<b>Comments</b>	<input type="text" value="We wish to strongly oppose this application. From an environmental aspect, we would have grave concerns over the contamination of both water courses and the deeper ground water. Particularly when so close to rural villages and local businesses which are so dependant on this natural resource. Potentially causing irreversible damage as well as contaminating site specific, local habitats for wildlife, together with the wider landscape. Not to mention the flammable and explosive nature of the proposed material to be stored. This application is out of character for the area, with the proposed 24hour operation, increasing the inevitable associated noise and pollution to local residents."/>
