<b>Comments</b>	<input type="text" value="My objection is focused primarily on the health and safety of my children. We moved from the city to the countryside for a safer, quieter upbringing, away from pollution and noise. The pollution levels this will bring has not been discussed with the local village, with special considerations required for the young and elderly pollution of the village in which this could affect. The increased noise in general is disruptive and increasing in both the sound level and frequency, to the level in which I cannot even hear my children playing in the garden. The village has many I/II graded properties and is in a conservation area therefore many properties are unable to have sufficient glazing to prevent the noise from being heard inside. The increased traffic through the village (despite signs up to avoid the village) and surrounding roads is a huge concern. We have young children and we regularly enjoy a bike ride on the weekends as a family. If there is a weekend event then it is too dangerous to take them onto the roads on their bikes. The people attending these events have large vehicles towing the bikes which only increases the danger on these narrow roads. The damage to the roads has increased, pot holes are already an issue and this is only worsening the problem. The council do not have the funds to keep the roads maintained at the current level."/>
