Case Officer	Matthew Chadwick
Organisation Name	Timothy Watson
Address	26 Teasel Bank, Harwell, Didcot, Oxfordshire, OX11 0FH
Type of Comment	Objection
Type	neighbour
Comments	<p>To whom it may concern, I call on you and your conscience, ethics and morals to immediately REFUSE permission for the abomination that is this planning permission proposal. First and foremost is the appalling and irreversible impact this will have on nature and the environment. From the moment this site is developed, you will be directly responsible for the catastrophic destruction of the homes and habitats of thousands of organisms and animals. Even after the development is complete, it will take decades for the area to recover to only a fraction of what it was once able to support. You may think that this is an acceptable cost for the advantageous position of providing homes for more than one person, but this is simply not the case. The proposer of this application owns multiple homes [REDACTED] on a piece of rare, precious greenfield space that should not be made available purely on the basis that someone has the means to develop it. [REDACTED]</p> <p>[REDACTED] when it comes as such considerable cost to the environment. Be aware that by approving this disastrous proposal, you are opening the flood gates to hundreds of other greedy developers who will turn this historic settlement into a modern town over the next decade or two. You will destroy the area. Forever. Irreversibly. For thousands of animals and organisms. Your children and grandchildren will forever feel the shame of your decision today should you choose to go ahead with this. This is an unallocated site beyond the built up limits of Wigginton, extending into the open countryside in a manner which does not accord with any strategy for growth by an council in the United Kingdom. The benefits of the proposal will not and never will outweigh the harm and no material considerations exist to warrant a departure from what has stood in this area for several decades. The proposal also represents an exposed and visually poorly connected extension of the village into open countryside. The proposal would be visually intrusive and erode the sense of isolation, and detract from the open and rural character and appearance of the area and the vernacular appearance of the edge of the west side of the Village, resulting in less than substantial harm to the settings of the Wigginton conservation area and listed buildings within the Village. This adverse harm is considered to significantly and demonstrably outweigh the scheme benefits. As such the proposal should be considered contrary to policies of the local council and Government. [REDACTED]</p> <p>[REDACTED], leisure, recreation, public transport, education, public art, street naming and waste bin provision, and the management of public open spaces and play area the proposal would place increased pressure on these facilities and fail to provide the social, recreational, and cultural facilities and services the community needs. I call upon all who read this to look at the facts and not be swayed by the false and fake letters of support that are being submitted by the proposer's friends, family and colleagues - who have never visited the area. This development serves no benefit to any person, animal, friend or foe other than the proposer. [REDACTED] developing the rare piece of outstanding natural beauty will destroy the habitats of thousands of animals and organisms and RUIN the historic village and its community spirit forever. Please, for the sake of your children and grandchildren, make a decision that will make them proud and not ashamed of you today and REFUSE PERMISSION NOW AND FOREVER MORE. Thank you for your time in reading this today, Tim Watson</p>
