed through the trees from the footpath to the south, so I can't see any adverse effect - only positives, with the advancement of eco-friendly design and the enhancements to the landscape and ecology of the site."/>
